Donkey Ball Game

If you have ever seen a donkey basketball game you know how much fun it is. And if you have never seen one, then here is your opportunity to have what will probably be the funniest evening of your life.

No kidding! When members of the high school seniors challenge Mack Bush, Billy White, and other teachers and school board members, then you are in for the time of your life. Because this imposing array of donkey talent composed of such stars of the court as Ben Casey, Liberace, Elvis, Mae West, Twister, Miss Kitty, Olive Oyl, Zsa Zsa, Molly Bee and Daisy Mae, do not always cooperate with the riders in their efforts to score points, or to let them stay aboard long enough to qualify as a player. All in all you'll get a tremendous kick from the antics of these far from dumb animals.

The half time show will feature a race between a boy and a girl, and a coverall race that is a scream, when two boys and two

men, each two in one suit of coveralls, race the length of the court.

Get set for this big fun event, buy your tickets early from a member of the basketball teams, who are sponsoring the game to help buy basketball jackets. If they don't ask you, ask them. A. S. C. News

We are getting well under way in the 1963 ACP Program. 180 applications have been approved already for 1963. Approximately \$31,740.47 was involved in these practices. Many have been cancelled due to weather conditions and some did not qualify leaving approximately \$26,000.00 currently being earned by Donley County farmers.

Those farmers who have earned payments this year in G Community are:

- Roy Jewell, cotton burs
- Herlie Moreman, grass seeding
- Johnny Hoggatt, deep plowing
- Finis L. Hill, deep plowing
- Alfred B. Spalding, deep plowing

Why not come in and let us talk with you about how you may earn cost share assistance on your farm?

Cotton Pre-Measurement

Producers may, by paying for the service, have their cotton pre-measured and staked provided application for the service is filed in the County ASCS Office before March 29, 1963.

Feed Grain Signup

The 1963 feed grain signup is well under way in the county office. Several producers who did not clearly understand the program, have been to the office and we have figured the different ways that the program could be applied to their individual farm. Consequently, they now have a clearer meaning of the program.

If there is any phase of the feed grain program about which you have any questions, why not come to the office and let us try to help you?

Remember that the signup ends March 22.

Farm Facts

The history of barley is almost as old as that of agriculture. It is believed to have originated in Asia and to have been grown in Egypt nearly 70 centuries ago. The cereal is mentioned in the Bible and mythology and dates back to 3500 B.C. in Mesopotamia, 3000 B.C. in Europe, and 2000 B.C. in China.

Barley has the shortest growing season of any cereal and because of this can be grown in the cool climate of Norway or in hot, dry Morocco.

Although used primarily for livestock feed in the United States, barley is an important item in the human diet in parts of Africa and Asia.

Since antiquity, barley has been used in the brewing of beer, and today nearly all beer is made from it. More than 85 million bushels are consumed in the U.S. annually for alcohol and alcoholic beverages as compared with about 230 million bushels for livestock feed.

The U.S. leads the world in

Barley is one of the oldest known grains.

barley production, followed by France, Canada, the United Kingdom, West Germany, and Turkey. North Dakota, California, Montana, Minnesota, and Washington are our top barley producing states.

It is called the Center of the Southwest because it is in the very heart of one of the Nation's fastest growing regions.
For many months we have been engaged in an extensive expansion program throughout our service area, enlarging both generating capacity and distribution facilities.
It is a far-sighted, long-range program based on one simple fact. We are convinced that the Center of the Southwest faces **GROWTH UNLIMITED**.
Current conditions confirm the belief. Population is increasing, more businesses are moving in, new industry is coming our way, natural resources are being developed, bank deposits, spendable income and business construction all are on the way up.
That is why we are investing millions to meet the present growth of the Center of the Southwest, and to be prepared for its continued development in the months and years ahead.
