Israeli Column Attacks Jordan

AMMAN (UPI)—An Israeli armored column backed up by jet fighters and helicopters struck today into Jordan south of the Dead Sea, a Jordanian military spokesman said. The Israeli force was immediately engaged by Jordanian forces, the spokesman said. He reported fighting under way more than two hours after the thrust across the cease-fire line below the Dead Sea. (In Jerusalem, Israeli spokesmen said they had no comment on Jordan reports of battling on the Jordan River.) Israel sent 15,000 troops into Jordan March 21 on a 15-hour raid against Arab terrorists based in Jordan. (The U.N. Security Council passed a resolution condemning Israel by name for the raid. The council rapped unnamed others for their part in violence along the cease-fire lines left after Israel's victorious June 5-10 war. But Israel spurned the U.N. sanction and its leaders said they would strike again if need be.)

Carmichael's Activities Investigated

WASHINGTON (UPI)—The Justice Department is investigating Stokely Carmichael's activities to determine if he may have contributed to Washington's weekend violence. Atty. Gen. Ramsey Clark said today Carmichael, at a news conference here Friday 14 hours after the death of Dr. Martin Luther King, said Negroes would “have to get guns” and take to the streets to “retaliate for the (King) execution.” Clark said in a television interview (Today Show—NBC) that federal investigators are checking his statements to see if “he may have violated any... one of a number of statutes.” Carmichael was on his way to Richmond today to attend a court hearing for H. Rap Brown, chairman of the Student Non-Violent Coordinating Committee. Carmichael was said to be planning to go on from there to Atlanta for King's funeral Tuesday.

Spring Weather Brings 'Em Out In Pampa Area

By BILL MARTIN
Pampa News Staff Writer
Spring sunshine, pretty weather and good times were the order of the day in Pampa yesterday. With girls in shorts, boys in shortsleeves, everyone in shades and tops down on cars, most everybody enjoyed the weather, while the mercury climbed higher, and higher, reaching a warm 66 degrees. The parks were full of small kids, as were the drive-ins and the streets, with the older ones out “burning up the main drag,” and getting snarled in traffic with at least two minor accidents, both occurring in peak traffic areas. Fortunately, other than a few dents in their cars, nobody was scarred with injuries to spoil their Sunday outings. The drive-ins were hopping with cokes and ice cream cones going good. One car-load of girls drove in to one place, this writer noticed, and ordered several cones. Within minutes, another round was ordered, and for the grand finale, they all ordered more to go, licking, slurping, chattering and laughing as they drove off. Scenes like that were being played all over town yesterday, with more to come later as the weather gets hotter and the sun rises higher and more summertime activities get under way.

According to the Jordanian spokesman, the Israeli armor crossed the border at Al-Dahl, 23 miles south of the Dead Sea. The armor headed for Hemra El Fedal, seven miles inside Jordan, and Feinna, 12 miles inside Jordan, the spokesman said. Earlier, a Jordanian spokesman had announced a 45-minute tank and artillery duel across the Jordan River. Israel had seized the west bank of the river in the June fighting.

Court Kicks Out Death Penalty In Lindbergh Law

WASHINGTON (UPI)—The Supreme Court today threw out the death penalty provision of the Lindbergh kidnap law on grounds it unconstitutionally limits a defendant's right to be tried by a jury.

The 6-2 decision left standing the remainder of the 35-year-old federal law. The death penalty was eliminated because the law provides it can be imposed only by a jury and not if the case is heard simply by a judge. In essence the court held that this confronted a defendant with the jeopardy of being condemned to death unless he waived jury trial.

Similar death penalty provisions are contained in the atomic espionage law, the federal bank robbery statute and the District of Columbia rape law. In addition, several states have “little Lindbergh laws” which follow the same jury procedure. The Justice Department argued against disturbing the law, Nevada, New Hampshire, Wyoming, New Jersey and Mississippi have similar provisions, the department pointed out.

The Justice Department told the court there have been 10 kidnap cases under the Lindbergh law where the death penalty had been imposed. In at least five of the cases where the defendant pleaded guilty and the jury recommended death, the judge accepted the recommendation.

The basic law was enacted June 22, 1932. The death penalty provision was added in 1934. The court's majority opinion agreed with a lower court that the act “imposes an impermissible burden upon the exercise of a constitutional right.” “But we think the provision is severable from the remainder of the statute,” the opinion said. “There is no reason to invalidate the law in its entirety simply because its capital punishment clause violates the constitution.”

Search Continues For Explosion Victims

By HORTENSE MYERS
RICHMOND, Ind. (UPI)—The search continued today in the rubble of Main Street for the 50 or more victims of an explosion and fire which ripped through eight business buildings Saturday at the height of a busy business day. Police said FBI specialists have identified 25 bodies. There are 21 persons missing and presumed dead. Richmond Police Chief Daniel L. Strahan said he had no doubt the total number of dead will be 50 or

US Suffers Most Wide-Spread Racial Unrest In History; 30 Die Over 2,000 Injured; 8,000-Plus Arrested

Mrs. King Leads As Negroes Gather For 'March' In Memphis

By HENRY P. LEIFERMANN
MEMPHIS, Tenn. (UPI)—Thousands of Negroes gathered around a gray, high-steeped church today to await Mrs. Martin Luther King Jr. and a massive march in the memory of her slain husband. Marchers milled in the streets around Calvary Temple AME Church, a few blocks from the spot where the integration leader was felled last week by a sniper bullet while planning this march. marred by last week's rioting that erupted after march led by King. Walter Reuther, president of the United Auto Workers Union, was among those who came here for the march. Rioting erupted in Memphis Thursday night after King was killed at his hotel by the sniper, who police said “faded away,” and 4,000 National Guardsmen were rushed in to aid police and state troopers restore order. The soldiers had been sent into Memphis a week earlier when a march led by King flared into violence that killed one person and injured 62 others.

BULLETIN

Mrs. Martin Luther King Jr. led 10,000 persons today in a march through Memphis in memory of her husband, slain a few blocks away by a white sniper.

There was to be an empty place by her side to symbolize the absence of King. Police manned barricades in the streets and clamped on the tightest security, the city has never seen. Most of the marchers converging around the church were silent, or singing softly. At the head of the march with Mrs. King was the Rev. Ralph Abernathy, who succeeded the 39-year-old Nobel Peace Prize winner as head of the Southern Christian Leadership Conference.

Burial Tuesday
Abernathy Sunday said Mrs. King would “interrupt her mourning to be with me in leading this march.” King's body lies in state in Atlanta before burial Tuesday. The marchers, swelled by hundreds of persons from other cities, were to start at Clayton AME Church in a Negro ghetto, pass through a tenement district and go down main street to city hall. The procession will cross famed Beale Street and other areas

Blaze Destroys Area Farm Home

A blaze last night at the John T. Sims farm 10 miles east on Highway 60 completely destroyed a five-room stucco house and all furnishings. Firemen from the Pampa Fire Department's South station and a unit from the Miami Volunteer Fire Department kept the blaze from spreading to a nearby complex of buildings. The house was occupied by an employee of Sims; firemen kept the blaze from spreading to a nearby garage and the house where the Sims family lives by spraying the buildings with water. No estimate of damages was available.

Report Gunfire
Police and soldiers sealed off a two-block area in a Negro district Sunday night when shots rang out. Another area reported a squad car was drawing fire. Authorities took intensive safety precautions for the march.

Downtown Memphis was to be shut down tight during the hours of the march and traffic was to be directed away from (See NEGROES, Page 3).

Police and soldiers sealed off a two-block area in a Negro district Sunday night when shots rang out. Another area reported a squad car was drawing fire. Authorities took intensive safety precautions for the march.

Army Walks Into US Bastion

Jubilant Marines Leave Khe Sanh To Chase Enemy As 'Siege' Lifted

By JACK WALSH
SAIGON (UPI)—The Marines of Khe Sanh turned over their fort to the U.S. Army today and moved out to smash the North Vietnamese army that besieged their northern frontier bastion for 73 days. “It's about time we got out there and chased them,” said Lance Cpl. Gary Harris, 20, of Lubbock, Tex., one of the 6,000 Marines who lived like moles during the weeks of day and night bombardment. “Now we can get our revenge.” Troops of the Army 1st Air Cavalry Division, blowing “Charge!” on a captured Communist bugle, walked the final two miles into the fort Sunday to complete the week-long, 20,000-man Operation Pegasus drive that broke the siege of Khe Sanh. Today's gleeful Marines presented their bunkers to the Army, slapped off the red dust from their fatigues and struck out for the jungle hills that hid their tormentors. In other action, U.S. jets Sunday flew 134 missions against supply line targets in North Vietnam's southern panhandle. It marked the greatest number of missions since the 144 flown Jan. 6. In ground action Sunday, much of it near Khe Sanh and

PRACTICAL JOKE—As Pampa Patrolman Guy Bowers got off duty early Monday morning, he got the surprise of his life. He had manned a job throughout the night that had been put up “For Sale.” The sign, which had been placed near the entrance to the police station was, according to Bowers, “not there when I came in last night.”

the northern area coastal cities Vietnam. The ban came after one was lost on a North Vietnam mission and a second crashed in Thailand. Six of the government units killed 71. No American losses were reported. David Lownds of Plantation, Fla., the Marine commander of Khe Sanh when UPI correspondent Raymond Wilkinson asked if he was glad to leave the battered plateau just below the North Vietnam border. “I'm definitely happy to be been barred from striking North (See JUBILANT, Page 3)

US, N. Vietnam Moving Toward Establishing Contact For Talks

By STEWART HENSLEY
WASHINGTON (UPI)—The United States and North Vietnam are moving warily toward “establishing contact” amid indications that both sides may have begun some reciprocal reduction in the scope of their military operations. Following the withdrawal of principal North Vietnamese units besieging Khe Sanh, the United States for the third consecutive day Sunday limited its air attacks on North Vietnam to an area about 120 miles north of the Demilitarized Zone (DMZ), just below the 19th parallel. This was considerably less territory than was included in President Johnson's original definition of the bombing zone, which extends some 200 miles north of the DMZ to the 20th parallel. The Soviet news agency Tass reported today in a dispatch from Hanoi that the Central Committee of the Vietnam

Over 2,000 Injured; 8,000-Plus Arrested

By United Press International
Violence, erupting in the aftermath of the assassination of Dr. Martin Luther King Jr., has struck more than four-score American cities in a destructive orgy of staggering proportions. Since King's assassination in Memphis, Tenn., Thursday night, including the Palm Sunday national day of mourning proclaimed by President Johnson in honor of the fallen civil rights leader, at least 85 cities were visited by violence. The macabre box score accompanying the most widespread racial unrest in America's history:
Dead: at least 30.
Injured: more than 2,000.
Arrested: 8,379.
Troops: 19,900 federal, 30,100 National Guard.
Damage ran into countless millions. Fire destruction in Chicago and Washington alone totaled at least \$10 million each; other cities assessed wreckage in many millions more. The hardest hit cities, Baltimore, Chicago and Washington, maintained a fragile peace today under the stern hand of thousands of federal troops and National Guardsmen supplementing local police. Pittsburgh—Hit Hard
In Pittsburgh, where bands of Negroes ran for three nights through the Hill District ghetto, 3,000 guardsmen were on duty and 1,500 others were on standby alert through western Pennsylvania, ready for a renewal of the trouble. Chicago had 11 riot-related deaths, Washington 8, Baltimore 4, Detroit 2 and Minneapolis, Memphis, Tallahassee and Oakland 1 each. Washington had more than half the arrests and two-thirds of the injured, as the nation's capital remained in the tight control of more than 13,000 federal troops. Despite the day of mourning Sunday, Baltimore and Pittsburgh experienced sharp violence. In the first major racial disorder in the history of Pittsburgh, much of a 20-square block Negro ghetto was ransacked, looted and burned. At least 712 persons were arrested, 24 injured seriously enough to (See RIOTS, Page 3)

DR. CAROL ANDERSON... on mental retardation

'Retardation' Is Subject Today In Town Hall Meet

The Gray County Association for Retarded Children has scheduled a Town Hall meeting on Retardation at 7 p.m. today in Lovett Memorial Library Auditorium. Speakers will be H. Russell White, director of Amarillo State Center for Human Development since 1966; and Dr. Carol Anderson, instructor in the education and psychology department of West Texas State University. Associate professor of education and head of the special education program, Dr. Anderson received a B.S. degree from Texas Woman's University in 1957 in occupational therapy, sociology and an M.A. in special education in 1961 from TWU. For two years she was staff occupational therapist with Menninger Psychiatric Foundation and Clinic, Topeka, Kans., and worked with severely disturbed adults. In 1960-62, she was itinerant teacher of the blind and partially sighted, and initiated a Cooperative Dallas County project. From 1963-66, Dr. Anderson was Texas Education Agency's consultant in all areas of special education, and established the consultantship for the visually handicapped program for state supervision of local public school programs. She will speak on “The Problem of Mental Retardation and What Should Be Done About It.” White will discuss what is being done in the Panhandle about mental retardation. White received his B.S.A. in 1957 and M.A. in 1958 from George Peabody College for Teachers. He was recreation therapist, 1956-1958, and director of adjunctive therapy, 1958-60, at Clover Bottom Hospital and School, Nashville, Tenn. For two years he directed recreation, and from 1962-1965, was cottage life director at Sunland Training Center, Marianna, Fla. After serving as director of a hospital improvement project at Travis State School in Austin, a year, he was named in 1966 as director of Amarillo State Center of Human Development. If it comes from a Hardware store we have it. Lewis Hardware. (Adv.)

BULLETIN

TOKYO (UPI)—Radio Hanoi said tonight North Vietnam was willing to meet the American diplomats at Phnom Penh, Cambodia, or any other mutually agreeable city for preliminary talks. The front coupled this with a demand that “the American imperialists unconditionally stop the bombings and all other acts of war” against North Vietnam and halt the dispatch of more troops to South Vietnam. But the announcement did not make this a condition for the talks Hanoi has said it is willing to open with the United States. Administration officials, meantime, indicated a belief that New Delhi or Rangoon would prove to be the site of the Washington-Hanoi contact when it is finally arranged. While suggesting Geneva in its formal approach through the North Vietnamese embassy in (See VIETNAM, Page 3)

HMMMM!—These major league managers aren't contemplating the effects of spring fever but rather the progress of spring training. At left, from top to bottom, the Phillies' Gene Mauch, Ralph Houk of the Yankees and the Cardinals' Red Schoendienst ponder their problems alone while, at right, Mets manager Gil Hodges (R) talks with coach Yost Berra, who rubs his legs after doing calisthenics.

Shy, Nervous Jimmy Clark Dies In German Race Track Mishap

HOCKENHEIM, Germany (UPI)—He was shy and nail-biting nervous and the most famous Scot since Robert Burns. Jimmy Clark never underestimated the danger he courted as the world's quickest man on wheels.

But the wheels, not the man with the dragonfly reflexes, were likely responsible for his death Sunday on a rain-slickened track in a fragile racing car at 175 miles an hour. He was killed roaring alone down a straightaway, not on a death-dealing curve or in a spectacular crackup with a pack of cars.

Describes Racing
It was an ironic way to die for the quiet man in the dark blue crash helmet who once said: "When I'm going flat out, drifting through a corner, I'm not driving a car, really. I'm putting myself through that corner. The car happens to be under me and I'm driving it, but I'm part of it and it's part of me."

Known as the Flying Scot, the 32-year-old Clark was twice the world auto racing champion. In the short span of seven years he won 25 Grand Prix races.

Competing in a European champion formula 2 race Sunday, Clark was running seventh in the first of two scheduled heats. No one was near him.

Suddenly his gold and red Lotus-Ford swung sideways on a straightaway and somersaulted into woods fronting the track. It smashed broadside into a tree "just where the poor man sat strapped in the cockpit," said a police officer on the spot.

Dies Instantly
Doctors said Clark died instantly of a broken neck and multiple skull fractures.

Dallas, Fort Worth Seek Franchise
HOUSTON (UPI)—Dallas and Fort Worth businessmen and sports fans were to make last efforts to gain a National League baseball franchise for the two cities today, in a conference with Houston Astros owner Roy Hofheinz.

Hofheinz is one of three members of the National League expansion committee. Tommy Mercer of Fort Worth and Lamar Hunt of Dallas are seeking the franchise. They were to be accompanied by nine other top Dallas-Fort Worth area businessmen at the conference.

Hunt and Mercer have already talked with John Galbreath of Pittsburgh, and plan to confer with Walter O'Malley of the Los Angeles Dodgers soon. Hofheinz, Galbreath and O'Malley make up the National League's expansion committee.

The race was won by Jean-Pierre Beltoise of France with teammate Henri Pescarolo second. Third place went to Britain's Piers Courage. Both Beltoise and Pescarolo drove Matra-Fords while Courage was at the wheel of a McLaren.

Track officials said Clark's car was so badly shattered that the cause of the crash might never be known. But fellow drivers generally blamed a mechanical failure rather than human error.

Britain's Graham Hill, a former world champion, said he thought the car developed a defect in its steering system. "I doubt he made a mistake. He was a reliable driver and knew the Hockenheim course too well for that," he said.

Summary Of Weekend Sports

By United Press International
NEW YORK (UPI)—Peter Piper won the Excelsior Handicap at Aqueduct by 6 1/2 lengths.

GREENSBORO, N.C. (UPI)—Billy Casper fired a 67 for a 132 and a two stroke lead in the Greater Greensboro Golf Open.

BOWIE, Md. (UPI)—Dancer's Image, a Kentucky Derby hopeful, scored a three length victory in the Governors Gold Cup at Bowie.

JOHANNESBURG, South Africa (UPI)—South African sprint star Paul Nash equalled the world record of 10 seconds for 100 meters.

AKRON, Ohio (UPI)—Dave Davis won the \$25,000 first prize in the Firestone PBA Tournament of Champions with a 213 to 205 for Don Johnson.

HEAVENLY VALLEY, Calif. (UPI)—Gertrud Gable and Herbert Huber gave Austria a sweep in the slaloms at the World Cup skiing races.

DALLAS (UPI)—The United States Lawn Tennis Association said it would hold an open tournament this year at a site to be selected.

HOCKENHEIM, West Germany (UPI)—Jim Clark of Scotland, a former world champion auto driver, was killed during a European formula 2 race.

PARIS (UPI)—Karen Muir, 15, of South Africa, broke her country's 800 meter freestyle record with a time of nine minutes, 54.5 seconds.

PHOENIX, Ariz. (UPI)—Bobby Unser of Albuquerque, N.M., won the 150-mile Jimmy Bryan United States Auto Club race.

SAN JUAN, P.R. (UPI)—Mark Cox of Britain beat Allen Fox of Los Angeles for the men's singles title in the International Tennis Tourney.

Golfers Will Go 36 Holes Today At Greensboro

GREENSBORO, N.C. (UPI)—Thirty-six holes makes for a long day of golf, but Billy Casper, the leader in the \$137,500 Greater Greensboro Open, says the golfers are ready "to do what has to be done."

The two round finale was forced on the GGO participants after Friday's second round was rained out. A second postponement Sunday to honor the national day of mourning for Dr. Martin Luther King moved the final 36 holes from Sunday to today.

"You've got to look at it like any other job," said Casper, who is two strokes in front of his competition with a two-day total of 10 under-par 132. He had rounds of 65-67.

"We come out here, to our office, and do our work," he said. "I think everybody is ready to do what has to be done."

Sunday's postponement pushed the 31st GGO into Masters week at Augusta, Ga. Many players wanted to be on the Augusta National course today to practice for the Masters.

Longhorns Atop SWC Standings

By United Press International
Nine consecutive victories have carried the Texas Longhorns to the top of the Southwest Conference baseball standings and no one is going to knock them off that perch until after Easter, at least.

Coach Cliff Gustafson's Longhorns whipped Baylor 2-0 and then swept a twin bill 10-6 and 8-7 last week to complete their climb to the top after losing first three games of the season. Texas now has a 9-3 league record to 4-2 for Texas A&M, 7-4 for Texas Christian, 6-5 for Southern Methodist, 4-5 for Baylor, 4-8 for Rice and 1-8 for Texas Tech.

The spring vacation period catches up with the league warfare this week and only two conference games are on tap—Baylor at Texas A&M Monday and Tuesday. Should the Aggies sweep both games, they could tie Texas percentage-wise but will be three games back in the all-important win column. The Aggies didn't play inside

the league last week, but TCU and SMU improved their positions with clean sweeps. TCU beat Rice 9-5 and 9-2, while SMU took a twin bill from Texas Tech 7-2 and 4-2 and then won a single game Saturday 6-4.

In outside contests this week, Tech plays four days, starting Tuesday at Pan American; Texas is at Trinity Wednesday and at St. Mary's Thursday; TCU hosts Abilene Christian Thursday and Friday, and Baylor visits the Houston Cougars Friday and Saturday.

12-Man Olympic Basketball Team Named After Trials

ALBUQUERQUE, N.M. (UPI)—Scoring conscious Charlie Scott of North Carolina and junior college rebounding ace Spencer Hayward of Trinidad today head the list of 12 basketball players who will represent the U.S. in the summer Olympics next October in Mexico City.

The two were the top two performers in scoring and rebounding at the Olympic trials which ended Saturday. Six alternates to the Olympic team were also named by the 45-member Olympic committee.

Joining Scott and Hayward on the team were Jo Jo White of

Kansas, Ken Spain of Houston, Mike Siliman, Mike Barrett and John Clawson from the Armed Forces team, Don Dee of St. Mary's of the Plains and Glynn Sautiers of Northeast Louisiana state of the NAIA. Calvin Fowler and James King of the AAU, and Bill Hosket of Ohio State.

The six alternates picked are Rick Mount of Purdue, Tom Black of the Armed Forces, Charles Paulk of Northeast Louisiana and Joe Hamilton of the Southwest Christian College in Texas.

RAN MILE ANCHOR LAP IN 45 FLAT

UT Frosh Dave Morton Blazes Track Trails In Bid For Acclaim

By ED FITE
UPI Sports Writer
AUSTIN, Tex. (UPI)—Dave Morton, a freshman architecture major at the University of Texas, already is turning in designs of note on the nation's college track canvas just as he did in his high school days on the cinders.

A new National Collegiate Athletic Association ruling permits freshmen to compete with the varsity in spring sports and as a result there will be no break in the slender teenager's bids for national acclaim.

From Running Star
This clocking, of course, was from a running start, but compares with a world's best open 440 time of 44.8 seconds by Tommie Smith of San Jose State. And, Morton has nearly four years to improve.

He had spun a 46.1-second anchor on Texas' sprint medley relay on Friday night in which the Longhorns finished second to Kansas but in the identical 3:17.6 time.

Speed is nothing new to Morton, who anchored Spring Branch Memorial High to national prep marks of 3:11.8 and

The 6-foot 3-inch, 170-pound Houston youngster furnished the brightest performance of an otherwise dull day Saturday as the 41st Texas Relays came to a close minus all but a tiny handful of records to display in this Olympic track year.

The 18-year-old Morton, voted the university division's outstanding performer, ran a blazing 45-second flat anchor lap to pull his Texas Longhorns to a very creditable 3:07 flat mile relay triumph in the final event before 11,500 fans in Memorial Stadium.

Division Record
The Texas winning time of 3:07 was a division record, but was shy of the overall mark of 3:04.7 by Southern University. It was Texas' second relay victory of the day, the host school having won the two-mile relay in 7:26.2 on the strength of a Mosley.

Kansas won a stirring duel with Drake in the four-mile relay as both teams were clocked in 17:00.3, and Kansas State nipped Kansas in the sprint relay in 40.3 seconds.

Southern University of Baton Rouge returned to the relays after a year's absence and won the division's outstanding team award and furnished the outstanding individual in hurdler-sprinter Harvey Nairn.

Southern won both the sprint and mile relays in the same time as the university champions—40.3 and 3:07—Saturday to go with a winning 880 relay time of 1:23.8 on Friday night.

3:22.3 in the mile and sprint medley relays while posting the nation's top schoolboy times of 46.7 and 1:49.9 in the 440 and 880 dashes.

The Pampa Daily News

A Watchful Newspaper

EVER STRIVING FOR THE TOP OF TEXAS TO BE AN EVEN BETTER PLACE TO LIVE

The Pampa News is dedicated to furnishing information to our readers so that they can better promote and preserve their own freedom and encourage others to see its blessing. Only when man is free to control himself and all he produces, can he develop to his utmost capabilities.

We believe that freedom is a gift from God and not a political grant from government. Freedom is neither license, nor anarchy. It is control and sovereignty of oneself. No more, no less. It is thus consistent with the Human Relations Commandments, the Golden Rule and the Declaration of Independence.

A Strange Coincidence

The word was out at noon last Saturday how candidates were running in the local school board election at that time. Those who were not faring too well, if they so desired, then had seven hours left to get on the phone and get out the vote that could possibly put them back in the running. How does this information leak out? It's a good question and perhaps someone will give us the answer. No matter how it gets out—there is something radically wrong and unfair about it. We had always been of the opinion, that results of elections were not supposed to be announced until the final closing of the polls. That was not the case Saturday.

The Pampa News knew early in the afternoon who was running out in front, who were battling neck-and-neck for second spot and the name of a fourth candidate who had a good chance of catching up. Strange as it may seem, that's the way the election ended seven hours later. The man way out in front at noon stayed there and one of the two neck-and-neck candidates came in second. If there is truth about the method in which Saturday's election was conducted, it would seem there is enough cause to have something done to correct it. Likewise, reports such as that, if true, could cause complete loss of faith in the election process.

School Election Postmortem

We are inclined to believe voters in Saturday's school board election did not return the school board president to office because they disapproved of methods he used as board president in handling what led up to the ouster of John Darnon as school superintendent and what followed the ouster. There certainly was no "vote of confidence."

where spending of their money is involved. The great majority of them also feel there is no place for secrecy such as was used to shroud the real reason for Dr. Darnon's sudden dismissal "for good cause." The way the matter was handled was not fair to Dr. Darnon and his family. Neither was it fair to the public which was left wondering what it was all about. There now is reason to believe there will be no more mishandled situations such as the one the Pampa school system has just gone through.

A Look at the Future

Medicare, socialized medicine, was introduced in this country on the political promise that, for a nominal sum it would solve all our medical ills. The fraudulent implication was that medical service under government control would be cheaper and more efficient and that the difference between what the individual "contributor" had to pay and the overall cost would be made up out of some inexhaustible "fund" the Great White Father in Washington had at his disposal.

a "free" medical care in socialized Saskatchewan. Both doctor care and hospitalization were to be provided without further payment upon demand. But inflation has hit our neighbor to the north as it is taking an increasing toll here at home. For some strange reason "free" medicine, like "free" anything else, seems to create inordinate demands. The Saskatchewan government has instituted what it calls "deterrent fees" for doctor visits which the National Observer article tells us, "... are designed to help combat what the government calls spiraling costs of the Medicare program." Reduced to plain words, that means the government has lied to the people. As a beginning, Saskatchewan patients will NOW have to pay \$1.50 for each visit to the doctor's office and a house call will cost the patient \$2.

But, in an effort to peer into our own future, let's see how the concept of "Medicare" is making out in Saskatchewan, the Canadian province that legislated North America's first total Medicare program. All doctor fees in Saskatchewan, according to an article in March 25 issue of The National Observer, are now paid for through a government commission which is financed by higher sales and personal taxes that were introduced when Medicare became law in July 1962. The program was further funded by Saskatchewan's 1,000,000 people via compulsory annual premiums at the rate of \$12 for a single person and \$24 for families regardless of size. Hospitalization was also provided for, supposedly, via taxes and mild premiums.

But that appears to be just the opening bid. Saskatchewan Premier Ross Thatcher, peering into his crystal ball, predicts that in seven years, the total program will be costing the 1,000,000 people of the province a whopping \$200,000,000 each year. That, if our arithmetic is accurate means that the program will be costing each man, woman and child an annual \$200; and this, whether sick, well or indifferent. "There is little doubt" the National Observer article commented quoting the Saskatchewan Medical Association Newsletter's advice to doctors, "that it is time to start dealing with the consumer of your services, the patient. He is responsible for your fee." That sounds like a return to private enterprise, and free-dom, in the medical field to us.

Where the Money Goes

How's this for high finance among the "wonderful wizards of Washington"? The Dan S. Report says:

Rep. Richard Poff of Virginia recently disclosed that a British firm sold 47 radar predictors to the U.S. Defense Department for \$2,145,739.60. Before they were uncrated, the predictors

Pull Up A Chair

By FRANK JAY MARKEY
The next thing you know science will be controlling your sense of taste. Scientists have already isolated proteins from the taste buds of cows and pigs which form complexes with bitter and sweet substances in proportion to the actual bitter and sweet taste of these substances on the human tongue. If the experiments succeed it will mean that in a few years you'll be eating strange foods that have been made more acceptable to you because of taste. Better watch out for that!

Today's smile: A gentleman bought a good fountain pen and asked that it be gift wrapped. The clerk obliged and said pleasantly: "This will be a nice surprise for someone." "It certainly will," said the customer, "It's a birthday present for my son in college. He's expecting a convertible."
Everyone pulls a boner now and then and Thomas Alva Edison, the electrical wizard, was no exception. Once, when he was asked to comment on the possibility of harnessing the power of the atom, he replied: "I don't believe the atom has any internal energy as claimed. But everyone else believes it has." If Edison had lived a little longer he would have had to admit to a great big goof.

Thoughts while shaving: A recent Columbia University study reveals that housewives who think they are good judges of products stick to buying brand names in their favorite supermarkets. Their counterparts, who distrust their own judgment, more often buy new or unknown brand products. It's going to cost Dad a whole lot more to send Junior or his lovely daughter to prep school next fall. Many of the highly rated schools will charge as much as \$3100 per annum to prepare a girl or boy for college. No doubt for years you have been reading about a "fort" and a "fortress" and, like us, you thought they were synonymous. Well, we consulted Webster and learned a fort is a strong or fortified place occupied only by troops and surrounded by such works as a ditch, rampart or parapet. A fortress is a large and permanent fortification, sometimes including a town. You can readily see they don't mean the same thing. . . . Computers are wonderful. The latest use of the electronic brain is to track down an elusive freight car. The new identification system makes possible instantaneous location of any railroad freight car in the country. It's a scanning device that reads the numbers of the cars in the most severe weather at speeds up to 80 miles per hour and transmits information to central locations within seconds. It will be a great boon to the railroads. The highest-paid writer who ever lived was the late Ernest Hemingway who once received \$30,000 for a 2000-word article on bull-fighting by Sports Illustrated magazine. If you do a bit of arithmetic you'll find Hemingway was paid \$15 per word for his efforts. . . . The Detroit (Mich) TIMES reported in a story: "Generally, in business the girl with the low-cut dress is looked down on." Oh yeah!

Country Editor speaking: "We wonder if things might not be better if the reformers stopped their agitating and let the world go where they say it will."

Poor Hubert 'The Humph' is now a man without a coterie. Elbee Jay is keeping quieter than a clam in a satchel about whether HH should run for any kind of office. He's keeping his choice of the V.P. on the Q.T. Humph says he is going to do as much as he can to "carry the message." That means tramping around the country and throwing out the baffle gab. Then in the next breath he says he is going to serve as Vice-president of the United States. I wonder which he will do?
Meanwhile, Elbee Jay won't even discuss HH to anybody—he won't even talk to him. BUT he is talking to R-FK as though he was his long lost brother. I think this all came about when Bob came out with the news that he wouldn't make the se-

VC Sticks to Tactics It Used to Defeat French

By RAY CROMLEY, Washington Correspondent
UNDORN, THAILAND (NEA)—In his attacks on South Vietnam's cities, Gen. Nguyen Giap, North Vietnam's defense minister, is using the same techniques he used successfully against the French a decade and a half ago.

In forcing more defending troops and pacification teams back to police the cities and towns, Giap has the countryside more open to his will. Though he may not hold these newly won countryside areas for long, he can use this period to kill or punish those rural leaders who have worked against him. When the U.S. and South Vietnamese government forces retake these villages they will find the people hesitant about giving full co-operation for they will not know when the Viet Cong will come again. Giap is using this opportunity also to kill or threaten those officials, teachers, police, businessmen, fishing and farm cooperative officers and other community leaders who have been the backbone of communist organization and anti-Communist strength.

The objective is to so destroy the stability and leadership of these villages and hamlets that the people will come to the conclusion that there is no alternative to Communist rule. As a result, many people will flee these hamlets and become refugees. A considerable proportion of those who flee will be the leaders, potential leaders and strongest anti-Communists. Their departure will weaken further the will of the villagers to resist. Their moving to the cities will further accentuate the food problems of the population centers. The heavy North Vietnamese attacks across the 17th Parallel diverted sizable numbers of Marines from their work of clearing, protecting and strengthening villages in central Vietnam and in rebuilding their government.

The attacks at Khe Sanh intensify this diversion. The battles against U.S. Army units on the Cambodian border successfully delayed U.S. plans for sending sizable numbers of U.S. troops to the Delta to aid in the protection of civilians working on village and hamlet civic improvement projects in the far south. The attacks on the cities should, according to Communist theory, so increase the number of U.S. and South Vietnamese

It's Up To You

Many interesting experiments are being made in Africa in the hope of finding a solution to the race problem. The intelligent and progressive government of Kenya is aiming for a multiracial society. President Kenyatta has said that anyone of any nationality, religion or color is welcome to come to Kenya and cast his lot with the people of that country. Each will have an equal opportunity to develop his talents and do the best he can for himself, his family and his adopted country. Since the proportion of whites and other non-African peoples is so small, it would appear that this policy has an excellent chance of success in Kenya. All peace-loving people of good will hope that Kenya's policies will be followed and that the people of Kenya may remain free to work out their own problems in their own way. Kenya contains many fine, Christian people and others of goodwill, who should be able to make a very important contribution to the race problem. If internal strife can be avoided and if there is no outside interference with the political development of that country. This thought is really the key to the race problem in Africa. What that whole continent needs is to be left in peace to run its own affairs. It does not need the meddling of the United Nations, the United States, the United Kingdom, the U.S.S.R. or the United Arab Republic. It needs the respect and help of the rest of the world without sanctions, boycotts or military or economic pressures of any kind. With a vast amount of goodwill on both sides, the whites and the blacks are working very intelligently in Rhodesia to solve their problems. The proposed solution is not the same as in Kenya. But it likewise is a very helpful and intelligent approach to the problem. Rhodesia, likewise, should be left

JUDGE AND BE JUDGED
Among those interested in psychology these days, the big word is "alienation." It seems that a lot of people have an identity problem. They don't know who they are. They don't know how to relate to their environment. Life seems meaningless to them. Alienation appears to be a fairly recent phenomenon. Not so long ago, people identified themselves and everybody else according to handy classifications. Everyone knew that young people were foolish and irresponsible and that old people were cranky and useless. Italian men were oversexed and Negroes were lazy and Mexicans never telephoned if they weren't coming to work. Women were emotional, illogical, and could only find "fulfillment" in child-bearing and house-cleaning. The old method of classifying people was certainly simple. The only thing wrong was that it didn't work. You can't evaluate human beings on the basis of things they don't control. You can't infer character traits from an anthropological or biological or even an ethnic distinction. You can't tell a person's intelligence by the color or length of his hair. Nobody decides to be a twenty-five-year-old Japanese woman. The big word in evaluating people is CHOICE. The only

The Doctor Says:

By DR. WAYNE BRANDSTADT
Defective Hearing Hard to Detect in Child
Many a child who does poorly in school is thought to be mentally retarded or of low intelligence when the cause of the trouble is not in the brain but in poor vision or hearing. Testing for these defects, however, should never be deferred until the child has started school. Last week I briefly discussed a common visual defect, Defective hearing is even harder to detect than poor vision but new techniques are making it possible to test the hearing in early infancy. This is done by observing the brain waves in an electroencephalogram as sounds are delivered to each of the child's ears separately through ear phones. A mother should suspect that her child does not hear normally if he fails to say recognizable words by the age of 18 months; if he is not startled by a sudden loud noise; if he cannot be soothed by hearing his mother's voice without seeing her; or if he prefers to play quietly by himself. As soon as there is the slightest suspicion of defective hearing your child should be examined by a physician and if his hearing is found to be subnormal he should be placed under expert care. The earlier corrective measures are started the better the results will be. Q—Can a child catch any type of worms from playing with dogs or cats? A—Although the belief that pets spread intestinal worms to people is common, there is no evidence that they do and much evidence that they do not. The benefits that a child will derive from caring for a live dog or cat far outweigh the remote hazard of his catching a disease from the pet. Q—My daughter, 3, loves to tear up newspapers and put the scraps in her mouth. Would the print on the papers harm her? Could she choke on the paper? A—An infant will put anything in her mouth that she can reach. This is her way of learning. Most children, finding newspaper not very appetizing, quickly turn their attention to other fare. Newspaper is made from wood pulp and the ink from lamp black with a solvent that has evaporated before your daughter gets around to chewing it. So the paper is not apt to make her sick. She would be no more likely to choke on the paper than on anything else she puts in her mouth.

Sensing The News

By THIERMAN SENSING
Needed: A Victory Goal
Though Communism has been a ruthless force of conquest in the world for more than 50 years, many people in free world countries still have not recognized its true nature or come to understand how to deal with it. This observation has special application to the events in Vietnam in the last couple of months. In this period, the Viet Cong smashed into the cities of South Vietnam — even attacking the U.S. embassy in Saigon — and North Vietnamese units engaged in conventional war operations supported by Soviet-built tanks. The toll of American casualties rose shockingly in this period. As a result, the American people are more deeply disturbed than ever about the course of the war in Asia. They see the Communists pushing ahead with vigor, only a short time after the U.S. public was assured that all was well. And in North Korea, the Soviet-oriented Communist regime has been threatening fresh war against the United States.

The trouble the U.S. faces in Vietnam and elsewhere stems from a refusal to recognize the nature of Communism. The Kennedy administration first brought the notion that the Soviet Union was mellowing. One wonders how that notion strikes the U.S. special forces who had to stand up against fire from Russian-built tanks in Vietnam. There was nothing "mellowing" about the Soviet armor. Since the beginning of the Vietnam war, Secretary of Defense McNamara argued for only very limited pressure against the Communists. He consistently opposed each step-up in the air war, though he has been overruled from time to time. Because of Mr. McNamara's opposition, the U.S. hasn't blocked the North Vietnamese port of Haiphong or the ports in Cambodia where the Reds also obtain supplies. In recent weeks, American fighting men paid heavily for the failure to blockade Red supply ports. The Russian tanks surely were not brought into Vietnam on jungle trails on the backs of coolies. They reached Vietnam via Communist ships that were allowed to pass unhindered. The question arises: how can America hope to win in Vietnam while the supply ports are untouched and the Reds' privileged sanctuaries in Cambodia and elsewhere are immune from attack? How can American soldiers and Marines triumph in the field where they are not permitted to pursue the enemy to his bases in North Vietnam? The answer is that the U.S. can not win under the rules laid down by those who want to treat the Communists with kid gloves so that they will come to a conference table.

Years ago, Gen. Douglas MacArthur, who knew all about success over a determined enemy, said that "there is no substitute for victory." The Kennedy and Johnson administrations have scorned his advice. They have sent young Americans into battle while denying them a victory goal. It's a shame and an outrage. It's shocking that the United States, without economic or military intervention, to work out the answers to its own peculiar problems. The native Africans are being educated at a rapid rate. Hospitals and medical services are improving their health. They are learning a great variety of skills and, if there is no outside intervention, will advance rapidly with the help of the white people of that country. In time they will gain whatever political power and economic success their talents warrant. Those who know the situation believe this will be substantial, and satisfactory to them.

The strongest nation on earth, should be tied down by a fourth-rate power such as North Vietnam or be humiliated by a pipsqueak nation such as North Korea. An administration that refuses to carry the war to the enemy's doorstep and that accepts humiliating offenses by the Communists is an administration unworthy of the electorate's support. The U.S. certainly has the strength to win in Vietnam — indeed to triumph over Communism everywhere in the world. But the job can't be done by fighting with one hand behind one's back or by giving the enemy every break. In World War II, the United States launched a powerful air offensive against the German cities. It was aimed not only at hitting military targets but at smashing the Nazi will to resist. In the Vietnam war, however, the U.S. has not attempted to smash the Communist will to resist. No great fire raids have been ordered against Hanoi such as were ordered against Hamburg, Stuttgart and other German cities. It is no wonder, therefore, that North Vietnam still feels relatively immune, for the American bombing is directed only against selected targets and periodically is slowed down to encourage peace feelers. Clearly, it is time for a change in policy. Communism aims at the destruction of the United States. It is engaged in a single, unified, worldwide campaign against the American people and economic system. Communism in Southeast Asia can only be crushed when the President gives the order to crack down—and crack down with tremendous power — against North Vietnam. U.S. soldiers in the field are entitled to a victory goal being set by the administration in Washington.

13 Gubernatorial Candidates Vie For Texas Voters' Favor

By ROLAND LINDSEY
AUSTIN, Tex. (UPI)—Texas voters have less than four weeks to shuffle through the credentials of 13 gubernatorial candidates before making their choice in the state's May primary elections.

Ten Democrats and three Republicans are seeking their respective party nominations, but only six or eight have waged active statewide campaigns.

While candidates have tried campaign methods ranging from stump-jumping and hand-shaking tours to mass media, there has been no single overriding issue voters could use as an assuring stick.

When the campaign opened, liquor by the drink appeared a likely issue, but the state Democratic and Republican executive committees diluted that when they placed a referendum on the issue on the May 4 ballot.

Choose Major Issues
Candidates have since chosen their own "major issues," and in few cases do they agree on what the major issues are.

The Democratic candidates and their major positions:
—Dolph Briscoe Jr., 44, of Uvalde, who labels himself a "moderate conservative." Briscoe has endorsed the legislative program of the Texas State Teachers Association, opposed liquor by the drink, and emphasized his experience in business and agriculture. A co-sponsor of the act creating Texas' farm to market road system, he says a similar state-aid program is needed to help cities solve their traffic problems.

—Waggoner Carr, 48, of Austin and Lubbock, is a former attorney general. He has built his campaign around his experience in state government with emphasis on law enforcement. He bills himself as the "only proven crime fighter" in the race. As attorney general, he started the Attorney General's Youth Conference on crime. Carr said he feels liquor by the drink can be legalized only by a constitutional amendment voted upon by the people. He advocated a minimum wage for agricultural workers but with the amount tied to farm prices.

Failed to Qualify
—Johnnie May Hackworth, of Brenham, was on the ballot for governor in 1964. She tried to run again in 1966, but failed to qualify. She terms herself a "prophetess" and a preacher.

—John L. Hill, 44, of Houston,

is former secretary of state of Houston, says he is conservative on economic issues and a liberal on social issues. He has emphasized that he is not a "professional politician." He has endorsed a \$1.25 state minimum wage, said he will vote for the May 4 liquor referendum, and also favors a state fair housing bill and a state fair employment practices act.

—Don Yarborough, 42, of Houston, is the only avowed liberal in the race. Yarborough has the endorsement of organized labor, and has concentrated his campaign theme on being free and "not tied to that same old crowd." He advocates anti-pollution laws, regional offices for governor.

Former Ambassador
—Eugene Locke, 49, of Dallas, is former deputy U. S. ambassador to Vietnam and is tacitly backed by Connally. The governor's brother, Merrill, is Locke's campaign manager and organization is heavily sprinkled with Connally backers. Locke has endorsed liquor by the drink on a local option basis, and has emphasized his support for Connally and President Johnson. He has relied upon mass media campaign techniques.

—Pat O'Daniel, 49, of Dallas, is the son of former Gov. W. Lee (Poppy) O'Daniel. O'Daniel says he is "running on the Ten Commandments and the teachings of Jesus Christ."

—Preston Smith, 55, of Lubbock, is currently serving his third term as lieutenant governor. Smith has used old-fashioned handshaking tours, talking a great deal about his experience in state government as the primary issue in the race. He also has endorsed creation of two new medical schools, and has said he favors a vote on liquor by the drink but plans to vote against it in the referendum.

Shakes Helos
—Alfonso Veloz, 44, of Houston, has conducted a personal handshaking campaign on week ends, but has not mounted a statewide drive. He has endorsed a \$2 per hour minimum wage, and liquor by the drink. He said he also is for "better education for children and better pay for teachers."

—Edward L. Whittenburg, 39,

for assistance. Show that you are agreeable, friendly.

—SCORPIO (Oct. 23 to Nov. 21): You may not be quite sure just what you do want today, but so long as you labor on constructive things, there is advancement just the same. Good jobs give experience you want. Be ethical in social contacts.

—SAGITTARIUS (Nov. 22 to Dec. 21): Important you follow instructions of higher-ups today and be sure to keep all promises you have made. Do that crew work though it may seem to be relatively unimportant. It is really an important cog in the wheel.

—CAPRICORN (Dec. 22 to Jan. 20): Dig into every available source that will help you to be more efficient and efficient. Contact one at a distance who has fine constructive ideas. Listen to what is suggested and follow.

—AQUARIUS (Jan. 21 to Feb. 19): Know that you handle certain responsibilities without further delay, so do just that. Show that you are efficient. Show true devotion to loved ones. Do that crew work and all in fine.

—PISCES (Feb. 20 to Mar. 20): Be sure you know what associates are thinking. If you have to ask them point-blank. Be the first to make an overture if there is some difference to be cleared up. Avoid arguments and all in fine.

—IF YOUR CHILD IS BORN TODAY... he, or she, will be one of those very few little youngsters who may be concerned with minute detail that the overall picture is forgotten. Ideal chart, though, for any potential profession where precision is the prime requisite. Give spiritual training early in life so that character can be moulded properly. Fine manner here.

Dear Abby

By Abigail Van Buren

DEAR ABBY: Our 16-year-old son (I'll call him George) told me he was going to a hockey game with a boy his age, so his father gave him the car and permission to stay out an hour later than the usual midnight.

Instead, George went with a 24-year-old divorced man, and didn't get home until four o'clock the next morning. George had been told that we didn't want him running around with this man.

For punishment, we grounded George for a week. Last night he was bored, so he asked if he could go to town for a couple of hours. I said, "No, you're grounded." Then he turned to his father and asked him, and his father said, "YOUR MOTHER said you couldn't go."

George pouted a while and asked his father again. His father said, "YOUR MOTHER has grounded you!"

Later I told my husband that I resented being made the "bad guy" — that he and I had made the decision together. A quarrel followed. My husband said it wouldn't have hurt to let George go to town for a few hours. I said once we grounded the boy, he should stay grounded.

I'd appreciate your opinion. "THE BAD GUY"

DEAR ABBY: Tell "OLD SARGE" he is not alone. I have been married for 22 years and I have the same problem. I have bought my wife dozens of beautiful sheer nightgowns, but she wears flannel ones to bed. I think they make those sheer gowns for men to buy, not for women to wear.

I love my wife, and I would give anything if she would put on one of those beautiful nightgowns and look glamorous — just for me. But she never has. I have come to the conclusion that some women just don't want the bother and mess of being loved. If you use this, please don't use my name. She would kill me.

"IN THE SAME BOAT"

CONFIDENTIAL TO "ONLY HUMAN" IN BRENTWOOD: It has been said that a doctor who attempts to treat himself has a fool for a patient. Face it,

Pampan's Article Will Appear In National Magazine

An article by Joe D. Cree, Pampa life insurance broker, has been selected to appear in the nationally distributed magazine, *Fliercraft* Courant. The article, originally written by Cree for his own company's

magazine, was entitled "One Man — One Month — One Million." It first appeared in the *Southland Life* magazine after Cree had sold one million dollars in life insurance in one month — last October.

The million-dollar sale in 31 days was accomplished with the aid of a weekly full column thermometer-type advertisement in *The Pampa News* which showed Cree's progress toward his million-dollar goal.

Cree later was honored by his company at a special meeting in Dallas.

New Way Found To Stop Hair Loss, Grow More Hair

HOUSTON, Texas—If you don't suffer from male pattern baldness, you can now stop your hair loss... and grow more hair.

For years "they said it could not be done." But now a firm of laboratory consultants has developed a treatment for both men and women, that is not only stopping hair loss... but is really growing hair!

They don't even ask you to take their word for it. If they believe that the treatment will help you, they invite you to try it for 32 days, at their risk, and see for yourself!

Naturally, they would not offer this no-risk trial unless the treatment worked. However it is impossible to help everyone.

The great majority of cases of excessive hair fall and baldness are the beginning and more fully developed stages of male pattern baldness and cannot be helped.

But, if you are not already slick bald, how can you be sure what is actually causing your hair loss? Even if baldness may seem to "run in your family," this is certainly no proof of the cause of YOUR hair loss.

Many conditions can cause hair loss. No matter which one is causing your hair loss, if you wait until you are slick bald and your hair roots are dead, you are beyond help. So, if you still have any hair on top of your head, and would like to stop your hair loss and grow more hair... now is the time to do something about it before it's too late.

Loesch Laboratory Consultants, Inc., will supply you with treatment for 32 days, at their risk, if they believe the treatment will help you. Just send them the information listed below. All inquiries are answered confidentially by mail a and without obligation.

NO OBLIGATION COUPON

To: Loesch Laboratory Consultants, Inc. Box 66001, 3311 West Main St. Houston, Texas 77006

I am submitting the following information with the understanding that it will be kept strictly confidential and that I am under no obligation whatsoever I now have or have had the following conditions:

Do you have dandruff? Is it dry? or oily?

Does your scalp have pimples or other irritations?

Does your forehead become oily or greasy?

Does your scalp itch? When?

How long has your hair been thinning?

Do you still have hair? or fuzzy? on top of your head.

How long is it? Is it dry? Is it oily?

Attach any other information you feel may be helpful.

WOMEN OFTEN HAVE BLADDER IRRITATION

Common Kidney or Bladder Irritations affect twice as many women as men, often causing weakness and nervousness from frequent, burning, itching urination. Fortunately, you may lose sleep and have headaches, backaches and feel older, tired, depressed. In such cases, CYSTEX usually brings relaxing comfort by curbing germs in acid urine and easing pain. Get CYSTEX at drugists today.

NEW WAY TO BE SUDDENLY SLIM

Los Angeles—Are you a woman whose figure is on the good side but might look perfect? You'll be thrilled by the new exciting science has discovered for you to become Suddenly Slim and yet completely comfortable. If you're more than 15 pounds overweight, or if your waistline is larger than 32 inches, then this idea is not for you. If your weight problem falls within this range, then you can realize a new, smoother figure today, without diet or exercise.

Suddenly Slim is an all-new kind of 4-oz. girdle constructed of science fibers. One startling innovation is the sheer nylon front panel. This is permanently stiffened by a science process and cannot give or sag. It's surrounded by a slimming action border. A featherstitched panel down each side of this girdle will contour your hips if they are a problem.

The girdle itself is of a "wonder" Lycra-spandex blend. It's a new power net consisting of nylon, acetate and spandex. It is so comfortable, but has such slimming strength, it gives your figure everything that's possible with a foundation.

"Suddenly Slim," in both girdle and panty versions, is the peak achievement of the California designer-genius, Olga. They are available at

LONGEST JUMP

TOKYO (UPI)—Nobuo Fudo, 39, jumped 550 feet to his death from Japan's tallest building today. Fudo was an employee of the company that is constructing the 36-story Mitsui Kasumigaseki building, which is to be completed April 18. It was the second suicide from the building.

You say people are afraid to get involved?

...not everyone.

Many telephone people have made it their business to get involved in other people's problems. They've saved hundreds of lives in the process, often risking their own safety.

Over the years, 240 Southwestern Bell employees have been awarded the Vail Medal, an award recognizing acts which exemplify the company's highest traditions of service.

Among our Vail Medal winners are employees who... pulled a mother and her son from the rushing waters of a turbulent river... carried a baby from a blazing trailer home... dragged a man and woman from a burning car.

The list goes on and on.

And we're proud of them all. They're the kind of people you can count on to get involved.

Southwestern Bell
