Questions And Answers About Social Security

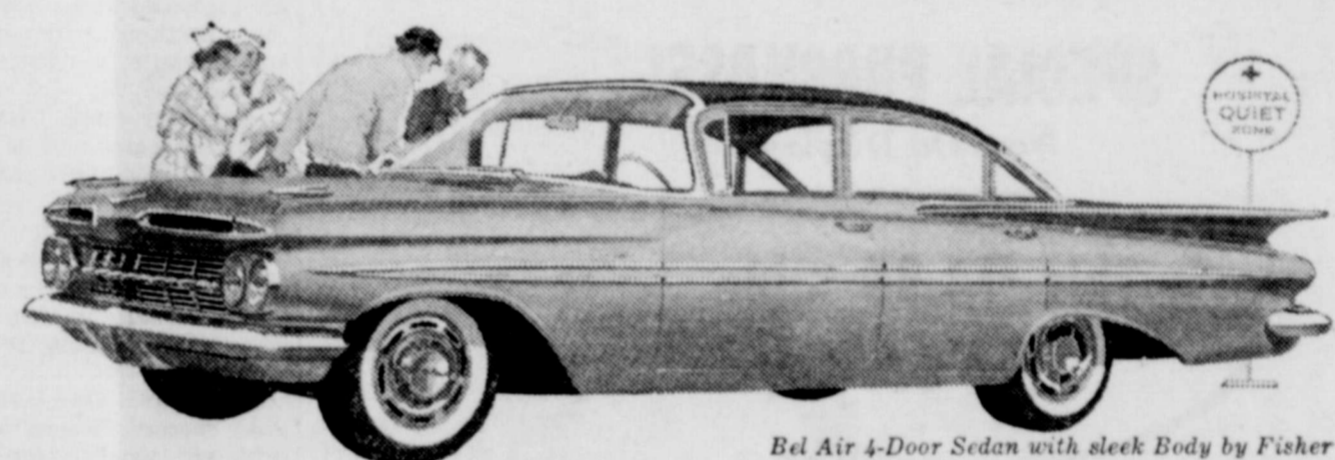

Question: I have been receiving social security disability payments for the past 3 years. Next month I will be age 65. Will my payments be increased?
Answer: No. The amount of the disability payment is the same as the old-age insurance benefit.
Question: I employ a part-time maid and pay her \$10 a week. She does not want social security taxes withheld from her wages. Must I pay my share of the tax anyway?
Answer: You, as the employer, are responsible for paying all of the tax. If you do not withhold her share from her wages, you must pay all of the tax yourself.

smoothest ride!

One of the 7 big bests Chevrolet gives you over any other car in its field

Anyone who's ever taken a Chevy over a choppy country road can tell you how lightly Chevrolet's Full Coil suspension handles rough going—and coil springs never squeak, never need grease! Try this velvet way of going for yourself. Once you do, you'll find your own way of saying what MOTOR TREND magazine puts this way: "... the smoothest, most quiet, softest riding car in its price class." But the happiest part of it all is that this Full Coil ride is just one of seven big bests—all documented by published opinions of experts and on-the-record facts and figures.

BEST ROOM—Official dimensions reported to A.M.A.* show that Chevrolet sedans offer more front seat head room than all but one of the high-priced cars—more front seat hip room (by up to 5.9 inches) than the "other two" of the leading low-priced three.

BEST ENGINE—Chevrolet engines have long won expert praise from virtually every automobile magazine, and, just recently, Chevrolet received the NASCAR† Outstanding Achievement award for "the creation and continuing development of America's most efficient V-type engines."

BEST ECONOMY—A pair of Chevrolet sixes with Powerglide won their class in this year's Mobilgas Economy Run, topping every other full-sized car. And the winning mileage was a whopping 22.38 m.p.g.

BEST BRAKES—Chevy's bonded-lining brakes are the biggest in their field, built for up to 66% longer life. In a direct competition conducted by NASCAR, Chevy out-stopped both of the other leading low-priced cars in a test of repeated stops from highway speeds.

BEST STYLE—It's the only car of the leading low-priced 3 that's unmistakably modern in every line. "In its price class," says POPULAR SCIENCE magazine, "a new high in daring styling."

BEST TRADE-IN—Any N.A.D.A.‡ Guide Book can give you the figures on Chevy's extra value. You'll find that Chevrolet used car prices last year averaged up to \$128 higher than comparable models of the "other two." Your Chevrolet dealer will be happy to tell you about a whole host of other advantages besides these seven. Why not drop by his showroom?

DEATH OF WHARTON RECTOR

The Fort Smith Times contains the following notice of the assassination of Wharton Rector, and the stabbing of his brother Frank, at the Agency of the Wichita Indians, by Major Hurst:

ternoon, Major Hurst, seeming to be in ill-humor, was first rather abusing to Col. Blain, who was present, and then Major Rector, Indian Superintendent, and Frank said something to him about abusing his uncle "in his presence—and rather gray hairs. Soon after Frank was about going out of the tent, and Wharton was sitting in the tent dressing; and as Frank went out, Hurst followed, and raised his hand to strike Frank with a knife. Wharton cried out, "don't strike Frank with that knife," and jumped up to prevent it—but the lick was made just as Wharton seized him by the arm. Frank fell; and Hurst then immediately struck Wharton to the heart. He died in about an hour. Frank, enraged and still bleeding, went out and got a pistol and would have shot Hurst on the spot; but was prevented by Col. Blain—and in the hurry and confusion Hurst escaped; no one being present but Col. Blain and one other gentleman. Hurst was caught fifteen miles from there on the road to Texas, and passed through here last Wednesday, on the way to Van Buren, in custody of Deputy Marshall Whitesides.

1960 Soil Bank Details Available By Mid-August

Farmers of Mills County who are interested in the Conservation Reserve of the Soil Bank for the 1960 crop season will be able to get full information at the county Agricultural Stabilization and Conservation office after the middle of August, ASC Chairman E. L. Burkett said.

This will be the fifth year of the Conservation Reserve, under which farmers contract to withdraw general cropland from production and protect it with conservation uses for a period of 3 to 10 years. The national program for 1960 was announced recently, but it will be several weeks before county office personnel has full details, Mr. Burkett said.

The 1960 Conservation reserve will be similar to the 1959 program, Mr. Burkett said, except that substantially less new acreage will be taken into the program than last year—only about 5 million acres nationally as compared with approximately 13 million last year. The basic national rate of payment will be \$13.50, the same as in 1959.

The principal changes in the program this year will be as follows:

1. Land owned by a State, County, town, or local government will be ineligible for the program—a rule which is already in effect for Federal land.

who have started up Salt River had best avoid the frontier or else send out another "Peace Commission." One more Indian, writes Mr. Hunter, was killed on the 7th. Five or six more supposed to be in the neighborhood.

Head Attends Area Meeting

Thurman Head, Vocational Agriculture teacher for Goldthwaite Schools attended the Area Advisory Council on July 27-28 at Lake Buchanan.

The meeting was for presidents and secretaries of area seven which is composed of six districts.

Head is president of district seven.

Personals

Dr. and Mrs. R. M. Burgess of Fort Worth spent the weekend with her sister, Mrs. Grover Dalton and granddaughter, Cherry Dunn, and also visited Mr. Dalton, who is a patient at Childress Clinic & Hospital.

Merlin Lemons visited a short time in the Locklear home Sunday afternoon, and reported that his grandfather, Johnny Lane, of Brady, a former citizen of Mills County, was very ill at the home of his daughter, Mrs. Jess Lemons and Mr. Lemons at Voca.

2. Land which has changed ownership (except through inheritance) since Dec. 1956, is ineligible to enter the program in 1960.

3. If land under a 1960 Conservation Reserve contract is sold, the contract generally may be assumed by the purchaser only after it has been in effect for 3 years.

As in 1959, the 1960 Conservation Reserve will be conducted on an offer-and-acceptance basis. The first step will be for the farmer to inform the county office of the land he wants to place in the program and request that a basic per acre rate be established for that land. These rate requests may be filed at the county office beginning August 24, and must be filed not later than Sept. 10, if the farmer wants to be considered for a 1960 contract.

The county committee will establish the rate, setting it 10 per cent higher if all eligible cropland on the farm is to be

retired.

After the basic rate has been determined, the farmer may apply for a contract at any figure below that rate. In case the county receives more applications than it can accept, priority will be given to the farmer offering the land at the lowest rate compared with the basic rate established for his land. For example, if the basic rate on a farmer's land is set at \$12 an acre, he will have a better chance of getting a contract if he offers the land at \$9 an acre than if he offers it at \$10 or more.

For most farms, placing land under contract will require a corresponding acreage reduction in grains, oilseeds, and row crops, which are known as Soil Bank base crops. The per-acre rate will be earned each year the contract is in effect. In addition, a farmer can get a cost-sharing payment to assist in establishing approved conservation uses on the land.

"ease," he said. "I just store my gun in it. There is enough oil in the fleece to give it protection."

"I wanted to bet him how wrong he was. But that would have been taking money too easy. However, at my suggestion he went to the closet and opened the case. He was aghast at the condition of his gun. It was flecked all over with minute rust particles.

Here's what had happened. He put the gun in the case while the gun was still damp; the wool held the dampness; rust began to form on the metal parts. Now the gun no longer looks like a brand new one.

This incident is being passed on to you, with the hope that you took time to clean your gun after your last hunt. Also that you did not leave it stored in some tight case where it couldn't get plenty of air. That is dangerous.

This also is a good time of the year to have any repairs taken care of. Most fellows who have guns with cracked stocks, loose screws, or something else wrong, will wait until three days before the season opens to have repairs made. By that time the gunshops already are rushed with work. Result is a hurried job — if not too late entirely. It's wise to have these matters tended to early.

We'll get some new guns this year, too. In fact, Remington already has come out with an eye-opener for those who take a second look at beauty.

The better guns are appearing with "sun grain" in the stocks, and gold finished parts, such as bolts and trigger guards. They are most attrac-

STARTING PITCHERS—Jerry Walker (left), of the Kansas City Athletics, was starting pitcher for the American League in the All-Star game in Los Angeles, Calif. Don Drysdale (right), of the Los Angeles Dodgers, took to the mound for the National League in the season's second All-Star game.

Remington also has announced a new 12-gauge Automaster, which retails for just slightly over \$100. It is a quick change barrel, light weight, reduced coil gun made to a three-shot capacity.

Earlier in the year Remington produced a new shot-gun barrel with rifle shots. It is available at present on the models 870, 11-48 and the Sportsman 58. This barrel is especially adapted to the rifled slugs and should be very deadly at close range.

Mossberg will offer a new gun this fall. It will be a lever action 22. It's in response to the demand created by westerners, wherein lever actions have been glorified.

At the present time, Marlin is the only manufacturer of a lever action 22. This has been a very famous and accurate little gun for years.

It's too bad that one of these companies doesn't make a lever action for the 22 hornet. This would be an ideal varmint gun, with so much more authority than the regular 22 long rifle. Some day perhaps we'll get it!

It also will interest coming season shooters that there is every indication of another bountiful crop of both dove and quail this year. A trip across Texas reveals that there is an excellent seed crop. Doves have moved back in by the thousands. A trip through the Lower Valley is convincing that white-winged doves have a good chance this year. Biologists already have predicted a good crop of animals.

Shooters also will get their chances at more resorts this year, not only in Texas, but across the nation. These shooting resorts are increasing in popularity every season. There are indications that the number in Texas this year will almost double.

Texas, along with other states, is passing helpful legislation so that landowners can operate these resort areas in a practical manner and at a profit. After all, if there is no profit, they can't afford to stay in business. If they can't stay in business, the shooters will lose, because there will be fewer places to hunt.

The shooting resort business has grown so in Illinois that they have organized a Shooting Preserve Association. This group of resort owners then sets up uniform standards for its members to follow. The new standards are aimed primarily at the operators, to assist them in keeping up good qualities of

sportsmanship. They have set up rules which will permit only full-plumaged birds more than 14 weeks of age to be released. They should be capable of sustained flight similar to that of wild birds.

The new code also provides for shooting areas to be well-planted, with plenty of food and natural cover that will closely duplicate wild habitat.

There is a great deal of duck shooting at Illinois resorts. The new standards provide that pen-reared mallards must be similar in weight and plumage to the wild ducks and that all mallards must be capable of flight between release site and resting ponds.

All the operators must maintain well-trained dogs to help reduce the crippling losses of game birds.

In addition, the group will stress gun safety. Above all else, it will "give the Illinois Conservation Department full cooperation in reports, law enforcement and other administrative aspects of the industry."

Thus, one state has taken a long step forward to provide better hunting for its citizens.

Alex T. McGary Returns To Berlin

Berlin (AHTNC)—Army Pvt. Alex T. McGary, 20, son of Mr. and Mrs. John McGary, Mullin, recently returned with his unit to its permanent location in Berlin after having completed annual infantry training in Wildflecken, West Germany. McGary and other members of the 8th Infantry's Company C journeyed through Soviet-controlled East Germany to Wildflecken, where squad, platoon and company-level tactical maneuvers were conducted under simulated combat condi-

tions. The training was designed to determine the combat readiness of the unit.

The Berlin Command, organized at the end of World War II, is an 81-square mile area in the southwest portion of the four-power city.

McGary is a rifleman. Overseas since May 1958, he attended Mills County Industrial School before entering the Army in September 1956.
