

# Pampa Daily News

VOL. 1. NO. 97.

PAMPA, GRAY COUNTY, TEXAS,

THURSDAY EVENING, JUNE 30, 1927.

PRICE FIVE CENTS.

## "AMERICA" IS VERY NEAR GOAL

### BIG LOCKHART RANCH SELLS AT \$247,500

E. E. Reynolds Gives \$9.00 Each For 27,500 Acres

HAS 8 MILES OF RIVER FRONT

Pampa Nearest Point For Shipping—Good Grazing Land

One of the largest land transactions of the Panhandle was closed Saturday when E. E. Reynolds, local man, purchased the Lockhart ranch, situated 30 miles north of Pampa on the Canadian river. There is eight miles of river front.

The ranch in early years was known as the E-O ranch but was purchased by C. H. Lockhart 10 years ago. Mr. Lockhart died two years ago and Mrs. Elizabeth Lockhart moved to Amarillo. Her sons remained on the land. The ranch contains 27,500 acres of rough grazing land and has the Tallyhome creek running through it. This creek has water in it the year round.

At the present time Les Dial of Miami and William O'Brien of Amarillo are grazing 2,300 head of cattle on the ranch and have grazing rights until May of 1928. Mr. Reynolds will not place any stock on the ranch until next year.

There is a large two-story frame house on the ranch and several other small buildings. Very little grain is grown. The river and creek give a plentiful supply of water.

The nearest railroad point is Pampa, 30 miles south, and all the cattle are brought here for shipment.

Twelve years ago Mr. Reynolds had the opportunity to purchase the then E-O ranch for \$3.25 an acre, but he decided to make a purchase south of Pampa and has since struck oil on his property. The purchase price of the 27,500 acres is said to be \$9 per acre, or a total of \$247,500.

### Jack Bridges Is Hurt As Rim On Tire Blows Off

While putting air in a tire at the Eagle Filling station this morning, Jack Bridges, in the employ of the Jackson Trucking company, was severely cut on the left shoulder and left jaw. The tire blew out and the outside rim flew off the wheel, striking Bridges and rendering him unconscious for over an hour.

He was rushed to a doctor's office in the ambulance and his wounds were dressed. He was later taken to his home on the south side.

Bridges was driving a large Graham truck drawing gravel and had pulled into the service station to put air in a tire that had a slow leak. It is thought that driving with the tire down had caused the outside rim to come loose and the tire blowing out forced the flange off. There was about 55 pounds of air in the tire when it blew out.

Mr. and Mrs. G. C. Crocker are the parents of a young son born this morning and Mayor F. P. Reid is quite proud of this young grandson.

READ THE ARTICLE ON TEXAS IN THIS ISSUE

Attention of News readers is directed to the lengthy article in this issue, reprinted from the Manufacturer's Record. It is a reply to a libelous pamphlet published by the Minnesota Division of Immigration, and contains much authentic information worthy of filing for reference. The article will be found on pages 6 and 7.

### Picked for Beauty

ARDYTH GRAGG

STILLWATER, Okla., June 30. (AP)—Ardyth Gragg, 17, a freshman at the Oklahoma Agricultural and Mechanical college here, was adjudged the most beautiful girl in the school by Adolph Menjou, Hollywood screen star. Menjou made the selection from photographs submitted by the Red Skin, college annual.

### Residences And Fine Gas Station Will Be Built

Mrs. I. S. Jamison will erect three residences on the Buckler addition at a total cost of \$8,500, the work to be commenced immediately by O. A. Davis, building contractor, and are to be frame structures.

Mrs. P. A. Worley will build a \$3,500 frame residence in the east section of town. The contract has been let to L. L. Allen, local contractor, and work on the home is now under way.

I. S. Jamison has moved his residence from the lot purchased by the Gulf Production company for a service station, two blocks west and will remodel it for an apartment house.

The Gulf company men will commence work immediately on the erection of the service station on the old Jamison property on West Foster avenue at the corner of West street.

### Jiggs Is Beating Lindy—May Be Using Pampa Gas

Some daring aviator is doing something startling every day, and some days more than one starts on an almost impossible feat, but several residents of Pampa can't see how George McManus keeps Jiggs and Dinty in the air four days at a speed of 100 miles an hour without getting any place in particular or without running short of fuel. They beat Lindy's feat all hollow.

To settle the argument, Scott Barcus, Jack McDonald and Otto Studer wired the Fort Worth Star-Telegram this morning.

The wire read like this: "We see by your paper that Jiggs and Dinty have been in the air four days without landing. Please advise if they are using Pampa Gasoline, as it is the kind that can do the most work."

An answer is expected through the Star-Telegram and the mystery may be cleared up tomorrow.

### MANY AT DANCE

About 75 couples last night enjoyed the first dance at the new Danceland, under Hill's store, when the De Molays gave a party to members and friends. Music was furnished by the Dixie Troubadours.

An excellent floor and a cooling system made dancing a pleasure.

### SCOUTING WILL BE ORGANIZED IN CITY SOON

Lions and Rotary Clubs To Sponsor Troops

HIGH PANHANDLE OFFICIALS HERE

Meeting To Be Held Tonight To Make Plans

Final announcement of plans to organize the Boy Scout movement in Pampa was made today at the Lions club luncheon, at which Thomas H. Nelson, chief scout executive, and Carl S. Makeig, president of the Panhandle council of this area, made talks.

Lions Curry, Duncan, and Turner were appointed to become the club's Boy Scout committee, and these men will meet with a committee from the Rotary club and with other business men at the Chamber of Commerce rooms at 8:30 p. m. this evening.

"Boy Scouting is not an organization; it is a program," said Mr. Nelson in explaining that most of the work is done by local individuals, whose influence with boys is greater than could be that of any paid executive. The national body has inaugurated a system of decentralization, council, with headquarters at Amarillo, for this area the Panhandle illo, directs the work.

Pampa is now the only city in the Panhandle not having a Boy Scout program. To organize here, committees to be formed from responsible clubs or other groups, and these committees are to obtain capable leaders. Tonight's meeting is expected to go far toward starting a Pampa program.

Mr. Makig told the Lions how the council has grown in the last four years to include 1,400 boys in 24 counties of Texas and three counties of the Oklahoma Panhandle. From four to six troops are desired in Pampa.

The club has as entertainers Leroy Harley, whistler extraordinary; Lion Perry, pianist, and F. C. Conwell, tenor. C. N. Barrett was another guest.

### Experts Agree On Maximum Size For Destroyers

GENEVA, June 30.—An agreement to limit maximum size of destroyers was reached today at a meeting at the naval experts in conference here.

The experts also discussed the question of ratio in the number of destroyers between the United States Great Britain and Japan.

It was understood that accord was virtually reached on the ration for destroyers but experts today declined to announce the figures. The maximum tonnage of destroyers, it was understood, had been fixed at 1,500 tons. A line is being drawn between destroyers and destroyer leaders.

### Treasury Surplus Is Ten Millions Above Estimate

WASHINGTON, June 30.—The treasury surplus for the fiscal year ending tonight will be approximately \$625,000,000, it was indicated today. This amount exceeds Secretary Mellon's estimate by \$10,000,000. The largest previous surplus was in 1924 when it reached \$505,000,000.

### Mrs. Vanderbilt Gets Divorce

PARIS, June 30.—Mrs. William Vanderbilt was granted a divorce today. The decree was rendered by default.

### Nicaraguans To Be Trained By Hard-Boiled Marine Officer

WASHINGTON, June 30.—The new Nicaraguan constabulary is to be trained and organized by a United States Marine.

Nobody who has ever visualized the ideal hard-boiled Marine could possibly mistake Lieutenant Colonel E. R. Beadle for anything else. Those who have been tempted to laxity in observance of discipline when serving in his outfit are inclined to think that "hard-boiled" is a mild word when applied to him.

Col. Beadle has had lengthy and varied experience in the Philippines and Haiti and has gained a reputation as an organizer and trainer of military units. He received a citation from the secretary of war on November 11, 1920, for "excellence of service in connection with training of troops for duty with the American Expeditionary Forces."

"If Beadle can't organize a good constabulary, nobody can," was the way one official commented on his new job in Nicaragua, which has as its objective the creation of a force which can restore and maintain order in that country.

He went to the Philippines in 1903, one month after being commissioned a second lieutenant. He stayed two more years. He learned Spanish there and gained experience in a three years and returned in 1909 for country lacking in communication facilities which will be valuable to him in Nicaragua.

### HARLEY SADLER BACK FOR EIGHTH SHOWING

Harley Sadler and company have arrived here with a new group of plays and will give the opening performance tonight at the location on the lot west of the Baptist church. Sadler, a native West Texan, is one of the best known men in the Panhandle, having been a favorite comedian for nearly ten years.

The opening play will be a comedy drama, "The Elder Brother." The excellent orchestra will give a concert before the curtain rises, and high class vaudeville will be given between acts.

The organization is here for the eighth consecutive year, and comes after a four weeks' run in Amarillo.

### Attorney-General Sends Two Men To Flogging Cases

AUSTIN, June 30.—Two assistants from the attorney general's department will aid in the prosecution of Harrison county flogging cases at Marshall, it was revealed here today by D. A. Simmons, first assistant and acting attorney general.

The Rev. W. M. Baker has gone to Wichita Falls, and will return to Pampa Wednesday.

### SURVEY SHOWS DAY'S SCHOOLING IS WORTH \$9.25 TO FARMERS

The value of an education in dollars and cents has been determined to be \$9.25 for each day's schooling in the case of farmers. The more education a farmer has the more money he makes, the Department of Agriculture has decided after surveys in twelve widely separated States.

Analysis shows that the years spent in high school and college are repaid by greater earning capacity when farm activities are undertaken and that even a common school education is distinctly more advantageous financially than no school education at all.

The monetary value of an education was arrived at by taking \$20,000 as the total earnings of an uneducated laborer over a 40-year period and \$40,000 as the total earnings of a high-school graduate who spent twelve years of approximately 180 days each in acquiring training. The gain in wages, \$20,000, due to those 2,100 days of school, represents a value of \$9.25 a day during the period of schooling.

LIEUT. COL. E. R. BEADLE

### Hawaiian Fliers Will Be Honored In Ceremonies

HONOLULU, June 30.—Lieutenants Lester Maitland and Richard Hegenberger, who yesterday completed the first trans-Pacific flight from San Francisco to the Hawaiian islands, today were guests of army officers here.

The fliers will be honored at a number of ceremonies.

### Quarantine On Texas To Be Asked By Two States

SACRAMENTO, June 30.—Announcement that California and Florida had united in a stand before the United States Agricultural department on the advisability of placing Texas under quarantine, because of finding Mediterranean fruit fly infesting fruits from Cameron and Hidalgo counties was made by the state departments of agriculture today.

### HUNG JURY RESULTS IN TRIAL OF NEGROES

Four negroes, two men and two women, were tried before a jury in the mayor's court yesterday afternoon on charges of vagrancy. After considerable discussion on the part of the jury, two of the negroes were found "not guilty and two will have a new trial Friday morning, the result of a hung jury.

The negroes, from Plainview, were arrested by local officers Wednesday afternoon.

Charles J. Semour, a retired vaudeville actor, has trained a pair of pet canaries to stand on their heads, smoke cigarettes, and pick their "teeth" with a toothpick.

### NEW RECORDS OF SCIENTIFIC IMPORTANCE

Plane Talks With Ship And With Shore Throughout

WILL LAND ABOUT 5:30 P. M.

Newspaper Says Byrd Will Try Flight Over S. Pole

Commander Byrd's great scientific adventure in the atmospheric laboratory of the skies was drawing to a successful termination this afternoon as the monoplane, America, skirted Ireland and approached the coast of France.

Based upon the increasing speed made across the ocean, it was estimated that the plane would drop upon the Labourget field at Paris at 5:30 o'clock, eastern U. S. daylight saving time.

Having set new records for keeping in communication with ship and shore, the America was also taking to its landing place secrets wrested from cloud-banked skies, which may be unfolded to aid future fliers.

TORQUA, England, June 30. (AP)—Intercepted wireless messages from Commander Byrd indicate that the America was off the French coast near Brest at 6:40 p. m. today.

NEW YORK, June 30. (AP)—The New York American in a copyrighted story today says Commander Richard Byrd will sail September 16 at the head of an expedition to the south pole.

The American says work has already started on three planes, to be piloted by Commander Byrd, Floyd Bennett and Bert Acosta. Edsel Ford, John D. Rockefeller Jr., and others will finance the project, the paper says.

ROOSEVELT FIELD, June 30. (AP)—A wireless message from Commander Byrd, received by Grover Whalen at 11:05 Eastern daylight saving time, is as follows: "We hope to sight land at end of an hour. Crew feeling fine after strenuous trip."

NEW YORK, June 30 (AP)—Commander Byrd's prediction that his flight to Paris would be a scientific test came with amazing results today.

He astonished the world of aviation by radioing that he had seen neither land nor sea since yesterday afternoon.

Ten thousand feet up this morning in a freezing atmosphere and dense fog 26 hours after leaving New York, he nevertheless was true on his course about 600 miles off the British Isles.

### Pampa Quiz

Here is a chance to test your knowledge of your city. Answer these questions if you can; if you can't you will find the answers on the last page.

1. What elections are to be held in Pampa and Gray county in the next 90 days?
2. What city office will soon be vacant by resignation and must be filled?
3. What oil well has started the heaviest oil play in Gray county recently?
4. Who is the county judge of Gray county?
5. What important institution in Pampa has ceased to exist?
6. How did Pampa get its name?

These are the first of a series of questions to be propounded and answered by the Pampa Daily News. Contributions of questions and answers are solicited.

## Baseball Results

**Western League**  
 Amarillo-Lincoln, no game, played Sunday.  
 Oklahoma City-Omaha, no game, played Sunday.  
 Wichita 10, Des Moines 6.  
 Tulsa 4, Denver 5.

**Texas League**  
 Fort Worth-Waco, rain.  
 Dallas 4, San Antonio 7.  
 Wichita Falls 15, Beaumont 11.  
 Shreveport 1, Houston 0.

**American League**  
 Boston 2, New York 8.  
 St. Louis 3, Detroit 9.  
 Cleveland 0-8, Chicago 5-6.  
 Philadelphia 3, Washington 5.

**National League**  
 Pittsburgh 9, St. Louis 10.  
 Chicago 2, Cincinnati 1.  
 Brooklyn 4, Philadelphia 5.  
 New York-Boston, rain.

**Pacific Coast League**  
 Missions 3, Hollywood 2.  
 Oakland 6, Seattle 0.  
 Los Angeles 5, San Francisco 21.  
 Sacramento 7, Portland 3.

**International League**  
 Jersey City, 8-2, Reading 6-1.  
 Newark 8, Baltimore 4.  
 Syracuse 4, Buffalo 1.  
 Rochester 4, Toronto 3.

**Texas Valley League**  
 Mission 4-2, Edinburg 2-1.  
 Laredo 3, Corpus Christi 2.

**Southern Association**  
 Birmingham 6, Atlanta 7.  
 Memphis 6, Mobile 0.  
 Little Rock 3, New Orleans 2.  
 Only games scheduled.

### Standings

Boston	55	23	32	.418
Cincinnati	68	26	42	.382

## City Baseball League May Be Formed Tonight

Plans for the formation of a city baseball league will be discussed tonight at a meeting to be held at the offices of the Jarecki Manufacturing company.

The Oilers, Pampa Steam laundry, Magnolia Petroleum company, and Rig Builders are teams already entered. The intentions are to play two evenings each week, games to be called at 5:30 p. m. If more than four teams enter, however, three nights will be used.

There are many former baseball players in the city, and those who wish to try out for a team are requested to call Chris B. Martin at the Jarecki Manufacturing company or the Sports editor of the Daily News.

Indications are today that the Grays will be backed by a group of local men, who will make reorganization of the club possible. After starting the season in great fashion, the organization fell apart for lack of financial support.

## SPORT TALK

Current rumor on the streets that Bob Clarke will be back with the reorganized Grays may be true. The big fellow is anxious to get back home and Manager Ed Gober intends to get in touch with Clarke immediately.

The Oilers are waiting for word as to whether they have a game here July 4, or whether they will go out of town for that day. The team is out practicing regularly.

Big Joe Vincent may be out with the Grays when they get ready for the field. The long fellow has worlds of speed and a good curve ball. As one Clarendon player said the other day, Vincent nearly carries the ball to the plate before he lets go and a fellow hasn't a chance to hit it!

Babe Ruth, king o' swat, has a rival for honors. Lou Gehrig hit his twenty-fourth home run of the season yesterday and tied the Bambino for this season. Then Miller with Dallas is just one behind the Babe.

Have you stopped to think that Shreveport has won or lost, mostly won, more games by small scores than any team in the five leagues? They won another yesterday 1 to 0, and climbed ahead of the Dallas Steers, who are slipping badly.

### ZBYSZKO STARTS SCANDAL

CHICAGO (AP). — Stanislaus Zbyszko, bald-headed dean of wrestlers, is the unwitting cause of charges before an investigating committee of the legislature which threaten wrestling in Chicago and Illinois.

Less than three years ago Zbyszko was good enough to take the heavyweight title of the world from Mayne "Big" Munn at Philadelphia, but when he was matched on a Chicago program last winter the Illinois athletic commission barred him because he was "too old." The commission's age limit is 45, and Zibby admits 50 years.

The promoters complained. An inquiry resulted, and so many tales of fake matches were related that even if the legislature does not make wrestling illegal, promoters despair of bringing the sport back to popularity.

### TOWED BY A DEVILFISH

CORPUS CHRISTI, June 30. (AP) — The season's prize fish yarn on the Gulf coast comes from Port Aransas, near here, where three men hitched a 2,000 pound devilfish to the bow of the boat, permitting the fish to supply the power for the craft.

The fishermen were out in an 18-foot launch, equipped with a motor. One of the anglers forsook the small fry and drove a harpoon into the devilfish. He "took a turn" with the line attached to the harpoon as the monster made a break for the deep waters. The motor became superfluous. After going about a mile, one of the fishermen ended the wild flight of the marine monster with a rifle bullet.

### TREE, 206 YEARS OLD STILL BEARING PEARS

DANVERS, Mass., June 30. (AP) — Fears that the end of the famous Endecott pear tree might be near were allayed this season when it burst into bloom at the beginning of its 206th year.

This monarch of pear trees, recognized by the United States Department of Agriculture as the oldest planted fruit tree in America, is expected to bear its usual yearly crop of one or two bushels. Its fruit is the small, sweet, old-fashioned sugar pear.

President Coolidge, who visited the tree while he was Governor of Massachusetts, pronounced it the most remarkable living landmark in New England. The tree was set out by one of his early predecessors, Governor John Endecott, in 1631. General Washington, Abraham Lincoln and Daniel Webster visited the tree and ate of its fruit.

### CAMPS CALL 100,000

NEW YORK (AP). — Four hundred Y. M. C. A. summer camps, distributed among every state in the Union, will open in the last week in June and early in July.

During the season they will be attended by more than 100,000 persons. Boys will compose 70,000 to 80,000 of this total. The remainder will be made up of campers from Y. M. C. A.'s churches and other organizations, and of adults attending business men's periods.

## In Stonewall Jackson's Steps

Major Thomas Christian (right), grandson of "Stonewall" Jackson of Civil War fame, has been appointed head of the military science and tactics department of the University of Chicago. His famous grandfather held the same post with Virginia Military Institute before the war of '61. With Major Christian above is Major Frederick Barrows.

## FEATURES FROM OTHER LANDS

### BRITISH POLITICIANS NOW SPEAK IN FILMS

LONDON (AP). — British politicians are saving their voices and avoiding hecklers by having films address their constituents.

Sir Douglas Hogg, the attorney general, is a pioneer in the movement. One of his photo-films showed him delivering his speech, reproducing before his constituents all his little mannerisms, such as tugging at the lapels of his coat.

Cabinet ministers who find they cannot attend a particular meeting in their country no longer excuse themselves by wire. A tin box containing a speech taken by the new phonofilm process is sent by air.

### BOND STREET "WITCHES" REAP DERBY HARVEST

LONDON (AP). — The clairvoyants and crystal gazers who infest Bond Street and cater to dejected Mayfair matrons did a land office business just before this year's Derby.

One of the Bond Street "witches" admits that she earned more than 60 guineas and that she told all her clients that Call Boy was a sure winner. Her competitors, she pointed out with pride, gave Stampedes to their clients and are not likely to be the recipient of much gratitude. Stampedes was described by a racing writer as a "clothes horse out of a nightmare."

### ONE ENGLISH MARRIAGE IN EVERY 100 FAILS

LONDON (AP). — The Registrar-General has disclosed that one marriage out of every hundred fails in England.

Divorce in England, where dissolution of marriage is granted only on grounds of adultery, is becoming more and more common, especially since newspapers were forbidden to publish divorce case details. Before the World War the number of persons divorced was about 1,000 a year. Since the war the figure has been increased five times.

Three of every five divorced persons get married again. The majority of these are men of whom 79 per cent marry spinsters, 13 per cent marry widows, and 8 per cent marry divorced women. Of the divorced women who remarry, 70 per cent take bachelors for their second husbands and 20 per cent prefer widowers. Two out of every three divorced men marry again but only one-half of the divorced women remarry.

### FIRST HIGH HATTER IN LONDON ARRESTED

LONDON (AP). — Not many of the ultra smart young men of Mayfair who are bringing the high silk hat into favor know that the first person to wear such head gear in London was promptly arrested for "inciting to riot and breach of the peace."

The style was invented in 1797 by a Strand hatter named Hethwington, who calmly placed one on his head and walked out into the street. History relates that such a crowd grew that a boy was thrown down and trampled on and his arm broken while women screamed and fainted. The poor hatter was bound over in 500 pound bail not to repeat the offense. It is said that this encouraged the hat bootleggers of the day to popularize the fashion.

### SEES MANY-DECKED STREETS IN LONDON

LONDON (AP). — Streets of old Lon-

don may have as many decks as a battleship a few centuries hence, so Dr. John A. Harris, who was in charge of New York traffic for eight years, believes.

Dr. Harris says London's traffic problems are even more complex because of the narrow, crooked streets and the circles where so many thoroughfares converge.

"The most urgent thing in traffic control today is the segregation of vehicles into various categories—fast moving motor cars on their own tier, omnibuses and lorries on their own and so on," said Dr. Harris. "Traffic blocks such as occur on the Strand can be eliminated only by express highways, multiple decked streets and marginal express highways, not only for city work but for cross country traffic."

### FIVE O'CLOCK TEA CUSTOMS CHANGING

LONDON (AP). — Sweet cakes and other eatables no longer accompany the Englishwoman's 5 o'clock cup of tea.

Years ago, when it first became fashionable to take tea in the afternoon, no food was served, but during the reign of Queen Victoria the Royal family set the example of serving rather a substantial meal with many kinds of sandwiches.

The "tea without milk" habit is also growing. Until recently tea without milk was favored only by Russian, who favor it with a slice of lemon.

### ENGLISH COLLEGE BOYS WEAR THEIR HAIR WAVED

LONDON (AP). — The latest fashion among English college boys is to have their hair waved.

While old Cambridge and Oxford graduates are inclined to sniff at the innovation as "foppish" the coeds are divided in their opinions. Some frankly admire the exquisitely waved hair which gives the young men the appearance of the traditional matinee idol, other scoff at them for being effeminate.

A Cambridge hairdresser reports that he has never known so many undergraduates to have their hair waved as now.

## Urges Regional Rule Around Large Cities

(By The Associated Press.)  
 IOWA CITY, Iowa, June 29. — The township is doomed as a useful unit of government. Prof. Thomas H. Reed of the University of Michigan believes.

A new system of local government must be constructed, he told the commonwealth conference here tonight, which will consider as one the city and the area tributary to it. This system, he said, must do the work now done separately by city and county.

"The idea is just dawning on us that around the typical American city there is a region of varying extent whose interests in many matters properly belong to the field of local government. Above the county, may we not establish regional governments, caring for those common needs? We would merely be dropping a unit off at the bottom and putting in another at the top."

### BILLS OF SALE

Blank forms for sale of automobile at the Pampa News.

# PIGGLY WIGGLY

Stores have succeeded because they appeal to the thrift, the taste, the comfort and the convenience of every Pampa housewife.

We are offering the following specials for Tonight and Friday and Saturday.

Come in tonight while you are attending the street dance and celebration. Take a watermelon home tonight.

WATERMOLONS, JIM WATSONS, MEDIUM SIZE, EACH .48

GRAPE JUICE, ARMOURS, QUART .43

GRAPE JUICE, ARMOURS, PINT .23

SOAP, PALMOLIVE, 3 BARS .19

MOP STICKS, EACH .11

NEW POTATOES, RED TRIUMPHS, POUND .42

LUSTRAWAX, 16 OUNCE BOTTLE .64

MACKERAL, FRESH OR SOUSED, 9 OUNCE TIN .26

CABBAGE, FIRM SOUTH TEXAS, POUND .42

COMPOUND, SWIFTS JEWEL OR ADVANCE 8-LB. BUCKET \$1.08

BACON, PURITAN SLICED, POUND .39

BUTTER, JERSEY CREAM, POUND .45

EL FOOD, MAYONAISSE, 8-OUNCE BOTTLE .25

## BYRD POPULAR AS SCHOOLBOY, TEACHERS AND CLASSMATES SAY

BY JOHN HOOVER

(Associated Press Correspondent)  
LEXINGTON, Va., June 30.—They called him "Dick" and "Dickey," and knew him as an all-around student in classes, military affairs and athletics when Commander Richard Evelyn Byrd, the daring flier, was a cadet at Virginia Military Institute.

More than that, he was a pet "rat"—which is the same as plebe at West Point and Annapolis—of the barracks and enjoyed extreme popularity.

Byrd entered V. M. I. with the class that graduated in 1908, but after two years accepted an appointment to the naval academy, and while waiting for a vacancy attended the University of Virginia.

"Dick was a very young man when he entered," Charles Paul, of Roanoke, Va., a member of the class of 1907, recalls. "He took everything coming to him as a 'rat' in fine spirit—and the lot of a 'rat' is a hard one."

On one occasion, however, Dick took exception to a slurring remark about his size from a third classman, Paul says, and everything was set for a fight on the banks of North river when upper-classmen intervened. Dick was more disappointed than anyone else, but had the satisfaction of not hearing any further remarks about his size.

"Dick and I were on the gymnasium team together for two years," John E. Doyle, of Norfolk, Va., relates. "He handled himself beautifully on the apparatus and was especially agile and accomplished as a tumbler. Though small size, he was wiry and afraid of no stunt, no matter how difficult."

Byrd would "try anything," according to Colonel R. Barclay Poague, chairman of the committee on athletics, and impressed all who came in contact with him with his courage.

Colonel Henry C. Ford, who taught both history and English while Byrd was in the school, told him he had a promising career as a writer.

"He did well in class," says Colonel Francis E. Mallory, professor of physics, "and there is one thing that impressed me particularly. When he left the institute, in spite of all the bustle and confusion at the end of the season, he took the trouble to come and bid me goodbye and thank me for the help I had given him in class."

Writing to the editor of The Cadet, V. M. I. weekly newspaper, Albert C. Brown, of Birney, Mont., a classmate of Byrd's, relates:

"You probably know of the cave located about two miles west of 'The Nile' (a small stream flowing past the barracks). At the time when we were cadets, very few had reached the end of the cave, but that it had an end we were assured by Professor Pendleton.

"Filled with determination to reach the end, four of us, Dicky Byrd, John Crittenden, Edward Taylor and I, spent each Sunday for weeks working out one passage and then another.

"Blocked for a while by a seeming impassable bit of crevasse, we finally made a way around it, to a place we thought for a while was the end of the cave. It was the end of one passage, but here a hole so large that a man went down at an angle of more than 45 degrees.

"Into this, head first, went Dick Byrd, and once started there was no turning back. That wet lime stone was slick as glass. Four wet, very muddy cadets went down the long slide, one after another, into we knew not what, but what proved to be a large and rather beautiful passage, ending in a blank wall and our adventure."

### A CONVINCING ARGUMENT

MOSCOW.—Desperate after three years of fruitless effort to win recognition of his improved method of cardboard manufacture, Gregory Serebrovski bludgeoned his way to recognition recently with a roll of his own product.

As a last resort Serebrovski went to a professor of the scientific department of the Supreme Council of Public Economy. He asked for aid, but was refused a hearing and was told to get out. The infuriated inventor seized a roll of his samples and struck the professor in the face. Two months later he received a subsidy of \$1,000 for further experiments, less a fine of \$12 for damage to the professorial nose.

### PROFIT IN WASTE WATER

KANSAS CITY.—Even in waste water there is a profit. A Kansas City jewelry manufacturing company recovers \$2,000 annually in precious metals by filtering the water in which its workers wash their hands.

## HINTS FOR FARM and HOME

BY THE DEPARTMENT OF AGRICULTURE

When timber is cut on a farm woodland it is best to leave the younger trees for future growth. Even if all the timber is mature, seed trees should be left at intervals to take care of the job of reseeded and bringing up a new crop of trees. This method is cheaper and more effective than artificial planting—but fire must be kept out.

Cows that are dehorned can be kept together in close quarters or yards without danger. Those with horns endanger their attendants as well as one another, and the horns are also an inconvenience in feeding and watering. Cows that are not kept for show purposes should be dehorned.

In sections where a second or fall crop of potatoes is grown it is advisable as a rule to plant the crop considerably deeper than the early one on account of the high soil temperature, which is unfavorable to tuber development, and also for the purpose of obtaining better moisture conditions. On sandy loam soils the seed may be planted from five to six inches deep, but on the heavier types four to five inches is more satisfactory.

Clean, bright oats (whole or crushed) rolled barley, well-cured alfalfa hay, and a small quantity of green feed, preferably carrots, is the daily diet used in most rabbitries.

Wheat bran, mixed with oats or barley (equal parts by volume) may be fed once a week with good results. Clover hay may be substituted for alfalfa where the alfalfa is not available, but the latter is preferable and is eaten more readily.

Changes in the horse's ration should be made gradually or digestive disorders may result. Care in all feeding operations is necessary for complete utilization of the feed and consequent fitness for work at all times.

United States agriculturists warn against appearance of the snakeweed on range land in the southwest.

Overgrazing and drouth, they say, combine to favor the "unwelcome plant, which is devoid of forage value. Grama grass, important to the range, will predominate if cattle grazing is regulated to keep it in good growth. The roots of the Grama intermingle four or five inches below the soil surface, probably absorb most of the available moisture, and give the snakeweed little chance.

Where original vegetation has been destroyed, snake weed helps check wind erosion of sandy soils.

### Non-Resident Ranchers Fight Assessments In Willacy County

RAYMONDVILLE June 30.—When the Willacy county commissioners' court recently met as a board of equalization, considerable interest developed. A dozen or more prominent non-resident ranchmen, or their representatives, were present to try to get assessments of their land lowered, but so far no definite action has been taken.

The King ranch was represented by Robert and Caesar Kleberg and John Finnigan, all of Kingsville, who were protesting a raise of 35c an acre placed on their holdings of 103,000 acres. Last year the lands were assessed at \$7.15 per acre and this year the county commissioners raised the valuation to \$7.50.

Some portions of the tract are conceded to be worthless for anything except grazing purposes, while parts of it are said to be well suited to agricultural uses.

### DRAWN THE FOOL

GREENVILLE, June 29. (AP)—Billie Bush, 16 years old, of this city, won the cartoon contest of the Texas council of safety, an announcement received here said. The drawing showed an automobile crash with the occupants being hurled out and was labeled "Drive Slowly; You May Be the Fool."

A letter to young Bush from V. E. James, director of the council, said the field of contestants was large and added that the cartoon reflected credit on the author, his community and his school, Greenville high.

Blanks for application for transfer of automobiles can be secured at the Pampa Daily News.

## OUT OUR WAY

—By Williams

## BOVINE TUBERCULOSIS EXPECTED TO BE CONQUERED IN FEW YEARS

Five more years of federal and state cooperation will make nationwide eradication of bovine tuberculosis an immediate probability, United States animal industry chiefs believe. Success or failure, they agree, rests entirely with the states. Assistance is extended only to those states which meet federal funds with their own.

"At present," authorities say, "there seems to be a tendency among adhering states to increase appropriations for war on tuberculosis. The project is popular, but the expense in compensating owners of slaughtered reactors is tremendous."

New York state has taken a lead in eradication work with a regular appropriation of \$3,250,000 for indemnity alone. Cattle owners there expect to have an accredited tuberculosis-free state by 1936. Statistics show eradication slightly ahead of schedule and it is believed the goal may be reached as early as 1935.

Government officials expect North Carolina, where infection is slight, to be the first accredited state. Arizona, however, is the only state in which every county is fighting tuberculosis. There, also, infection is slight. The disease predominates in New England, the Middlewest, and in California. The "war" is heaviest in the Great Lakes states.

The growth of eradication since its inception in 1918 is described as remarkable. Almost 28 per cent of the 3,073 counties in the United States are actively engaged. Three hundred six counties are fully accredited, the number of reactors approximating one for every 200 head of cattle or less than one-half of one per cent of the total number.

The nation's cattle population is estimated at 23,844,116.

"The progress of eradication is astounding considering America's late start in controlling it," the federal experts say.

"An example of progress in this country is seen in the fact that the world's greatest dairy cattle county, Marathon county, Wisconsin, with a cattle population of more than 100,000 is expected to be added to the accredited free list in June. Grundy county, Illinois, is another candidate.

### Short Story Contest Will Be Part Of Tri-State Fair

AMARILLO, June 29.—That the literary department of the Amarillo Tri-State exposition may have a part in the development of a Panhandle writer who will become na-

Ollie J. King, a 220-pound negro, put four New York policemen on the casualty list Sunday when they attempted to place him in a cell in the police station.

MANY TEXAS DEATHS SHOWN PREVENTABLE

The state department of health has a program which is not touching many communities, but which is costing taxpayers money and has a big value.

The number of deaths reported in Texas last year was 43,353. The records show that of this number 15,771 were due to preventable diseases, including 3,440 deaths from pneumonia and 1,509 from cancer. Typhoid fever, scarlet fever, malaria, dysentery, smallpox and other preventable diseases. Physical suffering is bad enough, but in many cases illness removes the support of a family and causes need for charity.

"Health is the greatest asset of an individual or a community," writes J. C. Anderson, state health officer. "And the education of the people along lines of health protection will materially reduce both the mortality and morbidity rates in your town and surrounding rural territory."

Pampa is fortunate in having a supply of pure water. But there are many hazards to health, such as limited sewerage, defective disposal, uncovered garbage pails, improperly constructed toilets, and mishandling of food. Passage of the bond issue in the election of July 19 will enable the city to remove the hazards for which it is publicly responsible, and the state health laws, designed to safeguard public health, should be fully and impartially enforced.

HOUSE NUMBERS ARE BADLY NEEDED HERE

There are few vacant houses in Pampa, and a day never passes but that incoming people seek out the houses advertised for rent or lease. There is too much looking involved in trying to find a local residence.

The reason, of course, is that many houses are not numbered and, while the streets are marked, confusion results when a house is the object of a search. In a city as new as Pampa, finding of persons or residences is necessarily difficult. Growth always brings about confusion. But order may be quickly established by thorough marking of streets and houses.

If strangers are right, Pampa needs no minor public improvement more than house numbering. Evidently a quick, thorough campaign would be

Getting Together At Last

WASHINGTON LETTER

BY RODNEY DUTCHER, NEA Service Writer.

WASHINGTON. — When Postmaster General Harry New commissioned Commander Richard E. Byrd to carry air mail across the Atlantic, a dream began to come true in a big way.

New, reminiscing the other day, recalled that as long as 10 years ago he had discussed with Byrd the feasibility of an air mail service and other angles of the future of aviation. Both had confidence in the air mail idea.

Byrd was still a naval aviator and New was then a senator from Indiana, trying to sell air mail legislation to colleagues who wouldn't take it very seriously.

The postmaster general claims virtual paternity of the air mail service. He nursed it in infancy and brought it up. It may seem as if he had suddenly laid the child on somebody's doorstep by surrendering the service to private operation, but New doesn't feel that way. It's still the government's mail that's being carried and he predicts a great future for the service.

Your correspondent developed a certain respect for New when he found him in his office, on a warm day, with his vest completely unbuttoned. Other cabinet officers are not to be seen in such a state of undress. Now, if New would only shed his vest completely,

Interesting characters come to Washington from Louisiana, the home of Senator Joseph Eugene Ransdell, whose dig-

the best method of bringing about this desired end. Some organization, official or unofficial, should consider this step as one worthy of immediate action.

Let's number all of the houses in Pampa.

nity and personal rectitude are so great that he is called "Saint Jo," though not to his face.

For instance, there is Congressman Whitmell Pugh Martin, who has served one term as a Progressive, one term as a Republican and four terms as a Democrat. He will continue to serve as a Democrat in the Seventieth Congress. It is explained on his behalf that although Republican candidates in Louisiana are as scarce as chicken in a veal stew, his district develops marked Republican tendencies every time there is talk of reducing the sugar tariff.

Then there's Walter Cohen, the state's Negro Republican boss and collector of the port at New Orleans. Cohen, whose father was Jewish, has solidified the vote of his maternal race and carries the Louisiana Republican delegation in his pocket, so he is one of those southern Negro politicians who can have anything he wants. Incidentally, he is credited with considerable ability.

Walter Cohen was in Washington when the ku klux klan agitation was at its height. "I sure hope those kluxers never get after me, because it will be hard going," he remarked.

"I'm a negro, a Jew and a Catholic!" All of which, somehow, was true.

PRESS FORUM

Not long ago Mme. Ernestine Schumann-Heink said in an interview for newspaper publication: "The greatest thing to me is not the honors I have received. It is that I am an American citizen and a mother."

Well, the Madame is a good American citizen, no matter what the place of her birth. All Americans respect the man or woman who is truly a good and loyal citizen, whether native born or not. Mme. Schumann-Heink's Americanism was tested when the world was aflame with war. She proved herself then in the face of the

most trying difficulties. She is proud of her citizenship; proud of her motherhood. She is ever expressing praise for the country of her adoption. She is a spontaneous patriot and an artist who sings all her emotions.

If you have not heard this lady sing the "Star Spangled Banner" you have not heard it sung as it really should be.

When she gives it full-throated melody the very flag itself seems to ripple in pristine beauty and the fervor and passion of the man who wrote it is brought to your presence. The power and might of a nation on righteousness bent marches before you and you do not wonder that the woman who sings is so loyal an adopted daughter of the nation the flag floats over.

Music is a powerful influence in renewing patriotic fervor. So long as Schumann-Heink lives, she will be a factor in keeping that portion of the nation's people which comes into her singing presence alive to the significance of the "Star Spangled Banner." — Enid News.

AMONG THE GREAT

NEWARK, N. J. — A common, ordinary mortal enrolled himself among the famous recently by trying out a pen here owned by Myron W. Morse, collector of autographs. Morse guards his pen most jealously, not even permitting his wife to write her name with it. When he discovered that a plain man had used it, he immediately accounted the man famous for having written his name along with Thomas A. Edison, Theodore Roosevelt, John Phillip Sousa, General Pershing, Gutzon Borglum, Helen Keller, Ralph Connor, Charles M. Schwab and others.

NO MORE BREW TUBS

SAN ANTONIO. (AP) — United States District Attorney John D. Hartman in a statement here promised wholesale prosecution of dealers in paraphernalia for making home brew. Two merchants here have been convicted for that offense under section 18 of the Volstead act.

TOWN CARRIES CZAR'S NAME

NIKOLAIEV, Ukraine. — This city, founded by Emperor Nicholas I in the early part of the Nineteenth century and the largest Black Sea port after Odessa, is the only remaining one of importance in the Soviet Union which still bears the name of one of the czars.

TWINKLES

You can tell a live town by the extremes. While a big Sunday school class was in session at a theatre last Sunday, Borger officers were chasing an automobile thief up the street.

Honolulu's reputation did not tempt fliers as quickly as did that of Paris, but now that the hop has spanned the Pacific tract the Hawaii chamber of commerce may be expected to get on the job.

The Adobe Walls battle site is reported "quiet" by the press. Yep, but remember, Borger was like that two years ago.

It's gotten so in this world that when you put out a quarantine sign the pro agents are apt to get suspicious and raid the place.

MOM'N POP. We Agree With Pop. By TAYLOR

# SOCIAL NEWS Phone 72 Mornings

Margaret Buckler, Virginia Faulkner, and Claudine Pope have returned from the J. A. Rauch at Clarendon.

Dr. W. Purviance went to Panhandle Tuesday afternoon on business.

Mr. and Mrs. Ivan Bridges left Thursday morning for their home in Clovis, N. M., after visiting with friends here and transacting business.

Mr. and Mrs. J. H. King of King's ranch at Spearman and Mr. and Mrs. Wood King and children returned Wednesday evening from a month's stay at Hot Springs, N. M.

Vondel Kees of Weatherford, Okla., is here visiting her father, Homer Kees.

Mrs. Michael Gibson spent Tuesday with friends in Panhandle.

## Teachers Entertain S. S. Classes

The first and second classes of the junior Department of the Methodist church were entertained Wednesday from 8 to 10 a. m. by their teachers, Mrs. Maud Hall and Mrs. W. Purviance, at the home of the latter.

Outdoor games and story telling were enjoyed until a late hour and refreshments were served in picnic style to the following: Pauline Barrett, Howard Zimmerman, Florence Dodson, Lawrence McBee, Odessa and Wayne Winkler, Mary K. Clark, Harriet Hunkapillar, Evald Younger, George Dees, Irene Owens, Dorothy and Myrtle Gilbert, Lawrence Harris, Lottie Louise De Graftenreid, Otto Rice, Edna Dunaway, Helen Joe Daugherty, and Albert Reynolds.

## Women's Auxiliary Has Mission Study

The Women's Auxiliary of the Presbyterian church met Wednesday afternoon at the home of Mrs. Dave Pope for the mission study, "Temple Hills", with Mrs. Tom Clayton as leader.

Special topics were given by Mrs. Pope, Mrs. Horace Oakley, Mrs. W. W. Merten, Mrs. J. M. McDonald, and Mrs. Joe M. Smith.

The business session was presided over by Mrs. John Andrews. At its close an ice course was served to the fifteen that were present. The next meeting will be with Mrs. H. W. Johns.

## Mickey Ledrick Gives Party

Mickey Ledrick celebrated his 8th birthday Wednesday afternoon by inviting his chums and playmates to play games in the yard and shoot fireworks. After hours of merriment and fun, each guest was presented with a stick candy doll as favors and were served ice cream and birthday cake.

Those enjoying Mickey's hospitality were Whitney Bridges of Clovis, N. M., Nellie Meers, Winifred Gott, Jack Walstad, Chester Hunkapillar, Sonny Cook, Warren Finley, Flora Dean Finley, Dewey Bowers, Cal Pierce, Raymond Beams, Lillian Rice, Marjorie Davis, L. M. Ballew.

Miss Louise Walstad and Mrs. Frank Shriver assisted in serving and entertaining the youngsters.

## Gordon-Robinson Wedding Announced

A very pretty wedding took place June 27, at the home of Mr. and Mrs. J. W. Gordon of Clarendon when their daughter, Mary Olivia, became the bride of G. Rodney Robinson.

Baskets of sweet peas and pink and white roses made a beautiful setting for the impressive ring ceremony, which was read by the Rev. A. L. Moore, pastor of the First Methodist church, in the presence of immediate relatives and friends.

Miss Alice Gordon, sister of the bride, sang the pre-nuptial song. She also played the bridal chorus from "Lohengrin" at the entrance of the bride, and during the ceremony played softly a selection from Heller.

The bride wore an Irene Castle model of powder blue chiffon, trimmed in white. She carried a bouquet of bride's roses and lilies-of-the-valley.

Her going-away dress was a two piece model of rose beige crepe with blended tones of rose, and accessories to match.

Mrs. Robinson, formerly of Pampa, is a graduate of Clarendon college and holds a degree in art from Texas presbyterian college. She also studied in the Art Institute at Chi-

## MISS CLAUDEL TO SHOW U. S. TROUSER SKIRT

MISS MARIE CLAUDEL

Miss Marie Claudel wearing a pale blue trouser skirt dress which Worth designed for her appearance in Washington.

PARIS, June 30. (AP) — The wardrobe which Miss Marie Claudel, the oldest daughter of Ambassador Claudel of France, will take to Washington with her will be one of the prettiest of the season.

Her evening dresses have been made by one of the best known Paris houses and are thoroughly French. One of the evening dresses, shown in the illustration, has the new jupe culotte made with a full front and a long detachable scarf which falls like a drapery in back. The gown is pale blue chiffon.

The engagement of Miss Claudel to Christian Bonamy was announced last spring and her marriage is expected to take place within a few months.

ago and taught in the public schools of Jackson, Miss., and Amarillo. For the last two years she was head of the art department of Port Arthur high school.

Mr. Robinson was educated in Philadelphia and is now associated with the Pure Oil company of that city.

Immediately after the ceremony, the couple left for a wedding trip to the larger Texas cities. They will return to their home at 2,741 Proctor street, Port Arthur.

## Win One Class Has June Party

The "Win-One" class of the Christian church met with Mrs. Billy Lang at a "June Bug" Party Wednesday afternoon.

At the business session plans were discussed for raising money for the new Pampa hospital. The ladies sewed nearly every day last week for the hospital.

After all business was disposed of, a social hour was enjoyed and the hostess served dainty refreshments to about 25 that were present. She was assisted by Mrs. Stowell and Mrs. Holt. June bugs were favors.

## Mrs. Hunkapillar Honors Friend

To compliment Mrs. Ivan Bridges of Clovis, New Mexico, Mrs. C. T. Hunkapillar entertained a few friends Wednesday afternoon at her home. In bridge games high score went to Mrs. Ivan Bridges and consolation to Mrs. Lester Chiles. Mrs. Bridges also receiving guest prize.

A refreshing fruit punch was served during the games and later a delicious ice course and cake were served.

The guests were Mesdames L. C. McMurry, W. M. Craven, C. P. Buckler, Maurice Finney, Lester Chiles, Charles Going, Marlon Howard, P. O. Sanders, George Walstad, Siler Faulkner, I. B. Hughey, and the honored guest Mrs. Ivan Bridges.

Call at Pampa Daily News office for bills of sale for automobiles.

# Fireworks to Start Paving FROLIC

Two red-hot orchestras will furnish the music for the West Foster avenue celebration tonight commencing at 9 o'clock. Promptly at the hour named, fireworks will be set off to commence the evening of frolic and fun to celebrate Pampa's coming out of the mud. After the fireworks the orchestra—one in front of the Pampa Hardware store and the other in front of Masters Cafe—will play dance music.

Large spaces will be roped off for dancing and the orchestras will be on a raised platform with dancing around them. The Dixie Troubadours, local musicians, will be at one end of the street and Walker's Amarillans at the other end.

Confetti and streamers will be given away, also whistles and favors. Many out-of-town visitors are expected to join Pampa throngs in their celebration tonight.

The city marshal, by orders from the Mayor, will clear West Foster avenue of traffic at 6 o'clock so that preparations may be made for the big time.

Stores along the streets will have open night and will welcome inspection and visits from all. Windows are decorated and each store will prepare a feature attraction for the night.

Come out and join the crowd in fun and frolic along West Foster avenue at 9 o'clock tonight. This means everyone—old and young—you will get a kick out of it.

## Black Hills Cause Of Cleveland Row

(By The Associated Press.) WASHINGTON —Calvin Coolidge is the second president whose name has been linked with the Black Hills of South Dakota. The other was Grover Cleveland.

Coolidge, however, is enjoying the facilities for rest and recreation there, whereas Cleveland was violently denounced and threatened with impeachment proceeding because he created the Black Hills Forest Reserve, February 22, 1897, the birthday of the first president, George Washington.

When Cleveland set aside the reserve, virtually all of the timbered section of the Black Hills region was included and Charles Lathrop Peck, president of the National Tree association, points out that it became the first national forest to be placed under scientific management in the United States. It has yielded millions of feet of lumber and has brought thousands of dollars into the federal treasury.

One of its early supervisors was Capt. Seth Bullock, United States marshal and close friend of Theodore Roosevelt. Bullock gathered a staff of forest rangers who, Peck asserts, have never been equalled in any national reservation, including such men as "Cap" Smith, old Indian fighter, and still a resident of the region, living at Sturgis on the edge of the hills.

Fires have caused enormous damage to the Black Hills, but the ranger's efforts have saved magnificent forests of yellow pine from the flames. Before the white man emigrated so far from the Atlantic seaboard, fires caused by lightning or Indian campers ravaged the hills. A few Indians are still living who remember the time, about 80 years ago, when the whole mountainous region seemed to be ablaze. The Indians in those days regarded the hills as holy ground, harboring good and evil spirits and they entered them only on annual hunting excursions.

The large German cruiser Moltke, sunk eight years ago in Scapa Flow, has been raised from where it lay in seventy feet of water. This is said to be the greatest salvage feat ever attempted.

Pons-Winnecke, a great comet, will come within two days travel of the earth on June 25 and 26, according to Dean McLaughlin, instructor in astronomy in Swartmore College, although it will still be 3,000,000 to 4,000,000 miles distant.

# Real Texas Facts Refute Minnesota Bureau's Slanders

## MAGAZINE HAS WRITER TELL OF SOUTHWEST

### Empire State Not Mongrel Affair, Declared

BY HOWARD L. CLARK  
Reprinted from Manufacturers' Record, Baltimore, Md., Issue of June 9, 1927.

Minnesota is a great state. It has many fine people of high intelligence within its borders. For that reason the Manufacturers Record has been surprised that some official or officials of its state government are either uninformed or misinformed, or else they could not have been guilty of an absurd tirade against Texas—the great Empire State of the Union, but I have seen no Minnesota reply to this slander against Texas. Uninformed individuals here and there and interests for selfish reasons have tried to malign the South or some part of it, but the occasion is rare, indeed when a governmental department permits itself to exhibit ignorance about any portion of the United States so dense that it is tragic. In a warning to the people of Minnesota against an enterprise to sell land in Texas to the residents of the former state, the Division of Immigration of the Minnesota State Department of Conservation, in a recent bulletin, implored the people of Minnesota not to go to:

#### "Largely Mexican"

"The sultry South, with its hot, destructive winds, its droughts, its boll weevils, corn borers and other destructive insects, its lack of comforts and facilities to which they have become accustomed in this state, to mix with the heterogeneous hordes, consisting largely of Mexicans, negroes and mixed bloods which predominate in many parts of Texas."

For charity's sake we shall draw no comparisons between Minnesota and Texas do not need to base their former and far less shall the South attempt to disparage any other section of the country in order to present its own advantages. The South and Texas do not need to base their case on the negative side through misrepresentation of other sections. There is such a vast array of constructive facts on the positive side about the South that the half has never yet been told of its advantages, resources and record of achievement.

As to the various fantastic evils with which the Division of Immigration of the Minnesota Department of Conservation in its bulletin asserts Texas to be afflicted, I will cite a few facts about this great Southwestern state. Texas needs no defense of what it is and what it has accomplished, but the uninformed and the misinformed need to be rightly informed.

#### Empirical Data

First of all, Texas is a mighty empire within itself. Its total area is 265,896 square miles, 262,398 square miles being its land area. In size it covers a territory 12,000 square miles larger than four states of Illinois, Iowa, Wisconsin and Minnesota combined.

Texas is as large as the combined land area of 12 Eastern and North Central state (one-quarter of all the states in the union), embracing the six New England states and New York, New Jersey, Pennsylvania, Delaware, Ohio and Michigan. Furthermore, Texas, with abundant natural resources and varied and beautiful scenery, is 54,000 square miles larger than the whole of France and 85,000 square miles larger than Germany. The farm area alone in Texas nearly equals the total area of Germany. That one may still be skeptical of the "bigness" of Texas, let it be said that one can travel 740 miles from north to south and 326 miles from east to west and still remain within its borders. If the eastern end of Texas were moved to New York City, the western end would extend beyond Chicago, the southern point would be near Raleigh, N. C., and the northern 50 miles beyond Sault St. Marie, Mich.

#### Cities Almanac

The Texas Almanac of 1927 presents the variety and magnitude of the state's resources in the following:

"Texas has in its pine timber belt (a region containing 17,000,000 board-feet of pine and 3,000,000,000 board-feet of hardwoods in addition to supporting a great and varied ag-

LOIS WELBORN

HIGH POINT, N. C., June 29. (AP)—Women have executive ability, but are inclined to dodge responsibility, believes Miss Lois Welborn, newly elected city manager of High Point, a city of 30,000 population. "I believe the time soon will come," she says, "when women will be at the head of many of the largest corporations in the country."

Miss Welborn was secretary to the city manager eight years before being promoted to the "big job" itself. The Mexican population is centered along the southern border of Texas extending into the western part of the state, with a few in the northern and part of the eastern section. Negroes are found mostly in the eastern, central and southern parts of the state. The Mexicans and negroes are principally farm workers, and as farm laborers are exceptionally valuable.

With its increasing population and agricultural and industrial expansion the wealth of Texas has made a gain of more than \$7,500,000,000, or 324 per cent, since 1900. It is estimated that the wealth of Texas is now over \$10,000,000,000 or more than one-ninth of the total value of all property in the United States 25 years ago. The assessed value of all taxable property in Texas is now about four times what it was in 1900. Farms and farm property represent the largest single item in the wealth of the state, but industrial interests are expanding so rapidly that the value of manufactured products is now about one-third larger than the aggregate value of all farm products. The estimated value of all farm property in Texas is over \$3,500,000,000 or an increase of nearly 60 per cent since 1910.

Huge Farm Area  
Out of a total land area of 167,934,000 acres, Texas farm embrace 109,798,000 acres. Only 44,181,000 acres of farm land are classed as improved and in 1926 the aggregate farm crop acreage of the state was 29,848,000 acres. More than 100,000,000 acres in Texas are said to be suitable for cultivation.

As will be seen from these figures, the future agricultural possibilities of Texas, measured by what has been done, are enormous, although for some years Texas has been the leading, or next to the leading agricultural state in the union. It not only produces 31 per cent of the cotton crop of the United States or over three times the production of any other state in the south, which furnishes more than half of the world's supply, growing more than 5,600,000 bales in 1926, with a value in excess of \$320,000,000, but Texas can produce and is producing practically every variety of crop grown in the United States. The total value of its agricultural output in 1926 was \$940,000,000 with cotton, its major farm crop, representing about one-third of the amount.

Trucking Profitable  
In 1926 Texas produced 106,865,000 bushels of corn, 32,796,000 bushels of wheat; 83,666,000 bushels of oats; 48,726,000 bushels of grain sorghums to mention some of the larger grain crops of the state, and in addition 49,345,000 pounds of peanuts, 10,656,000 bushels of potatoes, 6,142,000 bushels of rice and many other crops. With the south furnishing about one-half of the commercial truck crop of the country, Texas, with a trucking crop value of \$18,690,000, in 1926 was the third leading southern state.

Crop diversification in the state is making rapid strides, with the whole Rio Grande valley region becoming one of the nation's garden spots. While an enormous gain has been made in food crops, Texas is still one of the leading cattle states of the union, over 13,000,000 head of livestock being on Texas farms. Turkey raising, with an annual output of \$10,000,000; pecan growing; the development of a large citrus and fig industry are some of the farm activities attracting attention. The "Onion King of the World," C. H. Melton of Devine, Texas, thinks nothing of seeding 2,000 acres in Bermuda onions and producing 2,000,000,000 onion plants while at the same time planting four tons of cabbage and other vegetable seed. During 1926 the Melton farms, which employ approximately 6,000 people, shipped in the early spring 300 carloads of plants and in between crop seasons last summer shipped 63 cars of green corn to eastern markets.

Turkey raising, with an annual output of \$10,000,000; pecan growing; the development of a large citrus and fig industry are some of the farm activities attracting attention. The "Onion King of the World," C. H. Melton of Devine, Texas, thinks nothing of seeding 2,000 acres in Bermuda onions and producing 2,000,000,000 onion plants while at the same time planting four tons of cabbage and other vegetable seed. During 1926 the Melton farms, which employ approximately 6,000 people, shipped in the early spring 300 carloads of plants and in between crop seasons last summer shipped 63 cars of green corn to eastern markets.

Ask C. H. Melton, once a poor farmer boy who has dug wealth out of the soil of Texas, what he knows about Texas.

Ask Ed C. Lassiter of Fairburn, Texas, who has a 380,000-acre ranch in five south Texas counties and has built up the largest Jersey dairy herd in the world, what he knows about the state.

Ask Nat Walker, aged 26, down near the Rio Grande, who is said to have made \$50,000 in three years growing spinach; ask Mrs. W. A. Mathews of Renner, Texas, who runs a small tenant farm; ask any Texan whether a native or adopted citizen, not only the large ranch owner or the successful truck grower farming a large acreage, why they prefer to live in Texas and what they think of its opportunities.

Texas still has ranches and farms of immense size, but large land holdings are being divided into smaller farms, for Texas now has over 466,000 farms as against 362,290 in 1900. It is this broader individual ownership and operation of former Texas farm tracts of large acreage

which is advancing agriculture and increasing diversification. Many communities a few years ago not even marked on the railroad map are today modern towns on modern highways. They have become the centers of rich agricultural regions. Other cities have sprung up as if by magic with the discovery of oil and have continued to grow with the development of the surrounding territory.

Backing the great agricultural activity of Texas is its rapidly expanding industrial development. According to the census of 1925 the value of Texas' manufactures amounted to \$1,238,000,000, or \$234,000,000 more than the value of its agricultural output that year. Truly a striking indication of the expansion and diversification under way in Texas.

Cotton manufacturing in Texas is increasing. In 1925 the value of cotton mill products was \$19,734,000 as compared with an output of \$2,815,000 in 1910. The furniture industry has more than doubled since 1910, now having an annual production of \$3,848,000. Texas has a great timber region and the production of lumber in 1925 was 1,578,000,000 cubic feet, ranking it with the larger lumber producing states of the south, which now supplies nearly one-half of the total lumber output of the country.

The value of the mineral output of Texas in 1925 was \$351,000,000, nearly 20 times its output of 1910. More than 163,000,000 barrels of petroleum were produced in Texas in 1926, which is more than half of what the whole country produced in 1910. Texas now produces 1,890,000 tons of sulphur, which is 99.9 per cent of all the sulphur mined in this country. Recent potash discoveries in Western Texas may mean the development of one of the world's greatest resources of fertilizer materials, the value of which to this country would be immeasurable. Among the mineral products in Texas are salt, gypsum, fuller's earth, clay, lime, building stone and granite, lead, zinc, quicksilver, asphalt, iron, coal and a variety of others as yet but little developed. In fuel resources Texas, in addition to its oil and gas, has a considerable coal area and lignite deposits of vast limitless extent. Texas mined over 1,000,000 tons of coal in 1926 and is known to have 8,000,000,000 tons of coal and 23,000,000,000 tons of lignite reserves.

In its power development, Texas, through the development of water resources and the utilization of lignite, is keeping pace with the demand of industry and is building a foundation for further expansion.

The financial growth of Texas, in addition to the hundreds of million dollars of outside capital annually invested in the state in order to develop and operate business of the magnitude now reached, is shown in the increase of \$903,000,000 in bank resources and \$668,000,000 in bank deposits since 1910. Last year the aggregate bank resources of Texas were \$1,276,763,000 and individual deposits were over \$864,000,000.

Through southern ports pass more than one-third of the foreign commerce of the United States. Texas plays an important role in this foreign trade. Texas ranks third in exports and sixth in imports in volume of tonnage handled by all the ports of the country. The total value of merchandise exported through Texas ports in 1926 were in excess of \$670,000,000, an amount greater than the south's total exports in 1910. Thru the Galveston district alone in 1926 the value of exports was \$513,825,000, exceeding by \$17,000,000 the combined value from all the Pacific coast ports.

With a railroad mileage of 5,332 and with modern highways the transportation facilities of Texas are keeping pace with its general development. Highway expenditures in the state in 1926 amounted to \$35,559,000, which is within \$23,000,000 of the aggregate highway expenditures of the entire country in 1924.

Public education in Texas is matching the advancement made by the state agricultural, industrial and commercial lines. Public school expenditures of Texas are now over \$55,000,000 annually, or five times their similar expenditures for 1910 and within \$25,000 of what the 16 southern states spent that year. The south as a whole expended for public education in 1924 \$364,863,000, or \$150,000,000 more than the entire country spent in 1900. More than 2 per cent of Texas' public educational expenditures was for new school buildings and equipment. In 1910 the number of pupils enrolled in Texas public schools was 821,831 and in 1924 there were 1,194,655 pupils. About 80 per cent of the state's population between five and 17 years of age were enrolled in public elementary and secondary schools. In 1914 Texas had 46,573

Oranges and Peaches

One of the most remarkable displays of oranges ever given in California was held recently at Anaheim, where the seventh annual Valencia orange show was held. Two peaches helped to enhance the beauty of this exhibit, which was one among hundreds of attractive displays. Miss Billie McCarthy (left) and Miss Violet Boege are the peaches.

students in public high and normal schools and 225,571 in 1924, or about five times as many as were enrolled 15 years ago. In addition there were enrolled in private schools and colleges of Texas more than 50,000 students. There is invested in land, buildings and equipment more than \$34,000,000 in the universities, colleges and professional schools of Texas.

A number of universities heavily endowed by the state or individuals or religious bodies give to Texas a remarkable power in educational work. The State university was many years ago endowed by the legislature with an immense area of public land. The income that the university is now receiving from oil on this land promises to make it perhaps the richest university in America.

But to attempt to catalogue the resources of Texas or to make people who have not been there the extent of its territory, the rapidity of its development in education, in industry, in agriculture, in commerce, in population and in wealth would be almost a hopeless task. I have simply sketched a few of the outstanding facts about Texas.

Father Lugs Papers, Pays for Law Course

(By The Associated Press.)  
CHAMPAIGN, Ill.—A 30-year-old "newsboy" with a wife and two children has won a doctor's degree in the college of law at the University of Illinois.

He is Dudley Woodbridge, and he has delivered the Champaign News-Gazette since 1917.

Sometimes Woodbridge studied as he walked his route, on which he averaged 20 miles a day. The \$1,600 in \$1,800 he earned each year as "paper boy" defrayed most of the expenses of his education.

He has accepted an assistant professorship of jurisprudence at William and Mary college, Williamsburg, Va.

TEXAS TO CHINA

Lieut. Tom Hardin (above) of Dallas, Tex., will attempt to fly from Dallas to Hongkong, China, in 144 hours to win the \$25,000 prize offered by William Easterwood, Jr., Dallas chewing gum magnate. Three stops are allowed on the trip. Lieut. Herbert Kindred of Dallas is to be Hardin's companion.

Cattle Steady, Hogs Higher, On K. C. Markets

KANSAS CITY STOCK YARDS, June 30.—Cattle prices today, with but few exceptions, were steady with last week's close. A car load of prime western Missouri steers weighing 1,397 pounds brought \$13.55, the highest price paid this year by 5 cents and other good to choice steers sold at \$12 to \$13. In some cases the medium to fairly good kinds were quoted weak. Mixed yearlings were stronger and cows weak. Hog prices were strong to 10 cents higher than last week's close, but 25 cents under last week's high point. Sheep and lambs were weak to 25 cents lower than Friday and \$1.50 lower than a week ago.

Receipts today were 10,000 cattle, 7,000 hogs, and 6,000 sheep, compared with 10,000 cattle, 6,000 hogs and 8,000 sheep a week ago, and 10,075 cattle, 9,025 hogs and 6,325 sheep a year ago.

Choice to prime grain fat steers continue in a strong position and the better grades of grass steers are in active demand. The plain to medium kinds are inclined to weaken. Only light receipts are in sight for the rest of this week and next Monday, July 4, will be a general holiday, so that no very liberal supplies are expected until the second week in July. Today the best fed steers here sold at \$12 to \$13.55; yearlings \$10.50 to \$12, and mixed yearlings \$10 to \$10.75.

Short fed steers brought \$9 to \$11.50 and grass fat steers \$7 to \$10.50. Texas cake fed steers sold at \$9 to \$11. Cows were quoted weak, spots lower. Heifers were steady. Veal calves were weak to 50 cents lower, with best bringing \$10 to \$11.

Good to choice stockers and feeders sold readily at strong prices. The medium to fairly good grades were steady. Receipts here continued moderate. A good many of the fleshy grassers are going back to the country for feeding.

Hog prices broke last week, but today there was a 10 cent rally the result of an active demand. Receipts here are below normal for this season of the year and will probably remain so for several weeks. A further advance in prices is expected. Today 170 to 240 pound hogs sold at \$8.60 to \$8.75; 240 to 310 pounds \$8.25 to \$8.65; packing sows \$7.25 to \$7.65; stags \$7 to \$7.50; stock hogs and pigs \$8.50 to \$9.25.

Lamb prices were quoted weak to 25 cents lower and sheep were barely steady. The general market has been in a decline for two weeks and lambs have been quoted off more than \$2 for the period. Today lambs sold at \$13.15 to \$13.50. No choice western lambs arrived. Yearlings brought \$9.75 to \$10.50; wethers \$7 to \$7.50; ewes \$5 to \$5.50.

Trade in horses and mules remains quiet at unchanged prices. Fall trade will begin early in August.

ALL IN THE FAMILY  
KINSTON, N. C.—North Carolina has a champion family puzzle. A farmer near here married another farmer's daughter. Both had been married before. The father-in-law then married the daughter of his son-in-law. The sons of the one thus became brothers-in-law of their own grandfather.

## FEDERAL EXPERTS SPECULATE ON COTTON'S POSSIBLE FUTURE

Top—Typical American cotton field at picking time. Below—River steamer with cargo of baled cotton.

WASHINGTON, June 30. (AP)—Federal authorities admit the 1927 cotton crop is subject to interesting developments.

First, it is following a year of heaviest production in the history of America's cotton industry.

Furthermore, no one knows what degree of success will attend late planting in the Mississippi delta.

O. F. Cook, United States senior botanist, questions satisfactory return from fields seeded as flood waters retreated. Although farmers have learned practical cultivation methods that advance the date of maturity as much as two weeks, Cook doubts the advisability of extensive risks on second planting.

Dr. O. C. Stine, agricultural economist foresees crop conditions similar to those of 1911-12.

"The large 15-million bale crop of 1911," he recalls, "was followed by a 13-million bale crop in 1912. Last year this country produced 13 million bales. Naturally, therefore, the trend now would be toward a lighter crop.

"Acreage has been reduced because of the surplus cotton supply. And, as in 1912, the present crop

has suffered from flood. It is probable, however, that the flood's influence on market conditions will not be so pronounced when the new crop is harvested as it was a few weeks ago.

"Unless the coming crop is heavier than anticipated, 1927 prices likely will be comparable to those of 1925, when cotton sold for 16 cents per pound. Last year's heavy supply forced quotations down to 14 cents.

"It is estimated the United States will consume more than 6,000,000 bales this year and will export more than 10,000,000. There is a cotton surplus on hand, and if the 1927 crop were to approximate last year's, the market price likely would drop to 10 cents per pound.

"Texas and Oklahoma might produce it at that price and still make a profit, but states east of the Mississippi would lose heavily."

Present low prices for short fibre and relatively high prices for long staples have produced a definite reaction, plant industry officials say.

South Carolina, Georgia and Florida are looking forward to re-introduction of Sea Island cotton, now

virtually extinct. These states could plant thousands of acres of the long-staple species if seed were available for commercial use.

Sea Island popularly is supposed to have passed out of the South because of boll weevil damage. Economists point out that low prices for long-staple, which preceded boll weevil attack, was a dominant factor in discouraging production. A reconditioned market, and weevil control, offer an opportunity to renew the old favorite.

Recognizing the probability of a return to the fine, strong, long-fibre Sea Island, cotton experts have warned that to keep it free of contamination it will be necessary to restrict all cotton to the one type in sections growing it.

Pima, famous long-staple cotton of the Nile, holds promise for Arizona, and, because of its climatic demands, virtually for Arizona alone.

Seed introduced from Egypt is declared to have been improved in Arizona to such perfection that British experts proclaim it better than the original and want Arizona seed for use in the Nile valley.

### Amusements

HOLLYWOOD, Cal.—Doris Hardy isn't a motion picture actress, but there perhaps are girls who would envy the job for the one she holds at First National studio.

Doris is a professional shopper, and all she does is to fit from one expensive store to another looking for pretty things to put on Billie Dove, Mary Astor and other stars. When she finds something she likes, she merely murmurs, "charge it."

It isn't quite as easy as it sounds, for when Doris motors for a day among the shops she has a list of a hundred or more items she must find and all must be right. She buys silks by the bolt, beads and paste jewels by the pound, and all with a keen eye to their photographic value.

The flow of new words out of Hollywood continues unabated. One of the latests is "pinalight", meaning a modified baby spotlight which throws a needle-like ray of light used for picking out and emphasizing details such as the ring on an actor's finger, a scar under the villain's eye or a hole in the heroine's stocking.

Trained animals are a nuisance, and professional actors are non essential in the making of good motion pictures, says Ernest B. Schoedsack, who, with Merian C. Cooper, made a jungle melodrama in Siam.

Schoedsack is sure he could venture into the "wilds" of a big city, such as New York, with no more equipment than he and Cooper carried into the Siamese jungle and come out with a good picture without using any actors save the natives in their natural state.

"Isn't a monkey funny enough as he actually is, doing what he actually does in real life?" Schoedsack remarked. "Why train him to do something unlike himself in front

of the camera?"

At least one member of the motion picture colony is loyal to the slogan, "Hollywood sets the styles."

Rosabelle Laemmle, daughter of the producer, Carl Laemmle, wears gowns designed by Johanna Mathieson at the Universal studio.

### Miss Walstad Is Hostess

Miss Louise Walstad entertained a few of her friends with a little dinner party Tuesday evening at her served games of various kinds were enjoyed by Misses Theo Post, Christine Cook, Francis Finley, Lucille Cole, Harriet Hunkapillar, and Louise Walstad.

## This ends all argument as to the flat wall paint to use

On hospital walls for 5 years  
Velour Finish has been washed and washed and washed

VELOUR Finished walls in the New York Hospital, New York City, after five years of constant cleaning are still as beautiful as ever.

This test certainly proves the washability and durability of Velour Finish. Made in 22 lovely colors, it is easy to apply and economical to use.

We sell it because we can guarantee it to satisfy you.

Thompson Hdwe. Company

## Prohibition Is Strongly Felt In Texas, Says Officer

(By The Associated Press.)

FORT WORTH, June 30.—The prohibition enforcement forces of the country are slowly but surely getting the upper hand in their fight with bootleggers and liquor law violators, and the public will be more than ever aware of it in the forthcoming year, Frank Wright, administrator for district 17, which includes Texas and Oklahoma, said here.

He cited the report of his district for the month of May in support of his contentions that enforcement agencies were making decided headway in their conflict with prohibition law evaders.

During May, 150 stills of an average capacity of 117 and one half gallons were seized, along with 39 automobiles, 6,212 5/6 gallons of liquor, and 63,261 gallons of mash. More than 400 separate cases were involved, and bonds of arrested persons totalled \$335,900, according to the report.

The largest number of cases handled by Wright's department was 92 in the North Texas division of the district, and Eastern Oklahoma was a close second with 90, but the Eastern Oklahoma division yielded 32 stills, or nearly twice as many as any other division.

The largest number of stills, 18, in this state was seized in West Texas. Stills seized in other Texas divisions were as follows: North Texas 14, South Texas 15, and East Texas 8. Eleven of the twenty automobiles seized in Texas were in the North Texas division, according to the report.

"This is a good report," said Wright, "and is significant of the progress being made against law violators, especially so when to our total seizures are added those of the State and county officers.

Enforcement work will be more effective in the future because of the better type of prohibition agents who are constantly being drawn into the service to replace those unfitted to cope with the often brainy law evaders.

"We are gradually building up our forces with men like those found in the secret service," Wright said, "men who can match wits with the smartest criminals and win most of the time. That kind of man is hard to get, and hard to hold, but we are getting him, and his acquisition will be felt during the next year."

With the gathering into forces of skilled officers of the detective type, more and more attention will be given to the big bootlegger and booze-owner, the "higher-up", who for a long time has escaped the law because the men seeking him could not often measure their detecting skill with his prowess in evasiveness,

Wright said.

Civil service regulations of the prohibition enforcement forces, and the agitation of the liquor question are other factors which will help the agents this year, in Wright's opinion.

The new civil service laws, under which all prohibition enforcement employes recently too examinations, will build up the morale of the department, in Wright's opinion.
