The Hedley Informer

VOL. VII

HEDLEY, DONLEY COUNTY, TEXAS, APRIL 6 1917

NO. 21

NEW CITY OF-FICIALS ELECTED

* The City election last Tuesday resulted in the following being elected for the coming year:

Mayor, P. C. Johnson.

the Panhandle.

RANCH HOUSE DESTROYED

The ranch house on the TV ranch, owned by Sager & Craven, was totally destroyed by fire Sunday. The house was a rock building and was set afire by the burning of a small frame build ing adjoining. The house was occupied by the ranch boss and the cow boys were boarded there. Chief of the Childress Fire De-

partment. Jas. W. Mitchell, Ernest Davis, Tan Tanner and their wives, who were lunch guests of Mr. and Mrs. Emory Sager, assisted in removing all household goods from the buildings. Damage will be repaired at once. The walls of the building were not damagnd to a great

When it comes to fire fighting the Childress boys are there, even if the blaze is twenty miles away from the nearest fire plug. -Childress Index.

THE ROBT. DISH-MAN WEDDING

When Robert B. Dishman start ed teaching Miss Marie Frances Crossman, pretty Clayton society girl, the science of memory training, it proved to be "two minds with but a single thought."

After taking memory lessons for three months Miss Crossman proved a very apt pupil and also a good mind reader. She read that Dishman knew another art than mere mind training.

The propinquity of minds and Cupid will result today in marriage at the home of Miss Crossman 446 Forsythe boulevard, in Clayton. The ceremony will be performed by Rev. Walter M. Langtry of the Presbyterian Church.

The affair will also make the twenty fifth wedding anniversary of Miss Crossman's parents, Mr. and Mrs. C. C. Crossman. A double celebration will be held after the wedding.

Dishman is a teacher in a school of memory in New York. Miss Crossman's father is the world's champion revolver shot. He is president of the United States Revolver, Association and vice president of the Skinner & Kennedy Stationery Company. He and Mrs. Crossman hold many medals for shooting .- St. Louis Republic.

Mrs. J. B. Ozier has been suffering quite a lot lately with appendicitis, and Wednesday night she was taken to Dailas for treatment. She wa's accompanied by her husband, Dr. Ozier, and her mother, Mrs. A A. Teel, and Dr. Ham of Clarendon.

Hedley School Fair Complete Success

Should Hedley have a Commercial Club

JULIA ETTA LANE

Yes, a Commercial Club is needed very badly in Hedley because it would help build up the town by getting the people interested in the work that they undertake to do, and it would improve the business.

Why is it that Hedley is with out a Commercial Club? Is it because the men are not interested in it, or is because of the war, they cannot or will not pay ten or fifteen cents for dues? People, wake up, and let's have a Commercial Club, and don't be stingy with your money. Yes, the war is on and we cannot afford much, but in the long run we will find that a Commercial Club has helped us greatly.

The farmers living around Hedley would come to our town and trade more with us instead of going elsewhere to do their trading, not only the farmers but there are many people living in Hedley who go to neighboring towns to do their buying and

A Commercial Club would help boost the town and also help in cleaning up the town. We can Word has been received that have one if the people will wake

SEEDS!

INDIGESTION, GAS OR SICK STOMACH

Time it! Pape's Diapepsin ends all Stomach misery in five minutes.

Do some foods you eat hit backtaste good, but work badly; ferment into stubborn lumps and cause a sick, sour, gassy stomach? Now, Mr. or Mrs. Dyspeptic, jot this down: Pape's never was anything so safely quick, so have been discouraging. Plenty of she is sitting certainly effective. No difference how badly your stomach is disordered you raising. will get happy relief in five minutes but what pleases you most is that it strengthens and regulates your stom ach so you can eat your favorite foods | ered are vigor, size, shape, bone, early | for nothing is more injurious than for without fear.

You feel different as soon as "Pape's Diapepsin" comes in contact with the mated to a vigorous tom. If twenty- mother turkey hen to a coop in a field stomach-distress just vanishes-your stomach gets sweet, no gases, no belch

ing, no eructations of undigested food Go now, make the best investment you ever made, by getting a large fiftycent case of Pape's Diapepsin from any store. You realize in five minutes how needless it is to suffer from indiges tion, dyspepsia or bad stomach. Adv.

Its Status.

Coroner-Was there any peculiarity about the deceased by which you could identify him? Witness-Yis, sorr. He stuttered.

For speedy and effective action Dr. Peery's "Dead Shot" has no equal. One dose only will clean out Worms or Tapeworm in a few lettrs. Adv.

CALLS WOMEN WEAK SISTERS

Good Looking, but Physically Unfit, Is the Assertion Made by Aged Viennese.

American women are good looking and clever, but not very strong physically, according to the verdict passed upon them by Mrs. Charlotte de Goliere Davenport, who spoke before the Woman's club here. Mrs. Davenport is in her ninety-fourth year, has a son seventy-four years old, and is the mother of 20 children. She was gradnated from the University of Vienna essor of bygiene, which, she says, was a great distinction, as "the Austrian universities are hard or women."

It was in teaching the women of New York fencing that Mrs. Davenport became impressed by their physical weakness, and warns American women, in consequence, to build themselves up physically.

That women are not thinking very earnestly was another assertion of the visitor. She believes in women possessing strong individuality, of being original and independent as thinkers. and her short, informal talk encouraged women to cultivate such tendencies.

"All are supposed to have five senses." the speaker said, "but some women do not seem to have any. Instead of subtracting from that number, they should be adding to them two more. The sixth sense is to know yourself, and the seventh sense is to know human nature in general-te know bumanity." Mrs. Daveaport said -New Orleans Thres-Picayune.

A new boy's sied has a third run ner in front to aid in steering.

WOMAN COULD HARDLY STAND

Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Fulton, N. Y. — "Why will women pay out their money for treatment and receive no benefit, when so many have proved that Lydia E. Pinkham's Vegetable Compound will make them well? For over a year I suffered so from female weakness I could hardly stand and was afraid to go on the street alone. Doc-

tors said medicines were useless and only an operation would help me, but Lydia E. Pinkham's Vegetable Compound has proved it otherwise. I am now perfectly well and can do any kind of work."—Mrs. NELLIE PHELPS, care of R. A. Rider, R. F. D. No. 5, Fulton, N. Y.

We wish every woman who suffers from female troubles, nervousness, backache or the blues could see the letters written by women made well by Lydia.

ters written by women made well by Ly-dia E. Pinkham's Vegetable Compound. If you have bad symptoms and do not understand the cause, write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for helpful advice given free.

No Wonder She Recalled. "She had to call in the invitations for that elaborate dinner.' "Some domestic catastrophe?" "Yes, the cook left."

FALLING HAIR MEANS DANDRUFF IS ACTIVE

Save Your Hair! Get a 25 Cent Bottle of Danderine Right Now-Also Stops Itching Scalp.

Thin, brittle, colorless and scraggy hair is mute evidence of a neglected scalp; of dandruff-that awful scurf. There is nothing so destructive to the hair as dandruff. It robs the hair

of its luster, its strength and its very life; eventually producing a feverishness and itching of the scalp, which if not remedied causes the hair roots to shrink, loosen and die-then the hair falls out fast. A little Danderine tonight-now-any time-will surely save your hair.

Get a 25 cent bottle of Knowlton's Danderine from any store, and after the first application your hair will take on that life, luster and luxuriance which is so beautiful. It will become gloss and softness, but what will please you most will be after just a few weeks' use, when you will actually see a lot of fine, downy hair-new hair-growing all over the scalp. Adv.

One of the principal ingredients in a good time is your imagination.

WHAT IS

A DIGESTIVE LAXATIVE CATHARTIC AND LIVER TONIC Lax-Fos is not a secret or Patent Medi-cine but is composed of the following old-fashioned roots and herbs:

CASCARA BARK BLUE FLAG ROOT RHUBARB ROOT BLACK ROOT MAY APPLE ROOT SENNA LEAVES AND PEPSIN

In Lax-Fos the Cascara is improved by the addition of these digestive ingredients making it better than ordinary CASCARA, and thus the combination acts not only as a stimulating laxative and cathartic but also as a digestive and liver tonic. Syrup laxatives are weak, but Lax-Fos combines strength with palatable, aromatic taste and does not gripe or disturb the stomach. One bottle will prove Lax-Fos is invaluable for Constipation, Indigestion or Torpid Liver.

BATTLE WITH GIANT EAGLES

Collfornia Deer Hunters Had Fierce Fight Before Overcoming Two Monarchs of the Air.

Altacked by two monster eagles while deer hunting in the Malibu district, Doctor Kingsbury of Ocean Park, G. M. Wilson, a rancher, and Policeman Harry Wright of Santa Monica, fought two hours before they were able to kill the birds, writes a Les Angeles correspondent.

Shricking and screaming, the eagles tore at the men with their claws, tearing Wright's clothing in many places and inflicting a flesh wound on Kingsbury's right shoulder.

The fight began with only one of the birds. The men were hunting on the denly a huge eagle swooped down and bird down.

As the three men rushed forward the

eagle. It started to fly away and then -she was such a good woman!" came back. The men began shooting at it, driving it a little farther away with each shot. For four miles they chased the bird before finally killing

HONOR BELONGS TO FITCH

Connecticut Man Built Steamboat Twenty Years Before Fulton Launched the Clermont.

The first trial of John Fitch's pioneer sidewheel steamboat was made on the Delaware August 22, 1787, anticipating Fulton's Clermont by 20 years. Fitch was a native of Connecticut and prior to building his steamboat had been an armorer in the military servin Virginia, and a manufacturer of pelled by steam. This pioneer craft much family." was fitted with an engine of 12-inch cylinder, and though the boat did not attain sufficient speed to answer the purpose of a packet, the trial proved conclusively the efficiency of steam as a motive power for vessels. In 1788 Fitch built a second steamboat, which made several passages between Philadelphia and Burlington at the rate of four miles an hour. In 1790 a third craft was built and was run as a passenger craft on the Pelaware, making during the season more than 2.000 miles at an average speed of seven and one-half miles an hour. Although John Fitch scored the first practical success in steam navigation, he was a failure financially, and in 1798 he committed suicide at Bardstown, Ky.

He Surely Had. William J. Bryan was expected in St. Paul the other day. He didn't come, but that is another story.

A reporter and a photographer, bent on overcoming the commoner's well known aversion to talking or having his picture taken, were seeking him aboord a train just arrived at the Union station.

They approached a dusky whiskbroom wielder and inquired if Mr. Bryan was aboard.

"Shuah he is. Heah he comes now. Heab, Mr. Bryan, gemmen wishes to

Neither the shiny top nor the curly sidelocks of William J. were in sight and the inquisitive pair waited until another son of Africa approached and

"Ah's Mistah Bryan. What can I do foah you, sah?"

"Not a thing. But, gosh! How you have changed, Mr. Bryan," said the photographer as he hastened down the steps with his companion .- St. Paul Pioneer Press.

Work and Play.

South Americans have not yet learned that play is as necessary to the child as is work. "A sound mind in a sound body" has not been stressed to the people of that continent as it has to those of North America. They think that time spent in play is time lost-and they frown upon it. "The parents wish to keep their children poring over their books, and believe that recreation interferes with their inellectual development," said a member of the national committee on physical education of Uruguay recently. It is only in recent years that the people of the United States have realized that children must be taught to playjust as they must be taught to think. There are yet among us some who think that money spent on playgrounds and on instructors is money lost-but we are gradually learning; and the South American will learn, too .- Hous-

CCORDING TO RANCH CODE

Cowboy Did the Only Thing He Felt There Was to Do Under the Circumstances.

A story certainly untrue, but one enutifully plausible, was told by the hilene (Kan.) Reflector. It concerns man who by definition, as the mathon relates say-had spent all his life a a remote cattle ranch and was uterly inexperienced in any tenderer or entler relations than those which exst between men like himself and beween them and their bovine charges.

This untutored yet theroughly wellintentioned person, according to the ale as told, at last went to a border town and there, as might have been expected, he fell promptly and violent-Williams ranch with two dogs. Sud- ly in love with the first woman with whom he became acquainted, who hapgrabbed one of the dogs. It circled pened to be the pretty waitress who 20 feet in the air with the dog in its served him at the table. His wooing talons before the men could fire. The was equally vigorous and successful. first shot missed, but the second shot In a few days the twain were married from 'Kingsbury's 'gun brought the and together they started back for the grow light, and life is new again! ranch on horseback.

A week later the cowboy returned eagle dropped the dog and struck out to the town alone and of deeply sorat Wright, screaming all the while. rowful mien. To the natural and im-Its screams brought its mate, the lat- mediate inquiries that were made as ter making an attack on Kingsbury to the whereabouts of his bride he reand sinking its talons into his shoul- plied, with tears starting to his eyes and running down his lean, bronzed Williams shot and killed the bird cheeks: "She broke her leg two days that was fighting with Wright and out and I had to shoot her. And I tell then the two rushed the remaining you, boys," he added, "I hated to do it

Plethora of Family.

In the absence of their mother, little John's two older sisters were finding it rather difficult to manage their mischievous* four-year-old brother. One day when he had especially tried their patience they reported the matter to their father just as they were sitting down to dinner. John's father promptly scolded him, and when he had finished, one sister, thinking that the culprit had not been sufficiently impressed, gave her ideas on the subject, and when she had concluded the other sister added her opinion. All this time John had made no remarks, but had calmly continued to drink his milk, only gazing attentively across the ice during the Revolution, a surveyor top of his mug at ach speaker in turn. When at last they were silent he set sleave in Treston. In 1786 he com- down his mug and leaned back wearily menced work on his first steamboat, in his chair. "Oh, gee," he observed after experimenting with a skiff pro- dejectedly, "I wisht I didn't have so

Hood's Femous Hoax.

The mausing hoax at Abergavenny reminds a correspondent of one or two historic leg-pullings in the same line. One was the great Berners street hoax. engineered by Theodore Hook, and which was so successful that its orignator had to clear out of the country

He sent out from a certain address housands of orders, invitations, etc. all to eventuate at the same place and hour. The result was that at the ime in question the street and the thoroughfares lending to it were choked with traffic, there was a species of riot, and after the "fun" had cleared away the debris made the place look like a battlefield.

An earlier hoax was also perpetrated in London, viz., that on a certain night at a house of entertainment an Italian conjurer-Signor Capitello Jumpedo-would perform certain miraculous feats, winding up by climbing into a quart bottle. A huge crowd assembled, and when they found they had been "had" they set to work wrecking the place .- Cardiff Western

Hermit Had Large Fortune.

A hermit in Cumberland, England, has just passed away leaving real and personal estate to the value of \$650,-000. For 30 years he was never seen outside his grounds. He had a strong aversion to women, especially the modern-dressed lady. At the mention of the word, "politics," he invariably lost his temper. A capital trait in the management of his estate was paying all accounts in gold or silver. He never used checks.

I will stand at my barn in Hedley the Hicks Jack. He is Black Spanish and Mammoth, of the very best strain of jacks and has proven himself to be a fine jack, having a number of colts around Hedley to show. He is five years old. \$10 to insure colt. Best of care will be taken to prevent accidents, but will not be responsible if any should occur.

A. N. WOOD

WONDERFUL TONIC IS SMILE

Does Wonders in Smoothing Out the Rough Places That Are Met on Life's Journey.

A smile is the bright green carpet of grass that covers the brown earth-the first sign that winter is over, the Telephone News says.

A smile is the rippling softly tinted loom that covers the erstwhile bare, lack limbs of the fruit trees.

A smile is the light, feathery sheen of green that bursts from the brown buds of bush, plant and tree with the first warm rays of the springtime sun. Like it? Well, here's some more!

A smile is the song of a meadow lark to its mate as together they build their

A smile is the bright warm sunlight after the gentle partering shower; it changes the very face of nature, transporting the gloom into the joyousness of a wonderful day.

So nature smiles while heavy hearts If nature's smile has such a potency,

what may we not expect from a smiling human countenance or the human "voice with the smile?"

There's a "Miss Benevolence" at the head of the "Complaint Bureau" of a large institution, so vouchsafes a contemporary who is all but stone deaf! Important points of the bitter and often unreasonable arguments of redfaced, explosive complainants are handed to her on memoranda by a clerk who stands in back and listens. But "Miss Benevolence," all unaware of the stormy words hurled at her, smiles and smiles and smiles. And then smiles some more, with never a smirk, 'til the storm of unreason-and, you know, it's apt as not to be unreason-is over.

And the storm always does pass by, for she never loses that genial composure, but smiles and returns smileful, soft spoken words for wrathful and bitter invective.

Don't think that a mouth with upturned corners denotes weakness or that there's such a thing as being too proud too grin; for you can fight the good fight better when you smile. There was a time when grim visaged, deep chested men once roamed the each, whose mighty roar set whose cities trembling in their path. But, bless your heart, they have gone the way of all bugbears of the past! The "stuffed club" of benevolence and good humor does most of the winning these

STRIVE TO BE IN HARMONY

No One Has a Right to Communicate His "Out-of-Solts" Feeling to Those About Him.

"Harmony is what is needed in this world. When any of my machines are out of harmony, they put me out of nony: I am out of harmony with se with whom I come in contact, and they consequently put others out of harmony, and that is the way it spreads. When one is out of harmony with one's self, he is out of harmony with God."

These are the statements of one of the greatest peacemakers of the day. His ideas are well founded.

When you arise in the morning and are out of harmony with yourself, you are bound to communicate the effect to all the members of your family.

By so doing you are changing what might have been a bright day to one of gloom to those for whom you should strive to make happiness.

A wife irritated by her husband is likely to be cross to the children, and then they go out and fight with their

Don't let yourself be "out of sorts." It is bad for you; it is bad for your family; it is bad for your neighbors.

Shapes of Heads.

In the New Work Medical Record Dr. David I. Macht of Baltimore, noting various malformations of the head that are met with by the modern cliniclan, speaks of three that are enumerated in the Talmud which disqualified one from ministering as a priest. These are named as the "kilon," the "lafton" and the "macbon." The condition of kilon is described as that of a person having a peculiarly shaped head, pointed at the top and broad at the bottom. The lafton was a head shaped exactly the opposite of the kilon. To use the expression of the Talmud, he had a head like a "lefes," that is a pumpkin (or gourd). The expression "maqbon" was derived from the word hammer, and the Talmud described this hammerhead as one with a projecting forehead and occiput. Every student of the Bible is aware of the fact that the Hebrew priest was required to be "without bodily defect or blemish" in order to be eligible to service in the temple, a provision set forth in the twenty-first chapter of Leviticus.

Motor Boat on Long Voyage. The City of Portland, the largest motor boat ever built in the United States, has recently started on her first long trip. She left Columbia river for Australia last month, carrying a cargo of 2,250,000 feet of lumber. This boat is 290 feet long and 44 feet across. She is equipped with two Diesel engines of 320 horse power each They are operated by oil fuel and for her long voyage the vessel carried 1, 500 barrels of oil.

MR. BILLTOPS' INSOMNIA CURE

mething Really Worth Consideration in Idea Which He Freely Gives to the World.

"Why not try reading to sufferers from insomnia to put them to sleep?" said Mr. Billtops. "Mrs. Billtops' eyes have been troubling her lately and I have been reading the paper to her.

"She is much interested in the current news, but under my reading of it she invariably goes to sleep. When, after reading something particularly stirring, I look up at the end of a paragraph to say, 'Well, what do you think of that?' I find Mrs. Billtops fast

"'Here!' I say to her, very gently, but really just a bit chagrined. 'You didn't hear a line of that.'

"'Yes, I did,' she says, anxious to save my feelings, 'I heard all but the last few lines.'

"So then, to make sure, I read the whole paragraph over; only at the end to find her fast asleep again. In this, way I have read the same paragraph. four or five times; but always with the

"It is this experience that prompts me to suggest that perhaps the most efficacious of all methods for putting to sleep sufferers from insomnia would be to read to them. It might be objected to this method that while by it the insomnia sufferer would be put to sleep the reader would be kept awake, the net gain thus being negligible; but

I am prepared to meet that objection. "I would simply have the reading matter placed on phonograph disks to be used on a phonograph electrically connected and equipped with a repeating device, Here, I think, you have the true solution of the insomnia prob-

RICHES FOUND IN ODD WAYS

Experiences of Gold Seekers Make Pages of Romance Read Like Very Ordinary Matter.

If every man who washed his own pants discovered a gold mine there would be a slump in washerwomen. But that is how the largest nugget ever found in California was turned

It was a young Indian who was washing his clothes in a certain stream when this big lump of fortune came his way. Who will say now that virtue-cleanliness, for choice-does not bring its own reward?

The California Eidorado, to which all the world rushed with one accord, was first spotted by a man who went out early one morning to dig onions with a sheath knife, and found gold adhering to the blade,

Talking of sheath knives, they were the favorite means of flicking out gold in the old Bendigo days. The digrers used these knives for many things, and wore them in their belts, They used to dig in their "claims," flicking out bits of gold with the

Imagine taking 32 pounds' weight of gold out of a hole in the earth before breakfast! Yet such an experience

was common enough. And a gold mine in New Zealand was discovered by a man who picked up a stone to throw at a wood pigeon!

Modern Parenthood.

Being a parent used to be one of the most simple, natural and inevitable developments in the world. People used to grow up, marry, and raise families -they still do back in the countryand society was satisfied if parents could clothe, feed and exercise a general supervision over their offspring. But nowadays one has no business to be married and have children unless, sleeping and waking, one is conscious of the responsibility. Competent modern parents must supervise the feeding, housing and playing of their children on terms that, if applied a generation ago, would have brought the reproduction of the human race to a dead standstill. And now, responsive to the same forces, competent modern parents must supervise schooling. The schoolmaster is no longer to pursue his own sweet way. Parents are going to inspect him, as they inspect every other factor in the child's life. Modern parenthood has thus become an exacting full-time vocation-that is, persons who enter the profession have no time for other occupations, except the suffrage, and they cut themselves off from all other forms of remunerative and enjoyable activity.-Abraham Flexner in the Atlantic.

Marshes in Mesopotamia.

The marshes of Mesopotamia were famous in the time of Alexander the Great. One of the last acts of his life. within a few weeks of his death, was a voyage down the Euphrates to the great dike of Pallakopen, about 90 miles below Babylon. This sluice had been constructed by the ancient Assyrian kings to let off the water of the river when it became excessive, into the marshes. It was reported not to be working well, and Alexander proposed to construct another sluice lower down. He sailed on into the marshes steering his vessel himself. with his diadem on his head, to explore them and the tombs of the kings, and so extensive were the lakes and swamps that Alexander's fleet lost its way among them.

BEAUTY OF ONE STORY BUNGALOW

Allows Diversified Arrangement of Rooms Without Causing Worry to Architect.

In This Type of Structure Any Pet Idea Can Be Carried Out-Plan Shown Offers Valuable Suggestions for an Ideal Abode.

By WILLIAM A. RADFORD.

Mr. William A. Radford will answer COST on all subjects pertaining to the subject of building, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only enclose two-cent stamp for reply.

Almost everyone who plans to build with the different members of the familv. The room arrangement is nearly considered as the primary restriction upon the architect's free hand in drawing up the design. Unconsciously, perhaps, the prospective home builder often places the architect in a difficult position because of this fact.

Because of his training, the architect alone, but he sees various arrangements of partitions, one above the other so that the floor and partition loads will be carried down to the foundaplumbing in the most desirable interior walls, and places the rooms, in which this plumbing terminates, where they will be most convenient; he sees the arrangement of floor joists heavy objects, such as the bathroom, not be excessive, causing heavy ex- is provided, so that some carefully

idea in a house that is designed so that there is considerable space wasted. In such a house the coziness is sacrificed for some other effect that is wanted. It is possible to get many other effects in the house, such as grandeur, elegance, etc., but this does not impress the average person much

in the design of a home. The little bungalow shown here has that homelike, cozy appearance that typifies the average person's idea of a real home. All the structural features of the bungalow combine to give this impression. The roof is very low and is made with a flat pitch. The eaves BUILDER MAY HAVE OWN WAY have a wide overhang, which is one of the most inviting features of a bungalow. The wide eaves and the low pitch of the roof have another effect, also, in bungalow construction.

The bungalow at its best is built very close to the ground. In cold climates such a result cannot be obtained because of the necessity of having a basement that is adequate to hold a heating plant. The same low-built effect is obtained by building the bungalow with wide eaves and with a flat pitched roof.

This bungalow is built far enough above the ground so that a basement can be provided with the necessary windows and without too much excavation. The porch also aids materially in getting this same effect of being close to the ground. It is very broad a house has an arrangement of rooms and is built under a separate gable formed in mind as the result of a from the house. The broad, flat roof great deal of thought and discussion and the heavy porch pillars give it a cozy, inviting appearance.

The floor plan calls for five rooms that are arranged in a convenient style. On one side of the house is the living room, dining room and kitchen, and on the other is the bathroom and

two bedrooms. The main entrance to the house is through a door at one corner of the does not see the room arrangement living room. This room is of good size, being 15 by 13 feet. A big fireplace occupies almost one side of the room. It is almost necessary to have a big fireplace in a bungalow, as no tions; he sees the installation of house of this type would seem to be complete without one. It is generally placed in the living room, though it may be in the dining room or some time in a small den built off the living room. On either side of the fireplace in rooms which ordinarily contain in this design is a narrow bookcase with a window over each one. There living room and kitchen, and shifts is also a wide window facing out onto the walls so that the joist spans will the front porch. Plenty of wall space

With the Fingers! Says Corns Lift Out Without Any Pain

Sore corns, hard corns, soft corns or any kind of a corn can shortly be lifted right out with the fingers if you will apply on the corn a few drops of freezone, says a Cincinnati authority.

At little cost one can get a small bottle of freezone at any drug store, which will positively rid one's feet of every corn or callus without pain or soreness or the danger of infection.

This new drug is an ether compound and dries the moment it is applied and does not inflame or even irritate the surrounding skin. Just think! You can lift off your corns and calluses now without a bit of pain or soreness. If your druggist hasn't freezone he can easily get a small bottle for you from his wholesale drug house .- adv.

IS BUZZARD A MENACE?

For Nearly Three Centuries Work of Bird Has Been Appreciated at Its Full Value in South-Persecution Is Begun.

(By W. L. M'ATEE.)

Turkey buzzards are familiar features of Southern landscapes. Their wonderful soaring flight has been a subject of study by a multitude of observers, and the buzzard is not only the model but also the inspiration of the American-invented airplane.

All vultures specialize in feeding on carrion. While under natural conditions the number of dead animals vailable for them is somewhat limited, yet when the human population is considerable and sanitary conditions not over good, there is much work for buzzards, and they fill an important place. For nearly three centuries their work has been appreciated at its full value in the South, and these birds have been scrupulously protected.

The turkey buzzard now is threatened with persecution in the land where heretofore it has received the relation to anthrax has been investi- tion it has been altogether too common

and certain wild animals. cate that buzzards have strong diges- der any system of direct marketing of tive powers. The spores of anthrax, crops we lose sight of the possibility or carbon, a virulent stock disease, of a better price if fed to live stock on have been shown by two independent the farm, the value of the utilization of

Obviously, it is unfair to attempt to place the blame for general dissemination of stock diseases on the buzzard. Considering the multitude of ways in which these diseases may be spread, it cannot be doubted that stock diseases would be as widely distributed as now if turkey buzzards were eliminated, as has been proposed. What amounts to proof of this is the fact that hog cholera at times is virulent and seriously destructive in regions where there are few or no turkey buzzards, as in certain northern states and Canadian provinces.

Attacks in the South by buzzards upon living farm animals indicate that there are too many buzzards there for the best economic interests. In the North, where buzzards are fewer, such attacks are believed never to occur. Reduction in the number of buzzards may be desirable, especially if accompanied by or resulting from a proper system of carrion disposal, but there is a wide gulf both in meaning and desirability between reduction in numbers and extermination.

Nan of Music Mountain

By FRANK H. SPEARMAN

(Copyright by Charles Scribner's Sons)

THE MORGAN GAP GANG STARTS TROUBLE AND DE SPAIN TAKES IMMEDIATE ACTION

The region around Sleepy Cat, a railroad division town in the Rocky mountain mine country, is infested with stage-coach robbers, cattle rustlers and gunmen. The worst of these belong to the Morgan gang, whose hang-out is in Morgan Gap, a fertile valley about 20 miles from Sleepy Cat and near Calabasas, a point where the horses are changed on the stage line from the Thief River mines to the railroad. Jeffries, superintendent of the Mountain division, decides to break up the depredations of the bad men and appoints Henry de Spain general manager of the stage line. De Spain goes to Calabasas with John Lefevre as his assistant. Things begin to happen.

CHAPTER III.

The Spanish Sinks.

In two extended groups, separated by a narrow but well-defined break, a magnificent rampart, named by Spaniards the .Superstition mountains, stretches beyond the horizon to the south, along the vast depression known as the Spanish sinks. The break on the eastern side of the chain comes about twenty miles southwest of Sleepy Cat, and is marked on the north by the most striking, and in some respects most majestic peak in the range-Music mountain; the break itself has taken the name of its earliest white settlers, and is called Morgan's gap. No railroad has ever yet penetrated this southern country, despite the fact that rich mines have been opened along these mountains, and are still being opened; but it lies today in much of the condition of primitive savconventionally accepted, that obtained shoot high." when the first rush was made for the

Sassoon, not caring to brave Purgatoire creek makes its way out of De Spain's anger in town, went tem- the gap. porarily into hiding. Elpaso, in the end, justified his old reputation by making a recovery-haltingly, it is true, and with perilous intervals of sinking, but a recovery.

It was while he still lay in the hospital and hope was very low that De Spain and Lefever rode, one hot morning, into Calabasas and were told by McAlpin that Sassoon had been seen within five minutes at the inn. To Lefever the news was like a bubbling spring to a thirsty man. His face beamed, he tightened his belt, shook out his gun, and looked with benevolent interest on De Spain, who stood pondering. "If you will stay right here, Henry," he averred convincingly, "I

The chief stage-guard, Bob Scott, the Indian, was in the barn. He smiled

"You'd better let us go along and As the horses of the two men see you do it," suggested De Spain, emerged from the canyon they saw a who with the business in hand grew

tone and deliberate manner of the indian, "if he can find him."

Lefever rode down to the inn without seeing a living thing anywhere about it. When he dismounted in front he thought he heard sounds within the barroom, but, pushing open the door and looking circumspectly into the room before entering, he was surprised to find it empty. He noticed, however, that the sash of the low window on his left, which looked into the patio, was open, and two heelmarks in he hard clay suggested that a man might have jumped through. Running out of the front door, he sprang into his saddle and rode to where he could signal De Spain and Scott to come up.

He told his story as they joined him, and the three returned to the inn. A better tracker than either of his companions, Scott after a minute confirmed their belief that Sassoon must have escaped by the window. He thep took the two men out to where some one, within a few minutes, had mounted a horse and galloped off.

"But where has he gone?" demanded Lefever, pointing with his hand. "There is the road both ways for three miles." Scott nodded toward the snow-capped peak of Music mountain. "Over to Morgan's, most likely, He knows no one would follow him into the gap."

"After him!" cried Lefever hotly. De Spain looked inquiringly at the guard. Scott shook his head. "That would be all right, but there's two other Calabasas men in the gap this afternoon it wouldn't be nice to mix with-Deaf Sandusky and Harvey Logan."

"We won't mix with them," suggested De Spain.

"If we tackle Sassoon, they'll mix Spain, managing with his knee to keep with us," explained Scott. He reflect-

GIVE COW NUTRITIOUS FEEDS

Pennsylvania Experiment Station Rec ommends Decrease in Silage in Drying-Off Process.

For a considerable period before the dairy cow is due to freshen it is best to feed highly nutritious feeds. About 60 days before the time for parturition the cow should be dried off. It is necessary that this be done care fully, as old milk left in the udder may lead to garget or other ills:

For the drying-off process the Pennsylvania experiment station recommends decreasing the silage to about 20 pounds and the grain to four pounds daily. No change is necessary in the amount of hay fed. After the cow is dry the grain ration is resumed and the amount of grain increased gradually until the week just previous to freshening.

The grain ration ought to be laxative in character, highly nutritious and palatable. During the last week the cow should be placed in a box stall and her grain lessened. Equal parts of wheat bran and ground oats or chop with alfalfa hay and mangels is recommended as a good ration to feed at this time.

After parturition the cow should not be milked until the second day, except by the calf, unless, as is the practice of some dairymen, the calf is removed at once. For several days the cow should be allowed only tepid water. For feed, good clover hay, mangels and bran and oats are probably best until her system becomes normal again. By the third day the cow may be returned to her stall.

KEEP DAIRY PRODUCTS COLD

pecial Precautions Should Be Taken to Cool Milk After Being Drawn and Then Kept So.

Milk and cream are perishable products and every possible precaution should be taken at the farm and in the home to keep these products wholecome. In the fall with the cooler weather, there exists an opinion that ice or other methods of cooling milk and cream is unnecessary to have these products remain sweet in cold weather, says Prof. V. R. Jones of the South Dakota department of dairy husbandry. This is a false assumption. Special precautions to see that these dairy products are cooled immediately after drawn and kept cold until delivery are important.

Milk and cream will contain germs or (lactic acid) bacteria no matter how careful we are in its production. The bacteria that cause milk to sour multiply very rapidly at moderately high temperatures (70-80 degrees F.) If the milk of cream is cooled to 50 degrees F. or less, the growth of these germs is held in check and these food products remain sweet for a longer

period. If the dairy farmer does his duty in properly cooling milk and cream at the farm, either with ice or cold running water, and the same precautions are taken in the home, there will be less trouble with sour milk and cream.

REMOVE CREAM FROM BOTTLE

Simple Utensil With Which Cream May Be Taken From Milk Bottle Without Mixing Milk.

A utensil for removing cream from a milk bottle consists of a cylinder about half the length of a quart bottle and of a diameter slightly less than that of the mouth of the ordinary milk container. The device is held in one hand, the index finger passing through a small looped handle at the upper end.

Cream Separator.

upper end of the cylinder is a small tube. A screen extends across the cylinder's lower end. After inserting the separator into the bottle to the depth of the cream, the thumb is placed over the end of the tube. The sep arator may now be lifted from the bottle filled with cream, the screen and suction combining to keep the fluid from flowing downward .- Popular Mechanics Magazine.

CLEANLINESS OF CALF PENS

Use Abundance of Nice Straw and Dig Out All Manure Frequently-Calves Are Frisky.

The calf pen must be kept clean. Use lots of nice straw, not putting it upon a lot of fermented filth, but dig out all manure very frequently and add fresh straw almost daily. Calves are so frisky that they tramp the straw into the manure to beat every-

Separator milk, tender clover or alfalfa hay, bran, oll meal, silage, shelled corn, such feeds are the stuff good calves are made of.
