After all, the method of handling fresh meat is secondary. The famous recipe for Welsh rabbit was not far wrong when it began with "First catch your rabbit." Before we can kill the "fatted calf" we must raise the calf and get him fat.

Maybe, too, if more fatted calves were killed and eaten on the farms where they grow, there would be fewer prodigal sons. A farm boy ought not to have to go to a restaurant in town to learn what fresh meat tastes like.

Strength During MIDDLE LIFE

Strength is extra-important for women going through the change of life. Then the body needs the very best nourishment to fortify it against the changes that are taking place. In such cases, Cardui has proved helpful to many women. It increases the appetite and aids digestion, favoring more complete transformation of food into living tissue, resulting in improved nutrition and building up and strengthening of the whole system.

To the Voters of Commissioners' Precinct No. 4:

Your active support in the July 23, Democratic Primary is solicited and will be appreciated. As your Commissioner during the last three years I have endeavored to the utmost to use the resources of the precinct to the best advantage of all the people. If re-elected, I promise to faithfully continue the pursuit of the best advantage of the office to the people. Do not be misled by extravagant and ridiculous statements. Investigation will prove my claim that I have kept faith with the people and that statements to the contrary are unfounded.

PERSONALITIES IN MUSIC
FRANK J. BLACK, A.S.C.A.P.
From Dairy to Music—and Back

By Daniel I. McNamara

DON'T try to "understand" music . . . enjoy it!
Dr. Frank J. Black, A.S.C.A.P., musical director, composer, conductor, and business executive extraordinary believes that in music as in other things one man's meat is another man's poison.

Black says that regardless of its technical structure, all music resolves itself into two classes—the music one likes, the music one does not like. And he believes its prime function is to be enjoyed.

Thus, in the vast stream of music flowing daily through the channels which he supervises, is to be found music that appeals to every variety of musical taste. Black himself, a brilliant artist, writes and conducts in virtually every idiom. He spends an average of more than 12 hours a day in his office or in the various broadcasting studios of NBC.

Black's Quaker parents mistakenly hailed him as successor to his father's successful dairy business when he was born in Philadelphia, November 28th, 1894. He was graduated from Haverford College as a chemist, but from early childhood had displayed talent in music. At 6 he had mastered the piano, and at 9 he stole away to a neighborhood motion picture house to play piano until his father hauled him home. At 12 he was a church singer and organist, and while he was completing his high school studies he commuted to become the favorite pupil of Rafael Joseffy, famous Hungarian pianist in New York. He forsook chemistry to become

New Book

J. Frank Dobie's new book of legendary "lost" mines of the Southwest and Mexico, particularly that of "Adam's Diggins," the latter supposedly in the mountains of New Mexico, will be finished and placed in the hands of the publisher sometime this fall, the author hopes. Professor Dobie has obtained a leave of absence from his teaching duties in the English department at the University of Texas for the first semester of the coming long session to devote the time to writing and research. He and Mrs. Dobie will depart for California as soon as the current summer term is ended at the University. Before they return to Austin, Mr. Dobie expects to have another book well outlined and perhaps partly written.

Huge Decrease in Acreage for Cotton Reported

WASHINGTON.—A 7,587,000-acre decrease in American farmland planted to cotton prompted AAA officials to declare the effectiveness of the crop control law had been demonstrated conclusively.

The Federal Crop Reporting Board estimated that acres in cultivation on July 1 totaled 26,904,000, contrasted with 34,411,000 a year ago.

Under the control program, designed to prevent the accumulation of price-depressing surpluses, the Agriculture Department had allotted growers 27,527,596 acres this year. Thus the crop board's estimate indicated farmers made a sharper reduction in planting of the South's big crop than had been asked.

However, the crop board said other factors also led to the reduction. It mentioned low prices received for last year's crop, and difficulties farmers encountered in securing good crop stands because of unfavorable weather.

The board said that should abandonment of cotton acreage during the remainder of this season be equal to the 1928-37 average abandonment, the acreage for harvest would be the smallest since 1900.

Last year's acreage produced a record crop of 18,945,000 bales and added to a surplus now estimated at 13,000,000 bales.

While the crop board made no forecast of production this year, cotton experts said a crop of between 10,000,000,000 and 11,750,000 bales was indicated.

Thirteen years were required to construct the Suez Canal.

Buchman May Get World Peace Prize

LONDON.—London and Edinburgh newspapers are discussing the rumor that Dr. Frank N. D. Buchman, founder and world leader of the Oxford Group, is being considered for the Nobel Peace Prize award this year. The newspapers have drawn attention to the fact that the suggestion first was made recently in Scandinavian papers which are published close to the authority that selects the recipient—the Norwegian Parliament.

The London Evening Standard after discussing the "tip" that Dr. Buchman is being studied as the recipient, states: "The significance of the suggestion lies in the fact that it comes from Scandinavia and the award is made by the Norwegian Parliament." In recent issues, Edinburgh papers have also discussed this phase of the proposal.

VOTE FOR

Tolbert Patterson
—for—
State Representative
SECOND TERM

To the Voters of Mills County:
It has been impossible for me to see each of you personally. I do want you to know, however, that I sincerely want your vote and whatever good word you can say for me in my race for Second Term as your State Representative on July 23rd.

As a member of the Texas Legislature, I have tried hard to be a fair and efficient Representative of the people of Mills and Comanche Counties. My record as your servant shows that I have been guided by those principles which I pledged to you two years ago. I voted and worked to eliminate the unfairness and waste from the Old Age Assistance program, was deeply interested in getting something done to place appropriations and spending in Texas on a business basis, and voted and worked to shift a portion of the tax burdens of the average citizen to the natural resource interests of this state.

When elected to a second term, I pledge you my best efforts and my desire to be statesman to the extent of keeping the interests of the average citizens of Texas and of my district foremost at all times.

SINCERELY,
TOLBERT PATTERSON

Mohair Prices Jump Upward

SAN ANGELO.—With only 400-000 pounds of mohair now left in the growers' hands in Texas, the erratic stole the range textile spotlight the first of the week as prices spurted upward to 40 cents a pound for grown hair and 50 cents for kid, 17 cents above the lows for the forepart of the marketing season.

The new 1938 peak prices were secured by the Uvalde Wool & Mohair Co., and 195,000 pounds, and the Sonora Wool & Mohair Co., on 100,000 pounds.

Gets New Title

A new title has been bestowed upon Howell E. Cobb, McCulloch county judge. He crowned attractive Miss Loveta Shuler as queen of the 1938 Jubilee in a formal ceremony Saturday night before a crowd of more than 3,500 persons. And his capacity therein was that of "Archbishop Howell E. Cobb." Now, they're calling him "Archbishop."
