In the meantime, the federal gov ernment is going ahead with its program to spend our way out of the depression. Here is one item to show what is happening. This road building has resulted

in the construction of enough miles -more than 22,000-of new highway almost to encircle the earth. This money was voted by congress in the last session as a means of creating work. Proponents of the appropriation, and administration authorities, hold that the \$400,000,-000 earmarked for road building would provide thousands of new jobs. Bureau of public roads figures indicate that this has been the result, but I find many observers who are wondering whether the amount of money that has been paid to labor for highway construction has been a proper proportionate part of the total set aside, when the purpose was solely the making

Total figures by the public roads office show that 6,360 miles were completed and in use on July 1 of this year and that 14,000 miles were under construction, with the probability that they will be in use by the end of 1934. Contracts have been awarded, the bureau has said, for the construction of about 1.900 miles more, and work on this por neck so as to go on and of tion will be under way in the late a lot of trouble. Washington observers lately have noticed an increasing tendency among conservatives throughout the country, whether Democratic or Republican, to align themselves under one banner. The movement as yet is much in the embryo, but I am told by various observers who are acquainted with political trends that the alignment is taking a rather definite shape.

Another factor and influence that is noted now to be at work is the gradual concen-Conservative tration of business interests on the conservative side of political questions under the New Deal. It is a matter of record, of course. that the tendency of government policies in the United States since the World war has been steadily to the left. Conservatives have been unable thus far to check this trend, largely because the conservative element never has stood to gether. It is important and signifi cant, therefore, that for the first time we are observing the develop ment of a conservative organiza tion in this country which has the avowed purpose of turning the American government back some what to the right and, as the leaders describe it, back again to the Constitution as it was originally

FOR the first time in history a President of the United States set foot on Hawaiian soil when Mr. Roosevelt landed at Hilo. He went ashore there especially to visit the great Kilaeuea volcano, and being driven to the edge of the huge firepit of Halemaumau, he made a sacrifice to Pele, the fire goddess, by tossing a bunch of red ohello berries into the crater. The city of Hilo gave the President a warm welcome and staged a pageant. Then he proceeded to Honolulu for the main events of his visit, His activities there included a review of 15,000 troops and an inspection of the Pearl Harbor naval base. He was entertained at luncheon by Maj. Gen. B. H. Wells, commandant of the army department, attended a picnic given by the Harvard club, ate dinner with Gov. Joseph Poindexter, and, after a reception at the governor's mansion retired to the Royal Hawaiian hotel at Waikiki beach.

THE TIRE SENSATION OF '34 Sells on Sight!

TO SEE it is to buy it! That's the way extra value stands out in the new Firestone Century Progress Tire. We found out what car owners wanted most in a tire-then we gave it to them. Out of more than ten million visitors to the Firestone Factory at the World's Fair last year, we obtained this opinion: "Give us Blowout Protection, Non-Skid Safety, and Long Wear, at a Moderate Price."

So we built the greatest tire ever made to sell at these low prices. Then the wave of buying started-car owners from Coast to Coast bought-not just one or two tires-but complete sets!

Go to the Firestone Service Dealer or Service Store in your community TODAY! See the new Firestone Century Progress Tire - just look at the broad, husky shoulders, massive flat tread, deep-cut non-skid and Gum-Dipped cords. Did you ever see so much tire for so little money? No wonder it's the Tire Sensation of '34 and Sells on Sight! Why not equip your car with a complete set-while prices are still at today's low level. And remember, you get the new Firestone Triple Guarantee.

A great many elections have passed into history since there were so many highly debatable issues, so much bitterness-or when there was so much at stake.

Democratic keynote was sounded in the president's radio speech of a few weeks ago-while he is not running, his political fortunes in the future will depend greatly upon re-election of enough demo cratic senators and representatives to hold firm control of congress. In his speech Mr. Roosevelt pointed to gains that have been made in fighting depression, defended his measures without qualification, said that we were well on the road to recovery. The president of a big New York bonding company writes me:

The experience of this company in paying dishonesty losses forty years convinces me that what is needed in this world is the teaching of honesty rather than preaching of it. Our preaching has resulted in honesty being man. The mother cat returns now and then to feed her kittens. But she's "modernist" and can't be bothered with stay-at-home duties or anything, in fact, that interferes with her career.

The hen has never batched an egg but she takes good care of the kittens, resenting any attempt to remove them.

In fact, she won't even leave when their errant mother peturns to feed them. And there is scarcely room in the box in the chicken ouse for the congenial crowd when they all get together.

The banty is so engrossed in her new job that she has no time to lay any more. Which has not made her any too popular with the younger members of the Frahn family.
