Johnson's Draft System Reform Includes Lottery, Few Deferments

Decision on College Status Is Put Off

SAN ANTONIO, TEX. (UPI) — President Johnson told Congress today he will curb unfairness in the draft by ordering callups of 19-year-olds first, picking them by lottery, and tightening deferments.

While announcing sweeping revision of the Selective Service System, he put off a decision on whether college undergraduates should be deferred. Their deferments will continue, he said, while he awaits more congressional and public debate of this politically thorny issue.

Lawmakers To Consider LSD, Tax Legislation

AUSTIN (UPI) — The Legislature busies itself with committee hearings on everything from LSD to taxation this week while waiting for the real action to begin next week.

The "60-day rule" which requires a four-fifths vote before the Senate can take up a bill goes off Friday, clearing the way for consideration of such controversial legislation as a city sales tax and daylight savings time.

Until the 60th day of the session passes, there will be a shortage of major legislation available for floor action. Neither House had major bills scheduled today.

Witnesses Expected

The House Criminal Jurisprudence Committee expected to hear from some LSD users later today on a bill by Rep. Burke Musgrave of Breckenridge that makes possession of the drug a crime.

Musgrave said he would call on state and federal drug experts to refute claims of LSD users that there is not enough evidence of the drug's dangers.

Tuesday the House Tax Committee begins hearings on part of Gov. John Connally's \$187.5 million tax package.

McNamara Pushes Guard Cut Plan

WASHINGTON (UPI) — Defense Secretary Robert S. McNamara today appeared headed for another collision with Congress over his two-year old plan to eliminate 15 of the 17½ National Guard divisions.

During the weekend McNamara was reported determined to carry out his plan, though a Defense Department statement indicated that a current study by the Joint Chiefs of Staff could result in some modifications.

Late in 1964 McNamara said that the guard's 15 "low priority" divisions were "surplus" and should be reduced to brigades. He has seldom modified his decisions.

"If there are surplus units, these will be eliminated, with full consideration for individual state requirements," the Pentagon statement said.

The low-priority divisions, four armored and 11 infantry with a total of 118,000 men, now are about half of war strength. If they were reduced to brigades at full strength, they would have about 75,000 men.

The House Armed Services Committee, however, has approved drill pay for a civilian army of 640,000, with 380,000 in the National Guard, and 260,000 in the Army reserve.

The Defense Department is expected to seek a lower figure. But the Pentagon said in its statement that "nothing will be done until the Joint Chiefs of Staff complete their study."

Johnson told the House and Senate in a special message that he will halt deferments for graduate students, except those in medical and dental schools. He said many post-graduates "have managed to pile deferment on deferment until they passed the normal cut-off point for induction."

Officials said it will take at least a year and probably longer for the lottery system to come into effect because so many details have to be worked out. Johnson set a Jan. 1, 1969, deadline for completing the overhaul.

Administration experts said it also will take some time — how much, they do not know — for Johnson to issue new orders on deferments, since this too carries many unworked-out complications.

But in essence, they said, there would be no marriage deferments or deferments for fatherhood except in hardship cases. Other hardship deferments also would continue but on a "tightened" and national standardized basis.

The heart of the new system will be what Johnson called "a fair and impartial random system of selection" — a method still to be devised by a special task force but one which officials said would resemble a lottery.

Men of 18 who are classified 1-A would be placed in a "selection pool" from which the needed number would be chosen when they are 19. Since this pool would be replenished annually with new 18-year-olds, men who are not called would be less vulnerable to induction as each year passes.

College students or others with deferments would be placed in the current year's selection pool when their deferments expire if they are under 35 years of age.

For non-deferred men in the 19 to 26 age bracket now subject to induction, the order of call would be reversed from its present "oldest first" concept. Officials said this would not mean a significant change now, with draftees averaging 20½ years of age, but it would be important in later years.

In adopting the "youngst first" and lottery concepts, Johnson went along with his 20-member National Advisory Commission on Selective Service whose report he made public Saturday. But in deferring action on college deferments, he shelved the commission's majority view that these should be abolished.

He also decided to order a detailed study — rather than acceptance — of the commission's proposals to wipe out the nation's 4,000 volunteer-operated draft boards and set up 300 to 500 area offices where civil servants would register and classify registrants.

GRAND CHAMPION—Lynn Baggett of Hamphill County 4-H Club shows off his 215-pound Grand Champion Hampshire hog and the ribbon it won for him at the Top O' Texas Stock Show today. Young Baggett is the son of Mr. and Mrs. E. D. Baggett of Canadian.

Hampshire Hog Wins Grand Championship

Lynn Baggett of the Hamphill County 4-H Club, took the top prize this morning when his 215-pound Hampshire hog won the grand champion ribbon at the Top O' Texas Stock Show Junior competition.

Gary Cockrell of the Pampa FFA was presented the reserve grand champion ribbon when his 210-pound Poland China was picked by L. M. Hargraves, Texas Agricultural College, who judged the 190 hogs of 280 total swine-calf entries.

In the showing of the Poland China, Cockrell had the breed champion and Bill Skaggs of the Pampa FFA had the reserve breed champion.

Duval Burron of Canadian won the breed championship in the Duroc Jersey class with his 235-pound hog and Kevin Kelp of White Deer had the reserve breed champion, a 200-pound Duroc Jersey.

Baggett's Hampshire was also the breed champion in his class and Doc Cornutt, Pampa, won the reserve breed championship with his 208-pound Hampshire.

Chris Skaggs of the Gray County 4-H won the breed championship in the crossbred and other-breeds class with his 218-pound hog and Wendell Hardin of the Hamphill County 4-H won the reserve breed championship ribbon.

The 90 steers and 190 swine entered in Top O' Texas Junior Livestock Show this week were weighed and sifted yesterday and will be judged and sold through Wednesday.

The first program will be the annual Top O' Texas Rodeo Association's Junior Exhibitor's Barbecue at the show barn at 4 o'clock tonight.

The Pampa Shrine Club will cater the western-style barbecue, a traditional event with the livestock show.

More than 500 persons attended the barbecue in 1966. Tickets may be purchased at the door, Bill Tidwell, rodeo association president, said.

The program includes parading of show champions, and awarding of prizes and trophies won in the judging today.

The Swing Kings and Harris Brinson, Pampa High School

band director, will present special music.

The third judging event is the Future Farmers of America Livestock Judging contest at 9:10 a.m. tomorrow with 50 area judging teams entered.

Dale Ponder of the Pied Piper Ranch, Hamlin, will place cattle for auction in the judging of the Hereford breeding cattle at 1 p.m. tomorrow.

Douglas C. Davis, district manager of the American Cyanamid Company's Agriculture Division, Dallas, will speak at 5 p.m. Tuesday in the senior high school cafeteria during the FFA Livestock judging banquet.

Also during the FFA banquet, the \$500 Frank M. Carter of Pampa scholarship will be awarded to a FFA member of Area 1.

Area 1 includes all of the Texas Panhandle north of Lubbock. Quentin Williams and J. P. Smith, who are in charge of the contest, will make FFA awards.

Joe Gordon is chairman of judges who will select the scholarship winner.

The scholarship is to be used (See SHOW, Page 3)

Officials Lift Curtain Of War Loss Secrecy

SAIGON (UPI) — Military spokesmen today for the first time lifted the secrecy curtain over exact daily U.S. combat losses and revealed American troops killed at least 80 Communists at a cost of 24 Americans slain and 74 wounded in jungle fighting throughout South Vietnam.

They said the United States lost six helicopters and listed four crewmen missing.

The spokesmen also confirmed that two U.S. Air Force F4C Phantom jets were responsible for the bombing and strafing of a friendly village that killed 83 Vietnamese and wounded 175 more in the war's worst accidental air raid.

U.S. spokesmen also revealed South Vietnamese rangers overran a Viet Cong jungle prison in the Mekong Delta Saturday only moments after the Communists guards shot, stabbed and slit the throats of 12 Vietnamese civilians held captive.

Nine men and a woman were killed. Two of the other chained

KENTON, Ohio (UPI) — Investigators today recovered two flight recorder units which they hoped would unlock the mystery of a Lake Central Airlines plane crash that killed 38 persons.

Civil Aeronautics Board (CAB) officials found the recorder units in the debris of the Convair 580 twin-engine prop jet that slammed into a soybean patch Sunday night, killing everyone aboard. Area residents said they heard one or more explosions before the crash.

One of the recorder units contained the flight tape and a record of flight conditions including the speed, altitude and direction of the aircraft. The other unit contained the pilot's conversations with the control tower.

"It appeared to be in reasonably good condition," CAB investigator Edward Slatery said.

He said the tapes — in their original black boxes — were being taken to Washington by a CAB official.

The recorder units usually contain the key to aircraft mishaps.

A Lake Central official did not rule out the possibility of an explosion before the crash.

"It's impossible to say if there was an explosion," said R.W. Clifford, the airline's vice president of operations. "But it is within the realm of possibility."

The airplane obviously separated in some way before it hit the ground.

Clifford and nine other Lake Central officials including President L.L. Hardman, arrived here today from company headquarters in Indianapolis.

The airline, which never before had a fatal crash, received a telephone bomb threat last week against another airliner. The threat proved unfounded.

The FBI, which joined other agencies at the crash scene, usually is called in to help make

identification of bodies and to investigate the possibility of a bomb explosion. There was no fire at the crash and identification was not expected to be difficult.

Investigators today combed a snow-covered soybean field for pieces of wreckage and clues to determine why the twin-engine prop jet slammed to earth in a freezing rain.

French Elections Hand DeGaulle Confidence Vote

PARIS (UPI) — A record turnout of French voters gave President Charles de Gaulle today the national vote of confidence he demanded for his "strong man" rule.

Results of Sunday's first-round polling for a new 496-seat national assembly assured the 76-year-old general he will have the majority he wants for the next five years of making France "great."

It indicated De Gaulle will continue his policies of personalized nationalism including his self-styled role as world peacemaker and critic of U.S. policy in Vietnam.

"De Gaulle appealed to the country to return a Gaullist majority and the country has heeded his call," Premier Georges Pompidou said after 22.8 million voters turned out to make it France's greatest postwar parliamentary election.

The Communist vote rose to 22 per cent of the goal. But the commanding 37.75 per cent lead taken by Gaullist candidates virtually assured the president his ranks will retain their parliamentary majority after next Sunday's runoff.

If it comes from a hardware store we have it. Lewis Rowe. (Adv.)

Troops Steal Red Guard Documents

HONG KONG (UPI) — A Hong Kong newspaper said today dissident Chinese Communist army troops stormed the Red Guard headquarters in Peking last month and stole important documents dealing with China's raging political purge.

The rightwing New Evening Life Post, quoting travelers recently returned from the Chinese capital said the troops belonged to two divisions stationed in Peking and had been supporting elements opposed to Communist party Chairman Mao Tse-Tung.

In an earlier dispatch, the newspaper reported a bloody purge of pro-Mao Red Guards in Fochow and said that more than 10 youth leaders had been assassinated, some by beheading.

The newspaper identified the ring leader of the anti-Red Guard terror as Fochow Mayor Lin Pia.

There was no confirmation of either report from independent sources. But China watchers here recalled dispatches from Peking last month telling of raids on government and party buildings by anti-Mao elements and the theft of important documents, including some deal-

ing with China's atomic testing program.

The traveler told the newspaper that an atmosphere of fear prevailed in the Chinese capital after a threat from the Mao faction to plunge the city into a "blood bath" if anti-Maoists continued to ignore the call to surrender. The tense situation prompted many Peking residents to move from the city, the newspaper said.

Fochow is the capital of Fukien province which lies along the southeast coast of the Communist mainland across the Formosa Straits from Nationalist Chinese-held island of Taiwan.

Wall posters in Peking said that municipal police have been ordered to stop kangaroo court trials of anti-Mao officials without special permission from the newly formed Peking Municipal Military Commission.

The commission was organized apparently to slow the pace of the anti-Mao purge in Peking.

Japanese correspondents in the Chinese capital said another directive ordered the immediate release of all high ranking officials who have been arrested since the beginning of the cultural revolution.

Brazilian Airliner Crash Fatal to 56

AIDJAN, Ivory Coast (UPI) — A Brazilian Varig Airlines DC8 jetliner crashed into a native village Sunday while attempting to land at a fog-shrouded airport in Liberia.

Fifty-six persons were reported killed.

Reports radioed here from the crash scene said 51 of the 90 persons aboard, the four-jet, U.S.-built plane were killed, including one American. Five villagers also were killed.

Varig Airlines said the plane, en route from Beirut, Lebanon, to Rio de Janeiro, slammed into the sleeping West African village just off the runway at Robertsfield Airport, about 40 miles from the Liberian capital of Monrovia. Investigators sought

today to find out how it happened.

Burning wreckage ploughed 500 yards through a maize field and stopped just short of a munitions factory, reports said.

The 40 survivors, some of whom were reported in "a bad state," were rushed to hospitals in Monrovia.

The flight, which made a stopover in Rome, carried 72 passengers and 19 crew members.

Varig said the victims included three Roman Catholic nuns who had boarded the plane in Rome. One of the nuns was identified as Mother Superior Teresa Cesarina Vecchiarelli, head of the St. Lucy's Parish School in Newark, N.J.

Powell Lawyers 'Very Optimistic'

WASHINGTON (UPI) — Adam Clayton Powell's lawyers, "very optimistic" about the outcome, hoped to file suit in federal court here today to force the House to take the Harlem Democrat back as a member.

Powell remained at his vacation hideaway on Bimini in the Bahamas, but one of his attorneys, Frank Reeves, a Howard University law professor, said he would "participate actively" in the case. "He is not just going to sit on Bimini," he added.

Reeves and the other Powell lawyers were hoping to finish their brief in time to file suit today at U.S. district court for the District of Columbia. If they do not, it will probably be filed Tuesday.

Arthur Kroy, an attorney for the American Civil Liberties Union, said the suit would be unprecedented. "This is the first such confrontation between Congress and the court," he said.

Community Reports Given City Council

Council of Clubs members heard reports from Mrs. Libby Shotwell, executive secretary of the Pampa Chapter of the American Red Cross and Chief of Police Jim Conner at its meeting Thursday morning in the City Club Rooms.

Mrs. Shotwell told members the month of March is Red Cross Month and outlined some of its services to the community.

She listed the Volunteer Service program: First Aid program with courses offered free of charge; Water Safety program, "which is in its 14th year and are also offered free of charge by the Red Cross with only one dollar per child paid to the city for the use of the pool."

Mrs. Shotwell said the most important phase of Red Cross work is the service between the military and the homes of the servicemen and their families. "Red Cross now has 135 stations in Vietnam," she said.

"Each person who supports the Red Cross by contribution to the United Fund by as much

as five dollars is entitled to a membership card," Mrs. Shotwell stated. "This card is important because it gives general directions for First Aid and artificial respiration."

Chief Conner discussed the new Criminal Code procedure. He said it is important for citizens to support law enforcement; serve on juries when called; and to support the Texas police.

The speakers were introduced by Mrs. Clara Quay. Mrs. Fidella Yoder, council president, presided during a brief business meeting.

Representatives of various clubs attending include Jessie Rance, America Business Women's Ass'n; Mmes. W. M. Cooper and W. H. Fullen, Pampa Music Teachers Ass'n; Mrs. Georgia Mack, Alrusa Club; Mmes. May Hatcher, M in a Benham, Red Cross; Mrs. Elsie Gee, Pampa Business and Professional Women's Club; Mrs. Jack Foster, Delta Kappa Gamma; Mrs. Calvin Whitley, Treble Clef; and Mrs. Jim Frazier, Kappa Alpha Chapter of Epsilon Sigma Alpha Sorority.

Engagement Announced

Md. and Mrs. Bill Manning of Abilene announce the engagement and approaching marriage of their daughter, Teresa, to Robert Mann, son of Mr. and Mrs. James T. Mann, 515 N. Frost.

Wedding vows will be solemnized on March 10 in College Church of Christ in Abilene.

Need Storage? Be A 'Space Shopper'

Any homemaker's delight — new places to put things. When the obvious spots are filled to overflowing, it's time to become a sleuth and seek out those hidden nooks and crannies.

Did you ever wonder what's behind your walls? In many instances, nothing but lost inches, says the Tile Council of America. The trade association of the nation's ceramic tile manufacturer says that its kitchens and bathrooms especially this unused space can be converted into recessed wall shelves ideal for the small items that clutter up utensil drawers and medicine cabinets.

If you're thinking of modernizing your kitchen or bath, that would be a good time to have the shelves fitted in between the wall studs. Like the rest of the wall, they should be surfaced with real domestic ceramic tile because of its moisture-proof and ease-of-cleaning qualities.

Here are some other often-overlooked storage possibilities. The narrow space between the outer rim of the kitchen sink and the cabinet door below it. Although the area behind it may be shallow, it is an excellent place for a small drawer for spices or cleansing tools.

The unenclosed bathroom basin. Here's an opportunity for a new cabinet with perhaps a short countertop off to one side.

Stair steps. There's usually nothing under them, either. When converted into hinged, flip-top boxes, they're great for overshoes, the stacks of old books you refuse to part with, and practically anything else.

Closet floors. Few closets ever receive foot traffic and there's little reason why a hinged box about a half-foot high can't be built in there without interfering with the clothes hanging above.

And cast your eyes ceilingward. There may be space up there for short but usable suspended cabinets. Going a few steps farther — what's in that area between the second-story ceiling and the roof peak?

POLLY'S POINTERS

Ironing Rack Makes Substitute Closet

By POLLY CRAMER

Newspaper Enterprise Assn. DEAR POLLY — In our small home there is no place to hang guests' clothes so the idea came to me to use the ironing clothes rack that is easily hooked on a door. They can be bought in department stores for less than a dollar and there is no need to nail or attach them permanently, so they can be used anywhere in the house at any time.

—Mrs. R. G. DEAR POLLY — This Pointer came from a friend who is expecting her fifth child. During the colder weather, she washes the heaviest clothes and gets them out to dry first instead of the usual white things. This gives the heavy clothes longer drying time.

—MARY DEAR POLLY — I hope some reader can tell me how to restore yellowed ivory to its original creamy look. I have several hand-carved items from India that have lost their beauty because of color change.

—MILDRED DEAR POLLY — Our 10-month-old baby enjoys playing in his crib when he wakes up early in the morning. We had the problem of his toys squeaking when he rolled on them in the middle of the night. The noise awakened him, I finally took a large plastic sand bucket and tied it to the top rail at the bottom of the crib. We put his favorite toys in it and he helps himself in the morning or after a nap. Every couple of days I change the toys to keep him interested.

—JANE DEAR POLLY — This is an answer to Boy Friend's problem of removing a cork that has been pushed down into a bottle. Take a piece of fairly strong cord about a foot long. Hold both ends of the cord in your hand and let the loop end drop down into the bottle. Tilt the bottle until the cord drops into its neck, keeping the loop of the cord back of the cork. Pull the cork out of the bottle with the cord.

—JAMES DEAR POLLY — I am nearly 80 and am amazed at the younger generation's ability to cope with their problems. Your wonderful column certainly helps them to do it. To get a cork out of a bottle, we used to

string a cord through two holes in a button slightly smaller than the bottle neck and drop it into the bottle keeping hold of the two ends of the cord. Maneuver the cork in front of the button and draw it out.

—MRS. W. J. E.

Dear Abby...

Does Friend Tip Waiter He Knows?

DEAR ABBY: Ours is a very odd problem and I hope you can help us with it. My wife and I have a friend who is a waiter in a place where we dine occasionally.

We would like to know if it is proper to TIP this waiter in the usual manner when he waits on us. Because we are friends, do you think it might be considered poor taste? Thank you.

IN DOUBT DEAR IN: When in doubt, offer a tip. You will know at once by your friend's reaction if he genuinely offended. If he is giving immediately and don't attempt to tip again.

Be careful to make the mistake of offering a tip when none is expected than failing to offer one when it is. (P. S. I would appreciate the opinions of waiters and waitresses who have been on the other end of this problem. I could be wrong.)

DEAR ABBY: Perhaps my experience will be helpful to the young mother who was told it would be "bad luck" to name her baby after her brother who had died in infancy.

I was named for my brother who lived only 14 months, and saw "our" name on his tiny granite headstone with the words "Born December 17, 1890 Died February 6, 1892"

a strange feeling came over me. I felt that I had lived the life he never lived. Today I am 74 and it will not

be long before I shall join the brother whose name I bear. And when we meet I shall salute him and say, "Well, Ted, I did the best I could for both of us."

GRATEFUL MISS A. M. F.

DEAR ABBY: For the mother who wanted to give her newborn child the same name she had given to a previous child who had died in infancy:

I am sure it has been done by many who were eager to pass their name on to a member of the younger generation. One famous case comes to mind: The late Franklin Delano Roosevelt named a son "Franklin D. Roosevelt Jr." but that child did not survive. Later another son was born, and he was given that name.

CONFIDENTIAL TO "FIVE FEET TALL, 105 pounds. Brunet as you, married 26 years, 4 children, two gravely ill, and sick to death of his cheating." Either throw him out this time or admit that you thrive on abuse.

How has the world been treating you? Unload your problems on Dear Abby, Box 69700, Los Angeles, Calif., 90069.

For a personal, unpublished reply, enclose a self-addressed, stamped envelope.

Have a Lovely Wedding." Sent \$1 to Abby, Box 69700, Los Angeles, Calif., 90069.

Scouting Scoops

By MRS. G. J. BOYD "The Ideals of Girl Scouting and How They Are Met" was the topic chosen by Mrs. Jack Foster at the Highland Neighborhood Thinking Day Program, held recently at the Robert E. Lee auditorium. Mrs. Foster told of her experiences in Girl Scouting in Venezuela, when she lived in that country with her family. She outlined the goals of every phase of scouting and told specific ways these goals have been accomplished in Pampa during the last year.

The program, which was attended by approximately 400 Girl Scouts, leaders and parents, was opened by a flag ceremony by Troop 54, Prudence Skelly, Senior Girl Scout from Troop 5 showed slides and told of some of her experiences at All-States Encampment last year.

Background pictures were designed and made by Janet Black, Troop 54, and presented the "Follow the Piper" theme, which brings out the great need of good leaders for the large number of girls who want to be Girl Scouts.

"Dimes for Daisy" banks were decorated by troop members and presented by the following troop, Brownie Troops: Troop 10, Mrs. Billy Hagerman; Troop 50, Mrs. Wayne Anderson; Troop 23, Mrs. George Broughton; Troop 73, Mrs. Carl Laffin; Troop 24, Mrs. Nella Brock; Troop 16, Mrs. Jerry Edger; Troop 13, Mrs. John Park and Troop 27, Mrs. John McCausland.

Junior Troops: Troop 9, Mrs. V. L. Simon; Troop 55, Mrs. R. C. Atchley; Troop 25, Mrs. W. N. Nichols; Troop 43, Mrs. W. K. Mackey; Troop 4, Mrs. Ray Hudson; Troop 11, Mrs. W.

R. Woodward; Troop 1, Mrs. W. J. Felter; Troop 219, Mrs. J. R. Newman and Troop 59, Mrs. Don Warminski. Cadette Troops: Troop 26, Mrs. Richard Stowers; Troop 54, Mrs. Raymond Laycock; Troop 56, Mrs. Charles Casey and Troop 2, Mrs. J. P. Brunley.

Girl Scouts from Troop 56 led the audience in songs "Make New Friends", "Barges" and "Taps" to conclude the program.

Serving as master of ceremonies for the evening was Mrs. Eugene Turner, Highland Neighborhood Chairman.

An investiture ceremony was conducted last week by Mrs. J. D. Williams, leader and assistant leader. Mrs. Robert Craig for Brownie Troop 61. Beautiful weather and interested mothers combined to make a marvelous attendance for the event. All but two mothers were able to attend. This is a nice tribute to a leader and to Scouting. Members of this troop to become Brownies are Darla Baird, Tammy Biggars, Valerie Butler, Carol Craig, Cheryl Fisher, Nita Griffin, Kellie Jones, Sally Largin, Cheryl Lewis, Donna Minnick and Penny Miser. Margaret Nabors, Beverly Owen, Kris Richardson, Tressa Shaw, Lori Taylor, Connie Thompson and Joyce Williams. This was the first meeting for two girls joining the troop: Connie Jones and Peggy Lowrie. Welcome to Girl Scouts.

March 12 through 18 will mark Girl Scout Week. Girl Scouts are asked to attend church wearing their uniform. Many troops plan to attend church as a troop while others will attend their choice and represent their troop by wearing her uniform. Flag ceremonies are scheduled

Mrs. Huckins Has WCE Circle Meet SKELLYTOWN — The W. E. Ladies Missionary Circle of Skellytown Community Church met recently in the home of Mrs. Gerold Huckins for a business meeting and Bible Study.

Mrs. Valda Thomas gave the opening prayer and the minutes of the last meeting were read by Mrs. Rachel Kaiser.

Mrs. Ethel Hunt, president, presided over the business meeting. Reported ill were Mrs. Pauline Campbell and the small son of Mr. and Mrs. Carroll Dean Russell.

Two get well cards were read by the Hobby club. The next meeting will be March 14 in the home of Mrs. Valda Thomas.

The meeting closed by a prayer by Mrs. Mable Boyd.

ed at schools on March 14, Citizenship Day.

Leaders are to pick up cookies from their cookie chairman this week to be distributed to their troops for sale on March 13.

March 15, 27 and 29, 9:30 to 2:30 Girl Scout Little House is time on place for Outdoor Training. Those planning to attend should register by calling the Girl Scout office. A sack lunch is required for these sessions. Mrs. Cecil Smyth, volunteer trainer from Miami and Mrs. T. M. Whiteley will conduct this training.

Pampa Jr. High Places Well In Music Contest

Pampa Junior High School vocal department had six Division 1 ratings and five Division 2 ratings following the University Interscholastic League Solo and Ensemble Contest Saturday in Canyon. The junior high vocal department had 11 entries in the contest.

Receiving Division 1 ratings were Donna Matheny, Elizabeth Silcott, Jessie Samuel, solos; Donna Matheny, Brenda McDaniel, Pam Balay, trio; Kathy Huffines, Sherry Hyatt, Pam Long, trio; Connie Owen, Susan Maynard, Susie Griggs, Debrah Sheehan, Vernon Johnston, Jimmy Cooper, Jerry Brumfield, Mike Hogan, Madrigal Group.

The following received Division 2 ratings: Sherry Hyatt, Glenda Kijore, Cathy Orwig, McClellan, Nita Marlar, Depha Everson, Gayle Wellborn, Vernon Johnston, Jimmy Cogser, Ricky Givens, Jackie Gindorf, Madrigal Group.

They were accompanied to Canyon by their instructor, Mrs. Louise Richardson.

Burglar Hits Pampa Cafe

Sheriff's deputies are continuing an investigation today into the burglary of the Silver Spur Cafe, east of Pampa, on Highway 60, early Sunday.

Mrs. Lean McDaniel, a cafe employe, told officers she reported for work at 4:30 a.m. Sunday and found someone had broken into the cafe, damaged two machines and a cash register and taken an "undetermined amount" of money and cigarettes.

Officers said the burglar entered by breaking a window glass in a restroom at the back of the cafe and crawling through the window.

The cigarette machine, juke box, and cash register were pried open and damaged, the report said.

Service Station Damaged by Fire

The G. E. Brown Chevron Service Station, 1199 E. Brown was damaged extensively by fire about 3:20 p.m. Sunday. No one was injured and cause of the fire in the storage room is unknown, firemen said.

The fires started on a bench near the storage room where tires, batteries and oil were stored, firemen said.

Firemen also extinguished a minor grass fire in a creek near 9th and Evergreen Sts. at 4:25 p.m. yesterday.

WOMEN SUFFER WITH BLADDER IRRITATION

Common Kidney or Bladder Irritations affect twice as many women as men, often causing tenderness and nervousness from frequent, burning, itching urination. Secondly, you may lose sleep and have headaches, backaches and feel older, tired, depressed. In such cases, CYSTEX usually brings relaxing comfort by curbing germs in acid urine, and easing pain. Get CYSTEX at drugists today.

LADIES LAST — Citizen John McGuire (right) drew the names for ballot position on the Pampa Independent School District board election to be held April 1 in Pampa Junior High School gym. According to McGuire's random selection, Dr. William H. Greenlee's name will appear first on the ballot, followed by John Gikas, John R. Spearman and Mrs. Pernie Fallon. The school district's business manager, Homer Craig, holds the hat for McGuire. Absentee voting will be held in Craig's Pampa Junior High School office from March 13 to 28.

DBA Will Study Parking Meters

Members of the Downtown Businessmen's Association of Pampa will renew their study of city parking problems at a meeting set for 10:30 a.m. tomorrow in the Hospitality Room of the Citizens Bank & Trust Co.

A recent survey of parking meter problems and how they were handled in 40 Texas, New Mexico, Oklahoma and Kansas cities will be studied in detail by members of the DBA parking meter committee, according to Ray Duncan, president of the group.

Duncan said after they go into the survey tomorrow, the businessmen's organization plans another general discussion meeting in a week or ten days at which it is hoped to come up with recommendations for Pampa's downtown parking situation.

Bond Is Set For Minor in Possession

Bond of \$75 was set Saturday for Hoyt David LaRue, 18, 804 E. Locust, on a charge of minor in possession.

According to a Pampa police report, LaRue was arrested after he apparently lost control of the vehicle he was driving and slammed into a tree at the Arthur Bybee residence, 1836 N. Nelson at about 8 p.m. Saturday.

Damage to LaRue's vehicle was estimated at \$250.

LaRue was also charged with exceeding a safe speed.

Kennedy Wins Title 'King of the Road'

Bill Kennedy of the Moose Lodge was named "King of the Road" Saturday in the Beta Sigma Phi Sorority's contest held in connection with the Red Stocking Revue.

Kennedy received the most one penny votes to earn the coveted title sought by five other Pampa businessmen.

Show

(Continued From Page 1)

for the School of Agriculture at Texas Technological College. Bill Skaggs, Pampa FFA chapter president, will preside at the FFA judging contest banquet. Others on the program are Doc Cornuth, invocation; Jerald D. Sims, master of ceremonies and Gene Imel, welcome.

Davis, FFA speaker, will also address the Hereford Breeders' banquet at the Starlight Room, Coronado Inn at 7:30 p.m. Tuesday.

About 250 members and guests of the Hereford Breeders' Association are expected to attend the 22nd annual banquet.

Davis will address the group on "The Greatest of America's Achievements" which deals with the ability of American farmers and ranchers to produce adequate food products.

He will also discuss new developments and changes in the production of agricultural products.

Before the junior livestock sale at 9:30 a.m. Wednesday the adult leaders of Gray County 4-H clubs will serve the junior livestock bidders breakfast at 8 a.m. in the show barn dining room.

Obituaries

Andrew L. Honeycutt
Funeral services for Andrew L. Honeycutt, 68, will be held at 2 p.m. Tuesday in the Church of Christ in Dozier.

Mr. Honeycutt, who resided at 216 N. Wells, died just after midnight Saturday in Highland General Hospital following a heart attack.

The body will lie in state in Carmichael - Whatley Colonial Funeral Chapel until 6 p.m. today, when it will be taken to the Richardson Funeral Home in Shamrock.

Mr. Honeycutt, a native of Springfield, Mo., had lived in Pampa about four years. He came to Texas in 1898 moving to Collingsworth County.

Survivors include his wife, Pearl; six daughters, Mrs. Ruby Tatum of Brandon, Ore., Mrs. Lillie Cleverger of Dallas, Mrs. Ola Stark of Plainview, Mrs. Maxie Jones of Waco, Mrs. Virgie Heinen of Amarillo, Mrs. Nora McDaniel of Pittsburg, Pa.; three sons, Dalton of Shamrock, Faye of Odessa, Glenn of Pampa; one sister, Mrs. Ralph Reid of Fayetteville, Ark.; two brothers, Floyd of Devine, Amos of Clovis, N.M.; 23 grandchildren and 16 great-grandchildren.

Borger Editor Is Named Director At Wire Service Meet

DALLAS (UPI) — Charles Lewis, associate editor of the Tyler Courier-Times and Telegraph, was elected president Saturday of the Texas UPI Editors Association.

Lewis was named at the group's ninth annual convention at the Sheraton Dallas hotel, succeeding Robert Sellers, managing editor of the Fort Worth Press.

Other new officers are John Emmerich, associate editor of the Houston Chronicle, vice president; George M. Sebree, division executive assistant for UPI in Dallas, secretary-treasurer; and Directors Fred Wortham, managing editor of the Borger News-Herald; Gerald Skidmore, managing editor of the Killen Herald; and Robert Trimble, telegraph editor of the Fort Worth Press.

Jaycees Elect Litchfield As Vice President

Don Litchfield, 2132 N. Zimmers, was elected internal vice president of Texas Area I Jaycees during the group's three-day winter meeting in Amarillo which ended yesterday.

The 400 area Jaycee delegates selected Plainview as the summer convention site and will meet in Amarillo for the state fall convention.

The group voted to support Girls Town near Whiteface by sending a \$5 check a week per chapter.

Famed Business Forecaster Dies

LAKE WALES, Fla. (UPI) — Roger W. Babson, business commentator and investments adviser, died Sunday at the age of 92.

Born and reared on a farm in Gloucester, Mass., Babson was graduated from Massachusetts Institute of Technology and became a nationally known economist. He gained prominence as an economic analyst by correctly forecasting the 1929 stock market crash.

Babson died of apparent natural causes in the Florida town named for him — Babson Park, a suburb of Lake Wales.

Lefors Optimists To Make Award

The Lefors Optimist Club will hold their first annual supper meeting tonight at 7:30 o'clock in the Harvester Barbecue to name the "Outstanding citizen for their work with youth."

Nominees for the award are Mae Smith, John Horan, and Walter Elliott.

Science Shrinks Piles New Way Without Surgery Stops Itch—Relieves Pain

New York, N. Y. (Special) — For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids, stop itching, and relieve pain — without surgery.

In case after case, while gently relieving pain, actual reduction (shrinkage) took place. Most amazing of all—results were so thorough that sufferers made astonishing statements like "Piles have ceased to be a problem!"

The secret is a new healing substance (Bio-Dynal) — discovery of a world-famous research institute. This substance is now available in suppository or ointment form under the name Preparation 220. At all drug counters.

There've been some changes made

There was a time when our telephone operators wore "floor duster" dresses and sat on high wooden stools. Not so today.

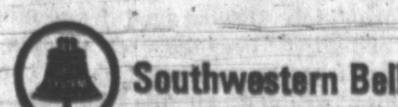

New equipment and new work techniques have revolutionized the familiar world of "Number, please." And the operating room of the future incorporates the most dramatic and far-reaching changes ever. In these new rooms, there are no plugs, cords or jacks. Instead of being lined up along a multi-position switchboard, operators sit at desk-like consoles widely spaced through the room. Everything is bright and modern.

Already operational in a few Southwestern Bell cities,

these newest operating rooms represent more than a change in looks. The new consoles make many new services possible. Customers can dial person-to-person, credit card and collect Long Distance calls. Service is faster and more efficient.

More and more of these new consoles will be installed as time goes by. But despite the changes in equipment and techniques, one thing will remain the same. Our operators will still be dedicated to giving the best possible service to our customers. The "voice with a smile" is as important and meaningful as ever.

Some things just don't need changing.

Ribant Loved His Mets-And Still Does

By MILTON RICHMAN
FORT MYERS, Fla. (UPI) — Now what ball player in his right mind would report to the Pittsburgh Pirates with a 'Let's Go Mets' sticker on his windshield and then purposely honk his horn to make sure his new boss saw it.

Dennis Ribant would do it, that's who.

Why, well, because Dennis Ribant is uninhibited, completely natural and impulsive.

He didn't quit blowing the horn on his car until Joe Brown noticed that blue and orange Mets' decal, either.

"Do you want me to break your windshield now or later," the Pittsburgh general manager

kidded his new pitcher, who merely laughed.

Sorry To Leave

At first he sulked when they dealt him off to the Pirates for outfielder Don Bosch and pitcher Don Cardwell in December. He didn't care that he was going to a pennant contender. That's how rotten he felt about leaving the Mets.

"I thought about how much I'd miss those Met fans and Shea Stadium," he still says with some nostalgia. "I thought about how I had struggled for two years to make the club, and that finally after I had a good year they were letting me go. It hurt."

But Ribant is 25, and when

you're 25, it hurts for only a little while. Less than a week later, it didn't hurt so much anymore.

"I started changing my mind a few days after the trade," he said, picking up some ground balls and also some sun in the right field sector. "I began thinking I'm in this game to make a living."

"With the Pirates it stands to reason I should be able to do it a lot easier than with the Mets. That doesn't mean I love it here. No one really has in this game. But I have much more going for me now. I'm talking about hitters like (Roberto Clemente, Willie Stargell, Alou."

(Donn) Clendenon and (Matty) Brown, the club's quietly efficient GM, is a student of human nature.

Makes Point

He knew it was an emotional wrench for Ribant to leave the Mets.

But Brown also knew a kid like Ribant could be that little extra added fresher for Pittsburgh's World Series melon. So he made a point to take him aside and tell him:

"We're very happy to have you with us. We have a great deal of thought to this trade and we feel it was an important one. We also feel we can win the pennant and that you can help us."

"I feel the same way"

Still, he wasn't taking any chances who he reported here for spring training not long ago. He brought his own bat with him to camp.

Ribant kept it in the back of his car. That's the same car with the Mets' sticker on the windshield.

Any day now, Ribant is fixing to scrape it off.

SPTS 1-30 Woodie [n]

NEW YORK (UPI) — John Wooden's strive for perfection earns him little nicknames like "polite slave driver" at UCLA, but it also makes him No. 1 in his class.

The soft-spoken Wooden's basketball coaching techniques,

which have paid off in a perfect season to date, have voted as the best for 1966-67 by United Press International which Saturday selected the Bruins' mentor as coach of the year.

The honor was the second bestowed upon Wooden in the past four seasons and made him the fifth coach ever to win the award twice.

While UCLA is running away with national cage honors this season, Wooden did not run away from the field in the balloting conducted by 260 sportswriters and broadcasters across the nation. Princeton's Bill (Butch) Van Breda Kolf gave Wooden a strong battle and lost by only three votes, 69-

and lost by only three votes, 69-56.

Louisville's Hickman Third Peck Hickman of Louisville finished third with 22 votes while Bob Cousy of Boston College and Dean Smith of North Carolina rounded out the top five with 15 and 12 votes, respectively.

As well as the Tigers did there wasn't a team in the country that could match the Bruins. With sensational sophomore Law Alcindor leading the way, the Bruins have rolled over 25 straight opponents thus far and have come close to losing only once when Southern forced them into overtime.

THE BIG EXPERIMENT is underway as superstar Mickey Mantle tries out his first baseman's glove in the New York Yankee Florida training camp. The Yankees' management hopes moving the injury-prone slugger from the outfield to first will prolong his career.

DOMINATION OVER?

Ponies to Lose Coach, Players

By United Press International
Southern Methodist's Southwest Conference basketball rivals saw some bright hopes today that Methodist Mustangs' decade of domination of the league cage scene may be near an end—at least, temporarily.

Not only do the champion Mustangs lose the four seniors who have figured so prominently in three consecutive titles, but last Saturday SMU Coach Doc Hayes announced he was stepping down as an active mentor after tutoring his teams to eight championships over the past dozen years. That's more than any other conference coach.

Hayes, who will be ending 20 years on the Dallas hilltop and 40 years of coaching, will stay on until the Methodists have fired their final basket in the NCAA playoffs opening March 17 in Lawrence, Kans., when the Ponies take on No. 2-ranked Louisville.

Then, he will be succeeded by Bob Prewitt, who has been Hayes' chief aide for 17 years and stems sure to carry on the Hayes' coached teams compile a 296-11 career mark and a

163-7 record against league foes.

The 12-2 record which SMU fashioned this season gave Hayes his eighth league crown. His teams won or shared the title in 1955-56-57-58-62-65-66-67.

"It has been a great experience, but I have had all I can take—excitement, pressures, tension, anxiety, decisions and all the rest," Hayes said.

This past season was a perfect example of the tension and pressures of which he spoke. The Mustangs won eight of their 19 victories by three points or less and many of them this year and over the past three-year span have been decided in the final seconds.

This year's championship team, which would up the regular schedule with 85-71 and 92-83 victories over Texas A&M and Texas, loses all-conference stars Charles Beasley and Denny Holman along with Bob Berger and Bob Jones—as well as Hayes. It returns sophomores Lynn Phillips and Bill Voight along with top reserve John Higginbotham.

Balance was the key to Mustangs' success with five players averaging in double figures, led by Holman's 37 points, Beasley hit 347, Phillips 343, Begert 303 and Voight 276.

Holman ranked only sixth in the league, but Beasley and Phillips gave SMU two others among the top 10.

Pampa Baseball Opener May Be Postponed

Snow may have curtailed Pampa's opening in the non-conference high school baseball ranks, but this isn't a fact yet.

The Harvesters scheduled game at 4 p.m. tomorrow with Borger has not been officially called off although the possibilities of playing it are dim.

Sunday night's snow has dampened the field but the cold weather may have more to do with calling off the game.

Elsewhere at Pampa High School the varsity golf club journey to Lubbock Friday where they will begin the first round of district play.

Friday is qualifying day and Saturday the final 18-holes will be played.

Saturday the track team goes for the annual Dumas Invitational.

Infielders Shine in Camps

By United Press International
It was the day of the infielder around major league training camps Sunday.

Minnesota Manager Isam Mele and Dodger skipper WATanillos each saw veteran and a rookie infielders produce the big bats in the two clubs' initial intrasquad games, while the Cardinals got a lift from a prize second baseman and the Tigers looked hopefully to an improving rookie utility man.

As far as Mele and Alston are concerned the kinks are out and its time to get down to business. What the former saw was a Minnesota tradition. What the

latter saw could be a Dodger revolution.

Homers Flying

The Twins started banging home runs with their usual gusto right from the start and three of them came from the two contenders for the third base job. Veteran Rich Rollins collected a pair and rookie Ron Clark hit one homer and just missed a second when another of his drives hit the top of the left wall and fell back for a double.

There were pleasant surprises for Alston, who came into spring training with a Koufax-less pitching staff and throngs

of feeble hitters.

But on Sunday veteran utility infielder Dick Schofield doubled twice and rookie first baseman Tom Hutton rapped out three singles as the Danny Ozarks beat the Preston Gomezes 3-1. In all, both sides collected 2 hits through the six-inning game, a ratio of hits per inning the Dodgers were hard pressed to match last season.

Infielders shone brightly for the Pirates and Senators, too. Second-baseman Bernie Allen's fifth-inning homer gave his team a 3-2 win in a game at the stop Gene Alley and first

baseman Don Clendenon each poked a two-run blast in a Pittsburgh intra-squad battle.

At the Tigers' camp utility infielder Tom Matchick was given a big pat on the back by Manager Mayo Smith who said the youngster had the best chance to be the first rookie to make the Tigers in the last two years.

Julian Javier had his first workout with Manager Red Schoendienst and the Cardinals.

Plagued with injuries the past two seasons, Javier is the Cards' best open at second and if he regains his 1961 All-Star form it will be a big help to

Schoendienst who also faces an uncertain situation at third.

There, converted outfielder Mike Shannon is making a big effort to fill the gap created by the departure of Charlie Smith to the Yankees.

Another conversion is taking place in the White Sox' camp where Pete Ward is trying to become a first baseman. Sunday, the heavy hitting Ward went 0-for-4 but had a pick off and handled 2 chances flawlessly in the Sox' first intra-squad game.

CULTIVATING the best in young players is the job of major league baseball managers in the spring. At least Red Schoendienst of the St. Louis Cards has the right equipment for it. The tractor is used to haul around the batting cage.

Orioles' Players Due To Withdraw Fee Demands

MIAMI, Fla. (UPI) — Players of the Baltimore Orioles are expected today to withdraw their revolutionary demand that they be paid fees for appearances on commercially-sponsored radio and television programs.

Player-representative Steve Barber, who made the surprise demand Sunday, called a new meeting for today after club officials and the executive director of the Major League Players' Association said such action would place the players in violation of their contracts.

At the same time Barber emphasized that the players "feel we should be paid."

"If a radio, television or newspaperman interviews us and then relates what we said to the public that's okay," Barber continued. "But when we ourselves appear, we want to be paid."

The players had decided to demand \$50 for a commercially sponsored television appearance and \$25 for a radio appearance, regardless of the length of the program.

Frank Cashen, executive vice president of the Orioles said "We pointed out to them that while they are in uniform they are under the jurisdiction of the club." "We also pointed out that their contract says they must participate in any function deemed by the club to be in the realm of promotion."

Good Luck Charm Follows Sanders In Doral Win

MIAMI (UPI) — An 85-pound good luck charm followed Doug Sanders all the way Sunday as the fun-loving golfer birdied-and-bogied his way to the \$20,000 first place money in the Doral Open.

"He's been close by me the last few tournaments I've won," said Sanders.

Nine-year-old Brad Sanders, escorted by a family friend, followed on his father's heels all through the 72-hole tournament, which his father won with a nine-under-par 275. His mother stayed beyond the ropes-with the rest of the gallery.

Sanders began Sunday's play tied with big Jack Nicklaus at 205, two strokes behind Tommy Aaron, yet to be a winner on African Harold Henning's 204. He and Nicklaus forged ahead of Aaron on the ninth hole when Aaron, yet to be awinner on the pro circuit, double-bogied up a two-stroke penalty for grounding his club in a hazard. He claimed he didn't and protested the penalty but the officials made it stand.

Sanders then birdied the 10th hole, picked up another stroke on Nicklaus when Jack bogied the 11th and after that it all went Sanders' way, despite bogeying the final two holes.

Henning finished the day a stroke behind Sanders and tied with Art Wall Jr., at eight under and 276, good enough for \$9,750 in prize money.

Nicklaus, the reigning Phoenix and Tucson open champ, finished the final round with a one-over 72 and a 277 total, still good enough for \$5,000.

U.S. WINNER

BASEL, Switzerland (UPI) — The United States National Ice Hockey team overcame a two-goal deficit to beat Switzerland 4-2 Sunday in the opening game of a European exhibition tour.

Gerry Melnychuk, Glen Lilyholm, Terry Casey and John Rendall scored for the Americans, who drew nine penalties

Bulls on Way To Playoffs

By United Press International
A berth in the National Basketball Association playoffs — just a dream for the Chicago Bulls a few months ago — may become a reality in a few weeks.

The Bulls, newly-created expansion team in the NBA this season, moved to within a half game of the Detroit Pistons in the battle for fourth place in the Western Division Sunday with a 113-106 victory over the Cincinnati Royals.

Bob Boozer scored 16 of his 26 points in the fourth period to hold off the royals who outscored the Bulls 32-29 in that session. The Bulls led by as many as 12 points midway through the third period and went into the final period with an 84-74 lead.

Guy Rodgers scored 29 points to lead the Bulls while Oscar Robertson had 37 for the Royals.

The Philadelphia 76ers dealt the Pistons' playoff hopes a sharp blow by beating them 131-106. Witt Chamberlain scored a season low of 10 points but had 21 rebounds and 6 assists. Hal Greer had 31 for the 76ers and player-coach Dave DeBusschere had 18 for the Pistons.

Sam Jones scored 22 points to lead the Boston Celtics to a 30-105 decision over the Los Angeles Lakers. Zelmo Beaty's 38 points paced the St. Louis Hawks to a 32-102 win over the Baltimore Bullets and Willis Reed had 41 points as the New York Knickerbockers beat the San Francisco Warriors 15-03 in other games.

22 Teams Have Hopes in NCAA

By United Press International
For 22 teams this year, tournament will be like playing Russia roulette with a gun loaded with five bullets.

They've got a chance but it's not exactly one they'd bet their lives on.

The 21rd team in the tourney is unbeaten top-rated UCLA, with Player-of-the-Year Lew Alcindor and Coach-of-the-Year John Wooden getting ready to open the Bruins' bid for their third national title in the last four seasons.

With the regular season drawing to a close this week, the annual NCAA college

basketball tournament is set to begin even though five conference champions have yet to be determined.

Seven Games Scheduled

Seven first-round games of the NCAA tourney will be played this Saturday to cut the field to the "sweet 16" quarter-finalists who will play March 17 at College Park, Md., Evanston, Ill., Lawrence, Kan. and Corvallis, Ore. The finals will be in Louisville March 2-25.

Meanwhile, the National Invitation Tourney at New York's Madison Square Garden opens Thursday night with a pair of games and has four more set

Saturday. The finals are March 18 The NIT has named 12 of its 4 teams with the ACC and Big Eight runnerup teams getting the other spots.

But while seven first-round NCAA games will be played this Saturday, the team everyone is watching — UCLA — will be winding up its regular season with the game everyone is awaiting, the Bruins fourth battle with their friendly neighbor, Southern California.

In their third meeting last month, USC forced the Bruins into overtime before losing, 40-35.

UCLA boosted its record to

25-0 and its two-year win string to 29 straight by clobbering California, 103-66, Saturday night. Alcindor popped in 30 points.

North Carolina Ahead

Third-ranked North Carolina got the No. 1 seeding in the ACC tourney by whipping Duke, 92-79, and fourth-ranked Kansas clinched a share of the Big Eight crown by whipping Nebraska, 64-57.

Sixth-ranked Houston topped Air Force, 90-80, Western Kentucky beat Middle Tennessee 55-46, Tennessee whipped

Louisiana State 81-60 and Boston College beat Holy Cross 76-71.

In the five first-round eastern NCAA games Saturday, West Virginia meets Princeton and St. John's battles Temple at Blacksburg, Va. Boston College faces Connecticut at Kingston, R.I. and Western Kentucky battles Dayton and Toledo meets Virginia Tech at Lexington, Ky.

In the two Western games, Houston plays New Mexico State and Texas Western meets Seattle at Fort Collins, Colo.

A Watchful Newspaper

EVER STRIVING FOR THE TOP O' TEXAS TO BE AN EVEN BETTER PLACE TO LIVE

The Pampa News is dedicated to furnishing information to our readers so that they can better promote and preserve their own freedom and encourage others to see its blessing. Only when man is free to control himself and all he produces, can he develop to his utmost capabilities.

We believe that freedom is a gift from God and not a political grant from government. Freedom is neither license, nor anarchy. It is control and sovereignty of oneself no more, no less. It is thus consistent with the Human Relations Commandments, the Golden Rule and the Declaration of Independence.

Global Transport Service

Webster defines "express" as "an intercity and international system for the prompt and safe transportation of parcels, money, or goods with pickup and delivery service." Since 1839, express has been synonymous with the express company. Today, the express company is known as REA Express. But, irrespective of the name, the express company still provides a unique service — just as unique as when its early couriers sped on fast ponies across plains and mountains to forge a vital link between the gold fields of California and the East. Its courier service now embraces the globe and utilizes every form of transport — jets, trains, trucks and ships. As an investor-owned enterprise which must compete with both government and other common carriers, it has had to expand and steadily improve service to expedite the movement of millions of shipments. It has developed the ultimate in containerized service, simplified shipping procedures and rate structure that have brought substantial benefits to big and

little businesses throughout the land. Some months ago, when the Senate Committee on the Post Office and Civil Service approved a bill permitting tax-exempt parcel post to carry larger size packages, it recognized the danger of such a move to the tax-paying express company which faced the loss of much of its business. The committee agreed that the increase in size of parcel post packages should be put into effect gradually. It indicated that in order to meet the increased competition of government, the company would need the support and encouragement of both federal and state regulatory authorities, as well as the continued cooperation of its own employees. In other words, it tacitly conceded that the nation needs the unique services provided by the express carriers just as much now as in the formative days of express more than a hundred years ago. The committee recognized that express is an integral part of the transport system.

Prophets Were Wrong

When Thomas Edison invented the incandescent electric lamp that terminated the gas-light era, many expected the gas industry to go the way of the buggy-whip makers. Fortunately, the prophets of doom for gas were wrong. As the years passed, gas found other markets, and with the advent of new discoveries in metallurgy and pipeline technology for the transportation of gas, the industry expanded. By 1975, it is estimated there will be more than a million miles of pipeline and utility mains spread across the nation. Gas is now a major source of energy in a society whose energy requirements are proving insatiable. It provides one third of all energy and paradoxically there are more outside "gaslights" in use than there were at the height of the famous gas-light era. In Edison's day, no one could foresee the growth in

store for the United States. No one could reasonably visualize the demand for energy in every form, including nuclear, that would one day spread across the land. The only reason these energy demands have been met successfully is because of the resourcefulness and initiative typical of investor-owned enterprise that has been demonstrated so dramatically in the growth of the gas industry during the past decade or more. In this process of growth, gas has become a major source of employment and tax revenue. Of equal importance, it has been a leader in showing the menace of inflation as a result of its technological advances that have held the price of gas virtually unchanged while most other prices have soared. Its performance is typical of the utility industry and helps explain our rising standard of living.

The Power to Destroy

One of the fundamental principles of the U.S. taxing system has been the right to deduct business expenses from earnings in determining taxable income. Without these deductions, taxes for most businesses would be confiscatory. Yet certain types of advertising which in the judgment of business management are legitimate expenditures in behalf of their companies and stockholders are no longer so considered by the tax collectors. An advertisement of a tax-paying electric utility, to cite but one instance, opposing the extension of tax-subsidized government power projects is not considered a business expense by taxing authorities. In other words, a company is penalized if it seeks to protect its stockholders against the inroads of tax-exempt government competition which its taxes help support. It cannot include expenditures for this purpose as a business expense.

Under the present setup in the U.S. government, the CIA is frequently used for such chores. It has considerable funds which usually can be used with few or no questions asked. If questions are asked in Congress they are usually silenced. These special CIA activities are required to have the approval of the White House, the State Department and often the Department of Defense. There is, in fact, an interdepartmental committee to pass on such programs. But the placing of these activities in the CIA creates extra problems. These activities get mixed up in people's minds with spying. Activities of the type we are talking about involve such high government policy that they should have a great deal of policing by men outside the CIA. The reason for this is simple. Policies are carried out on the spot by agents of varying degrees of experience and ability. Sometimes the men assigned to these tasks are men of considerable tact and wisdom, but sometimes they are men who are more enthusiastic than mature. They stumble in their enthusiasm. They are victims of "spookitis" or "cloak and daggeritis."

Paved with Dollars

America is literally a nation that runs on wheels, and wheels must have roads. In the past 10 years, we have spent more than \$114 billion on our roads and streets. This, despite a federal cutback in interstate highway funds, pending on roads — federal, state and local — will rise to a level of \$15 billion. During the next 10 years highway spending is expected to total more than \$150 billion. Thus, total expenditures will probably reach or exceed \$250 billion, or one-quarter of \$1 trillion, during the two decades. The figures are cited by Sen. Mike Works and Subcommittee

on Public Roads, by way of putting the federal reduction of \$700 million in fiscal 1967 in perspective. The stretchout in spending will push the completion date of the 41,000-mile Interstate system back about two years, from 1974 to 1976, and work some hardship on the construction industry. But it does not, says Randolph, writing in American Highway Builder, "signal a withdrawal of the federal government from the highway program." There may, in fact, be a beneficial side effect. There are about 3,664,000 miles of roads of all types in the United States. But less than 20

Dual Function Misconstrues CIA's Work

By RAY CROMLEY

Washington Correspondent WASHINGTON (NEA) — In part, the Central Intelligence Agency's current troubles are due to a basic split in its charter.

The CIA is a mixture of two objectives that can't be welded together. One division runs an "action" operation involving a whole catchbag of secret government nonintelligence activities.

It is this second function which leads the organization into most of its troubles, which have included:

- Reported payments to student, newspaper and other organizations
- The ill-fated attempted invasion of Castro's Cuba
- Politicking and alleged involvement with coups in Vietnam and other lands
- Helping nationalist, democratic and other selected groups in a wide array of sensitive nations
- Some identifying and training of future leaders in underdeveloped countries

The theory is that people who stand for independence must be helped. It is often to the U.S. interests, U.S. policymakers feel, to support people who are nationalists, even if not friendly to the United States on the theory that independent nations over the longrun serve our purposes better than pawns. Take an underdeveloped country where a communist underground is already thriving, say in Africa, Latin America or Asia. It hasn't yet developed into a Vietnam, but it may if the Red subversive groups are left unchallenged.

Some way must be found to strengthen the nationalist, democratic forces — the indigenous governmental, youth, political labor, industrial groups that want their country to be no one's pawn.

The current practice here is to select countries on the critical list — then help those people, groups and institutions which show promise in helping to build their countries into viable, independent, self-governed lands.

Much of this aid can be given openly through the Agency for International Development or the Department of Defense or other open means. In some cases, aid must be secret if it is to be given at all. Reports of U.S. aid would ruin the effectiveness of some organizations, which would be branded as American pawns. In other cases, open aid would never get to the individuals or groups concerned because of corruption in the local country or because men of influence in the country being aided are afraid of any diminution of their own personal power if other individuals or groups are strengthened.

Under the present setup in the U.S. government, the CIA is frequently used for such chores. It has considerable funds which usually can be used with few or no questions asked. If questions are asked in Congress they are usually silenced. These special CIA activities are required to have the approval of the White House, the State Department and often the Department of Defense.

There is, in fact, an interdepartmental committee to pass on such programs. But the placing of these activities in the CIA creates extra problems. These activities get mixed up in people's minds with spying. Activities of the type we are talking about involve such high government policy that they should have a great deal of policing by men outside the CIA. The reason for this is simple. Policies are carried out on the spot by agents of varying degrees of experience and ability. Sometimes the men assigned to these tasks are men of considerable tact and wisdom, but sometimes they are men who are more enthusiastic than mature. They stumble in their enthusiasm. They are victims of "spookitis" or "cloak and daggeritis."

What is needed is, another agency not involved in intelligence to take over these nonintelligence programs. This agency would be closely supervised on a day-to-day basis by a top-flight policy board of men from government business and education. They would be men not only of the highest integrity and maturity; they would also have a considerable degree of political sophistication. These leaders would be charged with keeping the actions of the agency under constant review and supervision to make certain that these unusual programs promoted U.S. aims and did not violate American principles.

When You Finish The Job Over There —

Backstage Washington

Hartke to Fight for End of 'Earnings Test' On Social Security Payments to Eligible Beneficiaries

ROBERT ALLEN PAUL SCOTT

WASHINGTON, March 4: Social Security beneficiaries should receive the full payments to which they are entitled regardless of how much additional income they can earn. The only condition should be the payment of Social Security taxes for at least 40 quarters — ten years. This is the only requirement that should prevail. There should be no "earnings test" of any kind. If a Social Security beneficiary has paid this tax for a minimum of 40 quarters then he should get his full pension notwithstanding what he may earn in gainful employment.

That is the emphatic demand of Senator Vance Hartke, D-Ind., veteran member of the Finance Committee which will consider President Johnson's proposals to increase Social Security payments. They are sure of enactment in some form. It is Hartke's contention that Social Security is old age insurance, and no strings should be attached to full payment when a beneficiary becomes eligible. In other words, Hartke holds that those who pay Social Security taxes are in effect, buying government insurance for their old age and when they reach 65 should get what they paid for without any restrictions.

Hartke has been seeking to eliminate the "earnings test" for a number of years, and is sponsoring a new bill to do that in this Congress. It is his belief the measure has a good chance of adoption on two grounds: It is actuarially sound, and the "earnings test" is economically and medically outmoded. The determining factor behind its original enactment no longer exists.

"The economic conditions that led Congress in the 1930s to limit Social Security benefits to those with little or no earnings at age 65 no longer apply today," says Hartke. "Then we were just emerging from the great depression, and in 1937 there was a severe recession. The nation was haunted by mass joblessness, and the paramount idea was to provide the older worker with the means to give up his job so as to pass it on to a younger man. "But today unemployment is at record-low levels. Now there is extensive need for older and

skilled workers, particularly in technical fields. The demand for experienced technicians is so great that the armed forces are recalling retirees with these skills. The passage of time and the enormous expansion of our gross national product has drastically undermined the shopworn argument against making full payment to the millions of Americans who have paid into Social Security for up to 30 years and now wish to supplement their benefits by continuing some form of profitable employment to partially replace the earnings they had before reaching 65. "Some 400 beneficiaries on the Social Security rolls are 100 years or older. One claims to be 120. Another retired only last year as a Seattle longshoreman at 105. More than 300 are receiving benefits on Social Security taxes they paid after age 75. "GOOD BETS — Mrs. Indira Gandhi will be replaced as Prime Minister of India. Her most likely successor is former Finance Minister Morarji Desai, whom she defeated for the office several years ago. He was re-elected to the new parliament by a big majority. President Johnson will not reappoint Federal Reserve Governor Charles S. Sneed, when his term expires May 1. Shephardson was named in 1955 by President Eisenhower, and is a vigorous advocate of tight money. Vice President Nixon will write a series of articles and make a number of speeches throughout the country following his "fact-finding tour" of Europe and the Iron Curtain. He will return around Easter, and after a brief rest will make a similar tour of the Far East. Australia and New Zealand will send additional troops to South Vietnam by spring. Australia now has 4,600 troops there; New Zealand an artillery battalion of around 150. The U.S. has agreed to give the new Indonesian regime around \$10 million in economic aid this year. Some of it will consist of surplus food, of which the country is much in need. Yugoslavia and West Germany will establish diplomatic relations. Private negotiations have been underway on that for some time, and a tentative agreement has been reached. Pentagon chiefs have decided to gradually eliminate the Titan intercontinental ballistic missile — the largest in the U.S. arsenal. The Titan 2 can carry around ten times the "payload" of the Minuteman and Polaris missiles over much greater distances. But the Titan is a liquid fuel ICBM, and it's being supplanted by more mobile solid fuel missiles. "ACTUARILY SOUND — The estimates that elimination of the "earnings test" would cost the Social Security trust fund an additional \$2 billion annually. Senator Hartke has compiled detailed actuarial statistics showing the fund can afford this. These figures are based on a

The Debt Should Be Paid

By OSCAR W. COOLEY, Assoc. Prof. of Economics, Ohio Northern Univ.

President Johnson's economic advisers admit:

1. That the dollar lost 3.3 per cent of its value in 1966.
 2. That this inflation was basically due to increase of the national debt.
 3. That the debt will show an increase of \$9,700,000,000 this fiscal year.
- And yet, the President proposes that the government spend \$135,000,000,000 in the next fiscal year (beginning July 1, 1967), which will boost the debt by \$8,100,000,000. This planned increase of the debt is not due to the Vietnam war. It is not unavoidable. In fact, it could be easily avoided by simply refraining from spending money on various peacetime projects which are not the federal government's business, have not customarily been financed from the U. S. Treasury, and do not cry out to be financed at all. For example, the President wants to spend \$412,000,000 on a "model cities" program totaling \$125,000,000 to subsidize city "it systems," \$40,000,000 to help people to pay their rent, \$280,000,000 to Sargent Shriver's Office of Economic Opportunity, \$204,000,000 in grants to states to be parcelled out to the needy, \$195,000,000 for food stamps, \$323,000,000 for depressed areas, etc.

In the seven years from 1961 to 1968, non-defense expenditures of the government will have increased by \$50,000,000,000 (assuming President Johnson's budget is accepted and spent as planned), while defense expenditures, including the cost of Vietnam, will have gone up by only \$25,000,000,000. If this country goes broke, will it be due to wars, or welfare? By pruning out unnecessary expenditure, the budget CAN be balanced, even without the 6 percent tax increase which the President recommends. The Administration is not trying to balance it. On the contrary, they are deliberately unbalancing it. One is forced to the conclusion that they believe an ever-increasing public debt is a good thing.

This man-on-the-street does not believe. He instinctively believes that debts are made to be repaid, and that this applies to the government debt. And he is right. Not only should the national debt be prevented from increasing but it should be reduced and eventually repaid in full. Because the debt is almost wholly internal, owed by the United States government to United States people, firms and institutions, to repay it would not cause any wealth to leave the United States. Wealth would merely be transferred from some Americans (the taxpayers) to other Americans (the holders of government bonds). But, some object, to pay the debt would wreck the United States money system, because much of our present money supply is based on the national debt. This money is in the form of bank deposits, or "checkbook money," which was created, little by little, when the debt was incurred and which would be cancelled, or destroyed, when and if the debt were repaid. This is true. However, it does not follow that to repay the debt would cause the nation's money supply to shrink. Repayment of bonds would enable the bondholders to lend to private persons and firms, and this would create new checkbook money which would replace the old that was cancelled by repayment of the debt.

In short, as public debt decreased, private debt would increase. Payment of the huge public debt would set free a vast amount of credit, which then would become available to private enterprises. As the checkbook money based on public debt was cancelled, new checkbook money based on private debt would be generated. This would take place gradually. To the average man there would probably be no noticeable change in the quantity or availability of money. Not by any means all of the checkbook money of the American people is based on public debt. In fact, the greater part of the total is based on private debt. Thus, the total quantity of checkbook money — "checking deposits," so-called — is not necessarily reduced by repayment of public debt, for as a public debt created dollar is wiped out, a private debt-created dollar is enabled to come into being and take its place. And this would improve the QUALITY of our dollars, for private debt-created dollars are based on the earning power of private firms and persons, while public debt-created dollars are based on the taxing power

of government, which in turn depends on the willingness of taxpayers to turn their earnings over to government.

Admittedly, it would not be wise to repay the national debt, extinguishing a considerable part of the nation's checkbook dollars, if no other dollars were created to take their places, for the result would be a drop in the number of dollars in circulation, a deflation, and a redistribution of wealth that would be just as despicable as that caused by an inflation.

But this need not be feared. The United States is full of private entrepreneurs, both individual and corporate, who are ambitious to expand their businesses and are therefore eager to borrow money. They would quickly snap up the loanable funds set free by the repayment of public debt. Their enterprises would expand. Goods and services would become more plentiful.

Government, using less credit, would shrink, and private enterprise, using more credit, would grow. The resources of the nation would be more efficiently used, because private enterprise is constantly spurred on by the necessity of making a profit, while government, having no such spur, is notoriously inefficient.

Big public debt is a concomitant of big government. Neither are necessary. Neither are desirable.

The Pampa Daily News

A Watchful Newspaper

EVER-STRIVING FOR THE TOP OF TEXAS TO BE AN EVEN BETTER PLACE TO LIVE

The Pampa News is dedicated to furnishing information to our readers so that they can better promote and preserve their own freedom and encourage others to see its blessing. Only when man is free to control himself and all he produces, can he develop to his utmost capabilities.

We believe that freedom is a gift from God and not a political grant from government. Freedom is neither license, nor anarchy. It is control and sovereignty of oneself no more, no less. It is thus consistent with the Human Relations Commandments, the Golden Rule and the Declaration of Independence.

Global Transport Service

Webster defines "express" as "an intercity and international system for the prompt and safe transportation of parcels, money, or goods with pickup and delivery service." Since 1839, express has been synonymous with the express company. Today, the express company is known as REA Express. But, irrespective of the name the express company still provides a unique service — just as unique as when its early couriers sped on fast ponies across plains and mountains to forge a vital link between the gold fields of California and the East. Its courier service now embraces the globe and utilizes every form of transport — jets, trains, trucks and ships. As an investor-owned enterprise which must compete with both government and other common carriers, it has had to expand and steadily improve service to expedite the movement of millions of shipments. It has developed the ultimate in containerized service, simplified shipping procedures and rate structure that have brought substantial benefits to big and

Prophets Were Wrong

When Thomas Edison invented the incandescent electric lamp that terminated the gas-light era, many expected the gas industry to go the way of the buggy-whip makers. Fortunately, the prophets of doom for gas were wrong. As the years passed, gas found other markets, and with the advent of new discoveries in metallurgy and pipeline technology for the transportation of gas, the industry expanded. By 1975, it is estimated there will be more than a million miles of pipeline and utility mains spread across the nation. Gas is now a major source of energy in a society whose energy requirements are proving insatiable. It provides one third of all energy and paradoxically there are more outside "gas-lights" in use than there were at the height of the famous gas-light era. In Edison's day, no one could foresee the growth in

The Power to Destroy

One of the fundamental principles of the U.S. taxing system has been the right to deduct business expenses from earnings in determining taxable income. Without these deductions, taxes for most businesses would be confiscatory. Yet certain types of advertising which in the judgment of business management are legitimate expenditures in behalf of their companies and stockholders are no longer so considered by the tax collectors. An advertisement of a tax-paying electric utility, to cite but one instance, opposing the extension of tax-subsidized government power projects is not considered a business expense by taxing authorities. In other words, a company is penalized if it seeks to protect its stockholders against the inroads of tax-exempt government competition which its taxes help support. It cannot include expenditures for this purpose as a business expense.

Paved with Dollars

America is literally a nation that runs on wheels, and wheels must have roads. In the past 10 years, we have spent more than \$114 billion on our roads and streets. This year despite a federal cutback Interstate highway funds, pending on roads — federal, state and local — will rise to a level of \$15 billion. During the next 10 years highway spending is expected to total more than \$150 billion. Thus total expenditures will probably reach or exceed \$250 billion, or one-quarter of \$1 trillion, during the next two decades. The figures are cited by Sen. Hubert H. Humphrey and Subcommit-

WASHINGTON

Dual Function Misconstrues CIA's Work

By RAY CROMLEY
Washington Correspondent
WASHINGTON (NEA) — In part the Central Intelligence Agency's current troubles are due to a basic split in its charter. The CIA is a mixture of two objectives that can't be welded together. One division runs an "action" operation involving a whole catchbag of secret government nonintelligence activities. It is this second function which leads the organization into most of its troubles, which have included:

- Reported payments to student, newspaper and other organizations
- The ill-fated attempted invasion of Castro's Cuba
- Politicking and alleged involvement with coups in Vietnam and other lands
- Helping nationalist, democratic and other selected groups in a wide array of sensitive nations
- Some identifying and training of future leaders in underdeveloped countries
- The theory is that people who stand for independence must be helped

It is often the U.S. interests, U.S. policymakers feel, to support people who are nationalists, even if not friendly to the United States on the theory that independent nations over the longrun serve our purposes better than pawns. Take an underdeveloped country where a communist underground is already thriving, say in Africa, Latin America or Asia. It hasn't yet developed into a Vietnam, but it may if the Red subversive groups are left unchallenged. Some way must be found to strengthen the nationalist, democratic forces — the indigenous governmental, youth, political, labor, industrial groups that want their country to be no one's pawn. The current practice here is to select countries on the critical list — then help those people, groups and institutions which show promise in helping to build their countries into viable, independent, self-government lands. Much of this aid can be given openly through the Agency for International Development or the Department of Defense or other open means. In some cases, aid must be secret if it is to be given at all. Reports of U.S. aid would ruin the effectiveness of some organizations, which would be branded as American pawns. In other cases, open aid would never get to the individuals or groups concerned because of corruption in the local country or because men of influence in the country being aided are afraid of any diminution of their own personal power if other individuals or groups are strengthened.

Under the present setup in the U.S. government, the CIA, is frequently used for such chores. It has considerable funds which usually can be used with few or no questions asked. If questions are asked in Congress they are usually silenced. These special CIA activities are required to have the approval of the White House, the State Department and often the Department of Defense. There is, in fact, an interdepartmental committee to pass on such programs. But the placing of these activities in the CIA creates extra problems. These activities get mixed up in people's minds with spying. Activities of the type we are talking about involve such high government policy that they should have a great deal of polling by men outside the CIA. The reason for this is simple. Policies are carried out on the spot by agents of varying degrees of experience and ability. Sometimes the men assigned to these tasks are men of considerable tact and wisdom, but sometimes they are men who are more enthusiastic than mature. They bumble in their enthusiasm. They are victims of "spookitis" or "cloak and daggeritis."

What is needed is another agency, or only 680,514 miles, are paved with heavy-duty surfaces. One result of the federal cutback thinks Randolph, is the diversion of some state matching funds to the pavement and repair of many sections of these primary repair of many sections of these primary and secondary systems which have had to be deferred because of the more pressing urgency of the Interstate system.

When You Finish The Job Over There —

Backstage Washington

Hartke to Fight for End of 'Earnings Test' On Social Security Payments to Eligible Beneficiaries

ROBERT ALLEN

PAUL SCOTT

WASHINGTON, March 4: Social Security beneficiaries should receive the full payments to which they are entitled regardless of how much additional income they can earn. The only condition should be the payment of Social Security taxes for at least 40 quarters — ten years. This is the only requirement that should prevail. There should be no "earnings test" of any kind. If a Social Security beneficiary has paid this tax for a minimum of 40 quarters then he should get his full pension notwithstanding what he may earn in gainful employment. That is the emphatic demand of Senator Vance Hartke, D-Ind., veteran member of the Finance Committee which will consider President Johnson's proposals to increase Social Security payments. They are sure of enactment in some form. It is Hartke's contention that Social Security is old age insurance, and no strings should be attached to full payment when a beneficiary becomes eligible. In other words, Hartke holds that those who pay Social Security taxes are in effect, buying government insurance for their old age and when they reach 65 should get what they paid for without any restrictions. Hartke has been seeking to eliminate the "earnings test" for a number of years, and is sponsoring a new bill to do that in this Congress. It is his belief the measure has a good chance of adoption on two grounds: It is actuarially sound, and the "earnings test" is economically and medically outmoded. The determining factor behind its original enactment no longer exists. "The economic conditions that led Congress in the 1930s to limit Social Security benefits to those with little or no earnings at age 65 no longer apply today," says Hartke. "Then we were just emerging from the great depression, and in 1937 there was a severe recession. The nation was haunted by mass joblessness, and the paramount idea was to provide the older worker with the means to give up his job so as to pass it on to a younger man. "But today unemployment is at record-low levels. Now there is extensive need for older and

skilled workers, particularly in technical fields. The demand for experienced technicians is so great that the armed forces are recalling retirees with these skills. The passage of time and the enormous expansion of our gross national product has drastically undermined the shopworn argument against making full payment to the millions of Americans who have paid into Social Security for up to 30 years and now wish to supplement their benefits by continuing some form of profitable employment to partially replace the earnings they had before reaching 65. "TOO LITTLE, TOO LATE — President Johnson has proposed that the "earnings test" ceiling be raised to \$1,600. It is now \$1,500 a year, with a \$1 reduction for each \$2 earned over that up to \$2,700. From then on, it's a dollar-for-dollar reduction. As a consequence, a 65-year-old beneficiary receiving the top payment of \$142 a month (\$1,704 a year) loses all his benefits when his earnings exceed \$3,804 — no matter how much and how long he paid Social Security taxes. In the lower brackets a retiree receiving \$50 a month loses his benefits with a supplementary income of only \$2,700 a year. Thus, the lower the benefit, the lower the amount of allowable additional income — for beneficiaries who need it most. Senator Hartke vigorously argues that an earnings limitation is an unreasonable and unjustifiable "penalty" on retirees with no validity in today's economy. "Social Security is nothing more than a form of insurance," he asserts, "and the people who pay for it should benefit from it to the maximum they are entitled to without any limitations. What may have made sense 20 or 30 years ago doesn't necessarily hold true today, and just because a system has been in effect for many years is no reason why it should be its unwarranted. "Medicine has made impressive strides in geriatrics. People are living longer and are industrially productive longer. It is time we turned the clock forward and fulfilled our obligations to those who paid their own way through life and wish to continue. "That's the real nub of this issue. It's as simple and clearcut as that. Doing away with the outmoded Social Security "earnings test" is purely a matter of plain justice and fairness to millions of Americans entitled to it. "ACTUARIALLY SOUND — The estimates that elimination of the "earnings test" would cost the Social Security trust fund an additional \$2 billion annually. Senator Hartke has compiled detailed actuarial statistics showing the fund can afford this. These figures are based on a

computerized projection of the country's aggregate payrolls over the next 75 years. According to this actuarial projection, the Social Security fund actually achieves a surplus balance more than adequate to include all beneficiaries who have paid a minimum of 40 quarters in taxes. "Based on a national payroll now approaching \$230 billion," says Hartke, "this actuarial projection proves that the Social Security fund on an asserted tax basis does now and will continue to realize a favorable surplus balance more than enough to pay benefits to all qualifiers at 65, regardless of whether they retire or keep on earning their own way." The pending Social Security legislation will be considered by the Senate Finance Committee after it has been acted on by the House in the spring. When this measure comes before the committee, Hartke will offer his bill, eliminating the "earnings test" as an amendment — and is confident of its inclusion. Some 400 beneficiaries on the Social Security rolls are 100 years or older. One claims to be 120. Another retired only last year as a Seattle fisherman at 105. More than 300 are receiving benefits on Social Security taxes they paid after age 75.

GOOD BETS — Mrs. Indira Gandhi will be replaced as Prime Minister of India. Her most likely successor is former Finance Minister Morarji Desai, whom she defeated for the office several years ago. He was re-elected to the new parliament by a big majority. President Johnson will not reappoint Federal Reserve Governor Charles S. Sneed, when his term expires May 1. Shephardson was named in 1955 by President Eisenhower, and is a vigorous advocate of tight money. Vice President Nixon will write a series of articles and make a number of speeches throughout the country following his "fact-finding tour" of Europe and the Iron Curtain. He will return around Easter, and after a brief rest will make a similar tour of the Far East. Australia and New Zealand will send additional troops to South Vietnam by spring. Australia now has 4,600 troops there; New Zealand an artillery battalion of around 150. The U.S. has agreed to give the new Indonesian regime around \$10 million in economic aid this year. Some of it will consist of surplus food, of which the country is much in need. Yugoslavia and West Germany will establish diplomatic relations. Private negotiations have been underway on that for some time, and a tentative agreement has been reached. Pentagon chiefs have decided to gradually eliminate the Titan intercontinental ballistic missile — the largest in the U.S. arsenal. The Titan 2 can carry around ten times the "payload" of the Minuteman and Polaris missiles over much greater distances. But the Titan is a liquid fuel ICBM, and it's being supplanted by more mobile solid fuel missiles.

A thought for the day — Bishop George Meredith once said: "I expect that women will be the last thing civilized by men."

The Debt Should Be Paid

By OSCAR W. COOLEY
Assoc. Prof. of Economics,
Ohio Northern Univ.
President Johnson's economic advisers admit:

1. That the dollar lost 3.3 per cent of its value in 1966.
 2. That this inflation was basically due to increase of the national debt.
 3. That the debt will show an increase of \$9,700,000,000 this fiscal year.
- And yet, the President proposes that the government spend \$135,000,000 in the next fiscal year (beginning July 1, 1967), which will boost the debt by \$8,100,000,000.

This planned increase of the debt is not due to the Vietnam war. It is not unavoidable. In fact, it could be easily avoided by simply refraining from spending money on various peacetime projects which are not the federal government's business, have not customarily been financed from the U. S. Treasury, and do not cry out to be financed at all. For example, the President wants to spend \$12,000,000 on a "model cities" program totaling \$125,000,000 to subsidize city "systems", \$40,000,000 to help people to pay their rent, \$280,000,000 to Sargent Shriver's Office of Economic Opportunity, \$204,000,000 in grants to states to be parcelled out to the needy, \$195,000,000 for food stamps, \$323,000,000 for depressed areas, etc.

In the seven years from 1961 to 1968, non-defense expenditures of the government will have increased by \$50,000,000,000 (assuming President Johnson's budget is accepted and spent as planned), while defense expenditures, including the cost of Vietnam, will have gone up by only \$25,000,000,000. If this country goes broke, will it be due to wars, or welfare?

By pruning out unnecessary expenditure, the budget CAN be balanced, even without the 6 percent tax increase which the President recommends. The Administration is not trying to balance it. On the contrary, they are deliberately unbalancing it. One is forced to the conclusion that they believe an ever-increasing public debt is a good thing.

This man-on-the-street does not believe. He instinctively believes that debts are made to be repaid, and that this applies to the government debt. And he is right. Not only should the national debt be prevented from increasing but it should be reduced and eventually repaid in full.

Because the debt is almost wholly internal, owed by the United States government to United States people, firms and institutions, to repay it would not cause any wealth to leave the United States. Wealth would merely be transferred from some Americans (the taxpayers) to other Americans (the holders of government bonds).

But, some object, to pay the debt would wreck the United States money system, because much of our present money supply is based on the national debt. This money is in the form of bank deposits, or "checkbook money," which was created, little by little, when the debt was incurred and which would be cancelled and destroyed, when and if the debt were repaid.

This is true. However, it does not follow that to repay the debt would cause the nation's money supply to shrink. Repayment of bonds would enable the bondholders to lend to private persons and firms, and this would create new checkbook money which would replace the old that was cancelled by repayment of the debt.

In short, as public debt decreased, private debt would increase. Payment of the huge public debt would set free a vast amount of credit, which then would become available to private enterprises. As the checkbook money based on public debt was cancelled, new checkbook money based on private debt would be generated. This would take place gradually. To the average man there would probably be no noticeable change in the quantity or availability of money.

Not by any means all of the checkbook money of the American people is based on public debt. In fact, the greater part of the total is based on private debt. Thus, the total quantity of checkbook money — "checking deposits," so-called — is not necessarily reduced by repayment of public debt, for as a public debt created dollar is wiped out, a private debt-created dollar is enabled to come into being and take its place. And this would improve the QUALITY of our dollars, for private debt-created dollars are based on the earning power of private firms and persons, while public debt-created dollars are based on the taxing power

of government, which in turn depends on the willingness of taxpayers to turn their earnings over to government.

Admittedly, it would not be wise to repay the national debt, extinguishing a considerable part of the nation's checkbook dollars, if no other dollars were created to take their places, for the result would be a drop in the number of dollars in circulation, a deflation, and a redistribution of wealth that would be just as disruptive as that caused by an inflation.

But this need not be feared. The United States is full of private entrepreneurs, both individual and corporate, who are ambitious to expand their businesses and are therefore eager to borrow money. They would quickly snap up the loanable funds set free by the repayment of public debt. Their enterprises would expand. Goods and services would become more plentiful.

Government, using less credit, would shrink, and private enterprise, using more credit, would grow. The resources of the nation would be more efficiently used, because private enterprise is constantly spurred on by the necessity of making a profit, while government, having no such spur, is notoriously inefficient.

Big public debt is a concomitant of big government. Neither are necessary. Neither are desirable.

1040 U.S. Individual Taxpayers Ask IRS

EDITOR'S NOTE — This column of questions and answers on federal tax matters is provided by the Pampa office of the U. S. Internal Revenue Service and is published by the Pampa News as a public service to taxpayers. The column answers questions most frequently asked.

Q—Do you have to be 65 to take advantage of retirement income credit?

A—No you don't. If you retire before reaching age 65 under a public retirement system you may be eligible to use this provision of the tax law.

Q—Can I deduct the Federal tax shown on my monthly phone bill?

A—No. Federal excise taxes are not deductible as an itemized deduction.

Q—I sold shares of stock in a company I have been investing in for years. How do I identify the purchase price of the shares I sold since I bought them at various times at various prices?

A—The principle that applies here when no other price identification can be made is "first in, first out."

Q—Where can I find a good tax man to help me with my report?

A—Local accounting and legal societies will be able to provide a list of qualified tax advisers in this area. If you just have several questions about your return you may be able to get the help you need from your local IRS office.

100,000 May Die in Vietnam During 1967

WASHINGTON (UPI) — Recent step-up in the intensity of the Vietnamese fighting has raised a prospect that 100,000 men may die in the conflict during 1967, Pentagon figures showed Saturday.

With weapons and ammunition apparently reaching Communist forces at an increasing rate, both U.S. and Viet Cong casualties have been running at more than 40 per cent above the levels for the first three months of 1966.

A total of 55,000 enemy and 5,000 Americans were killed in 1966.

FIELD LIMITED HAZLEMEERE, England (UPI) — A policeman's lot may not be a happy one but consider the lot of the lonely policeman Jean Purvis said 6 sin she became a lady cop she can't get dates with her former boyfriends. "As soon as I say I'm a policewoman, they're off," she lamented. "I'll probably have to marry a policeman instead."

U.S. Loses 475th Plane In N. Vietnam Air Raids

SAIGON (UPI) — The United States has lost its 475th plane in an air raid over North Vietnam, a military spokesman said Saturday.

An Air Force F4C Phantom Friday due to unknown causes and its two-man crew was listed as missing, the spokesman said.

Air Force, Marine and Navy pilots were again hampered by poor weather over the north and were held to only 79 missions Friday, most of them against roads, rivers and storage areas in the panhandle.

In the south, Air Force and Marine pilots flew 464 sorties, 256 of them in support of ground operations. B12 bombers struck three times in South Vietnam Friday night and Saturday morning. The targets included troop concentrations 51 miles north of Kontum City and a base camp 31 miles west of Quang Ngai City.

Over North Vietnam, Air Force F105 Thunderchiefs hit the Phuong Chay cave storage area and triggered a secondary explosion that sent smoke billowing 200 feet into the sky.

Navy pilots who flew 23 missions from the decks of the 7th Fleet carriers USS Kitty Hawk, USS Ticonderoga and USS Bon Homme Richard hit storage areas, bridges, roads, and military areas in the southern panhandle 30 to 31 miles southeast of Dong Hoi.

Do you really know how fast your insurance payments would come in if something happened to you or your house or your car?

The Sentry man knows and will be glad to tell you.

A car rams into you. Your car goes to the garage. You go to the doctor for a sprained wrist. How long would you have to wait for your insurance money? Let your Sentry man check your insurance and tell you. He'll also tell you that Sentry pays some claims right on the spot! Why don't you call today?
