NEW YORK BEATS PIRATES, 5-4

Work on New Methodist Church Building to Start Soon

W. MULLINAX TO SUPERVISE CONSTRUCTION

Directors Appoint Men For Each Club Activity

ATTENDANCE IS 91.6 PER CENT

Organization To Put Markers On All City Roads

Work on the new Methodist church will begin Monday morning, it was announced this morning by the Rev. Tom W. Brabham, pastor.

Plans of C. A. Townes of Amarillo, the architect, were accepted by the building and finance committee. W. Mullinax, local contractor, was chosen to superintend the construction. It is hoped to rush the building to completion.

The present plant, of which the basement is the principal part, is valued at \$18,000. It will require \$55,000 to erect the modern auditorium and latest Sunday School plant on this foundation and an extension at the rear, the architect estimates.

The auditorium will seat 750, with the balcony, and will be lighted by large art windows. The building design is gothic. The Sunday School division will have 15 rooms, and after the completion of the work the basement will be converted into departments. Until that time however, the church will continue to use the basement for worship.

Firing Squads in Mexico Restoring Quiet Everywhere

(By The Associated Press.)

MEXICO CITY, Oct. 5.—Further executions were announced today in the government's campaign to stamp out military revolt. Following news of the execution of General Serrano, presidential candidate and thirteen of his followers, a statement issued from the presidential bureau tells of three more captures and punishment in widely separated regions.

General Alvarez, chief of staff, claims that only two rebel military groups remain in arms in the entire country and that they are in small numbers, and that with 5,000 federal soldiers pursuing them their early surrender is expected.

Both groups are in the Vera Cruz state, one perhaps of 300 men led by General Gomez, and the other in command of General Almada, chief of the Mexico City garrison, who led the troops which left the capital Sunday night.

Sam Warner Dies at Los Angeles

(By The Associated Press.)

LOS ANGELES, Oct. 5.—Sam Warner, vice-president of the Warner Brothers Pictures, Inc., motion picture producers, died here today. Death was caused by pneumonia.

TO DISTRIBUTE MORE SCHOOL MONEY MONDAY

AUSTIN, Oct. 5.—The second \$1.15 per capita apportionment for each school child in Texas will be paid Monday. The scholastic enrollment now eligible for apportionment will make it run about \$1,370,000. Superintendent Marrs said today.

Mother Slain

Mrs. Ada Sides (above) of Oklahoma City is dead and 2-year-old Lorraine Francis Sides (below), is without a mother as the result of a bandit's bullet. Mrs. Sides was killed as she led police to the place where she had parked with a friend, Cecil Brown, and where the robbers had taken \$52 from Brown.

ROTARY HEAD SPEAKS HERE

District Governor Ellis H. Boyd Is Guest Today

"Pampa must have a good Rotary club; its attendance is good and that is evidence of interesting programs," declared District Governor Ellis H. Boyd of Fort Worth in a talk at the Rotary club luncheon today noon at the Schneider hotel.

His address followed a meeting of directors and committee chairmen held this morning. Mr. Boyd is on a trip to the various clubs. This trip will take him until December 16. On account of the time required for club visitation, he said he was depending on the clubs to handle extension work. He declared there should be five or six additional clubs in this section. Harry H. Rogers, past international president, told Boyd that this district should organize 60 clubs this year.

The district governor in his informal talk emphasized the implied obligations and responsibilities of Rotary, not only to the community but to the club and the individual Rotarian. Mention was made of the part of the presidents and secretaries' council district conference and international convention increasing interest in Rotary.

The aims and objects committee, which handles the Rotary club program, was explained at length by Mr. Boyd. He said that no single committee was the "most important" in Rotary and that each had a vital part.

Mr. Boyd said that Rotary now has 2700 clubs and 130,000 members with 42 countries represented. Visiting Rotarians were Tom H.

(See ROTARY, col. 1, Page 2.)

ROTARY PLAN PUTS WORK IN COMMITTEES

Architect's Plans Are Approved By Church Committee

STRUCTURE TO COST \$55,000

Basement Will Be Used Later For Sunday School

A committee system of accomplishing all that Rotary stands for has been planned by the local organization. The chairman of each committee and his assistants were elected recently by the board of directors at the meeting. The men appointed to office were chosen with care and each is adapted for a special line of work.

The local organization has done excellent work in the city and has larger plans for the future. Large posters advertising Pampa, with a large Rotary emblem on the signs, have been ordered and are to be placed on all roads leading into the city.

Rotary stands for "Service Above Self—He Profits Most Who Serves Best."

The officers of the Pampa Rotary Club are Chas. C. Cook, president; Lynn Boyd, vice-president; W. C. Upton, secretary; J. M. Dodson, treasurer and W. L. Woodward, sergeant-at-arms.

The directors of the club are: Chas. Cook, Lynn Boyd, J. M. Dodson, L. N. McCullough, M. K. Brown, T. E. Rose, A. Cole, W. C. Upton. Aims and Objects: Chas. C. Cook, chairman; J. E. Murfee, Lynn Boyd, G. B. Griffin.

Vocational Service: J. E. Murfee, chairman.

Employment Relations—C. P. Buckler, W. P. Masters.

Buying and Selling Relations—Scott Barcus, Paul Shepherd.

Competitors Relations—W. F. Clausing, G. C. Malone.

International Trade Relations—P. O. Sanders, Marion Howard.

Club Service—Lynn Boyd, Chairman.

Classification and Membership—T. E. Rose, L. N. McCullough, C. P. Buckler.

Fellowship—J. M. Dodson, M. K. Brown, DeLea Vicars, W. P. Masters, Al Johnston.

Program—M. K. Brown, Joe Smith, Lee Woodward, DeLea Vicars.

Educational—James Todd, Jr., J. M. Dodson.

Club Publications—J. D. Suggs.

Public Relations—A. H. Doucette, Scott Barcus, O. K. Baker.

Attendance—C. T. Hunkapillar, G. C. Malone, W. C. Upton.

Community Service—G. B. Griffin, chairman.

Boys work—Geo. Custer, T. E. Rose, A. R. Sawyer.

Crippled Children Work—James Todd, Jr., A. Cole, W. Purviance.

Students Loan Fund—Geo. Walters.

Rural Acquaintance—C. P. Buckler, L. N. McCullough, C. S. Barrett.

Rotary Club Roster: Baker, O. K. Hotels.

Barcus, Scott, chamber of commerce.

Bartlett, C. S. grain dealer. Boyd, Lynn, rig materials. Brown, M. K. estate manager. Buckler, C. P. real estate properties. Cole, A., physician. Cook, Chas. C., law. Clausing, W. F., hardware (retail).

When the Legion Elected Spafford

Edward E. Spafford (left) jut after his election as national commander of the American Legion, is congratulated by Howard Savage, his predecessor, in the Paris convention hall. And what a din the doughboys of 1927 raised as accompaniment for their handclasp.

Man Arrested in Fort Worth is Wanted In Connection With the Bank Robbery Here, and Others

Custer, Geo., ice manufacturer. Dodson, J. M., banking. Doucette, A. H., surveyor. Griffin, G. B., plumbing supplies (wholesale). Howard, Marion, laundry. Hunkapillar, C. T. druggist. McCullough, L. N. lumber. Malone, G. C. Furniture. Masters, W. P. cafe. Murfee, J. E. dry goods. Purviance, W. physician (associate to Dr. A. Cole). Rose, T. E. automobile dealer. Sanders, P. O. abstractor. Shepherd, Paul oil well supplies. Smith, Joe M. building manager. Suggs, J. D. newspaper and printer.

Todd, Rev. James, protestant minister. Upton, W. C. fire insurance. Vicars, DeLea, investment finance. Woodward, W. L. gas distributor. Sawyer, A. R. dentist. Johnston, Al F. Oil and gas production. Walters, Geo. C. real estate agency.

The average club attendance to date is 91.6 per cent.

Local Man Hurt, Others Shaken, As Car Turns Over

E. O. Clarke, local mechanic, was badly bruised about the head and cut on the arm and wrist and two women companions were severely shaken when his Chevrolet coupe turned over on the Miami road last night. A boy in the car escaped injury.

The party was returning to the city about midnight, when one of the wheels of the car locked. A passing motorist picked up the injured persons and brought them to Pampa Hospital for treatment. They were able to leave the hospital this morning.

BABY GIRL BORN

Mr. and Mrs. George A. Hubbard announce the birth of a baby girl, Elisabeth Ann.

FORT WORTH, Oct. 5.—Asa Pendleton, 35 years old, said to be wanted in several states on various charges is in Tarrant county jail today having been brought here from Marlin yesterday.

He was the third man to be arrested in Marlin and was brought here for investigation in connection with the robberies of the banks at Plano, Pampa, and the robbery of the Stockyards National bank here.

A number of persons who witnessed the robberies here today attempted to identify the suspects.

FORT WORTH, Oct. 5.—Four Dallas men, said to have long criminal records, are being sought for questioning in connection with the recent robberies of the First National bank of Pampa, the Plano National bank at Plano, and the attempted robbery of the Stockyards National bank here, it was learned from authoritative sources today.

The picture of one of these men has been positively identified by an eye-witness to the robbery as that of the bandits who robbed the Plano bank and other evidence points to the quartet as being the men who held up the Pampa bank.

It is expected that some of the persons who are held up by the robbers at the First National bank here will leave for Fort Worth tonight to attempt to identify the men now in custody.

New Ambassador to Mexico Making Study Of His Duties There

(By The Associated Press.)

WASHINGTON, Oct. 5.—Dwight Morrow, new ambassador to Mexico, today began a series of conferences with Secretary Kellogg which were expected to continue into next week.

It was said in the state department that no decision as to the date of the ambassador's departure had been reached, but that he would go soon.

COSTLY ERRORS HELP YANKEES CINCH OPENER

Forty-Five Thousand Fans Jam Stands Today

CLEAR DAY IS VERY WELCOME

Many Fail to Get Seats For Classic of Baseball

THE YANKS WON

NEW YORK 5 6 1

PITTSBURGH 4 9 2

FORBES FIELD, Pittsburgh, Oct. 5.—The New York Yankees defeated the Pittsburgh Pirates, 5 to 4, today in the opening game of the World Series.

Largely through a bad third inning, when the winners scored three runs on one hit, two errors and two bases on balls, the Pirates were sent to defeat.

FORBES FIELD, Pittsburgh, Oct. 5.—With a record Pittsburgh crowd of nearly 45,000 persons looking on, the 1927 world series opened today with the New York Yankees opposing the Pittsburgh Pirates.

The big stands were crowded to capacity, and there were thousands of disappointed fans on the outside. One of the fairest October days, with a moderate cool temperature and bright sunshine greeted the thousands of fans gathered for the baseball classic.

Batting Order
 Pittsburgh—L. Waner, cf; Barnhart, lf; P. Waner, rf; Wright, ss; Traynor, 3b; Grantham, 2b; Harris, 1b; Smith, c; Kremer, p.

New York—Combs, cf; Koenig, ss; Ruth, rf; Gehrig, 1b; Muesel, lf; Lazzeri, 2b; Dugan, 3b; Collins, c; Hoyt, p.

Umpires—Earnest Quigley, National League, at plate; Charles Moran, National League, at second base; Emmett Ormsby, American League at third base; Dick Nallen, American League at first base.

Score by innings:

First Inning
 New York—Combs hit the first ball pitched for a long fly to Barnhart, who caught the ball near a score board; Koenig struck out. Crowd gave Ruth a big hand. Ruth singled sharply to right. Ruth scored on Gehrig's three-base hit to right. It was a short fly and P. Waner over-ran it. P. Waner took Muesel's long fly. One run, 2 hits no errors.

Pittsburgh—L. Waner was hit by a pitched ball, which struck him on the shirt. Barnhart lined out to Ruth. Crowd gave P. Waner a cheer. He doubled to right, L. Waner going to third. P. Waner scored on Wright's sacrifice fly to Combs. P. Waner going to third. Traynor flied out to Ruth, who made a fine running catch. One run, one hit, no errors.

Second Inning
 New York—Lazzeri sent a foul to Traynor. Dugan sent up high one to Grantham. After two balls and two strikes, Collins walked after one called strike. Grantham threw out Hoyt at first. No runs, no hits, no errors.

Pittsburgh—Grantham walked after one called strike and one strike foul. Harris hit into double play. Lazzeri took Harris' grounder, touched Grantham, then threw out Harris at first. Lazzeri claimed Grantham.

The BENSON MURDER CASE

by S. S. VAN DINE © CHARLES SCRIBNER'S SONS

Characters of the Story

- PHILO VANCE
- JOHN F. X. MARKHAM, District Attorney of New York County.
- ALVIN H. BENSON, Well known Wall Street broker and man-about-town, who was mysteriously murdered in his home.
- MAJOR ANTHONY BENSON, Brother of the murdered man.
- MRS. ANNA PLATZ, Housekeeper for Alvin Benson.
- MURIEL ST. CLAIR, A young singer.
- CAPTAIN PHILIP LEACOCK, Miss St. Clair's fiance.
- LEANDER PFYFFE, Intimate of Alvin Benson's.
- MRS. PAULA BANNING, A friend of Pfyffe's.
- ELSIE HOFFMAN, Secretary of the firm of Benson and Benson.
- COLONEL BIGSBY OSTRANDER, A retired army officer.
- WILLIAM H. MORIARTY, An alderman.
- GEORGE G. STITT, Of the firm Stitt and McCoy, Public Accountants.
- MAURICE DINWIDDIE, Assistant District Attorney.
- ERNEST HEATH, Sergeant of the Homicide Bureau.
- BURKE, SNITKIN, EMERY, Detectives of the Homicide Bureau.
- BEN HANLON, Commanding Officer of Detectives assigned to District Attorney's office.
- PHELPS, TRACY, SPRINGER, HIGGINBOTHAM, Detectives assigned to District Attorney's office.
- CAPTAIN CARL HAGEDORN, Fire-arms expert.
- DR. DOREMUS, Medical examiner.
- FRANK SWACKER, Secretary to the District Attorney.
- CURRIE, Vance's valet.
- S. S. VAN DINE, The Narrator.

Bending over the rug, Vance moved the large wicker chair into the exact position it had occupied when Benson had been shot.

THIS HAS HAPPENED

A woman's gloves and handbag were found at the scene of Benson's murder and Markham, tracing them to Miss St. Clair has her brought to his office. She makes flippant answers to his questions but betrays concern when Markham asks if Leacock had not owned a Colt 45, the same type of gun that killed Benson. Vance tells Markham he is certain of the girl's innocence.

NOW BEGIN THE STORY

CHAPTER XIX

(Saturday, June 15, 5 p. m.)

When we arrived at Benson's house a patrolman leaning solemnly against the iron paling of the driveway came suddenly to attention and saluted.

He eyed Vance and me hopefully, regarding us no doubt as suspects being taken to the scene of the crime for questioning by the district attorney. We were admitted by one of the men from the homicide bureau who had been in the house on the morning of the investigation.

Markham greeted him with a nod.

"Everything going all right?"

"Sure," the man replied good-naturedly. "The old lady's as meek as a cat—and a swell cook."

"We want to be alone for a while, Sniffin," said Markham, as we passed into the living-room.

The gastronome's name is Snitkin—not Sniffin," Vance corrected him, when the door had closed on us.

"Wonderful memory," muttered Markham churlishly.

"A failure of mine," said Vance. "I suppose you are one of those rare persons who never forget a face but just can't recall names, what?"

But Markham was in no mood to be twitted.

"Now that you've dragged me here, what are you going to do?" He waved his hand deprecatingly, and sank into a chair with an air of contemptuous abdication.

The living-room looked much the same as when we saw it last, except that it had been put neatly in order. The shades were up, and the late afternoon light was flooding in profusely. The ornateness of the room's furnishings seemed intensified by the glare.

Vance glanced about him and gave a shudder.

"I'm half inclined to turn back," he drawled. "It's a clear case of justifiable homicide by an outraged interior decorator."

"My dear aesthete, be good enough to hurry your artistic prejudices, and to proceed with your problem. Of course," he added, with a malicious smile, "if you fear the result, you may still withdraw, and thereby preserve your charming

theories in their present virgin state.

"And permit you to send an innocent maiden to the chair!" exclaimed Vance, in mock indignation. "Pie, fie! La politesse alone forbids my withdrawal. May I never have to lament, with Prince Henry, that 'to my shame I have a truant been to chivalry.'"

Markham set his jaw, and gave Vance a ferocious look.

"I'm beginning to think that, after all, there is something in your theory that every man has some motive for murdering another."

"Well," replied Vance cheerfully, "now that you have begun to come round to my way of thinking, do you mind if I send Mr. Snitkin on an errand?"

Markham sighed audibly and shrugged his shoulders.

"I'll smoke during the opera bouffe, if it won't interfere with your performance."

Vance went to the door and called Snitkin.

"I can't hope that you're going to Mrs. Platz and borrowing a long tape-measure and a ball of string, sycophantic bow."

"I can't hope that you're going to hang yourself, can I?" asked Markham.

Vance gazed at him reprovingly.

"Permit me," he said sweetly, "to commend Othello to your attention: 'How poor are they that have not patience! What wound did ever heal but by degrees? Or—to descend from a poet to a plattitudinarian—let me present for your consideration a pentameter from Longfellow: 'All things come round to him who will but wait.' Untrue, of course, but consoling. Milton said it much better in his 'They also serve—'. But Cervantes said it best: 'Patience and shuffle the cards.'"

"Sound advice, Markham—and advice expressed rakishly, as all good advice should be. . . . To be sure, patience is a sort of last resort—a practice to adopt when there's nothing else to do. Still, like virtue, it occasionally rewards the practitioner; although I'll admit that, as a rule, it is—again like virtue—bootless. That is to say, it is its own reward. It has, however, been swathed in many verbal robes. It is 'sorrow's slave,' and the 'sovereign over transmuted ill,' as well as 'all the passion of great hearts.' Rousseau wrote, 'La patience est amere mais son fruit est doux. But perhaps your legal taste runs to Latin. Seneca's omnia fortuna ferendo est. quoth Vergil. And Horace also spoke on the subject—"

"Why the hell doesn't Snitkin come?" growled Markham.

Almost as he spoke the door opened,

ed, and the detective handed Vance the tape-measure, for your reward!"

Bending over the rug, Vance moved the large wicker chair into the exact position it had occupied when Benson had been shot. The position was easily determined for the impressions of the chair's castors on the deep nap of the rug were plainly visible.

He then ran the string through the bullet-hole in the back of the chair, and directed me to hold one end of it against the place where the bullet had struck the wainscot.

Next he took up the tape-measure and, extending the string through the hole, measured a distance of five feet and six inches along it, starting at the point which corresponded to the location of Benson's forehead as he sat in the chair.

Tying a knot in the string to indicate the measurement, he drew the string taut, so that it extended in a straight line from the mark on the wainscot, through the hole in the back of the chair, to a point five feet and six inches in front of where Benson's head had rested.

"This knot in the string," he explained, "now represents the exact location of the muzzle of the gun that ended Benson's career. You see the reasoning—eh, what? Having two points in the bullet's course—namely, the hole in the chair and the mark on the wainscot—and also knowing the approximate vertical line of explosion, which was between five and six feet from the gentleman's skull, it was merely necessary to extend the straight line of the bullet's course to the vertical line of explosion in order to ascertain the exact point at which the shot was fired."

"Theoretically very pretty," commented Markham; "though why you should go to so much trouble to ascertain this point in space I can't imagine. . . . Not that is matters, for you have overlooked the possibility of the bullet's deflection."

"Forgive me for contradicting you," smiled Vance; "but yesterday morning I questioned Captain Hagedorn at some length, and learned that there had been no deflection of the bullet. Hagedorn had inspected the wound before we arrived; and he was really positive on that point. In the first place, the bullet struck the frontal bone at such an angle as to make deflection practically impossible even had the pistol been of smaller calibre. And in the second place, the pistol with which Benson was shot was of large bore—a point-forty-five—and the muzzle velocity was so great, that the bullet would have taken a straight course even had it been held at a greater distance from the gentleman's brow."

"And how," asked Markham, "did Hagedorn know what the muzzle

velocity was?"

"I was inquisitive on that point myself," answered Vance; "and he explained that the size and character of the bullet and the expelled shell told him the whole tale. That's how he knew the gun was an army Colt automatic—I believe he called it a U. S. Government Colt—and not the ordinary Colt automatic. The weight of the bullets of these two pistols is slightly different; the ordinary Colt bullet weighs 200 grains, whereas the army Colt bullet weighs 230 grains.

"Hagedorn, having a hypersensitive tactile sense, was able, I presume, to distinguish the difference at once, though I didn't go into his physiological gifts with him—my reticent nature, you understand.

However, he could tell it was a forty-five army Colt automatic bullet; and knowing this, he knew that the muzzle velocity was 809 feet, and that the striking energy was 329—which gives a six-inch penetration of 25 yards.

"An amazing creature, this Hagedorn. Imagine having one's head full of such entrancing information! The old mysteries of why a man should take up the bass-fiddle as a life work and where all the pins go, are babes' conundrums compared with the one of why a human being should devote his years to the idiosyncrasies of bullets."

(To Be Continued)

Houston County Spurs Raising of Pure Bred Hogs

CROCKETT, Oct. 3.—Chambers of Commerce usually consider one of their greatest functions is to boost industry. The Chambers here and at Grapeland chose to spur production of pork with the result that from the distribution of 110 pure bred hogs, the county now contains more than 1,000 which is just about that many more than there were before.

One car load of the original number came from Agricultural and Mechanical College at College Station; one car from a Missouri breed and the third car from Oklahoma. The banks usually took the farmers' notes for the hogs and in most cases the farmers repaid the loan from the sale of pigs out of the first litter. In many cases they had pigs and cash left.

Boars are frequently owned by the various communities.

A registered hog business is not, however, the foundation upon which Houston county farmers are building. The first principal, it is understood, is meat for the home and after that has been supplied, a commercial hog trade where the pigs will be sold in car load lots or as finished hogs in years when feed is cheap and plentiful and when the market justifies finishing. Lastly, plans contemplate a pure bred hog business where the best quality of registered hogs can be disposed of to farmers in Houston or other counties.

As the outgrowth of the project farmers have organized the Houston County Pure-Bred Swine Breeders' association here with 28 charter members. The association plans to handle registration of the pigs and serve as a clearing house for information to its members.

Spanish Towns Hum With New Enterprise

BARCELONA, Spain—Spain is undergoing a rapid transformation, and the latent energy of the population has begun to burst forth into new enterprises which promise national prosperity.

In Catalonia the movement is showing itself more rapidly than in other parts, probably because the region is more closely connected with the outside world and possesses a people which is by nature progressive and laborious.

One of the forms the transformation is taking in Catalonia is in electrification of railways. The lines running from Barcelona to Manresa and to San Juan de las Abadesas are now almost completely electrified, and the work is to be continued on other local lines belonging to the Northern Railroad Company.

The region of Catalonia is well supplied with potential waterpower.

All through the north of Spain progress is being made with the construction of new means of communication, which will serve to open up fresh markets for districts now entirely cut off from connection with centers of population.

CHILE LIKES DRESS SHIRT

The American dress shirt has made a decided hit in Chile. Stiff linen shirts, intended for evening use in this country, are being worn by the elite for business and morning wear.

BILLY EVANS Says

"What a year this has been," remarked Manager Ray Schalk of the Chicago White Sox to me a few days prior to the close of the last season: "My troubles started in the early spring with the loss of Johnny Mos-tell. Then, after the race got underway, there was a short respite. Getting great pitching from Lyons, Thomas, Blankenship and Connally, the club was able to come through with enough timely hitting to give us a winning margin. So good was the pitching, we didn't need many runs to win.

"Around June first we were fighting for the lead with something like 30 victories against 15 defeats. Then came an important series with the Yankees and we went into a batting slump that started us on the toboggan."

Before Schalk had a chance to make further comment, Coach Lena Blackburn cut in with the following: "Yes, that New York series in June started us on a batting slump and we have never come out of it."

set 20 games won as his goal. He just missed that mark. If fate had smiled instead of scowled at Thomas most of the year, he easily would have reached the mark.

As I glance over my records, I find that nine of the 16 defeats suffered by Thomas were by a one-run margin and in none of these games did the opposition make more than four runs. That will give you an excellent idea of how well he pitched, even in defeat.

A timely hit here and there in any of those nine games would have brought Thomas' record for the year well over the cherished goal of 20 victories.

Cheap Ranch Land Spouts Oil Riches

(By The Associated Press.)

BIG LAKE, Texas—Land which for ranch purposes is worth about four dollars an acre is spouting wealth in oil in Pecos county, site of the Yates oil pool.

In the drama of life across the Pecos, where drought has followed drought and where time after time people have left its alkali acres, high value is being placed on the mineral lands.

Ira Yates, owner in fee of about 26,000 acres of ranch land on which the pool is located, probably will become one of the wealthiest men in Texas as a result of the oil find.

The oil is in pools at a depth of about 1,000 feet. Water well rigs are used to reach production depth and a well can be drilled in eight days.

There are 1,500 people now living on the Yates ranch, more by far than the number of cow population at any time.

New Process Claimed For Preserving Fruit

(By The Associated Press.)

LONDON.—Cold storage and refrigeration are likely to become obsolete if claims put forward in connection with an invention for preserving fruit, eggs, butter and other foods, are justified.

The method, known as "Stab-back's Process," is more a protection than a preservation. It consists of a harmless solution which is said to enable a housewife to keep 300 to 400 eggs for an indefinite period.

The English National Utility Foultry Society treated dozens of eggs by coating them with the solution and stored them in an ordinary place. At the end of several months they were still absolutely fresh.

On two occasions consignments of apples after treatment were sent as deck cargo to Tasmania, and they arrived fresh.

It is claimed that the process will reduce the cost of imported fruit, as the freightage will be halved, and it is hoped that many tropical fruits will be introduced into England which have never before been imported.

Tennis Coach Plays "Dub" Game But Has Four Star Pupils

"Pop Fuller of the Berkeley Tennis Club, a non-professional producer of tennis champions, instructs his pupils in class until they begin to show individual merit. He then chooses the more promising ones for individual instruction.

SAN FRANCISCO Cal.—A non-professional tennis coach who plays a "dub" game had four pupils in the recent national tennis tournament at Forest Hills, L. I. He is William C. (Pop) Fuller of the Berkeley Tennis club and his girls were Helen Wills, Helen Jacobs, Josephine Crookshank and Edith Tough. The two latter ones were eliminated in the first round but they were good enough to be included in the 64 chosen to compete.

Fuller, a retired druggist from Rhode Island, sought a way to occupy his time and became a member of the Berkeley club. He centered his interest in the juniors. He began with Helen Wills a year before she went east to win her first national junior title and did

the same for Helen Jacobs prior to her annexing the national junior title a few years later.

Fuller uses class instruction on the beginners until one or more of his pupils show unusual merit. Then he selects these prospects for individual instruction. First they must learn the orthodox strokes. A great part of time is spent having them learn the advantage of the backhand and the timing of the stroke.

Fuller, a retired producer of tennis cannot execute the strokes himself, but he has patience enough to work with the juniors until they master the strokes as they should be.

Famous Waner Brothers Form Colorful Outfield Combination

PITTSBURGH (AP)—The Yankees have the Ruth and Gehrig, the greatest home run hitting pair of all time, but the Pirates, National League standard-bearers in the world series, boast one of the most colorful of outfield combinations, the famous Waner brothers.

Born and raised in Oklahoma, son of an old time baseball star, where they learned the rudiments of the game by pitching and hitting corn-cobs behind the barn, Paul and Lloyd Waner have been the "hits" of the National League. Paul, 24, established himself as a top-ranking star last year and this year has run away with the league batting crown. Lloyd, 22, like his brother, has made good in his first season.

Both are natural players and born hitters. Paul is less colorful in personality, but his batting per-

formance this year stamp him as one of the greatest all-round hitters in the game. During most of the season, Paul has not only topped all rivals in percentage but has led the league in hits, doubles, triples and driving in runs. Lloyd, aided by Paul's timely wallops, leads the league in runs scored.

They call them "Little Poison" and "Big Poison" around the circuit because of their consistent and timely ability at bat, as well as their brilliant defensive work.

The picturesque brothers came to the Pirates from opposite sides of the country. Paul was purchased, along with Hal Rhyne, from the San Francisco Seals during the 1925 world's series, for \$50,000. Lloyd came direct from the Columbia club of the South Atlantic Association. He batted .345 in that circuit last season and has done just as well against major league pitching.

LUBBOCK, Texas, Oct. 5.—The illustration shows the football field of Texas Technological college and the first set of steel grand stands of the proposed stadium which will ultimately surround the entire field. This unit will seat 4,000, and while these will be used for the Simmons University game October 15, their installation was made necessary by the scheduling of the game with Texas A. & M. college on Friday, October 28, the first conference team ever to invade the Panhandle of Texas.

Tech college is planning a gala day when the Aggies come to the plains for the first time. Special trains will be run into Lubbock and many former Aggie students and football fans from all over the Panhandle are already reserving tickets for the big football classic. This will be the first major football game ever played in the Panhandle but with Texas Tech likely to be admitted to the Southwestern Conference in the near future it is to be the forerunner of many big games later on.

In addition to the 4,000 new steel bleachers there is a present seating capacity of 3,250, making a total of 7,250 seats. Enough temporary seats will be erected to make the total seating capacity for the A. & M. game at least 10,000.

British Heavyweight Invader

Phil Scott, the British heavyweight, is leaving England for New York to prepare for a bout at Madison Square Garden on October 28 with either Paulino Uzcudun or Jack Sharkey, his manager has announced.

Seeks Title

Here's Tommy Loughran, Philadelphia fighter, who fights Mike McTigue, light heavyweight champion, in a title bout early next month. Loughran thinks he will lift McTigue's title.

Kansas Coach Tells Story Of Origin of Huddle System

By J. H. Anderson
EMPORIA, Kas. H. W. (Bill) Hargiss, veteran mentor of the Emporia Teachers' College here, is generally credited with being the first to use the huddle system in football. A high school quarterback of McMinnville, Oregon, gave Hargiss the idea.

"While coach of the Oregon Aggies in Corvallis in 1919, I refereed a high school football game in McMinnville. The field had no bleachers and a low fence failed to keep the crowd from swarming on the field. For three periods the game was scoreless. Near the end of the last quarter the McMinnville team started a drive and carried the ball to their opponents' 10 yard line.

"All this time the cheering was deafening. The quarterback had been yelling at the top of his voice to make his signals heard and was wearing himself out. Finally, unable to make himself heard above the din, he pulled off his headgear, threw it on the ground and yelled: 'Come back here, you guys, and I'll tell you what the play is.'

"The boys came back gathered around him. He gave them the play and they went through it without additional signals. This was repeated and the ball was carried over the goal line for a touchdown. Play required much less time than when he tried to call his signals.

"This gave me an idea. In the spring of 1920, during the few weeks practice for the next fall, I tried it out at the Aggie school. At first it was awkward, but eventually it became better and I have been using it ever since."

Investigations in recent years have convinced Hargiss that no coach was using the system before he tried it on the West Coast. Now the huddle is universally used.

Hargiss is one of the old timers of the Kansas conference, ranking with Dr. Garfield Weede of the Pittsburg Teachers' College, Pittsburg, Kas. In the four years prior to his graduation from the Emporia Teachers' College, then the Kansas State Normal, in 1909, Hargiss starred in football, basketball, and track. In 1909 he coached the Marion, Kas. high school. The next three years he coached the College of Emporia here, leaving in 1913 to take over basketball and track at the University of Kansas. The next four years he was

City Manager

From an employe of the city manager's office in Bristol, Va., Miss Kathlyn Allison has taken up the manager's duties. Her election came as a compromise following a split in council over choosing of a manager.

Harvesters Ready For Clarendon On Gridiron Friday

Friday afternoon at 4 o'clock the Pampa Harvesters, high school football team, will meet the Clarendon Bulldogs on the home field. The next Friday, October 14, is an open date, but Coach Verde Dickey is trying to match a game for that date.

The rest of the high school schedule is:

- October 21, Pampa vs Canadian, at Pampa.
- October 28, Pampa vs Miami, at Miami.
- November 4, Pampa vs Perrytown, at Pampa.
- November 11, Pampa vs Panhandle, at Pampa.
- November 18, Pampa vs Shamrock, at Pampa.
- November 25, Pampa vs Childress, at Pampa.

Coach Verde Dickey is giving his warriors another week of hard practice to get them in condition for the biggest battle of the season Friday afternoon. Archie Walstad is being tried out at quarter this week and the team seems to be working smoothly with the change.

A new lineman by the name of Hamilton is out for practice and looks good for a place on the team. Sam Carlton, who was injured in the game at Amarillo, is out for practice this week and may be able to get in the line-up Friday. With Carlton in the back field to assist Roberts, Walstad and Greene, Clarendon will have a hard time holding the fast traveling Harvesters.

The local squad has perfected several new plays which will be sprung on the Bulldogs Friday in an attempt to shake them off. The game will commence at 4 o'clock at Ayres field.

coach at his alma mater, leaving there to coach the Oregon Aggies in 1918. Since 1920 he has been with the Emporia Teachers as athletic director and head coach, actively coaching football and track. Last year his eleven won the football championship of the Kansas conference.

Fights Soon

Here's Mike McTigue, Philadelphia fighter, who will defend his title against Tommy Loughran, Philadelphia fighter, early next month. McTigue was handed the championship when Jack Delany relinquished it some time ago.

World Series Attendance and Receipts

(By The Associated Press.)
Here are some salient facts and figures on world's series of the past:

Greatest single game crowd, 65,600, at Yankee Stadium, New York, October 3, 1926, second game of series between Yankees and Cardinals. Gate receipts for this game \$201,828, also set a record.

Greatest series total attendance, 328,051, Cardinal and Yankees in 1926.

Greatest gate receipts for one series, \$1,207,864, Cardinals and Yankees, 1926.

Smallest crowd for one game, 6,210, fifth game, Tigers-Cubs, Detroit, Oct. 14, 1908.

Smallest gate receipt for one game, \$8,348, Athletics-Giants, Philadelphia, Oct. 12, 1905.

Smallest attendance for one series, 62,232, Tigers-Cubs, 1908.

Smallest gate receipt for one series, \$68,435, Athletics-Giants, 1905.

Largest winning player's share, \$6,143.49, Yankees, 1923.

Smallest winning player's share, \$1,102.51, Red Sox, 1913.

Largest losing player's share, \$4,113.29, Giants, 1923.

Smallest losing player's share,

\$832, Athletics, 1905.
Total attendance (1905-26 inclusive) 3,984,212.
Total gate receipts (1905-1926 inclusive) \$10,770,312.
Total players pool (1905-26) \$3,797,514.90.

Walter Varner Loses Four Fingers and Must Quit Boxing

Walter Varner, local boxer who was to appear at the Pampa Athletic Club Monday night in a 10-round bout with Teddy Hargrove, lost the four fingers of his left hand this morning while at work on a Roxana Petroleum Corporation well at Roxana.

The well known boxer was working on a pump when auction drove his hand into the machine.

Varner is well known throughout the middle West as one of the best boxers of the day. He has met the best that were in his class and has lost five battle out of his more than one hundred.

Let a want so work for you.

And He Caught It Just the Same

This remarkable action photograph depicts Tiny Drouilhet, Loyola (New Orleans) star, grabbing a pass in the midst of rushing Rice players in the recent Loyola-Rice game at New Orleans. Note the Rice players in front of and behind Drouilhet. His catch completed a 25-yard pass and was one of the features of Loyola's 13-0 victory over Rice.

 Telephone 100, all departments.

church problems and the inevitable military politics. These things will pass, and the balance of population will swing toward progress. There are many dangers, of course. One is from the possibility that the native population, particularly the uneducated Indian, will be crowded into near serfdom, or will be misused by the huge corporations who need cheap labor.
 Another is from "Red" activities and the troubles arising from foreign influences anxious to control a part of the Mexican trade. This can be counteracted, to a great extent by quare-shooting on the part of Americans. The "Gringo" should become a more virtuous figure than heretofore commonly understood by the peons.
 Border friendliness is developing along the Rio Grande. Celebrations are being observed in common by representatives of adjoining states. Lately - resident Calles and President Coolidge spoke as telephone service between Washington and Mexico City was opened. Their words have just been released. President Coolidge said:
 "I am deeply impressed, President Calles, by the significance of this occasion, marking, as it does by these personal conversations of the chief executives of the two governments, the inauguration of direct telephone communication between the capital of the United States and the capital of Mexico. Conspicuous among the accomplishments of the present age is the extraordinary development of means for facilitating communication between the nations of the world.

IN THE OPEN—Diplomacy, once the subject for all kinds of ill rumors, is coming more and more to be something that the average person can reason about and understand.
 In the exchange of notes between France and the United States on the tariff, it was the earnest request of the French government that the messages be kept secret. This country acquiesced to some delay, but held that both the French notes and the replies should be given to the public.
 Back of it all is the American principle that the newspaper represents the needs and privileges of the public, and has the constitutional right to publish for public information that which concerns the people or any group of them. There would have been a storm of criticism had the notes been kept secret, but the French diplomats cannot appreciate that fact. Their goings and comings are much their own affair.
 Possibly the French desire for secrecy was based upon the wish to keep the facts from that people; perhaps to conceal the negotiations from American creditors. At any rate, the request was ignored. This may have had a bearing on further representations, for the French replies at once became "more conciliatory." The White House spokesman at the same time divulged that the president considers the French tariff question merely as one of discrimination against American goods. It begins to appear that the administration may yet emerge with a straight front from this rather vexing dilemma. The tariff wall is a fine thing from the inside looking out, but less gratifying from the outside looking over—a point of view France is anxious to have us take. The ultimate settlement will grow out of a finer adjustment of international trade exchanges, unless politicians interfere.

"I am happy to participate with you, Mr. President, in this auspicious ceremony, and to express to you, and through you, to the people of Mexico, my cordial greetings."
 President Calles replied in part:
 "I am greatly pleased to receive directly the greetings of President Coolidge by means of the telephone which today unites respectively Mexico and the United States, establishes an easy system of communication that favors the mutual development of the commerce between the two countries, perfects business negotiations, and affords enormous advantages for contact between the inhabitants of both countries. This event, which must have an immediate beneficial influence, will also lead to improvement in relations between Mexico and the United States, as it is well known that closer contacts and better understanding of the material interests materially influences the governments which direct nations."

WASHINGTON LETTER

By RODNEY DUTCHER
 NEA Service Writer
 WASHINGTON—After buzzing around for several days to discover the real meaning of the appointment of Dwight Morrow as ambassador to Mexico, your correspondent is able to report that:
 1—The appointment signifies a new method of dealing with Mexico which aims to supplant conservative intelligence.
 2—The appointment is deplored by one group in the Department of State and by those American oil interests which have worked behind the scenes to foment trouble between the two governments.
 3—The appointment is gratifying to the government of Mexico.

MEXICO—We do not know any better motto for the Southwest than "Watch Mexico."
 The significance of this land of marvelous resources to the United States, and especially Texas, is too little realized. The movement of population and large developments westward will revolutionize Mexico, the country of revolutions of a different sort.
 Mexico is making great strides forward, despite the

He Won't Be Happy Until He Gets It

Although there are few things to be said against President Coolidge's choice. It should be understood that the denials that the United States and the Morgan banking firm are sending a joint representative to Mexico may be swallowed in a saline solution. There may be loud yelps and whoops in next Congress over this phase of the matter.
 The Morgan firm's chief interest in Mexico lies in the fact that it is the collection agent for more than a half billion dollars in Mexican bonds held in this country and abroad. Under the Pani-Lamont agreement, Mexico is paying nearly \$15,000,000 a year in interest and it presumably will be part of Morrow's job to see that this interest keeps coming. He also will be interested in laying any possible groundwork for Mexico's eventual payment of the enormous principal.

which went unpaid from 1913 to 1926, during Mexico's revolutionary and early reconstruction period.
 Everyone who is interested in these various sums presumably want Mexico to be prosperous and her government stable in order that she may pay.
 These facts and knowledge of Morrow's past attitude lead one to believe that the new ambassador's attitude toward Mexico will be sympathetic and conservative. Morrow, whose intimacy with President often advised the president on the Mexican situation.

PRESS FORUM

Motorists must look to their own state legislatures rather than to Congress for relief from the oil substitution frauds revealed by the American Fair Trade Association. Government experts endorse the Association's statements concerning the huge losses due to improper lubrication of the nation's automobiles, but point out that the detection and punishment of dishonest service station men is a problem for the state to solve according to local conditions.
 Prosecutions of dealers for victimizing motorists by sub-

stituting inferior oils, and, in some instances, crank case drainings, for high grade lubricants, have attracted widespread attention this summer. These cases have served to show the extent of the practice and the need of legislation to curb it.
 It now seems probable that bills for this purpose will be introduced in every legislative state not already provided with anti-substitution laws. The Governor of Rhode Island already has expressed his purpose to devote attention to this situation in his annual message.
 While substitution frauds are limited to a small proportion of dealers, the enormous numbers of motor cars in use one for every five persons—and the multiplication of new service stations all over the country make these frauds very serious in the aggregate.
 The average motorist is rapidly being educated to use the kind of oil best suited to his needs and to demand this oil by name and grade. He has little protection, however, against the dishonest dealer who does not give him the oil he orders. In many states under existing laws it has been found difficult to convict substitutors even with the strongest evidence against them.—Childress Index.

A number of Indiana politicians must be wondering if they are still in the hands of their friends.—The Terre Haute Star.

Maybe when Tex Rickard talked about charging folks for getting the fight returns by radio he had the \$5 seats in mind.—The Muskegon Chronicle.

Mrs. P. O. Sanders Entertains For Mrs. J. D. Sugg

Mrs. P. O. Sanders entertained a few of her friends Monday afternoon honoring Mrs. J. D. Suggs. Bridge was the source of entertainment and after several interesting games, refreshments of angel food cake were served to the following guests: Mrs. Bradford Griffin, Mrs. P. B. Carlson, Mrs. John Cram, Mrs. Frank Catterton, Mrs. G. C. Walters, Mrs. Joe Smith and the honoree, Mrs. J. D. Suggs.

High score in the bridge games was awarded Mrs. Frank Catterton.

Mrs. P. A. Worley And Mrs. Haskell Honored At Party

Mrs. P. A. Worley and H. H. Haskell were delightfully surprised Wednesday evening at the home of Mrs. Worley's daughter, Mrs. Ernest Reynolds, when they were honored at a birthday dinner.

Mrs. Reynolds home was prettily decorated for the occasion and the delicious dinner was enjoyed by the honorees and the guests. The table was graced by two elaborate birthday cakes, on which brightly burned a number of candles.

After the dinner, dancing and amusements of all kinds were enjoyed to a very late hour, while Mrs. Worley and Mr. Haskell received the best wishes for the happiness of the day. They were also honored with many beautiful presents.

The list of guests included Mr. and Mrs. W. B. Saulsbury, Mrs. Lillie Halsted, Mr. and Mrs. S. H. Stone of Amarillo, Mr. and Mrs. H. H. Haskell, Mr. and Mrs. Ralph Butterfield, and Mrs. P. A. Worley.

Mrs. Alex Schneider Is Hostess to Amusu Bridge Club

Mrs. Alex Schneider, Jr. was a charming hostess to the members of the Amusu Bridge Club Tuesday afternoon from 2:30 to 5 o'clock, in her apartment in the Schneider Hotel.

Bridge was enjoyed throughout the afternoon, after which delicious punch and a salad course were served to the following guests, Mrs. Bratton, Mrs. C. P. Buckler, Mrs. J. M. Dodson, Mrs. Siler Faulkner, Mrs. C. T. Hunkapillar, Mrs. W. M. Lewright, Mrs. J. M. McDonald, Mrs. W. W. Merten, Mrs. G. C. Walstead, Mrs. Ben Graias, Mrs. N. A. Hiestand, Mrs. Vasey, Mrs. L. B. Hughey, Mrs. O. K. Baker and Mrs. Frank Shriver.

Mr. and Mrs. W. B. Saulsbury are in Amarillo today on business.

Mr. and Mrs. S. H. Stone and children of Amarillo are the guests of Mr. and Mrs. William Stone.

Mr. and Mrs. W. T. Wright and son left this morning for their home in Denton. They have been visiting in the home of Mrs. Effie Robinson.

Mr. and Mrs. William Stone have as their guests Mr. and Mrs. Elmer Price of Amarillo.

W. H. Shields of Shamrock is in Pampa on business.

Miss Elizabeth Hamilton of Amarillo is a business visitor in Pampa.

M. A. James is a visitor in Pampa.

from San Angelo.

V. V. Polz of Santa Fe, N. M., is in Pampa for a few days on business.

Mr. and Mrs. Clinton Henry returned Tuesday with T. D. Hobart to the J. A. Ranch.

Fred Schaffner and Frank Kahn are enjoying a trip to Dallas and other southern points.

Mr. and Mrs. Frank Hopkins have returned from Canadian, where they have been for the last month in the interest of the Pampa Construction company.

Mrs. J. W. Everly and daughter, Miss Claudia and Mrs. Lawson of White Deer were here shopping Tuesday.

A regular meeting of the Alt. Society of the Catholic church was held this afternoon at the home of Mrs. Lynn Boyd with Mrs. W. C. Riddle and Mrs. Lynn Boyd as hostesses.

Miss Eleanor Zahn has returned from an extended trip to Wichita Falls and Tulsa, Oklahoma.

H. E. Sampson of the Southwestern Public Service company of Amarillo is here on business today.

Wyane O'Keefe of the Panhandle Insurance Agency, Panhandle, was a visitor in Pampa Friay.

Menus for the Family

BY SISTER MARY

BREAKFAST—Ripe pears, cereal, cream, creamed tripe with spinach, cornmeal muffins, milk, coffee.

LUNCHEON—October vegetable puree, croutons, stuffed egg salad, baked quinces on sponge cake with cream, milk, tea.

DINNER—Fricassee of rabbit, mashed potatoes, creamed onions, cabbage and orange salad maple mousse, milk, coffee.

Creamed Tripe With Spinach One pound tripe, 1 Spanish onion, 2 tablespoons butter, 1 1-2 tablespoons flour, 1 cup milk, paprika, 2 cups cooked spinach.

Wash tripe and boil until tender, about four hours if fresh tripe is used and 20 minutes if pickled tripe is chosen. Change water twice for either variety. Cut cooked and cooled tripe into thin shreds about an inch long. Melt butter and cook onion cut in thin slices until tender. Add tripe and shake over the fire until very hot. Sift over flour and stir with a fork until absorbed. Slowly add milk, stirring constantly. Cook until sauce boils. Add paprika to make pink and more salt if necessary. Pour into a hot deep platter and surround with a border of hot cooked spinach.

The tripe should be cooked and shredded the night before and the spinach washed and in its kettle for cooking. The vegetable will cook while making the sauce. Season the spinach with salt, lemon juice and butter.

Lye hominy is made by soaking the whole grain in water that contains lye until the hulls are loosened or softened, then washing the hulled grains in clear water and boiling them. Lye hominy has a distinctive flavor which many enjoy and is used in the same ways as are other coarse hominy.

Steel Dresses for Milady are Shown

LONDON (AP)—Milady may soon be buying her gowns from the United States and Bethlehem Steel Companies. The Shipping, Engineering and Mechanical Exhibition at the Olympia is showing fabrics made from steel which are as fine as the finest muslin. But steel dresses will probably be delayed for some time, as the cost of manufacturing is still prohibitive.

A meeting of the High Bridge club will be held Thursday afternoon at the home of Mrs. Watt Thomas.

Bib Back

A stunning transparent black velvet gown, with shot gold embroidery, features an entirely new bib back. It extends its eight-inch width from neck to waistline, leaving the sides bare.

Social Calendar

Dollar Night and a carnival will be held Friday night at 8 o'clock at the Christian church annex.

The Ladies Auxiliary of the Presbyterian church will hold a meeting in the church Wednesday afternoon with Mrs. Tom Clayton as hostess, and Mrs. J. M. McDonald as leader of the Bible Study.

A joint meeting of the P. T. A. and the child Study club will be held Friday afternoon at the central building at 2:45 o'clock.

A meeting of the Coterie club will be held with Mrs. Chas. Mullen Thursday afternoon at 3 o'clock.

A regular meeting of the members of the Eastern Star will be held Friday night in the Masonic hall.

Circles One and Four of the W. M. U. of the Baptist church will meet Wednesday afternoon at the church, while Circle Three will meet at the home of Mrs. Pierce. There will be no meeting of the Circle Two.

The Methodist Missionary Society will hold its meeting Wednesday afternoon at the home of Mrs. Tom Brabham.

The Missionary Society of the Christian church will meet with Mrs. Frank Meers, Wednesday afternoon.

Members of the Thursday Bridge club will entertain their husbands Thursday evening at the home of Mrs. Raymond Harrah, with Mrs. Harrah, Mrs. Morris Finney, and Mrs. P. C. Carlson as hostesses.

Make Your Check "Good as gold"

120
250
250

When you sign your name to a check are you positive that a sum sufficient to cover the check is in the Bank? Do you know that your bad check will cause the good checks to be questioned? Most people consider their checks as good as gold, but a few persistently issue checks that are returned with the notation—

"Insufficient Funds" ——— or "No Account"

An extensive campaign is under way in Pampa to stop this evil of the "hot check artist." No mercy or partiality is being shown to the offenders. A bad check is a bad check, regardless of the giver.

Let's Stop This Evil Keep Behind The Movement

The merchants and business men of Pampa have pledged themselves to stand shoulder to shoulder in a relentless war on the "Hot Check Artist" and agreed one with the other that they will no longer tolerate the evil. They further pledge themselves to immediately turn over to the county attorney all such worthless checks for collection through legal process, and they further promise to push every case to the limit and refuse to agree to a "settlement" upon payment of the amount involved.

Wisconsin Shows Rapid Population Gain

Wisconsin apparently is increasing her population by threes. Here are the triplet daughters of Mr. and Mrs. George Schneider who live near Cleveland, Wis. They're all healthy and mother is well, too. Left to right they are Margaret, 8 pounds; Dorothy, 6 pounds, and Marcella, 7 pounds.

Interview by "Cub" Reporter Is Still Thrilling to Educator

Jersey's Milk Record 15,499 Lbs. in Year

CLEBURNE, Texas. — "Bright Morning's Sultana," a four-year-old Jersey cow, with ordinary herd care produced in one year on official test 15,499 pounds of milk containing 900.06 pounds of butter fat, which is equivalent to 1,125.07 pounds of butter as ordinarily computed on the basis of 80 per cent fat.

DOESN'T WISH PASSES

BRYAN, Texas—James Sullivan, business manager of the athletics at A. and M. College, is in receipt for a letter from Warren (Rip) Collins, Detroit pitcher and former Aggie football star, in which he says that he does not believe he is entitled to receive a pass to all athletic contests at A. and M. College, a courtesy extended to all former letter men of the school.

Collins was a football star at A. and M. in 1915 and 1916, and was noted especially for his unusual punting ability.

One year Collins left school before the end of the season and for that reason he doubted his eligibility to membership in the letter men's club.

Sullivan assured Collins that he is a full fledged member.

GIRLIGAG

"I am glad," mused Pious Georgia, "that the 1927 style of kissing will not change with the spring style of gowns."

Harding Memorial Takes Shape

Construction of the \$200,000 memorial to President Warren G. Harding is well under way with the completion of the marble work. The structure is on the southeast of the Washington Monument. One few hundred yards from the tomb where rest the bodies of President and Mrs. Harding.

SIDELIGHTS OF COMMERCE

Canada regards American tourists as a good source of business and development of tourists trade is considered as a means of improving economic life. Some 8,305,000 tourists who rolled into Canada last year in 2,076,255 automobiles, spent \$203,197,820. The farmer sees the tourist as a market coming to the farm, and the business travellers do with the manufacturer, hotel and garage keepers and others is looked upon as one of the most important sources of revenue for some provinces.

BAHIA WANTS HOTELS

Exemption from taxation for 15 years is promised any person or corporation building a new hotel in the State of Bahia, which now is devoid of first-class hosteleries. The structure must be six or more stories high, with at least 80 rooms, each equipped with telephone and hot and cold running water, electric elevators, barber shop, bar and proper sanitary facilities, also are required.

BALLOON DEMAND SOARS

Actually and figuratively toy balloon exports soared during the first half of this year. The United Kingdom took half of the \$359,743 worth sold, while British India, Canada and Mexico took most of the rest. Canada paid \$27,820 for a major share of the rubber toys and balls exported. The United Kingdom spent \$20,351 for the next largest consignment.

SOUTH'S DAIRY INDUSTRY

The south's best medium for diversified farming lies in the dairy industry asserts J. L. Kraft of Chicago, head of the cheese company. The company is opening three modern factories in the south, where cheese factories are virtually unknown.

The plants will be at Dyersburg, Tenn; Durant, Miss., and Louisville, Miss. Others will be established as the industry grows, Kraft says.

CORK BUSINESS GROWS

The steady increasing demand for cork for use as insulation in refrigerators draws heavily upon Spain and Portugal, the leading producers. Algeria and Tunis rank second in production and France and Italy third. Cork is stripped from trees, the first crop coming in the trees' 20th year and the better quality between the 40th and 100th years. Yields vary from 50 to 500 pounds per tree, which may live several hundred years.

USED CAR WORLD PROBLEM

The used car seems to be a world problem. Polish motorists are abandoning the custom of selling their old cars only to their friends; the friends are becoming rich enough to buy new machines. Dealers in Bolivia have refused to accept "trade-ins" on new cars and the government has 15 old vehicles it would like to sell at any price. Egyptian dealers have organized a used car sales company to handle all such machines. Rumania once was a good used car market but now motorists want the latest types and improvements.

CUPID LOAFS IN ENGLAND

Managers of Atlantic City hotels say that their maintenance costs have increased enormously because women use so much lipstick and other cosmetics. The women, according to the managers, not only use napkins, bath and face towels to wipe off the lipstick, but also employ tablecloths on occasion. And the lipstick is so strong that bleaching agents are necessary to restore the goods to their pristine whiteness.

Albert Cooke

Albert Cooke, the "movie" star, who plays one of the principal roles in "The Wisecracker," is one of the best-known comedians in motion pictures. He was born in Los Angeles and received his education in Paris and Switzerland. Cooke is 5 feet 10 inches in height and weighs 170 pounds.

Anna Q. Nilsson

Anna Q. Nilsson, the popular screen star, was born in Ystad, Sweden. After small parts she soon became leading woman for a prominent producer. Miss Nilsson has been seen to splendid advantage in many of the popular pictures. She is the true blonde Scandinavian type, with dark blue eyes.

How It Started

By JEAN NEWTON

"STEREOTYPED"

"O H, THE same old thing again—stylos are getting so 'stereotyped'!"—a remark overheard on a street car, where two women were discussing the season's fashions. It is becoming quite common in every-day speech to use the word "stereotyped" as a synonym for the conventional, the "cut and dried," and the term is accepted in quite good usage, though the dictionary does not sanction this significance.

The term comes to us from the parlance of the printing-room. Before "copy," as material to be printed is called, can be turned out the type has to be "set" or composed—that is, the letters must be assembled into words and the words into the sentences and paragraphs, as they are to be "run off." This composing is the most expensive element of the procedure because it takes so much time. Therefore, when it is known that certain material is subsequently to be run off several times, that future editions will be required, the pages are "stereotyped," a process by which the composed or set type is cast into one piece. In this way it can be kept and re-used and the time and labor of resetting are saved.

When we stop to consider that a page that is stereotyped admits of not the slightest change, but remains always the same, it is easily comprehensible how the term came to be used with its popular significance in common speech.

THE YOUNG LADY ACROSS THE WAY

The young lady across the way says mah-jongg originated in China and the man who invented it must have made a fortune in the last two or three years.

Lipsticks Make Trouble

Managers of Atlantic City hotels say that their maintenance costs have increased enormously because women use so much lipstick and other cosmetics. The women, according to the managers, not only use napkins, bath and face towels to wipe off the lipstick, but also employ tablecloths on occasion. And the lipstick is so strong that bleaching agents are necessary to restore the goods to their pristine whiteness.

THE WHY OF SUPERSTITIONS

By H. IRVING KING

PEBBLES

SAYS Mrs. Bergen in a publication of the American Folklore society: "Boys believe that they can prevent the stitch in the side which is liable to be induced by running by means of holding a pebble under the tongue. 'I believe I could run all day and not get tired if I could hold a pebble under my tongue,' said one." Says Doctor Kunz in his "Magic of Jewels and Charms": "Pebble-mania, or lithomania, is an inherent trait in all mankind. From the most primitive man to the most modern this trait is present in a greater or a lesser degree." Not only is man inherently inclined to collect pebbles, but among primitive man there was a tendency to ascribe to pebbles of any peculiar markings, or found under any peculiar circumstances, magic powers.

The boy's belief in the sustaining virtues of a pebble held under the tongue is evidently an atavistic idea which has its counterpart today among peoples living in a primitive state. The Australian aborigines believe that their medicine-men owe their powers to the fact that they have embedded in their bodies small crystal pebbles, and that by transmitting these stones from their own bodies to the bodies of others they can transfer therewith a part of their powers. The Malays have a class of pebbles called Mesticas which are worn by their warriors pressed so closely against the skin as to become embedded in the flesh and which are supposed to confer protection against wounds—in some cases to confer invulnerability. A Dutch writer of the Eighteenth century admits that these Mesticas confer invulnerability but ascribes the fact to "diabolical agencies." The boy's pebble under the tongue, the Mestica of the Malay and the crystal pebble of the Australian are evidently one as to the main idea—and all three are equally conceptions of primitive man.

Do You Know That:??...

"HALCYON DAYS." The Greek word for king-fisher is "Halcyon." According to fable, the ancient Sirens believed the halcyon to nest at sea in a floating nest about the time of the winter solstice. During this time of incubation, which lasted about fourteen days, the waves of the sea were always calm and untroubled. "Halcyon Days" therefore have come to signify a time of happiness and prosperity; a time of tranquility and peace.—Anna S. Turnquist. (© 1927, Western Newspaper Union.)

Teach the Child to Read With Pleasure

A very superficial study of a child's mind would reveal the fact that the primary characteristic is imitation. In fact, this single trait includes the majority of the acquisitive powers of a child up to the age of seven. If a child were shut off from all human contact, all reading matter, until it were seven years of age, the brain of the child would be that of a month-old infant. The problem becomes that of furnishing the proper examples for the child to imitate. His playmates are selected by watchful parents. They endeavor to create an ideal home life for the child, but to pay any attention to the proper selection of reading matter for the child. The most indelible impressions made on a child's mind are those made by pictures and words encountered in the reading of the child. The goal striven for by most parents is early instruction for their children. That, in some cases, is a grave mistake. During the formative period, that is, the early years of the life of the child, the aim should be to amuse the child and not to attempt to instruct it before its brain can grasp the lesson set before it.

Male Seahorse Does Work of Incubator

One of the most remarkable egg incubators known in nature is that of the small seahorse, the water creature that gets its name from its remarkable resemblance to the "horse" used as a knight in the game of chess, both resembling the head and shoulders of a horse. The seahorse father somehow opens up a little pouch somewhat like that of the kangaroo, and the female lays her eggs in this pouch. Then the old man seahorse travels around with these eggs at the end of his body till he finds they have hatched. Then the old fellow opens the pouch, and out come several hundred little seahorses, perfectly formed, yet so small that they can be seen only with the aid of a magnifying glass.

California's Prized Gem

Kunzite, the exquisite gem, the most lately discovered of earth's precious stones, is found in Riverside and San Diego counties in California and nowhere else. Extraordinary brilliant, its colors are pink, lavender and various attractive shades of lilac, and it cuts adequately into any desirable gem form you wish. It is one of the few natural pink gems, and as a lilac gem it stands absolutely alone, as the Tiffany immediately acknowledged by their recognition of its rarity, intrinsic beauty, striking brilliancy and high monetary value. The best stones come from the mines near Pala, but they are also found farther south in San Diego county, often associated with other gems such as beryl, noble garnets, magnificent tourmalines, fine opals and alluring aquamarines.

Where Sea Gulls Nest

Over 50 species of sea gulls are known, ranging in size from that of a pigeon to that of a goose. Naturally they differ much in habits. But generally speaking they nest on the ground along the shore, in swamps or on rocky cliffs. A few species nest in trees. The nests are composed of moss, seaweed, dry grass or marsh weed. When the nest is in the trees it is built on a foundation of sticks and twigs. Gulls usually nest in colonies and the birds set up a clamorous noise when their colonies are disturbed. They perch on the ground along the shore, rarely in trees. Sea gulls are found around large bodies of water in nearly every part of the world.

Take thick chops and into several gashes made with a sharp knife, press as much of the paste as is needed to season each chop. Dredge with crumbs and broil as usual, or saute in a little fat. Deviled crabs, oysters or various fresh fish may be seasoned with the paste and cooked in hot fat, making most tasty dishes.

OUT OUR WAY

—By Williams

HEROES ARE MADE—NOT BORN.

ROTARY—
 Nelson, Amarillo, and Wayne O'Keefe and Dave Warren, Panhandle. Other visitors were Dr. L. V. Dawson, Amarillo, and Frank Kime, local manager, Continental Oil Supply Co.
 President Charles C. Cook announced that no meeting would be held next Wednesday noon. Instead, a meeting will be held at night at which the ladies will be invited. Members and wives of Canadian Rotary Club members will be guests that evening.
 "Spokes," new official club publication, was distributed for the first time.
 Announcement was made of the results in the recent attendance contest as follows: Panhandle, 96.1 per cent; Dalhart, 94.2; Canadian, 91.2; Pampa, 90.7. The Pampa club will entertain these clubs at an early date. Since the club's organization, the attendance has averaged 91.6 per cent.

BASEBALL—
 ham purposely bumped him. Smith out Lazzari to Gehrig. No runs, no hits, no errors.

Third Inning
 New York—Crowd booted Lazzari as he came to the bench. Combs was thrown out at first by Grantham who took Combs' high topner near second. Koenig safe at first when Grantham fumbled his grounder. Ruth singled into right. Koenig going to second. Gehrig walked filling the bases. Koenig scored when Muesel walked. Bases remained full. Lazzari forced Muesel, Wright to Grantham, and Ruth scored on the play. Gehrig scored and Lazzari went to third when Smith let Traynor throw get through him. Dugan lined out to Barnhart. three runs, one hit, two errors.

Pittsburgh—Kremer got two base hit to right on ground rules. L. Waner flied out to Muesel. Muesel dropped Barnhart's fly. Kremer held second. Kremer scored on P. Waner's single. Barnhart halted at second. Wright forced P. Waner, Lazzari and Koenig, Barnhart going to third. Traynor forced Wright Koenig to Lazzari. One run, two hits one error.

Fourth Inning
 New York—Collins sent up a high fly to L. Waner. Hoyt flied out to P. Waner. Barnhart took Combs' line mash after long run. No runs, no hits, no errors.

Pittsburgh—Grantham went out to Gehrig unassisted. Harris threw out Koenig at first. Smith sent high fly to Collins. No runs, no hits, no errors.

IFth Inning
 New York—Koenig got two base hit to right. Grantham took Ruth's grounder and beat him to first. Koenig scored on Gehrig's fly to L. Waner. Muesel flied to right. One run, one hit, no errors.

Pittsburgh—Kremer fanned on third called strike. L. Waner doubled along left field foul line and scored on Barnhart's single past Koenig. P. Waner's grounder bounced off Hoyt's glove, going to Lazzari who juggled the ball. Official scorer gave it as a hit. Barnhart went to second. Wright a-flied to Combs, Barnhart going to third. Combs made a fine catch off Traynor's short fly. One run, three hits, no errors.

Sixth Inning
 New York—Lazzari got a two base hit. Miljus replaced Kremer in box for Pirates. Dugan sacrificed Smith to Grantham. Lazzari going to third. Collins walked. Hoyt hit into double play. Wright to Grantham to Harris. No runs, one hit, no errors.

Pittsburgh—Grantham sent a hot grounder to Gehrig who touched him at first. Harris flied to Ruth. Smith hoisted to Ruth who came in

Next Wednesday Is Trade Day

Next Wednesday is to be Trade Day in Pampa.

Pampa merchants have been planning for the day since last month, when the last one was staged. Hundreds of persons in Pampa's trade territory are planning to come to the city Wednesday to get better acquainted and to take advantage of the very unusual bargains offered at the business houses.

Merchants of the city are eager to meet everyone in Pampa's big trade territory. Partly because of Trade Day, and partly because of the low prices and high quality offered here at all times, the city's trade territory, always large, is steadily expanding. Many persons will first come here on Trade Day, get acquainted, and then come often. They will know that Pampa stocks are large, of exceptional quality, and invariably worth the purchase price.

The merchants are working hard to select "specials" which are most desirable, and offer them below the real worth as a get-acquainted inducement. Unusual bargains will be offered, and a hearty welcome extended everyone.

Each trade Day will give Pampa merchants an opportunity to make more friends—friends who will return to the city often to the advantage of all.

That is why Pampa extends a most cordial invitation to this entire territory to visit the stores on Trade Day—next Wednesday.

Telephone Cable Accidentally Cut By Ditch Digger Here

A 102-wire underground telephone cable connecting Pampa with Borger, Roxana, The Cabot Co. at Skellytown, and the farmers on the Borger road, was severed last night.

The cable was cut by the ditch digger making the water extension on the Borger road. The cable was out in front of the T. D. Hobart residence where a fire plug is to be installed.

A cable crew from the Southwestern Bell Telephone company repair apartment at Amarillo is in the city today repairing the connection. It takes an expert, as each of the 102 severed wires must be connected as before and a tester or battery machine has to be used with a "pick instrument" to find the correct wires for a connection. An emergency connection between Pampa and Borger was installed this morning and it is expected that the other lines will be connected tonight.

Republicans Dine With Coolidge, But Are Mum on "Choose"

WASHINGTON, Oct. 5.—A group of Republican National committee men were breakfast guests today of President Coolidge at the White House, but those who were present said later that neither the president's statement that he does not choose to run for re-election next year nor any other political subject was discussed.

WASHINGTON, Oct. 5.—President Coolidge confided to one of his breakfast guests today that he felt better in health than at any time since he entered the White House. The guest, who declined to permit his name to be used, declared that the President added that he believed that he was withstanding the rigors of presidential life better than any of his predecessors of recent years.

DELANEY WELL FLOWING

The Delaney No. 1 Jackson in section 38, block B-2, which ceased to flow Tuesday after a swab was let down, came in this morning for more than 100 barrels an hour and was increasing steadily when last reported.

Walker's Coloradoans, the orchestra that always makes a hit in Pampa, will be a feature at the Firemen's ball at the Schneider Hotel Friday night from 9 to 12 o'clock. Tickets to the ball may be secured from any member of the fire department or at the city hall.

LOCAL MEN TRANSFERRED

J. P. Greer, who opened the local branch store of the National Supply company, and has been in charge for the past year, has been transferred to Pyote to take charge of the new branch of his company there. He will be accompanied by Frank Thompson from the local office, who will be in charge of the office at the new store.

Mrs. Pebble Collins was admitted to Pampa hospital yesterday.

Lila Mae Culpepper is a new patient.

Kisses Expensive On Hollywood Lots

(By The Associated Press.)
 HOLLYWOOD, Cal.—Screen kisses may look romantic, but they cost money.

The average cost of a kiss done in celluloid and put in a tin can for shipment to the amusement-hungry world is \$53.70, t. o. b. Hollywood. That is the estimate of J. J. Cohn, production manager of Metro-Goldwyn-Mayer.

Cohn assumed 15 feet as the average length of a kiss as finally screened (with about 120 feet of film actually used during the production, before cutting), and took \$100 a day as the average salary of hero, heroine and director.

Ordinarily it takes about half an hour to film a kiss several shots of the same scene being made to insure one good one. This means a half hour for which numerous persons beside the star and director are drawing salary. So the detailed budget of a standard screen kiss would look something like this:

One player (male) for half hr.	\$6.25
One player (female)	6.25
Director	6.25
Five electricians	5.00
Two "grips" (helpers on set)	1.00
Cameraman (at \$200 a week)	2.75
Assistant cameraman	1.00
Rest of staff	5.00
Cutting the scene	3.00
Projection room charges	.50
Tilting (pro rata of cost of tilting completed picture)	3.00
Electricity used	1.50
Makeup (repairing after kiss)	20
Film (120 feet at 10 cents, which includes developing)	12.00
Total	\$53.70

Wherefore, executives declare, kisses are material items in the high cost of motion pictures.

U. S. Sends Display To Spanish Exposition

WASHINGTON—In tribute to the influence of Spain on the colonization and cultural development of the United States, the Spanish Mission style of architecture will be used in American exhibition buildings at the International Exposition in Seville, Spain, in 1928.

The commission in charge of this country's display at the Spanish exposition, headed by former Gov. Thomas E. Campbell of Arizona, has designated William T. Johnson of San Diego, Calif., as architect and has planned a comprehensive group of exhibits showing activities of the American government, notably in agriculture and scientific endeavor. Private commercial exhibits from the United States will be housed in other exposition buildings.

The American buildings will include one permanent and two temporary structures, and after the fair the permanent structure will house the American consulate at Seville.

The exposition which starts Oct. 12, 1928, will include the Ibero-American nations of the world. All the South American republics will be represented.

Seville, with a population of 250,000, is the largest city and the commercial center of southern Spain. In its cathedral lie the bones of Columbus, who sailed for America from the little port of Palos only a few miles away. From this region came most of the early settlers of Cuba, Florida and California, and for many years Seville was the only port from which vessels for America were allowed to clear.

A coddled egg is dropped into a vessel of water just under the boiling point, the vessel covered and removed immediately from the heat while the egg cooks slowly for about eight minutes.
