PRICE FIVE CENTS.

## RANGER CASE GOES TO TRIAL

### Grand Jury Suggests Employment Of County Chemist

#### WOULD CLOSE PLACES WHERE LIQUOR SOLD

Analyses Are Needed To Make Conviction Possible

#### EIGHTEEN TRUE BILLS RETURNED

Bowers Case Continued To Next Term Of Court

Recommendations for stricter enforcement of liquor laws through employment of a competent chemist and suggestion of use of injunctions to close businesses consistently violating the Volstead act are contained in the report of the Gray county grand jury to Judge Newton P. Willis, submitted yesterday.

Eighteen bills of indictment were found.

District court activities yesterday included hearing of two cases by jury. In the suit of D. M. Cloud vs. J. B. Gantz, judgment was for the plaintiff on a debt. Bill Bryant was found not guilty of a charge of forgery. Clara Johnson was granted a divorce from Raymond Johnson.

The \$30,000 damage suit of J. F. Shelton against Joe Bowers, growing out of an accident, was continued to the next term of district court.

The grand jury's report, completed late yesterday, is as follows:

"We, the Grand Jury of the 84th Judicial District Court of Gray County, Texas, duly convened for the August term of said Court, beg to submit to Your Honor the following final report.

"We have returned 18 true bills of indictment in felony cases to your court, among them being violations of the prohibition laws, burglary, theft, and other offenses of a felony grade. In passing upon these matters, we have extended our best efforts to arrive at the true facts in each case and at all times have strived to return bills of indictment where the evidence warranted same.

"We recommend that the Commissioners' Court make arrangements for the services of a competent chemist for the purpose of determining the alcoholic contents of beer, and other concoctions commonly known as 'home brew', as we feel that it is impossible for the State's attorneys to secure convictions in the aforesaid cases without the aid of a competent chemist.

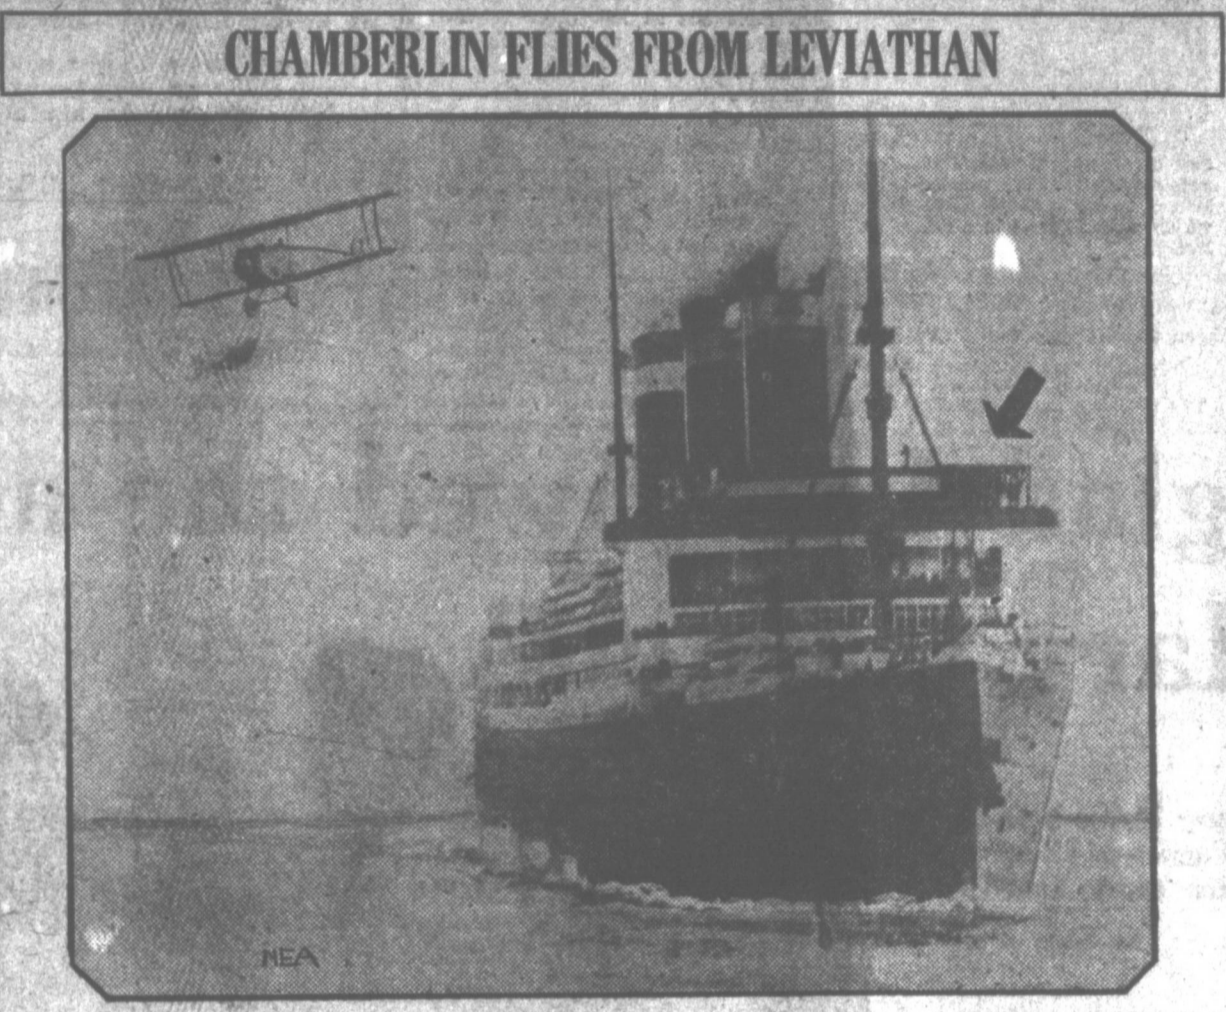

"We further wish to recommend that the County Judge and Commissioners' Court require all parties who are carrying on the trade or occupation of a butcher or slaughterer of cattle file a bond with the County Judge, and that each butcher or slaughterer of cattle make their regular sworn report to the Commissioners' Court of Gray county. An recommendation that the Commissioners' Court and the County Judge call attention of the County Attorney to these violations if same are not complied with.

We wish to further recommend that all peace officers, after arresting an offender of our laws, take same before the proper magistrate and give him the opportunity of making bail or the privilege of a speedy trial.

"We wish to recommend that if operators of any business whatsoever continue to sell or have in their possession for beverage purposes beer, whisky, Jamaica Ginger, or medicated bitters, that the district attorney make application to Your Honor for a writ of injunction restraining them from having or selling the above beverages.

"We wish to commend and we heartily approve of the manner in which our sheriff, E. S. Graves, and

(See GRAND JURY—Pg. 3, Col. 6.)

For the first time in history an airplane took off from the deck of an ocean liner at sea when Clarence Chamberlin, trans-Atlantic flyer, guided a biplane into the air from a special runway on the top deck of the liner Leviathan and flew 100 miles to Roosevelt Field, L. I. This picture shows the plane circling over the Leviathan after taking off in a fog; the arrow points to the runway from which the start was made.

#### BOYS' WORK IS MEETING TOPIC

Tom Nelson To Talk At Institute Here Tonight

Thirty local men interested in the Boy Scout movement in Pampa last night heard Dr. R. Thomson, Presbyterian minister of Amarillo, speak on the "Emerging Man."

Dr. Thompson declared the boy from 12 years to 20 years of age is one of the greatest things in the world. The old attitudes of allowing the boy to sow his "wild oats" and at the same time keep him ignorant of the facts of life were severely condemned. The father is a partner with God and should take his boy in confidence, revealing to him the science of life and impressing the fundamental responsibility.

It was shown that the busy business man too often cannot become a real partner to his boy, but that scoutmasters and others who give times to boys' work can be of great value in instructing and training the youth.

Dr. J. A. Hill of Canyon, who was to have spoken at the Community Boys' Institute at the Chamber of Commerce tonight, has been called to Austin and cannot be present. Instead, Tom Nelson of Amarillo, chief Panhandle executive, will speak on Scouting and give details of the work.

Pampa firemen had a meeting of their own last night, but will excuse three members tonight from practice in order that they may be represented at the institute.

In connection with last night's meeting, those present formed themselves into model patrols and had a knot-tying contest.

#### TAYLOR BUYS OUT PARTNER

W. A. Taylor has purchased his partner's interest in the Pampa Land company. Mr. Taylor and S. L. Anderson, better known as "Uncle Sam", have been partners in the business for more than seven years.

#### Fifteen High School Harvesters Meet Coach Dickie and Talk Over New Football Rules and Practice

Fifteen enthusiastic members of the Pampa high school football squad were out last night to skull practice at the high school. The prospects for a winning team this season are the brightest in the school history.

Coach Dickie gave a talk on team positions and what it takes to play a certain position well. He emphasized team play and good fellowship among the boys as being largely responsible for a winning team. Several new rules introduced this year were discussed in full. The new rules are:

1. To avoid possible injuries and interference with the play, also to make the try-for-point after touchdown more difficult, the goal posts have been moved back from the goal line to the end lines.

2. In "shift" plays the new rules require that all players come to a full stop of approximately one second, and define how this period may conveniently be measured. (After the "shift" has been completed a count of four must be observed before the ball can be put in play by the quarterback.)

3. In order to avoid the frequent delays which have been constantly recurring, Rule 14, has been amended so as to define certain types of "unreasonable" delay of the game, and the captain's privilege of calling time in each half has been reduced from four to three. This amendment will do away with the huddle system.

4. To encourage greater freedom in handling the ball, Rule 17, section 1, has been amended so that backward or lateral passes, except those from the snapper-back, will, if incomplete, become dead and no further play can be made, except as specified in the rule. This amendment will make the use of end runs more common and make teams more evenly matched in the breaks of the game.

5. When a ball is kicked from

(See FOOTBALL—Page 3, Col. 1.)

#### KILLS FOR LACK OF LOVE

HOLLYWOOD, Aug. 5. (AP)—Unrequited love was held by police today to have caused Betty Gottlieb, 25 years old, to slay Hamilton Mannon, 26, movie studio official and then to fire a fatal bullet into her own heart while the two sat in an automobile about midnight.

#### Hansford County May Have Election

Hansford county may hold its county seat election as scheduled, despite the grant of a writ of error by the supreme court in the contest which last week involved a decision by the Amarillo Court of Civil Appeals.

The litigation has not included granting of an injunction, and therefore the election may be held. Its legality, however, will be at issue before the supreme court. The final hearing may not be held for two or three months.

Details of the argument on which the supreme court granted the writ of error have not been learned.

#### Planes Aiding In Fighting Forest Fires In Northwest Today

(By The Associated Press.) PORTLAND, Aug. 5.—With military authorities lending aid and with government airplanes pressed into service, the northwest was fighting hundreds of forest fires today.

All conflagrations were started by lightning.

#### Germans Break Endurance Flight Record for Plane

(By The Associated Press.) DESSAU, Germany, Aug. 5.—Cornelius Edsard and Johann Ristich brought their Junker plane to earth this morning after having established a new world endurance flight with a record of 52 hours, 23 minutes, the former record of 51 hours, 11 minutes being held by Clarence Chamberlain and Bert Acosta.

The Junker company officially announced the distance covered as 3,753 miles.

#### Appeal May Be Made to Supreme Court for Italians

(By The Associated Press.) BOSTON, Aug. 5.—Indication that an appeal to the United States supreme court on behalf of Nicola Sacco and Bartolomeo Vanzetti will be made within a short time was given at headquarters by the Sacco-Vanzetti defense committee today, although no announcement as to the course to be taken was forthcoming.

Sacco and Vanzetti, who are to be electrocuted next Thursday, slept well last night, according to attaches at the state prison at Charleston. Both refused to take breakfast today but Celestine Madeiros, convicted of another murder, who is in the death house with the two men ate heartily. By refusing breakfast today Sacco prolonged his hunger strike into its twelfth day.

NEW YORK, Aug. 5. (AP)—Plans by the I. W. W. for an attempted tie up of New York's water front next Tuesday as part of the nation-wide protest against the execution of Nicola Sacco and Bartolomeo Vanzetti was announced by Roger Francecon, chairman of the general executive board of the organization today.

BUENOS AIRES, Aug. 5.—A general strike in protest against the Sacco-Vanzetti sentence went into effect today.

Nearly all workers in factories and shops joined the movement.

#### Nearly Half Inch Of Rainfall Here

Rainfall amounting to .44 of an inch fell in Pampa and vicinity last night.

Roads were almost impassable early today, but traffic was normal by noon.

#### Pro-Agent Charged With Murder Of Miami, Okla., Boy

(By The Associated Press.) MIAMI, Okla., Aug. 5.—Charles Warner, federal prohibition agent working out of Tulsa, who last night shot to death Elmer Fulton, 18 years old, at Pitcher, is charged with murder in a complaint filed today by A. L. Commons, county attorney.

Warner was attempting to arrest the youth for alleged rum running.

#### CONTINUANCE ARGUMENT IS DENIED TODAY

Two Defense Witnesses—One a Ranger, Are Absent

#### HEAVY ROADS DELAY SESSION

84th District Court May Work Tonight Judge Says

Trial of Jack DeGrattenreid, local man employed by the state as Ranger private, began in LeFors today.

District Attorney Curtis Douglas for the State announced ready, but Judge Holmes of Borger, attorney for the defense, moved for continuance on the grounds that two of his witnesses, one a Ranger, could not be present.

Judge Newton P. Willis of the 84th district court denied the motion on the grounds that other witnesses present saw the altercation which resulted in the indictment, and that testimony about the event would be sufficient. Court recessed after the decision until this afternoon.

Selection of the jury was scheduled to require most or all of the afternoon, and a night session was considered likely.

Start of the trial was delayed several hours because heavy rains delayed arrival of attorneys and witnesses. Roads from Borger to LeFors were almost impassable early today, and showers this morning near the county seat added to the difficulty. However, most of the cars were going through this afternoon. Telephone communication was interrupted.

Ranger DeGrattenreid, defendant, was indicted July 20, following an investigation of an affray in which W. H. Bates, Hutchinson county deputy, received a black eye and a bullet hole through his trousers. Interest in the case is heightened by reason of Borger's insistence upon removal of the Rangers. A growing number of spectators were arriving at LeFors early this afternoon.

Rangers, Borger policemen, Hutchinson county deputies and Stinnett citizens are among the witnesses summoned for the case.

DeGrattenreid is charged with assault with intent to kill, and the regularly empaneled petit jurors are to be used for the jury.

#### English Swimmer Crosses the Channel

(By The Associated Press.) DOVER, Eng., Aug. 5.—E. H. Temme, English swimmer, succeeded today in the first attempt of the season to swim the English channel. Taking off from Cape Gris Nes at Temme landed two miles west of Dover.

Mr. and Mrs. A. A. Hubbard and son, Alton, of Lufkin, Texas, are visiting with Prof. and Mrs. J. L. Lester. Mrs. Hubbard is the daughter of Mr. and Mrs. Lester. Miss Macie Lester, who has been attending summer school at Wichita Falls, returned home with Mr. and Mrs. Hubbard.

#### BANKING ATTORNEY RESIGNS

AUSTIN, Aug. 5. (AP)—Nat Gentry, counsel for the state banking department in the enforcement of banking laws, has resigned; effective August 15, it was learned today.

C. O. Austin, banking commissioner, will be succeeded at the end of his term September 1 by Shav, banker of Taylor.

# Fort Davis to Have Electric Lights for First Time Since Its Establishment in 1849

(By The Associated Press.)  
 FORT DAVIS, Aug. 5.—Memories of the great gold trek of '49, whose mysterious magic drew thousands across the plains and mountains of Texas to the far Pacific, are revived with announcement that Fort Davis for the first time in its history, is to have a modern electric light and power plant.

Founded to protect and nourish the plodding trains of the gold seekers, this Alpine town of 1,100, nestling high up among the peaks of the Davis mountains, has gone its quiet way for many decades, far distant from the thunder of railroads and the current of swiftly moving commerce.

It has had no public utilities except the telephone. Its lack of gas plant, and such utilities as electricity and water, has been compatible with its quaint and pastoral atmosphere. But now the hum of generators and the talk of kilowatt hours is to bring it closer to the world that is rapidly pushing the western frontier backward.

The county commissioners of Jeff Davis county have granted the Central Power and Light company, with headquarters at San Antonio, a 50-year franchise to supply Fort Davis with power and light. Construction on a plant is to begin shortly.

The history of Fort Davis breathes the breath of stirring frontier times, of Indian fights and wagon trains, of famished travelers and seekers for the distant promised land.

After the gold rush started to California in 1849, a great many trains of gold seekers were lost in the deserts of West Texas and many died of thirst or were killed by Indians. Many of these trains passed across the Davis mountains and through El Paso on their way to the Pacific. Because of the difficulties encountered between San Antonio and El Paso by those migrating westward, the war department sent out surveying parties to select the best route. The route through the Davis mountains was selected as it afforded water at required intervals, but the hostile Indians were a drawback.

The Governor of Chihuahua had offered rewards for the scalps of Indians and some enterprising Americans engaged in the business, rustling scalps where they could be found. This embittered the Indians. One American had a claim of \$30,000 for scalps unpaid for. The governor claimed there were too many Mexican scalps among them.

El Paso soon became an important place because of the numerous wagon trains passing through there. To protect this business and the mails, Fort Davis was established by the war department, October 23, 1854, at what was then Comanche Painted Camp on La Limpia creek, 475 miles northwest of San Antonio and 230 miles southeast of El Paso. Jefferson Davis was then secretary of war and the fort was named after him.

The fort was abandoned in 1891, but its sturdy buildings still stand as reminders of a colorful and vital past. The Eighth Infantry was the first unit to occupy the fort and from the time they arrived in camp, when they had to fight their way through an Indian ambush, there was a continuous round of border warfare with Indians and outlaw whites.

During the Civil War the Confederacy had charge of the fort. It was re-occupied by Federal troops in command of Lieut. Col. Wesley Merritt, July 1, 1867. Lieut. Col. Merritt erected permanent buildings, the thoroughness of his work being indicated by the condition of the buildings 50 years after their erection.

## Co-Op Spreads Fame of Waterford Cabbage

(By The Associated Press.)  
 WATERFORD, Pa., Aug. 5.—Production and sale of cabbage under a cooperative plan has brought large profits to hundreds of farmers in this section of northwestern Pennsylvania and have extended the reputation of Waterford cabbage for miles beyond home territory.

The cabbage growing industry started here more than 40 years ago, but at first the farmers resorted to nondescript strains with very little profit. W. W. Lee, an enterprising farmer, experimented and chose the best strains as one particularly adapted to this soil. Today Waterford cabbage is in great demand and the cooperative marketer ships yearly to St. Louis and as far

south as Florida. A hundred growers are members of the association and nearly five hundred acres are devoted to the crop. Large storage plants are provided for the crop before it is ready for the market, insuring uniformity of quality.

## Chicago Schools Add Course in Aviation

CHICAGO (AP)—High school students of Chicago are to learn in the classroom the principles of flying.

The subject will be incorporated in a general mathematics course, and J. Lewis Coath, president of the board of education, has invited aviation and radio experts to assist in a preliminary study which will enable adaptation of such training to public school use.

The study will be the first of its sort in the United States, Coath believes, and will eagerly be sought because of the renewed interest in aviation.

## Teaches Home Making To Avoid Divorces

BATON ROUGE, La. (AP)—Louisiana has a new form of "divorce insurance."

Approximately 10,000 "Jills," potential life-mates of as many "Jacks" are learning the vocation of permanent home-making under the direction of Miss Clyde Mobly, supervisor of home economics.

They put their theories into actual practice in \$1 model cottages, which are part of the state high school system. The girls work out all the problems of home economics, ranging from cooking and sewing to house beautification and landscape gardening.

"The jazz reign has not hurt our work," Miss Mobly says. "Our modern girls are as interested in their work as any reasonable grandmother would wish. See them at work and you have the best possible answer to the moans of those who bewail the fall of youthful ideals."

## AGED PRINCE SAVES CASTLE

STEYR, Upper Austria (AP)—The aged Prince Louis of Coburg has saved his ancestral home, Voglsang Castle, from sale for payment of debts. It was scheduled for auction after its rich tapestries, arms and pictures had gone to satisfy creditors, but the prince's pleas have resulted

in an agreement whereby he will keep the mansion until his death. The castle once was the property of King Louis Philippe of France.

It's Not Always Fair Weather When Good Fellows—

One may doubt the wisdom of the Illinois state's attorney who characterized the excursion boat tragedy on Lake Michigan an "act of God." That viewpoint would have been wholly acceptable to most people years ago, but the modern conception of His way of doing things does not include blaming Him for everything which cannot be explained any other way.

After nine years, the Meuse-Argonne has yielded the bodies of seven American heroes not hitherto definitely accounted for. Hallowed spot. It is said that every foot of ground in Paris would almost reveal human history if one could know its entire story.

Farmers are paying much money into the county treasury. What are they going to get in return, in addition to the benefits of the non-tax payer? A road bond election will be called, probably, within the next 60 days.

GRAND JURY SPEAKS ON LIQUOR TRAFFIC

The grand jury has reported, returning 18 bills of indictment and pointing out a few needed corrections. Most of its attention, apparently, was given to the subject of "home brew." The suggestion that the county employ a competent chemist is but proper, inasmuch as arrests and charges without specific, proven evidence are not legally based on fact.

the liquid is not legally intoxicating the accused cannot properly plead guilty to any crime therein indicated.

Respect for law depends upon its impartial administration, and the irregularities pertaining to the eighteenth amendment are doing more than the pros to weaken prohibition.

The federal prohibition enforcement machinery is being overhauled. Officers will be placed on the civil service basis. This should mean, to the furthest extent possible, vigorous, impartial enforcement of law.

Even many of those who favor modified prohibition agree that the Volstead act should be enforced as written until changed. The Gray county grand jury obviously had a similar view.

Pampa people in general, who desire the city to be as law abiding and clean as any other municipality in the Panhandle, will support the grand jury in its desire. The laws of the state and nation provide definite steps for the enforce-

WASHINGTON LETTER

BY RODNEY DUTCHER
NEA Service Writer.

WASHINGTON.—"No need to shoot me," pleaded the cowboy who couldn't pay his bill as the bartender pointed a gun at his head.

Washington wonders now in like fashion the Hon. William S. Vare, senator from the state of Pennsylvania, will plead with the Senate leaders who have long been sharpening the axe for use upon his neck.

Vare and his friends have been grasping at almost any old straw which offered hope that he might obtain the Senate seat to which he was elected after spending a huge sum in the primary.

Tax reduction, flood relief, farm relief, deficiency bills and other important legislation are on the cards for the first session of the Seventieth Congress. Fast and efficient work will be required if satisfactory accomplishments are to be achieved in time for everyone to leave Washington in advance of the national conventions next year.

Even with Vare and Smith in their seats, the next Senate will be a balky one, considering its political lineup. Con-

ditions are not favorable for fast, smooth functioning.

One the other hand, if Vare and Smith are kept out from the start, the Senate will be indefinitely delayed in getting under way. There will be a grand fight over whether they should or shouldn't be seated, and no one can tell how long the fight would last, to the detriment of all else.

PRESS FORUM

ANOTHER LIFE SAVED

One case of speeding which will meet the approval of everybody was staged in Texas last Sunday.

As a small boy was on his way to Sunday school at Goree, Knox county, he was bitten on the leg by a rattlesnake. Two physicians rendered first aid, but it was realized that it would require the famous antivenin treatment to save the boy's life.

An automobile was pressed in to service, and the driver made the trip to Wichita Falls in two hours—an average of 50 miles an hour. There the serum was administered, and at last accounts the victim was recovering.

This demonstrates anew the need for a wider distribution of the rattlesnake serum. Every town of consequence should have a supply of it on hand.

The serum has performed miracles during the period it has been tried out in Texas. It is doubtful if any lives would be lost from rattlesnake bite if it were possible to reach each victim in time to administer the treatment.—Abilene News.

A reporter for the Okmulgee Daily Democrat accompanied Matthew Kimes, Jack Whitehead and Clyde Brandon to the state penitentiary at McAlester last week. Though this man had previously inspected the state prison, he returned enthused anew over the humane treatment accorded the convicts and the things that have been and are being done for their comfort, things that will go far toward making better men of them, but without overlooking the fact that they are criminals and are there to be punished for violation of the law.—Okmulgee Democrat.

Flappers of the future will need parachutes when they feel the necessity of walking back.—The Casper Daily Tribune.

It will be a rough day for the flapper when the silk worm turns.—The Syracuse Herald.

TWINKLES

It is proposed to extend the Clinton and Oklahoma Western railroad to Pampa. That's the C. O. W. line, and there ought to be a lot of cows along the route for shipment.

Gas will be dispatched to Kansas City just as trains are routed. We hope they don't have to delay the stuff like the Santa Fe does its trains on our crossing.

Maybe the lame ducks ate all the bait off Cal's presidential hook. At least, he seems rather tired of looking after them of late.

Borger is patriotic to the Lone Star state, despite the fact that she wants a National Guard more than a state guard.

Believe it or not: Marshal John Andrews says a man stopped his car in the middle of the street waiting for the "no U-turn" sign to turn around and say "go." That is one man who "got by."

Some people are so dumb they are clever; and some are clever enough to act dumb when it pays.

Olin L. Hinkle, editor of the Pampa Daily News, takes his typewriter in fist to beat the battered keys in joyous refrain boosting the old home town. He says "Pampa is an example of an oil community that is building along the best improved lines." And "nothing is a greater asset to a community than a general belief in its future. Pampa is building along this line." That's the spirit which accomplishes things.—Amarillo News.

The prophet missed it who predicted a year without a summer, but what the anti-saloon league is pulling for is a year without a swallow.—The Norfolk Ledger-Dispatch.

Texans Drop Fourth Game and Start For Home Grounds

DES MOINES, Aug. 5.—Tied with Oklahoma City for fifth place, the Amarillo Texans started for home here yesterday after dropping the fourth consecutive game to the Demons. The loss yesterday was 7 to 4. Morgan pitched well for the Texans, but his teammates failed to run up the score sufficiently. Swansboro sprained an ankle after getting three hits in three times at bat. The Texans showed up well on the road trip, and are playing a greatly improved game.

Score by innings: 000 210 100-1. Includes batting averages for players like Knuthe, Segrist, O'Boyle, Langford, McDowell, Yan Camp, Sprinz, Gielason, Davenport, Colwell, and Morgan.

Three-base hit, Langford. Two-base hits, Swansboro, Gielason, Segrist, Davis, Morgan, Knuthe, Segrist (2), McDowell (2), Stolen bases, Knuthe, Langford. Left on base, Amarillo 6, Des Moines 6. Struck out, by Davenport 4, Colwell 4, Morgan 1. Base on balls, off Colwell 3, Morgan 3. Wild pitch, Colwell. Runs and hits, off Davenport 3 and 6 in 4 1-3 innings, Colwell 1 and 6 in 4, 2-3. Cahill Will Have To Step to Beat Whittington Monday

"Rusty" Cahill, Pampa welterweight, will be up against the fastest boy he has met this year when he steps into the ring Monday night at the Pampa Athletic club for ten rounds with Freddie Whittington, Tulsa, walter. Whittington is considered one of the fastest in the south but the Pampa boy has slugging ability as well as speed. The semi-final should be a fast battle with Frankie Farrell, a bantamweight from Hutchinson, Kans, meeting Chief Gonzales from Old Mexico in six rounds. For a preliminary, Speedy Snow and Red Newman will tangle in a four-round go. The curtain raiser is to reveal that midjet wonder, K. O. Vincent from Amarillo, and Kid Coy, the fastest little boxer in Pampa. Vincent will weigh in at 46 pounds and Coy at 50 pounds. These boys should provide excitement galore for the early birds.

ST. CLAIRSVILLE, O.—Henry M. Davies, 51, has been mayor of St. Clairsville for twenty years and his annual salary during that period has been exactly \$130. He refused an increase, saying he didn't want to take money he didn't earn. He has collected \$250,000 in various taxes since being the city's chief executive.

Evans Says Home Run Now a Joke

By BILLY EVANS The home run habit has become a joke, thinks Clark Griffith, president of the Washington club. I am inclined to agree with him.

Unquestionably a circuit wallop is one of the big thrills of baseball. I am surprised that it has retained its great popularity when one considers the monotonous regularity with which the players make them.

Many pitchers, weak batters, who have always regarded the making of a home run as more or less of a fairy tale, have broken into the select circle in the last few years.

Twenty years ago any player capable of amassing a total of ten home runs for the season was sure to lead the league in that respect. Now a league leader usually boasts about 40.

There is no denying that some of the modern home runs must be rated at least a pretty good laugh because of the many joke features connected with them.

For years the regulation home run distance was 235 feet from the home plate to the stands. Recently it was increased to 255, but the extra fifteen feet made the making of a home run no more difficult.

It is President Griffith's thought that the minimum distance should be 320 feet. Certainly any ball traveling that far into the stands or over the wall, must be rated as a fairly respectable home run.

In advocating such a change, President Griffith is fortunate in owning a ball park that can well handle such restrictions. Washington has one of the best playing fields in the majors, any home run made in Griffith's ball lot is a "legit".

Washington's right-field wall is 328 feet from the home plate, while the left-field distance is 358. Either takes a real drive to clear.

Three American league clubs—Philadelphia, New York and St. Louis—have playing fields that will not admit of Griffith's 320 foot home runs at the foul line limits.

Since it is an impossibility to change the concrete stadiums to provide the extra distance, the fault can be remedied by a zoning system.

The stands in the parks that are less than 320 feet could be so marked that balls passing on one side of a big white line would be two or three bases, as might be agreed upon, while hits to the other side of the line would be regulation home runs.

This would necessitate the umpires following more closely all drives into the bleachers, but would entail no great added task or responsibility.

The home-run situation needs consideration, regardless of whether or not a zoning system would solve the problem. The home-run must be taken out of the joke class.

PAGE BRINGS \$9,750 LONDON—A leaf from an English psalter, dating about 1150, was auctioned here for \$9,750. The page was included in the Holford illuminations on vellum, part of the Dorchester House Collection, on which a total of \$50,000 was realized.

Baseball Results

Western League Amarillo 4, Des Moines 7. Tulsa 11-4, Denver 5-8. Wichita 7-4, Lincoln 3-0. Oklahoma City 13, Omaha 7.

American League St. Louis 1-2, Washington 5-11. Detroit 8, New York 2. Chicago 1, Boston 2. Cleveland 3, Philadelphia 0.

SPORT TALK

Monday night at the Pampa Athletic club, fight fans will see some fast, hard boxing. This card should be the best ever presented by the club.

The Amarillo Texans returned home today after a disastrous road trip. They lost their fourth straight to the Demons yesterday, 7 to 4, and to make matters worse Swansboro sprained his ankle in the seventh after batting a thousand for the day.

Wichita has commenced an upward march and is only six games behind the league leading Tulsa nine. The race may tighten up and become interesting.

The high school football team for this season looks promising and should be heard from during the term. It is planned to play twelve games and the men will train to be fit for the long season.

Pittsburgh took both ends of a double header from Philadelphia yesterday and is sitting one game behind the Cubs, who won a game yesterday.

Owen Carrol, pitching for Detroit, yesterday allowed the Yankees but five scattered hits and Gehrig got two of them, but a double was the longest he could register.

DULUTH, Minn.—The grandfather of Minnesota turtles was found dead in Cloquet River by two Duluth automobile salesmen. The venerable turtle weighed 30 pounds. His age was figured at 75 years. He had fourteen squares on his back. Each was figured to represent five and three-sevenths years.

**New Dodge Sedan  
Thing of Beauty**

New standards of performance and beauty are to be found in Dodge Brothers latest sedan, introduced July 17 as the first body type in an entirely new line of four cylinder cars. In presenting this sedan Dodge Brothers have come to the fore with a car so new and so advanced in engineering features that it has been accorded a most enthusiastic reception by the public. Orders for approximately \$3,250,000 of the sedan were received within two days after it was introduced and since that time business has been so great that production has been increased.

The new car is advertised as the fastest four in America, giving mile-a-minute performance with surprising ease and smoothness and acceleration from 0 to 25 miles per hour in less than 7 seconds through gears. So great is the power of its engine in relation to the weight of the car that it is never forced to labor and it, therefore, free from the roughness and pounding that result from strain. Steering and parking ease have been accomplished by placing ball bearings in the steering spindles as well as in the steering gear itself. The car will make a full turn in a 35-foot street.

Springs on the new car are exceptionally long, constituting over 25 percent of the total wheel base. This gives it the longest spring base of any car selling for \$1,000 or less.

The body construction is not only remarkable for its rounded beauty but for its high quality and strength. It is the one car selling for less than \$1,000 which has a full metal roof rail and belt moulding integral with the body.

In the de luxe sedan long lines, blended curves, perfect proportions and smart coloring combine to create an impression of beauty such as few light cars ever achieve.

The interior is done in expensive mohair, with roller curtains, head linings and carpet to match. The windows are of the latest French style, glazed with genuine plate glass and such fixtures as the dome light, door handles, window regulators and robe rail are heavily nickel-plated. The unique instrument board features a 75-mile speedometer and is finished in the new "crinkle" effect.

In line and proportion the standard sedan duplicates the de luxe sedan, differing only in coloring and equipment. It is designed for an all-purpose car of great utility—fleet, staunch, durable, beautiful.

It is finished in durable lacquer, the rich colors being permanent in all climates. The interior is upholstered in leather and is proof against wear for several seasons of hard use.

**Don't Dice Rhubarb  
Say Culinary Experts**

LIVERPOOL (AP) — Rhubarb "fool" is one of the many dishes British culinary experts are commending to housewives who want to make rhubarb "interesting."

This dish is made by serving stewed rhubarb with custard or by putting rusks into a serving dish and pouring the stewed rhubarb over them.

The English domestic science experts say that rhubarb should not be cut into small bits and stewed in a lot of water. It should be left in pieces just as long as will lie flat in a stew pan, and only enough water should be poured into the pan to cover the bottom, they advise. Sugar should be added. Then the stew-pan should be covered and rhubarb allowed to cook slowly. By this method the stalks can be kept whole and cook chiefly in their own juice.

**American Woman  
Donates Orchard**

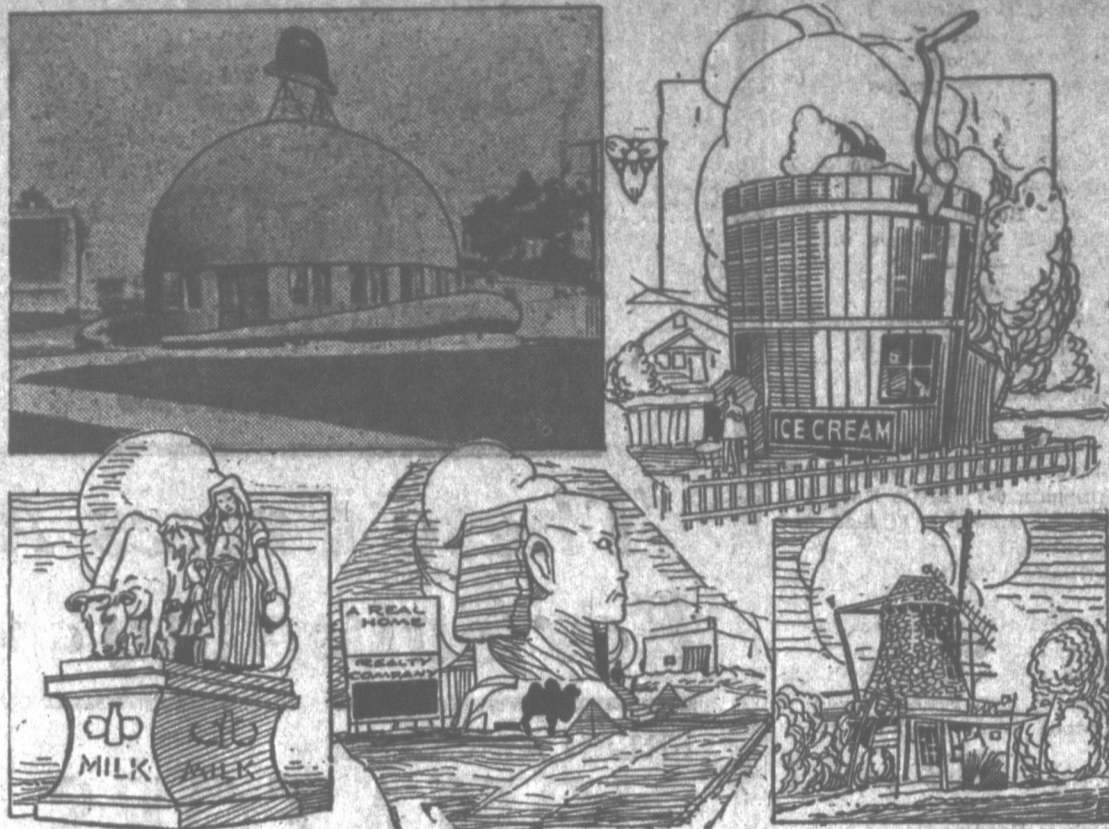

PARIS (AP)—French veterans whose faces were mutilated during the war are to be made into expert orchardists by means of a scheme aided by Mrs. Henry Alvo Strong of Rochester, N. Y.

Mrs. Strong gave approximately \$35,000 to the purchase and development of an orchard-chateau at Le Moussey-le-Vieux, 20 miles from Paris. She is the chief patroness of the project to make the veterans financially independent through farming. There are already 2,000 carefully selected apple trees planted on the estate.

Her donation was made, she said, as a thank offering that her own son returned to her safely from the war.

SHIRT FRONT 300 GUINEAS FOLKSTONE, Eng. — A white shirt front bearing the signatures of Chappin and other celebrated artists who appeared at a concert in connection with British Music Trades Convention, was sold at auction five times and realized 300 guineas. The shirt front was autographed by the artists while being worn by a member of the convention.

**CALIFORNIA ADVERTISERS BORROW  
MOVIE "ART" TO ATTRACT TRADE**

Taking a tip from the fanciful sets of the movie lots, Hollywood business men are housing their ventures in unusual structures to draw patrons. A cafe operates under a roof which resembles a derby hat, an ice cream shop in a giant freezer, a real estate firm behind a plaster sphinx and a bakery in a Dutch windmill. The idea is spreading to boulevard advertising, and billboards are giving way to a plaster statues, like the image of cow and milkmaid (lower left) heralding a brand of milk.

BY WADE WERNER  
(Associated Press Feature Editor)

HOLLYWOOD, Cal., Aug. 5. (AP) — Even business is dramatic in Hollywood.

Here, where comedy and tragedy are wound on reels and put in tin cans for shipment to all the world, the buying of a dozen buns is a scenic adventure and the purchase of a quart of ice cream is like going to a play.

Several years ago a motion picture set designer, Harry Oliver, conceived the idea of dramatizing the bakery business. He designed a Dutch windmill shop for a chain bakery, and now there are more windmills flapping their wings in and about Hollywood than Don Quixote tilted at in his whole lifetime.

And that was only the beginning. One of the latest ventures of the kind is a chain of ice cream freezers with ever-turning cranks, so big that one can walk into the freezer and name one's flavor.

There is a real estate office in

Hollywood built like the Egyptian Sphinx and in Beverly Hills, which Mayor Will Rogers calls "the desert end of Hollywood," one can buy residential lots in a broker's office patterned after King Tutankhamen's tomb. Across the street from a Los Angeles hotel largely patronized by film folk is a cafe that looks like a brown derby.

Paying rent in picturesque surroundings is particularly popular. If a motion picture studio builds an Italian street for a certain picture it is only a matter of weeks before someone builds and offers for rent an Italian village bungalow court. Even the billboards along the motor highways are giving way to statuary which advertises milk, gasoline, or motion pictures.

Behind this billboard statuary is a story. Two brothers from St. Paul, makers of shoes, came to California less than two years ago to start a shoe factory. They lost a fortune, but became acquainted in Hollywood with sculptors employed in motion picture studios to make the plaster statuary and other art "props" used

in the dressing of sets. Whereupon the brothers, F. G. and C. F. Carling, forgot about shoes and began the manufacture of plaster statuary as an advertising medium. Now their statues line the highway hereabouts and are spreading to other Pacific Coast cities.

**Julian Not Involved  
In Oil Crash**

(By The Associated Press.)  
LOS ANGELES, Aug. 5.—Racily-ownership proceedings that threw the Julian Petroleum corporation into the courts did not involve C. G. Julian, organizer and first president of the corporation.  
Reported in a news story as hav-

ing been one of several men indicted in connection with court developments of the case, Mr. Julian said: "I am neither a defendant nor any way involved in the proceedings. I have had no connection with the Julian-Petroleum corporation since December, 1924."

You can't  
look at a tire  
and tell how  
far it will run

YOU CAN'T SEE a tire carcass because it is covered by the tread. Yet the way this carcass is built tells how far the tire will run.

Dunlop has had 39 years to learn all the hidden points where tires wear. Dunlop carcasses are built from the best long fibre cotton, spun in Dunlop's own mills into the famous Dunlop cable-twist cord.

These cords are elastic, so they give and take as your tire runs; strong, so they resist constant load and pounding. They build the best possible foundation for the Dunlop tread—the toughest rubber development known.

Thus Dunlop's extra years of experience build added value into every vital tire part. That is why, not one Dunlop—but every Dunlop—gives you more service than you can reasonably expect.

We recommend that you put Dunlop on your car

### Hollywood Re-Enacts Passion Play

In a huge amphitheater in the hills of Hollywood, Calif., Palestine and the characters of the Bible live again in the seventh annual production of the Pilgrimage Play. Isa MacLaren as the Christus is shown to the left, with Lillian Sawyer cast in the character of John the Baptist. Young men lacked the necessary spiritual quality to play the part of the Baptist, according to the directors, so Miss Sawyer was chosen for the role.

of the new color tipped matches. Half a dozen shades are packed in one box. Women sort them out to match their frocks or the various rooms in the house. In round cardboard boxes these big-headed matches look like child's drawing crayons with blunted points.

Even the typewriters sold in Bond street are now varnished a cheerful red, green, blue or mauve. Most society women own a portable typewriter. They like the machine and cover to harmonize with their bouffant hangings.

#### ACTRESS WOUNDED WHILE WEARING GREEN

LONDON (AP)—Actors and actresses are murmuring here because Norah Blaney, actress with "The Vagabond King," has bought a green frock and a pair of shoes to match. "Green is my lucky color," and Friday's my lucky day," Miss Blaney said, laughing away the advice of her friends.

But it was on Friday evening, while wearing the green doublet and hose as Hugette, that she received a dagger wound during the play, which nearly severed one of her fingers.

### Motorists Carry Insect Epidemics

WASHINGTON, Aug. 5. (AP)—The American motorist has something else to worry about. His automobile is a potential carrier of insects.

"Unquestionably," federal scientists say, "many European corn borers came from Canada by motor. Other pests, buzzing about quarantined areas, have fallen into passing automobiles and been transported miles away to propagate their breed."

"We can keep motorists from carrying infected products, but we cannot search their cars for stow-away bugs!"

Bernt Balchen, who was with Byrd on his flight to Europe, has taken out his first citizenship papers.

The Rex will present the "Ten Modern Commandments" Monday.

Blank forms for sale of automobiles at the Pampa News.

### M'CALL HEADS NEW FIELD IN SOIL RESEARCH

WASHINGTON (AP)—Prof. A. G. McCall, former chief of the Department of Soils and Geology at the University of Maryland, has been selected to direct the soils work of the new Bureau of Chemistry and Soils in the U. S. Department of Agriculture.

The selection was made in connection with plans to free administrative officers of definite research work. The new bureau is a combination of the research divisions of the old Bureau of Chemistry, the Bureau of Soils and the Fixed Nitrogen Research Laboratory.

Regulatory work formerly carried on by the Bureau of Chemistry has been combined with similar functions in the Insecticide and Fungicide Board and will be controlled by the new Food, Drug and Insecticide Administration.

Dr. McCall received his B. S. degree from Ohio State University in 1910 and his Ph. D. from Johns Hopkins in 1916. From 1904 until 1916

he was Assistant Professor of Agronomy at Ohio State. He was executive secretary of the First International Congress of Soil Science recently held in Washington and has been active in promoting soil science as a writer and investigator.

### FEATURES FROM OTHER LANDS

#### LONDON RAISES MEMORIAL TO GENERAL BOOTH

LONDON (AP)—A world memorial is being built here to the late General William Booth, founder of the Salvation Army. It is a college for Salvation Army officers, costing \$1,500,000.

The most prominent feature of the building will be the great central tower, 200 feet high, surmounted by a powerful electric light, which will be visible throughout South London. The college will be finished in 1929, the centenary year of the birth of General Booth.

#### ROYAL EXCHANGE SLOWLY FALLING INTO DISUSE

LONDON (AP)—The Royal Exchange, at one time the greatest business center of the British capital, is slowly falling into disuse. It is a large building with a square court in the center, situated between the Bank of England and Mansion House.

As far back as 1842 this building was valued at 150,000 pounds, and to build it now would cost a far greater sum. Once each pillar in the large hall was allotted to one of the ancient city companies. Members of the various guilds used to gather round their particular pillars for the transaction of business.

The war removed these business operations. With one exception, all the big trades today have their own special exchanges. Every Wednesday, however, members of the old Company of Wax Candles and Chemical makers still meet to transact business. This is now the sole commercial use of this one-time hub of business activity.

#### MUSEUMS IN ENGLAND HAVE MANY USES

LONDON (AP)—One who goes to a museum in England is not necessarily a seeker after truth. The Royal Commission of Museums and Galleries says there are three others: Shorthand students use the free lectures as a means of taking dictation.

Foreign students regard the lectures as opportunities for learning English.

Boys like the polished banisters to slide down.

Many people appoint the museum as their meeting place.

And, as A. O. Curie, Director of the Royal Scottish Museum, says, museums are even used for flirtations.

Hence, the 6,000,000 people who yearly visit London's museums will be called upon hereafter to pay an entrance fee of two cents.

#### WOMEN ALLOWED TO JOIN POLITICAL CLUBS

LONDON (AP)—Women are not to be excluded from political clubs.

When a discussion whether they should be barred was at its height, owing to decision of the Larkhall Liberal Club of Bath not to have women members, the National Liberal club here set aside a special visitors' room and announced that women would be admitted for lunch, tea or dinner provided they are accompanied by members.

Some of the Larkhall club mem-

bers said that if women were admitted, "they would upset everything."

Philip Snowden, Socialist member of Parliament, said: "I think it is a perfect silly thing to attempt to exclude women from the club."

#### FALCONRY NEAR END AS ENGLISH SPORT

LONDON (AP)—Falconry, that old and honorable sport, which in the Middle Ages disputed for first place with hunting and jousting, is fast disappearing.

The Old Hawking Club, the last to keep alive the ancient sport, has just gone out of existence. Falconry is still practiced by some persons in private. They obtain their falcons, however, in Holland. Occasionally a rider is to be seen following the flight of the falcon on horseback.

#### WOMEN LIKE COLORFUL MATCHES AND TYPEWRITERS

LONDON (AP)—Mayfair's latest is a craze for odd color schemes.

A Bond street tobacconist commenting on it said:

"Every day I sell dozens of boxes

# The Most Amazing Quality in Chevrolet History

Offering the most amazing quality in Chevrolet history, today's Chevrolet is the most popular gear-shift car the world has ever known.

Quality in design! Quality in construction! Quality in appearance and performance! Never before has a low-priced car possessed them to such an amazing degree—

—because no other low-priced car combines the progressiveness of Chevrolet and the diversified experience, the vast resources and marvelous facilities of General Motors.

Go with the crowds and study today's Chevrolet. Mark well the aristocratic beauty of its lines—the superbly executed details of its bodies by Fisher.

Then go for a ride! Revel in the thrilling spurt that results when you "step on the gas." Delight in the smooth operation—the swift sweep of the passing miles. Marvel at the way the car hugs the road, the ease with which it obeys the steering wheel, the promptness with which it responds to the brakes!

Here is quality obtainable at prices which reflect the savings of tremendous production and which emphasizes the willingness to share these savings with the public.

Here is the most desired object of American life today; a car of amazing quality—for everybody, everywhere!
