Federal Hospitalization Probe Due

Liberals Win Comfortably In Japan Vote

TOKYO — (AP) — Prime Minister Shigeru Yoshida's Liberal Party rode a general pro-occupation ticket to a strong victory in yesterday's House of Councillors election.

Still incomplete returns showed the Liberals had won a plurality in the upper house that probably will stand.

With only 22 seats still in doubt the Liberals had obtained 46 seats. The Social Democrats had 30, the Independents 16, the Green Wind Party nine, Democrats nine, Farm Cooperative two and the Communists and Farm Labor parties one each.

The government has announced a plan to outlaw the Communist Party. The Communists, angered by the plan, have threatened to retaliate with "human bullets."

There has been no indication from the government what effect the plan to outlaw the Reds would have on any that might be returned to office.

The Communists entered 50 candidates, three of them incumbents. The present Liberal total when combined with the party's holdover of 23 seats gives it 69 members in the upper house. On the basis of present returns the Socialists went into second position with an over-all total of 54 and the formerly dominant Green Wind Society dropped to 30.

The Green Wind Society backed General Douglas MacArthur on a tax and reform bill. Their defeat in the election was taken as a rebuke by voters exercising their war-born governmental voice.

Tribunal Outlaws Diner Segregation

WASHINGTON—(AP)—The Supreme Court today outlawed segregation of Negroes in railroad dining cars.

\$6,000,000 Plan For State Hospital Building Proposed

AUSTIN — (AP) — A six million dollar building program was recommended today to the State Board for Hospitals and Special Schools.

Along with it went a time table calling for completion of the first phase of the plan to relieve overcrowding and to modernize hospital facilities by August 31, 1951. The recommendation came from the board's technical staff.

Executive Director Moyné L. Kelly told the board in a written report that after the first phase of building operations is underway, "we will have some time to study and properly position advances within several fields of operation."

A systematic and orderly building program for the remaining six years (after Aug. 31, 1951) is being worked out, Kelly said. The special session of the Legislature provided money by a long-range tax on cigarettes. This fund is now accumulating at the rate of about \$500,000 a month, Kelly said.

The immediate building program recommended would relieve the overcrowding in the state's most congested areas by 2,500 beds.

The hospital board's executive staff also recommended full activation of a Kerrville institution for custodial care of the cerebral palsy cases.

"This can be justified in the fact that the people are beginning to plead for such an institution," Kelly told the board.

Kelly reported the population of all the state institutions under the board's direction increased from 21,158 Sept. 1, 1949 to 22,385 on April 30, 1950.

By an 8-0 vote the high tribunal declared such segregation violates a section of the Interstate Commerce Act which prohibits "any undue or unreasonable prejudice" to any person using the railroads.

Justice Burton wrote the court's opinion. Justice Clark took no part.

Those who voted with Burton are Chief Justice Vinson and Justices Black, Reed, Frankfurter, Douglas, Jackson and Minton.

The court was expected to rule on two other segregation cases — perhaps later in the day. They involved segregation by state universities.

The dining car decision was an appeal by Elmer W. Henderson, a Washington Negro. While serving as a field representative of the president's Committee on Fair Employment Practices in Birmingham, Henderson protested that he was unable to get a meal on a Southern Railway Company diner.

Southern railroads later adopted a policy of setting aside a table or two for Negroes in dining cars. These tables are separated from others in the cars by partitions or curtains. Henderson, however, pressed his fight against any segregation. He is now a director of the American Council of Human Rights.

The new dining car policy was approved by the Interstate Commerce Commission. When Henderson took his fight to the Supreme Court, the commission defended its action, but the Justice Department opposed it.

The department insisted that "the notion that separate but equal facilities satisfy constitutional and statutory prohibitions against discrimination is obsolete."

Agreeing, Justice Burton said today "the right to be free from unreasonable discriminations belongs to each particular person."

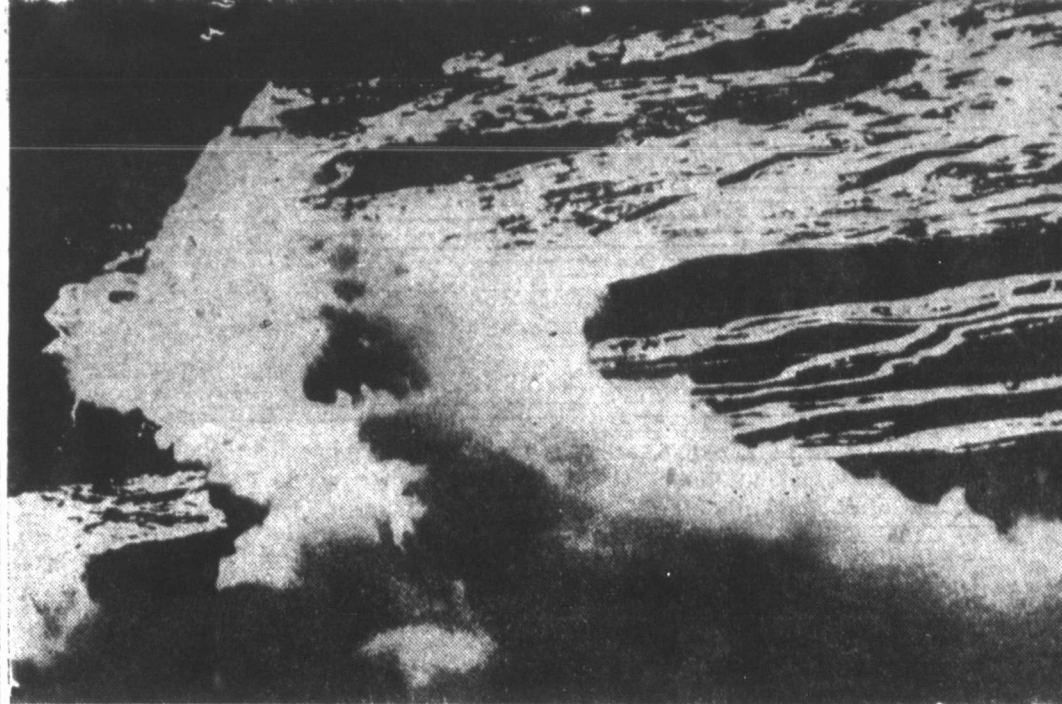

"Where a dining car is available to passengers holding tickets entitling them to use it, each such passenger is equally entitled to its facilities in accordance with reasonable regulations."

Burton added:

"The denial of dining service to any passenger by the (railroad) rules before us subjects him to a prohibited disadvantage."

"Under the rules, only four Negro passengers may be served at one time and then only at the table reserved for Negroes. Other Negroes who present themselves are compelled to await a vacancy at that table, although there may be many vacancies elsewhere in the diner."

The railroad thus refuses to extend to those passengers the use of its existing and unoccupied facilities. The rules of the railroads impose a like deprivation upon white passengers whenever more than four of them seek to be served at the same time and the table reserved for Negroes is vacant.

LAVA POURS AT RECORD RATE — This spectacular night photo shows molten lava racing down the side of famed Mauna Loa volcano, near Kona, Hawaii, as it erupts, sending its heaviest lava flow of the century to the Pacific Ocean. The great geysers of steam and other bursts of flame in the picture are caused by gas exploding inside the cooling lava. Sixty to eighty homes were destroyed by lava and many others evacuated since no one knew where the deadly streams would strike next.

Three-Man Group Appointed To Study Veterans Program

WASHINGTON — (AP) — President Truman today appointed a three-man committee to review the whole controversial veterans hospitalization program.

The committee, a statement by the president said, will pay special attention to the problems of paraplegics and amputees.

The president named Dr. Howard A. Rusk, chairman of the department of physical medicine and rehabilitation at the New York University College of Medicine and Bellevue Hospital; Dr. Arthur Abramson, head of the department of physical medicine and rehabilitation of the Veterans Administration hospital, the Bronx, an outstanding physician and himself a paraplegic; and Rear Admiral Robert L. Denison, his own naval aide, to serve on the committee.

The president's action came as the aftermath of protests from veterans and from members of Congress over the abandonment of some veterans hospitals.

Truman Signs Aid Measure

WASHINGTON — (AP) — President Truman signed the \$3,121,450,000 foreign aid authorization bill today, calling it a "major contribution to peace and freedom in the world."

The measure was signed at a White House ceremony. It authorizes five programs of world-wide aid, including funds for the third-year operation of the European Recovery Plan, and a start on the "Point Four" proposal to develop backward areas.

"Taken together," Mr. Truman said of the five programs, "they add up to a broad, enlightened and typically American enterprise in the building of a safe and prosperous world."

In his statement, the president expressed special pleasure over the \$35,000,000 fund approved for technical aid under the Point Four program.

He said it is an important step toward strengthening freedom and defeating "Communist imperialism," and expressed hope that Congress will soon pass a companion measure authorizing the government to encourage and support private investment in needy nations.

New 'Super Panel' May Be Named To Review '81 Cases'

WASHINGTON — (AP) — A White House source said today "there is a strong possibility" that President Truman will appoint a "super panel" to review the cases of 81 State Department employees whose loyalty has been questioned by Senator McCarthy.

This source, unquotable by name, said no final decision has been made but that Mr. Truman is considering the idea.

He said the "super panel," if created, would not supersede the present loyalty review system, but would assist it.

The president may discuss the proposal at a conference he has scheduled later today with Senator Tydings (D-Md.), chairman of the Senate foreign relations subcommittee investigating McCarthy's charges.

Tydings' committee now is concentrating on the 1945 Amerasia case which involved illegal release of secret government documents from the State Department.

It called Emanuel S. Larsen, former State Department employee who was one of the six arrested in the case, for secret quizzing this afternoon.

The group held plans for questioning of Larsen behind closed doors despite a demand from Senator Knowland (R-Calif.) for a public airing of the "unexplained circumstances" of the hotly disputed case.

Acheson Says End Of Arms Program Is Not Predictable

WASHINGTON — (AP) — Secretary of State Acheson soberly told Congress today that America's military assistance for the non-Communist world will still be less than half done a year from now.

He would not set a shut-off date but Secretary of Defense Johnson expressed hope for an end to the task in 1953 or 1954.

Appearing before the House Foreign Affairs Committee in the half of a second year of the mutual defense aid program, Acheson would not "hazard an opinion" how much longer U.S. arms aid will be required.

But in response to an inquiry by chairman "Gene" McNamara, whether the "major portion" of the program will be completed by the end of the second year program ending in 1951, Acheson asserted:

"I should not think I could say that. In these two years (including 1951) of the program we have completed a major portion of our effort."

"If 'major portion' means 50 percent — no, I don't think so."

The secretaries of state and defense agreed that arms aid for the non-Communist world is the one road to peace and security left open.

"The Soviets have roadblock" every other avenue," Johnson testified.

Both cabinet officers testified in support of President Truman's call for the \$1,222,600,000 authorization to bolster the defenses of countries opposing communism.

Costa Rica Police Recover Lost Gems

SAN JOSE, Costa Rica — (AP) — Costa Ricans have recovered the golden mantle and precious gems stolen May 12 from the statue of their sacred patron saint—the Virgin of the Angels.

Detective Chief Major Jorge Pacheco said the jewels had been recovered near Cartago, 20 miles southeast of San Jose, and that the presumed thieves had been arrested. He said full details of the case would be disclosed later.

Costa Ricans were jubilant when Major Pacheco made the announcement last night. The seven-inch black stone image and its adornments were stolen from the basilica at Cartago by thieves who slew the church watchman.

The statue itself was found May 20 in the upper roof purlin of the basilica.

Estimates of the gems' value have ranged from \$150,000 to nearly \$1,000,000.

Japan Naval Bases Called Unnecessary

TOKYO — (AP) — Adm. Arthur W. Radford said today the United States does not need naval bases in Japan.

Yokosuka is "a very fine base" of the Pacific Fleet commander said at a news conference, but "it isn't essential."

The Navy could get along fine with Guam and Pearl Harbor, Radford said, by using mobile support and supply ships. He said the Pacific Fleet, now bolstered by carrier-based jet planes, is "adequate to any immediate tasks we can foresee."

Six Boat Captains Arrested by State

HOUSTON — (AP) — Captains of six shrimp boats have been arrested and charged with fishing in Texas waters without Texas licenses.

State game wardens seized five of the boats off Freeport and the other off Port O'Connor yesterday.

All of the shrimpers are operating out of Brownsville, but the game wardens said the boats were from other states — most of them from Louisiana.

Japanese Pact Seems Nearer

By JOHN M. HIGTOWER
WASHINGTON — (AP) — Agreement between the State and Defense departments on plans for a Japanese peace settlement is expected to result from a series of conferences in Tokyo.

Secretary of Defense Johnson and the chairman of the Joint Chiefs of Staff, Gen. Omar Bradley, are scheduled to leave next weekend on a Pacific tour that will take them in about 10 days to Gen. Douglas MacArthur's Japanese occupation headquarters.

John Foster Dulles, Republican adviser whom Secretary of State Acheson has asked to work on Japanese policy, also is planning to leave Washington for Tokyo about June 14 and will be there about the same time as Johnson.

Johnson is said authoritatively to be making the trip partly to find out for himself at first hand exactly what MacArthur thinks about the treaty and security.

The spotlight is on the Democratic race. There isn't a single contest in the Republican primary. Edwin L. Mechem, GOP gubernatorial candidate.

Impartial observers aren't making many predictions. Most expect the winner in the Democratic governor's contest to be either Chavez — former U. S. judge in Puerto Rico — or U. S. Rep. John E. Miles, a former governor. But Corporation Commissioner Ingram Pickett and Mayor Lake Frazier of Roswell both are reported showing strength in unexpected places.

One of the beliefs is said to be an exact replica of the original, both as to appearance and sound. Sherman White, chairman of the drive, urges all Pampans to drop by and see the duplicate of the historical symbol.

Leopold's Backers Plan King's Return

BRUSSELS — (AP) — The Social Christian Party, victorious in yesterday's parliamentary elections, embarked today on a program to bring exiled King Leopold III back to the throne.

Enthusiastic party leaders predicted this will be accomplished by July 1 but leaders of the anti-Leopold opposition were not so sure.

The Social Christians, predominantly a Catholic party, won 108 seats in the lower house against 104 for the combined anti-Leopold forces of Socialists, Liberals and Communists. Ministry of the Interior officials said the Social Christians are sure to get control of the Senate, too.

By law, only a majority of both houses sitting in joint session can end the regency of Prince Charles, Leopold's brother.

In yesterday's balloting the Social Christians won 84 of the 106 Senate seats at stake. Ministry of Interior officials said the party would get a minimum of 25 of the 46 seats which will be chosen by provincial councillors and at least 11 of the seats which the senators fill themselves. This would give pro-Leopold partisans at least 90 of the Senate's 175 seats, or 198 votes to 189 in a joint session.

Social Christian strategy calls for formation of a government which can win a vote of confidence in both houses when they convene June 20. Then the Senate and House would be summoned into joint session to end the regency and return Leopold to the throne.

But the ardently anti-Leopold Socialist Party, which also made gains in the election, could throw a monkey wrench in the planning by calling a general strike and thus creating general unrest. The Socialists threatened prior to the election to follow such a course if Leopold is called back. The party's leaders were meeting today to consider a course of action in the light of yesterday's voting in which the Social Christians got only 47.74 percent of the popular vote.

The Socialists could interpret this as indicating that slightly more than half of Belgium's population was still opposed to restoring the handsome, 48-year-old monarch to the throne.

PIONEER DIES

CORSICANA — (AP) — Mrs. J. A. Gunter, 74, native Texan and Corsicana resident since 1914, died early today. Services will be held tomorrow.

Liberty Bell Being Shown Here Today

The replica of the Liberty Bell was scheduled to go on display at 1:30 this afternoon on E. Kingsmill between the Court House and City Hall. The truck carrying the bell will be parked near the corner of Russell and Kingsmill.

It is reported that the bell will remain over night in Pampa.

Used in connection with the latest U. S. Savings Bond Campaign, the bell is said to be an exact replica of the original, both as to appearance and sound. Sherman White, chairman of the drive, urges all Pampans to drop by and see the duplicate of the historical symbol.

32 Area Boy Scouts Given Opportunity To 'Explore' Canada

Thirty-two Boy Scouts of the Arobo Walls Council will be given the opportunity to explore virtually uncharted Canadian wilderness in July.

The group will leave July 16 by bus for Ely, Minn., a canoe base for Boy Scouts. At that point, they will pick up their own means of transportation, and head out into the unexplored areas of Canada.

They will survey lands, lakes, and other types of nature encountered on the trail. Incidentally, boys who discover lakes that are unnamed can have the privilege of giving a name to such bodies of water.

Four adult leaders will accompany the group. Leader in charge will be Thomas C. Cochran, field Scout executive. Others will include Farris C. Oden, W. B. Weatherred, both of Pampa, and "Spec" Culp, Boyer, Pa.

During the bus trip to Minnesota, the boys will stop along the route and camp out each night, at a park or some other available area.

To be eligible for the trip, a boy must be 14 years or older and have his canoe badge. Boys desiring to go must make application with the Scout office in the city hall not later than June 15.

Women's College President Is Named

DENTON — (AP) — John A. Gunn, 44, president of San Angelo College, was named president of Texas State College for Women today.

He was named by the college's board of regents. S. B. Whittenburg of Amarillo, chairman of the board, said the action was unanimous.

Whittenburg said Gunn would assume his duties Sept. 1. He will succeed Dr. L. H. Hubbard, 69, long-time head of the school, who is retiring Aug. 31.

The announcement by the board followed graduation exercises at the woman's college today.

Sixth Candidate in Gubernatorial Race

CORSICANA — (AP) — A South-east Texas teacher became Texas' sixth candidate for governor today.

She is Mrs. Benita Louise Mark Lawrence, 34, of Brenham, Washington County.

Her formal application and \$100 filing fee were received today by John C. Calhoun, state Democratic Party chairman.

Midnight today is the deadline for filings for the July 22 Democratic primary.

Last to file previously was Gene S. Porter of Houston, whose application arrived Saturday afternoon. Gov. Allan Shivers made his long-expected application earlier Saturday. Other candidates are Cazo March of Waco, Charles B. Hutchinson of Dallas and Wellington Abbey of Houston.

You can now buy new and used outboard motors for as low as \$2.00 per week. Bert A. Howell & Co., 119 N. Ward. Phone 152.

BULLETIN

WASHINGTON — (AP) — The Supreme Court today gave the federal government top rights over the oil-rich tidelands off the coasts of Texas and Louisiana.

Justice Douglas delivered the court's opinions in separate cases.

In the case of Texas, Justice Reed wrote a dissenting opinion in which Justice Minton joined. Justice Frankfurter wrote a separate dissent.

Justices Jackson and Clark took no part in either.

BAN DROPPED

OKLAHOMA CITY — (AP) — Scientific sessions will be open to Negroes next year in the Oklahoma Medical Association's House of Delegates, the group announced.

Egypt Ratifies Royal Marriage

CAIRO — (AP) — In a ceremony as simple but sumptuous as royalty could arrange, King Farouk yesterday ratified the marriage of his sister, Princess Faikah, with Foad Sadek, a commoner.

The rites, performed at the monarch's vast Kubba palace in suburban Cairo, followed a stamp of approval on Faikah's marriage, which took place in Sacramento, Calif., last April 5. The act has been approved by the Grand Mufti of Egypt, this country's top religious authority, as meeting Moslem requirements.

Another sister, Princess Fathia, who also wed a commoner, was having more difficulty winning royal approval of her marriage. Farouk stripped Fathia of her royal title and privileges after she married a Coptic Christian, in San Francisco on April 25. Ghalib became a Moslem and the two were remarried in a Moslem ceremony in California last week.

Blockade-Running Vessel Is Shelled

HONG KONG — (AP) — Six passengers were killed and six were wounded yesterday when two Chinese Nationalist warships pumped more than 200 shells into the British blockade runner Cheung Hing off Amoy.

The attack took place on the high seas some 20 miles outside of territorial waters, the manager of the shipping company here said.

The Cheung Hing is an 800-ton coastal steamer. It had called at the Red port of Amoy with a cargo of fertilizer from Hong Kong. The ship was on its way back here.

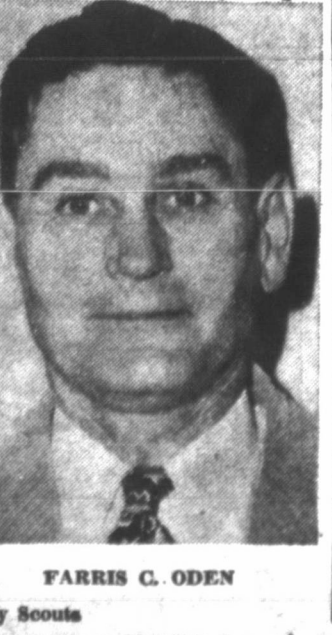

Captain J. Skinner of the Cheung Hing notified his office here that the vessel was leaking badly from shell holes and had developed a 10 degree list.

The ship had aboard more than 100 Chinese passengers and a crew of 62, including four Europeans.

Girl Feared Victim Of Bear in Canada

QUEBEC — (AP) — Hundreds of searchers combed the woods near here today for a three-year-old girl police fear may have been attacked by a bear.

Lieut. Martin Healy of the provincial police said bear tracks had been found about a quarter-mile from a home where little Nicole Renaud was visiting before she disappeared Saturday in a nearby forest. He said the child may have been attacked by a bear.

Senior Kit Kats Honored at Party

This year's high school graduates who are members of the Kit Kat Klub were honored at a buffet supper in the home of Miss Phoebe Osborne. Honorees were Laura Nell Berry, Betty Wilson, Theola Reim, Beverly Brandt, Eanell Johnson, Norma Manatt, Cherie McDaniel and Martha Parks.

Highlights of the Kit Kat Klub year have been the presentation dance, given in the Schneider Hotel during the Christmas holidays, and the graduation dance, also given in the Schneider, immediately following the graduation ceremonies at the high school.

New members presented at the presentation formal were Joan Cantrell, Gail Finkelstein, Sharon Burton and Pam Ketter.

In the latter event a ceremony was conducted in which the senior members and their dates walked through the aisles, exchanging their senior rings. Music for the dance was furnished by Bill Hart's orchestra. Kit Kat Klub members for the year are: Mrs. Howell Costantino.

The first ambulance called during the epidemic was assigned to the work of transporting from the field on stragglers.

Capon are specially treated roosters which grow to non-ordinary average size and produce choice meat.

KIT KAT KLUB MEMBERS for the 1949-50 club year, above, are: top row, left to right—Joan Cantrell, Harriet Schwartz, Jane Hampton, Pam Ketter, Sharon Burton, Phoebe Osborne. Second row, left to right—Diana Crawford, Berdene Laycock, Eulaine Ellis, Jewell Moseley, Jane Wilson, Gail Finkelstein, Jan Sanders, Nancy Patterson, Vivian Brake. Third row, left to right—Delores Miller, Theola Reim, Martha Parks, Mrs. Russell Cartwright, sponsor, Laura Nell Berry, Cherie McDaniel, Ann Perkins. Fourth row, left to right—Eanell Johnson, Beverly Brandt, Betty Wilson, Norma Manatt.

Dr. Orion Carter Speaks to P-TA On 'Teamwork'

Dr. Orion Carter, pastor of the First Methodist Church, spoke at "Teamwork in the Social World" at the final meeting for this school term of the Horace Mann Parent-Teacher Association. The meeting, held in the school auditorium, was opened by group singing, led by Mrs. John Brannham, and a devotional by Mrs. Carter.

"It takes knowledge and personality insight to know how to deal socially with children and youth, and to 'grow' a generation of socially responsible adults takes teamwork between parents, teachers, religious workers and the community at large in providing information and laboratory experience in child growth and development," Dr. Carter stated.

Mrs. R. W. Orr, president of the City Council of P-TA, installed new officers as follows: Mrs. Cleo Hoyer, president; Mrs. S. B. Haralson, vice president; Mrs. Calvin Foster, recording secretary; Mrs. Dee Dodson, corresponding secretary; Mrs. T. J. Hill, treasurer; Mrs. Emmett Lane, historian; Miss Josephine Thomas, parliamentarian; Mrs. J. C. Flowers and Mrs. T. G. Moore, Council representatives.

Mrs. L. J. Zachry, retiring president, was presented a life membership of the P-TA in appreciation of the work she has done as president the past two years.

Immediately after the meeting a tea was given in honor of approximately 90 new pre-school mothers. Each guest was presented a corsage of blue and gold carnations.

The tea table was centered with a crystal bowl of blue and gold punch. Mrs. T. J. Hill ladled ice cream from a crystal bowl. Mrs. A. A. McElrath was in charge of the tea, assisted by Mrs. Huelyn Laycock.

Mrs. L. J. Zachry, retiring president of the Horace Mann Parent-Teacher Association, acted as toastmistress when the executive committee of the P-TA entertained the faculty at an appreciation dinner in the school cafeteria. Others honored were Mr. and Mrs. Knox Kinard, Mr. and

ENGAGED—Announcement has been made by Mrs. F. E. Converse of the approaching marriage of her daughter, Miss Willa Dean Roberts, and Billy Joe Durrett, son of Mr. and Mrs. W. Y. Durrett of Fort Worth. The ceremony will be read in the First Baptist Church in Fort Worth on June 12.

Texas Elks Select Amarillo for Meet

BROWNSVILLE—(AP)—J. Hollis Pray of Fort Worth yesterday was chosen president of the Texas State Elks Association and Amarillo picked as the 1951 convention site.

Regional vice presidents include Bob Barnett, Galveston, southeast; Charles E. Barrett, Amarillo, west; John Knomas,

Mrs. M. F. Helmick, Mr. and Mrs. Joe Wilkinson and Mary Joe, Mr. and Mrs. Homer Craig and Joe, and Mrs. Jack Studebaker and little son, Mr. Kinard pronounced the invocation.

Each table was centered with a bouquet of red roses and special accordion music was played by Mrs. Studebaker. Mr. Wilkinson, local motor policeman, who has patrolled the crossing at Alcock and Faulkner during the school term, was presented a gift. Gifts were also presented to Mrs. Emory Noblitt, Mrs. Alma Giddens and Mrs. Bunya Shultz, who have helped in the cafeteria.

Hostesses were Mrs. Ross Byars, Mrs. D. L. Tucker, Mrs. Dink Altman, Mrs. Coyie Ford, Mrs. A. A. McElrath, Mrs. Cleo Hoyer and Mrs. Huelyn Laycock.

Wayside HD Members Are Special Guests Of Worthwhile Club

Members of the Wayside Home Demonstration Club were special guests of the Worthwhile Club at a meeting held Friday in the home of Mrs. G. H. Anderson. A demonstration on corset making was given by Mrs. W. W. Estes. Suggestions were given by Mrs. Estes as to the type, size and color of a corset, which, she said, are governed by the occasion, color scheme and where the corset is to be worn—shoulder, neckline or waist.

The business meeting was conducted by the president, Mrs. B. M. Vaughn. Roll call was answered with suggestions for the 1951 yearbook. A 10-minute demonstration was given by Mrs. A. C. Crawford on poster slides and exhibit idea slides.

Group singing was led by Mrs. O. G. Smith, recreation chairman. Punch and cookies were served. The following members were present: Mrs. N. B. Cude, Mrs. G. H. Anderson, Mrs. Ray Robertson, Mrs. John A. King, Mrs. O. A. Wagner, Mrs. L. J. Flaherty, Mrs. Jack Vaughn, Mrs. O. G. Smith and Mrs. G. L. Lunsford, Mrs. Harold Cockburn, Mrs. A. C. Crawford, Mrs. Ray Tinsley, Mrs. D. L. Lunsford, Mrs. B. M. Vaughn, Mrs. A. E. McElrath, a guest, Mrs. C. E. McMinn, Mrs. L. L. Stovall, a Wayside guest, Mrs. J. S. Fuqua, Mrs. Lowell Osborne, Mrs. W. R. Dunn, Mrs. Clint Caylor, Mrs. H. B. Taylor, Mrs. W. A. Green and one new member, Mrs. W. W. Estes.

The chief source of the world's supply of amber is the Baltic coast of Germany, Lithuania and Latvia.

Waco, central; and Victor Ferchill, Longview, east. Other new officers include W. J. Frazier, El Paso, trustee of the Texas Elks Prized Childrens Board; W. H. Driscoll, Temple, trustee of the state association.

JACOBY ON CANASTA

Keep Lots of Cards in Hand

By OSWALD JACOBY
Written for NEA Service

After you have played Canasta a few times, you understand the importance and the value of keeping a large number of cards in your hand. This is particularly important when you are trying to pick up a frozen discard pile.

For example, suppose you have 20 cards in your hand. It might be fairly simple for you to hold eight pairs and four odd cards, since there are only 11 different nations altogether—aces, kings, queens—down to fours; you are a heavy favorite to get the pack quickly when you hold as many as eight different pairs. Your opponent can discard safely only four or three denominations, and the odds are that he either will not hold enough safe cards or will not know which cards are safe.

Now consider the other extreme. You hold only three cards in your hand. At most you can have but one pair, and you may not have even that. It is almost impossible for you to get the pack since even if you are lucky enough to have a pair, the opponent at your right is not likely to hit upon that particular denomination to discard.

The advantage of holding many cards applies also when you are trying to find a safe discard. With 20 cards in your hand, you are bound to have a wide choice. Assuming that you know what is safe, you will probably be in a position to throw a safe card. With only three cards in your hand, you may be helpless even though you are quite sure which cards are safe and which are unsafe. You may hold only dangerous cards, and you will be compelled to throw one of them. I have taken extreme cases to show the general principle. Usually you will not hold as many as 20 cards or as few as three. But the general principle holds good. The more cards you hold, the better chance you have to get the pack and the easier it is for you to find a safe discard.

Q: My partner and I had a natural canasta of sixes and K.

Political Calendar

The Pampa News has been authorized to present the names of the following citizens as candidates for office subject to the action of the Democratic voters in their primary election on Saturday, July 22nd, 1950.

- For Congress, 18th Congressional District:
 - LeROY LA-MASTER.
- For County Sheriff:
 - G. H. Skinner, RYLE.
 - B. H. Rude, JORDAN.
 - HOLLACE S. JOHNSON.
- For County Clerk:
 - CHARLIE THUT.
- For County Attorney:
 - BILL W. WATERS.
 - JOHN F. STUDEBAKER.
- For County Superintendent of Public Instruction:
 - HUELYN W. LAYCOCK.
- For Judge, 1st Judicial District:
 - H. B. HILL.
 - L. M. GOODRICH.
- For County Assessor Collector:
 - F. E. LEECH.
- For County Treasurer:
 - MISS OLA CLEARY.
- For District Attorney:
 - GUS HADDIN.
- For District Clerk:
 - MRS. DEE PATTERSON.
- For County Commissioners—Precinct 1:
 - ARLIF CARPENTER.
 - JOE K. CLARKE.
 - R. A. "Shorty" HERRING.
- Precinct 2:
 - L. N. ATCHISON.
 - ROY SULLIVAN.
 - J. W. "Bill" GRAHAM.
- Precinct 3:
 - JESSE ROBERTS.
- For Constable—Precinct 2:
 - W. F. "Bill" LANGLEY.
 - CARL STONE.
 - VERLIE E. SMITH.
- Precinct 1:
 - C. B. CLENDENNEN.
- For Justice of the Peace—Precinct 1:
 - W. V. HIX.
 - E. A. VANCE.
- Precinct 2, Place 2:
 - C. M. TUCKER.
 - W. J. CORNELISON.
 - G. L. "Nat" LUNSFORD.

ROY LEE AND CAROLYN BOYER, above, will appear in "Footloose and Farcy," a dance revue to be presented by Helene Madeira tomorrow evening. The revue, which will be in the Junior High School Auditorium at 8 o'clock, is sponsored by the Jaycee-Ettes. Proceeds will go toward the Community Center fund.

The Social Calendar

- TUESDAY
 - The Merten Home Demonstration Club will meet at 2 p. m. Tuesday in the home of Mrs. Jack Prather.
 - The B & PW Club will hold a board meeting at 7:30 Tuesday evening in the City Club Room.
- WEDNESDAY
 - Presbyterian Circles will meet at 2:30 p. m. Wednesday as follows:
 - Circle One, Mrs. Van Williams, 700 East Francis.
 - Circle Two, Mrs. Fred Sloan, west of city.

New President Named at A-M

COLLEGE STATION—(AP)—Dr. M. T. Harrington, former dean, took over yesterday as president of Texas A. & M. College. He succeeds Dr. F. C. Bolton, who retired after 41 years of service. Graduation exercises wound up this morning with a review of the cadet corps.

The 1,190 graduates were addressed Friday night at a commencement ceremony by Gen. Omar Bradley, chairman of the Joint Chiefs of Staff.

HD Clubs Hold Spring Festival

The spring festival for Home Demonstration Clubs was held Wednesday night in Central Park. Because of rain the attendance was light, but most of the clubs were represented.

A "get acquainted" game was conducted by the Merten Club, under the direction of Mrs. H. H. Threath. Prizes were given to the seventh person shaking hands with one dozen lucky persons designated in the crowd.

The picnic basket lunches were spread together and drinks were served by Mrs. A. M. Nash, Council recreation chairman.

The Hopkins Club conducted a group game led by Mrs. W. E. Melton. Films were shown by R. E. Engle for the Worthwhile Club.

Mrs. David Collis of the Bell Club led the County Chorus in three numbers.

Q: Do the Aleutian Islands belong to the United States?

A: Yes. They were purchased as part of Alaska in 1867.

Q: Are parking meters increasing in popularity?

A: The number of communities with parking meters has more than doubled in the last three years, being installed in at least 2240 localities. Boston leads with 5600 meters.

MANY NEVER SUSPECT CAUSE OF BACKACHES

As we get older, stress and strain, over-exertion, excessive smoking or exposure to cold sometimes slows down kidney function. This may lead many folks to complain of nagging backache, loss of perspiration, headaches and dizziness. Getting up nights or frequent passages may result from minor bladder irritations due to cold, dampness or dietary indiscretions.

If your discomforts are due to these causes, don't wait, try Don's Pills, a mild diuretic. Used successfully by millions for over 50 years. While these symptoms may often "clear up" on their own, it's amazing how many times Don's Pills give heavy relief. They help the 15 miles of kidney tubes and filters flush out waste. Get Don's Pills today!

Keeping House Ventilated Is All-Year Job

Now that warmer weather is here, heating and ventilating engineers are reminding home owners that keeping the house at a comfortable temperature is a year-around job.

Modern houses, with their low ceilings and small rooms, are easier to heat than were their outsize predecessors. For the same reason, more precautions are needed to keep them pleasantly cool in the summertime.

If summer air conditioning isn't practical, engineers list three other ways to keep the house comfortable in warm weather. They are: ventilation, insulation and the cooling effects of exterior trimmings and surroundings.

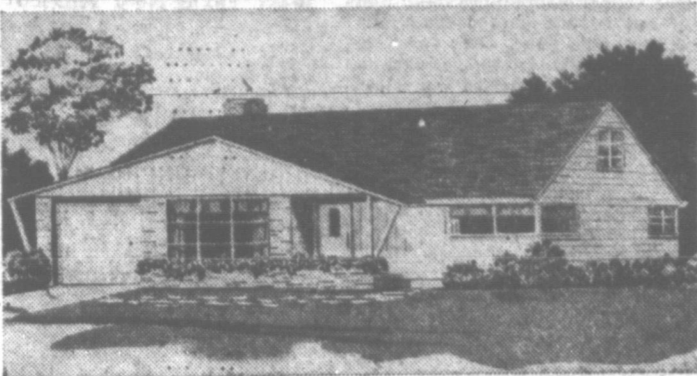

Natural attic ventilation is one way of cooling off the top of the house, where the heat is most intense. Attic windows should be kept open three or four inches. If the attic is windowless, slatted openings or louvers can be installed at each end for ventilation.

Another help is to install an electric ventilator in the kitchen. A fan-type kitchen ventilator usually is powerful enough to exhaust stale, hot air from an entire floor while accomplishing its primary purpose of removing steam, grease and cooking odors. The most efficient night cooling suggestion offered by the experts is to install an attic fan. When properly selected and placed, an attic fan can mean as

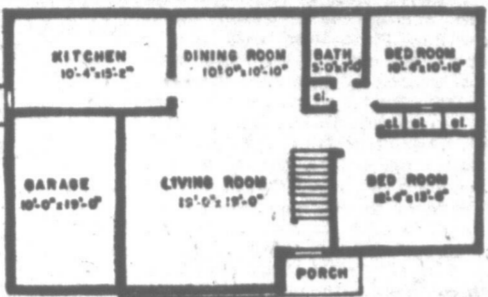

The Pampa Daily News BUILDING NEWS

PAMPA NEWS, MONDAY, JUNE 5, 1950 PAGE 3

Adaptable Exterior, Flexible Interior

Smooth lines of this ranch house make it readily adaptable to any setting. Its flexible floor plan is a fine example of ingenious home-planning, priced under \$12,000. Of frame and brick construction, it contains expansion attic with finished area for 2 rooms and bath; full basement; over-sized living-dining area. The exterior is beautified by 12' window, semi-enclosed porch, sweeping roof lines. An oil-fired hot-water air-conditioning plant serves the entire house. Building costs, including price of heating unit and installation of heating system, are cut substantially if the house is insulated full-thick with mineral wool at time of construction. Wall between house and attached garage should be of fire-resistant construction required by most building codes. This is provided at low cost by filling the hollow space between the walls with non-combustible mineral wool, which has been given a fire-retardant rating of 1 1/2 hrs. by the National Bureau of Standards. Features of the house include: in basement, modern laundry trays and heating unit placed to clear recreational space; built-in kitchen work-counter, electric exhaust fan, wall and floor cabinets; built-in breakfast-bar in dining area; set-in bath-tub and shower; hardwood flooring; ceiling plumbing. Bedrooms are cross-ventilated. Roomy closets have flush sliding doors. All rooms have ample wall space for attractive furniture arrangement.

much as 20 degrees difference. Wall and ceiling insulation is another way of reducing the inside summer temperature of your house. Homes already built can be insulated in a variety of ways. For summer coolness, one of the most effective steps is to insulate the upper part of the house, either at attic floor level or in the roof.

When the attic is unfinished it is easy to insulate the attic floor. This can be done by nailing large sheets of insulating board

over the floor joists, or by filling the space between the joists with an insulating material.

If the attic is floored, the attic may be insulated by nailing insulating board to the underside of the roof rafters. Or, going a step further, insulating board may be used to convert the attic into a playroom, den or extra living quarters. The ceiling and sidewalls can be built, insulated and decorated this way in one operation.

Other cost-saving provisions are: flexible insulated electrical wiring instead of expensive metal conduit; smaller sizes of copper and brass water pipe; elimination of plumbing traps between house and sewer; lighter-weight roofs and floors.

Since the model code contains performance rather than specification requirements, it will be up-to-date at all times and will recognize new materials which are developed to meet performance standards. This will eliminate the costly code revision necessary under old codes to allow new materials to be used.

New products will be tested in BOCA-recognized laboratories at the expense of the manufacturer, instead of at municipal expense and then accepted in individual communities merely by approval of the local building officials.

Not only will the model code modernize hundreds of outmoded building regulations now in effect, its sponsors say, but will make it easy and inexpensive for thousands of communities which have no laws to adopt adequate building regulations.

When planning extra storage space, don't overlook the area beneath the basement staircase. Frame in this area with two-by-fours, but allow for a door before covering the studs with a building board. An inexpensive material to use in covering the stud framework is structural insulating board. It has the added advantage of keeping the storage area warmer in winter and cooler in summer.

Building Code Boosted as Money-Saver

As much as 10 percent can be slashed from present building costs in every community that adopts the new performance-type building code developed after 10 years of work, it was stated today by the Construction Research Bureau, national clearing house for building information.

The code has been prepared by the Building Officials Conference of America, which is composed of 500 municipal officials representing over 80 percent of the nation's population. The comprehensive basic code, covering every building situation in simplified terms for use in communities where engineers and technicians are not available, is being prepared and will be ready by June 1, according to BOCA.

Construction costs can be cut through use of the new code because it permits new materials and construction techniques barred by many existing regulations.

Excessive and unnecessary requirements for structural strength which add to costs are eliminated; however, the code does set up requirements for minimum structural strength, fire-resistance and sanitation that must be met.

Particular attention is given to wall construction in the new code, which states that walls in one- and two-family houses must resist fire for 45 minutes; those in multi-family buildings for 90 minutes. This requirement can be built into any new or existing wall by filling it with mineral wool insulation, the National Bureau of Standards giving a one-hour fire-resistance rating to a wood-lath plaster wall filled with mineral wool, and a rating of 1 1/2 hours when metal lath is used.

Although some cities require an outside wall to be 12 inches thick, the model code states that 8 inches is sufficient for homes. The code permits spacing wall studs as much as 4 feet apart in some types of construction, instead of the 16 inches now generally required. Use of thinner sheathing is permitted. Where some codes rule out any wall finish except plaster, the new code allows any type of construction which meets fire-resistance requirements.

Other cost-saving provisions are: flexible insulated electrical wiring instead of expensive metal conduit; smaller sizes of copper and brass water pipe; elimination of plumbing traps between house and sewer; lighter-weight roofs and floors.

Since the model code contains performance rather than specification requirements, it will be up-to-date at all times and will recognize new materials which are developed to meet performance standards. This will eliminate the costly code revision necessary under old codes to allow new materials to be used.

New products will be tested in BOCA-recognized laboratories at the expense of the manufacturer, instead of at municipal expense and then accepted in individual communities merely by approval of the local building officials.

Not only will the model code modernize hundreds of outmoded building regulations now in effect, its sponsors say, but will make it easy and inexpensive for thousands of communities which have no laws to adopt adequate building regulations.

When planning extra storage space, don't overlook the area beneath the basement staircase. Frame in this area with two-by-fours, but allow for a door before covering the studs with a building board. An inexpensive material to use in covering the stud framework is structural insulating board. It has the added advantage of keeping the storage area warmer in winter and cooler in summer.

Room with 'Floor Appeal'

In any decorative plan the floors are all-important. A good looking floor is as essential to the beauty of a room as are attractive walls and furnishings. This modestly decorated room has been planned "from the floor up." It utilizes to good advantage the mellow natural beauty of oak flooring as an integral part of the motif. The gleaming oak lends distinction and dignity, heightens "floor appeal." An added advantage is the economy effected in floor covering. Adaptable to any decorative plan, oak floors retain their beauty of grain and coloring indefinitely.

Distinctive Types Offered In Strip-Style Oak Floors

Oak floors in the popular strip style, noted for the atmosphere of warmth and coziness they contribute to a home, can be obtained in distinctive types which lend individuality to a room, builders point out. The wood is available in all white oak, all red or a mixture of both. The two types are quite similar in appearance, both being comparatively light colored. Red oak, however, usually is more consistent in its color tones.

For a homemaker who prefers color uniformity, clear grade oak probably is the best bet. In that grade the amount of sapwood is limited. Sapwood is the younger wood of the tree just beneath the bark. It generally is lighter in color than the rest of the wood.

Many homemakers favor the variations in color and the natural irregularities found in the other grades. The very lack of uniformity in such grades adds interest to their natural beauty. In these the amount of sapwood varies.

Another point of choice is in the grain pattern. One can have either plain-sawn or quarter-sawn oak. The former, characterized by large, attractive V-shaped figures, is used more extensively since it is easier and more economical to cut and therefore is available at lower cost. Quarter-sawn oak is cut at angles which bring out the attractive flaky figures known as wood rays. Oak is the only commonly used flooring hardwood possessing such prominent rays. Consequently, it is the only species available in quarter-sawn style.

Generally, strip oak flooring is laid in uniform widths. Interesting variations from this pattern can be achieved, however, by utilizing pieces of random or mixed widths. This arrangement produces an effect similar to the more expensive random plank flooring. Mixed widths are appropriate in almost any type of home, but are particularly suited to ranch type houses or others where an air of informality is desired.

A wide selection of sizes is offered. Tongued and grooved pieces are produced in widths from 1 1/2 inches to 3 1/4 inches. Standard thicknesses are 1-2 inch, 3-8 inch and 2-3/2 inch. Builders say most home owners prefer tongued and grooved flooring. Tongue and groove enables the pieces to join snugly to form a floor of great strength and solidity. Square-edge pieces can be obtained in widths of 1 1/2 inches and 2 inches and in a thickness of 5-16 inch.

A further choice is offered between unfinished and pre-finished stock. The unfinished type receives its finishing treatment after it has been laid. The pre-finished variety, expertly treated at the mill by specially designed machinery, is ready for use immediately after installation.

The statement that "insulation saves fuel" was recently checked in Washington, D. C. It was found that an investment of two cents extra per square foot of wall for insulating board 1/2 inch paid for itself through fuel savings in two years. The test house was heated by an automatic oil furnace which forced air through the rooms. The insulating value of the wall, which reduced the heat requirement for human comfort, saved a penny per square foot of wall every year.

INSULATED CLEANER When the walls of a house are insulated, less cleaning of walls and ceilings is required, according to experts. The reason is that dust and dirt are not attracted so much to warm surfaces as they are to cold surfaces. Esthonian brides throw money on the first when first entering their new homes.

Dealers Feel Impact Of Farm Rebuilding

Lumber dealers are feeling the impact of a farm building and remodeling boom which is sweeping across the nation this year. A recent survey by the U. S. Department of Agriculture shows that one million farmhouses and farm service buildings are involved.

The survey reports 102,870 new farmhouses being built, 107,178 new barns and 216,813 smaller farm buildings going up. In addition, 238,003 farmhouses are being remodeled this year. Also, 162,763 large barns and 205,787 other farm buildings are being remodeled or rebuilt.

One modern building material that is much in demand for this new construction and remodeling program is insulating board. Available in both large sheets and smaller decorative units, it builds, insulates, decorates and quiets sound in one operation. Because of this versatility, and the ease with which it can be handled,

AWOL Yet Attends GI Instruction

SHENANDOAH, Pa. — (AP) — John E. Gavenas, 28, Shenandoah, Pa., went AWOL from the Army Jan. 3 in Japan.

Six months later and some 10,000 miles away he found himself back in the Army, but in the custody of military policemen.

An FBI agent arrested Gavenas yesterday. He was attending a veterans school by virtue of an honorable discharge received from the Marines. He had re-enlisted in the Army and was sent to Japan.

Gavenas told the FBI agent he "hitchhiked" by plane to Seattle, Wash., and from there crossed the country by automobile.

Calls of many other animals are imitated by the tiger and panther, as well as by the hyena.

dealers report that insulating board is widely used for finishing or repairing walls and ceilings in the home and for insulating dairy and poultry buildings.

Frisch's Cubs Still Threat But Early Schemes Backfire

Fort Worth Still Leading With 6-5 Win Over Tulsa

By HAROLD V. RATLIFF
Associated Press Sports Editor

The Texas League clubs made an afternoon and night of it with a couple of double-headers and one game that went three hours and forty minutes but nobody gained a thing on tight-fisted Fort Worth yesterday.

The Cats had to go 11 innings and start worrying about the curfew last night before licking San Antonio 6-5.

Tulsa divided a double-header with Beaumont and Oklahoma City, the other first division club, lost to Shreveport.

Dick Williams' two-base knock in the eleventh with the bases full paid off for Fort Worth. San Antonio got one score in its half of the eleventh but with three runners on Andy Anderson fanned to end the Mission threat.

Beaumont won the first game from Tulsa 6-5 with a four-run blast in the first inning. Tulsa took the nightcap 9-3 on Jim Blackburn's five-hitter while the Oilers were punched out 11 blows.

Shreveport licked Oklahoma City 3-0 with Lee Holloman giving the Indians just four hits. The Sports pushed over two runs in the fourth inning by bunching three of their seven hits. Danny Gardella's homer came a made on one in the ninth brought Houston a 2-0 victory over Dallas in the first game of a night twin bill. Dallas got to Pete Mazar for only five hits.

In the afterpiece, Dallas came through 7-1 on Wayne McClintock's three-hit performance.

Fort Worth is again at San Antonio, Oklahoma City at Shreveport, Dallas at Houston and Tulsa at Beaumont tonight.

Race Honors Shared By Tauberts, Phillips

SAN ANTONIO (AP)—The Taubert family, troopers in the speed-boat racing circles, shared honors with James Phillips of Abilene as the hot new paid admission at Lake McQueeney yesterday in the fifth annual Professional Regatta sponsored by the Alamo Boat Club.

Henry Taubert Sr. and Jr. won three races, even though Taubert Sr.'s father died at 8 a.m. Sunday. The family said race, and Henry Taubert Jr. won both heats of the class "C" modified runabout, while Henry Taubert Sr., captured one heat in the class "C" racing runabout.

Phillips won both heats of the class "B" hydroplane to become the only other double winner.

Class "A" hydroplane - first heat: E. M. Barrett, Houston; Dick Short, Fort Worth; second heat: Phillips, Abilene; second heat: Short, Phillips, Barrett.

Class "B" hydroplane - first heat: Phillips, Short, Barrett; second heat: Phillips, Short, Barrett.

Class "C" service modified runabout first heat: Henry Taubert Jr., Chip Wood, Brownwood; Darrell Wilson, Brownwood; second heat: Taubert Jr., Wood, Wilson.

Ty Cobb batted over 300 a total of 23 times from 1906 to 1928 — a major league record.

Robinson to Try For Another Title in Battle Tonight

PHILADELPHIA (AP)—Sugar Ray Robinson, king of the world's waterweights, goes after another title tonight in a 15-round bout with the "indestructible" Frenchman, Robert Villmain.

The municipal stadium match is billed as a middleweight championship fight by the Pennsylvania State Athletic Commission. And the winner stands a chance to win National Boxing Association sanction as the titleholder.

The middleweight boxing division has been in a muddle for long time ever since Jake La Motta won over France's Marcel Cerdan after Cerdan injured his hand.

Robinson and Villmain, regarded by the NBA as the logical challengers, have repeatedly bid for title bouts with La Motta, but the Bronx Bull has turned them down.

Now La Motta is matched with Rocky Graziano, former middleweight champ, for an NBA-sanctioned title go at New York June 28.

The NBA says the winner of that New York fight must meet the winner of the Robinson-Villmain bout within 90 days or forfeit his NBA-recognized title.

Robinson is a prohibitive favorite to win tonight's match, but Villmain has plenty of backers.

Keiner's Korner

By DICK KLEINER
NEA Staff Correspondent

The Phillies appear to be serious about winning the pennant. It's not too difficult to change a losing ball club into a winner. One. All you need is a blank checkbook, a pen and a couple of million dollars.

The pen, of course, should be a baseball point pen.

The Senators signed Joe DiMaggio's second cousin, a guy by the name of Joe DiMaggio. But 'tain't necessarily Joe.

The only major club really ready for color television is St. Louis' American League entry. Brownie fans are blue.

The owners are in the red.

Inspiring at the plate in a high school game at Milford, Mass., Charles Cornetta crouched to catch a low pitch. He felt something go — realized he'd torn his pants.

Must have been a rip-snorting game.

Many sports pages regularly print the results of chess matches, but some cynics wonder if chess is really a sport. What is needed, of course is a little more color in the game, such as cheers based on the peculiar summaries found in chess boxscores.

Bishop King, Castle, Knight, Come on, team, get in and fight!

P x B and P-B4 Let's go, fellows, we want more!

Castle, Knight, Bishop, King. On your toes with anger spring!

K-B and Q-R-K Our team is hot today! King and Knight, Queen and Rook!

Don't give them another look! R x P and P-R6 Put them in an awful fix! Bishop, Queen, Castle, Pawn—Pardon us, we gotta yawn!

Steers Will Try To Keep Title In NCAA Battle

AUSTIN (AP)—The University of Texas Longhorns set out today to repeat as National Collegiate Athletic Association baseball champs.

If they do, the 1949 titleholders will be the first team in the NCAA's baseball history to turn the trick.

They face a major obstacle in a heavy-hitting University of Arizona nine today at Clark Field (4 p. m. CST). They will need every ounce of their strong pitching talent against a team whose hitting average is .328. Seven Arizona stars boast .300-plus batting averages.

Texas is the west conference champion and Arizona won the Border Conference crown.

Texas has a home record of 88 victories and two losses in their last 60 games with college opponents.

Clark Schooler, Michigan State's NCAA and AAU 100-yard free style champion this year, was not even listed on the squad roster at the start of the season.

Cincinnati Coach Gus Mancuso holds the record for most chances accepted by a catcher in one World Series — 16 in 1936 for the New York Giants.

The mud skipper, a fish of the east Atlantic, climbs trees.

The Pampa Daily News SPORTS

PAGE 4 PAMPA NEWS, MONDAY, JUNE 5, 1950

YER OUT!—Umpire Jim Boyer makes it perfectly clear as pitcher Al Evans of the Washington club puts the tag on Pete Suter, sliding head first, in the fifth inning of a game at Shibe Park. The second baseman is attempting to score on Fernin Guerra's single. The Senators shaded the Athletics in this one 4-3.

Amateur Cops Crown In Texas PGA Meet

MIDLAND (AP)—Morris Williams, an amateur from Austin and the University of Texas, showed the pros the way as he wrapped up the Texas PGA crown yesterday with a 72-hole total of 273.

Williams was first amateur to win the title in years.

The Austin snooker brushed aside defending champion Raymond Gafford of Dallas and Byron Nelson of Roanoke with some fine shooting on the last nine.

Nelson edged Gafford by one stroke for first money of \$1,000 in a nine-hole playoff. The two pros ended up the regulation 72 holes deadlocked at 274.

Williams fired a sizzling 33 on the last nine yesterday to go with his 26 on the front round.

The leading scores: A-Morris Williams, Austin, 68-66-70-273.

Ray Gafford, Dallas, 68-66-70-274.

A-Billy Maxwell, North Texas State, 68-66-71-274.

Byron Nelson, Roanoke, 69-68-69-274.

A-Joe Conrad, North Texas State, 70-66-70-276.

A-Marcus Pfleger, Austin, 70-67-71-276.

Dode Forrester, Hobbs, N. Mex., 71-67-71-279.

Sports Round-Up

By HUGH FULLETON
NEW YORK (AP)—Chances are you can't compare the Alabama baseball team that's going into the Southern NCAA Playoffs this year with the 1918 or 1925 clubs. In spite of its habit of winning Southeastern laurels, Bama may have plenty of trouble with Wake Forest.

Hotteman's triumph over the Senators was his sixth of the season. It extended Detroit's winning streak to five and Washington's losing skein to the same number. Bob Kuzava, making his first start for Washington since the big trade with Chicago, gave up all the runs and eight hits in eight innings.

The Brownies of St. Louis and Athletics of Philadelphia divided a doubleheader. The Browns won the opener, 12-6, and the A's took the second, 12-6, with a nine-run first inning.

Clovis Drops Oilers Again; Doubleheader Is Set Tonight

After taking their second drubbing in a row from the Clovis Oilers yesterday, 4-1, in a contest abbreviated by rain, the Pampa Oilers will get a chance to square things with their New Mexico visitors tonight when they wind up their series with the Oilers in a doubleheader in Oiler Park slated to begin at 7:30.

The Clovis competitors have won five out of six games from the Pampans this year, after chalking up yesterday's triumph when a downpour of rain halted the game officially in the fifth inning.

A big first inning, in which the visiting nine touched starter Earl Doud for three hits and three runs, was what really broke the Oilers back. Fighting to overcome this deficit the Pampans were unable to hit in the clutch.

Doud opened things by issuing a charity pass to lead-off man Jess Jacinto. Don Geresy then sent Jacinto to third with a long double to centerfield. Both runners scored a few seconds later on Pete Trabucco's scorching single to right. Doud then settled down, momentarily, and got Ron George on high fly to Matney in centerfield and Bob Moniz on a bouncer to shortstop. But, after Trabucco had dashed to second on a wild pitch, Ray Kozub lined a single to right and Trabucco scored the third Pioneer run. Rogerson walked before Manager Seitz called in George Payte to put out the fire. The new-comer promptly fired three fast strikes past Dale Sprout to end the uprising.

In the first frame, the Oilers filled the bases with only one down, but a snappy double play squelched local hopes and the side was retired with no Pampa scoring. It was the bottom of the third before the Oilers got into the scoring column and this came when, with two down, Joltin' Joe Fortin swatted a fast one over the right centerfield fence.

It was his seventh four master of the season.

But the Pioneers got their final run in the same manner in the following canto as Dale Sprout slammed his second homer of the current series.

As the fifth inning got under way, the light sprinkle turned to a heavy downpour and the contest was halted for 35 minutes before resuming. Going into the sixth, the teams had just taken their places when another spurt ended all hopes for action.

Tonight, Manager Seitz is expected to start newcomer Ramon Salgado for the first time in this league, in one game, and probably Roy Parker in the other. Salgado joined the club Saturday from Tampa of the Florida International League. Manager Paul Dean will probably retaliate with Mike Bricevich and Tom Gallagher.

Ed (Porky) Oliver of Kenmore, Wash., put the squeeze on Mangrum in the final test yesterday. Oliver holed out with a one-over-par 72, for a total of 274, while Mangrum was fighting his putter on the par four 16th hole. Mangrum, who had taken 17 putts in the first nine holes, took a five on the 16th by using three putts.

Johnny Palmer, Badin, N. C., finished with a rush to grab third place and 1,400, 500 less than Oliver. His score was 277.

That was just a stroke better than Norman Von Nida, Sydney, Australia, who fired a 67 for a 278 good for fourth place. Cary Middlecoff, National Open champion, wound up with three rounds of 71 for a three-way tie with Chick Harbert, Northville, Mich., and Jim Ferris, San Francisco. They all had 279.

Canadian Downs Shamrock 15-7 In League Tilt

CANADIAN (Special)—The Shamrock Green Sox fell one game back in their race for the Tri-County League championship when a heavy hitting aggregation from a Canadian handed them their third defeat of the year here yesterday, 7-5.

Canadian pitcher Thomas started on the mound for the winners, but after tossing four innings and allowing all the Shamrock runs, he was relieved by Hendrix. Hendrix then proceeded to toss a shutout for the rest of the game.

Grid Loop Ends Player Drafts

PHILADELPHIA (AP)—The National Football League completed a draft of 140 players, last remnants of the now defunct All-America Conference, and today the 13 club owners hope to make up their minds on whether to permit an All-Star game.

The owners, together with their coaches, met for nearly 12 hours Saturday — most of the time divvying up veteran gridders on the rosters of AAC teams that quit pro ball after the two leagues merged last January. The AAC had been in existence for five years.

The proposal for a pro bowl game between all-stars of the NFL's American and National divisions may come up for final consideration today.

The winner of the three game series between the District leaders will represent it at the National NCAA Tournament at Omaha June 15-22.

Brad Tolson is scheduled to pitch for Arizona in the opening game, and opposing him will be Texas' ace, Murray Wall.

The Pampa Daily News

One of Texas' Two Most Consistent Newspapers... Published daily except Saturdays...

Highwaycide

The Memorial Day weekend produced the anticipated highway slaughter, and then some. A new uncomplimentary record of 230 traffic fatalities was registered over the big weekend.

Texas was second high in the list of traffic fatalities. Only Illinois, with its steady flow of Chicagoers heading out of the city for a brief respite and the incoming flow of out-of-towners, topped the Lone Star State.

Two states, Vermont and New Hampshire, escaped without a single traffic death.

Ned H. Dearborn, president of the National Safety Council, hit the nail on the head when he said: "The nation has, by slanting driving and an outstanding demonstration of mass indifference to the living while paying respects to the dead, turned this Memorial Day massacre."

According to the latest available statistics, there will be more people killed and maimed by automobiles during 1950 than were killed and maimed during the World War II. This year's highway casualties will be more than a million.

And on the same weekend drivers roared around the Indianapolis Speedway track at a new record clip without a single fatality.

One reason for this was the extreme caution used by the drivers. Another, the fact that their automobiles were in perfect working order.

The schools are trying to teach the younger generation how to drive safely and cautiously. Something will have to be done about the mechanical angle to the highway problem.

One place we know of demands a yearly safety check of all licensed vehicles. Such a procedure the country over would undoubtedly be a boon to safety.

If the fast driving continues it is quite possible that a national speed law will be enacted, with federal patrolmen seeing that it is enforced. This national speed law on the highways is something we would like to see even if the federal government has to step in to do the job.

And there is undoubtedly no other state in the country where the motorist driving along the highway and see the road shoulders littered with beer cans thrown out by the drink-while-you-drive clan. This ignorant ilk is probably more dangerous than are off the road, but reflexes not normal and his brain not working.

The best advice we've seen regarding driving on the highway is that the driver should feel he is driving five cars — his own, the ones behind and in front of him, and one on either side.

The foolish drivers are just making things harder and costlier on themselves.

California contains 10,000,000 Valencia orange trees and 8,000,000 Naval orange trees, according to an estimate.

Henry Clay was elected Speaker of the U. S. House of Representatives the first day he was a member.

Washington.....by Peter Edson

WASHINGTON (NEA) — Opinion is divided on benefits or lack of them — in the new, large, economy-size, single package appropriation bill. The House passed the first omnibus appropriation bill in record time, completing the job on May 10. Last year the House didn't complete action on the last of 11 regular appropriation bills until June 9. So it was something of a time-saver.

The omnibus appropriation bill has also been something of a potential money-saver, at this half-way point in the proceedings. President Truman's budget called for approximately \$29,500,000,000 for the domestic programs covered by the omnibus bill.

The House Appropriations Committee cut roughly \$1,300,000,000 from the bill. On the floor of the House further cuts of \$34,000,000 were made. But increases of \$483,000,000 were also made. So the net increase was \$449,000,000.

Then on the final day of consideration the House put over a couple of fast cuts for another \$1,000,000,000 more or less. The final answer comes out between \$25,500,000,000 and \$28,950,000,000.

These actions were all taken as a result of looking at the government's budget as a single package. But along the way, this omnibus bill ran into some difficulties which make it objectionable.

In the first place, it took the House a full month to consider and act on the 11 chapters of the omnibus bill. It was long

Fair Enough - Pegler

By WESTBROOK PEGLER

Information is accumulating which shows that perversion has been so amply regarded in the New Deal cult as to amount to a characteristic of that administration. Some of this information, somehow overlooked or firmly ignored by journalists, historians, moralists and Republican political opponents, goes away back. It is bolstered by the writings of at least three of the most assertive advocates of the Roosevelt myth and the quizzical morals of the cult.

These are Morris Ernst, a new deal attorney with an interest in depravity which may reasonably be described as extraordinary; the Washington Post, and the weekly magazine called the New Yorker, whose politics are anti-anti-Communist. That is, the New Yorker consistently attacks those who expose Communists. Mr. Ernst has written two books on sex. One was an enthusiastic discussion of degenerate practices which he could not bring himself to condemn because he would not presume to hold that "only one set of sexual customs was either desirable or natural."

He said that our habits of thinking and acting had been so "conditioned" by the blind acceptance of standards fitted to another age "that we do not know what a practical attitude toward sex behavior should be."

"What is normal?" he asked. "What is moral? What is pure?" Mr. Ernst is not a scientist. His interest in depravity is comparable to that of a sedentary baseball enthusiast. He is a red-hot sex fan. He likes to write about degeneracy in terms seldom seen in a newspaper or magazine of general circulation.

He couldn't wait for Dr. Alfred Kinsey to get out his next book, "Sexual Behavior in the Human Female," so he jumped the gun in a recent issue of the magazine called Red Book. This once conservative publication sneared its May cover with a halcyon for a "preview of the coming Kinsey report." According to the Associated Press, Doctor Kinsey promptly said the Ernst story was not a preview.

Ernst then said he had not claimed that his article was a "preview" and thus repudiated Red Book. Ernst and his collaborator, David Loth — Ernst usually works with a collaborator — solemnly set forth that they "are presenting these facts here because it is only through public understanding that progress in education and improvement in family relations can be achieved."

It seems to a conventional American mind, governed by Western moral standards, that the object of improving family relations is set up only as an excuse to publish nasty material. However, Mr. Ernst tells us that he is impatient of such complacency. He would be the last to believe his text to be indecent. He may actually believe that the effect on American spouses who place themselves on his moral level would be an improvement in family relations. This might be so. The Washington Post, which had besought understanding of Alger Hiss on the ground that treason was a minor error at the time, was right in sleep when the news broke that 91 per cent of the had been named from the State Department alone. The Post called them "aberrants" and bespoke generous consideration. The Post seemed to understand remarkably well the impulses and conduct of degenerates, and to find them not altogether abhorrent.

The New Yorker argued that depravity and normality were about alike. It is difficult to see why homosexuals should be any more vulnerable to blackmail than non-homosexuals whose careers depend in large part on the maintenance of their reputation for moral rectitude but who sometimes, in an excess of normality,

fall from grace," the New Yorker's Washington correspondent argued. In few words, if a statesman errs, it matters not whether the party of the second part be an actress or an actor. That seems to be good Washington demagogic doctrine these days. Meanwhile, a special subcommittee of Senate has disclosed that the Washington police have records 5,000 perverts who have difficulties with the law in recent years. About 4,000 of them were said to be government employees, men and women. That proportion would seem to establish a historic swirl of depravity under the new deal. It has been compared already to some horrors of antiquity. There is no record of comparable corruption in American history.

Many of us boast a grandfather or two who served in the Civil War. That, too, was a revolution against the idea of human slavery. We remember that many of the states LEGALLY were slave states, but legal or not, the thing was against MORAL law, so the revolutionaries who stood for moral law found themselves forced to rebel against merely legal measures. Wrong was still wrong, whether laws initiated by a majority of the citizens of some states said it was right or not.

When Jesus said "give unto Caesar the things that are Caesar's," that SOUNDED as though He were compromising. But He added, "and unto GOD the things that are GOD'S." Among the things that are God's we may definitely include obedience to His moral law. "Thou shalt not steal—covet—murder, etc." Sooner or later the things that are Caesar's—or majorities—or governments—run counter to the morality of God. Caesar will demand immorality, such as paying the salaries of homosexual or communists in his State Department or salaries of public school teachers an individual does not want to hire or payments to people not to raise crops or to destroy those already raised, ad infinitum. Caesar will want us to give him tax money for many things we do not want to pay for.

And that is where the individual must have a revolution in his own mind. He must be FOR Godly morality and rebel against to whom he wants him to violate it. Remember, we are to GIVE to Caesar ONLY the things that are Caesar's—legitimately. If Caesar TAKES from us either by force or initiating force, then what is forcibly TAKEN from us is not GIVEN. But we may still freely GIVE to God the things that are His. In giving to God, in standing for right and in the practice of the Golden Rule toward one another as citizens, our hearts and minds are automatically revolutionary against a Caesar who would have us do otherwise. He can TAKE from us just because he has the brute force to do it, as Pilate had the brute force to order Jesus scourged—but he can never make voluntary GIVERS of us in supporting immorality. Jesus never told anyone to give anything—including support of viciously wrong measures—to Caesar that were NOT Caesar's. Government, for example, has no business doing many of the things it does under bad political management, but it can force the taxpayer to pay for it. Consequently, when we pay the bill it is only because we have had force initiated against us and thus we are not GIVING, of our own free will, one cent to Caesar for these bad things that are NOT his. I doubt if any moral citizen ever freely GAVE Caesar tax money to be used to force him to let Caesar set his rent prices, force him to pay the salaries of Reds and homosexuals, force him to join a union, force him into military service, force him to compete with Caesar in business and force him to do a thousand other things he may not conscientiously want to do. A man's conscience and decency are not Caesar's. They are God's and are to be given to God.

Here is the spirit of independence, the divine right of individual liberty and moral revolutionary consciousness that was the dynamic of our forefathers. The Declaration of Independence was an act of REVOLUTIONARY conduct. Then, isn't anyone who says he believes in it of the same spirit? Can any real American ever afford NOT to be revolutionary and independent? If he can substitute DEPENDENCE upon government or majorities or dictators in running his life for him, for INDEPENDENCE, then, whatever else he may be, he isn't an AMERICAN.

The poet Shakespeare himself most often signed his name as "Shakspeare," according to the Encyclopedia Britannica.

Furthermore, this item-by-item consideration by the Committee of the Whole didn't work. It didn't economize enough. So in the end, the House had to resort to two queer dodges.

First was an amendment by Rep. John Taber of New York, and Albert Thomas of Texas. It proposed savings of \$60,000,000 by cutting expenditures for travel by 20 percent and 10 percent for all other expenses payroll, rent, etc. — right across the board.

Second was an amendment by Rep. Ben F. Jensen of Iowa, which provides that 90 percent of all vacancies in government jobs during the fiscal year beginning July 1 shall not be filled in this year.

Exceptions to these two amendments were made for the military services, and to doctors and nurses in the Public Health Service and Veterans' Administration. There is some rather fuzzy language in the Taber-Thomas amendment which under one interpretation would give the president the power to veto particular items in the appropriations bill as finally passed by Congress.

This item veto is an old point of controversy. President Truman would like to have it. But there is some question as to its constitutionality. It would give an unscrupulous president almost unlimited power over government. The omnibus appropriation bill has now been tossed to the Senate Appropriations Committee. The real success or failure of this experiment will be judged by how the Senate amends the 434-page House bill.

The Doctor Says

By EDWIN J. JORDAN, M.D. WRITTEN FOR NEA

There is no doubt that the best food for a new-born infant is the mother's milk. When such feeding is possible there is no need to argue the value of other methods. This does not mean, however, that infants cannot grow and stay healthy if they are fed artificially. Artificial feeding has been carried out successfully many, many times.

It does mean, however, that if one compared a large group of breast-fed infants with a large group of artificially-fed infants, the breast-fed group would gain more and be more healthy on the average than the artificially fed group.

The food needs of infants are great both from the standpoint of quality and quantity. Good modern infant care includes frequent weighing during the first few months. Any failure to gain weight because of insufficient intake would thus be discovered quickly.

Quality means what kinds of food are given. The starch, fat, protein, and mineral needs are excellently supplied in mother's milk. Even this, however, is frequently supplemented by giving an infant some orange juice and cod liver oil which supply important vitamins. In the artificially fed children, such additional substances besides the milk formula are even more desirable.

Cow's milk which forms the basis of most artificial feeding formulas is somewhat different from human milk. It contains a larger amount of protein, a smaller amount of sugar, and there are some important differences. When artificial feedings are necessary, however, cow's milk, to which is added sugar in some formula, serves as the basis of the formula. Protein in the form of strained meats has been reported to be valuable for infants in preventing anemia.

The greatest gain in weight is during the first six months when the average infant doubles its birthweight. During the second half of the first year the weight gain slows down and weaning or removal from bottle feeding is begun.

If a grown-up who weighed 150 pounds gained weight as fast as a new-born infant, he would weigh 300 pounds in six months and 450 pounds in a year. The need for food during the first year of life is obvious.

MILK IS IMPORTANT Milk continues to make up a large part of the food during the first year but pureed vegetables, mashed bananas, egg yolks and perhaps other foods are gradually added to the diet during this period.

Further, this item-by-item consideration by the Committee of the Whole didn't work. It didn't economize enough. So in the end, the House had to resort to two queer dodges.

First was an amendment by Rep. John Taber of New York, and Albert Thomas of Texas. It proposed savings of \$60,000,000 by cutting expenditures for travel by 20 percent and 10 percent for all other expenses payroll, rent, etc. — right across the board.

This item veto is an old point of controversy. President Truman would like to have it. But there is some question as to its constitutionality. It would give an unscrupulous president almost unlimited power over government. The omnibus appropriation bill has now been tossed to the Senate Appropriations Committee. The real success or failure of this experiment will be judged by how the Senate amends the 434-page House bill.

REVOLUTION

David Baxter

An odd thing about many Americans today is their attitude toward revolution. If one uses that they profess to be "shocked" and "alarmed." At the same time, however, they will expand their chests until the buttons pop off their shirts when discussing the American Revolution or mentioning that their ancestors fought in the Revolutionary War.

No one — except, perhaps the Roosevelt — seems very proud of ancestors who happened to remain loyal to their government — at that time the British government. No one wants to remember a Tory in the family.

Many of us boast a grandfather or two who served in the Civil War. That, too, was a revolution against the idea of human slavery. We remember that many of the states LEGALLY were slave states, but legal or not, the thing was against MORAL law, so the revolutionaries who stood for moral law found themselves forced to rebel against merely legal measures. Wrong was still wrong, whether laws initiated by a majority of the citizens of some states said it was right or not.

When Jesus said "give unto Caesar the things that are Caesar's," that SOUNDED as though He were compromising. But He added, "and unto GOD the things that are GOD'S." Among the things that are God's we may definitely include obedience to His moral law. "Thou shalt not steal—covet—murder, etc." Sooner or later the things that are Caesar's—or majorities—or governments—run counter to the morality of God. Caesar will demand immorality, such as paying the salaries of homosexual or communists in his State Department or salaries of public school teachers an individual does not want to hire or payments to people not to raise crops or to destroy those already raised, ad infinitum. Caesar will want us to give him tax money for many things we do not want to pay for.

And that is where the individual must have a revolution in his own mind. He must be FOR Godly morality and rebel against to whom he wants him to violate it. Remember, we are to GIVE to Caesar ONLY the things that are Caesar's—legitimately. If Caesar TAKES from us either by force or initiating force, then what is forcibly TAKEN from us is not GIVEN. But we may still freely GIVE to God the things that are His. In giving to God, in standing for right and in the practice of the Golden Rule toward one another as citizens, our hearts and minds are automatically revolutionary against a Caesar who would have us do otherwise. It would give an unscrupulous president almost unlimited power over government. The omnibus appropriation bill has now been tossed to the Senate Appropriations Committee. The real success or failure of this experiment will be judged by how the Senate amends the 434-page House bill.

Further, this item-by-item consideration by the Committee of the Whole didn't work. It didn't economize enough. So in the end, the House had to resort to two queer dodges.

First was an amendment by Rep. John Taber of New York, and Albert Thomas of Texas. It proposed savings of \$60,000,000 by cutting expenditures for travel by 20 percent and 10 percent for all other expenses payroll, rent, etc. — right across the board.

Second was an amendment by Rep. Ben F. Jensen of Iowa, which provides that 90 percent of all vacancies in government jobs during the fiscal year beginning July 1 shall not be filled in this year.

Exceptions to these two amendments were made for the military services, and to doctors and nurses in the Public Health Service and Veterans' Administration. There is some rather fuzzy language in the Taber-Thomas amendment which under one interpretation would give the president the power to veto particular items in the appropriations bill as finally passed by Congress.

This item veto is an old point of controversy. President Truman would like to have it. But there is some question as to its constitutionality. It would give an unscrupulous president almost unlimited power over government. The omnibus appropriation bill has now been tossed to the Senate Appropriations Committee. The real success or failure of this experiment will be judged by how the Senate amends the 434-page House bill.

news behind the news

WASHINGTON — The various systems of military and civilian defense against an atomic or H-bomb attack submitted to the Joint Committee on Atomic Energy in cold and calculating terms by scientists have sent shivers dancing up and down the spines of members of that body.

All-out preparations would cost so many billions, with estimates ranging from 100 to 300, that it would destroy forms of private economic enterprise.

Our present everyday routine of living would be transformed that the change would be as great as if the American people were suddenly transferred to another planet by mass migration.

These are not the imaginings of writers of fantastic fiction for the pulp magazines. They represent in summarized form the opinions of the men who helped to make the original A-bomb, as well as the architects, the industrialists and the military chiefs who must prepare to repel such a bombardment, have submitted at secret sessions on Capitol Hill.

TERRIFIC — The actual increase in the military budget would be terrific, although that might be the smallest item of national expenditure. In the experts' opinion, the annual budget would jump from today's \$15 billion to more than \$100 billion.

The maximum needs would require a radar fence around the continental area of North America, permanent offshore patrols, a vast fleet of smokeless submarines loaded with A-bombs, if marines and air bases at all strategic points that would have to be equipped with many thousands of fast, interceptor planes. Fighters and bombers would have to be speedier, bigger, costlier.

In short, save for a few paying citizens to pay for it, the laboratories or in the minds of inventors, our present national defense establishment would have to be scrapped and rebuilt from below the ground upward. War and Annapolis would become an outmoded as a ladies' academy of the 1830's.

"UNBUILDING" — The rebuilding of at least fifty key cities would revolutionize everyday living more than the development since the suburban expansion resulting from the mass production and purchase of the automobile. Some experts refer to the process as "unbuilding."

First, there would have to be a vast and labyrinthine network of underground shelters based on a catwalk style of architecture, providing connecting tunnels and escape outlets.

Unlike the temporary cellars in which the people of London lived during the blitzkrieg, they would require a complicated transportation, sanitation and ventilation system.

EVACUATION — Of course, stores, banks, wholesale and retail centers, and all the paraphernalia needed for sustaining a community's economy, would have to be set up below ground. Synthetic foods would become a steady diet.

Evacuation spots fifty or more miles from municipal targets have also been proposed. These would be equipped with hospitals, fire-fighting stations, storage buildings, medical supplies, billets, etc.

In discussing this mass vertical and horizontal migration, Senator Brien McMahon, chairman of the Joint Committee on Atomic Energy, envisages the same sort of political pulling and hauling that now accompanies the framing of a bill.

He frames the problems in terms of his own state of Connecticut, although it applies to any other section of the country.

EXPENDABLE — Hartford, Bridgeport and Waterbury, for instance, might be selected as sites for construction of a full atomic defense system because of the key car products manufacturing there.

But the academic city of New Haven might not strike the Chiefs of Staff and their atomic auxiliary as requiring such protection.

The Nation's Press

"BUT WHEN SHE BREAKS" Omaha Evening World-Herald "The Kremlin Will Crumble." That's the heading of an interview with ECA Administrator Paul G. Hoffman in the current issue of U. S. News & World Report.

And a mighty comforting interview it is, for those who like to take the wishful view.

The satellite countries (says Mr. Hoffman) are seething with discontent. The Soviet police are using "the same kind of ruthless purge methods that they had to use in Russia to make their system prevail." As a result, there is a strong and growing resistance movement.

"I am confident," says Mr. Hoffman, "the next decade will see a breakaway from the Russian dictatorship. I believe that while dictatorships, with all the implements of war at their command, have unique advantages, all they actually accomplish is to appear to keep things under control for a time. But when she breaks, she blows! The Kremlin dictatorship can crack and crumble like any other."

So relax, you Americans. Wait patiently, keep on subsidizing the rest of the free world with dollars borrowed from an empty Treasury, and presently on some glad tomorrow you will read the news that Stalin and his Politburo gang are kaput.

That is Paul Hoffman's theory. But it is fair to point out that the bosses on yonder side of the Iron Curtain hold a quite different view.

They say to their people: "These decadent democracies of the West, especially the United States, are on their last legs. Hold on just a little longer, make them spend more than they can afford for 'defense,' encourage them to wreck their economy by inflation, and one of these days they will blow up — and the world will be ours for the taking."

On both sides of the Iron Curtain the faith, no doubt sincerely held, that the other side can't take it!

And strong in that faith, shouting taunts and derision at each other, both sides march on.

Toward what? Armageddon, maybe.

Whether Mr. Hoffman has good reason for his rosy view, it is not for us to say. Our own crystal ball has grown cloudy and tells little about the future in Stalinland.

But with respect to the Soviet belief that the United States may destroy itself by reckless management of its economy and its money, there is some evidence to be seen.

The Legislative Reference Bureau of the Library of Congress, after a six-month survey, reports that the United States in the past 10 years has given away to other nations more than 104 BILLION dollars, and 58 billion DOLLARS of that amount — more than half — was for non-military grants-in-aid, credits and relief.

Every penny of those give-away billions was borrowed money. Every penny was added to the national debt, which now has passed the quarter-of-a-TRILLION-dollar mark.

That debt, now being increased at the rate of seven billion dollars a year, must be borne by all of us.

Do we have enough strength to carry it as it grows weightier and more oppressive? The Soviet experts think not. They think that eventually, maybe soon, we will crack and our economy will be smashed and our free institutions will be buried in the wreckage.

Seventeen years ago a newly inaugurated President of the United States foresaw the same danger. "Too often," said Franklin Roosevelt, "liberal governments have been wrecked on the rocks of loose fiscal policy. We must avoid this danger."

But we didn't avoid it. We embraced it.

"When she breaks," said Paul Hoffman, "she blows!"

As startled Broadwayites gaped, the thug accosted Framberg at Broadway and 68th Street. Using his pistol as a club, he beat Framberg to the ground, trying to wrench away the parcel containing the \$20,000.

Framberg wouldn't let go. The gunman leaped into a car and escaped.

Framberg got up, walked to his trading company office nearby and laid the \$20,000 on the desk. Then he collapsed.

Editor's Notebook

By Warren Hass

June 5, 1950

85 Years Ago: One of the world's famous hymns, "Onward Christian Soldiers," was sung for the first time at a village festival in Yorkshire, England.

The Panhandle's Republican, Ben Gull, may have added another word to the already-strange vernacular of the nation's capital. It might not be long before the term "voting Panhandle" will mean going against one's party, or voting your convictions, despite party lines. That was brought out quite strongly on the Friday night "Meet the Press" program.

And speaking of Gull, I thought he did right fine for a country boy making his first big time radio broadcast. He was a obviously nervous, as evidenced by the deep breathing at times, and I am sure that he was glad to see the clock hands roll around.

But he came through the ordeal quite well.

To the listener who heard the program for the first time it was probably not a good showing. But to the radio fan who has listened to the program regularly, and knows how the "prosecution" can confuse the "witness," Mr. Gull is to be congratulated for his work.

Gull remained calm throughout the program, taking his time and thinking over his answers. Other "guests" on this particular program have become excited, argumentative, and even reached the point where it seemed the only answer they knew was "I cannot answer that" or "I don't know."

Gull used super-caution in answering the questions. He realized that every query was an attempt to trap him. And his caution may have left the opinion with many of the listeners that he was trying to evade the issue, while actually he was taking enough time to be sure he wouldn't say something that could later be used against him in the November campaign.

And speaking of trying to trap him, with his election being such a surprise the country over, those questioners did a mighty fine job of getting all the dope on his campaign talks. Where did they get that?

The big country boy hit pretty good in his first time at bat in the big leagues with those star pitchers. He may have been a nervous, but his brother, who wouldn't have?

Uncle Coy Palmer of KPON has just released a pretty nice record album for the kiddies. He had a big bunch of them at his birthday party Saturday afternoon. He also has some other records on the stands, including some of his own compositions. They are available at the music stores in Pampa and on some of the juke boxes.

After inviting O'Houlihan to his wedding anniversary party, Clancy instructed him thus: "We live on the fifth floor, Apartment B. Just touch the buzzer with your elbow." O'Houlihan

Radcliff Brothers Put Spark in Pampa

Pampa Insurance Profession Enriched by J. Ray Martin

No discussion of insurance in Pampa is complete without the inclusion of the name of Martin J. Ray Martin, one of the deans of Pampa insurance circles, has enjoyed more than sixteen years in the business. His reputation extends far beyond reproach. Wherever the name of J. Ray Martin is mentioned it is met with complete approval by the

It is necessary, when considering insurance, to remember that the finest man in the world is little more than a puppet, unless his wares are backed by the integrity and stability of organizations with solid backgrounds and sufficient financial backing to maintain stability. Mr. Martin enjoys the unique position of representing a group of companies whose financial and legal organizational structure qualifies them as old-line legal reserve establishments in insurance parlance, the latter nomenclature is tantamount to 100 percent recommendation of the company in question.

When the figures are in, concerning the position of the insurance field in the American economic scene, it is difficult to grasp the full dollar impact of insurance on our personal economy. The average man doesn't realize that the largest business in the world, today, is an insurance company.

The American people have more insurance in force than is owned by the rest of the world's population combined. It has become the greatest reservoir of economic stability and investment funds in the world. It is difficult to single out a more comforting phase of the American pattern. The hazards of investment, particularly during a peri-

od of considerable flux, find an ever increasing number of people entrusting their investment funds to insurance organizations. Not only is this one of the better ways to save, but the investment is protected by state and federal regulations of iron-clad nature.

The entire structure of American insurance parallels the history of this nation and lends renewed assurance of its stability. Although the fundamental purpose of insurance is protection against loss of life or property, or reimbursement for damages suffered, the larger portion of insurance written presents an ideal plan for investment of savings. The sound operation of the insurance business of our country contributes in large measure to the stability of the nation. The insurance business is operated within the structure of state and federal laws, thus protecting the companies and the individual policy holders.

The amount of protection a man purchases and maintains depends entirely upon his own planning and his ability to adhere to a fixed program of saving. It can be increased, if he so elects to do, in proportion to his income and his desire to strengthen his insurance program.

The most desirable feature of life insurance is in its establishment of a protective program for the family, the most important social and educational institution in the American pattern of life. It tends to stabilize and weld the unit of the family into a workable force without fear of the future.

Local Supply House Runs Business With A Jolt; Harmless if Handled With Care

The venerable electric supply house of Radcliff Brothers, 519 South Cuyler, is an honored name among the commercial establishments in Pampa. Operated by Glenn Radcliff, employing four men of full-time status, the company keeps many of our local power installations on an even keel. (Pampa News Photo and Engraving)

Every city has business houses that have been in operation so long that they are synonymous with the product they sell. Such an establishment is the Radcliff Brothers' Electrical supply house at 519 South Cuyler. If you don't believe it, wait until one of your power mowers, water pumps or kindred installation goes sour, the name will come quickly in your hour of need.

The average newcomer to Pampa spends considerable time in the town before he discovers we have a rather large segment of our business located south of the underpass. In fact, some of our oldest business houses are located in the southern portion of the city.

Among the older business houses on the South side, in the entire city for that matter, is Radcliff Brothers' Electric Company at 519 S. Cuyler. The local house is some eighteen years of age and is operated by Glenn Radcliff.

To the average person, there isn't much romance attached to an industrial or commercial name. However, were we to dig below the surface and examine the impact on our economy of the average local business, we would be completely astounded by the importance of any given business.

Such is the case with Radcliff Brothers' Electric Company. Just take a run down the names of the companies supplying items to Radcliff Electric and you'll get a small idea of the importance of this company in your everyday life. Just a casual glance around the establishment will reveal a stock of Lawson, Wisconsin, Briggs-Stratton Engines and Parts, Fuller Light Plants and replacement parts of all descriptions.

Many a local establishment, far removed from a power supply, gets its supply of light and power from a Radcliff supplied Fuller Light Plant. Information is that this is one of the most popular items of power plant equipment on the national market.

The ordinary use of electricity no longer numbers among its component bits of equipment, the heartbeat of numerous electrical installations, the magneto. Most people are quick to remember an earlier installation on America's first mass-produced automobile. Who can forget the old magneto of the model "T" days? Never the less, the magneto still plays an extremely important part in modern industrial electric installations. Let Glenn Radcliff brief you on a few of the names famous to magneto use — Radcliff Brothers' Electric has a major portion of them in stock.

The shelves of electrical supply houses would be very strange sights without the name of Edison gracing them in manner. With magnetos the story is the same. Standing out like the proverbial sore thumb is Edleon-Splittdorf, followed by such magneto greats as Sico, Fairbanks-Morse, Bendix-Scintilla, American-Bosch and Eisemann. Obviously, there isn't anything you could use in the magneto line that the Radcliff house can't supply for you. The company also supplies the user with a full line of replacement parts for the

above-named list of magnetos. Quite a story could be told about the many instances where in the wheels of progress were kept grinding by the expeditious supplying of replacement parts and new magnetos from the Radcliff Brothers' Electric Company.

With all due respect to the industrial user, it is only fair to say that the homeowner and farmer have a great deal of use for the time of the Radcliff house.

Have you a power mower in your garage? If you have, chances are pretty good that it has a power plant installation from Lawson, Wisconsin or Briggs-Stratton, supplied by Radcliff Brothers' Electric. Maybe you didn't know your mower was powered with one of these fine products. Perhaps you'll appreciate the genius of the men behind these modern installations when you express it in terms of effort saved you.

Like all topgrade commercial establishments, Radcliff Brothers' believe in standing behind the reputation of the merchandise they vend. In line with this policy, Radcliff has a complete service department. This department is equipped with all of the latest scientific equipment and a full line of replacement and repair parts for each of the

products obtained from the Radcliff store. Should that power mower, pump engine, or magneto installation decide to give you a bad time, don't condemn it and bemoan your luck. Go to Radcliff Brothers' electric and let the experts who know how set you on the right track and put your machine back in operation. Remember, Radcliff is right in your own backyard. You can put your faith in the Radcliff establishment for all of your power plant problems. It's Pampa-preferred firm of highest quality sales and service.

Mead Success Story Typical Of Free Enterprise Systems

Everyone in America, no matter what his walk of life, is interested in a genuine success story—especially those stories based on hard work, common sense and the will to win. Such a story lies behind the success of the Mead family—brothers, partners, competitors. As so many of these go, this one is no different, the necessity of providing for a family forced a man to change the course of his life and become an outstanding success.

J. H. Mead had his beginning as a business man on a farm in Kentucky. Conditions soon dictated a change in existence, so he chose to move himself and family to Texas. Even in those days smart men chose Texas as the promised land. In Mr. Mead's case, even though he was yet to endure a bit of hard luck, it was a wise choice. A cloudburst managed to wash the Meads out of their Abilene farm. Mr. Mead hitched up his belt, traded the farm for a small grocery store and proceeded to train his sons in bookkeeping and bakery work.

In 1918 the family set up a bakery in his store and put the boys to operating it. They turned out a good product, they liked to work; soon they had the town's bread business well in hand. However, competition reared its beautiful head and forced the boys to re-adjust their sights. With competition delivered by truck, instead of mule cart, grocers receiving tailor-made bread a c k; mothers receiving candy wrapped in loaves of bread, the boys soon lost the greater portion of the business they had held so snugly. It taught them never to despise competition.

The boys went to work and converted the grocery store into a wholesale bakery. Their business grew. In three years they built a new baking plant. The business setback of 1922 slowed business a bit, but the Mead boys were able to open a second plant in Brownwood, Texas. The plant was later moved to Big Spring.

In 1928 the boys decided to divide their business into two parts and work in friendly competition. In a few years each branch of the company was acquiring new bakeries in various parts of Texas and New Mexico.

Good equipment was acquired and 'know how' was increased at every opportunity. High-level quality became the cardinal principle of operation. Wherever they took over a location they made a stronghold, and the two branches have never overstepped each other's rights or territories. They used the same trade name and modern methods, both doing their

share in spreading the name and fame of Meads Fine Bread. Actually, in ten years the hard-working Mead families jet-propelled a couple of small bread bakeries into a nationally known organization. They work together and use their utmost powers to put the finest quality into their products and give customers extra value.

Most large business success is due to the ability to bring good people together into a working organization. This the Meads have done, by providing plenty of opportunity for personal advancement to all willing workers who join them.

This company believes the opportunity to make a good living, to rise to the highest standard of living is the greatest blessing the American system of free enterprise has bestowed. The Meads are proud of the fact that they are making it possible for hundreds of ambitious people to forge successful careers, and also of the fact that the whole organization, working together, is providing the people of the Southwest with a new taste thrill in the enjoyment of their daily bread.

WELL, I'M SURE GLAD TO HEAR IT, RUDY! I'M GOING OVER THERE THIS AFTERNOON AND KIND OF CHECKUP ON THINGS!
AND RED DID A WONDERFUL JOB AS MY ASSISTANT, SHERIFF! I SUPPOSE YOU KNOW THAT THE DODGERS FARMED HIM OUT TO SAWMILLS AGAIN?
OH YES--MICHAEL TOLD ME I'M GOING UP THERE TO SEE HIM PLAY VERY SHORTLY! THINGS ARE ALWAYS QUIET AROUND HERE IN THE SUMMER--SO I'LL BE ABLE TO GET AWAY!
I'M SURE YOU'LL LIKE THIS PLACE, MRS. CARTER--IT'S NICELY FURNISHED AND I'LL BE VERY PEACEFUL HERE.
WELL, THAT'S WHAT WE ARE LOOKING FOR! MY HUSBAND IS AN A WRITER AND HE DOESN'T WANT TO BE DISTURBED.

Penny

AND YOUNG LADY WE WILL NOT TOLERATE SUCH BEHAVIOR ANY LONGER.
I KNOW I'M IMPOSSIBLE! I KNOW I'M SIMPLY UTTERLY HOPELESS! WHERE DO I GET MY ANGRY DISPOSITION?
RIGHT FROM MY VERY OWN PARENTS!
A GIRL OUGHT TO HAVE THE RIGHT TO PICK HER OWN ANCESTORS!

ART EXHIBIT — A group of paintings by the students of Mrs. B. A. McLarry are shown above as they were exhibited in the City Library last week. Students who exhibited included Mrs. Nora Anderson, Roy Smith, Becky Dodson, Don Milsap, Phyllis Nensiel and Ann Pollard. All the students except Mrs. Anderson are of elementary school age. Only Becky Dodson has painted longer than four months. (News Photo and Engraving)

Paintings Exhibited By Young Students

Art students of Mrs. B. A. McLarry exhibited their paintings in the City Library last week.

Exhibiting paintings were Don Milsap, Roy Smith, Becky Dodson, Phyllis Nensiel, Ann Pollard, and Mrs. Nora Anderson. All the students except Mrs. Anderson have just reached school age.

The class meets each Tuesday and Thursday from 1:30 until 4 p. m. in the home of Mrs. McLarry's mother, Mrs. B. C. Priest, 112 W. Browning.

The group has been taking lessons for the past four months. Only Becky Dodson had ever painted before.

Included in the exhibit were pencil drawings, charcoal and oil paintings.

Q—What is considered to be the rarest postage stamp?
A—The British Guiana one-cent issue of 1856. Only one such stamp is known to be in existence.

Q—When was air express service started?
A—Air express service was started on a commercial basis September 2, 1927, when the express company contracted with the existing airlines to carry express on regularly scheduled flights.

A REPORTER QUESTIONS...

By ROLAND BROWN

(Here are more exciting experiences of leading citizens whose troubles were caused by the lack of vitamins B₁, B₂, iron and niacin in their systems.)

THE QUESTION
Are you taking the remarkable new HADACOL treatment which is talking about? What are the results?

THE ANSWERS

Mrs. L. M. Hammack, 1025 Tulane St., Houston, Texas. "I have been sick for quite some time with neuritis aches and pains. I could hardly walk on my right leg for over a month. I started taking HADACOL and am on my fourth bottle and now I can walk as good as ever. Had no appetite at all but now I'm gaining. HADACOL is the most wonderful medicine in the world and I'm going to continue taking it."

Lawton Smith, Homerville, Georgia. "I had been down with weak spells, neuritis pain, and I just couldn't sleep at night. I had no appetite and nothing seemed to help me. I am now on my third bottle of HADACOL. I feel good, sleep good and eat better and no such pain. Thanks for HADACOL."

Varnella Sargent, Magnolia, Arkansas. "I had been weak until my mother heard about HADACOL and bought me some. I started taking HADACOL and now have more energy than most of my fellow students. I am 13 years old. I weigh more, eat more, and sleep better. I took only 5 bottles of HADACOL and feel such a medicine should be praised."

Mrs. I. E. Nelvis, Sr., 2622-A St. Vincent Ave., St. Louis, Mo. "I could hardly eat anything at all that did not hurt my stomach. Now I eat most anything I want and it doesn't hurt me. I can't praise HADACOL enough and have recommended it to all my friends and neighbors. I feel much better since I have been taking HADACOL."

NOTE: Why don't you get that wonderful, wonderful HADACOL feeling everyone is talking about? HADACOL treats and removes the cause of neuritis aches and pains, stomach distress, gas, bloating, insomnia, and a run-down nervous condition due to lack of vitamins B₁, B₂, iron and niacin in the system. That's why it's so amazingly successful and has brought relief beyond belief in case after case where all hope of getting relief had been given up. Sold on a strict money-back guarantee. Trial size, only \$1.25. Large family or hospital size, \$3.50.

Mainly About People

William S. Dixon of Pampa has been elected to Phi Tau Sigma, honorary mechanical engineering fraternity at the University of Texas. A senior mechanical engineering student, Dixon belongs to Sigma Phi Epsilon, social fraternity. His parents are Mr. and Mrs. W. S. Dixon, 809 North Gray.

Miss Bonnie Nell McBee, daughter of Mr. and Mrs. H. McBee and teacher in Dallas public schools, has returned home for the summer. She was graduated from Texas State College for Women last year.

Couple with one small baby wants to rent furnished apartment by June 12, rent not to exceed \$50 mo. Man permanently employed by local concern. Write Box 100, c/o Pampa News.

Mr. and Mrs. E. O. Wedgeworth and Mr. and Mrs. G. S. Vineyard are attending the Texas Chamber of Commerce Managers Association meeting in Amarillo today. Wedgeworth is manager of the Pampa Chamber of Commerce and Vineyard is president.

Women of the Moose will meet at the Moose Home at 8 p. m. Thursday instead of at the regular meeting tonight.

O and Z Cafe closed for remodeling. Watch this column for opening date. Cafe fixtures for sale cheap. Call 2583-J or 3273-W.

Mrs. Martha McKee gave birth to a baby boy yesterday in Highland General Hospital. The baby weighed 4 pounds and 10 ounces at birth.

Curtis Ray McLeod of McLean graduated from Texas A&M College June 2, receiving a bachelor of science degree in wildlife management.

Joe C. Gourlay of LeFors graduated from Texas A&M College June 2, receiving a bachelor of science degree in petroleum engineering.

For Sale: 1949 Chevrolet tudor. Equipped with heater, overdrive, and seat covers. See F. I. Green, Pampa News, or 805 N. Russell. Phone 2016 - W.

Mr. and Mrs. Tom Eckerd and Mr. and Mrs. James Washington spent the weekend in Oklahoma City visiting with Mr. and Mrs. Gene Horton, formerly of Pampa.

Mrs. J. M. Turner and Mrs. Jack Graham went to Albuquerque over the weekend to attend the wedding of Miss Peggy Crisp, who is the niece of both.

Galveston Normal After Big Rain

GALVESTON — (AP) — Galveston — hit by its biggest rain in 50 years Saturday — is back to normal.

Three to four feet of water swirled around over most of this resort city as the result of a 14.21-inch downpour. The last of the water drained off by late Saturday afternoon and cleanup work was finished yesterday.

At least \$500,000 damage was suffered. Charles H. Oehler, street commissioner, said an estimated \$100,000 of this was to streets. Merchants estimated their losses at \$400,000.

High winds whipped the island city during the nine-hour rain, but there were no deaths or injuries.

Crowds flocked to sunny beaches yesterday and hotels and tourist courts were crowded. Stores were cleaned up and closed — ready for business today.

Marshal Smuts Termed Better

JOHANNESBURG, South Africa — (AP) — Ailing Field Marshal Jan Christiana Smuts felt well enough yesterday to chat with members of his family for the first time since he became ill a week ago.

A medical bulletin said "signs of heart embarrassment are less and have responded to treatment. Oxygen is now administered only occasionally after bouts of coughing. In general progress is being maintained."

Smuts, 80 years old last May 24, was stricken by pneumonia last week.

Benedict Arnold sought to betray the fortress of West Point to the British during the American Revolutionary war.

'Ol Swimmin' Hole' Won't Be The Same, Officials Promise

By HENRY S. GORDON

Splash! But that sound of red blooded splashing from a graceful dive or just a plain, ungainly kerplow — won't be heard at the Municipal Swimming pool for another two weeks, at least.

The imitation ocean for landlocked plainmen is getting a going over inside and out this year as a part of the city's long range improvement program at the swimming pool.

More improvements are being planned for next year, but the budget allotment of \$6,500 for this year has been almost used, most of it for concrete work. Filtering and purifying improvements will come next year as well as additional beautifying of the grounds and surroundings.

Traveling toward the pool the first changes to meet the eye will be the absence of an unsightly high board fence that ate up too many gallons of paint each year and had to be replaced too many times when ill winds would tear sections of it down.

In its place will stand an eight-foot cyclone fence that parents can watch the family hopefuls learning the manly art of swimming. Mama and Papa can pull right up and park in front of a 350-foot sidewalk, complete with curb and gutter, extending from the front of the bath house to the east end of the pool.

Along the north side of the pool a six-foot concrete block fence is going up to replace that section of board fencing.

Once inside the fence, swimmers and paddlers can walk with confidence over the rough finished, red concrete walks around the pool. The non-skid topping is designed to spare patrons both bruises and embarrassment that usually result from bare feet sliding off in one direction and the torso in another.

The biggest improvements are invisible to everything but an X-ray camera. They are the acum gutter and redistribution system. The acum gutter, made of four-inch cast iron pipe has been buried in concrete around the top of the pool while the redistribution line of six-inch cast iron pipe runs around the bottom of the swimming area. This line is fitted with 30 nozzles designed especially for squirting 756 gallons of chlorinated water into the pool every minute. A drain near the shallow end of the pool carries the old water, by gravity, back to the sand filters and purifying pumps.

This system allows for a complete turnover of water every six hours, two hours less than state requirements for pools.

The distribution line nozzles, too, are designed and spaced so that no swimmer will feel the flow into the pool. The line, visible now, will be encased in concrete before the pool is opened for the summer.

All in all, 6,500 square feet of new sidewalk and benching is being poured around the pool in addition to the covering of the distribution line, plus the 350-foot walk and curb and gutter.

City Engineer Ray Evans estimated concrete work alone, including the stone wall, will run close to \$3,800.

Development of a small park to the east of the pool is also in the making. It will be started this year and probably finished and ready for use next year.

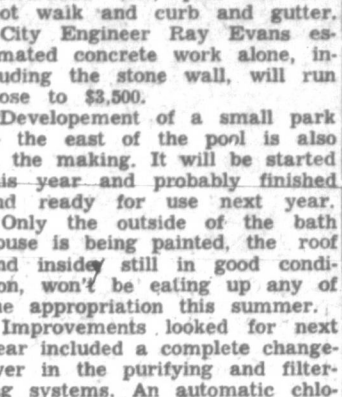

Only the outside of the bath house is being painted, the roof and inside still in good condition, won't be eating up any of the appropriation this summer.

Improvements looked for next year included a complete change-over in the purifying and filtering systems. An automatic chlorinator and Diatomite filtering system will make the water still more pure and crystal clear. A full-sized pump, enclosed in a concrete pump house is included in the 1951 program, Evans said.

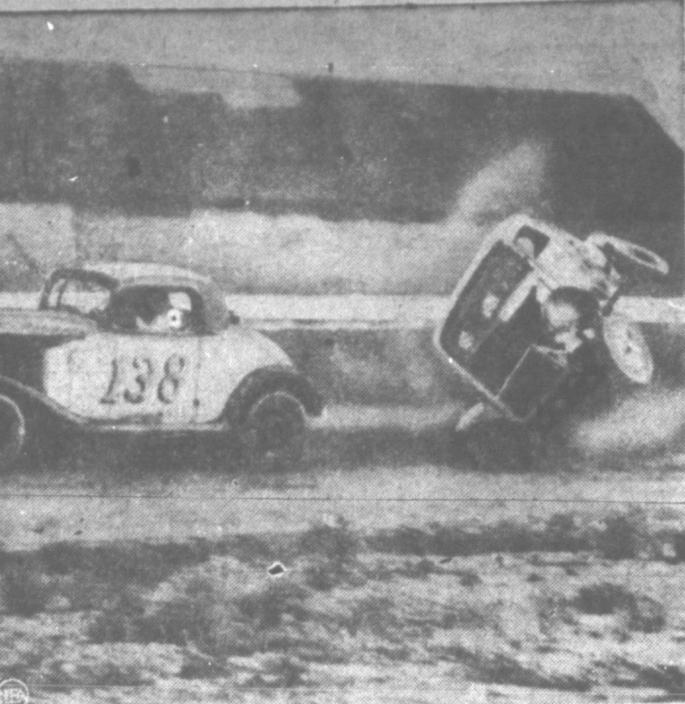

Date of opening for the 1950 season was still up in the air over the weekend, but officials expressed hope it would be open by June 15.

Personnel has not been selected yet, the big question being who will be head lifeguard. The pool needs a full time attendant, who is a qualified life guard and able to maintain discipline and handle two assistant life guards.

1,500-Mile Voyage From Panama in Light Boat Ended

MOBILE, Ala. — (AP) — A 1,500-mile voyage ended here yesterday when two brothers and a captain in the Air Force berthed their 24-foot engine and sail cutter after a venturesome trip from Panama.

The three — Joe King of Waco, Texas, his brother Charles, and Capt. Robert Quinn — were in good spirits after the three-weeks voyage, during which they had three close calls.

The first, they related, was a rough trip through the Panama Canal locks, the second was a close encounter with a freighter; and the third, heavy weather as their voyage neared its end.

Their craft, the Buccaneer, was damaged when the Panama Canal locks filled too rapidly, they said. Joe King slipped and fell during the passage and was almost pulled under.

Two days off Grand Caymen Island, a freighter almost ran a them down, they continued; and foul weather in the Gulf caused them some uneasiness off Fort Morgan at the entrance to Mobile Bay.

After a rest here, Joe King plans to return to Waco. Charles will remain at the nearby Brookley Air Force Base. He was the skipper during the voyage. At Balboa, the starting point of the trip, he was director of civilian personnel at Albrook Air Force Base.

Captain Quinn is assigned to Eglin Air Force Base, Fla.

Kids Take Advantage Of Sweet Accident

FREDERICK, Md. — (AP) — Chocolate bars and chocolate syrup were spewed all over the highway near here yesterday when a truck loaded with Hershey products overturned on a curve.

The cloud of cocoa hardly had begun to settle before the word was out, and youngsters from several miles around were taking advantage of the mishap. They went home with stomachs and pockets bulging.

MARKETS

FORT WORTH LIVESTOCK

Q—Where did the game of Canasta originate?
A—It is a species of rummy. Nobody knows when it appeared in the world, or who thought it up, but it very likely originated in Uruguay, filtered over the border into Argentina and was fallen upon by American travelers in Buenos Aires. Canasta means "basket" in Spanish.

Baby Sitter Jailed For Beating Infant

BALTIMORE — (AP) — A 16-year-old baby sitter began a 90-day jail term today for beating a four-month-old child so hard its screams brought neighbors running.

Mrs. Nellie Allen testified in a magistrate's trial that "when I came into the room, the baby had its little hands up in front of him like he was trying to defend himself."

Patrolman Robert Hall said when he asked the baby sitter, James Timmons, why he whipped the baby, the boy replied "the baby wouldn't stop crying."

The baby was his sister's child. Gold was so plentiful during early colonization of Honduras, that ranchers used the precious metal to shoe horses.

"THE FOOLISHNESS OF SIN"

What Does the Bible Say?

Beautiful model of a great idea!

Look, and you see beauty! New trend-making, pace-setting beauty inside and out! Then look deeper . . . beneath the surface! There's where you find an even greater difference! Great engineering—solid quality of construction. The great Chrysler idea that means new pleasure in the comfort of a car . . . new satisfaction in the durability and safety and convenience of a car! Look closer still! At the workmanship . . . at the quality of the materials . . . at the value all the way through that only Chrysler offers. That's what you pay for . . . and that's what pays you back! Come look . . . take the wheel . . . drive . . . there's nothing like this Chrysler.

- Chrysler Driving Advantages:** Fluid Drive . . . automatic gear shifting with exclusive car control High Compression Spiffie Engine . . . extra power at all speeds. Superlubricated parts for longer life. Exclusive Lubricated cylinder walls for greater wear! Waterproof Ignition System . . . prevents stalling in flood or storm. Full Flow Oil Filter keeps oil clean.
- Chrysler Comfort Advantages:** Chair Height Seats . . . no crumpling on the floor . . . Functional Design . . . room for your head, legs, shoulders. Easy to enter and leave. Center-arm Steering . . . minimizes road shock, wheel rattle. Rubber Body Mountings . . . Floating Power . . . eliminate vibration, help give softest, smoothest ride in history.
- Chrysler Safety Advantages:** Safety Rim Wheels . . . won't throw tires after blowouts at normal speeds. Constant Speed Windshield Wiper . . . electrically operated. Safe Guard Hydraulic Brakes . . . balanced brake power, smoother stops, less pedal pressure. Cyclone-banded belts for double the wear. Full vision . . . wherever you need it.

The Beautiful **CHRYSLER** with Fluid Drive
CORNELIUS MOTOR CO. • 315 W. FOSTER
