

# Pampa Daily News

VOL. 1, NO. 91.

PAMPA, GRAY COUNTY, TEXAS,

THURSDAY EVENING, JUNE 23, 1927.

PRICE FIVE CENTS.

## BIG TELEPHONE PLANT PLANNED

### HOSPITAL HAS BUILDING WITH IDEAL PLANS

Institution Lacks Only Equipment To Be Outstanding

SERVES WIDE PAMPA AREA

Director Has "Eyes" On All Rooms At Same Time

A trip through Pampa hospital will convince a visitor that the institution, with the exception of much needed equipment, is well conceived and beautifully constructed, and is ready to serve a wide territory.

The big building will be formally opened Sunday, when all local people are invited to inspect it.

With more than \$40,000 received and paid out, the treasury is empty and \$25,000 must be raised at once to pay outstanding accounts and buy the necessary hospital equipment. The local depot holds \$1,600 in bed and kitchen equipment which not been paid out, and a vitally necessary furniture order amounting to \$6,000 has been held up at the factory.

No Promotion Expense.

More than a score of stockholders have taken out stock sold, and all of this amount has been raised without any per cent going to any individual. Every cent subscribed has gone into the building, the records show. The institution is a contribution to Pampa and the region surrounding the city. It is open to all people and all physicians on the same basis, whether they are stockholders or even local citizens.

Up to last night 34 cases had been received and the equipment, mostly borrowed from a dozen local sources, is barely adequate to care for the present demand. Should the hospital be fully equipped, indications are that it would be full within a few weeks, although the capacity is 60 persons.

Source of Business.

Patients are coming from Mobeetle, Miami, Allamore, Borger, Roxana and other points within a wide radius of Pampa. Amarillo offers the only other hospital facilities in the panhandle oil field, and Pampa hospital is being favored by nearly all of the major oil companies, who send not only their employes, but the families of their men.

The hospital very pleasing from every angle, and when the lawn is developed, the property will be a scenic part of the city. It was built by the Chas. H. Sharpe construction company of Pampa.

From the first floor to the third the building has been carefully planned from the standpoint of hospital convenience by W. L. McAtee and company of Pampa. On the first floor is the steam heating plant, with its thermostat control, which keeps the entire building at an even temperature. There are a number of large, patient rooms which are identical to those above, except that some plumbing appears, and they are cheaper than the regular rooms but higher than the wards.

Many Conveniences.

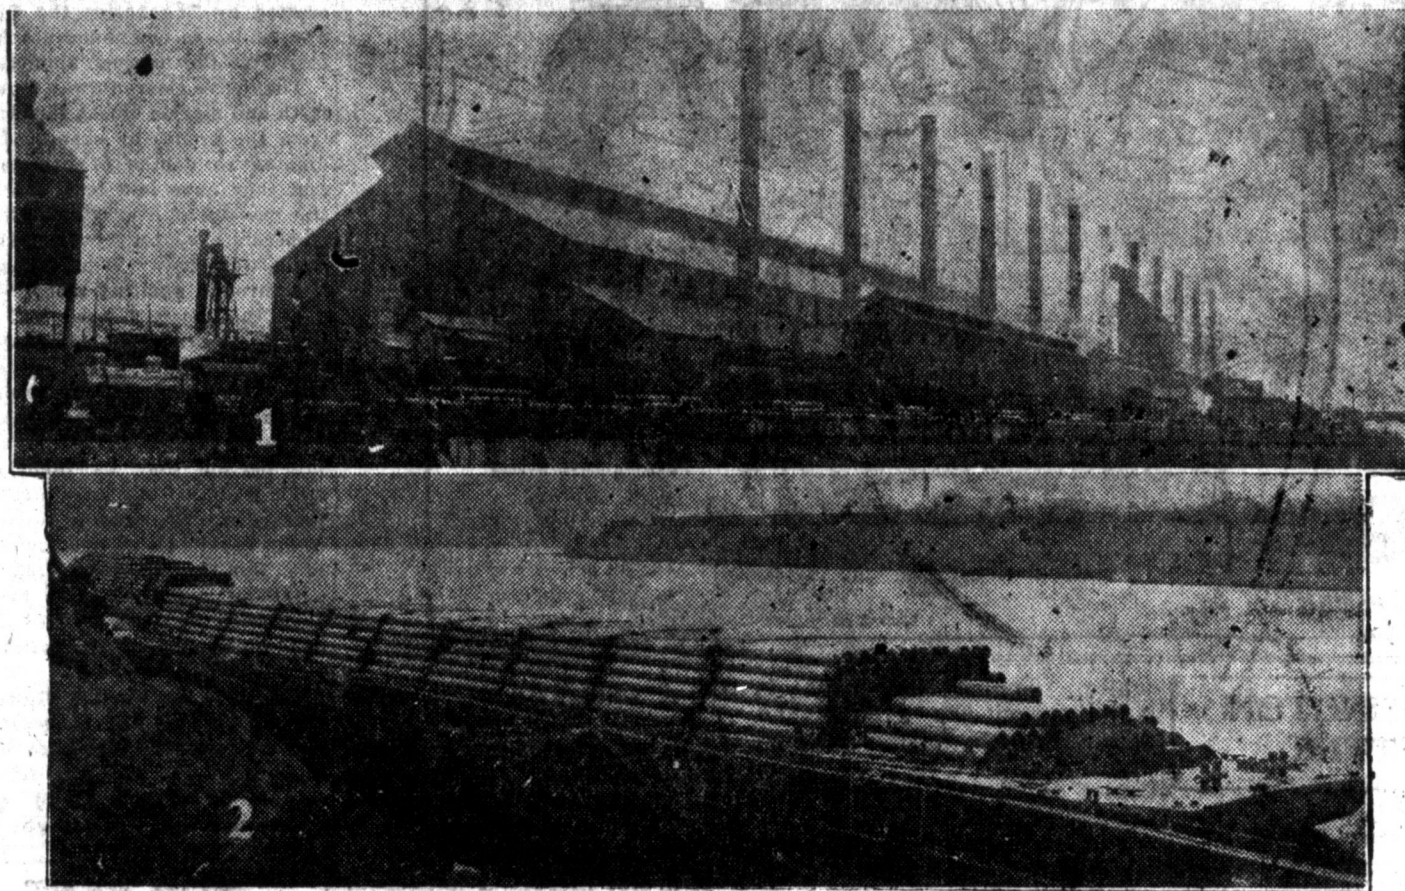

This floor also has the x-ray and developing rooms, the laboratory, nurses dining room, kitchen, linen closets and many large storage closets.

The kitchen contains a very large refrigerator, patients' tray rack, hot table, gas incinerator, large pantry, dumb waiter and large gas stove. Service is individual, each tray being marked with name and diet and sent above in the dumb waiter.

The second floor contains the secretary's and superintendent's offices, sewing room, reception room and main communication system. Over the main desk is a flash system.

(See HOSPITAL—Page 4, Col. 4.)

### PIPE FOR HUGE LINE FROM PAMPA FIELD

First shipment, by (1) rail and (2) river, of \$4,000,000 order of 20-inch pipe for Empire Gas & Fuel company's gas pipe line.

Fifty thousand tons of pipe—100,000,000 pounds—will be used in the construction of the 20-inch natural gas pipe line the Empire Gas & Fuel company and affiliated companies are building to transport Panhandle gas to Kansas and Mis-

souri. The estimated cost of this pipe is \$4,000,000.

The largest pipe mills in the United States are exerting their maximum capacity for the manufacture of this order.

Not only is it a night and day job

for these mills to keep up with this order, but every type of transportation adapted to handling heavy freight such as this is being utilized. Above is shown pictures of two of these methods. The trainload, the first of this order, is being loaded

at Youngstown, Ohio, and a string of barges loaded at Pittsburgh, Pa., for transport down the Allegheny, Ohio and Mississippi rivers to Memphis, there to be transported by rail to the job.

### SYSTEM MAY BE BUILT AT \$100,000 COST

Company Intends To Install Flash Method

OFFICIALS AT MEETING HERE

Council Offers Help In Expansion Of The Equipment

An expansion program involving an expenditure of possibly \$100,000 was tentatively proposed to the city council by officials of the Southwestern Bell Telephone company in a meeting here yesterday afternoon.

Under the plan, the telephone system here would be enlarged to care for a city of 50,000 population, and probably a company building would be erected.

The project was suggested to the council to obtain the viewpoint of that body toward a revision of the local rates for service. After a discussion, the council passed a resolution approving a suggested rate schedule to take effect following the installation of extensive improvements. It was stated that the company has not obtained a fair return on its investment in the last few years.

The council's resolution, after citing the proposal to spend \$100,000 here, says it "recognizes the right of the Southwestern Bell Telephone company, upon completion of the work proposed—the installing of the new switchboard and certain outside plant work—to establish the following rates:

Business, one-party — \$5 per month.  
Residence, one-party—\$2.75 per month.

Two-party selective—\$2.25.  
Business extension—\$1.  
Residence extension—75c.

Provided these rates do not produce more than a fair return upon the fair value of its telephone exchange.

The council reserved the right to inquire into and regulate in a lawful manner the telephone rates at all times.

Members of the council were emphatic in their statements that present and past telephone service in Pampa has been very unsatisfactory, and that local people wish immediate improvement of the service.

The company's proposed construction program will be taken up by officials of the general organization, and appropriations made. The battery, or flash system, eliminating ringing, will be installed, and on the basis of this promise the new Schneider hotel was wired for the battery service.

The work would require several months to complete and put into operation.

### Farmer Shoots Man Charged With Offense On Girl

DUNCAN, Okla., June 23.—Arch Gilbreath, farmer, who yesterday killed the alleged attacker of his daughter in the district court room here, was today released on bond of \$10,000.

Gilbreath was formally charged today with the murder of B. F. Cox, whom he shot to death as Cox's trial on charges of assault was opening.

The county board of equalization is meeting at LeFors today and tomorrow to receive complaints and receive notification of errors.

The board consists of the road commissioners of Gray county, W. A. Taylor, C. W. Bowers, N. M. Newman and T. O. Kirby.

### New Gas Bureau Expected To Be Very Important

BRECKENRIDGE, June 23.—The recently organized oil and gas bureau of the West Texas Chamber of Commerce, formed at Breckenridge a few days ago by representative oil men of West Texas and officials of the West Texas Chamber of Commerce, is soon to develop into one of the major activities of the regional organization sponsoring it, according to J. E. Thompson, prominent banker of this city and a member of the bureau.

Thompson was in Wichita Falls Monday to attend the initial business conference of the bureau and reports that enthusiasm dominated the session. W. B. Hamilton, Wichita Falls operator and capitalist, is chairman of the bureau.

### College Heads To Award Prizes For East Texas C. of C.

(By The Associated Press.)  
LONGVIEW, June 23.—Doctors H. F. Estill of Huntsville, E. S. Whitley of Commerce and A. W. Byrdwell of Naogdoches, presidents of State Teachers colleges, have been named to make awards of prizes totaling \$1,200 offered by the East Texas Chamber of Commerce in its membership campaign, an announcement made here today said.

### Plans for Big Building Considered By College Head

CANYON, June 23.—Tentative plans are being considered by President J. A. Hill of the West Texas State Teachers college for the new \$300,000 education building, for which appropriation was made in the special session of the Legislature. Work will begin upon the new structure about September 1 and the dedication of the new building is being planned for July 4, 1928.

President Hill says that he wishes the new education building to embody itself all the best ideas that have been worked out in training school construction.

The building will be the same style of architecture and built of the same material as the Administration building.

### Auto Thief and 2 Officers Die In Chicago Fight

(By The Associated Press.)  
CHICAGO, Ill., June 23.—Death mantled a triple slaying today in a north side alley with no witnesses left to tell what happened except a mystery girl who fled.

Two policemen "shot it out" with an automobile thief and all three were killed. The dead are Sergeant Thomas Kehos, 52; Officer James Farley, 32; and Dan Leathers.

"There was a woman in the car with him," Farley gasped.

### Wives of Imprisoned Guards May Ask Governor's Aid

LANSING, Kan., June 23.—Wives of 14 guards held captives by munition convicts in a Kansas coal mine penitentiary here, are becoming anxious over the safety of their husbands and may appeal to Governor Paulen to do something to get them free, it was learned today.

### Texans Interested In Chicago Board Of Trade Today

CHICAGO, June 23.—Samuel Arnot, chairman of the cotton committee of the Chicago Board of Trade, told a group of Texans on the Good Will tour today that the board desires to aid in marketing Texas crops.

Texans found the cotton market here of especial interest.

### Fifteen Escaped Convicts Caught; Others Found

(By The Associated Press.)  
MADISONVILLE, June 23.—Fifteen of the 35 convicts who escaped from the Ferguson state farm Tuesday night have been recaptured today. Two of the men were taken near here last night, while two others were found this morning near Leona. Reports from Leona were that two other prisoners were surrounded in the woods near there, and that the posse was closing in on them.

### Rabbit Meat Staples On California Menu

LOS ANGELES, Calif. (AP)—Slaughterhouses are operated in the Los Angeles district where from 25,000 to 50,000 domestic rabbits are killed, dressed and marketed each month. Still the demand keeps ahead of the supply.

More than \$1,000,000 worth of dressed rabbit was marketed in the city of Los Angeles in 1926. The meat is served at hotels and restaurants along with pork and beef.

The business is so profitable that some southern California breeders keep from 1,000 to 5,000 rabbits.

### Little Progress Made On Plans To Reduce Navies

(By The Associated Press.)  
GENEVA, June 23.—Lord Robert Cecil, British delegate to the naval conference, and Hugh Gibson, chief of the American delegation, held a private meeting today to discuss proposals of their respective countries for further naval limitations.

No advance toward an eventual agreement was made at the meeting. The most reliable information is that both confined themselves to explanations and defense of their respective proposals.

### Three Seamen Are Missing After Wreck

(By The Associated Press.)  
TRURO, Mass., June 23.—Three members of the crew of the fishing schooner "Surg" are missing and believed to have drowned after she had been sunk in a collision with the Clyde line steamer "Ozark" five miles off this section of Cape Cod today.

The other 19 were rescued by the Ozark, which was damaged and had to be beached.

### LINDY IN WASHINGTON

WASHINGTON, June 23. (AP)—Charles Lindbergh landed at Bollingfield today, having flown here from Dayton, O., in an army plane.

### BYRD READY TO HOP OFF

Will Take Flight At Clearing Of Weather

(By The Associated Press.)  
ROOSEVELT FIELD, June 23.—The monoplane America will be taken from its hangar tonight and drawn to the top of the runway preparatory to hop off for France at 4 o'clock tomorrow morning.

"There is a general clearing up of the weather," Commander Byrd told newspaper men today. "And while there is no certainty just now that we will take off tomorrow morning, we will get ready."

### Rio Grande On Rampage Today

(By The Associated Press.)  
BROWNSVILLE, June 23.—Flooding of the lowlands on both sides of the Rio Grande as the result of cloudbursts for a distance of several hundred miles up the international stream was threatened today. Highways in many instances were closed in the lower valleys.

The greatest damage was reported from Carmago, state of Tamaulipas, Mexico. Unless the rain continues no damage is expected here, although there was a possibility that Santa Rosa, the suburb of Matamoros, might be flooded when the crest of the rise reaches there.

### INFANT DIES

The infant daughter of Mr. and Mrs. C. C. Cook died last night soon after birth and was buried at Fairview cemetery this afternoon.

### Legion Asks All Businesses To Fly Flags Saturday

The American Legion is having flag sockets placed in front of all stores, business places, and any residences that wish to have them.

They expect to be finished by Saturday, which will be a local flag day to see how the city looks in gala array. Anyone wishing to have a socket placed or to purchase a flag may notify the American Legion headquarters or Morris Drug store.

Pampa Daily News

Published every evening except Saturday, and on Sunday morning by the News-Review Publishing company, Inc., at 155 West Foster avenue.

The only newspaper adequately covering Pampa and Gray county events and the Pampa oil field.

It is not the intention of this newspaper to injure any individual, firm, or corporation, and corrections will be made, when warranted, as promptly as was the wrongfully published reference or article.

Telephone 100, all departments

TRAINS SHOULD BE WARNED AT CROSSING

There have been instances lately where trains have obstructed local crossings far longer than is legal or necessary.

While traffic is heavy here, train men can avoid most of the long delays caused to motorists and pedestrians. In many cases it will be found that carelessness is at the basis of the annoyance.

A little remonstrance now and then will keep the traffic avenues open, and unless these needless delays are stopped, it is apparent that something will have to be done about it.

IMMIGRATION LAW IS DENOUNCED AGAIN

Commercial executives today heard a speech against the bill limiting Mexican immigration to the quota basis.

This question was put before chambers of commerce last fall, but most of them professed ignorance of immigration principles and failed to lobby. Now it seems apparent that the flow of labor across the border will be restricted in a manner detrimental to the state.

This seems another example of passing laws without there being a real necessity as a basis. Until Mexican immigration becomes a real menace, it seems doubtful that so near a neighbor should be placed on the same basis as a European or Asiatic country.

TWINKLES

Pampa is fortunate: her only water controversy is with the weather man.

Furthermore, if the Black Hills haven't a chamber of commerce, how can fellows like Homer D. Wade stay away from there?

Far from being "in the red" in any sense, the Panhandle is still "in the white" spot of prosperity on the nation's economic maps.

An actor signed a contract good until "she became sophisticated." Yet it looks like most of them are paid to look that way.

Hadn't the Chinese better take lessons in giving safe and sane receptions before we fly to Hongkong?

You First, My Dear Gaston

WASHINGTON LETTER

BY RODNEY DUTCHER
NEA Service-Writer.

WASHINGTON. — Aviators keep right on setting new records for altitude, distance, endurance and whatnot, but if it were not for the barograph these records wouldn't count.

The barograph is the small instrument which proves that the record-breaking pilots are not fibbing. If Lindbergh or Chamberlin had stopped in Newfoundland for a rest and then claimed to have made a non-stop flight, the tracings on the barograph's little chart would have given them away.

One of the very last things that happens when a flier starts off across the Atlantic or up for a new altitude record is the sealing of the barograph.

Most of this sealing has been done by Carl F. Schory, secretary of the contest committee of the National Aeronautic association, which, in cooperation with the Federation Aeronautique Internationale, of which it is a member, determines the authenticity of records.

Schory, for instance, sealed the barographs on the Spirit of St. Louis, the Columbia-Chamberlin's plane and the Sikorsky plane in which Rene Fonck failed so tragically to start the New York-Paris hop last year.

The barograph is a steel box eight or 10 inches long, with delicate but simple mechanism which records both altitude and duration of the flight. At one end on the steel bottom of the box, slowly revolves an upright drum, on which is rolled a chart. Resting on the drum is a finely pointed pen, the other end of which is attached to a series of vacuumed diaphragms at the other end of the frame. As the plane attains altitude, the atmospheric pressure lessens. The diaphragms expand, controlling the pen and pushing it upwards on the drum, making a tracing on

while. When the plane is standing on the ground the drum shows a horizontal line and, of course, if the plane comes down to the ground after a flight the fact is duly recorded by the sinking pen. The drum makes a revolution every hour, every two hours or whatever time is desired.

To seal this machine after the cover is dropped down over it, the same method is used as in sealing a trunk for shipment. A string or wire is tied around it and the seal welded on so that it cannot be removed with detection. In flight, the barograph is suspended on springs and rubber shock absorbers so that the vibration will not affect its record.

After a record flight, the barograph is generally taken to the Bureau of Standards here for calibration by W. G. Brombacher.

PRESS FORUM

Automobile clubs are getting after the "road hog." The secretary of one of the biggest clubs in the country pronounces him a serious menace to traffic, whether on city street or country highway. He asks the police authorities to wage war against the "selfish 10-miles-an-hour driver who refuses to give the other motorist a chance on the road," just as war is waged against the motorist who drives at excessive speed.

Every normal driver knows the harm done by the stubborn fellow who insists on getting over on the left, out in the middle of the road, and then poking along at less than the normal traffic speed, refusing to budge from his place in spite of honking horn and bawlsouts and ugly looks.

The place for such drivers, of course, is on the right over against the curb, wherever the road is wide enough for two lines of traffic in each direction. If they prefer to drive in the middle of the road, for any reason, when going slowly, they should at least move over to let by them, drivers

who are in more of a hurry. The traffic laws almost everywhere provide that a driver must do this, when requested by a signal from a car behind, but the rule is seldom enforced.

It is not merely a matter of courtesy, but a matter of keeping traffic moving, and a matter of safety. Any highway will accommodate twice as many cars if none of them block it by hogging the road. And about half the accidents in city and country, are caused by the drivers who persist in getting in the way and refuse to yield to others.

Turks Dig Into Ancient Ruins To Restore Famed Golden Gate

(By The Associated Press.)
CONSTANTINOPLE, June 23.—Stirred by the example of the British Archaeological expedition which is working on the Hippodrome, the Turks have begun their own first important excavation here.

Theirs is a case of digging up old scores, for they have undertaken to restore the famed Golden Gate, symbol of triumph of their traditional enemies, the Greek lords of the Byzantine Empire.

Turkish archaeologists, led by Macridy Bey, sub director of the Turkish National Museum, began by removing the bricks which the Ottoman conquerors used to block up the three arches of the triumphal gate erected by Theodosius the Great in 384 A. D., to commemorate his victory over the usurper Maximus.

They have cleared away mounds of earth and marble blocks thrown down from the arches by earthquakes. By digging to depths of one to three feet they have laid bare the Byzantine pavement over which Christian emperors, victors over barbarian hosts, were drawn in triumphal chariots through exulting mobs.

Of the many statues and reliefs which are known to have adorned the Golden Gate no trace remains, and it is with the probability of making important finds that the Turks intend to excavate the whole precinct as long as their meager funds permit. They have already unearthed a small marble torso which is the key to an archaeological mystery. For this torso is a fragment of a famous frieze which is known to have been in place as late as 1621 and which history thereafter never mentions.

In 1621, Sir Thomas Rowe, British ambassador to Constantinople, was requested by the Duke of Buckingham to purchase the frieze and ship it to England. The sultan's treasurer rode out one night to supervise the removal of the frieze. But the population got wind of the transaction, poured out to the Golden Gate and stoned the treasurer into feeing for safety to the palace whence he issued orders calling off the deal with the English.

What became of the frieze thereafter no one knows, but the fragment brought to light by the Turkish excavators indicates that it was not subsequently sent out of the country, but that it was probably buried by earthquakes and that much of it may yet be found.

Lefty Reynolds, local baseball player and workin at Gatton Tire shop, had both his eyes injured while changing a tire but is able to be out.

Inside Information on Tires

We find out which tires are the best by looking inside of a lot of them—all kinds—brought in for repairs. And here's the inside information we get—Goodrich Silvertowns are our first choice for sturdy strength—long life—real mileage at low cost. Let us save you money on your next set.

SPORT TALK

The Oilers are playing the fast Berger Oilers today and look good for a win over the Berger league leaders.

A negro ball game will be played at the home park Friday and Saturday between Amarillo and an Oklahoma City team.

The Grays have not scheduled a game for Sunday and will wait until some action is taken by the Chamber of Commerce.

Jack Dempsey will meet Jack Sharkey on the night of July 21 to see who will meet Gene Tunney for the world's championship.

Amarillo won a game yesterday, but of course had to have the usual run of errors. Bob Clarke is due to pitch today and if given any support should win a game.

Texans Defeat Denver, Slugging Out Fourteen Hits

DENVER, June 23.—In defeating the locals here yesterday, the Amarillo Texans won their third game of a long road trip.

Box score for the game between Amarillo and Denver.

Two-base hits, Connelly, Davis, Wells, Swansboro, O'Brien, Sacrifices, Gunther, Kelly...

Shortstop Trade Recalls Old Days

WASHINGTON—It's getting to be a regular shortstop parade on the Washington ball club.

Before Myer was assigned the shortfield job, the Senators had Roger Peckinpaugh, Donie Bush and Everett Scott.

McBride couldn't hit, however. He was in the .200 class. In one season's play he turned in the remarkably low average of .197 for a regular.

McBride was always in shape. During his first seven years in the majors he played in 150 games or more each campaign.

New Stars In Tennis Firmament

UPPER RIGHT, CECILIA AUSSEM. LOWER LEFT, "BOBBY" HEINE. RIGHT, BETTY NUTHALL.

Amarillo Athletic Club To Extend Its Membership

(Special to The News.) AMARILLO, June 23.—The Amarillo Athletic club, a \$250,000 organization, and one of the wealthiest and most exclusive clubs in the nation...

The club, metropolitan in every respect, expects to move into its \$165,000 home at 205-207 Polk street about August 1.

The organization, in addition to participating in the development of a higher class of amateur sports in the Panhandle, has a social and business position which is even now becoming a factor among its exclusive list of 400 resident members.

WIMBLEDON, Eng. (AP)—Of the new women stars who have flashed across the tennis firmament since the beginning of this season, experts are predicting the brightest futures for Fraulene Cecilia Aussem of Germany and Miss Bobby Heine of South Africa.

Fraulene Aussem emerged from obscurity by eclipsing the Wimbledon star, Miss H. Contostavlos, during The 17-year-old Bobby Heine eliminated the colorful Lili D'Alvarez, Wimbledon finalist of last year, in the same show.

Miss Heine is the product of the South African veldt. She learned to play tennis by knocking a ball against a stable wall on her father's farm.

Both Miss Heine and Fraulene Aussem expect to take part in the Wimbledon championships. Miss Betty Nuthall, sometimes called the "English Lenglen," will appear in the singles, in the women's doubles, partnered by Mrs. L. A. Godfree, and in the mixed doubles, partnered by H. W. Austip.

Arkansas Team Wins Rifle Championship (By The Associated Press.) FAYETTEVILLE, Ark.—The Razorbacks of the University of Arkansas are the new intercollegiate rifle champions of the United States, having led 32 other colleges in the country.

In announcing the award, the War department said the university team had scored 7,916 points. Second place went to the University of Missouri.

HARTFORD, Conn.—Judge Kenneth Mountain Landis, high commissioner of baseball, at a recent luncheon here in his honor challenged George Wright of Boston, big league shortstop of the Cincinnati team in 1869, another guest, to a golf match in 1947 at the Hartford Golf club.

INDIANAPOLIS, (AP)—Captain Edward V. Rickenbacker, America's world war ace, is mortally afraid of fire. He told of the phobia here after having watched Norman Batten of Brooklyn, N. Y., steer his flaming automobile to a place of safety during

the 500-mile Memorial Day race. "As Batten came down the track I called at the top of my voice for him to jump," Rickenbacker said.

Be it ordained by the City Council of the City of Pampa.

That there shall be and there is hereby created a police department in the City of Pampa, Texas, which shall be composed, regulated and controlled as follows, to-wit:

3. There shall be appointed a chief of police and such other officers as may be deemed necessary or proper, who shall hold their office upon good behavior from month to month, subject to the wish and will of the police commissioner who shall have authority to hire and discharge any policeman or police chief for cause at any time.

**Ford Plans For New Car Stolen From Ad Agency**

Denial of reports about the new Ford models to be placed on the market next fall are made on the News today in a telegram from N. W. Ayer and Son of Philadelphia, advertising consultants of the Ford Motor company.

According to the message to the News, certain preliminary advertisements regarding the new car have been stolen from the advertising office, and erroneous impressions have been created by these articles.

Fearing that specifications may be misrepresented and misunderstood by those possessing the ads, the company is anxious to warn the public against unauthorized announcements or news stories.

According to the advertising agency, the plans for the car are not complete, and alleged specifications are untruthful.

**CHEMISTRY TRIUMPHS WIN WOMEN POSTS ON INTERNATIONAL FACULTY**

Left to right, Miss Emma P. Carr and Miss Marie Farnsworth, first women appointed to international faculty of the Institute of Chemistry at Penn State college.

NEW YORK (AP)—Women are winning fresh triumphs in chemistry.

Two have been named to the international faculty in the new Institute of Chemistry of the American Chemical Society. For one month beginning July 4 the institute will open its doors to chemists, physicians and lay students of all countries at Pennsylvania State College.

Dr. Emma P. Carr, head of the department of chemistry in Mt. Holyoke College, and Dr. Marie Farnsworth, instructor in chemistry in New York University, will be associated with representatives of the faculties of American, French, British and German institutions.

Mrs. Farnsworth will conduct graduate work in analytical chemistry. Miss Carr will teach physical chemistry.

Miss Farnsworth predicts rapid advances in the use of the X-Ray. "Now widely used in medicine and industry," she says, "X-Ray will show its greatest value in the diagnosis of disease and in the treatment of cancer and skin afflictions."

"It is not easy for women to enter chemistry," she adds. "But there are jobs for those who are good. This means to know your subject thoroughly, every phase of it, and to have an agreeable personality."

Miss Farnsworth is the daughter of a Missouri banker. She took her Ph. D. degree at the University of Chicago, and taught for a year in Iowa State College. Three years were spent in research in non-metallic minerals and the X-Ray at the United States Bureau of Mines, New Brunswick, N. J., where she was the only woman.

Writing abstracts for the chief chemist secured her appointment as his assistant. A report of her X-Ray study of limes was presented to the scientific world by the American Chemical Society. Later she prosecuted special X-Ray studies at the Massachusetts Institute of Technology. Last Fall she joined the faculty of New York University.

**SOCIAL NEWS { Phone 72 Mornings**

Mrs. Joe M. Smith will entertain with bridge at her home Friday afternoon, honoring Mrs. Maurice Finney's house guest, Miss Marguerite McDonald and Mrs. Lester Chiles of Fort Smith, Ark.

C. B. Barnard is in Amarillo transacting business.

The 10-year-old Cassidy child who lives in a tourist camp south of town was bitten by a mad dog Wednesday. The child is receiving care by a physician.

Mr. and Mrs. W. L. Woodward and Mr. and Mrs. Carl Kingsbery left this morning for an overland trip in the Woodward's new car, to Santa Anna and points in South Texas. They are to be gone several days.

H. L. Ledrick, Jr., and Leo Salsbury have gone to the Ledrick ranch to spend two weeks or more vacation.

Dr. E. A. Elliff spent Wednesday in Spearman on professional business.

Mrs. John Prince of Kingsmill was in the city today.

Elmer Moore of Kansas City is here visiting with friends.

W. M. Lewright returned from Austin Wednesday, where he has been transacting legal business.

W. C. Upton is in Amarillo today on business.

Mrs. Edith Jones of Raton, N. M., is here visiting on the Joyce ranch, which is about 25 miles north of town.

Carl Anderson, who has just graduated from Harvard, stopped off here to visit with Mr. and Mrs. George Gill and Miss Lucille Roundtree on the Joyce ranch while enroute to his home in Denver, Colo.

The Friday 13 Bridge club will meet with Mrs. Arthur Holloway in a 1 o'clock luncheon at the Adams Coffee shop Friday.

Miss Lucille Roundtree, Mrs. George Gill and Carl Anderson motored to Borger Wednesday.

Henry L. Lemons, general contractor, made a business trip to Amarillo yesterday.

Morris Levine, manager of the Peoples' Store, is in Wichita Falls on business.

J. B. Patterson, P. K. Baker, and Mr. Caldwell, of the Texas branch of the Southwestern Bell Telephone company, were in Pampa yesterday looking over the plans to install new quarters here.

G. C. Malone of the Malone Furniture and Undertaking company is on a buying trip to Wichita, Kans.

Thomas Y. Pickett, head of the Thomas Y. Pickett company, accountants of Dallas, is in the city this week on business.

**Miss Davis Gives Theatre Party**

Miss Margaret Davis entertained a group of friends with a theatre party on last Monday evening.

Those present were Misses Allie Gibbs, of Newcastle; Inez Dunn, Edith Pearson, Edna Bird, Louise Press, Georgia and Ruby Quest, Bonnie Davis, Helen Sullivan, Margaret Davis and Mrs. W. P. Davis.

**CHURCHES**

**Presbyterian Church**  
The Rev. David J. Murry of Honey Grove will preach Sunday at 11 a. m. at the Rex theatre. Sunday school will be conducted there at 10 a. m. Every Presbyterian in the community should hear Mr. Murry Sunday.

Everyone is invited to worship with us.  
W. M. BAKER, Minister in charge.

**First Baptist Church**  
Regular services for Sunday will include Sunday school at 9:45 a. m., followed by the preaching service at 11 a. m.; B. Y. P. U. services in all departments at 7:15 p. m., followed by the evening service.

The theme of the morning will be "Harvest Help Needed in Pampa," and for the evening will be "The Three Crosses."

The sermons will be preached by the Rev. Leonard Sigle, who is supplying the church in the absence of the pastor. Mr. Sigle is a young man with rich experience, and will have a message for all. He desires especially to have a good group of young people at these services.

Next week will mark the beginning of a training class in "Advanced Methods in B. Y. P. U." All desiring to take this course are to enroll for it during the B. Y. P. U. hour Sunday evening.

The Rev. D. H. Truhitte, new pastor of the church, has gone to Oilton, Okla., his former pastorate, where he did great work. Next Sunday he will enter a revival at another Oklahoma town, after which the local church will welcome him as pastor.

**HOSPITAL**

tem keyed to every bed and every room. When a patient rings for a nurse, both the main office and the nurses see the call, and the office indicator shows when the nurse answers. Telephones and speaking tubes give instant communication to every part of the building, and the flash system gives the maximum information in the least time possible. This system lacks only installation of the instruments, as the wiring is complete.

**Ready for Emergencies.**

The top floor, easily accessible by the elevator, contains the operating rooms. An emergency room for minor cases is directly opposite the elevator. The main operating room is adjoining, separated by a wash room for the physicians. The lavatory is operated by foot control. The operating room has many windows

### Postal Workers Will Convene In Abilene July 4-6

(By The Associated Press.)  
ABILENE, June 23.—More than 2,500 delegates are expected to attend the convention of the Texas postal workers which will be held here July 4, 5 and 6.

These meetings are expected to bring together the largest number of mail handlers ever assembled at one place in the history of Texas. The organization to meet here include the Texas Rural Letter Carriers association on July 4, 5 and 6; Texas branch of the National League of District Postmasters, (third and fourth class) July 4 and 5; Texas branch of the United National Association of Postoffice Clerks, July 4 and 5, and the Texas branch of the National Association of Postal Supervisors, July 5 and 6.

On July 5, all four organizations will be here and on that day a joint program will be given in which representatives of each body will take part. Several men prominent in the national postal service will be here for that occasion. Hon. Thos. L. Blanton, member of congress from the Abilene district and Hon. W. R. Ely, member of the State Highway Commission have both accepted invitations to speak during the day.

On the evening of that day the Abilene Chamber of Commerce will be host to all the delegates and their families for an open-air banquet which will be prepared and served under the direction of Will W. Watson, famous in West Texas for his picnics.

Guy W. McCarty, director of the Chamber of Commerce conventions bureau has announced a program of entertainment and amusement for the visitors which will supplement the business session and which will keep the delegates and their guests busy from the time the first one arrives till the last one starts home.

On July 4, first day of the convention, the West Texas Fair racing association will stage their annual mid-summer automobile races which have attracted thousands from all over the southwest in the seasons past. It will be possible for the postal workers to see these races along with attending their annual conventions.

Ample accommodations to house all those who come have already been provided. The local arrangement committee has been advised that a large number of the delegates will come overland prepared for camping out while here and plenty of space for them will be available in the Fair Park where all conveniences for outdoor living will be obtainable.

#### DROWNS IN CREEK

(By The Associated Press.)  
LUFKIN, June 23.—"Son" Case, 20 years old, lost his life in the swollen waters of a creek north of here Tuesday when a number of companions with Case had gone bathing in the stream.

#### CHURCH RENT, ONE ROSE

TUPLEROCKEN, Pa., June 23.—(A.P.)—When Caspar Wistar, 182 years ago, gave enough land for the building of a church he stipulated in the deed that the annual rental be one red rose. Heirs of the donor received the rent this year from the congregation of the Trinity Reformed church in an auditorium decorated with roses. Payment of one white rose was made for other concessions from the Wistar family in recent years.

#### COUNTY BUILDS SCHOOLS

CANYON, June 23.—Randall county will begin school early in September with four new buildings. The four buildings will cost \$24,500. Each building will be of the very best type to serve the district where it is to be built.

Judge B. F. Fronabager, ex-officio county superintendent of schools, states that the bonds of the four districts will be sold on June 30.

LINCOLN, Neb.—Although his heart isn't in the right place, Raymond W. Richards of the University of Nebraska can play football just the same. An attack of appendicitis revealed to physicians that Richards' vital organs are abnormally arranged. The patient is back on the gridiron for training and is expected to win a regular tackle job next fall.

PITTSBURGH—An engineer of the Westinghouse company has invented a red paint which turns black at a temperature of 150 degrees Fahrenheit. The paint is for use near bearings and other parts of machinery which sometimes run hot the detriment of equipment. As the metal cools down again the black paint become red.

### OUT OUR WAY

—By Williams

### Dean of French Chefs Served Kaiser; Sent U. S. 200 Chefs

(By The Associated Press.)  
PARIS, June 23.—He cooked for the ex-kaiser after having been a prisoner of Wilhelm II's grandfather—and the ex-kaiser liked it. That is the record of G. A. Escoffier, dean of French chefs, still spry at 87.

"I have sent at least 200 cooks to America in 20 years," he recalls. "Most of them I trained outside of France, at the Savoy and Carlton in London, or aboard the Hamburg-American liners. But they were all Frenchmen and trained in the French tradition of cookery—naturally the best in the world."

"It was aboard the liner Berengaria, then the Imperator, that I first met the former emperor. They hesitated to hire me because I had been captured in the war of 1870 and had been treated—well, as prisoners are apt to be. However, I soon reassured his majesty that I had no intention of poisoning him."

"If I had been there, I'd have freed you," the former kaiser told me jokingly. "Majesty," I replied, "if you had been there, you wouldn't have recognized me." That seemed to give the emperor a laugh.

"When I parted from the former kaiser in 1913, I wished him long life and good health," M. Escoffier continues. "I ventured to add that the greatest act of his life would be bringing about an understanding between France and Germany. He replied, 'that would be my dream, but people don't understand my motives.'"

M. Escoffier has visited the United States three times. He admires the American hotel chefs, who are for the most part trained under European masters, but stoutly maintains that good cooking and good eating are impossible without wine.

#### COMMUNICATES WITH 53 NATIONS BY RADIO

LAWRENCE, Kan., June 23. (A.P.)—Thousands of transmitting stations in 53 countries on six continents and many of the larger islands of the world have communicated by spark or wireless telephone with 9DNG, home-assembled set of Fergus McKeever, 17-year-old high school senior here, since he obtained his license in 1923. McKeever uses a 50 watt transmitting tube on a 40 meter wave length.

A list of all places worked by the amateur would sound like an index to a world atlas. He is believed to be the first American to penetrate the ether to Siberia and the first inland station to exchange wireless messages with Africa.

Most of McKeever's work with foreign countries has been done with an international code of three-letter words, but he recently carried on a wireless telephone conversation with an American in Tokyo, Japan.

Relaying messages and news to polar expedition ships, such as McMillan's, to United States destroyers and cruisers when they journey to the opposite side of the world as they did in 1925; or between relatives and friends who are separated by about 12,000 miles, takes up most of McKeever's time when he is

not studying or at his part-time position in the radio department of a music store. Out of the hundreds of such incidents he remembers relay messages sent through him by Edwin Cozzens, missionary in Cameroons, Africa to relatives in California, and a bank in India.

McKeever has worked Australia and Africa from both directions.

McKeever is one of the best known amateurs in the country. Despite his age he is communication manager for all amateurs in the Kansas division of the American Radio Relay league.

MARSHALL, June 23. (A.P.)—Automobile thieves touched the button to the horn instead of the starter and were frustrated in an attempt to get away with an automobile owned by J. H. Burnett. The family was awakened about 4 a. m. by prolonged honks from the family bus. Burnett investigated and found his garage doors open and footprints of the thieves around the car.

#### PARIS THEATRE USHERS INSIST ON GOOD TIPS

PARIS (A.P.)—Women ushers in Paris theatres who often humiliate foreigners by loud dissatisfaction with their tips are giving their side of the story to the public.

They are down-trodden and exploited, they say in a published letter. They have to pay an agency fee of 100 francs to get their jobs, they explain, buy a complete black costume of a specified style and pay the theatre 15 francs a night for the privilege of being ushers. If they keep their jobs long they can make a living, they say, but usually they are relieved from duty after a short time and have to pay another agency fee.

In the government theatres and operas, however, the job of usher is a permanent appointment, obtained through influence and the old women usually have made comfortable fortunes.

When steaming a pudding in a coffee can, the lid must be securely fastened on, but if a small hole is pierced in the top to let the steam escape there will be less need of tying the lids on and the pudding will not become too moist.

### Hog Prices Show Drop; Cattle Steady On K. C. Market

KANSAS CITY STOCK YARDS, June 23.—Hog prices were weak to 10c lower than last week's close. Trade was active at the decline so that the weakness in the market is regarded as only temporary. Lambs were off another 25 to 50c, making a break of \$1.50 to \$2.00 in the past 10 days. In that period sheep have declined 50c. Though there were a few weak spots the general cattle market was steady at last week's 25 to 50c advance. Choice steers sold up to \$13.25.

Receipts Monday were 10,000 cattle, 6,000 hogs, 8,000 sheep, compared with 9,000 cattle, 8,000 hogs and 9,000 sheep a week ago, and 11,900 cattle, 10,450 hogs and 8,525 sheep a year ago.

Good to choice steers were fully steady with last week's advance. Medium and heavy weight steers that showed finish brought \$13 to \$13.25. Some light weight steers brought \$11 to \$12. Yearling steers and short fed grades were quoted a shade lower. Yearling offerings did not carry the finish shown last week and on that account killers were inclined to trade slowly. Texas grass fat steers brought \$7 to \$8.75 and Texas cake fed steers \$9.25 to \$10.50. Some California grass fat steers brought \$9.75 to \$10.15. Cows were quoted steady to weak. Fed grades were fully steady, but the snappy kinds were lower. Killers were inclined to bear down on the half fat heifers, but bought good fed kinds readily. Veal calves were fully steady with best bringing \$11 to \$12.

Prices for the better grades of stockers and feeders were fully steady but the plain kinds, especially those that showed much grass were lower. Receipts were moderate.

Hog prices were weak to 10c lower than last week's close, the average decline being about 5c. The general market is 25 to 40c above the low point 10 days ago. Last week the market fluctuated within a 10 to 15c range and now shows indications of remaining fairly settled for a period. Today 140 to 240 pound hogs sold at \$8.75 to \$8.95; 240 to 325 pounds \$8.55 to \$8.85; packing sows \$7.60 to \$8.15; stags \$7.25 to \$8; stock hogs and pigs \$8.50 to \$9.25.

Lambs were 25 to 50c lower today and \$1.50 to \$2.00 lower than 10 days ago. This decline is regarded as the regular mid-summer break. Today lambs brought \$14.50 to \$15.35; yearlings \$10.50 to \$11.50; ewes \$5 to \$5.75 and wethers \$7.25 to \$8., native and southern lambs have begun to move.

There is practically no volume to the trade in horses and mules and dullness will prevail until early August.

#### TOURISTS' GOAT

SOUTH SAN FRANCISCO, Cal. June 21. (AP)—If it is still possible to list anything new in the variegated collections that automobile tourists carry on their running boards, the lowly goat is a candidate for the honor.

Many automobiles, vacation bound, have been seen this season with odorous, four-footed milk supplies strapped on with other equipment. Some have carried two.

LILACS 231 YEARS OLD STRATFORD, Conn., June 21. (AP)—A long lilac hedge which may well have been the mother of most of the lilacs of this country, was cut down here recently by a newcomer who saw possibilities of profit in a corner lot. Every spring it was a place of bloom and fragrance. Shoots had been carried away from it for more than 100 years.

Research in town history showed that the hedge was planted in 1696 by the Rev. Samuel Johnson, who brought the shoots from his native town of Guilford, Conn. In the 231 years of its existence the hedge had attained a height of more than nine feet, despite the yearly cuttings.

RAINY DAY "DEADHEAD" GETTSBURG, Pa., June 21. (AP)—Maurice McCullough, rural mail carrier from Gettsburg, carries and delivers every rainy day one of the heaviest parcels in the postal service, and Uncle Sam collects not a cent postage for it. McCullough's "rainy day deadhead" is a big sack of gravel to spread over the smooth surface of a large flat rock in the road. Before he began carrying gravel on rain days McCullough had to call on men of the neighborhood to push his mail truck across the rock.

### A New Style in Necklaces, Girls

Simply braid the hair and wind it around the neck, girls, fastening it in the back with hairpins and setting it off with a decorative pin in front. That's Dolores Del Rio's new style hint. The Mexican film beauty's fad has become popular in Hollywood, even though the weather's warm.

### Derby Winner Dance London's Big Event

LONDON — One social event stands out in every London season, unchallenged and supreme, as the most splendid and exclusive.

It is the annual dinner dance, given at Derby house in Portland Place after the great sporting event of the year, the Derby race at Epsom Downs. This function is always attended by Queen Mary.

Invitations are highly prized. Social position is the criterion by which they are issued.

The hostess, Lady Derby, has a remarkable knowledge of horse racing. She rarely fails to attend all important English race meetings.

Other leaders of society invariably present are the Duchess of Portland and Lady Patricia Ramsay. The latter is one of the best hostesses in England and gives numerous parties at her country seat, Welbeck Abbey.

There is a story that the Duke of Portland first saw his wife from a railway carriage window. She was standing on another platform, looking so beautiful that the duke vowed then and there that he would marry no other woman. And, as in a fairy tale, he found out who she was, married her and has lived happily ever afterwards.

Lady Patricia Ramsay, the daughter of the Duke of Connaught, is the wife of Captain Alex Ramsay, who is in the British Navy. Like most members of the British royal family, she is fond of dancing, and also is a skater of exceptional skill.

BYRCE IN ICELANDIC NEW YORK (AP)—Icelanders have had to wait 55 years to hear what a visitor thought of their country, but this summer they are able to read that Lord Bryce, who visited Iceland in 1872, was impressed with the generally high level of their education.

A resume of his biography "James Bryce (Viscount Bryce Dechmont, O. M.)," by H. A. L. Fisher is to be published in Icelandic not that the English edition has been published. The noted Englishman describes their houses as mere sod huts, for the most part unventilated and destitute of comforts, but he found few of them without a library.

The corn earworm is one of the most destructive insect enemies of corn in the United States. The pest occurs throughout the entire country wherever corn is grown. Green sweet corn suffers the greatest damage, but it has been estimated that 2 per cent of field corn is annually destroyed by the earworm. In the South the damage is much heavier. In Virginia the time of planting, or rather the time of silking, has been found to be the most important factor affecting earworm damage. Where the crop of field corn can be brought into silk at the period when the moths are least abundant, the infestation and damage are greatly reduced. Serious injury from the pest is not so likely to occur if the husk is long and closes tightly around the silks.

### Artists Seek Color In Chinese Sailboat

(By The Associated Press.)

DEAD MAN'S POINT, N. C.—An American woman artist is "admiral" of a Chinese junk which has come to anchor in the Atlantic near here. The ship is the "Amoy", named after the "City of the Open Moon" where it was built. The "admiral" is Mrs. Alfred Nilson of Sheepshead, N. Y. Her husband, Captain Alfred Nilson, its pilot, is well known as a writer.

Captain and Mrs. Nilson write and paint while they sail from port to port. Their objectives are the quaint water villages on the seaboard and romantic local color for their work. The junk has two masts and a mizzen, with great, crimson, square-rigged sails. A crew of two completes the party.

The "Amoy" has a romantic history. Douglas Fairbanks and Mary Pickford are said to have spent part of their honeymoon aboard. Captain George Ward, its original owner, was also a writer, who chose this boat for his world wanderings. He sailed across the Pacific ocean in 87 days, although his craft was only 68 feet long, with a waterline of only 32 feet and a beam of 19 feet. It draws three feet, seven inches of water.

### DOUMERGUE ALWAYS IS "VERY TOUCHED"

PARIS (AP)—"Very touched" is President Doumergue's equivalent for "T. R.'s" "Delighted!"

Every time any visiting sovereign statesman or delegation pays a tribute to his nation or himself, the French president counters with that phrase. Sometimes he declares himself "infinitely touched" by the compliment, sometimes only "very", and again "profoundly" when the occasion warrants it. But always there is that word "touched"—"tou-ou-che" as M. Doumergue pronounces it with his inimitable lingering, caressing Southern accent.

### SUZANNE LENGLEN COLLECTS STAMPS

PARIS (AP)—Suzanne Lenglen, once the undefeated woman tennis champion of the world, now at Nice, has turned to collecting stamps.

In company with her American manager, Suzanne is now a daily visitor to the principal stamp marts of the Riviera. She collects stamps as she plays tennis—not concentrating on any one spot but generally keeping her opponent guessing. She is just as likely to buy a Monaco stamp because she likes the colors as she is to buy an old Russian stamp because it is rare.

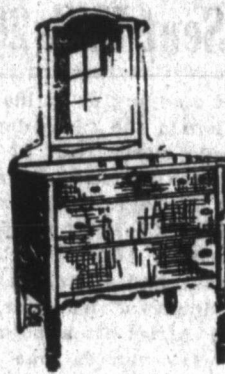

LONDON, June 23. (AP)—King George has shown a liking for fried egg plant, which is seemingly shared by others of the Royal family. Noticing an egg plant while visiting the Chelsea Flower Show with the Queen the other day, the king remarked:

"Ah, an egg plant! They are very good. Cut them up in thin slices and fry them. We always have them."
