Halloween Spooks Parade

Blake Trainer, son of Mr. and Mrs. Gil Trainer, took the over-all spookiest prize with his great impression of Dr. MOJO, the witch doctor.

Amy Fields [199] and Sarah Patton [131] took prizes in their age group. Amy was judged the funniest and Sarah the spookiest.

Laura Wingreen [Little Red Riding Hood] was judged most original in the pre-school division.

Bronco Fans Charter Bus

A specially chartered bus has been arranged to carry Bronco fans to Crane for this Friday's important district contest.

The Bronco Booster Club bus will leave Sonora at 4 p.m. from the parking lot north of Sonora

High School. Reservations for seats on the 43 passenger, rest room equipped bus, are \$14 per person and payment must be made in advance.

Dr. Charles Browne's office is handling reservations.

Absentee Voting Nil

Absentee voting in the Tuesday, November 8 election was nil according to Mrs. Vivian Crites in the county clerk's office, Monday. Since absentee voting began October 19 no votes have been cast. The election will be held Tuesday at the courthouse

with the polls opening at 8 a.m., and closing at 7 p.m. There are seven proposed amendments on the ballot and voter turnout is expected to be light. Deadline for voting absentee is Friday, November 4.

December 1 Deadline For Family History Entrants

Families who wish their histories entered in the Sutton County History Book should be preparing entries to have them ready for the Sutton County Historical Society before the December 1 deadline.

There is no fee for having family stories in the book.

The story should not be more than 500 words. If the vast majority of the families in the county, both newcomers and pioneers, participate, the space required in the free section of the book will be considerable.

Therefore, a limit of 500 words has been placed on

the story to be included in the free space. If a family feels it is difficult to tell their story in the word limit, they may purchase space at the rate of \$150 for a full page, \$80 for a half page and \$45 for a quarter page.

This will more adequately tell their story and guarantees their material will be included.

Each family is encouraged to submit one to three black and white photographs. At least one picture from each family is planned to be used, and more if the book sales are successful and there is enough extra space.

Band To Compete In UIL Meet

The Sonora Bronco Marching Band will compete in UIL AA marching competition Saturday in Brady.

The Bronco Band will march at 3:30 following

the band from Brady High School.

All AA schools in Region 7 will be in competition from 1:12 - 4:30.

Edwards Wins FB Contest

Gene Edwards correctly picked 13 out of 15 winners in last week's Devil's River News Football Contest to take top honors and the \$25 prize money.

Edwards missed on the

WTSU vs Indiana State and L.A. Rams vs New Orleans Saints...he picked Indiana State and the Rams.

However, there were no other contestants with 13 correct winners.

Comptroller Uncovers \$81 Million In Taxes

State Comptroller Bob Bullock said Monday his auditors compiled one of their best records yet in Fiscal 1977, uncovering an additional \$81 million in taxes owed the state.

That amounts to more than \$191,800 for each of the 420 auditors employed by the Comptroller's Office, Bullock noted. The 1977 fiscal year ended August 31.

"That \$81 million in additional taxes owed the state in tax money that otherwise would have gone uncollected," Bullock said.

He pointed out that for every \$1 it cost Texas taxpayers to fund his office's expanded audit staff, \$10.55 was returned to the state treasury in the form of additional taxes.

"We think that's pretty good return on the investment --- even by Texas standards," the Comptroller said.

Bullock said that more than \$14 million of the \$81 million detected by field audits was assessed firms headquartered in other states, but who do business in Texas.

In the year before

Bullock took office in January 1975, Comptroller's Office auditors turned up only \$18.8 million in additional taxes owed the state.

"We've increased that amount more than fourfold and we believe we can do even better," Bullock said.

He also noted that his 40 enforcement offices across the state collected \$93.2 million during the past fiscal year --- more than double the amount anticipated.

"More than a third of that money was in the form of delinquent taxes --- money we really had to work to collect," he said.

Church Sets Revival

The Rev. Billy Mills of Odessa will be in charge of evangelistic services to be held at the Sonora Tabernacle United Pentecostal Church November 6-13.

The church, located at 111 Poplar, invites all to attend the 7:30 services to be held Sunday thru Sunday.

Tammy Bible, Francis Ryan, Gail Mesa and Deanne Hodges are among the many Girl Scouts that will be selling Girl Scout Cookies beginning Friday. The Cookie drive will continue thru November 20 and deliveries will be made in January. Cookies will sell at \$1.25 per box with five varieties to select from. These include chocolate chip, cheddarette crackers, scot-teas, chocolate and vanilla creme, mint and peanut butter.

Band Boosters Set Meeting

Band Boosters are reminded that a meeting of all boosters will be held Wednesday, November 9 at the band hall.

At that meeting preparations will be made for the Sonora/Ozona game

and there will also be models showing the newly purchased twirler, flag and drum major uniforms.

All band boosters are urged to attend this 8 p.m. meeting.

Ozona Rites Held For Hubert Baker

Funeral services were held Sunday in Ozona for Hubert Weldon Baker, 75. Burial was in Cedar Hill Cemetery.

Mr. Baker died October 27 in Shannon Hospital. He was born August 13, 1902 in Tennyson and had lived in Ozona since 1927 where he operated a grocery store and was a salesman for a wholesale grocery firm. He was also manager of the Ozona Chamber of Commerce for eight years.

Survivors include his wife, Lottie Lee; one daughter, Mrs. A.J. Pakkila; one sister, Mrs. J.E. Butler; two brothers, Clifford Baker and Neal Baker; three grandchildren, three great grandchildren, and a number of nieces and nephews.

Survivors include his wife, Lottie Lee; one daughter, Mrs. A.J. Pakkila; one sister, Mrs. J.E. Butler; two brothers, Clifford Baker and Neal Baker; three grandchildren, three great grandchildren, and a number of nieces and nephews.

Felipe Alvarez Plans Career In Music

Felipe Alvarez who has been residing in Portland, Oregon, is now back in Sonora where he is working for City Concrete.

Alvarez, a graduate of Fay Elementary, received his GED in Del Rio and attended school in Guadalupe, Mexico. He plans to attend Angelo State and work towards a degree in music.

He is the son of Mrs. Lucy Fay of Portland.

Accident Victim Not Seriously Injured

Everett Andrew Duncan, Jr., who lists his residence in Sonora, escaped serious injury Sunday when the 1971 Chevrolet he was driving went out of control in the 200 block of Crockett Street and travelled more than 100 feet before coming to a stop.

Duncan was traveling west on Crockett on the inside lane of traffic when he failed to make the curve in the road before entering a bridge. His car

left the roadway striking a sign post and reflector and traveled 90 feet down an embankment, rolled over twice and came to rest on its top in the draw bed some 120 feet from the roadway.

He was taken to Hudspeth Hospital and later taken to a San Angelo hospital with shoulder injuries. Duncan was charged with failure to control speed and driving while intoxicated.

Gold Star Recipients Honored

Youngsters, Marshall Doran and Paula Friess, travelled to Uvalde last Saturday to receive the 1977 Gold Star award for their outstanding work in 4-H. Thirty-two other 4-H Club members from the area received awards during the special banquet ceremonies. The annual awards presentation is sponsored in Southwest Texas by Central Power and Light Co. Gold Star is the highest county 4-H award a boy or girl can receive in Texas. Also attending from Sonora were Mr. and Mrs. Turney Friess, Mr. and Mrs. Bill Doran, and County Extension Agent, Sarah Mahon.

Support the Broncos Friday in Crane

Finalist in the Girl Scout Halloween Party costume contest were (left to right) Shawna McLaughlin, Christi McLaughlin, Precia Miller, Tonja Moore, Nelda Castaneda and Gina McMillan.

Police Reports

October 24
2:50 p.m., A minor accident occurred at the corner of Crockett and Main.

8:17 p.m., A resident on Orient Street reported a horse loose in her yard. Owner was located and advised to pen horse up.

8:48 p.m., A local cafe reported a subject refusing to leave premises. Two units were dispatched and subjects were gone on arrival of officers.

October 25
4 p.m., A secretary at the high school reported a minor accident behind school. No injuries were reported.

9:16 p.m., A local cafe reported a fight in progress. Settled on arrival of officers.

12:01 a.m., An officer found the door at the high school open and called Dr. Otte to secure it.

October 26
9:38 p.m., Officer discovered door open at high school. Dr. Otte notified.

1:08 a.m., A mobile home park resident reported subjects attempting to fill a subscription.

October 27
10:23 p.m., A local lounge owner reported subject refused to leave premises. Gone on arrival of officers.

October 28
3:38 p.m., A minor accident resulted in charges of reckless driving and failure to display a driver's license against Carl Sterling Davenport of Sonora. The 1969 Mustang driven by Davenport began swerving after he turned onto Del Rio Street from an alleyway, losing control and striking a fence on the right side of the road.

11:01 p.m., A minor accident occurred at the corner of Poplar and Glasscock Streets.

October 29
12:27 a.m., A domestic problem was reported at a local mobile home park. Ambulance was summoned and one female subject was taken to Schleicher County Hospital for treatment of head lacerations.

2:17 p.m., An accident occurred at 702 SE Crockett when a truck belonging to J&L Farms of San Angelo struck a parked vehicle belonging to Mrs. Elsie Schwiening. Defective parking brakes were stated to have caused the accident.

10:29 p.m., A fight in progress and traffic blocked on Central Avenue in Sinoloa was reported and two units were dispatched to the scene.

11:16 p.m., A domestic problem was settled on arrival of police.

11:45 p.m., A local woman reported the unauthorized use of a vehicle. It was located at a local bar.

3:30 a.m., A resident on Wardlaw Street reported a white car containing three females breaking back windshield out of car parked at her address.

Bronco assistant coach Roland Pfeiffer (right) encourages his defensive squad during the final minutes of last Friday's contest with Kermit. Defensive stand-out Bobby Cook (79) gives his coach undivided attention.

Cashmere... Popular Fiber

Probably the softest and most luxurious of all animal fibers is cashmere, the underhair of a goat that lives principally in the high mountains of Mongolia and China. It also comes from herds in Iran, India, Afghanistan and Turkey.

For protection against the extreme cold of high altitude the cashmere goat grows soft hair beneath the longer outer coat. Attempts have been made to rear these goats somewhere else in the world, but the soft, downy undercoat only grows in the cold, high mountain environments.

The okapi, a relative of the giraffe, looks almost the same today as it did 30 million years ago.

Reflections

THE REV. JIM MILES
GOOD SHEPHERD
PRESBYTERIAN

We remember the words of Christ "Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind. This is the first and great commandment. And the second is like unto it, Thou shalt love thy neighbor as thyself. On these two commandments hang all the law and the prophets."

Much of the ministry of Jesus seemed to be clarification and translation. His teachings, especially his parable, sought to make clear the true meaning of the law. He sought not to destroy it, but to fulfill it. The religious leaders of his day were superb legalists, and for them life was a series of do's and dont's, with a great emphasis on the dont's. This enabled the priest and the Levite to "pass by on the other side" when they encountered the wounded man. The Samaritan in the story, however, not bound to cold legalism, was free to love, to have compassion, and to translate that compassion into aid. He was an example of the Gospel of Jesus Christ.

Unfortunately, all too often, Christians of today fail to hear the Gospel, and like the priest and the Levite of twenty centuries ago march forward in blindness, ignoring the pain, the hurt, and the suffering they encounter along life's way.

We are to go out into the world, to find where Christ is at work, and to join him there, not out of a

Band Boosters News

The Sonora Junior Varsity will host Ozona at 7:30 p.m., Thursday. Parents to bring two dozen sandwiches each are Ward, Tedford, Creek, Brandon, Nations, Tittle and Green. Those parents to supply two dozen cupcakes each are A. Sanchez, E. Carroll, Simpler and Hollmig.

A macadam road is so called because the method was invented by John Louson McAdam.

*** INFLATION-FIGHTING FOOD IDEAS ***

Rice And Chicken

A TASTY TWOSOME of chicken and rice is as tempting to the budget as it is to the taste buds.

There are almost as many reasons to enjoy a rice and chicken combination as there are ways to serve it.

Both foods are easy to digest and neither is hard on your food budget.

Chicken is low in saturated fat, high in unsaturates and mild in flavor, which means it will combine well with all sorts of vegetables, spices and seasonings.

Rice is not only easy to eat and low in fat, it's a good source of B complex vitamins, calcium and iron.

Together, in dishes such as Baked Chicken with Rice and Corn Dressing, they make a tasty meal that's elegant enough for company, economical enough for the family and enjoyable for all.

BAKED CHICKEN WITH RICE AND CORN DRESSING

- 1 broiler/fryer (2-1/2 to 3 pounds), quartered
- 2 tablespoons butter or margarine
- 2 teaspoons lemon juice
- Salt and pepper
- 1/4 pound bulk pork sausage
- 3/4 cup sliced green onions
- 3/4 cup chopped celery
- 3 cups cooked rice, cooked in chicken broth
- 1 can (12 ounces) whole kernel corn, drained

Brush chicken with butter and lemon juice. Season with salt and pepper. Bake, skin side up, at 375 degrees about 30 minutes. Cook sausage, green onions and celery until vegetables are tender. Add rice, corn and salt and pepper to taste. Mix well. Spoon dressing around chicken and continue baking 30 minutes longer. Makes 4 servings.

Paula Monroe To Wed

The engagement and approaching marriage of Miss Paula Monroe to Mr. Bill Doran has been announced by her parents, Mr. and Mrs. Frank Moore.

Parents of the prospective bridegroom are Mrs. Alline Wester and the late Gratton Doran.

The couple plans a December 10 wedding at the local First Baptist Church.

Miss Monroe is a 1977 graduate of Sonora High School. She is employed by Texas State Optical in Kerrville.

Her fiance is a graduate

of Kerrville High School and works for ADCO Water Wells in Sonora.

Duplicate Bridge Winners

Lottie Puckett and Fred Adkins were first place winners in Duplicate Bridge play held in Eldorado last week. Winning second were Ina Lambert and Clay Porter.

Tying for third place were the teams of Bobby Sanders, Flora Hubble; Billie Porter, Tom Peaslee; and Betty Kay Lacy and Candy Richards.

Duplicate bridge play will be held again this Thursday night at 7 p.m.

New Arrival

Mr. and Mrs. Trayce McKnight are parents of a daughter, Kelly Gail, born October 24 in a San Angelo hospital. She weighed 7 pounds.

Grandparents are Mr. and Mrs. Troy McKnight of Winters and Mr. and Mrs. Lester Tinney of Winters.

Langdon Announces Plans To Retire From RRC

Judge Jim C. Langdon, member of the Texas Railroad Commission for the past 14 years, announced today that he would resign his post, halfway through his third elected term, as of December 31, 1977.

His plans have been communicated to Governor Dolph Briscoe, Langdon said.

Commissioner Langdon said that the reason for his resignation at this time was an opportunity to become associated with one of the nation's most prestigious law firms, Akin, Gump, Hauer and Feld of Dallas and Washington.

"On December 31 I will have completed 32 years of public service—half of my lifetime—and I am still young and vigorous enough to remain active in some area as a lawyer and administrator," said Langdon in explaining his decision to resign from the Commission.

"For some time I have been interested in returning to the practice of law. I have a son in law practice and my daughter soon will be graduating

from law school and I have a father's natural desire that we might someday practice law together."

Langdon's elder son, Jim C. Langdon, Jr., is a member of the law firm's Washington office.

Richard A. Gump, a founder-member of the law firm, and Robert S. Strauss, another founder and a former member, were classmates of Langdon at the University of Texas Law School and fellow-agents in the Federal Bureau of Investigation during the early 1940's.

Strauss, now President Carter's foreign trade ambassador, was chairman of the Democratic National Committee from 1972 to 1974.

Langdon, who is the dean of the present Commission, has been widely recognized as one of the nation's staunchest advocates and spokesmen for national policies that contain incentives adequate to insure domestic energy sources to meet the nation's requirements, and rely on the marketplace as the proper arbiter of energy prices and distribution.

By correspondence and appearance he has pressed these beliefs before four presidential administrations beginning with Lyndon B. Johnson and retired Senator Philip Hart of Michigan when he headed the Senate Antitrust Subcommittee.

Langdon long has advocated "greater teamwork between government and business in coping with the country's energy and other crises."

"This nation grew to greatness through and economic and political system which depended greatly upon teamwork between government and private industry," he emphasized in testimony before the U.S. Senate Commerce Committee in 1974.

"I have always believed and said that it is absolutely necessary for all states, both producing and non-producing, to fully cooperate with each other if we are to ever emerge from the energy crisis that is daily growing more serious," he said. "I say that again now."

Long before the OPEC embargo of 1973, Judge Langdon warned of im-

pending public dangers present to this nation in the field of energy. He pleaded for the establishment of an intelligent energy policy before it was too late.

Langdon said today the "chore has been difficult but I believe we have finally alerted the American public to the energy crisis confronting us."

An admirer of the late General Ernest O. Thompson, almost legendary member of the Railroad Commission, with whom he served for a short time, Langdon adopted his policies and his philosophy as a state regulator.

It was the same policy followed by former commissioners, Ben Ramsey and Byron Tunnell, as well as his present colleagues.

That philosophy was largely to observe the rule of reason in regulation, with the public interest uppermost in mind in all decisions.

"It has been necessary to create favorable political and economic climates for those regulated by the Commission while protecting the public interest," he said.

"In our biggest job, oil and gas regulation, our first objective has always been to prevent avoidable waste and to promote conservation of what General Thompson called 'God's reservoirs of petroleum.'"

He added, "The duty of the Railroad Commission has always been to regulate fairly, within the law, and in the public interest."

In performing that duty, the Commission has been guided by the statutes passed by the legislature and interpreted by the courts."

"It has not been the Commission's role to make the law, but to enforce the law."

"When the Constitution, laws and court decisions allow for discretion on the part of the Commission, that discretion has been exercised, I believe, carefully and fairly under the rule of reason."

"Those have been the three general precepts of my service to my state in the fourteen and a half years of my service on the Commission."

Judge Langdon has been an avowed advocate

of the free market system in this country throughout his political and private careers.

Langdon was appointed to the Commission in 1963 by then Governor John Connally to fill an existing vacancy. He was elected to a full six-year term in 1968 and then was re-elected in 1974.

He resigned as chief justice of the Eighth Court of Civil Appeals in El Paso to accept the appointment.

Previously he had been appointed to the bench of the 114th District Court by Governor Allan Shivers, in 1954, and then to the El Paso Court of Civil Appeals by Governor Price Daniel in 1958.

In December Langdon will have completed more than 32 years in the public service, starting as an undercover agent for the FBI in South America. He obtained a military leave of absence to join the Naval Air Corps in 1943, where he served in both the Atlantic and Pacific theaters of war.

A graduate of the University of Texas law school, he returned to Texas in 1946 and established his own law

business in McCamey. He then served four years as McCamey's city attorney.

Judge Langdon was born in Stephenville in 1914. He lived with his family in Glen Rose and Cleburne before attending John Tarleton College in his hometown and later the University of Texas.

Langdon said he was particularly proud of the Commission's achievements in the field of transportation where that industry in Texas enjoys the healthiest and strongest position in providing efficient and reasonable service to the people of this state.

He noted the massive changes in the Commission's activities and duties since he became a member. These, he said, were in the fields of coal, lignite, uranium, and geothermal energy regulation, as well as greatly expanded duties in the field of natural gas utilities regulations.

One of his most consistent efforts during his tenure has been to create favorable political and economic climates between the regulated industries, the Commission, and the

state.

"This, he said, has been difficult, particularly because of the incessant interference of the federal government. "I have always believed it was in the best public interest to develop rules that would encourage participation in the regulated industries," he said.

"I wish my two colleagues the best and I feel certain they will continue the great policies and traditions of this magnificent Commission," he said.

"The Commission's success as a regulatory agency has largely depended upon its extremely capable and dedicated staff members.

This staff, in my judgment, exceeds that in any other level of government, state or federal, its technological expertise, its loyalty and devotion to public service and to the best interest of our state and nation.

It is with genuine regret that I now announce my coming retirement and departure from this extraordinary staff and warm personal friends," Langdon said.

Texas August Output Above Last Year

Texas oil and gas wells produced 667,069,290 Mcf of gas in August 1977, up 3.09 percent from field runs a year earlier.

Marketed gas production totaled 574,312,345 Mcf and reflected a 3.89 percent increase from the August 1976 volume. Marketed production is the total gas to transmission lines, carbon black and plant fuel and lease use.

Gas exported from Texas in August totaled 237,684,980 Mcf and included some 66,674,944 Mcf of imported gas.

Exports of Texas-produced gas in August

totaled 171,010,036 Mcf and reflected a 9.28 percent decrease from the year-earlier month.

Natural Gas Pipeline Co. of America was the month's largest exporter, moving 66,453,680 Mcf of gas of which 33,442,023 Mcf was Texas-produced gas.

Texas gas production in August 1977 came from 192,247 oil and gas wells.

In July 1977, Texas wells produced 648,728,073 Mcf of gas. Marketed gas production in July totaled 536,925,740 Mcf.

Texas Oil Allowable 3.51 Million Daily

Average calendar day allowable of Texas oil production as of Nov. 1 totals 3,513,026 barrels, the Railroad Commission's Oil and Gas Division has reported.

This legal rate of flow from 179,521 wells on allowable schedules compares with 3,562,102 barrels daily on Oct. 15 when 178,596 wells are listed.

Texas oil allowable in

November 1977 is pegged statewide to a 100 percent market demand factor. Estimated actual production this month is approximately 2,997,000 barrels daily and compares with actual production of 3,083,209 barrels daily in the same month last year.

The Commission lists 8,824 oil fields in the state on Nov. 1.

Political Leadership Blamed

Railroad Commission Chairman Mack Wallace blamed a shortage of responsible political leadership, rather than oil, gas or coal, for America's energy supply dilemma and high energy prices.

"The real crisis we face today is one of credible, responsible political leadership," Wallace maintained in addressing the annual meeting of the Gulf Coast Association of Geological Societies here.

The energy and transportation regulatory official said the nation's energy resources, a national energy plan and environmental concerns must be evaluated in the "light of day, and not the dark of night" that seems to be the approach within the federal establishment.

Wallace took issue with "the pervasive notion" that the country is running out of a domestic supply of energy, noting that just in Texas alone there are some 112 billion tons of coal reserves, equivalent to 300 billion barrels of oil. Also, he cited, Texas possesses 44,000 tons of

uranium oxide reserves by the federal government's own estimates.

Wallace said Texas is doing more than its fair share to provide the nation with the fuel necessary to maintain the country's status in world affairs and its livelihood at home. He attributed Texas' capability to a deregulated oil and gas market within the state "which provides the proper incentives for exploration and production."

Because of the Texas operating climate, 13,884 oil and gas wells were drilled in 1976 against only 8,031 in 1973, the energy official cited.

"But Texas is only one state in fifty, and other states, especially those in the Northeast, must realize that as Texans we cannot allow our resources to be usurped when other states refuse to allow their shorelines to produce what Texas has produced for this country for decades," Wallace insisted.

The Texas official, observing that Energy Czar James Schlesinger and other high officials in the Carter administration hold similar views on U.S. energy potential, said he was puzzled by the White House energy plan opts to the conservation rather than production as a primary goal.

"Important as conservation is as a goal, it is insufficient to solve our national energy crisis standing alone," said Wallace.

"I am compelled to point out that this country did not conserve itself to greatness, it produced itself to greatness."

Wallace likened the Carter energy plan as a solution to "critical energy problems" to a round of golf in the dark and maintained that the program before the Congress relies "heavily" and "unrealistically" on coal.

The central feature of the President's energy plan calls for a significant reduction in energy consumption and an 84 percent rise in coal production to cope with a predicted 25 percent increase in energy demand by 1985, he said.

There is an additional reason the national energy plan yields great cause for concern," Wallace continued.

"The United States today is 48 percent dependent upon foreign sources of crude. This startling dependence threatens the very core of our national security."

The Carter energy plan recognizes the need for U.S. energy independence, he said, "but it fails to

acknowledge that independence cannot be achieved without an energy production orientation, the key to which is incentive."

Wallace insisted that a national energy plan that will come to grips with today's energy problems must:

- Deregulate natural gas prices for newly discovered natural gas.
- Manage the federal bureaucracy so that the market place can operate fairly and freely.
- Demonstrate a thorough understanding of resource capability and resource interaction.

The Texas official emphasized that an earth-environment balance must be attained.

However, he cautioned, "environmental issues of relatively little value must

not be permitted to hamper significant growth and burden the taxpayers with large sums of dollars needed to meet their daily requirements."

Wallace found the Carter energy plan insufficient to cure the nation's energy ills.

Therefore, he urged, "pressure must be brought to bear on the administration to redirect its course from conservation rhetoric to the production of oil, coal, and nuclear power before this great nation begins to lose its rightful place in world affairs."

In conclusion, Wallace expressed hope that U.S. political leadership would begin matching the professional dedication of the members of the Gulf Coast Association of Geological Societies.

Coop To File Data

The Railroad Commission last week ruled that CRA, Inc., is a gas utility subject to its jurisdiction and directed the gas gathering-processing co-

operative to file annual reports and to utilize a uniform system of accounts that has been adopted by U.S. utility regulatory agencies.

CRA operates natural

gas processing plants and related gathering pipelines near Quitman, Mertzon and Eldorado. Last April 28, CRA requested exemptions from filing annual reports with the Railroad Commission and from using the National Regulatory Utility Commission's uniform reporting system.

Gas Utilities Division examiner Glen E. Johnson conducted a hearing on the CRA requests on June 7.

At today's weekly conference on gas utilities matters, Johnson recommended the Commission reject the CRA requests.

CRA, in a late file exhibit, indicated that the cost of setting up the uniform system of accounts for its Eldorado gas plant would be \$55,400 and that the annual cost of

maintaining the system would be \$6,200, Johnson advised Chairman Mack Wallace and Commissioners Jim C. Langdon and Jon Newton during the conference.

In his findings of fact, the GUD examiner said CRA:

- Operates gas gathering pipelines which are laid under public roads.
- Delivers gas for sale to a company that engages in distributing natural gas to the public that operates under franchises and contracts with Texas municipalities.
- Owns for compensation in Texas equipment or facilities for transmitting or distributing combustible hydrocarbons natural or synthetic for sale or resale which is not subject to jurisdiction of the Federal Power Commission.

Reported and estimated unreported production of Texas crude oil totaled 92,370,052 barrels in August 1977, the Railroad Commission's Oil and Gas Division reports.

The preliminary figure compares with final compilations of July 1977 production totaling 92,889,447 barrels and August 1976 production of 97,417,659 barrels.

Texas oil production averaged 2,974,598 barrels daily in August 1977, down from 2,996,434 barrels daily in July 1977.

The August allowable totaled 113,594,106 barrels for the month.

Angora Goat Field Day Features Dr. Clarke

A special Angora Goat Field Day is scheduled next Wednesday at the Sonora Research Station, with a wide range of Angora research to be presented.

Dr. Neville Clarke, acting director of the Texas Agricultural Extension Service, will be the master of ceremonies for the program, which starts at 10 a.m.

Registration and coffee opens the day at 9:30 a.m.

Sid Harkins, president of the Mohair Council of America, will open the program.

Dr. Tom Craig, assistant professor at Texas A&M's Dept. of Veterinary Parasitology will present a discussion on coccidiosis and related internal parasite problems.

Methods of developing Angora kids for maximum return is the subject of Rocksprings rancher H.G. Haby and Sonora rancher Armer Earwood.

Charles A. Taylor, Jr., Sonora Research Station research associate, will present findings on supplemental feeding, followed by a barbecue lunch.

Following the lunch break Dr. Fred Bryant, Texas Tech assistant professor in the Dept. of Range and Wildlife Management will discuss range forage consumption of goats, sheep and deer.

Texas Agricultural Extension Service area economist-management Robert Kensing will present

ideas on economics of supplementing Angora goats.

Fred Campbell, Sonora Wool and Mohair Co. manager, and Jack Taylor, Kerrville wool and mohair buyer for Forte, Depee, Sawyer and Company will offer the latest market outlook on Angora goat and mohair.

Discussion and review will close the program with Jack Groff, Texas Agricultural Extension Service sheep and goat specialist, conducting the final session.

Sponsors of the field day are Texas A&M University, Star Sheep and Goat Task Force, Texas Wool and Mohair Warehouse Association, Texas Sheep and Goat Raisers Association and the Mohair Council of America.

39th Texas

Screwworm Case Confirmed

The 39th Texas screwworm case of 1977 was collected October 24 and identified in the U.S. Department of Agriculture (USDA) Screwworm Eradication Program lab Oct. 27. At this time last year the Texas case count was 26,784.

Taken from a horn hooking injury in cattle by owner Lawrence Tamblin, assisted by Robert Bryson, the case was the year's first in El Paso County. The ranch is 28 miles east of El Paso at Clint.

"With two late summer cases reported at Las Cruces, N.M., and two other known cases about the same distance away in Mexico's State of Chihuahua, we've considered El Paso one of Texas' most severely threatened counties," says Dr. M.E. (Cotton) Meadows, Jr.

"The calendar is on our side now," says Meadows, director of the Screwworm Eradication Program. It is operated by USDA's Animal and Plant Health Inspection Service (APHIS).

"Screwworms aren't adapted to cool winter weather. The latest recorded case in El Paso County was identified the week ending Nov. 15, 1975."

To stop the parasite's life cycle, sterile flies produced in the APHIS plant at Mission are released to mate with fertile flies. Females of this species usually mate only once in their lifetimes. If that mating is with a sterile male, eggs they produce won't hatch.

Fred Campbell's

Wool and Mohair Report

At the risk of sounding like a broken record, we must report that the firming trend in wool prices overseas continues. South American and South African prices have firmed slightly in line with Australian floor prices.

In the U.S. the 1977 wool clip is essentially sold. Only 5 million

pounds or so remains in growers hands. The remaining wool is in Sale Lake City; Belle Fourche, South Dakota; and in Minneapolis. Texas has about one million or less pounds unsold.

Inquiries for mohair have slowed somewhat as the pressure is off the market. Prices are still strong but

the urgency that was evident the past few weeks is absent.

Left unsold in Texas just now is about 300,000 pounds of mohair - all types. Our warehouse holds about half of this quantity and we are offering this for sale this coming week.

Mohair Referendum Cancelled

Plans for a 1978 Mohair Referendum seeking an increase in the volunteer deduction rate that mohair growers pay to finance promotion and advertising programs for the fiber has been cancelled.

The Texas Mohair Producers Board, meeting in executive session on Oct. 21 in San Angelo, rescinded action taken by the board during a meeting held in Sonora in late August.

At that time the board announced plans for holding a referendum to

seek an increase in the 2 1/2 cents per pound deduction rate.

The referendum would have been held in conjunction with the election of four board members whose terms expire. The election of board members will be conducted as planned, a board spokesman said.

Reasons for the board's surprise action included grower and warehouse reaction to continue the present 2 1/2 cents per pound deduction; drought or adverse weather conditions which have

prevailed throughout the mohair production area; uncertainty of present general economic conditions; and by proper changes being made in the overall promotional program structure, and effective promotion and advertising program can be carried out.

The referendum's cancellation was announced by board chairman Sid Harkins in a memo to directors of the Mohair Council of America and to members of the Texas Wool and Mohair Warehouse Association.

TS&GRA Host Predatory Session

The Predatory Animal Committee session was one of the best-attended committee gatherings at the recent Texas Sheep and Goat Raisers' Association meeting in Junction.

Milton Caroline, U.S. Fish and Wildlife Service official in charge of predator control in Texas, told committee members that appropriations from the State of Texas for the joint state-federal control program have increased by \$100,000, but added that changes in the program swallowed up the extra money and then some.

Caroline explained that per diem expense allowances for trappers had been raised from \$22 to \$30, and the mileage reimbursements had also increased. The mileage rate increase was not accompanied by an increase in the total mileage that personnel could claim, however, meaning that many trappers were still having to make up mileage expenses out of their own pockets.

Those pockets received a little aid in the form of increased salaries, said Caroline, though the raise was not enough to run much danger of fueling the nation's inflation problem.

Caroline left the impression that the combined increases would fall short of providing individual trappers with a large personal fortune after taxes, but he said the increased costs combined with the lower-than-requested state appropriation meant less expansion and program improvements.

In the final analysis, he explained, the program was actually \$22,000 poorer than it had been, rather than \$100,000 richer. Federal appropriations remain about steady.

Caroline also outlined a problem the service has been experiencing with the M-44, primarily due to a breakdown in quality control.

The springs used in the device to eject sodium cyanide are too weak, he said, and clearances in the units' barrels are not being precisely maintained. The springs, originally designed to carry 40 pound tension, must now rate as high as 65 pounds to work properly, due to drag from the inaccurate barrel measurements. In reality, however, Caroline says the springs being placed in the units actually offer no more than about 30 pounds of thrust. As a result, he said, "We have cases where a coyote trips the unit and it doesn't fire for several minutes."

Committee members, responding to Caroline's review of the predator control program's financial status, proposed a resolution called for county extension agents to receive predator control training before being assigned their counties. Their reasoning was that a withdrawal of federal funds from the program would mean the loss of numerous trappers. The federal share of the program is an estimated 25-30 percent. They fear such a withdrawal sometime in the future because of the increasingly pro-predator, anti-livestock attitudes taken by various officials.

Terrell County Agent Ellis Helmers reported on the success of predator control projects by his county's 4-H program.

"We've had several of our boys and girls catch more predators than the adult trappers, and many ranchers have said that their kids are teaching them new things about the art of trapping."

Helmers explained that the youngsters are scored on a point system and must maintain records on all predators taken as well as the method in which they are taken.

Trapping, he said, offers them a way to earn money as well as develop a skill that they've "got to learn if they're going to stay in the livestock business when they grow up." Naturally, the program also benefits livestock producers now, since a predator taken by a youngster is just as deceased as one taken by an adult.

Cull Beef Cows On Performance

One sure way to cut winter feed costs and generate income is to cull and sell cows that will not calve and that wean lightweight calves.

"Winter feed costs, depending on management, are generally between \$50 to \$100 per cow, and accurate culling based on an individual cow's performance can cut these costs and improve profits," says Dr. Larry Boleman, a beef cattle specialist with the Texas Agricultural Extension Service.

"Maintaining accurate performance records on each cow is the key to accurately determining reproductive efficiency. These should include the cow's lifetime production in the herd, age, conception data, calving dates and weaning weights of calves as well as calving intervals," notes the specialist.

Without cow identification and performance records, culling is limited to a pregnancy determination and visual inspection which are important and should be practiced by all beef producers whether they have performance records or not.

A veterinarian should check cows for pregnancy and soundness and remove open or defected cows.

Month of birth and age of calves are two important factors effecting differences in weaning weights within a herd, explains Boleman.

Older calves will weigh more than younger calves, and research results show that calves born in winter and early spring weigh from 35 to 80 pounds heavier at weaning compared to summer and fall calves.

Calving dates are helpful in culling and can also help detect cows with breeding problems. are adjusted to a common age such as 205 days.

Weaning weights can be used more accurately in culling if they

Cows can be compared and culled on the basis of their milking ability.

"Producers will have to decide how extensive a record system they need. However, when it comes down to culling cows, there is no substitute for good records," contends Boleman.

"Good cow performance records not only can save money but can be used to increase the production level of the herd by selecting top heifers for herd replacements and identifying high performing individuals for sale."

Herd record forms can be obtained from the Texas Agricultural Extension Service through the local county Extension office.

Meat Imports Down Sharply

Imports of foreign meat during the first six months of 1977 fell considerably below a year ago, according to Dr. Ed Uvacek, livestock marketing specialist with the Texas Agricultural Extension Service.

"Beef and veal imports were 14 percent below last year's levels in the first half of the year. Australia and New Zealand account for almost 60 percent of the imported beef, with Australia accounting for almost 40 percent of this," notes Uvacek.

Lamb imports from the "down-under" countries of Australia and New Zealand were down a huge 28 percent. New Zealand supplied 77 percent of the imported lamb. Mutton and goat meat imports were down 8 percent.

"Pork appears to be the only red meat import that did not suffer a drastic drop," says the livestock specialist. "Imports from Denmark and Poland, the main suppliers, were down only 4 percent from 1976 levels."

Summing up the meat import picture, 595 million pounds came into the U.S. the first half of 1977, a drop of 81 million pounds, or 12 percent from levels a year ago.

"The biggest reductions, of course, came from Australia and New Zealand, but other smaller exporting countries such as the Dominican Republic and El Salvador also cut back sharply," points out Uvacek.

"Even though U.S. cattle prices have not been very attractive, imports of live cattle increased 12 percent during the same six-month period. In contrast, sheep imports fell 82 percent," adds the specialist.

Against Kermit Broncos Make Valiant Effort

By Don Holdridge

It was a valiant effort the Broncos defense put up Friday night, and for a while it appeared to be all Sonora needed. But Kermit finally found a crack and scored with 3:24 left on the clock to eek out 7-3 win. The Sonora defense was brilliant in shutting down the well respected Kermit offense, recovering four fumbles, and except for

the touchdown and a Bronco fumble, the Yellowjackets never crossed the Sonora 37-yard line. The game was reminiscent of last year's heart-breaker as Kermit scored a late touchdown and then kicked a 17-14 victory. The 67-yard winning drive was capped with 21-stripe aerial as Scott Edwards dumped off to

Ray Jennings in the flat, and he outraced everyone to the end zone. Tony Moore kicked the extra point to ice the game. Sonora's score came midway through the second period as the Bronco offense could manage only six yards after Ross Roberts recovered his second fumble of the night at the Kermit 23.

Mike Jones accounted for the three points on a 30-yard field goal. The Bronco offensive ineptness cost them dearly as they moved to the 'Jacket 19- and four-yard lines in the second half, coming up empty both times.

This says it all...as Kent Cagle [41] jumps with joy to signal the successful field goal by Mike Jones [behind Kermit's 20]. Bronco teammates Cody Savell [20], Johnny Creek [44] and Dan Lawson [70] know they have taken the lead in the game, 3-0.

Early in the Kermit game it was apparent that Sonora's defense would dominate the game. Here Bruce Phillips [behind Kermit's 33] knocks the ball loose to become one of seven Kermit fumbles and one of four Sonora recovered. Johnny Creek [44] and Ross Roberts [75] help in the defensive work.

Crane To Host Broncos

By Don Holdridge

With another long trip ahead, the Sonora Broncos could be in trouble as they head for a 8 p.m. showdown at Crane Friday night.

It will be a battle of survival for the Red Hosses as another loss would dispell any thin hopes for a district championship.

Most observers have considered Crane a sleeping giant all year.

The nap ended last week as the Golden Cranes battered Ozona 21-13.

Crane boasts the top offense in the district, headed by the Rives brothers, Rocky and Ricky. The Bronco's defense was superb last week in shutting down a vaunted Kermit offense, but the offense continued to sputter.

Ross Roberts snagged two Yellowjacket fumbles while Bruce Phillips and Eddie Favila picked up one each.

Favila was also the game's leading rusher, picking up 68 yards on

seven carries. Without his 49-yard run, the Broncos would have had less than 100 yards total offense and only two first downs.

District 7-AA Standings

Team	W	L	T
Kermit	6	2	0
Crane	3	5	0
Ozona	5	3	0
Sonora	4	3	1

District Standings

Team	W	L	T
Kermit	1	0	0
Crane	1	0	0
Ozona	0	1	0
Sonora	0	1	0

One of the early highlights of the Kermit game was this recovered fumble by Sonora's aggressive defensive squad. Ross Roberts [75] tells the world about his teammates' efforts as Bobby Cook [79], Johnny Creek [44] and Bruce Phillips [88] see the results of their efforts.

Eddie Favila [23] turns on the speed as he rounds the corner during first half play in last week's Kermit game. Fullback Johnny Creek [44] gets set to put on a clearing block as Bobby Willis [62] follows the play.

Girl's Softball Association Discuss Team Improvement

Girls' Softball Association officers and those coaches already chosen for next year's teams, met in a business meeting last Wednesday at Mrs. Ann Bundy's house.

Many different aspects of improving the organization were discussed. Debbie Kiowski was elected softball representative to the baseball committee headed by Jerry Gilly. The committee presents ideas to the Community Park Board. Mrs. Bundy was selected alternate.

One of the most important decisions made was to raise the age level of the major league team from 16 to 17 since the majority of the teams in this area allow 17 year olds to play. The age level for the minor league teams was kept at 9-12 year old.

Other discussions centered around money making projects to donate money to the completion of the field designated for the girls. A sum of \$500 was earmarked for beginning restroom facilities to serve all three of the softball - baseball diamonds. Projects discussed were a volleyball tournament among Sonora men and women teams, a teenage dance charging admission, and a possibility of obtaining concession rights at the Little League field. Vanetta Smith was elected chairman of the Fund Raising Committee. Kay Holdridge heads the Volleyball Committee and Pat Day is in charge of making team rosters with local advertising to pay the cost of printing and to earn money.

Those in attendance were Eileen Stewart, president; Ann Bundy, vice president; Pat Day, secretary-treasurer; Vanetta Smith and Carolyn Sorenson, major league coaches; and Debbie Kiowski, Kay Holdridge, and Melinda Brandon, minor league coaches.

Devil's River News Football Contest

Pick the winners of these games:
Circle the team in each of the following games you think will win.

- SONORA vs. CRANE
- OZONA vs. KERMIT
- ASU vs. SWTSU
- BAYLOR vs. ARKANSAS
- HOUSTON vs. TEXAS

DID YOU KNOW

The expandable polystyrene foam used to make the cup can be burned at an extremely high BTU level. That means that its heat output is about the same as fuel oil.

Thus, this "borrowed energy" is returned in the form of higher heat when foam cups are part of a load of refuse being burned in a resource recovery incinerator. This added heat helps the burning of wet garbage in such systems and adds to the total amount of heat produced.

Some cities are now using the output from specially designed incinerators to generate electric power. These systems not only eliminate the use of scarce acreage for burying municipal waste, but also help pay for collection of the refuse through sale of the power generated.

It has been estimated that by 1980 almost seven percent of the total national demand for energy could be met by such a system.

The foam cups and containers included in a typical mix of incinerated refuse do not melt or in any way clog the incinerator systems. They burn cleanly, with an ash residue of less than one thousandth of their original weight, according to the Foam Cup and Container Division of the Society of the Plastics Industry.

The Consumer Alert

by John L. Hill
Attorney General

AUSTIN—Many of us have bought goods and services such as magazines, kitchenware, children's photos and insurance as a result of what began as a telephone call from a salesperson.

Sometimes those who make their sales introductions by phone are straightforward enough in their approach to let us know right off that they are selling something. We are often able to decide whether we need the item, and whether we wish the salesperson to come to our home to give us more information about it. However, some telephone sales people are not so direct; many use unscrupulous sales

tactics calculated to trick us into making a purchase immediately, or into listening to a sales pitch in our home. The attorneys in our Consumer Protection Division say two favorite tactics of telephone sales people are the "free gift" and "you've won a contest." These are used to sell everything from magazines to baby equipment, from encyclopedias to pots and pans.

Here's how they work: The consumer is told by the phone caller that he has been selected to receive some free gift, or that if he can answer a quiz question, he will win a prize. (The question is usually no more than difficult than "Who's buried in Grant's tomb?") Or, a free gift such as a camera may be offered when sales pitches are made for such things as children's photos.

The free gift or prize almost always, has strings attached, however. The free gift of magazines, for example, will typically involve a charge for postage and handling, and almost always this charge is expressed in a way to mislead. For instance: "These three magazines will come to you

follow these guidelines: —Never agree to buy a product or to have a salesperson come to your house during the first call. Tell the person you will call him back. This will give you a chance to consider the offer.

—If you are told on the phone that you have won a prize in a contest, ask if you will be obligated to listen to a sales pitch for a product or service. Many times, to accept a "prize" is to leave yourself open to an intense, high pressure sales pitch.

—Find out the conditions of getting the free gift. The gift is usually free only if you buy something, and often you will be overcharged. Tell the caller you wish to shop around to determine how the price you must pay in order to get the gift compares with the item without such a gift.

If you are the victim of a fraudulent sales pitch, contact the Attorney General's Consumer Protection Division in Austin, Dallas, Houston, San Antonio, El Paso, Lubbock, or McAllen. Outside these areas, call toll free: 1-800-252-9236.

health incidents such as exposure to toxic chemicals. This is as it should be. Every precaution should be taken to insure the safety of employees as individuals and as a valuable American resource.

Serious violations of OSHA regulations should result in swift action. Our priority should be those violations that directly threaten the life and limb of the American employee. Let us allow common sense to guide us. Small businessmen should not suffer under a crunch of endless penalties and citations for minor violations while much more dangerous hazards go uninvestigated.

That is why I co-sponsored a bill designed to make OSHA requirements more reasonable for the small businessman.

Under the bill, an employer who does not employ more than 25 people would receive a warning rather than a citation for a first instance violation that is not willful or serious.

And significantly, OSHA itself now plans a dramatic shift in focus away from the policing of safety regulations and toward the prevention of serious occupation related diseases.

This change in perspective would mean a decreased emphasis on comparatively less important standards and would leave OSHA free to concentrate on the prevention of tragic occupational

injuries and illnesses. Studies indicate that the Occupational Safety and Health Administration has been successful in its primary objective of reducing the number of deaths caused by accidents in over 5 million workplaces. Yet because of past preoccupation with the enforcement of trivial regulations, small businessmen find it practically impossible to keep up with the number and complexities of regulations.

Financially, the small businessman and farmer is then faced with an unfair burden, as penalties are levied for what is often an inadvertent violation of regulations which do not pose a serious threat to the well-being of employees.

Fifth Grade News

The fifth level classes went on a field trip to Safety City in San Angelo. The main purpose was to teach bicycle safety on public streets. The children actually rode bicycles in a miniature city observing safety rules—using stop signs, various turn signals, railroad crossing, traffic lights, one way streets and pedestrian crosswalks.

The students won an attendance party this six weeks. Mrs. J.B. Halford was chairperson for the four classes responsible for preparing and getting the refreshments to serve 96 fifth graders. We thank you for the goodies Mrs. Halford and the various mothers for preparing the goodies.

The science classes are observing a learning center on starfish, worms (flat, round and segmented), frogs and spiders.

The social studies classes have completed a study on culture areas of North American Indians. One culture of the Indians observed was that Indians had openings to their dwellings to the east in order to use solar energy from the sun. What are we exploring at the present?

The students wrote creative stories to sell at the Halloween Carnival on "Why I Appreciate My Parents".

A special unit was taught to all students on Daily Food Choices. The students were taught to classify foods into the Four Food Groups (milk, meat, vegetable and fruit). List the number of daily servings needed from each of the Four Food Groups, identify amounts of food that approximate single servings from each food group, and analyze selections of food for one day to determine whether they meet the recommendations of the Four Food Group System. This was a fun unit as it was different and had fun activities to do.

Yet because of past preoccupation with the enforcement of trivial regulations, small businessmen find it practically impossible to keep up with the number and complexities of regulations.

Financially, the small businessman and farmer is then faced with an unfair burden, as penalties are levied for what is often an inadvertent violation of regulations which do not pose a serious threat to the well-being of employees.

That is why I co-sponsored a bill designed to make OSHA requirements more reasonable for the small businessman.

Under the bill, an employer who does not employ more than 25 people would receive a warning rather than a citation for a first instance violation that is not willful or serious.

And significantly, OSHA itself now plans a dramatic shift in focus away from the policing of safety regulations and toward the prevention of serious occupation related diseases.

This change in perspective would mean a decreased emphasis on comparatively less important standards and would leave OSHA free to concentrate on the prevention of tragic occupational

Krueger Report

By Cong. Bob Krueger

We are a nation of over 80 million working men and women.

Together we comprise America's most important national resource. And singly, we each are deserving of the highest standards of on the job safety and the best protection against occupational accidents.

With this in mind the Occupational Safety and Health Act (OSHA) was put into effect in 1970, long before I entered the Congress.

Almost since its beginning, however, problems with regulation and enforcement of this law have received attention.

Indeed, some people

associate the name OSHA only with reports of stringent enforcement of workers' bathroom facility and regulations.

Studies indicate that the Occupational Safety and Health Administration has been successful in its primary objective of reducing the number of deaths caused by accidents in over 5 million workplaces.

Yet because of past preoccupation with the enforcement of trivial regulations, small businessmen find it practically impossible to keep up with the number and complexities of regulations.

Financially, the small businessman and farmer is then faced with an unfair burden, as penalties are levied for what is often an inadvertent violation of regulations which do not pose a serious threat to the well-being of employees.

That is why I co-sponsored a bill designed to

make OSHA requirements more reasonable for the small businessman.

Under the bill, an employer who does not employ more than 25 people would receive a warning rather than a citation for a first instance violation that is not willful or serious.

And significantly, OSHA itself now plans a dramatic shift in focus away from the policing of safety regulations and toward the prevention of serious occupation related diseases.

This change in perspective would mean a decreased emphasis on comparatively less important standards and would leave OSHA free to concentrate on the prevention of tragic occupational

injuries and illnesses. Letter To The Editor

Dear Editor:

Well how are all my friends? Would love to come for a visit and just walk around town and soak up some of that good old Texas air and shake hands. That would be wonderful and maybe I can some time next year. I worked around there long years ago and enjoyed every minute of it but a lot of my dear friends have gone on beyond but still have a lot there yet.

I read every line of The Devil's River News and I saw where you all need rain. We sure are wet here. We have two big cotton gins in our town and the farmers are really getting it out when they can. The past week has been pretty. They raise lots of soy beans here to. We live 30 miles from Memphis, Tenn.

There are a lot of cattle here. Mr. M.P. Moore has the finest polled herdfords in the world. His ranch is real close to town. Well you will find an \$8.00 check inside for another year's subscription.

As ever your dear friend,
Carl M. Farrar

Downtown

Durwood Neville, owner

387-3910

Two Sonora Elementary teachers, Sandra Elliott and Brenda Addison, showed up at the Halloween Carnival Monday clowning around.

Donald Duck, otherwise known as Jerri Todd, was judged most original in her age group.

"The Diamond Sutra," a Buddhist scripture concerned with the non-existence of all things, is considered the first printed book. It consists of a 16-foot scroll made up of six sheets of text and one of illustrations, printed in 868.

Sonora Minister Speaks

Today I would like to share something most important, and an urgent matter in our day and age. Not so many years ago the United States Supreme court overruled all individual STATE legislation concerning abortion. Our highest court in the land ruled that abortion is the woman's choice. Thus today a woman or girl, regardless of AGE, or regardless of what a husband or parents of some young teenager might say in protest, can get an abortion on demand.

Last week I had the privilege of visiting with a young Catholic lady who knew what abortion is. She called a spade a spade. The Bible says, THOU SHALT NOT KILL," and abortion is the breaking of this commandment. Perhaps, at this time, you are thinking or asking yourself, "Why is the minister speaking about this to us in Sonora?" It is because I do not want any Christian

to answer, "Oh I believe that it is up to the individual to decide." You must not take such an attitude. The Lord Jesus has said He prefers for His followers to either be hot, or cold. He cannot and will not tolerate luke warm middle of the road, it is really not my concern thinking.

It was a delight to hear a laywoman such as the young Catholic speak so KNOWLEDGEABLY about this subject. I wish all of you could have heard her, I wish the highest court in the United States could hear her now, perhaps they would reserve their decision that legalized the murder of unborn babies. Now least you think using the terms baby and murder are too strong of language, let me ask a question. Did you know that women can have an abortion legally anytime before birth? The Bible considers those in the womb of the MOTHER

from conception to birth as living beings. Our United States Supreme Court considers them less than human. For advice from God read Psalm 51. Do you remember John the Baptist? The Bible says he leaped for joy at announcement of the Saviors CONCEPTION. Where was John the Baptist when he leaped for joy? Yes, in the womb of his mother Elizabeth.

We must take a stand, like the young Catholic woman. Protest such immortality to your local, state and federal legislators. Now even more important, may we in love give direction to those carrying babies and contemplating an abortion, because our modern society has confused the issue of life for the unborn. LEARN to be like the young Catholic woman, for she counseled with a right mind one young girl who was pregnant.

Firemen's News

By Jerold Zech
October 25-27 - No fire calls.
October 28 - Fire call (12:45 p.m.) to Bill Crawford trailer. Fire caused by burning grease in skillet. No one home at the time. Men answering the call were Blackman, Donaldson, Flores, Guerra, Luttrell, McLaughlin, Odom, Olenick, Stokes, Teaff, Taylor, Thorp, West, Zech, and Huffstutler. Fire was turned in by Blackman (a neighbor).
October 29 - No fire calls.
October 30 - Car overturned on Crockett. (5:15 p.m.) Unit 70 responded with Guerra, Luttrell, Olenick, Thorp, and Zech. No water used.
October 31 - No fire calls. A Happy Halloween!

Parker Named To Briscoe Campaign

B.L. Parker of Bastrop was today named area coordinator by Governor Dolph Briscoe for his 1978 gubernatorial campaign in Texas.

Parker will again coordinate the Governor's re-election effort in a 49 county area and will serve as liaison between the county coordinators and the state campaign headquarters in Austin.

Governor Briscoe named his appointment in a statement released from his state campaign headquarters.

"The addition of B.L. to the campaign will make winning this election much easier," Briscoe noted.

"I know he will make it a successful venture because we all share the same goals.

"While there is much to accomplish in the next four years, Texas enjoys a prosperity and an economic stability few states can claim," he added.

Parker, a former Sergeant-At-Arms in the Texas Legislature, is a member of the Veterans of Foreign War and the American Legion. He and his wife Marcie have one daughter, Marcilynn.

According to Parker, anyone interested in work-

Stick cinnamon is the rolled inner bark of a small East Indian tree.

Miss Nancy Mooney [right] was named Halloween Queen Monday and presented the crown and bouquet of red roses by Kelly Carta. Nancy's escort was Steve Chandler. Other contestants were Carol Brandon and Benny Granger, Mary Lynch and Joey Kirby, and Cody Gold and David Creek.

ing in the Briscoe campaign should write to the state campaign headquarters at P.O. Box 2174, Austin, Texas 78768.

W. R. Jackson Joins Staff At Bradens

Wallace R. Jackson has recently joined the staff at Ken Braden Motors as service manager.

Jackson, the son of the late Jack Jackson of Sonora, arrives here from Arlington, where he was a shop supervisor with Bell Helicopters.

Jackson is married to the former Leta Morrow of Arlington, the daughter of Mr. and Mrs. Joe Rice of Clovis, N.M.

The Jacksons have three children: Jeff, 17 year-old junior at Sam Houston High in Arlington; Kristi, 16 year-old sophomore at Sam Houston High and Wally Jr., 15 year-old freshman at Ferguson Jr. High.

Jackson is a 1955 graduate of Menard High School and is the son of Mrs. Don Luce of London, Texas.

He has been in aircraft maintenance and manufacturing for 17 years.

The brother of Sonora's Jerry Jackson, Wallace plans to move his family "as soon as we can find adequate housing."

"We are just so happy to be in Sonora," he commented, "this is much more like being at home."

ESA Holds Halloween Fete

Epsilon Sigma Alpha Sorority held a Halloween Masquerade party Friday night at the Stanley Mayfield Ranch. Guests were served stew, dips, cheese and crackers.

Hosting were the Mayfields, Mr. and Mrs. Billy Martin, Mr. and Mrs. Herbert Jones and Mrs. John Farmer.

Members and their husbands attending were Messrs. and Mmes. Dennis Hughes, Jim Miles, Ken Cayce, Glen Berry, Les Robertson, Joe Kiowski and Mrs. Delores Hodges.

Mr. and Mrs. Jim Mathews and Mr. and Mrs. Bob Caruthers were guests.
