# Two Good **Reasons** for **Feeding Creep Chow**

The calf, of course, gets the benefit of the extra energy, protein and other nutrients in Purina Creep Chow. He needs them if he is going to reach market weight quickly and bring top price. Purina research shows that creep-fed calves average 40 to 60 pounds heavier at weaning.

But mother cow also benefits from creep feeding. She isn't "suckled down" as heavily by a creep-fed calf, therefore, she is in better condition during the breeding season. Creep feeding can make a dollars and cents difference in the conception rate of your brood cows.

To learn more about how Purina Creep Chow can help you increase your herd production, drop in. We're at the store with the Checkerboard sign.
