tunities.

VOLUME THIRTY-FOUR

HAGERMAN, CHAVES COUNTY, NEW MEXICO, THURSDAY, JULY 4, 1935

NUMBER 27

New Mex. Tax Valuation 1935 286 Million

Total Taxable Wealth Is About \$6,000,000 Under 1934; Reduction Is Due Chiefly To Fewer Live- Stock Over State.

SANTA FE—Total assessed value of taxable property in New Mexico for 1935 is approximately \$286,000,000, it was announced Saturday by Bryon O. Beall, chief tax commissioner, after the commission completed its valuation of corporate properties. This is a reduction of about \$6,000,000 from the 1934 total, he said.

The total corporate property assessed valuation is \$135,700,000, all reported; that total being a decrease following action of the commission in setting the valuation of the China division of the Copper Corporation, which has been in dispute before the commission for several weeks. The principal loss in assessed value, Beall said, is due to the decrease in livestock holdings. Livestock holdings have been decreased heavily by government buying and removal of stock from the drought areas in the state.

Beall said, "because it occurred at one time that our assessments would drop at least \$10,000,000 from the 1934 total." The tax commission split the difference with the China division of the Copper Corporation in the battle for a \$4,000,000 reduction in the assessed valuation of the corporation's properties in 1935.

The commission originally set the assessment at \$14,076,600 at Santa Fe on April 5. The corporation protested that its real assessed value should not be more than \$10,000,000, but asked that the valuation be set at "not in excess of \$12,000,000."

The final determination of the value which was approved by Bryon O. Beall, chief tax commissioner, and Donacio E. Rodriguez, was opposed by John S. Gilbert, Esq., but asked that the valuation be set at "not in excess of \$12,000,000."

The county clerk's fees for June 1935, the largest amount in any month since December, 1934, when the fees totaled \$661.24, are as follows:

1935	1934
493.70	390.55
384.75	394.63
528.75	476.54
485.75	467.41
622.70	420.93
642.55	509.96

—\$3,158.20 \$2,660.02

One of the county clerk's clerks generally conceded to be a supporter of general business.

INSTITUTE
ANS TO ADOPT CODE

of the New Mexico
Institute, in session at Al-
Saturday, laid plans for
a voluntary code of
condition for their industry.
The manager of the in-
stitute instructed to draw
a code, for presentation to
meeting of the institute
August 16 and 17.
The code, which previous to
the court decision knock-
ed out the NRA, operated as
the authority for New
Mexico to continue as a trade
association. Kenneth Baldridge,
institute president, and C.
Ratton, vice-presidents,
were in attendance were
J. Santa Fe, and E. W.
Morgan, directors, as well
as dealers from all parts
of the state.

man's waterworks is near-
tion, and the big water
tank looks like the real
thing it is completed, the
water heard for a long way,
we it will make a good
at we hope it does not
"solder" too much.

Mrs. Rex Phillips went
to visit relatives, leaving on Sat-
urday morning. He will be away
for several weeks.

Alamogordo Dam Has Been Assured

Hatch Says Dam Assured After Conference With President Roosevelt.

WASHINGTON—Senator Hatch (D-NM) expressed the opinion Wednesday after a conference with President Roosevelt that construction of the Alamogordo dam for the Carlsbad, N. M., irrigation district had been assured.

"The president made it clear that those projects approved by the reclamation department would be built," he said. "The Alamogordo dam for the Carlsbad irrigation district stands high on the list of projects already approved by the reclamation bureau." The president's declaration only included projects approved and submitted to the works progress administration by the reclamation service. It did not include flood control projects such as Conchas dam and others of similar type. The flood control program is on a different basis but we are strenuously urging the building of flood control projects as well as ones approved by the reclamation department.

"In fact, the entire New Mexico delegation has repeatedly urged and stressed the necessity for doing work of a permanent lasting and beneficial nature. It seems that progress is being made."

The Alamogordo reservoir would be constructed on the Pecos river about 14 miles above Fort Sumner in DeBaca county as supplemental and replacement storage for the irrigation district. Its cost has been estimated at \$1,500,000.

C. Neblett Head of Game Commission

SANTA FE—Judge Colin Neblett of Santa Fe was re-elected chairman of the New Mexico Game and Fish commission at a reorganization meeting held at Santa Fe last Thursday afternoon. Other members, both present, are J. Gilberto Espinosa and Henry Raithel of Deming, newly-appointed member, as well as State Game Warden Elliott Barker.

The commission tentatively approved a budget of \$11,500 for improvement work at fish hatcheries during the coming year, some of the work contingent upon whether or not contemplated FERA projects will be approved. The game commission would furnish materials and the labor would be furnished by the relief administration.

At present one such project is in progress at the Parkview hatchery and it is hoped by the commission that others will be started after July 1 at the Lisboa Springs and Taos hatcheries.

The commission passed a resolution continuing its opposition to the establishment by the United States biological survey of a federal game refuge in Hidalgo county. Federal plans called for a 644,000 acre preserve for uplands birds and game animals. Asserting there was "no need" for such a refuge, the commission decided to oppose any such preserve unless it were for migratory waterfowl. Both the state planning board and the state cooperative committee, it was said, have registered opposition to the proposed refuge.

WIND, RAIN AND HAIL
IN HAGERMAN VICINITY

The farmers south of Hagerman had a very damaging storm on Monday afternoon. Reports as near as we can get them are about as follows: On the E. O. Moore place the damage was mostly from the washing due from the excessive rain. B. F. Knoll stated there was some hail, but his crop was not yet, however, the hard rain and hail prevented the water from soaking in and it drained to lower ground. Sid Allen thought his cotton damaged considerably, this is the second hail this year for him. The Will Wiggins place is reported damaged almost 100 per cent from the hail. The Harry Cowan place has about forty acres of cotton that is not a total loss, the balance was ruined. The water covered the highway in several places, and at the old Juan Torres place, had backed up from the railroad and stood two feet deep in the house. There seemed to be a path about four miles wide that was damaged.

J. P. Morgan left for Nebraska to visit relatives, leaving on Saturday morning. He will be away for several weeks.

12,899 People See The Carlsbad Caverns During June 1935

An all-time record in the number of Carlsbad Caverns visitors for the month of June was established last month when 12,899 people from forty-eight states, the District of Columbia and twenty foreign countries, saw the Caverns. The nearest approach to the June 1935 record was in June 1930 with 12,642 visitors. Texas, as usual, contributed the largest number of visitors or 5,512. California was next with 1,210.

A Near Cloudburst Falls In Sector Along Pecos River

A near cloudburst fell along the section bordering the Pecos river Monday evening and the rainfall is said to have measured more than three inches in places. The precipitation was heavy for about twenty miles in the section between the highway and the river and stopped the traffic south of Hagerman for several hours Monday night when a draw ran four feet of water. A number of tourists were marooned at Hagerman, according to reports.

The Lawrence ranch was in the hardest of the rain, which fell for more than one and a half hours. Harry Carder, manager of the ranch, said his farm was inundated with exception of just a few acres of alfalfa on a rise. Fine hail in the form of a sheet of ice fell in that vicinity, but melted as fast as it hit the ground. A draw south of the Cottonwood creek was also up for a short time and stopped the traffic.

The rain was light in the Upper Cottonwood settlement, but grew heavier as the clouds swept to the east. The Reser farm reported a half inch of rain, while an inch fell at Espuella, about two miles to the east. The farming section south and east of Artesia received moisture varying from a half to an inch of rain.

A farmer living four miles south of Hagerman reports from ten to fifteen inches of rain fell on his farm during this time. It is reported that about eighty acres of cotton on this farm were wiped out by hail and the heavy rain. Other farmers in the same vicinity sustained losses from the rain and hail.

—Artesia Advocate

STATE CLOSES YEAR WITH A BALANCE IN ITS ACCOUNTS

SANTA FE—State Treasurer J. J. Connelly Saturday said the end of the fiscal year, June 30, will find a balance in the appropriations account for the second time within recent years. The account, he said, showed no overdraft during the last year, the first time since the administration of former Governor A. T. Hannett.

Although the appropriations account Saturday showed \$446,000 "in the red," Connelly said this was expected to be wiped out with \$300,000 receipts from miscellaneous sources and \$180,000 from property tax collections up to June 15.

SET ENDURANCE RECORD

MERIDIAN, Mississippi—Fred and Al Key brought their plane, Ole Miss, to safe landing at 6:06 p. m. (Central Standard Time) Monday after breaking all existing endurance flying records by spending almost a month in the air.

A roar went up from 10,000 throats as the brothers made a perfect landing on the soggy field 27 days, 5 hours and 34 minutes after their takeoff on June 4.

The crowd surged around the plane and lifted the fliers from it after they had been greeted by their wives and children.

NEW BANK FOR CARLSBAD

N M COMMITTEE OKEYS HOUSE BILL NO. 8492

Asks Support of Senators On Agricultural Bill; Names Committeemen; Report of the McKellar Amendment Received.

A meeting of the state committee on educational work on agriculture was held in Clovis on June 28th. Representatives from nearly every county in the state were present. J. R. Ogden and W. A. Wunsch attended from Eddy county. The state committee voiced their approval of the agricultural adjustment bill passed by the house—No. 8492—and a recommendation was made to the senators of New Mexico to vote in favor of this bill. The state committee appointed the following project committeemen: C. N. Moore of Dexter—cotton; Mr. Gamble of Curry county—wheat; L. White of De Baca county—cornhog. These committeemen will pay special attention to amendments and problems dealing with their commodity.

A report of the McKellar amendment, which deals with cooperatives, was received by C. W. Beaman, Eddy county cotton representative on educational work. This bill changes the status of the business of cooperatives dealing with non-cooperative customers from 50 to 25 per cent. In other words, if the bill passes as it now stands, cooperatives will not be allowed to do business in excess of 25 per cent with non-cooperatives. The farmers cooperative in this county instructed Mr. Beaman to request our senators and representative to vote against this amendment.

39 Rules Proposed At Oil Conference

Operators In Agreement Except in One Provision In Rule Two.

Thirty-nine rules were proposed for development of oil in New Mexico at a conference between the State Conservation Commission and the various oil operators, at a meeting in Santa Fe Friday. A tentative set of rules and regulations were mailed to operators prior to the meeting covering operations pertaining to the development and production of oil in the state.

C. J. Dexter reports operators agreeable to all rules except part of rule 2. Operators and the commission were in agreement on the proposal to limit one well to each forty acres, but a controversy arose as to whether the well should be placed in the center of the forty acres, which would be 660 feet from the line or whether the well should be placed in the center of the ten acres, 330 feet from the line.

Operators will have thirty days in which to file their objections in writing.

Hope To Stage Rodeo August 31 And Sept. 1 & 2

Arrangements are underway to stage a three-day rodeo at the Hope park at Hope, August 31 and September 1 and 2. Walter Coates announced here last week. The rodeo, expected to be the biggest and best ever given at Hope, will be under the management of W. M. Coates and Buck Jernigan of Hope and Elmer Hepler of Carlsbad. Other forms of entertainment are being arranged in addition to the rodeo. The free Labor day barbecue, September 2nd, is expected to be the feature day.

SPIDER REFUSES OFFER!

A vicious, not a docile, black widow spider was the object of a quest at Amarillo this week of Gene Elo, Amarillo newspaper reporter.

"In the interest of science," Elo subjected himself to the venomous spider, but the web-spinning creature refused to bite, despite Elo's coaxing. Today he sent out a call for a spider of different stripe.

The Rev. Bob Musgrave closed a very successful revival meeting on Sunday night. The meetings were held each evening at the Christian church and good crowds were in attendance each evening.

Oil Severance Tax Revenue Account Is Closed On Monday

SANTA FE—Chief Tax Commissioner Byron O. Beall Monday announced he was turning in to the state treasury the last remittance from the oil severance tax. The amount was \$60,798.63 and the account now is closed, he said.

The oil severance tax was in effect only from May 1, 1933, to April 25, 1934, and in that time yielded a total of \$586,888, one-third of which went to the state general fund, one-third to the common school fund and the balance to the counties from which it was collected.

RAILROAD EARNINGS ARE HIGHER IN 1935

SAN FRANCISCO—Increased net operating revenues were reported by the Santa Fe railroad Friday for May, being more than triple those for May of last year.

The month's net was \$2,541,812 compared with \$715,054 in May last year.

Refuse To Delay Consideration On Nat'l Tax Program

WASHINGTON—Administration Democrats Monday rejected a proposal by senate republicans to postpone consideration of President Roosevelt's tax program until a special session in November, but the minority leadership determined to push the suggestion to a vote.

A resolution, calling for a special session November 18, was formally advanced by Senator McNary, republican leader, on behalf of Senator Hastings, (R-DeL.), who was out of the city.

Immediate opposition came from Chairman Harrison of the senate finance committee and Senator La Follette (Prog-Wis.), leader of the drive to consider the tax recommendations at this session.

"We're going ahead with the tax bill at this session," Harrison said, emphatically. He planned to begin hearings within a few days, in order to expedite consideration of the measure. House hearings are scheduled to begin a week from Monday.

"It's become apparent," McNary said, "that the administration schedules will raise nearer \$100,000,000 than \$240,000,000. To get any money we will have to revise the whole tax structure. The taxes are not levied until next year, anyway. What's the hurry?"

FLETCHER CHOSEN HEAD OF SHERIFFS STATE ASSOCIATION

SANTA FE—Sheriff G. R. (Boots) Fletcher of Raton, Colfax county, Friday was elected president of the State Sheriffs' association at a meeting held in Santa Fe, attended by about a dozen New Mexico sheriffs.

The association Friday morning obtained a conference with Governor Clyde Tingley, when protests were entered against six-cent a mile traveling expenses. The sheriffs contended the new rate is not sufficient to cover all the costs of cars used in official work.

The sheriffs were told by the governor that he favored a more equitable arrangement and that he would request an opinion on the matter from Attorney General Frank H. Patton.

SALES TAX TOKENS FAIL TO ARRIVE

SANTA FE—The advent of the state's sales tax tokens, planned by the bureau of revenue to have been made Monday, was postponed because of delay in their manufacture, revenue officials said.

The state ordered 100,000 five-mill and 150,000 one-mill tokens, the total costing \$650. They will be distributed to banks, sold to merchants at face value and will be redeemable only at banks for cashier's checks payable to the bureau of revenue. Pending the arrival of the tokens, merchants must be governed by the new sales tax act which prohibits charging more than two per cent on any sale, the revenue bureau announced.

QUESENBERRY IS NEW EXTENSION DIRECTOR

LAS CRUCES—George R. Quesenberry, head of the argonomy department, State College, Friday was approved as director of the extension department upon receipt of word from Henry A. Wallace, secretary of agriculture. Quesenberry was appointed Monday.

He has been connected with the college for the past twenty years.

Monument Well Is Blowing Wild

Texas Company Hits Big Gas Pocket While Try- ing To Drill In Well.

Only one important field report regarding the development in the southeastern oil area is available as we go to press today (Wednesday). This concerns the opening of a big gas well in the new Monument pool in Lea county, three and a half miles northeast of the discovery well. It was learned here the first of the week that the Saunders No. 1 of the Texas Company, sec. 18-19-37, blew out while workmen were attempting to drill the Saunders in at 3900 feet. The well is said to be blowing wild and is estimated to be making from 40,000,000 to 50,000,000 cubic feet of gas.

Prospects of developing an extension in the Saunders well are not as promising as the district about two or three miles to the west, where a structure is said to exist. In the Artesia field, a showing of oil was developed in the Hastie No. 1 of the Pecos Valley Gas Co., sec. 17-17-28, at approximately 1118 feet. The Hastie was spudded about two weeks ago.

Late information from the Monument area states that the big gas developed in the Saunders well has been killed.

COMPLETES FINE SURFACE WELL

One of the best surface wells yet drilled in this section was completed Monday by Monroe Howard on his lower farm in the Cottonwood community. The well drilled to 160 feet was given a test Monday and pumped at the rate of 1,200 gallons per minute.

Hunt Still On For Missing Tourists

As the search for the bodies of Mr. and Mrs. George Lorus and Mr. and Mrs. Albert Heber, missing East St. Louis, Illinois, tourists, believed slain in the state, continued over the mesa and mountain canyon roads east of Albuquerque, state police sought to determine if their suspected slayer spent the night at Albuquerque, establish the connection, if any, of a man held in Del Rio, Texas, with the case, and determine if a blood-stained piece of bed spread found in the tourists' car came from a hotel or camp ground at Albuquerque.

After his tactics in the search after a massed search radiating from the spot four miles east of Albuquerque, where the partly burned and charred baggage and personal effects of the two couples were found Saturday night, failed to yield any trace of their bodies or any further clues, Gov. Clyde Tingley, who is personally directing the forces engaged in the search, tackled the baffling case on these three fronts Monday.

A party of patrolmen was detailed to check every tourist camp and hotel in Albuquerque.

The purpose will be two-fold: To determine if the suspected slayer spent the night in Albuquerque and to see if the places are missing a bed spread, taken within the last 25 days.

A blood-stained piece of bed spread was found in the tool box of the Lorus car Friday night by state police. They are attempting to connect it with the purported slaying.

Twenty-two national guard aviators continued the search in the foothills of the mesa east of Albuquerque and Adjutant General R. C. Charlton, in command of the troops, said a systematic check of every arroyo and by-road would be made.

Pictures of Robert Lowry, held in Del Rio, Texas, in connection with the case, arrived Monday from the department of justice, and two state officers took the photos to Socorro, Scott's filling station, 44 miles south of Socorro, and to Arrey, N. M.

At Socorro they will be shown to garage, camp ground, cafe and hotel operators to determine if Lowry had been there at the time of the disappearance.

At Scott's station the identification will be most important, the governor said, and if Mrs. R. C. Cole identified the picture of the man held in Texas as the young man who had an accident in the Lorus car near there about noon May 23, the case will have advanced one more step toward solution.

The Rev. Bob Musgrave and daughters Oneda and Cleo left for Elk City, Oklahoma, on Monday.

THE PUBLIC DOMAIN MAY GO TO STATE

Proposal To Turn Several Million Acres of Public Domain Over To States Is Approved By Senate Committee.

WASHINGTON—A proposal which might mean turning of several million acres of public domain over to the states was approved Monday by the senate public lands committee.

The committee reported an amended grazing bill which would increase the area eligible to be included in grazing districts from 80,000,000 to 142,000,000 acres. The bill already has been approved by the house but the senate committee attached a series of important amendments to the measure.

The possibilities for reversion of public lands to the states were contained in an amendment requested by Senator O'Mahoney (D-Wyo). It provides that all vacant, unappropriated and unreserved lands of the public domain situated in isolated or disconnected tracts of 760 acres or less, which are not within two years of passage of the act, included in the boundaries of a grazing district or leased, will be granted to the respective states for the benefit of their common schools.

Senator Adams (D-Colo.) who prepared the committee report, predicted the provision would have the effect of forcing the interior department to include such areas within grazing districts or lease them promptly.

There are now 165,695,479 acres of unappropriated public land situated almost entirely in eleven western states where rainfall generally is insufficient for cultivated crops. Adams said the new bill is intended to improve the grazing act which limited the area in grazing districts to 80,000,000 acres.

The house removed any limitation but the senate committee placed the limit at 142,000,000 acres, contending the remainder could be handled better through leases. An increase above the 80,000,000 however, was recommended by the senate committee "for the reason that the original limitation might have resulted in the concentration of overgrazing within excluded areas, and the primary objectives of range conservation and the stabilizing of the livestock industry might have been seriously injured, if not defeated."

Other major changes made by the senate committee would:

1. Authorize the interior secretary to classify lands which had more value for agricultural or mineral purposes than for grazing, withdraw them from grazing districts and open them for homestead entry at not to exceed 320 acres.
2. Make mandatory the exchange of lands upon the application of a state owning lands within a grazing district and permit exchanges with private parties of lands outside the district for privately owned ones inside the district, both changes being intended to facilitate consolidation of holdings of the government for grazing districts. Exchanges would be upon a basis of equal value rather than equal area.
3. Give interior secretary authority to select a director and assistant directors of grazing, outside of civil service, giving consideration to practical range experience of the appointees.
4. Restore a provision of the present law which the house removed which was intended to prevent refusal to renew grazing permits.

ANDERSON MADE FWPA

SALT LAKE CITY—An Albuquerque man, Clinton P. Anderson, Monday took over the post of federal works progress administration field representative for Colorado, New Mexico, Wyoming and Arizona, following his appointment by Robert H. Hinckley, assistant to Administrator Harry Hopkins.

Anderson today was discussing problems with relief officials in his area, here to attend the regional conference of relief workers in eleven states.

Mmes. Alvin Downes, J. F. Campbell, Schuyler Smith and Elmer Graham attended a party last week in Dexter for Miss Elsie Downes.

\$1.00 per year in Chaves and Eddy counties.
\$2.00 elsewhere.

ETHEL W. McKINSTRY
Managing Editor

Today, once again, we stop to celebrate that glorious independence, that had its birth one hundred and fifty-nine years ago. It should also be a day of thanksgiving, for those forefathers who desired freedom for their future heritage. To properly show our appreciation for those makers of history, we should live up to their dreams and expectations of a creed of freedom. Freedom from the sordid trivialities of life, and an independence of spirit that inspires us to more noble deeds. Why limit this to the one day in the year? Why not live it the three hundred and sixty-five? We, as a nation, can truly show the world that America's principles are really born of freedom.

Lake Arthur Items

Miss Ella Ohlenbusch, Reporter
Mr. and Mrs. D. Ohlenbusch were transacting business in Artesia Monday.

Mr. and Mrs. Raymond Orton (nee Juanita Tice) spent several days visiting in the home of her mother, Mrs. N. S. Tice.

Mrs. J. W. Cocker and children left early Sunday for New Port, Arkansas, where they plan to make their home for the present.

The Rev. and Mrs. J. W. Slade and daughter Margaret were visiting Saturday afternoon in the home of their son Earl Slade and family.

Mr. and Mrs. T. F. Schwarz and son Henry and Ella and Carl Ohlenbusch motored to Felix Sunday to attend the children's day program.

The ten-day revival meeting at the Methodist church closed here Sunday night with good results. From here the Rev. McGrew and the Rev. Mathews went to Hope where they will hold another revival meeting.

Health Column

Conducted by Dr. J. R. Earp, Director, New Mexico Bureau of Public Health.

Fireworks Injuries

Last year there were treated in New York City hospitals alone 2,600 persons injured by fireworks on July 4th. The National Society for the Prevention of Blindness received authentic records of 29 deaths from this cause in 1934. The Associated Press reported only 15. The difference is no doubt accounted for by the deaths which occur too late to make news but are not the less the result of injuries caused by celebration on July 4th.

Among these later deaths are the deaths from lockjaw. This is likely to come on a week after some injury has allowed the tetanus germ to get under the skin. It begins with headache, fever, and jumpiness. Pain on swallowing is a characteristic sign. These symptoms are followed next day by stiffness of the jaws. Although the mind remains clear, the muscles go into spasms and death is likely to occur from a spasm which chokes the breathing.

The tetanus bacillus is found in the intestines of horses and of other animals which eat grass. Garden or barnyard soil is thus very likely to contain many of the germs. The germs do not flourish in the air but thrive if they are pushed well under the skin with a splinter or nail or driven into the tissues by an explosion.

Lockjaw can always be prevented by giving the tetanus antitoxin. But it must be given early. If it is not given before the symptoms come on then it must be given in enormous doses to have any chance of success. Wise parents take all punctured wounds quickly to a doctor and let him decide whether or not tetanus antitoxin should be administered.

LEGAL ADVERTISEMENTS

IN THE DISTRICT COURT OF CHAVES COUNTY, STATE OF NEW MEXICO.

IN THE MATTER OF THE HAGERMAN DRAINAGE DISTRICT, No. 2485

Notice of Hearing on Report of Commissioners for Maintenance Assessment.

NOTICE IS HEREBY GIVEN that the Commissioners of the above Drainage District have filed their Report asking for an order authorizing assessments against the lands in said district for maintenance for the fiscal year 1936, and that said matters will come on for hearing before the court on for hearing before the court in the courtroom at Roswell, New Mexico, at 9:00 o'clock A. M. August 6, 1935, and all persons desiring to be present or object to said Report are hereby notified to be present at said time.

WITNESS my hand and the seal of said court, this 29th day of June, 1935.

RALPH A. SHEEHAN, Clerk of the District Court, Chaves County, New Mexico.

By (Sgd.) LOUISE McCONNELL, Deputy. 27-2tc

McGhee Upholds Carlsbad Liquor Law In Decision

Carlsbad's new liquor ordinance was upheld in district court last Thursday by James B. McGhee when he overruled the suit filed by Fred Tipton, Carlsbad liquor dealer, asking that the city be enjoined from enforcing the new law.

The jurist upheld the right of the city to pass zoning ordinances and refusing to invalidate the ordinance because it was passed by a four-man council.

Stress had been placed by Tipton's attorneys on the fact that the state law required an eight-man council, five of whom should be present at meetings when ordinances were passed.

"It is a matter of necessity for me to uphold the ordinances," McGhee said.

"The city has operated under a four-man council since it incorporated as a city in 1918. Indebtedness has been incurred under this set-up," McGhee said.

"It is too bad," he added, "that they didn't start in 1920 by electing four additional councilmen, but the people of the city acquiesced to the legality of a four-man council. It was up to them to file an objection in 1922 or at any time after that, but none have. I don't think it is up to the district court to upset all of the ordinances passed since that time," he said.

The attorney for Tipton announced that an appeal will be taken to the state supreme court.

McGhee said that it is probable that the supreme court may point out a way to elect the other four men required by state law.

The HEADLINES Say:

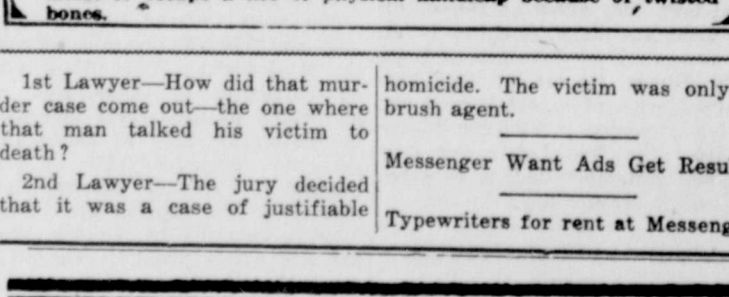

YOUNGEST GRAND-MOTHER—Mrs. Otto Eilers of Honolulu (right), is a grandmother at a ripe old age of 30. With her are her daughter and her year old grandson. Mrs. Eilers was married at 14; Mrs. Booth at 15.

NEW KEEPER OF SKELETONIZED BLUE EAGLE—James L. O'Neil of New York, selected to succeed Donald R. Richberg as new head of the new emaciated NRA.

ONE OF THE HITS of the Shrine convention in Washington, D. C. was this antiquated Oldsmobile, 25 years old and still running. It appeared in all the parades. Fifty new model Oldsmobiles were used as courtesy cars by the Shriners.

NEW METHOD OF CURING INFANTILE PARALYSIS—Dr. J. G. Stub of New Orleans (left), with Henry Fuderer, 10, whom he cured of infantile paralysis. (Right) Eva Lou Monier, 5, the latest to escape a life of physical handicap because of twisted bones.

1st Lawyer—How did that murder case come out—the one where that man talked his victim to death?
2nd Lawyer—The jury decided that it was a case of justifiable homicide. The victim was only a brush agent.

Science Explodes Old Fallacies In the Proper Care of Chickens

Were you ever advised to feed your chickens nux vomica in order to kill any lice that happened to be upon them, or to kill the hawks that might catch them? Did you ever hear the theory advanced that thunder would affect hatching eggs? W. M. Ginn of the New Mexico State College presents the opinion of scientists who have thoroughly investigated these and other fallacies.

A report from the Bureau of Biological Survey states that: "So far as is known, there is no foundation for the frequent claims that birds of prey can be poisoned by feeding chickens with nux vomica and thus impregnating the flesh of the fowls with enough poison to kill a predator." Therefore, do not give your chicken poison expecting it to kill the hawk; it will kill the chickens first. As to feeding chickens anything to kill the lice on them, enough of any known chemical fed to chickens to kill lice will kill the chickens first.

Scientists have never been able to uncover any effect thunder has on hatching eggs. If the jar of the thunder is supposed to be the effective agent, perhaps the rumble of a nearby train would be expected to have the same effect. Many of the largest and most successful hatcheries are located beside railroads.

One of the biggest fakes is the medicine which professes to make hens lay. The U. S. Department of Agriculture received so many requests from people who wanted to know which was the best tonic for egg production that they considered it advisable to test some of these so-called tonics. They were unable to find any tonics which would make hens lay. Tonic salesmen know that egg production increases in the spring, so they take advantage of this fact by selling their tonic just before the season of heaviest production.

CARLSBAD SCHOOL BONDS ARE SOLD

Fifty thousand dollars in school bonds were sold to the state of New Mexico by the Carlsbad school board Saturday.

These bonds will bear interest of four percent. They will be entirely retired in 1955.

Funds from the bonds will be immediately available as soon as the bonds have been printed and delivered to Santa Fe.

Two school buildings will be erected in Carlsbad with the funds, including a six-room building immediately west of Camp D in the south part of the city, and an eight-room building on the block between Lake and Mesa streets and between Stevens and Shaw streets in the west part of the city.

CARBON PAPER—The Messenger

LOSEY NAMED ON PLANNING BOARD

C. M. Botts of Albuquerque was named chairman of the land use committee of the state planning board at a meeting at Albuquerque Thursday. W. A. Losey of Hagerman was elected vice-chairman, Arthur N. Pack, secretary, and Blanche Clark, assistant secretary.

Attending the meeting were: Floyd Lee, representing the cattlemen; Pack, Losey, Frank Vesely, state land commissioner, M. M. Cheney, U. S. Forest Service official, and A. D. Malohon of the department of grazing.

A resolution recommending temporary use for recreation of the Gabaldon area purchased by the federal government near Santa Fe, was passed by the meeting.

A fat man strolled into a grocery store in Missouri and asked if he could rest for four or five hours.

The proprietor, who had just found a nest of newborn mice in the coffee grinder, said he could, and then asked him why he didn't go to the hotel. The man replied:

"I am suffering from nervous prostration and the doctor said get a quiet place to rest. I see you don't advertise. I knew that I could not find a better place."

And with that he sat back in his chair and watched a swallow build a nest in the cheese case.

Mistress: "Marie, when you wait table tonight for my guests, please don't spill anything."

Maid: "Don't you worry, ma'am; I'm very tight-mouthed."

Just the LIGHT For Every Outdoor Job At Night

The Coleman is the handiest lantern made for lighting up any kind of job at night... 300 candlepower light... fine for every need of farmer, camper, hunter, fisherman and tourist... at a moderate price.

Coleman LANTERN

25 Federal Aid Projects Listed In Highway Budget

SANTA FE—State Highway Engineer Grover Conroy Thursday made public a \$5,511,522 budget for the highway commission during the next year, in which are listed 25 federal aid projects totaling 247.5 miles and entailing an estimated cost of \$3,286,522, of which the state will be required to contribute \$1,287,223.

- The budget shows the following distribution of the \$5,511,522:
- Federal aid projects, \$3,286,522;
 - federal land projects, \$200,000;
 - state construction, none;
 - administration, \$350,000;
 - engineering, \$250,000;
 - maintenance, \$1,125,000;
 - equipment and purchases, \$75,000;
 - contingent and emergency, \$150,000.
- The federal land projects were not listed. The state expects to get \$200,000 of unmatched federal funds to be available for that type of construction.
- The projects listed included:
- La Luna cut-off, 6.80 miles, \$75,000.
 - La Luna cut-off, 10.60 miles, \$122,000.
 - La Luna cut-off, 12.00 miles, \$170,000.
 - Tucumcari-Montoya, 17.30 miles, \$200,000.
 - Carlsbad-Malaga, 15.10 miles, \$75,000.
 - Alamogordo-Valmont, 7.50 miles, \$100,000.
 - Mescalero-Tularosa, 5.20 miles, \$25,000.
 - Montoya-Newkirk, 6.00 miles, \$90,000.
 - Hot Springs N. and S., 5.60 miles, \$30,000.
 - Hot Springs-San Antonio, 4.00 miles, \$60,000.
 - Piacho-Hondo, 15.60 miles, \$250,000.
 - Barton-Moriarty, 13.00 miles, \$150,000.
 - Mescalero-Tularosa, 6.80 miles, \$155,000.
 - Yeso-Guadalupe county line, 16.90 miles, \$169,000.
 - San Antonio-Hot Springs, 10.30 miles, \$230,000.
 - Santa Rosa-Moriarty, 15.40 miles, \$175,000.
 - Santa Rosa-Moriarty, 13.20 miles, \$145,000.
 - Vaughn-Roswell, 12.00 miles, \$165,000.

"Aged Whiskey Demands Can Be Filled by 1938," last week's headline, isn't much encouragement to those who want a drink of mellow liquor now.

Cattlemen Want Projects Listed In Kent To Remain Head State College

The executive board of the New Mexico Cattle Growers association, in session at Albuquerque Saturday, passed a resolution asking that Dr. H. L. Kent be not replaced by a new appointee as president of the New Mexico Agricultural College unless he fails to recover his health. The board also commended the regents of the school for granting Dr. Kent a vacation on half pay to enable him to recuperate following a severe illness.

The board endorsed the work of the feed and fertilizer department and commended F. E. Oaks, supervisor; they decided to continue to oppose the plan of the government to return to commercial channels drought cattle which were purchased during the drought last year; and protested the proposed reciprocal agreements between the United States and Canada and the United States and Argentina to allow admission of cattle.

Other action taken by the board included: Approval of the government policy of moving homesteaders and settlers from sub-marginal lands to more suitable areas. Approval of the Kieberg bill placing a ten cent per pound tax on oleomargarine made from other than domestic fats and oils. Approval of amendments that would remove the limits on acreage under the Taylor grazing law. The original bill set the total at 80 million acres.

Opposition to including cattle in the AAA reduction until the entire industry has favored such action. The next meeting of the board will be held at Las Cruces. About 70 cattlemen attended the meeting at Albuquerque.

The boy was probably mentally deficient and an examination was indicated.

"How many ears has a cat?" queried the psychologist.

"Two," replied the lad instantly.

"And how many eyes has a cat?"

"Two."

"And how many legs has a cat?"

"Say, Doc," asked the boy, "didn't you ever see a cat?"

IN SOCIETY

Phone 17
(Items for either this column or the calendar must be turned in by not later than Wednesday noon)

Social Calendar

The Methodist Missionary society will meet with Mrs. Robert Burrell on Wednesday afternoon, July 10th.

The Men's club will meet on Tuesday evening, July 9th, at the Presbyterian church basement for their regular meeting. Supper will be served by the Methodist Missionary society, and will begin at 8:00 p. m. Mr. H. H. Lewis, county relief supervisor, and Geo. Wilcox, county commissioner, will be present and talk on the "Local Relief Problems."

BIRTHDAY PARTY

Mrs. A. A. Bailey entertained last Saturday morning from nine to eleven-thirty, complimentary to her young daughter, Mayola's sixth birthday. Nineteen of the little friends enjoyed the pleasant morning hours of games at this lovely home, and as an esteem for the little honoree, they presented her with many lovely gifts. Ice cream and cookies were served with the traditional birthday cake.

GIRL SCOUT NEWS

Girl Scout troop No. 2 met last Friday afternoon at the home of Jeanne Marie Michelet and hiked out to the old Mitchell place, where they played games and served a picnic lunch. There was a good attendance and they were under the supervision of their captain, Miss Martel Graham, and Lieutenant Maggie Burrell.

ENCHILADA PARTY

Mrs. Roy Lee Hearn and Miss Dorothy Swett entertained last Saturday evening at the Hearn home with an enchilada supper. The party later attended the midnight preview at the Yucca.

George—Now that you're married I suppose you'll take out a life insurance policy.

Edward—Oh, no, I don't think she's dangerous.

YOUR CHILD AND THE SCHOOL

By Dr. ALLEN G. IRELAND
Director, Physical and Health Education
New Jersey State Department of Public Instruction

The Spring Play Day

It's time to be planning the spring play day. Give thought to making it a happy, joyous occasion.

To do that, provide some activity or job for every child. No one likes to be left out. If one can't run, play, or dance, he can serve in some useful capacity.

A large share of the planning should fall to the pupils. Let them organize committees and hold regular meetings with discussions of program, costumes, picnic luncheon and so on. Play up the health factor, for this is opportunity. Talk about training through observance of the health rules. And give a prominent place to sportsmanship, for these occasions are truly laboratories of citizenship.

For the program, stress the dances and the simple games and stunts dear to children. This calls for minimizing the old type of athletic field day, but in the end you will be more content.

Miss Carolyn Paddock left last Sunday for Colorado Springs, Colorado, where she will join the University of Tours for a trip. She expects to be away about six weeks and will visit the scenic places in Colorado, Yellowstone Park where they will be for a week, Mt. Ranier, into Canada and down thru California and into Mexico.

Mrs. B. W. Curry, Mrs. Louie Burck and Mr. and Mrs. Rex Phillips were caught in the storm on Monday afternoon at the dip near the Will Wiggins farm. Mrs. Curry was alone and in most of the hail and wind. In her closed car, she got very wet, because of the hard wind. Both cars were held up at this dip from near six o'clock until nearly nine-thirty, along with a number of cars headed north.

Miss Grace Paddock of Clayton is visiting in Hagerman. She has just returned from a delightful trip which included the Grand Canyon, the Painted Desert, San Diego and the exposition, seeing the great Pacific fleet which was in port at the time, Tia Juana, Mexico and up thru California to Washington, where they visited Miss Mountcastle's parents. Miss Paddock was in company with Miss Frances Mountcastle and Mr. and Mrs. Miles Black of Roswell. Miss Mountcastle remained in Washington for the summer with her parents.

LOCALS

Mr. and Mrs. Roy Bailey and family visited Mrs. Roy Van Arsdol this week.

Misses Alice Williamson and Lillis Andrus made a business trip to Carlsbad yesterday.

Mr. and Mrs. E. A. White and Gene were in Hagerman for a few days early in the week.

Senators Atwood and Julian of Silver City made a short call in Hagerman last Friday afternoon.

Mrs. Perry Andrus was quite ill Tuesday and a definite diagnosis has not been decided yet as to the illness.

The 8th Cavalry recruiting division of the U. S. army made a short stay in Hagerman Wednesday morning.

Mr. and Mrs. Maio Saint 'Cyr and Mr. and Mrs. R. M. Ware spent the week-end in the mountains on the Ruidoso.

W. L. Jenkins and Miss Lois Jenkins have gone to their Beaver county, Oklahoma, farm for a several weeks stay.

Tuesday's visitors in Roswell were Miss Martel Graham, Mrs. Elwood Watford, Mrs. Ernest Utterback, M. C. Brown and Harrison McKinstry.

Mrs. Seaborn Price and young daughter Charlotte Jo of Tatum, Mr. and Mrs. Stafford Brown and Jimmy of Carlsbad, spent the week-end with Mr. and Mrs. Jim King.

The Rev. J. W. Slade returned to Hagerman over the week-end from the revival meeting in which he is assisting at the Inez church near Rogers. He reported good crowds and good interest. Rain kept the crowd away two nights. He left for Rogers Sunday afternoon.

Miss Grace Cole, Mrs. C. W. Cole and Mrs. J. T. West left Wednesday morning for a motor trip, to be gone about a month. Their itinerary will route them through California, Oregon, Washington, across into Canada and across to near Winnipeg, home via Nebraska and Colorado. This will be about a ten thousand mile tour.

Landscaping between Bernalillo and Albuquerque, .772 miles. Wheeler, Carrino and Silver, Albuquerque, \$11,152.90.

Grading, surfacing, drainage structures and a timber bridge near Bloomfield, 1,307 miles. W. E. Bondurant, Roswell, \$28,267.68.

Grading, minor drainage structures and base course surfacing, 1,856 miles between Reeves Hill and Elk, Armstrong and Armstrong, Roswell, \$41,842.32.

WOOL SALE AT LOVINGTON

About 200,000 pounds of wool was sold at a public sale at Lovington Tuesday, but the prices paid for the clips were not learned.

CHURCH CONVENTION

The state convention of the Disciples of Christ of the Christian church will meet at Carlsbad on July 16th, 17th and 18th, it was announced last week.

Calling Cards, 106 for \$1.75, on best grade paneled or plain stock. —The Messenger.
