### WHY GROWERS NEED BETTER COTTON YIELDS IN 1971...

**Bolster net income,  
increase payment yield,  
and preserve markets**

- \* Demand for cotton is strong—domestic and foreign.
- \* Failure to meet demand could jeopardize markets and the farmer's investment in land, equipment, and other production resources.
- \* Higher yields spread overhead cost and reduce cost per pound.
- \* Cutting harvesting losses can mean up to 10 per cent more cotton, or \$15 more per acre.
- \* Better yields in 1971 can increase cotton farmers' yield for payment purposes in 1972 and 1973.
- \* If sufficient cotton can be made available to meet demand, the way would be open to greater markets in the future.
- \* Mill use of cotton depends heavily on its availability and price stability.
- \* Strong demand for cotton corduroys, print cloths, denims, and knits has led some mills to shift to all-cotton. Prospects of a low carryover and uncertainty about supply and price could quickly drive these customers back to blends.
- \* When the supply of cotton falls short, prices become non-competitive and mills turn to other fibers.

**For greater profits and markets,  
harvest all you grow.**
