

Hess Leads Martin in Oregon Race

New Deal Candidate Takes Early Lead Over Incumbent

PORTLAND, Ore., May 21. (AP).—The influence of the new deal and organized labor feathered back onto the secondary today when Harry L. Hess gained a 1,430-vote lead over Governor Charles H. Martin in the Oregon primary for democratic nomination as governor.

Returns from 1,141 of the state's 1,681 precincts gave Hess 40,405 and Martin 38,975. It was the first time since Martin held a sensational stand in the agricultural counties last night that Hess had regained his earlier advantage.

The changing vote came primarily from Clackamas and Multnomah counties, lumber industrial areas figuring in the Martin fight against labor violence.

Hess, described by Martin as a John L. Lewis, CIO candidate, looked to reports from 210 missing precincts in labor's chief strongholds to draw him back toward the 2000-vote leadership he once held. Martin hoped for additional strength in 179 missing precincts in the well-populated farming country. Other missing precincts were scattered and minor.

Hess, supported by Senator George W. Norris, Nebraska independent, and in effect by Secretary of the Interior Harold Ickes, who censured Martin as not a new dealer "at heart", drew his votes primarily from the lumbering counties.

In the senatorial race, Willis E. Mahoney had a comfortable lead over U. S. Attorney Carl G. Donagh for the democratic nomination and Rufus C. Holman, state treasurer, apparently had won the republican nomination over former senator Robert N. Stanford.

The republican race for the gubernatorial nomination was a runaway for Charles A. Sprague, publisher of a Salem newspaper, who has 30,000 votes to less than 10,000 for Sam H. Brown, farmer, closest of his six opponents.

Rotarians to Hear Dr. Score Thursday In Address to Club

Dr. J. N. R. Score, pastor of the First Methodist church of Fort Worth, who will deliver the literary address to the high school graduating class Thursday evening, also will address the Rotary club at noon Thursday. Odessa Rotarians are being invited to attend jointly with the Midland club.

When Fred Wemple of Midland was district governor of Rotary, the annual conference was held at Childress and Dr. Score addressed the assembly at a large union service on Sunday evening, as the conference opened. Midland Rotarians who attended the session declared him to be one of the outstanding speakers to have been heard at such a meeting. It was through Wemple's invitation, conveyed to Dr. Score yesterday by telephone, that the engagement to address the club here Thursday was secured.

Japanese Declare Intentions to Go Forward to Hankow

WITH THE JAPANESE ARMIES, SUCHOW, May 21. (AP).—General Hata, commander of Japanese armies, reported to have surrounded several hundred thousand Chinese on the central front, tonight announced "we intend to go to Hankow."

He indicated the battle of Suchow was merely a part of a plan to occupy completely the Lungtaih railroad running through Suchow into the heart of China.

He indicated the battle of Suchow was merely a part of a plan to occupy completely the Lungtaih railroad running through Suchow into the heart of China.

District Manager Of Banner Here

C. E. (Bob) Roberts of San Angelo, district manager of the pure crystal ice department of Banner Creamery, is in Midland for a three-weeks' stay assisting in the initial work of ice delivery for the local firm.

According to Hoots Lamar, local Banner plant manager, the addition of ice delivery will soon boost the total local employees to between 20 and 25.

Labor Troubles at Ford Dam Probed

AUSTIN, May 21. (AP).—Four state police and three deputy sheriffs were ordered to Marshall Ford dam today after reports of labor trouble were received here. Officials said the officers would not interfere with any activity at the dam site.

Visits Daughter. Mrs. Laura Wright of Long Beach, Calif., has arrived in Midland for a month's visit with her daughter, Mrs. Henry Butler. The visitor is an employee of the Columbia Outfitting company in California.

'Anti-Sour Puss' Movement To Laugh Off Depression

ALL WE NEED IS MORE ANTIS

This is to Certify that

IS A MEMBER OF THE ANTI-SOUR PUSS ORGANIZATION

and is in good standing for Life

ISSUED 1938

The founders printed and distributed many of these membership cards, urging one and all to "Join the Anti-Sour Puss Organization."

By NEA Service PITTSBURGH, Pa., May 21.

Are you a sour-puss?

Do you go around frowning on things in general? Do you think the country is going to the dogs and maybe the dogs won't have it? Are you a power for gloom and pessimism in your community?

If so, three Pittsburgh businessmen have a message for you. They want you to:

Join the Anti-Sour Puss Organization.

People all over the country are doing it. Many persons, and some firms, have stuck the Anti-Sour Puss mascot—a grinning alley cat—on their letterheads. A Pittsburgh hotel has even concocted an Anti-Sour Puss cocktail.

It all goes back to a February luncheon in Pittsburgh. Joseph Henry Buerger and Will Golder, both in the printing business, and Harry Smith, wholesale paper dealer, were eating fllet mignons and talking about hard times. Mr. Buerger said he thought, "maybe the nation could laugh off the depression. Mr. Golder and Mr. Smith thought so, too."

So they started the Anti-Sour Puss Organization, which asks only of its members that they forget the shady sides of life and laugh. The idea is that soon people will just naturally forget all about the depression.

The three founders have sent out 50,000 posters, spreading the Anti-Sour Puss doctrine and spreading the contention that "all we need is more antis."

They deliberately misspelled the "joyn" in their slogan to suggest the idea of "joy," which they contend is all that is needed to combat hard times.

Joseph Henry Buerger, one of the founders of the Anti-Sour Puss Organization, suggested one would just start laughing the recession would be gone with the grin.

New Cochran Pool Opener Swabs 132 Barrels Of Oil In 26 Hours

BY FRANK GARDNER.

The Texas Company No. 1 Mallett Land & Cattle Company, opening Cochran's third pool, swabbed 132 barrels of clean oil thru 2-inch tubing on 26-hour test as the week closed. Production represented net oil after that used to load hole for two acid treatments, of 2,000 and 3,000 gallons respectively, had been recovered. Casing pressure is now 100 pounds. Before acidizing, the well bubbled only a barrel and a quarter an hour thru tubing. Bottom of the hole is 5,058, plugged back from 5,122 to shut off salty sulphur water.

The discovery is located in the northeast corner of section 7, block G, public school land, in the extreme southeast corner of the county. It is nearly six miles southwest of the Duggan pool, first in Cochran, and eight miles west of the Slaughter pool of southwest Hockley.

A wildcat in western Cochran, Helmerich & Payne, Inc. No. 1 Westheimer & Daube is drilling line at 4,880 feet, showing nothing. Core from 4,732-70 was fully recovered. It was hard, dense, dark brown, sandy, medium porous dolomite lime, with streaks of anhydrite and asphaltic material. No saturation was evident. Another core, from 4,787 to 4,805, showed recovery of 15 feet of medium hard, gray and brown, sandy, slightly porous, fossiliferous, dolomitic lime, bearing streaks of asphaltic material. This core, too, failed to show any saturation.

In northeast Garza, Gulf No. 1 Swenson, projected 8,500-foot test, is coring below 5,067 feet in lime and shale.

Eastland Well Running Tubing. Eastland Oil Company No. 1 P. C. Dunbar, in southwest Gaines, is running 2-inch tubing after drilling cement plug from 5 1/2-inch liner set from 3,050 to 4,330. Packer, which will be set in liner, was being run on tubing. Operators will swab out drilling fluid and give the well a light dose of acid. They plan then to shoot hole with nitro, and later to re-run tubing and recalcize. No swabbing, bailing test was made after well was drilled from liner. The plug is bottomed at 4,640 feet in lime which has had some oil-bearing, porous streaks. It is in section 24, block A-12, public school land, seven miles southeast of the Hobbs field of Lea county, N. M.

J. L. Frick and Osage Drilling Company No. 1 Atlantic-T. S. Riley, in central Gaines four miles northwest of the Seminole pool, yesterday had drilled to 4,978 feet in time, with no shows logged. Location is 1,980 feet from the north, 660 feet from the west line of section 249, block G, W. T. R. R. survey.

Shell Petroleum Corporation started two locations in the Denver field of southern Yoakum at the week-end. One, and outpost, is the No. 2 C. A. Dowden, 1,650 feet from the north, 990 feet from the west line of section 894, block D, J. H. Gibson survey. It is over a quarter-mile southwest of the No. 1 Dowden, completed last week for 24-hour flow of 596 barrels at 5,044 feet, to extend the field a half-mile west.

The other Shell location, in proven territory, is No. 1 Lowe, 330 feet from the south, 990 feet from the east line of section 894, block D.

Magnolia No. 1 Webb, in central Yoakum, is re-setting packer preparatory to acidizing.

McKee To Drill Test. Magnolia No. 1-A McKee, north Pecos deep test, was scheduled to take a grillstem test after halting drilling at 6,139 feet in hard dolomite. It had shown nothing in drilling 37 feet into the Ellenburger, lower Ordovician.

Humble No. 1-B Tubb, which widened the Tubb deep Permian pool in western Crane, three-quarters of a mile southeast when it flowed 15 barrels an hour, natural, through tubing, was treated with 1,000 gallons late in the week. Swab was run after acid had set for 30 minutes, and it was found that tubing had become plugged. It is now being pulled to clean out. The well is bottomed at 4,430 feet in gray lime. It topped the deep pay at 4,330. Shut-in pressure was 2,000 pounds before acid was run.

Grisham-Hunter Corporation No. 1 George Daniel, Reeves county Delaware test, topped Delaware black lime at 3,467 and the Delaware sand at 3,527. It is now drilling at 3,598 in sand, having logged rainbow showing of oil in sand from 3,570-80.

Shell No. 1-A TXL, north out to the Mason pool of northwest Loving, which produces from the Delaware, is drilling at 1,892 in anhydrite.

Perkins Running Casing. Running of special 5-inch flush-joint casing was scheduled to start yesterday evening at Frank S. Perkins et al No. 1 E. P. Cowden, southwest Andrews deep prospect, which has drilled to total depth of 8,012, deepest yet reached in the North Permian Basin. The casing will be cemented on bottom then gun-perforated in zones in which Schlumberger electrical log indicated production might be found. The electrical survey showed gas from 7,500-50 See (Oil News) Page 8

Czechs Arm Selves for Elections

Army Reserves Are Called Out on Eve Of Voting Today

LONDON, May 21. (AP).—Czechoslovakia called to the colors today one year's contingent of its army reserve, and sent a thrill of anxiety and alarm to every corner of Europe.

It was asserted officially and emphatically that the reserves were called out to insure peace and order in the municipal elections which start tomorrow, and it was added specifically that their assembly was not aimed against anyone outside the country.

But the fear was immediate in all chancelleries that the situation in Europe has been made even more explosive. The great fear was that the German government might consider the call provocative and that it might in turn increase German military precautions, ignoring the Czechoslovak assertion that the troops were to be used only to ensure a peaceful election.

The Czechoslovak government's action hit Europe like an electric shock. It came at a time when fears that Adolf Hitler, the key man of Europe, might be preparing to export in Czechoslovakia the "protective interest" he asserts in Germans outside Germany's frontiers. Already he had sent shivers of apprehension through Europe foreign offices.

Diplomatic tension was at its highest point since Hitler's seizure of Austria. There was serious concern in the British and French foreign offices.

The Czechoslovak municipal elections in 1,000 towns, which start tomorrow and which have stirred widespread clashes between Czechs and Sudeten minority Germans, suddenly brought the situation to a point approaching that of crisis. Diplomats, with or without reason, feared that Hitler might decide to take the opportunity, with France and Italy embroiled over intervention in the Spanish civil war and with Italian-British relations cooled in consequence, to impose his will upon Czechoslovakia, using the electoral disturbances as an excuse.

A series of incidents which brought German-Czechoslovak relations to a head created an atmosphere reminiscent of that which preceded the exertion of Germany's protective interest in German Austria.

First—German troop movements on the Czechoslovak frontier. The German general staff admitted the movements to the British ambassador at Berlin but asserted that they had no relation to any political situation and involved merely a normal transfer of troops from winter to summer quarters. Some diplomats pointed out that troop movements before the Austrian annexation had been denied.

Second—The Sudeten German minority party's abrupt refusal to negotiate with the Czechoslovak government, regarding the proposed minorities statute, "as long as terrorism continues." This statute was intended to be the government's olive branch to Konrad Henlein, German minority leader. It was asserted yesterday, also, that the government offered it not as a flat take-it-or-leave-it offer but as a basis of negotiations. This assertion was made by Premier Milan Hodza.

Third—Henlein's sudden and mysterious departure from Prague three days before the election.

CONDITION IMPROVED.

The condition of J. A. Andrews, ill in a Temple hospital, was reported as greatly improved Saturday.

West Texas Geologists Start Laying Plans For AAPG Meet

With only four months remaining in which to complete arrangements for the mid-year meeting of the American Association of Petroleum Geologists, to be held at El Paso, Sept. 27-30, under the sponsorship of the West Texas Geological Society, chairmen and committeemen have started working energetically on details to assure success of the affair.

Berte Haigh, in charge of the University Lands office here, is general chairman; C. P. Butcher, district geologist at Midland for Tide Water Associated Oil Company, is assistant general chairman in charge of A. A. P. G. affairs; and H. A. Hemphill, geologist with Magnolia Petroleum Company at Midland, is assistant general chairman in charge of West Texas Geological Society affairs. He is president of the West Texas group.

Several meetings are scheduled for the coming week, first of which will be held at 8 o'clock Monday night in the chamber of commerce office. At this meeting will gather "field trips" and "transportation" committeemen and the chairman of the "hotel committee" to align plans for the field trips.

All committeemen will be contacted within the next few days by the

Munitions Are Rushed to San Luis Potosi as Revolution Seems Likely

Relief Clients 'Sit Down' in Cleveland City Hall

Carrying out a threat made many times during Cleveland's recurring relief crises, 150 demonstrators began a sitdown strike in the city council chamber in protest against week-to-week handling of relief problems with stop-gap methods. Coffee and bread was the fare of the demonstrators pictured above as they refused to leave the chamber after the council had transferred \$80,000 from its general fund to the relief fund—an amount that would feed the city's hungry for less than a week. Leaders said they would keep the sitdown in progress "until regular relief orders are restored."

Heavy Showers in Farming Area East Of Midland Friday

Heavy showers, some accompanied by hail, visited a few sections of Midland county Friday night, the heaviest being in the southeastern and eastern portions where the fall was estimated at from one to four inches.

From one to two inches was reported in the Stokes school area, from a half to one inch in the Valley View school neighborhood and a small cloudburst, accompanied by wind and hail, near the Lewis Wren farm just south of Stanton.

Another rain formed to the northwest of Midland, traveling in a northeasterly direction and covering a long strip of pasture country. The rainfall at Midland was only .03 of an inch, although showers threatened for more than an hour as thunder and electrical display were evident.

Several sections of West Texas received moisture late in the week, a rain early Thursday covering much of Midland county.

12 Killed in Raid On Spanish Capital

MADRID, May 21. (AP).—At least 12 persons were killed and about 40 injured today by a pre-dawn bombing. Insurgent siege guns pumped over 200 shells into Madrid's Salamanca residential district.

A large shell crashed into the Venezuelan consulate, decapitating Eloy de Lozano, brother of the former consul, as he lay in bed.

GUESTS OF MONTGOMERY.

Mrs. J. C. Montgomery and W. C. Montgomery of Dimmitt are week-end guests of their son and brother, J. C. Montgomery, and wife here.

Midland Snake Entry Disqualified At McCamey Celebration Sat.

MCCAMEY, May 22 (Special).—Crawletus Fangus Bitumquick Atterley Akesnay, Midland's snapping, rattling and man-about-town entry in the famous rattlesnake derby held here Saturday afternoon, was disqualified when it was learned that he held an 8-gal handicap. Consequently, the only representation left for Midland was the group of business men who came here Friday.

The celebration proved to be one of the greatest for which this city is famous, with the Midland delegation proving to be one of the strongest represented.

One of the outstanding speeches made Saturday night was by Attorney R. W. (Bob) Hamilton of Midland in the interest of the gubernatorial candidacy of Col. E. O.

Limitation on Use Of WPA Spending Approved by Comm.

WASHINGTON, May 21. (AP).—The senate appropriations committee today approved a proposal to impose a strict limitation on the use of WPA funds for building public utility plants.

Members reported the committee adopted a sub-committee recommendation that the WPA be prohibited from financing construction of utility plants which would compete with existing private systems when the latter are subject to any form of public regulation.

Another sub-committee recommendation would increase farm benefit payments by \$200,000,000.

George McEntire Of Sterling Ill

George McEntire Sr., veteran ranchman of Sterling City, was seriously ill late in the week, his son, Little George McEntire, and daughter, Mrs. Jack B. Wilkinson, having been called to his bedside here. Mrs. McEntire of Midland suffered an acute attack of illness while at Sterling City and was taken by her husband to Dallas, Mr. and Mrs. Wilkinson still were in Sterling City Saturday and no new reports on the condition of her father had been learned late Saturday.

HERE FROM LUBBOCK.

Pete Cawthon and Bo Williams, coach and athletic director, respectively, of Texas Tech, were here Saturday on business.

SPEAKS AT TOYAH.

James H. Goodman, Midland attorney, addressed members of the high school graduating class at Toyah Friday night.

TO LOS ANGELES.

Mrs. Maude Leonard will leave today for Long Beach, Calif., for a visit. She plans to go later to study in Los Angeles before returning to Midland to re-open her music classes in September.

Government Takes Action To Avert War

Nation Uncertain Over the Extent of Fight Possibilities

MEXICO CITY, May 21. (AP).—A trainload of munitions today was sent to San Luis Potosi where repeated rumors of an impending revolution have stirred the Mexican government to stringent military precautions.

A group of five senators indicated they would urge President Cardenas to expropriate properties of leaders implicated in any uprising, suggesting such property be applied in indemnifying foreign oil companies for expropriated properties. Mexico was uncertain whether it was facing a major revolutionary movement or a series of local rebel activities.

CEDILLO'S FAMILY NOW IN SAN ANTONIO

SAN ANTONIO, May 21. (AP).—At least part of the family of Saturnino Cedillo, warlord in the state of San Luis Potosi, Mexico was believed in San Antonio today.

Three women and a man, members of the Cedillo household were reported to have arrived here last night. It was said General Cedillo would join the family here later.

Most of County Teachers to Return To Schools in Fall

Teacher-tenure in Midland county schools is showing a good record, according to figures released by County Judge E. H. Barron, ex-officio county superintendent, Saturday.

A small turn-over in the personnel of the teaching staff is shown for the coming year, as 12 of the 15 teachers in the rural schools are slated for return next fall. One other teacher is being transferred out of the county through arrangements between two school districts.

Faculty of the schools for 1938-39 as announced to date, includes: Valley View, Mr. and Mrs. Leonard Alcorn, returning for their third year; McClinic—teacher not officially announced, as Miss Hazel Self has accepted a position in a larger school in a neighboring county; Pleasant Valley, Miss Tommie Smith and Miss Helen Stewart, the former having served the school for five or more years, the latter returning for her third year; Warfield, Marvin Bryant and Miss Birdie Robertson, the former returning for the second year, the latter for her third term; Prairie Lee, Mr. and Mrs. R. I. Sells who come from a Martin county school and Mrs. P. G. Smithson returning for her second year and Mrs. Bill Pigg returning for her fourth year; Cotton Flat, Miss Christine Moore, returning for her fourth year, later for her third term; new to the system; Stephenson, Mrs. Edith Wilcox returning for her second year; Stokes, Mrs. Blanche Alcorn, returning for her fourth year, while Mr. M. H. Alcorn, re-elected for his fourth term as principal is being transferred to the Courtney school in Martin county.

Two additional teachers were elected, a fourth at Prairie Lee and a third, Miss Inogene Hale, at Stokes. Under the new arrangements, Miss Hale is also being transferred to Courtney, while Mrs. Alcorn will teach the lower grades at Stokes.

Erosion Ruined Mayan Empire, Says Historian

DALLAS, Tex. (UP).—Dust bowl property owners whose fertile farms are being blown away by dust storms are advised by F. Martin Brown, director of the Colorado biological survey, to study the history of the Mayan Indians.

"It wasn't a dust bowl problem that the Indians faced, but you can draw a parallel between their problem and the one faced in the Southwest," Brown said on a visit here.

"The Mayans lived in Central and South America, but they traded over almost all America and evidences of the influence of their civilization are found as far north as Missouri.

"But their empire disintegrated because of soil erosion.

"The tribe's primitive method of agriculture was to sow a crop and let the plants and the weeds grow together. The next year, they cleared an additional space out of the jungle and left the old field to grow over for three or four years.

"The topsoil washed off into the chains of lakes which then existed. At first there was plenty of water. It destroyed the communications between cities and flooded fields.

"But eventually the wrong methods of agriculture destroyed the water supply. In the records we find mention of numerous lakes, but they're gone now."

Armed With a Foundation for a Full Life.

Sixty-six young men and women are receiving this week their diplomas or certificates of graduation from Midland high school. Many of them will continue their pursuit of education, attending institutions of higher learning. Others will take up vocations or trades, beginning immediately the age-old task of earning their livelihood.

Of the hundreds of thousands of young people receiving similar awards this week, few can count themselves more fortunate than those who have had the facilities and advantages of receiving their work in Midland high school. In many places there have been applied courses better fitting the graduates for trades, a branch which will be better cared for here in the future, but few high schools have instilled into their graduates a better spirit and appreciation of living, a broader outlook on life itself.

Too, the Midland graduates have been equipped with foundation work, reflected in the extensive list of units of affiliation, which will be of great aid in specialized courses of colleges and universities. They have learned to sing, to engage in organization work and to meet the public.

Midland high school's 1938 graduates have much on which to congratulate.

An inventor has discovered that friction can be used as a substitute for domestic fuel. Now why doesn't somebody discover a substitute for domestic friction?

Uruguay is one nation in a million these days. The sign on that country's consulate in Philadelphia was stolen a while ago, and nobody has been able to find a reason for it yet.

A factory in California burned down the other day while two women monopolized a telephone line that should have been used for calling the fire department. That makes one factory and a large assortment of ears that were burning at the time.

Hitler's safe in allowing the notes of the Liberty Bell to be heard in a coming symphony concert. He knows nobody'd recognize them by this time.

Cows escaped recently from a run-away freight train in Colorado, and the funny thing is that nobody thought of the obvious solution—the one hanging on the front of the engine.

Three artificial limbs have been stolen from a Philadelphia firm. Police are looking for three gents who are sorely in need of alibis, not having a leg to stand on.

An owl in Salt Lake City tangled with a power system and emerged quite whole, thereby doing considerably better than a few TVA officials.

Screens will be placed over the courthouse clock in Painesville, O., to keep the pigeons and starlings away. It seems the birds were like the ships of a well-run airline; always landing on time.

Two gunmen in Chicago kept shaking with laughter as they held up a store proprietor. That made three men of the scene who were shaking at the time.

Small Stockholders Need Organization to Protect Their Interests; Babson Points Out Reasons for His Business Optimism

By **ROGER W. BABSON.**
 (Copyright, 1938, Publishers Financial Bureau.)

BABSON PARK, Mass., May 21.—The average small stockholder is a sucker! He puts his money into the securities of companies about which he knows little or nothing. The information he receives is vague, incomplete, and meaningless. He has practically no voice in the company's affairs. Decisions are concentrated in the hands of an inside group of officials, bankers, and lawyers. Small stockholders need a union which would take its place beside the management's "luncheon club" and Labor Local No. 102. These stockholders should make their influence felt.

One of the major faults of the railroads today is absentee ownership. Banker and lawyer managements have run many roads into the ash heap. Stupid handling of labor problems has raised havoc with the carriers. Few of these directors would handle their own money as they have handled their stockholders' funds. The same is true of the directors of utility, motor, movie, food, and other mammoth concerns. We growl about graft in public places; but do the net results thereof exceed the huge salaries which have been paid in private places?

Few Bonquets for Stockholders.
 We need to hear a lot about how this and that "captain of industry" built his company. We saluted Mr. So-and-So because his company was a trail-blazer in scientific research. We never heard, however, about the thousands of John Q. Stockholders who owned the corporation. It was their money which paid the huge advertising bills. It was their money that financed the research laboratories. Often the only bouquet these stockholders receive is the corporation's annual report. It starts off every year as follows: "During the past year your company, etc., etc." Some stockholders actually believe the "your company" stuff.

It is too bad that the small stockholders do not make themselves more useful. They could do so if they would only be more obnoxious to the clique which runs the company. It is a shame that the thousands of little fellows cannot have militant representatives at the temples of the mighty. It is unfortunate that an investor's union with a real punch behind it cannot ask the president why he feels that he should receive a bigger annual salary than the average stockholder receives in his entire lifetime? The president may not be an inventor; he may not be an engineer; he may not be a salesman; he may not even be a particularly hard worker.

Commercial Research Council Formed By Regents of University of Texas

AUSTIN, Texas, May 21.—Formation of a council at the University of Texas to facilitate that institution's contribution to investigations leading toward the industrial and commercial development of the state, was announced today by the office of the Board of Regents here. This agency, to be known as the "Texas Industrial and Commercial Research Council of the University of Texas," is to weld the University's already existing research services into a unit that will permit their attacking "the state's problems from all essential angles."

The formation of this council was approved by the Board of Regents, and a special committee of the board, composed of George D. Morgan, of San Angelo, chairman; Madison J. R. Prater, of Houston, and H. J. Litcher Stark of Orange, was appointed to collaborate with the council in carrying out its objectives.

The statement read as follows: "The Board of Regents of the University of Texas realizes that the loss of foreign markets for cotton, the continued threat of surplus production of Texas major raw materials, the large, and increasing numbers of unemployed, the continued waste of one of its greatest industrial resources—natural gas—have created emergency problems which require prompt attention. The situation demands a vigorous, scientific industrial development program based on Texas mineral, power, and other resources and the use of Texas surplus agricultural products as raw materials.

"In order that the university may make its maximum contribution to the state in the development of this program the board has combined four of its state-wide research agencies, which the state has previously created to deal with such problems, into an association entitled: The Texas Industrial and Commercial Research Council of the University of Texas. The council is composed at present of the bureaus of Business Research, Economic Geology, Engineering Research, and Industrial Chemistry.

"These bureaus are not new; indeed, their constructive research is well known. The council is to serve as a 'clearing house' in the formation of an enlarged, coordinated program to enable them to attack the state's problems from all essential angles.

"Activities of the Bureau of Business

ASK FOR BANNER PRODUCTS AT YOUR GROCER'S

statistical data are well known. Economic Geology is the oldest of the four bureaus. The value of its work to the state in connection with the oil and gas industries, its discovery of potash deposits, the location of other valuable minerals, and the analysis of the geologic formations of Texas is generally recognized.

"The Bureau of Engineering Research is investigating new ways of utilizing the state's reserves of lignite, and in applying refrigeration to perishable products such as fruits, meat products and in air conditioning as applied to homes. It is now determining the extent of utilizing the state's reserves of lignite, and in applying refrigeration to perishable products such as fruits, meat products and in air conditioning as applied to homes. It is now determining the extent of utilizing the state's reserves of lignite, and in applying refrigeration to perishable products such as fruits, meat products and in air conditioning as applied to homes.

"Industrial chemistry is pushing its work rapidly on the problem of making acetylene from natural gas. Acetylene is usable in large quantities for making rubber and other plastics. Hence the solution of this problem will immediately change the status of a waste material to that of a valuable material. The same thing should be done with petroleum; it should be devoted to better uses than merely the serving as a fuel. Cotton and other products of the farm and ranch, clays and other minerals, all are usable for high class products.

"It is planned by the Board of Regents to give these bureaus all possible aid to extend the work in their respective fields, and especially in the development of definitely coordinated work for which other state agencies are not already available.

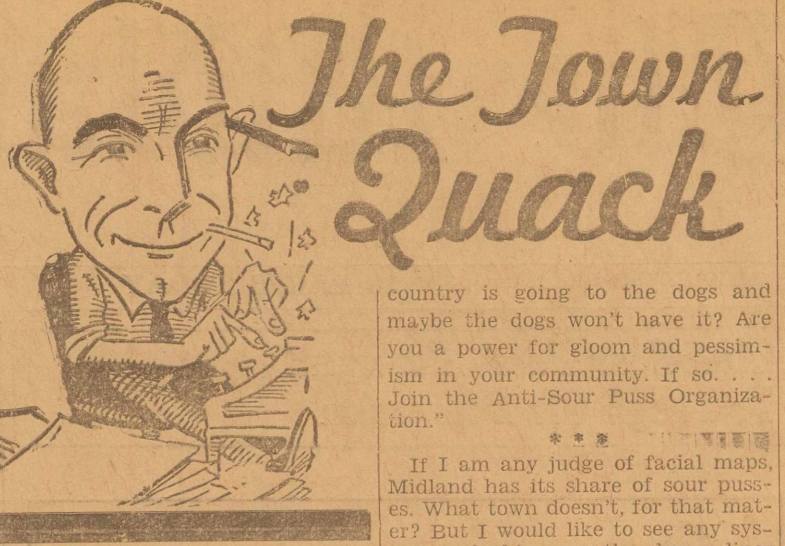

"Inasmuch as any substantial enlargement of economic enterprises in Texas must come through industrialization in the state, careful consideration must be given those industries for the expansion of which Texas possesses outstanding advantages. Endowed with vast supplies of fuels in the form of petroleum, natural gas, and lignite, possessing enormous supplies of a wide range of non-metallic materials, capable of producing in large volume cellulose materials, vegetable oils, and the like, favorably situated with regard to low-cost ocean transportation, Texas constitutes the one important section capable of expanding the industrial frontier of the nation.

"These considerations move the Board of Regents to go as far as possible in putting the facilities of the University of Texas at the service of the state for the purpose of finding solutions to its problems that are definitely related to the expansion of the industry and commerce of the state. Cooperation of all agencies within the state interested in planning and developing the program suggested is earnestly sought."

Homestead Staked Out On Newly-Formed Isle

WAYZATA, Minn. (U.P.)—E. M. Patch of Wayzata is probably the only man in his county who hopes the receding waters of Lake Minnetonka will never come back. Patch has discovered the site for a new home in the middle of the lake. A three-acre island has emerged from the old lake bottom. He has staked out a claim on it, fenced it in and posted "keep off" signs.

Patch is not particularly worried about the fact that the state put an end to homesteading 10

The Town Quack

I guess you have noticed something about the organization in Pittsburgh, Pa., of the Anti-Sour Puss organization. The membership card bears a picture of a cat on which the most sublime expression reposes. They ask you: "Do you go around frowning on things in general? Do you think the country is going to the dogs and maybe the dogs won't have it? Are you a power for gloom and pessimism in your community. If so. . . Join the Anti-Sour Puss Organization."

If I am any judge of facial maps, Midland has its share of sour pussers. What town doesn't for that matter? But I would like to see any system worked to erase the gloomy lines from the faces of pessimists and replace them with the alley-cat grins of optimists.

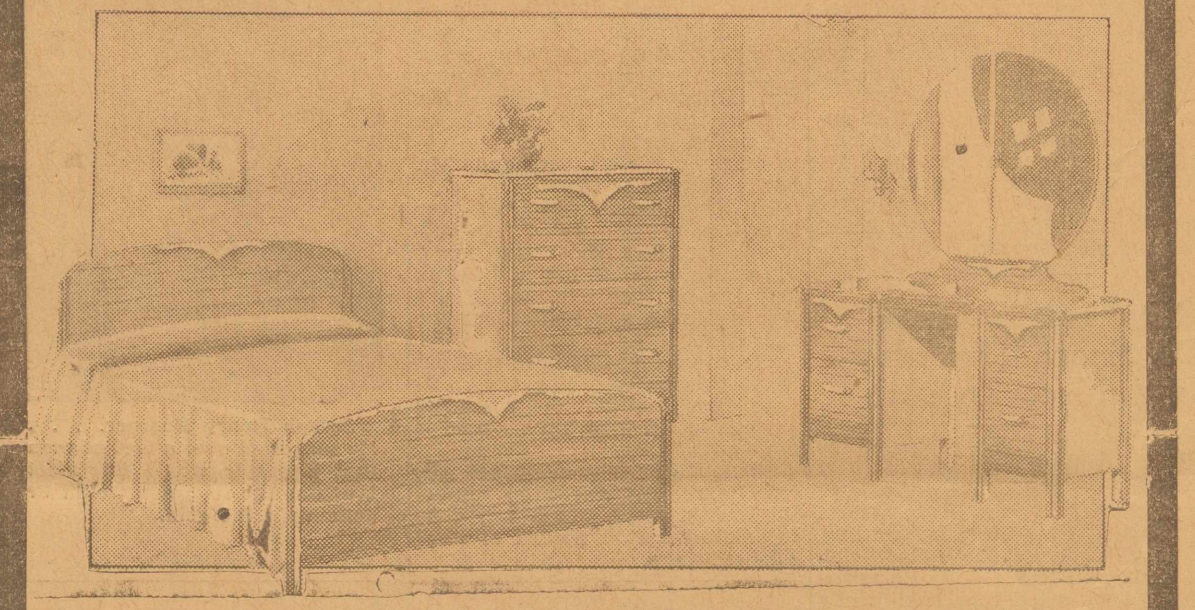

One Midland man said recently he believed he would open up a hardware business here and sell nothing but chisels. He saw a great opening to supply the local demand. But the chisellers and pessimists should quit knocking and go to hammering, hammering away at what it takes to keep Midland on top. Not a town in the west has the inspiration for doing things that Midland has, so why take the sour puss attitude?

There must be a little discord somewhere else in the world, because Secretary Morgenthau, of the U. S. treasury, is quoted as saying:

"I don't think we can get anywhere fighting each other."
 It was interesting about the Australian girl who swallowed a door key. She didn't even develop lock-jaw.
 How's your grammar? (I don't mean your grand-ma, I mean your literary phraseology). A lot of words are hard to put in the plural. For instance a man didn't know the plural for mongoose when he wanted to order a couple of them.
 He wrote to a dealer: "Sir, please send me two mongees."
 He did not like the looks of this, tore up the paper, and began again: "Sir, please send me two mongoses."
 This version did not satisfy him any better than the first, so he wrote: "Sir, please send me a mongoose, and, by the way, send me another."

June Wedding Scheduled for Miss Margaret Miles, Johnny Starr

Announcement of Approaching Nuptials Made at Triple-Hostess Coffee Friday Morning at the Frank Cowden Home

Announcement of the engagement and approaching marriage on June 10 of Miss Margaret Miles and Johnny Starr of Seagraves set the stage for pre-nuptial parties which will occupy a number of Midland girls during early June.

Announcement of the engagement was made at a 10 o'clock coffee for which Mrs. Frank Cowden, Mrs. Ellis Cowden, and Mrs. Hugh West were hostesses at the Frank Cowden home, 104 South G street, Friday morning.

Mrs. Alf Reese presided at the bride's book.

Mrs. Frank Miller was at the piano during the morning.

White, tradition favorite of brides, was stressed throughout appointments for the affair. In the living room, white stocks were used in floral arrangements, with white daisies employed in the sunroom.

The daisies and stocks were combined in a huge bouquet for the coffee table where Mrs. Don Oliver presided at the coffee service.

Assisting in the dining room were Mmes. Ben Black, William Blevins, E. I. Bailey, Louis Thomas.

Climaxing the morning, Dorothy Sue Miles, sister of the honoree, passed among the guests a silver tray of tiny white scrolls. When these were distributed and opened they were found to bear the following message in gold lettering: "Spooks and Johnny, June 10."

The invitation list included: The honoree, Mmes. Joe Crump, Hugh Corrigan, Bob Martin, Foy Proctor, Geo. McEntire Jr., Don Oliver, Ben Black, Barron Kidd, William Blevins, E. I. Bailey, Louis Thomas, Alf Reese Jr., Frank Miller, T. L. Speed, Jack Wilkinson, Ralph Gessler, Miss Lucile Thomas, Mmes. Tom Sealy, J. M. Speed Jr., H. L. Straughan Jr.,

Miss Helen Fasken, Mrs. Nancy Stevens, Miss Mary Maude Sparks, Miss Georgia Goss, Mrs. W. M. Holmes, Miss Lily Freeman, Mmes. Wade Heath, Clarence Scharbauer, Clyde Cowden, C. M. Goldsmith, Joe Youngblood, J. M. Caldwell, Oran Collins, Holt Jewell, Chapel Davis, Hugh Barnes, Fisher Pollard.

Mmes. Spence Jewell, Myrl Jewell, Hal Peck, Audie Francis, Elbert Cowden, J. O. Nobles, Marvin Ulmer, Geo. Ruffin, Ois Dublin Haynes, Addison Wadley, R. L. Miller, J. M. Speed, Andrew Fasken, Tom Nance, W. P. Knight, John Dublin, Mmes. Johnson Phillips, Roy Parks, Steve Hazlip, Dick Cowden, Geo. Phillips, O. B. Holt, George Glass, Dorothy Sue Miles, Mrs. Hayden, Miles, Mary Sue Cowden.

Trio of Clubs Entertains for Girl Scout Group

Forty-two girls were present for the picnic at Cloverdale Thursday afternoon which was sponsored by the Junior Woman's Wednesday club, the Delphian chapter, and the Modern Study club as the Girl Scouts' last meeting for the year.

Games were played and the girls went swimming in the park pool.

A picnic supper was served to the group by Miss Lucile Thomas, Miss Helen Fasken, Mmes. John W. Skinner, Preston F. Bridgewater, Thomas Lee Speed, Geo. Grant, W. L. Simmons.

Gold attendance stars for being present at every meeting during the year were won by three Girl Scouts, Joanna Bond, Lou Nell Hudson, and Margaret Mims. Silver stars, given to those who were absent from only one meeting during the year, were won by Myra Belle Lamb, Alberta Smith, Jimmie Katherine Kendrick, Marilyn Sidwell, and Liza Jane Lawrence.

A number of girls plan to attend Girl Scout camps this summer, according to Mrs. R. V. Lawrence, one of the sponsors, who said that ten or 12 girls expect to go to Camp Mary White in New Mexico and others to a camp in Texas.

Refreshments were served at the tea hour to the following members: Misses Whiteaker, Laverne Wright, Ward, Richters, Juanita Boyett, Ruth Tisdale, Maudine Richters, and the hostess.

The group will meet Friday of this week with Miss Ward, 403 E. Texas, at 2:30 o'clock in the afternoon.

Tapestry Sewing Club Names Officers

Meeting for organization at the home of Miss Juanita Bryant, 405 E. Illinois, the Tapestry Sewing club elected the following officers: President, Miss Bertie Mae Richters; secretary, Miss Inez Whiteaker; treasurer, Miss Betty Lou Ward.

Refreshments were served at the tea hour to the following members: Misses Whiteaker, Laverne Wright, Ward, Richters, Juanita Boyett, Ruth Tisdale, Maudine Richters, and the hostess.

The group will meet Friday of this week with Miss Ward, 403 E. Texas, at 2:30 o'clock in the afternoon.

Needlecraft club will meet with Mrs. N. E. Tanner, 1803 W. Wall, Thursday afternoon at 2:30 o'clock.

Thursday Sewing club will meet with Mrs. Herbert King at the usual hour Thursday afternoon.

Ace High club will meet with Mrs. Paul Nelson, 805 W. La., Thursday at the regular hour.

Midland county museum in the courthouse will be open Thursday afternoon from 2:30 until 5 o'clock. The public is invited.

FRIDAY. Belmont Bible class will meet with Mrs. J. L. Kelly, 501 North D street, Friday afternoon at 4 o'clock.

Tapestry Sewing club will meet with Miss Betty Lou Ward, 403 E. Texas, Friday afternoon at 2:30 o'clock.

Stitch and Chatter club will meet with Mrs. John L. Parker, 809 N. Weatherford, Friday afternoon at the usual hour.

SATURDAY. Story Hour will be held in the children's library at the courthouse Saturday morning at ten o'clock.

Two-Table Party Is Favor for Escondida Club

As a courtesy to the Escondida club, Mrs. Peck Cunningham was hostess to a bridge party at her home, 1007 W. Missouri, Friday afternoon.

Two tables were appointed for bridge in the party rooms to which roses and larkspur lent seasonal color and fragrance.

Award for high score among club members went to Mrs. D. H. Griffith and high for guests to Mrs. R. C. Crabb, while Mrs. J. L. Greene held high cut.

Playing were the following club members: Mmes. Harry Adams, Butler Hurley, Griffith, S. S. Stinson, J. R. Norris, O. L. Wood.

At the close of the games, a coffee plate was served by the hostess to the six members named and the two guests, Mrs. Crabb and Mrs. Greene.

Feminine Suspenders. Suspenders will keep your tailored skirts from sagging. The hemline of any skirt, no matter how well it is made, is apt to droop after

Texas College of Mines Beauties

These three Texas Mines beauties were chosen by George Petty, Esquire artist, as the most beautiful co-eds in the college in a contest sponsored by The Flowsheet, college yearbook.

Mrs. Hamilton Wins City Tournament of Feminine Golfers

Finals in the city golf tournament, sponsored by the Women's Golf Association, were played on the Country Club links Friday.

Mrs. R. W. Hamilton was medalist and was awarded a prize of half a dozen golf balls. She was also first in the championship flight, receiving a bottle of Orange Petal perfume as award. Mrs. Rachel Hornbeck, runner-up, was awarded a white metal flower stand.

Mrs. W. B. Harkrider, consolation winner, received a horsecoat.

In the first flight, Mrs. J. L. Rush won first place and was awarded an Air-o-plane overnight bag. Mrs. Hall Edwards, runner-up, received a white linen purse. Mrs. A. E. Horst, consolation, was awarded two pairs of hose.

The usual Friday luncheon was held at the clubhouse with Mrs. Paul Oles and Mrs. W. H. Street as hostesses.

Present were: Mmes. J. L. Rush, R. W. Hamilton, Edward Culbertson, Paul Oles, R. E. Porterfield, Hall Edwards, R. T. Mabley, Harvey Hardison, W. H. Street, W. B. Harkrider, E. B. Dozier, Dalas Dale, F. A. Stacy.

All members of the Association were urged to attend the tournament at Big Spring which opens Wednesday, May 25, and continues through the following Saturday.

Pastime Club Chooses Officers In Meeting Friday

New officers were chosen for the coming year by the Pastime club in a business meeting for which Mrs. May Young was hostess at the home of Mrs. J. T. Weathered Sr. Friday afternoon. Mrs. J. T. Weathered Jr. was named president of the group. Mrs. Jimmie Sheen was elected secretary - treasurer. Mrs. C. C. Harris was chosen reporter.

It was decided that the club should henceforth meet every two weeks instead of every week as heretofore.

Plans were made for a picnic at Cloverdale Friday evening.

Present were: Mmes. Weathered Sr., Weathered Jr., W. L. Coody, Harris, Sheen, J. E. Miller, M. A. Young, L. C. Brewer, and the hostess.

Junior High Faculty Honored At Twilight Tea Friday Evening

Honoring faculty members of junior high school, their husbands, wives, and sweethearts, along with Supt. W. W. Lackey and Principal D. D. Shifflett, Mrs. Fred Wemple and Mrs. J. M. Haygood entertained with a twilight tea Friday evening at 6:30 o'clock at the Haygood home, 708 W. Kansas.

Guests were greeted at the door by Joe Haygood Jr. and Allen Wemple, who are graduates of the junior high school this year, and were welcomed by the hostesses and their husbands.

Each caller was presented with a corsage or boutonniere of pink and white asters.

Asters and roses were used throughout the entertaining rooms.

Edith Wemple presided at the pink-and-silver punch table which was spread with madeira and lace cloth. Pink and white asters were table flowers and pink candles burned in silver candelabra.

Faculty members of the Junior High school include: Principal R. C. Fagg, Mmes. Harry Tolbert, Geo. H. Phillippus, Byron Standefer, Misses Mary Lowry, Louise Latham, Frances Farnham, Eloise Norman, Jessie Scott, Faye Hogue, Al-lene Alverson, Annie Frank Stout, L. M. Freels, W. E. Weathers.

Three visitors, Mmes. Leon Arnett, Lulla Pealer, and J. W. Pace, were present in addition to 11 members.

Attending from the class were: Mmes. J. M. King, J. L. Kelly, W. L. Fickett, W. G. Attaway, W. J. Stewart Jr., R. L. Stewart, G. B. Taylor, H. R. Braezeale, R. Chanslor, Herbert King, and the hostess.

The class will meet Friday with Mrs. J. L. Kelly, 501 North D street, at 4 o'clock. Memory verse will be Titus 1:12.

Mrs. D. H. Bonner and Mrs. J. H. Trickey entertained their classes of

6:15 p. m. Training union. Dick Denham, director.

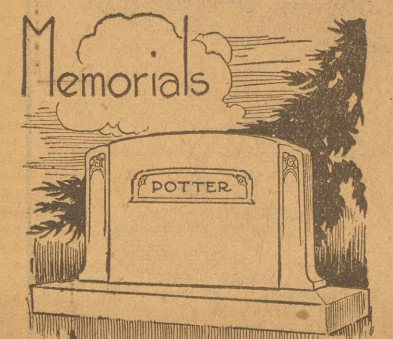

8:00 p. m. Evening worship. Mr. Bonner will again preach.

SOUTH SIDE

CHURCH OF CHRIST

Corner of South Colorado and California Streets

10:30 a. m. Song service.

A memorial selected hurriedly may prove short lived in the satisfaction it affords. May we show you the many suggestions our service department has available, or monuments we have so satisfactorily designed for others? No obligation entailed; we merely invite you to consider. We also landscape the lot and give two nice evergreens with each sale. Rock of Ages, Georgia, Carolina and Texas granite.

HOLINESS TABERNACLE

(Pentecostal)

Pastor O. W. Roberts

10:00 a. m. Sunday school.

11:00 a. m. Preaching service.

7:45 p. m. Wednesday, Prayer meeting.

7:30 p. m. Evening service.

ST. GEORGE'S CHURCH

John J. O'Connell, O. M. I. Pastor

7:30 a. m. Holy Communion.

8:00 a. m. Mass for Mexican people.

10:00 a. m. High mass. (English speaking).

GRACE LUTHERAN CHURCH

T. H. Graalman, Pastor.

Services are held every second and fourth Sunday at the Midland Episcopal Church at 2:00 p. m. You are cordially invited to attend.

CHRISTIAN SCIENCE SERVICES

"Soul and Body" is the subject of the Lesson-Sermon which will be read in all churches of Christ, Scientist, on Sunday, May 22.

The Golden Text is: "Why art thou cast down, O my soul? and why art thou disquieted within me? hope thou in God; for I shall yet praise him, who is the heart of my countenance, and my God" (Psalms 42: 11).

Among the citations which comprise the Lesson-Sermon is the following from the Bible: "Know ye not that ye are the temple of God, and that the Spirit of God dwelleth in you?" (I Corinthians 3:16).

The Lesson-Sermon also includes the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy:

"To divest thought of false trusts and material evidences in order that the spiritual facts of being may appear—this is the great attainment by means of which we shall sweep away the false and give place to the true. Thus we may establish in truth the temple, or body, whose builder and maker is God" (page 428).

FIRST CHRISTIAN CHURCH

John E. Pickering, Pastor.

H. G. Bedford, Supt. of Bible School.

Mrs. M. A. Park, Director of Music

9:45 a. m. Bible school.

10:20 a. m. Holy Communion.

11:00 a. m. There will be no 11 o'clock worship services at the church as the baccalaureate sermon will be preached at that hour at the high school auditorium.

5:00 p. m. Junior Endeavor.

7:00 p. m. Intermediate and Senior Endeavors.

8:00 p. m. Evening service. The pastor will preach on the subject, "Greatness Through Service."

3:30 p. m. Monday. Rijnhart circle at the church.

8:00 p. m. Wednesday, Choir practice.

Note: Bible school classes will convene for lessons promptly at 9:45 so as to be dismissed for the communion service at 10:20.

CHURCH OF CHRIST

Harvey Childers, Minister

800 West Tennessee

9:45 a. m. Preaching service. Bible classes will be omitted in order that the regular preaching service may be held and dismissed in time for the congregation to attend the baccalaureate sermon at the high school auditorium.

7:15 p. m. Young People's class.

8:00 p. m. Evening service.

8:00 p. m. Monday, Men's Bible class.

2:00 p. m. Tuesday, Women's Bible class.

8:00 p. m. Wednesday, Prayer meeting.

At The Library

At The Library.

Hello America! Radio adventures in Europe, by Cesar Saerchinger.

The first permanent European radio representative writes in an intimate fashion of the notables he has introduced to the world. Among these are Baldwin, the Pope, Gandhi, Shaw, Chesterton, Dolfuss, Amelia Earhart, Halle Selassie and many others. Each is an episode, glamorous and romantic, that can happen only once. He also describes European broadcasting, radio propaganda. There are many illustrations.

John of the Mountains, by Linnie Marsh Wolfe: These "Unpublished Journals of John Muir," written only for himself and his intimate friends, reveal the humor, the simple human interests, the powers of description and the philosophy of America's greatest naturalist. They are the result of forty-two years (1869-1911) of travel, research and keen observation. Illustrated with unpublished sketches done by Muir.

Revolt on the Border, by Stanley Vestal: The story of the Santa Fe Trail and the dangers that lay at the end of it in 1846—the most dramatic one in its history. Against a background of war and conspiracy move the vivid figures of Gen. Kearny, of William Bent, of moun-

tain men, Indians, Mexicans, and of Americans. The story is one of romance and adventure, faithful to historical fact, and accurate in its detailed presentation of the New Mexican sense as it was a century ago.

I See a Wondrous Land, by Gudmundur Kamban: A novel of Iceland and Greenland in the tenth century, written by an Icelander. It is based on the sagas, and the main story is one of adventure and colonizing across the seas—first in Greenland, then in Labrador, Erie the Red, discoverer of Greenland, and his son Lief the Lucky, are the chief characters, but a host of others appear in the story.

Memorial Shelf:

Midland Library Association, in memory of Mr. W. L. Holmsley, Trustee, 1925-1935; Joseph in Egypt, by Thomas Mann (2 volumes).

Midland Library Association in memory of Mr. J. M. Caldwell, Trustee, 1903-1935; The Birds of America, by John James Audubon.

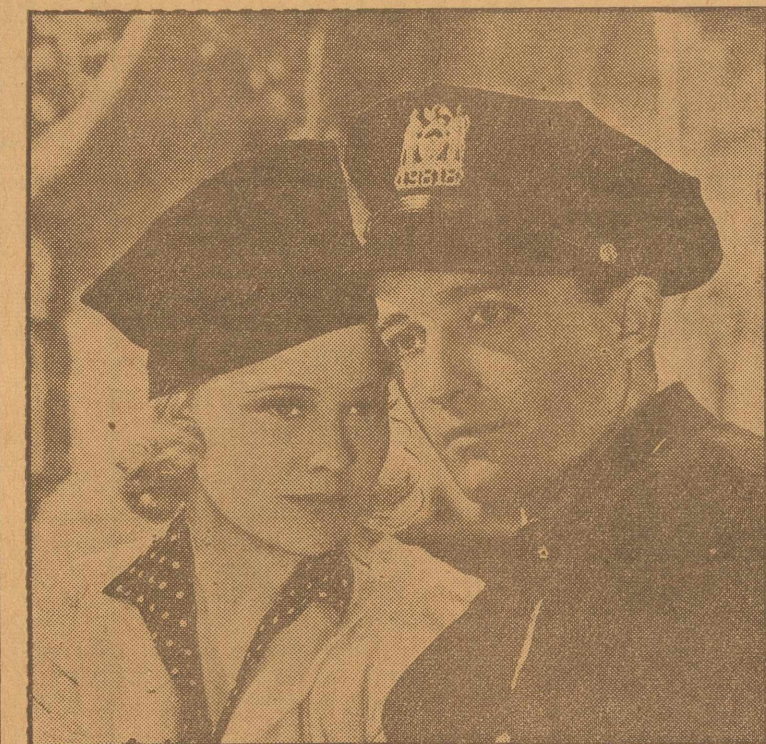

Books taken from the rent shelf and placed on the seven-day shelf:

Ayres, Living Apart; Carfrae, And More Also; Carroll, Neighbor to the Sky; Feuchtwanger, Pretender; Grey, West of the Pecos; Hicks Beach, A Cardinal of the Medici; Horgan, A Lamp on the Plains; Kantor, The Romance of Rosy Ridge; Lawrence, The Sound of Running Feet; Lutz, Sunrise; Ostensio, The Stone Field; Pedler, Flame in the Wind; Remarque, Three Comrades; Sabatini, The Lost King; Wells, Why Edward Went.

Books taken from the rent shelf and placed on the two-week shelf:

Alda, Men, Women and Tenors; Buchan, Augustus; Coward, Present Indicative; Crow, Four Hundred Million Customers; Day, Life With Mother; Dennis, Coronation Commentary; Earhart, Last Flight; Field, This Life I've Loved; Harding, Golden Pleece; Ludwig, The Nile; Lylys, Assignment in Utopia; Morton, A Woman Surgeon; Mowrer, Journalist's Wife; Roosevelt, This is my Story; Sackville-West, Pepita; Skinner, "Excuse It, Please!"; and Wells, Blood on the Moon.

Heart Trouble

Dr. Crosby is a crooning physician who masquerades as a policeman only to lose his heart on his first assignment. In "Doctor Rhythm," the new musical comedy, which opens today at the Yucca theatre, Pearl-blonded Mary Carlisle is his romantic interest, while Beatrice Lillie is also cast.

Cooling Power Of Sun Spots Called Great

MINNEAPOLIS, (U.P.)—Sun spots are the best refrigerator known to man, and they work on the same principal as man-made refrigerators, according to Prof. John W. Evans, acting chairman of the University of Minnesota astronomy department.

He explained that "the heated gas expands and cools the atmosphere. While the temperature of the sun is 10,800 degrees Fahrenheit, the center of this whirlpool is only 7,200 degrees. The sun spot could make an object taken from the sun's atmosphere 3,600 degrees cooler."

Magnetic storms seem to correlate closely with the appearance of sun spots, he said. The aurora borealis also apparently is correlated with sun spots crossing the sun. Experiments at the University of Arizona have proved that trees grow better at a maximum period of the sun spots, he said.

"Although the sun spots appear black," he said, "if all light from the sun were shut off, they would be too bright to look at. If an observer from another planet saw our tornadoes, they would appear similar to the sun spots, which travel at a rate of 150 miles a second."

The spots are so large—100,000 miles in diameter—that our earth could be dropped through the center "and it would be lost somewhere in the core," Evans said.

Crop Insurance to Vary in Expenses

COLLEGE STATION, (U.P.)—Crop insurance which will guarantee insured wheat growers three-fourths of an average crop in 1939 will vary in costs from an average of 7 bushels an acre for some counties to 2.6 bushels per acre in others, Geo. Slaughter, chairman of the Texas agricultural conservation committee, announced. The body meets at Texas A. & M. college.

For insurance that guarantees one half of an average crop the rate will vary from county averages of .1 bushel an acre to 1.6 bushels.

The county rates reflect the average an acre loss during the 19 years 1926-36. The premium an individual wheat grower will have to pay for insurance will depend half on the county rate and half upon

tain men, Indians, Mexicans, and of Americans. The story is one of romance and adventure, faithful to historical fact, and accurate in its detailed presentation of the New Mexican sense as it was a century ago.

I See a Wondrous Land, by Gudmundur Kamban: A novel of Iceland and Greenland in the tenth century, written by an Icelander. It is based on the sagas, and the main story is one of adventure and colonizing across the seas—first in Greenland, then in Labrador, Erie the Red, discoverer of Greenland, and his son Lief the Lucky, are the chief characters, but a host of others appear in the story.

Department Store Sales Holding Up

AUSTIN—Sales, measured in dollars, in Texas department stores, men's clothing stores, and women's specialty shops during April compared favorably with both the preceding month and the like month last year, the University of Texas bureau of business research has reported.

"This situation resulted partly from the fact that Easter fell in April this year whereas last year it came in March," the bureau's announcement said.

Reports to the bureau from 104 representative Texas retail establishments showed total sales 3.7 per cent above March and 2.9 per cent above April last year. Aggregate sales in these establishments during the first four months were 3 per cent above those of the corresponding period last year.

The tendency for the percentage of credit sales to increase and the percentage of collections to decline, which has been in progress for several months, continued during April, the report said.

Julius Caesar was very punctilious in regard to the management of his household, and once put his baker in irons for serving him with one kind of bread and his guests with another.

who suffered frequent and heavy losses, even though their average yields were the same."

The rates for individual farms that took part in the wheat adjustment programs will be available in the offices of the county agricultural agents and the county AAA committees, about which the county crop insurance program will center. The county committee will arrange for an appraisal of farms for which figures are not available.

The premium a farmer pays covers only the actual cost of the insurance. Administration costs and costs for storage of insurance reserves will be paid by the corporation. Premiums may be paid either in wheat or its cash equivalent.

J. E. Bishop, one of the sponsors of the move, has expressed belief that the new refuge would be the largest in the nation.

The state game and fish commission at Little Rock has endorsed the plan, and the federal government is expected to take action on setting aside the area for the preservation of wildlife.

The proposed refuge is located

Toronto Baby Of 27 Months Puffs on Pipe

TORONTO, (U.P.)—Alphonse Robert "Al" Alda, aged 27 months puffed meditatively on his briar pipe while his mother told an interviewer he had been smoking for nearly a year, and his ambition was to be an actor.

She said Al reached over and took his father's pipe and puffed on it about one year ago. "We let him do it, thinking if he became ill he would not show any further interest," she said, "but instead of becoming ill he apparently enjoyed it and took every opportunity to repeat the act."

"Finally we took him to a specialist in New York to ask how best to break him of the habit. The doctor said if he smoked in moderation it would not do him as much harm as the psychological effect of forbidding him might do. Since then we have bought him his own pipe, which he fills with tobacco and lights himself."

Smoking has not stunted the child's growth nor affected his strength.

"I can hardly believe his is so strong," his mother said. "Once we were playing and he accidentally hit me on the nose with his first. The blow broke my nose."

The child already has an amazing command of facial expressions.

Arkansas Area Marked For Vast Game Refuge

MENA, Ark. (U.P.)—A 96,000-acre game refuge, to be located north-west of Mena, probably will be created in the Ouachita national forest.

J. E. Bishop, one of the sponsors of the move, has expressed belief that the new refuge would be the largest in the nation.

The state game and fish commission at Little Rock has endorsed the plan, and the federal government is expected to take action on setting aside the area for the preservation of wildlife.

The proposed refuge is located

Prison Record Preferred To Bible Birth Listing

SALEM, Ore. (U.P.)—A birth record in a family Bible is considered just half as authentic as a prison record in determining a person's true age for a pension.

Two types of evidence may be submitted in Oregon to prove an applicant for a pension is 65 years of age or older. Under the first type of evidence only one form of proof is necessary, while under the second type of evidence two or more forms of evidence must be presented.

A prison record comes under the first type of evidence and a birth record in a family Bible is classed under the second type.

A single lightning flash during an electrical storm may release as many as 1,000,000 kilowatts of electrical power.

In the area where Scott, Yell and Montgomery, Ark., counties meet, it would include the present Mud-dy Creek refuge.

According to present plans, the new refuge would be known as the Ouachita refuge, and it would be under federal supervision.

Age Bias Costs Industry, Says Gov. Cross, 76

HARTFORD, Conn. (UP).—The oldest governor in the United States, Gov. Wilbur L. Cross, who recently observed his 76th birthday anniversary, believes industry would derive its greatest benefits by retaining employees over 40 years.

"Connecticut," he said, "still holds the view that there are places in our manufacturing industries for alert and able-bodied men and women far beyond the age of 40. This is a message which as governor of Connecticut I wish to broadcast to all parts of these United States."

King Solomon, he said, "a wise man of the East who ruled over Israel for 60 years, leading a happy life for the most time, saith that 'there is nothing new under the sun.' Certainly there is nothing new in the aspersions sometimes cast upon middle and old age. Officers of the army and navy and college professors in some institutions must retire at certain fixed ages. Judges of the Supreme Court of the United States have been encouraged by Congress to lay aside their robes of office at the age of 70 on the assurance that they shall receive their full salaries as long as they may live.

Argues There Is No Gauge.
"It has been said that in some countries citizens have been deprived, by law or custom, of their civil rights on their arrival at the

Summer Begins on the Airlanes

ICE CREAM NOW AIR FAVORITE

When the pilots and hostesses on the big transcontinental planes eagerly sample a luscious ice cream cake it is certain that the summer season has begun on the airlines. Ice cream is now being served as a regular feature of the cuisine on the speedy sky ships that comprise the nation's chief means of fast travel.

age of 60 and that in others they have been thrown from bridges into fast flowing streams to sink or swim as the case might be.

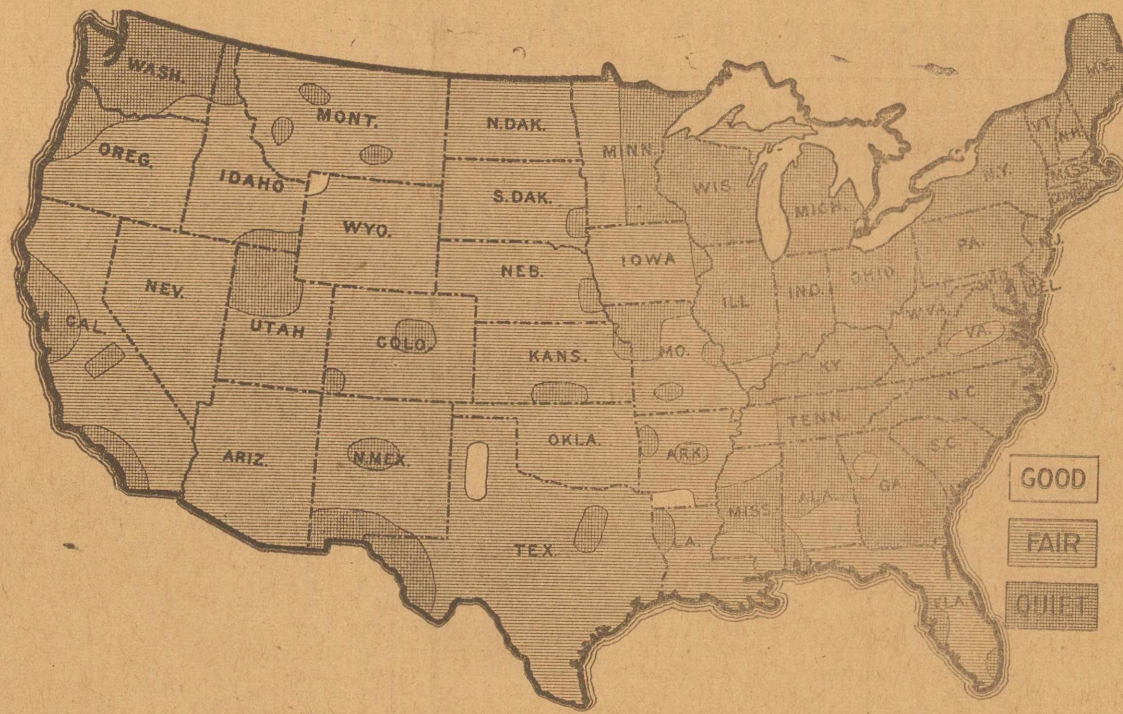

"The fact, of course, is that age cannot be measured by years. Into the question of age enter many biological factors. One may be old at 40. Another man may be young at 70. Gladstone, who was called in his time the Grand Old Man, had to the last the vigor and mental urge of a young man. After

years in Parliament for 60 years he again became prime minister and ruled the British Empire. He was then 33. What is true of those who climb the heights is also true for all in the humblest walks of life.

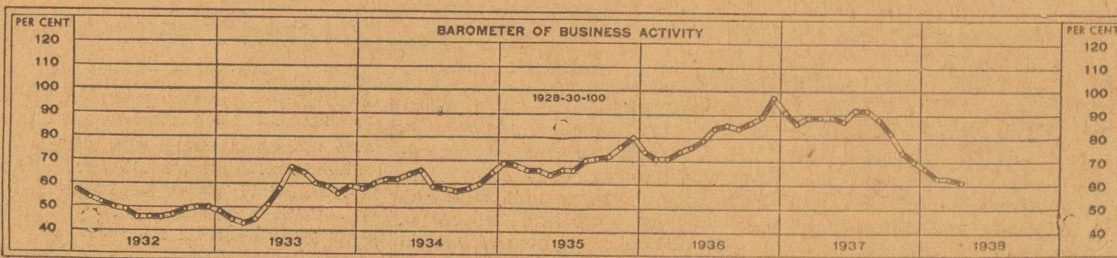

"It must, however, be conceded that men young in years may exert a physical force denied to their elders. It is dangerous, for example, for a man much above 50 to try a running jump over a rail fence four or five feet high. Nor is a prize fighter well on in the 40's likely to win a championship. But rail jumpers and prize fighters are not necessary to the success of manufacturing industry. Success is dependent upon faithful workers, competent to do the task assigned to them in a large corporate body under the direction of the ablest executives available."

Lays Stress on Skill.
The older and experienced workers, the governor said, "build the machines, they run the machines, they supervise the work and they see to it that the output is kept up to the standard. It is the business of many of them to catch defective work early in the manufacturing process, thereby preventing spoilage of material and inevitable waste that comes from inefficient labor, and from damage to me-

Business "Fair" Throughout Western States

This map represents business conditions as of May 1, 1938, as shown in "Nation's Business", official publication of the United States Chamber of Commerce.

White spots are negligible in the monthly map of business conditions for May 1, published by The Nation's Business, but most of the middle west and the western states reflect "fair" conditions for the period. Interest in the map, with the advance of the season, seems to be concentrating on the areas of surplus crop production, the magazine comments. On the barometer, a small dip in the chart line indicates a trend toward slightly lower levels.

Thrifty Farm Co-Op Owes Existence In Texas to Crop Disaster in 1904

DANEVANG, Tex. (UP).—Leaf-worms caused Danevang to become a co-operative community in 1904 and its 425 citizens have been prosperous ever since.

Miss Helgar Jensen, who teaches the community's children, says Danevang was established in 1894 by Danish immigrants from northern states and from Denmark. Danevang means "Danish Meadow."

They settled on an area of 24,000 acres, or 28 square miles, to carve a living from Wharton county soil. With exception of a few Germans, six of various nationalities, the population of Danevang is Danish.

For 10 years, the farmers were individualists. Then came the leaf-worm scourge, eating and destroying crops.

The Danevang people pooled their resources and bought poison to stamp out the infestation. The plan worked so well that they extended it to other economic phases of their lives.

Today, the community is co-operative. It operates a general store, two cotton gins, a fire insurance company, a telephone system, a welding and blacksmith shop, a community house and other enterprises.

Miss Jensen says Danevang's Ladies Aid society is typical of the community. Besides carrying on Danish Lutheran Missionary work, the society promotes pensions for aged preachers, cares for ex-sailors and repairs church property.

The Tyltven, or "Twelve," is Danevang's reading club, whose memberships are a sought-after honor. The club selects and orders books from Denmark yearly for circulation from one family to another until year-end, when they are sold to buy more books.

There are only three private enterprises within the 28 square miles—two groceries and a filling station. Danevangians make their living principally by raising cotton—6,808 bales in 1937.

Miss Jensen explained that the Danevang Farmers Co-operative society is both a buyer and seller. Members pay a \$10 membership fee and \$65 for working capital, which they may withdraw as any time.

Guiding farming affairs are seven directors, whose management in the last 16 years has reaped dividends totaling \$115,000. The cotton gin, built in 1927 for \$32,000, has paid for itself four-fold.

Residents preserve Old World customs. They have festivals at the community houses, sing Danish songs and attend square and folk dances. Children attend state schools in the winter and the community's Danish parochial school in the summer.

"We never start co-operative enterprises until we have plenty of capital," said Miss Jensen.

Swallowing His Specialty.
SPRINGFIELD, Mass. (UP).—Swallowing is the specialty of Michael Scliano, and admiring friends say his best feat consists of swallowing and open pen-knife. Articles he has swallowed include a 45-link auto chain, live goldfish, light bulbs, watches, golf balls and lighted cigarettes.

Medical Kits Looted.
SALINAS, Cal. (UP).—Six physicians here within one week, presumably by someone looking for narcotics.

Trains Cater to Camera Fans.
SAN FRANCISCO (UP). The latest de luxe equipment to be added to trains in the scenic west is camera enthusiasts.

183,000 Acre Game Preserve Located

CHANNING (P).—Hartley county has a game preserve covering 183,000 acres. County Agent J. S. Coleman announces.

Coleman began last October to get ranchers to establish demonstration game preserves in cooperation with the Texas extension service.

The first agreement was signed with the Beck ranch of 80,000 acres. Subsequently agreements were signed with the Coots ranch of 20,000 acres; the Stewart ranch of 4,000 and an agreement is being completed with the Price & Reinhold ranch of 9,000 acres. The E. C. Houghton ranch of 70,000 acres for a number of years has been a state game preserve under rules of the state game, fish and oyster commission.

Under the cooperative agreement, Coleman said, the rancher merely pledged himself to protect the game, and the extension service agrees to

furnish him with such birds, fish and animals as it can, and to help him establish methods and means that will encourage their propagation.

There are 200 golf clubs in the city of London alone. The sport ranks second in the number of regular playing members; lawn tennis being first in England.

A LOOK AND A RIDE AND YOU'LL AGREE...

HERE'S THE CAR OF THE YEAR!

Big, roomy, strikingly styled... today's brilliant De Luxe Ford V-8 brings still more of the "fine-car things" to buyers in the low-price field!

Built in Texas by Texas Workers

DE LUXE TUDOR SEDAN... 112-inch wheelbase, 123-inch springbase, 85 h.p. . . . Diagonal folding of front seat back gives easy access to rear . . . Luggage compartment reached from outside . . . Mobair or broadcloth upholstery.

YOU can tell at a glance that there's a different Ford V-8 this year. In beauty, no other car at any price is like it. But it's not until you ride in it that you know how different it is!

No low-priced car has ever been built to all-round standards as high as this one's.

The quiet, flexible "feel" of its engine is a typical V-8 advantage. A feel that only 8 cylinders can give.

Its interior is spacious. Partly because the body itself is big. Partly because its short V-8 engine and long springbase add to the passengers' share of total length.

In its rear seat the promise of a "front-seat ride" comes true. You sit well forward of the rear axle . . . Center-Poised where riding comfort is naturally at its best.

At the rear of every model is luggage space that's big . . . and opens from outside the car.

And with all its size, the car is fun to drive. Steering, shifting gears, braking . . . are next to effortless. Ford brakes act easily, stop smoothly . . . and have the safety advantage of steel from pedal to wheel.

Before you spend as much for any car . . . and certainly before you pay more . . . learn for yourself how sharply this De Luxe Ford car steps up the quality standards of low-cost motoring.

DELIVERED IN MIDLAND

\$843.35 EQUIPMENT INCLUDED

Gold Panned In Flood Silt.
 PASADENA, Cal. (U.P.)—Rains which caused the Los Angeles floods washed down so much silt from the mountains that it got the better of the curiosity of H. J. Bernard, veteran gold prospector. He began panning for gold in the silt along Colorado street. Now he is exhibiting flasks of gold that he panned within the city limits.

Jungle Monkeys Suffer Many Fractured Bones

CAMBRIDGE, Mass. (U.P.)—The jungle animals are beset with disease and injury, according to observations made by Harvard scientists on a recent field trip to Siam, Borneo and Sumatra. Their findings dispute the old theory that jungle animals live in a state of blissful health in nature and complicate the picture of natural selection in animal evolution. The expedition found that almost all gibbons, orang-utans and macaques in Borneo were infested with parasites. More than 10 per cent of the monkeys were found to have suffered serious bone fractures.

and at 7.575; saturation and porosity from 7.665-95 and from 7.710-15. Porosity was also logged from 7.909-25, but temperature survey showed decided heating effect there, making water in that zone probable. Several other horizons of saturation were shown on Schulmberger log, but these were not substantiated by cuttings. Operators said yesterday that casing will probably not be perforated until Friday. A special truck is coming from Houston for the perforating job.

Ray F. Rhodes, J. D. Tompkins et al No. 1 Emma Cowden, in southern Andrews, is drilling below 1,542 in red rock.

Atlantic No. 1 Texaco-University, in southwest Andrews north of the Goldsmith field in Ector, had drilled to 3,600 feet in anydrifite.

Large Jordan Oiler.

The Jordan pool of Crane-Ector added a large natural producer in Atlantic No. 4-A Utex. It flowed 906.28 barrels in six hours and 10 minutes to rate 24-hour potential of 3,527.16 barrels. Pay was topped at 3,390 and total depth is 3,558.

Also in the Jordan pool, Skelly No. -D University flowed 527 barrels a day, bottomed at 3,840, following 890-quart shot. It topped pay at 3,545.

Mid-Continent No. 2 Slatior, in the Goldsmith field, was completed for daily potential of 690.20 barrels after treating with 4,000 gallons of acid at 4,264 feet. Pay was topped at 4,240.

Feminine Fancies

One of those ingenious knick-knacks that increase the efficiency of milady's beauty efforts is the small compact containing circles of cloth wet with a cleaning lotion to be used in quick cleanups during the day. The busy business woman who must sometimes dash out to a club meeting or tea without time for an elaborate face washing should welcome these "one-minute" facials.

Another of the knick-knacks is the little package of lipstick tissues which comes in a folder faintly resembling a bill fold and equipped with its own mirror.

Speaking of facial cleaning brings us to the subject of wash cloths—traditionally white, or banded with colors. We noticed some recently that have woven over the surface a large floral design in subdued colors. Strangely enough, a kind of tapestry effect is achieved in the design, probably because of the texture of the cloth.

Corn-on-the-cob, about which we have sentimentalized at length on a former occasion, is the ultra-new note in china designs.

Believe it or not, a new creation in luncheon sets has a golden glaze background on which appear images of corn-on-the-cob in Indian summer colorings.

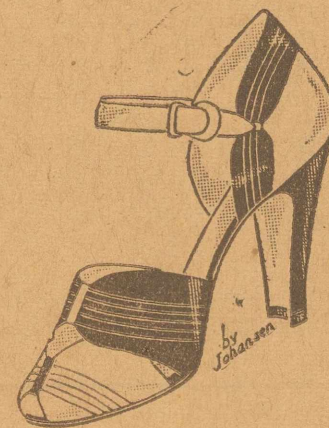

We don't know about the artistic merits of the designs but at least it should have the charm of a familiar American institution. Appeal to childhood memories and so on.

News notes in fashions: Flexible wood frames form tops for capeskin and crash linen bags; bengaline in white and pastels forms amusing "dwarf caps" such as those worn by Spowwhite's little friends and

Swing Time STRAPS

Gay festive sandals, with punched and perforated straps ingeniously patterned in linen, combined with calfskin, in colorful combinations of white, black, copper tan, Parisian blue, and pastel shades, as well as striped and flowered designs... created by Johansen to make this a smarter and gayer summer for you.

Wadley's

recommended for souls young enough and gay enough to don them; bengaline takes an encore in multi-hued short fitted coats well described as "Joseph's Jackets" to brighten summer costumes; chiffon in muted colors "goes to town" for the day time wear when the mercury soars in the thermometer.

Personal favorites: Tiptilted wide-brimmed linen hats; iced tea that is not too strong and not too weak; coffee that is about one-quarter real cream; rooms that look out on sunrises and sunsets; the smell of the air after a brief summer shower; orange juice plus salt (sure to bring down the censure of some bystander) and red-meated watermelon served ditto.

Wonder why so many of the new fashions are described in terms of food? Colors may be "raspberry ice" or "mint blue" or "fondant rose" or "ginger." Dresses are "iced" or "frosted" or "cooled" with their white trimmings.

Perhaps the copywriters, in their search for effective descriptions, are only using good psychology. Everybody likes delicious food, so why not describe pretty clothes in terms of it?

37 Million Seen In Tourist Trade

Up in Denver a motor travel bureau that checks up on its customers says that 366,000 of those customers will visit Texas during 1938 and will spend about \$37,000,000 while here. This is the Conoco Travel bureau, maintained by the Continental Oil company and directed by Joe H. Thompson, who bases his predictions on last year's records and on the tourist trend in the early months of this year.

Says Thompson, "The figures on Texas support the belief that this state is becoming more popular. According to present indications the number of visiting cars and motorists in 1938 will compare favorably with any earlier year."

"We estimate that motor tourists routed by our bureau will spend about \$9,000,000 in retail stores, \$8,000,000 in restaurants and other eating places, \$7,500,000 for gasoline, oil and other transportation costs and a similar amount for hotel accommodations and lodgings. About \$3,000,000 will go for amusements and \$2,000,000 for souvenirs and incidentals."

College Supplies Part For New Diesel Engine

YELLOW SPRINGS, O. (U.P.) — An important part of a new Diesel engine is supplied by the Antioch college foundry.

The college supplies the rotor, a sort of fan which blows air into the cylinders. It is made of aluminum alloy. The product is cast at the Aluminum Art Foundry, Inc., which was incorporated in connection with the college.

Morris M. Bean, young metallurgist and former assistant in the Antioch College research institute, is the manager.

Pollen grains have been found floating in the air during the spring season 13 miles from their flowering tree.

Stage Costume Stolen; Free Tickets as Reward

WORCESTER, Mass. (U.P.) — Ruth Mayall of Oxford is wondering what use thieves will make of articles they stole from her automobile.

The loot included: a black velvet bodice; a bolero jacket; two shirts, such as are worn by Venetian gondoliers; notebooks, and eyeglasses.

The bodice, jacket, shirts and notebooks were for use in connection with the Worcester County Light Opera Club's production of "The Gondoliers."

Miss Mayall offered the culprits two free tickets to the show in exchange for the loot.

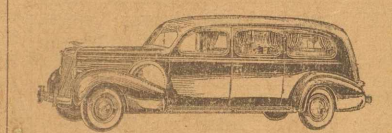

Fair Boycott Threatened.

ORLAND, Cal. (U.P.) — The Orland grange has just put San Francisco on the spot. It has voted against the use of any county funds

for an exhibit at the Golden Gate International Exposition in 1939 unless San Francisco and neighboring bay cities show a better spirit of co-operation in checking alleged labor racketeering.

Preaches Commencement Sermon

Dr. Lee R. Scarborough, president of Southwestern Baptist Theological Seminary at Fort Worth and brother of W. F. Scarborough, Midland ranchman, will preach the commencement sermon at 11 o'clock this morning, at the high school auditorium, to the 1938 graduating class of Midland high school.

Religious Leader Who Preaches Sermon to Graduates This Morning Needs No Formal Introduction Here; Holds Many Contacts

Dr. Lee R. Scarborough, president of the Southwestern Baptist Theological Seminary at Fort Worth, who will preach the commencement sermon to 1938 graduates at the high school auditorium at 11 o'clock this morning, needs practically no introduction to citizens of Midland.

It has long been his custom to visit his brother at the Andrews and Winkler county ranches, and at the Scarborough home on South Main street, when a few days of rest could be scheduled.

At the annual meeting of the Southern Baptist Convention, held last week at Richmond, Va., Dr. Scarborough was the unanimous choice for the presidency of the vast south-wide body.

As head of the Seminary at Ft. Worth since its establishment, he has been a guiding influence in the education and training of pastors, evangelists, home and foreign missionaries, evangelistic singers and others engaged in the advancement of Christianity.

Aviation Lures Rickenbacker's Niece, Co-Ed, 18

COLUMBUS, O. (UP).—Marian Pflaum, 18-year-old niece of Eddie Rickenbacker, famous World War ace, has taken the step which may bring aviation renown to another generation of that famous family.

Marian lives at the Rickenbacker home here which Eddie left to enter the World War and to which he returned nearly 20 years ago to be acclaimed as America's foremost air hero.

Marian began her flying lessons four months ago. Currently she is a member of the Ohio State University Flying club, the National Inter-Collegiate Flying club and the National Aeronautics association.

A freshman at the university, she expects to do her first solo flight shortly. Her parent has no qualms about the flying instructions, since, as Rickenbacker encourages her flying ambitions.

Woman Eulogized After Death at 97

MARFA, Texas. (AP).—Mrs. John A. Pool, oldest resident of Presidio county, who died recently at the age of 97, was the best known woman in this region because of her assistance for many years to the sick and needy in this area.

Mrs. Pool and her husband, who died in 1930, used to ride white horses at the annual Highland Fair here. The pioneer couple worked closely together throughout their married life and Marfa helped Mrs. Pool observe her birthday each year.

Born in Kentucky, her family moved to Missouri when she was a girl. There she saw the men and boys go off to the Civil War and at its end she was married to John Pool who served with Quantrell's band. On account of poor health, Pool brought his wife to Coleman county, Texas, but in 1885 the family moved by wagon to Marfa.

Marian puts it, "Uncle Eddie got them over that." Rickenbacker encourages her flying ambitions.

A cowboy sings his favorite melody. The hustling Colorado River is heard and the cowboy continues his song. On the return trip someone plays a music box. When the party nears the rim of the canyon the donkeys walk faster and faster. A farewell "hee-haw" is heard, "PRINCESS OF INDIA"—OVERTURE KING, "STARS AND STRIPES FOREVER"—MARCH—SOUSA

DR. SCARBOROUGH TO ADDRESS CLASS

Final graduation events of the 1938 class of Midland High School will be held this week, beginning with the commencement sermon this morning at 11 o'clock, with Dr. Lee R. Scarborough, president of the Southwestern Baptist Theological Seminary at Fort Worth, as speaker, and culminated with the graduating exercises Thursday night, at which time Dr. J. N. R. Score, pastor of the First Methodist church of Fort Worth, will deliver the literary address.

Speaks Thursday

Examinations were completed last week and the sixty-six members of the class will give full attention to the business of graduating during this week. A busy program of activities at the high school auditorium will be open to the public. Sermon Today. The program this morning, featured by Dr. Scarborough's sermon, "Youth's Climb to Its Best," is receiving the cooperation of several churches of the city, the pastors and congregations joining the union services at the high school. The detailed program appears on this page. Seniors will be attired in caps and gowns and will make an impressive processional down the aisle, occupying front seats of the auditorium.

Thursday Speaker Is Highly Recommended To Midland Hearers

Dr. J. N. R. Score, who will deliver the literary address to high school graduates Thursday evening at the final exercises, comes to Midland highly recommended as a preacher and as an inspirational and forceful speaker.

Pastor of the First Methodist church of Fort Worth for the past four years, he has held important posts in his denomination. At the last general conference of Methodist churches, he received a substantial vote for bishop. Being a young man and one of the great preachers, he will "no doubt" be made a bishop later, in the opinion of the Rev. W. C. Hinds, Midland Methodist pastor.

The Rev. Hinds says this city, or any city, will not be disappointed with J. N. R. Score. "Young and old alike will be privileged to hear an address long to be remembered," the Midland pastor said, referring to the Thursday speaking engagement.

Clubs, churches and various organizations are calling on Dr. Score for his services at all times. In Fort Worth, Dr. Score is an active worker, is a fisherman, golfer and all-round sportsman and is active in the "Dad's Club" of McLain Junior high school. He received his academic degree at Southwestern University and holds degrees of D. D. and Ph.D. received in outstanding universities.

It was through the influence of Mark Magee, prominent Fort Worth attorney and a steward in Dr. Score's church, that the engagement for Thursday night was arranged. Dr. Score also will address the Midland Rotary club Thursday noon. Odessa Rotarians also having been invited to participate in the meeting.

Subject for Dr. Score's address to the graduating class, to which the public is invited, will be "Is There a Place for Young People in This Modern World?"

First Sheep Owner In Crockett Is 81

OZONA, Texas. (AP).—C. C. Doty, who brought the first flock of sheep to Crockett county in 1880, and refused to be "frightened" out by the cattlemen recently observed his 81st birthday.

One of the organizers of Schleicher county, now one of the leading sheep growing sections of the southwest, Doty founded the town of Christoval in southern Tom Green county and served as first postmaster.

MIDLAND HIGH SCHOOL BAND FAR CRY FROM ONE ORGANIZED FIRST IN 1921

The Midland high school band of 1938, with approximately 60 members, is a far cry from the first one organized in the school, in 1921 that had ten members.

The band of this year has continued the practice of winning many awards against all competition and boasts of being one of the best in the state. Several prizes were captured in both district and regional contests this year, and the band promises to be even better next year.

M. A. Armstrong, director of the band, has done much to improve it during his few years here, as is evidenced by the number of trophies captured by the band.

In the high school band department are three bands besides the class for beginners. The regular high school band is composed of 60 members. The concert band comprises only those of highest proficiency who can play music such as the state contest numbers. The marching band is composed of 54 of the best students in marching and playing. This does not include the twirlers, flag-bearers and drum major who, of course, take their places in public performances. The bands have their own officers. The marching band is organized along military lines. There are 54 cadets, not including about 20 reserves who anticipate a promotion as soon as they deserve and advancement. There are seven sergeants, a top sergeant, two lieutenant captains. Approximately two ranks form a squad, each of which is under the direction and personal charge of a sergeant. The sergeant drills his squad separately in the fundamentals and checks each member's attendance, cooperation, and marching ability, and hands this record to the director, who closely observes all officers and assists when necessary. The sergeants are R. O. Brooks, Jack Walton, Goodrich Hejl, Fred Middleton, Frank Nixon and Harold Barnes. Lynn Stephens is sergeant in charge of checking each member's ability to play the marches from memory, no music being allowed on parade. Warren Duncan is top sergeant and checks the work of the sergeants. The lieutenants are Joe Norman, in charge of twirlers and flag bearers, and John Turner, who is the drum major. They are concerned with adding polish, precision and flash to the performance of the band as a whole; where as individual conduct and marching ability are the responsibility of the sergeants. The captain, George Walker, is the head of the organization of student officers. He is the marching band's "trouble-shooter." He bears complaints, settles disputes and does all in his power to instill good spirit and loyalty in members of the band. These officers enable the director to multiply himself many times and much is done which the director personally never could accomplish. They are an indispensable aid at home in training the band and of extreme importance on trips in checking each member's promptness, as well as his individual contribution to the success of the band. Sergeant Barnes recommends members of the reserve squad to fill vacancies in the main band. Other modern methods of organization and conducting the general work in the band department is separately put in force as time permits and as necessity demands.

Seniors Present Hilarious Comedy As Annual Class Play

Setting a new high in farcical situations and slap-bang comedy, seniors of Midland high school closed the theatrical appearances of their high school careers with presentation of "The Nervous Wreck," annual class play at the high school auditorium Friday evening.

Playing the first scene against the handicap of noise made by late-comers entering, the cast brought chuckles and roars of laughter from the audience throughout the comical situations of the three acts.

Carrying out realistically the most difficult characterization of the play, Ed Dorsey led the cast in his portrayal of Henry Williams, "the nervous wreck," who somehow always managed to win what he wanted, including the girl of his heart.

Additional comedy and suspense were provided by the commendable acting of Helen Drippelman as Sally Morgan, who ran away with the right man; Brooks Roberts as the pompous Jerome Underwood, Val Borum as his son Chester, addicted to "reasoning out" crimes; Virginia Ann Hilliard as Harriet Underwood whose mind ran to reforming mythical hold-up men; E. P. Lawson as Andy Nabb who believed in Providence and was willing to shield his friends; David Watford as Bob Wells a two-gun killer who wasn't so tough as painted; R. O. See (Class Play) Page Six.

Fine Arts Students Will Visit Mexico

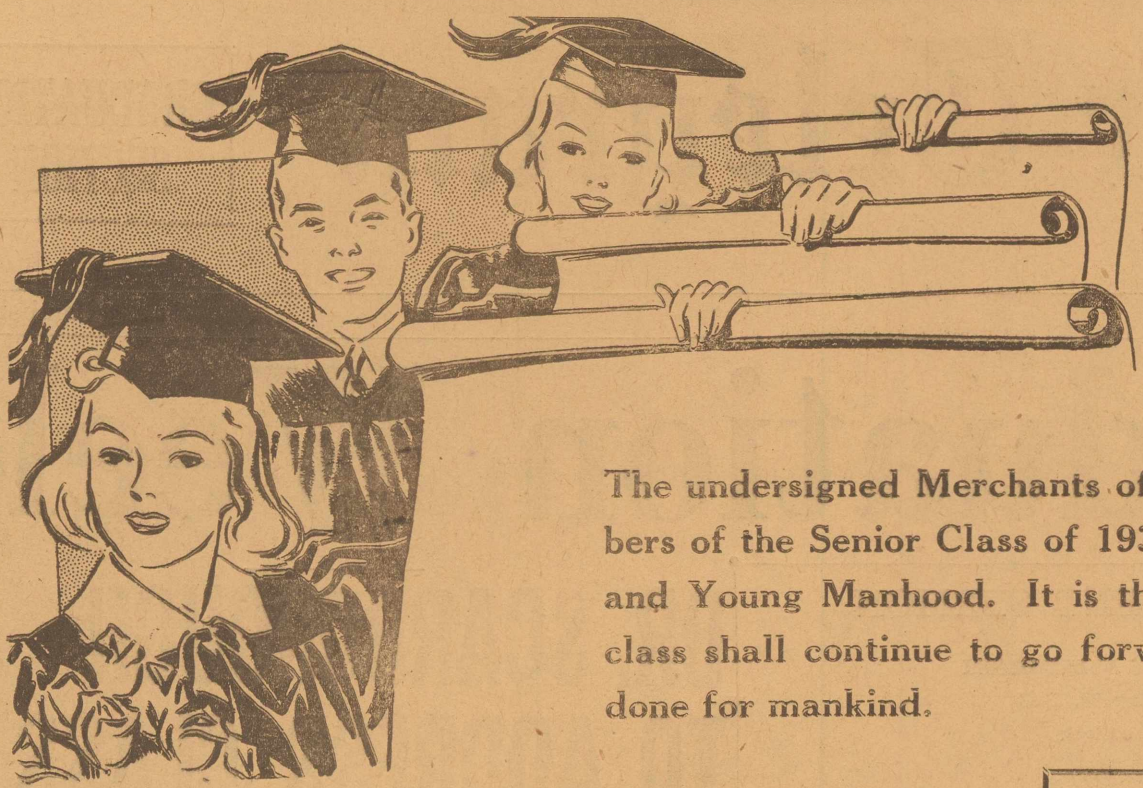

COLLEGE STATION, Texas. (AP).—The department of agriculture of Texas A. and M. College offers for the first time a summer school course on wheels that will take students on a tour of Old Mexico, July 18 to August 24.

Courses of instruction in fine arts of Mexico and decorative architectural details will be conducted by professors C. J. Finney and J. M. Miller, of the A. & M. architectural department. Maximum of six hours college credit will be allowed by A. & M. for the courses.

Excursions will travel by chartered bus, stopping en route to study at Monterrey, Saltillo, Victoria, Tacombo, Puebla and Cuernavaca. Approximately three weeks will be spent in and about Mexico City.

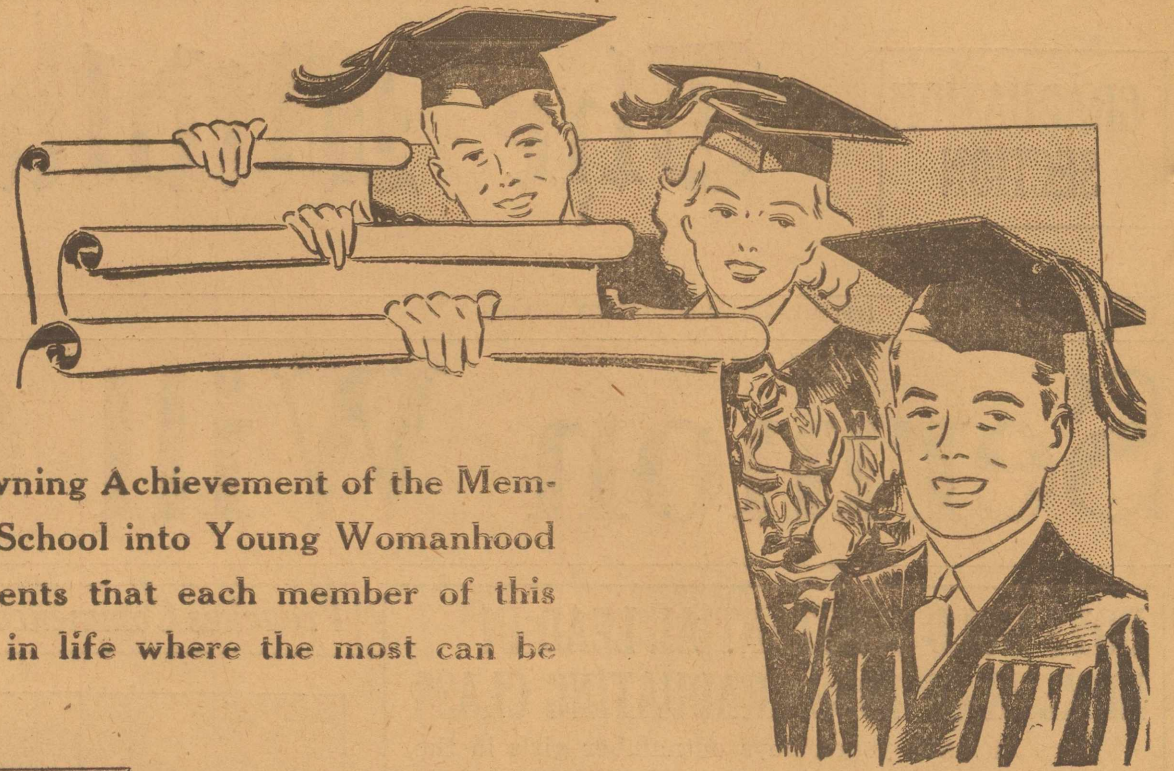

Each student will prepare a notebook covering all places visited, recording sketches and observations, this to be amplified by notes taken during discussion periods. In addition, each member will be expected to make a deeper study of one particular field, such as weaving, hand blown glass, tiles, etc.

In the decorative architectural details course a thorough investigation of the architectural traditions and aspirations of Mexico will be done by measured drawings, photography and sketches. Each student will be expected to study some phase of Mexican architecture or applied art in detail.

M. H. S.

Greetings *class of 1938*

The undersigned Merchants of Midland wish to give recognition to the Crowning Achievement of the Members of the Senior Class of 1938--their Graduation from the Midland High School into Young Womanhood and Young Manhood. It is the sincere desire of these business establishments that each member of this class shall continue to go forward, fitting himself or herself for the place in life where the most can be done for mankind.

Midland School Buildings Second to None in State

The Midland Independent School District justifiably boasts of some of the best housing plants in the state, as can be witnessed by viewing the buildings pictured above. Reading from left to right (top row) the John M. Junior High School, erected in 1930; the Senior High School, erected in 1927 at a cost in excess of \$200,000; (second row) the new North Elementary School, constructed in 1937 and opened for students last September; the South Elementary School, the oldest school building here still being used; (third row) the Mexican School, erected in 1930 and the Colored School building, built the next year; both buildings being constructed without a bond issue having to be voted by the taxpayers; (below) the \$75,000 gymnasium now under construction. The gymnasium building is being placed directly behind the high school building, making it easily accessible for manual and fine arts students. The building is to be completed by next September and students will start work in it when the fall term of school opens.

Midland High School Band Wins Envious Reputation

League Takes Feature Role In Movie Plot

GENEVA (UP).—The League of Nations has decided to go into the movies.

For the first time in the history of the Geneva institution, the secretariat is to undertake the production of two films about the league, its ideals, scope and activity. They are to be talkies produced in both French and English. To assure that first-rate scenarios are obtained for these films, the secretariat, in accordance with the decision of the 13th session of the assembly, has opened a competition with prizes for the best manuscripts. Scenarios must reach the secretariat here by Aug. 1 next, for judging by an international committee of critics and diplomats.

The main film is to develop the general idea of the league, depicting the fundamental purposes of the covenant and the principal activities of the organization. This is to run 6,000 feet.

The special film is to deal with some one aspect of league work such as the settlement of a political dispute. Other suggested subjects include achievements of the various league committees ranging from health work to the standardization of highway signals. This film would be 1,500 feet long. Prizes for the main film total \$460, with first prize being not less than \$230. For the special film the awards amount to \$150 with a \$90 minimum first prize.

It is understood that the secretariat has the right, in the case of any film for which an award has been made, to make such charges in the scenario as may be necessary for its production as a film. The copyright of all draft scenarios submitted for competition which receive a prize will be vested in the league.

Disease Perils Cited in Travel From Tropics

RICHMOND, Ind. (UP).—Construction of the international highway between North and South America will require United States physicians to become proficient in the treatment of tropical diseases, according to Dr. Herbert C. Clark, director of the tropical section of the Gorgas Memorial laboratory in the Panama Canal Zone, who visited here.

"It will be possible," Dr. Clark said, "for persons to become infected with yellow fever and be back in the United States before completion of the period of incubation. This makes it necessary for physicians in the United States to become more familiar with tropical diseases."

"The international highway will be a greater distributor of animal and plant diseases than trains and airplanes because some people will travel by burros from South America to the United States. These people will not stop for customs but will travel deserts and across country to avoid them. In so doing they will bring many tropical diseases into western states," Dr. Clark said.

State Tries Apt Slogan.

SALT LAKE CITY, (UP).—Utah has just adopted a slogan that promises to be widely copied by other western states. In the canyons and other beauty spots, signs hereafter will read: "Wild Flowers and Shrubs—Love Them and Leave Them."

Film Shows Stomach at Work.

LONDON, (UP).—The "inside" story of the human stomach's struggle in the process of digestion is told in a film which will be shown for the first time at a gathering of scientists in Belgium.

CUTS CURRENT COST DEEPER THAN EVER!

FRIGIDAIRE WITH NEW SILENT METER-MISER

Saves More not only on Current, but on Food-Ice-Upkeep!

SAVE ALL 4 WAYS... or you may not Save at all!

- 1. SAVE MORE ON CURRENT
- 2. SAVE MORE ON FOOD
- 3. SAVE MORE ON ICE
- 4. SAVE MORE ON UPKEEP

Why be satisfied with part-way savings? When you buy a refrigerator, be sure that it saves in ALL 4 WAYS... on current, food, ice, upkeep! Only in this way can you be sure of saving at all. For some refrigerators may save you money in one, two or even three ways... only to waste it in some "hidden extravagance!"

Why take a chance? Play safe! Come in and see the 1938 Frigidaire with NEW Silent Meter-Miser that saves you more in every way there is to save! Saves ALL 4 WAYS... You see the Proof before your eyes, before you buy! See, too, the many marvelous conveniences! Frigidaire's NEWLY-Styled 9-Way Adjustable Interior! NEW "Double-Easy" Quickube Trays throughout! NEW Moisture-Seal Hydrators! NEW Close-Bar Sliding Shelves... and dozens more exclusive advantages. To be sure of full 1938 value in a refrigerator—SEE FRIGIDAIRE FIRST!

Brooks as the hard-hearted father; Martin Neil as Dan and Courtney Cowden as Mort, two cowboys, and Robert Spikes as Tim, the chauffeur. "The Nervous Wreck" by Owen Davis tells the adventures of Henry Williams who had been given three months to live and whose boon companion was his medicine case and of Sally Morgan who ran away from home with Henry to escape marriage with Bob Wells, the sheriff. Scenes are laid in Arizona. A hold-up which grew in luridness like the proverbial snow ball, a ranch foreman in search of a cook, and sundry other complications made a series of hilarious scenes, one of the most uproarious being probably the "nuttiest" third-degree scene on record. A happy ending straightened out the tangles and set Sally and Henry on the way to romance. Miss Agatha Bruner directed the play with Willa Mae Hale as student-assistant director. Miss Ruth Carden was make-up artist.

"Dummy" His Official Name. COLUMBIA, S. C. (U.P.) — His name is "Dummy." He is a wage-earner, deaf and dumb, cannot read or write. And because his acquaintances know him only as "Dummy" he is so registered with the Social Security board. It is said he has no other name.

Private Clubs Build Air Arm To Aid Canada

OTTAWA (UP).—If the emergency arises forcing Britain to mobilize the air arm of its defenses, it will have at least 2,000 trained fliers in the Dominion of Canada to call upon, a survey by the Canadian Flying Clubs association reveals. There are 1,200 pilots in Canada holding active licenses ranging from private to transport qualifications, and in addition, 800 trained fliers who have allowed their licenses to lapse, the survey showed. The importance of private flying clubs as elementary training schools for the Royal Air Force is increasing yearly, G. M. Ross, executive secretary of the Canadian Flying Clubs association, disclosed. There were more than 350 licenses issued to club members last year, Ross said, and of that number many had joined the Royal Air Force. Ross estimated more than 200 Canadian fliers on the air force roster had received their preliminary training at private flying

clubs. Although the clubs are subsidized by the Canadian government, there has been no arrangement made with Britain regarding Royal Air Force training, Ross said. However, when Britain sent out a call for qualified fliers to train as military pilots, the majority who responded were club-trained, he said. The clubs have contributed widely to commercial aviation, it was revealed. More than 150 club-trained pilots and air engineers now are employed by transport companies. Transport Pilots Developed. The clubs are well represented in both the ground and flying personnel of the new Trans-Canada Airways, which goes into regular operation July 1. Club activities also have been instrumental in establishing be-

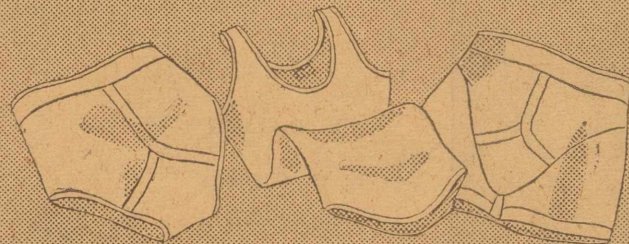

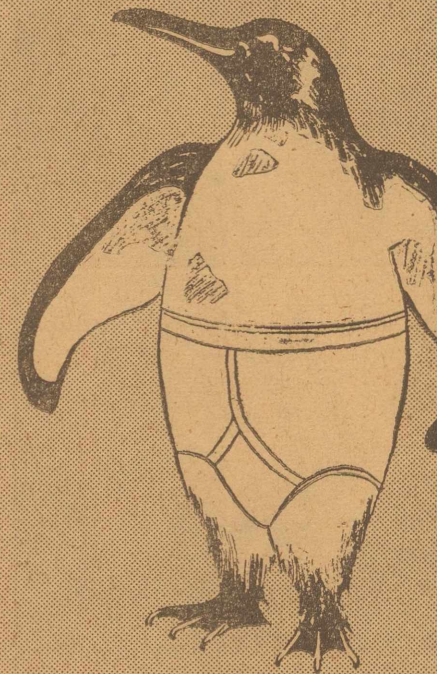

For Cool Summer Wear

TAKE A TIP FROM THE PENGUIN

Jockey UNDERWEAR

STYLED AND ORIGINATED BY

Coopers

50¢ PER GARMENT

Midland is just like a cauldron when the temperature zooms up toward the blazing 90's. And the hotter it gets, the more you'll appreciate your Jockey Underwear by Coopers. The cool brevity of Jockey underwear will win your favor after one wearing. Lightweight, porous, no buttons, no bulk, no bind. Patented Y-Front construction gives support and a convenient no-gap opening. The hottest day will fail to get a single squirm.
