How to keep your cooler while you're

COOK FLAMELESS ELECTRICI With famelon electric cooking, pots and pans sit directly on electric heating elements, and absorb the heat before it can escape to warm up the kitchen. Air circulation isn't needed to support combustion, so flameless electric evens are fully insulated on all four sides, top and bottom to "lock" cooking heat inside where it's used and wanted. This means your air conditioning equipment will have an easier task . . . work more efficiently and economically because it doesn't have to overcome heat wasted into the kitchen air by cooking flames. See the new electric ranges at your dealer's soon . . . and enjoy a cooler kitchen ... electrically!

The final regular meeting was held last Tuesday, at which time an installation service for new officers was held. Mrs. A. E. Cushman, leader for this service, gave the opening prayer; and scriptures for the program was read by Mmes. Frank Crowell, L. C. Brown and Earl Bender.

J. Lester Davenport, pastor, presented challenging ideas to the group as a whole, and to the incoming officers in particular concerning the consistent discharge of Christian duties. He reminded the nonofficials of their duties of co-

summer, or for a full year if you choose,

will be needed in their own communities

to assist four- and five-year-old children

of the poor through Project Head Start

Child Development Centers. Thousands

more are needed to live and work among

poor families by enlisting in VISTA, the

In Head Start, volunteers work side-

by-side with teachers, social workers,

doctors, and other professionals to give

pre-school children advantages which

can change the patterns of their lives. Many of these children have never held

a doll, never scribbled with crayons.

Meager environments have blunted their

curiosity. Some are spoken to so rarely

that they are unable to form sentences.

Head Start volunteers will read to children, take them on outings to zoos and

domestic Peace Corps.
