Volume 68 Number 80

Israel to repatriate 100 Palestinians

JERUSALEM (AP) - Israel will repatriate 100 of the deported Palestinians from Lebanon immediately and return the remainder within a year, Prime Minister Yitzhak Rabin announced Monday.

The deportations prompted the U.N. to demand the exiles' immediate return and endangered the resumption of Middle East peace talks.

Rabin said the arrangement was worked out in discussions with the United States, and that the Clinton administration undertook to shield Israel from international sanctions and to work to renew the Middle East peace talks.

"It is a package deal," he told a news conference, adding that it would apply whether or not the deported Palestinians accepted Israel's offer.

Clinton tax proposal targets wealthy

WASHINGTON (AP) -President Clinton's campaign proposal to raise the top income tax rate to 36 percent would boost taxes on about 3 1/2 million of the nation's highest-earning couples and individuals.

The tax increase would total about \$750 for a typical \$200,000-a-year family.

The proposal, which was passed by Congress last year but vetoed by President Bush, is again under consideration by Clinton as he prepares his plan for reducing the budget deficit. An announcement is expected in his State of the Union message Feb.

"I think that's not unlikely, but nothing's done yet," Clinton spokesman George Stephanopoulos said of the proposal.

Senate approves \$250 for prisons

AUSTIN (AP) — The Texas Senate on Monday approved a \$250 million emergency appropriation to build and operate new prisons and pay for state inmates jammed up in county jails.

But the proposal, which passed 29-0 and was sent to the House for consideration, will fail to come close to alleviating overcrowded jails, state lawmakers said.

The measure would provide for the construction and operation of facilities to house 10,000 more inmates, and pay counties \$72 million for the cost of holding state prisoners.

Texas has about 53,000 inmates in state prisons and another 18,000 in county jails awaiting transfer to the state system.

"I don't think anyone would tell you that this is a final solution because we're convicting people at an all time high rate," said Sen. John Whitmire, D-Houston.

Protesters 'still not satisfied'

by KRISTIE DAVIS THE UNIVERSITY DAILY

Students outraged by the outcome of the Pi Kappa Alpha fraternity and Fashion Board hearings gathered in protest Monday to garner unity against racism on the Texas Tech campus.

"We, the student body here at Texas Tech University, the brothers of Kappa Alpha Psi, in particular, and the minorities on campus feel as though those sanctions should have been upheld," Kappa Alpha Psi member Cleo Marshall said. "But because of freedom of speech, we found out that those sanctions were not legitimate."

Members of Kappa Alpha Psi fraternity began wearing black bandannas Jan. 25 to protest the inability to sanction the two organizations.

An opinion from the Attorney General's Office states that the Oct. 9 "Party in the Projects" is protected under the First Amendment.

The fraternity members will continue wearing the bandannas throughout February and also are asking other students to wear bandannas in protest.

"We, the brothers of Kappa Alpha Psi, began wearing black bandannas on our heads to represent unity, commitment and dissatisfaction with the system — a system that was developed for all, but does not work for all," Marshall said.

"We're not satisfied with what has taken place. We can never be satisfied and we will never be satisfied until the system that was developed for all and instituted for all begins to work for all," he said.

Kappa Alpha Psi member Bobby Johnson said, "I stand here wearing a black bandanna because I'm not satisfied. I'm going to let people know that I'm watching you and I'm watching everything you do because I'm not satisfied. And until you show me that you care about me as a person then, and only then, will I be satisfied."

Taking the next step

That damn piece of paper.

The Constitution, that is. On the one hand it gives Americans the inalienable right to be individuals who can form thoughts and opinions separate from all others, but on the other hand, that same piece of paper protects hatred, racism and intolerance.

Conflict naturally arises from this double standard, but to alter the Constitution would be to crack the foundation on which America was built. Individuals from other countries gladly would give life and limb to live in America because our laws allow so much freedom.

With this in mind, members of this campus should not waste their time or energy disputing the fairness of the ruling in favor of the Pi Kappa Alpha's and Fashion Board's decision to host "Party in the Projects," but promote constructive means of reprimanding racist behavior.

Monday marked the beginning of Black History Month, and to get the celebration started, members of Kappa Alpha Psi and other students had a rally with the theme "We're not satisfied" protesting the Pike/Fashion Board outcome. One student at the rally wearing a black bandanna on his head said, "We're not satisfied with what has taken place. We can never be satisfied and we will never be satisfied until the system that was developed for all and instituted for all begins to work for all."

Pretty powerful statement. But in the case of the Pikes/Fashion Board ruling, the system was working for all. Anyone in this country has the right to speak his or her mind. But the Constitution does not guarantee that

What needs to change is society's view toward racist behavior, not the Constitution. We as people, not as separate groups of blacks or whites or Hispanics, need to band together and make bigotry and hatred an unexcusable social crime. Students at the rally advocated boycotting Pikefest in a non-violent manner, which is a very positive way of telling people their attitudes needs some adjusting.

In addition, those same students at the rally need to reach out a hand to the Pikes and Fashion Board and let them know they are willing to work toward creating a mutual understanding rather than trying to scare them.

As one student at the rally so eloquently put it, "I'm going to let people know that I'm watching you and I'm watching everything you do."

This type of statement creates an atmosphere of paranoia and pits whites against blacks. As long as we keep ourselves separate, unity is that

Price hike not justified

The Board of Regents recently have made a decision for all the wrong reasons. The decision, of course, was to raise football ticket prices beginning next year.

After pointing out that ticket prices at Tech were among the lowest in the Southwest Conference, Tech alumnus Dan Law said the increases were necessary to keep Tech competitive with comparable schools, according to the Lubbock Avalanche-Journal.

Why does it matter if Tech's football prices are similar to UT's and A&M's? Shouldn't Tech be more concerned with the Red Raiders' competitiveness on the field, not at the box office?

Law, a well-known supporter of Tech athletics, then took one step further in faulty logic. He told the A-J, "A good, loyal, intelligent Raider fan would be reasonable and look at (the price increases) and know they were done after a lot of analyzing and research." A thoughtful statement at first glance, but the implication here is that any fans who do not agree

with the increases are bad, unloyal and stupid. Arguments against the price increases?

First, the average attendance in 1992 was 27,000 — a little more than half of Jones Stadium capacity of 50,500. The demand for football tickets does not merit increasing the price.

Second, along the lines of argument #1, prices should be directly tied to the quality of the product. Since 1990, Tech has compiled a record of 15-18, including last season's 5-6 mark. Good business says a product's price is not raised if the quality stays the same.

Third, the estimated \$125,000 jump in revenue is skewed. That number is based on 1992's attendance, when the prices were lower. The estimate does not include a likely attendance decline due to higher prices.

Fourth, simple economics say that revenue can be increased by cutting the price, because the increase in quantity more than offsets the loss from price reduction.

So the question is: Do the Board of Regents want to make the same amount of money with 25,000 people paying more or 50,000 people paying less?

Slicing up America for each race

TEPPER

February is now also known as Black History Month. A special month set aside to reminisce black struggle and achievement; to discuss current issues affecting minority lives and careers and to educate the. public on black culture. The Saddle Tramps have even

wrapped Will Rogers in the colors of the African flag to show campus unity. Of course, I don't see how these colors include me, but considering recent events surrounding this campus, I hope this celebration goes off without a hitch.

Even with that in mind, I must admit that I'm always suspicious of events that seem to stress our differences as races, rather than our similarities as Americans.

What if every race present in America demands a month set aside just for itself? They feel that they're not really Americans and want to prove it to everyone.

I know that there are many people out there that think this would be a good idea, or at least be tolerant of it. Maybe to some it's a great idea, but what if we had to go to war with this attitude?

What if we organized this another way. Let's say, just for argument's sake, that we're honest and even stressed our respective failures as well as our advances?

Make March, for example, Irish History

could allow ourselves to be beat up by some British fellas and then in return blow up their

How about April as Israeli History Month? If we have any Palestinians at Tech, we could banish them from campus and make them sleep outside at Jones Stadium till they get sick or freeze to death. Then for the positive side, our business majors could open an incredibly prosperous business and boost Lubbock's

May could be Russian History Month. The athletic department could produce the most amazing athletes in the world. On the down side, we could wait in long lines for hours for the most basic services; then again, we've already had our first week of the semester.

June is now English History Month. We could talk for hours about the personal lives of our own families. Especially the important, influential ones. Sell their stories to the National Enquirer, drag their reputations through the mud and make lots of money doing it. At the same time we can write innumerable masterpieces of literature and make countless scientific observations.

Mexican History Month is July. The Rec Center can organize a trip down to the Rio Grande Valley. We'll cheer for anyone struggling to cross the river to the good ole U.S. of A. Anyone who chooses to stay at Tech can go down to the art building and make Month. We could wrap Will Rogers in green and blankets, pottery and priceless works of art.

then drink beer till we turn green. After that we The restaurant, hotel and institutional management majors will cook Mexican food that'll melt your mouth.

> August can be Chinese History Month. A crowd assembles in Memorial Circle demanding the resignation of Dr. Lawless and Coach Spike Dykes. Dr. Lawless can direct the campus police to open fire into the crowd and then demand that the leading dissidents be tracked down and executed. I'm sure the campus police will get a kick out of it. On the other side, the philosophy department will write amazing theories and, well, be philosophical.

I think that I've about made my point, and if I've missed offending anyone, I'm sorry but there's only so much room.

All races have been unjust at some point to another race, especially if they could get away with it. All races have at some point been trampled upon, sometimes by their own people. All have had triumphs and failures, but as far as America is concerned, we can revel in the fact that our heritage is, for the most part, victorious. Just ask Adolph Hitler, Saddam Hussein or the formerly starving in Somalia. All fought or saved by Americans. Not separate nationalities or races.

Contrary to what you might now suspect, I think it's an admirable gesture for the Saddle Tramps to color Will Rogers in the colors of the African flag, but how about adding a little red, white and blue on some part so we can really celebrate unity.

> Carl Tepper is a sophomore political science major.

Defining conservatism

To the editor:

This letter is written in response to the current trend of dogmatic assertions by many of the liberal as well as conservative minded people. I am not writing in an attempt to persuade or disparage anyone; however, I would like to clarify the doctrine of conservatism for many who have been misled or who misunderstood its basic fundamen-

At the forefront of the conservative doctrine is the concept of "subsidiarity."

This merely alleges that the private sector should preside over its to self-indulgence must be denied. own social problems without the assistance of the public sector, unless circumstances require such action. An appropriate example would be one of "family leave." The care of children is considered by conservatives to be an issue of private sector concern, and not one of the federal government.

Conservatives wish to avoid the danger of an overbearing government that robs the individual of his or her inherent ability to mobilize and accomplish economic objectives. A more accurate understanding of this conservative fundamental should clear up the false emasculating association between conservatism and fascism. Depredatory tax brackets for those who have achieved economic success are suitable examples.

An often misunderstood postulate of conservatism is that of its policy toward minorities. Conservatism is dedicated to respect the variation among individuals and attempts to remove itself from any behavior associated with unfair discrimination (i.e. affirmative action). This issue is one that desperately needs a more comprehensive understanding by both sides of the political continuum.

I do not wish to initiate a discussion regarding abortion because it is primarily one with concrete fundamentals based in religion. I will include a quote by William F. Buckley Jr. to explain why conservatives typically support governmental action in the defense of the "right to life."

Buckley states, "... the propensity And correspondingly, the state must be denied not such powers as are necessary for authoritative action, but such powers as encourage authoritarian action."

I state once again that the purpose of this letter is merely an informative one. As far as documentation, which has been a problem for many recent writers, I refer you to the Aug. 17, 1992, issue of the National Review, pages 17-18, for a formal insight to the definition of conservatism as defined by conservative figurehead William F. Buckley Jr.

End the ban on homosexuals

To the editor:

I have a problem with the ban on homosexuals in the military. I am willing to consider valid arguments other than the ones I am about to address, but so far the only ones I have heard are completely unsub-I understand the need for a high

degree of selectivity in the armed forces. People who are handicapped, even if only by nearsightedness or asthma, are not accepted because their impairments may prevent them from successfully doing the jobs required. However, I have serious doubts that heterosexual preference is a prerequisite for correctly flying an airplane, programming a computer or operating a machine gun. Another point has been brought

up that the rest of the squadron may not be willing to fight for a homosexual's life. My question is, if such personal grounds on which to base a person's human worth are cited, then how do we differentiate who lives or not between a person who has engaged in premarital sex and one who has waited until marriage?

Supporters of the ban have also stated that the mixed sleeping and showering quarters between homosexuals and heterosexuals cause problems. I have never personally known a man who joined the service to pick up on women or a woman who enlisted to find a man. As a rule, enlistees are professionals Matthew R. Beatty — people who have made it their

duty to serve the government. If any serviceperson — man or woman, homosexual or heterosexual — displays unprofessional behavior, such as sexual harassment, then he or she should be reprimanded. It is unfair to assume that homosexuals are more suggestive or lusty than heterosexuals or to believe that they are more likely to make unwelcome advances.

As far as the spread of AIDS is concerned, educated people know that the disease cannot be contracted through normal contact, such as that between platoon or squadron members. And, as should all heterosexuals, homosexuals should be required to test negatively on an HIV screening before enrolling in the military. Many people claim that the U.S. military represent the country's morals and that allowing homosexuals to serve would somehow tarnish that reputation. But if the reputation my country is trying so hard to uphold is one that only acknowledges perfection, homogeneity, and the status quo, while rejecting diversity and equal opportunities, then I want that reputation to be overturned. I am neither homosexual nor planning to join the armed forces. Nor am I claiming to know about all the inner workings of the military. But until someone can present objections to the homosexual ban besides prejudice, homophobia, and fear of change, I stand in favor of it being lifted.

Art contest finalists to be recognized

Finalist winners of the 66th annual Scholastic Art Competition will be recognized at 1:30 p.m. Saturday in the auditorium of the Texas Tech business administration building.

National honors are gold medals, scholarships, cash awards and the honor of display at a nationally prominent location.

The competition, which encourages junior and senior high school students to achieve in creative art, gives students an opportunity for local recognition and scholarships offers through regional exhibitions.

Tours and demonstrations will be conducted from 10:30 a.m. to 1 p.m. in the art department.

A reception will follow the awards ceremony to honor the opening of the Regional Scholastic Art Awards Exhibition in the fine arts gallery and hall gallery of the art department.

The exhibition of all award-winning work and honorable mention work will remain on display until Feb. 19. Gallery hours are noon to 5 p.m.

To arrange group visitations, contact the art department at 742-3825 or Linda Kennedy or John Stinespring at 765-5207.

Visiting dance school provides positive role model

Arthur Mitchell, a former principle dancer with the New York City Ballet, was inspired to go back to Harlem to start a dance school to get young people off the streets. His inspiration came from the assassination of Dr. Martin Luther King.

The Dance Theatre of Harlem, which will perform at 8 p.m. today in the Lubbock Municipal Auditorium, was established because Mitchell said he believes that every child given an equal opportunity can excel.

Mitchell said children usually begin the school's pre-dance program when they are 3 years old. They begin formal training at age 7 and begin their professional career at

The children attend school at the dance theater instead of public school, but their primary focus is on dance, Mitchell said.

The dancers learn things such as to seven hours a day.

Female musicians have chance to gain exposure at convention

by JESSICA SMARTT THE UNIVERSITY DAILY

Cryptic Toast Fanzine is sponsoring a women's music trade show booth at the South by Southwest convention in Austin in March. The idea is to promote female musicians from Texas. To participate in the booth, an audition tape must be sent to the magazine by Feb. 15.

South by Southwest, or SXSW, is an annual music conference that showcases bands from all over the world, said Robin Myrick, a representative from Cryptic Toast.

The booths are set up as part of the trade show so artists can promote themselves in a supportive environment, Myrick said.

Writers and editors for Cryptic 26 Gawked Toast, a small format magazine, decided to sponsor a booth to promote female musicians from Texas.

"There are so many different kinds of women's music," Myrick said. "The industry can be so cutthroat. This is a good way for women artists to promote themselves."

"People who normally wouldn't pay attention to some of these bands are more likely to notice them at the conference," Myrick said.

Artists selected to participate in the booths will be part of the booth staff, to hand out promotional materials, Myrick said. Cryptic Toast will also

Pruitt making waves off bench | Are Rangers, Mavs perennial losers?

by CASEY WESTENRIEDER THE UNIVERSITY DAILY

All-American Tracy Saul is not the only competitor at Texas Tech from Idalou. The Lady Raiders also utilize an athlete from this small town east of Lubbock.

Kim Pruitt, a 6-foot junior who was a year behind Saul at Idalou High School, is a member of the Tech women's basketball team to "help however she can."

Pruitt said she had always known she would go to Texas Tech, but she admitted looking at other colleges who made her some offers.

"I took visits to SMU, UTA and North Texas," Pruitt said.

"I got letters from a lot of Southwest Conference schools, a school in Florida, Washington State, Washington and a couple of junior colleges."

Pruitt said she was convinced she wanted to play for the Lady Raiders by the recruiting efforts of Coach Marsha Sharp and assistant coach Linden Weese.

"I first met (Sharp and Weese) at a basketball camp between my seventh and eighth grade years," Pruitt said. "When I got into high school they kept in touch with me. It impressed me that I got a letter here and there during my junior and senior year of high school. Then I went to the first varsity camp at Texas Tech and coach Weese would always come up to me and give me a hard time. I thought he was funny and kind of crazy.

"Coach Sharp really didn't have to say anything to get me to go to Tech. I knew all along that I would go to Tech because the players and I got to know coach Sharp and coach Weese so well. I felt comfortable with them," she said.

only 97 minutes. This season she has played 92 minutes school was "unique." and the season is not yet half over.

50 percent of her free throws — statistics that shine for a reserve player. Pruitt had a streak of six consecutive field for the college game. We came to the decision that she was goals before going into last Saturday's contest against going to have to help us on the inside because we were so Texas Christian when the streak came to an end.

Pruitt has accepted her role as a backup but hopes to do

Pruitt

SHARON STEINMAN: THE UNIVERSITY DAILY

Assistant coach Roger Reding has helped coach Pruitt In Pruitt's first two years as a Lady Raider, she played for her first two years and said her situation out of high

"Kim came out of a (class) 2A high school where she Pruitt is shooting 46.9 percent from the floor and hitting got to play inside and outside," Reding said. "When she got here, we couldn't figure out where she was best suited

"Kim has gotten a lot more physical in the two years she's been here. As far as knowing where the ball needs to "I knew coming in I would be behind a lot of great be, what we need to get done and knowing what shots need players," Pruitt said. "I knew I would have to pay a price to be made, she's as good as anyone on the team. Kim's a like everybody else did. I'd like to become a starter but that real plus in that way. I don't think she wants to be a reserve will depend on how hard I work over the summer. If I can player — I don't think any kid does. But I think she's prove to (the coaches) how bad I want it and they believe accepted that role and has been positive for us in that part,
