Above is given a cut of Secretary of war Taft, who just recently returned from his ocean trip and is now actively in the presidential race, we believe the lead of all others at the present time. Now that President Roosevelt is out of the race for good, the next thing which the people of the country wish to do is secure a man who is not only ready and willing, but able to carry the policies Roosevelt has started and the feeling is pretty general all over the country that Secretary Taft is the man.

In reviewing the political situation in the Republican party and the many candidates for the presidential nomination next year and considering the return of Secretary of the war W. H. Taft, the Washington Post, on the spot and right well posted and rather non-partisan gives its views and notions thereon in a very readable and it must be admitted interesting and sensible way. It seems to be about as the Post thinks it is, and the Post thinks that the return of Secretary Taft last week and the attitude of the public

toward him will be narrowly studied by rival candidates for Presidency.

There is likely to be a renewal of gossip about Taft and his relations with the president, growing out of the latter's announcement of Dec 11

The opinion is expressed in many quarters that Secretary Taft did not gain in prestige by his sea voyage, and that the president, perceiving this, caused the secretary of War to cut his trip short and hurry home.

But now as Secretary Taft is about to appear on the scene, there is less talk of his "waning prestige," and more talk of the fixed determination of the President's supporters to secure Taft's nomination. There is no doubt among well informed men that President Roosevelt is intensely desirous of the nomination of Mr. Taft, and that he will go as far as he properly can while President to encompass that end. If Mr. Taft is out of the race, as some of the wise observers say, he is the liveliest corpse of them all, for there is more talk about his candidacy than about that of any other man.

## Great Unloading Sale of Men's and Boy's Hats

**20 Per Cent Reduction**

FOR THIRTY DAYS

In purchasing the stock of merchandise from Gallacher & Co., we find a much larger stock of Men's and Boy's Hats than we anticipated, and in order to make room for a new Spring Stock we will, for the next 30 days make the above reduction. All our Hats are good style shapes, and quality guaranteed. No old stock in the lot.

Yours for business

SUCCESSORS TO GALLACHER & CO.

### IRRIGATION EXPERIMENTS IN RIO GRANDE VALLEY

As the years and seasons pass it becomes increasingly evident that irrigation practice like other features of agricultural work is taking on more and more of the characteristics of an art based on an exact science. Irrigation farmers everywhere are arriving at the conclusion, or are being forced by circumstances to accept the idea that reasonable economy and considerable care in the distribution and use of water is not only sound business common sense but from the agricultural standpoint is the practice least likely to injure the soil and most likely to secure a profitable crop. It is but rarely nowadays that we find men applying five and six acres feet of water to their crops yearly in order to produce only an average yield, and the farmer who now boasts of doing his irrigation on horseback is generally regarded as a probably early cause for foreclosure proceedings on the part of his mortgagee. This change of practice is undoubtedly due very largely to the increasing scarcity and value of water resulting from a large increase in the number of irrigators and to a wide extension of the irrigated area. It is also due to a not inconsiderable extent, due to the increase on the part of the farmer of correct or more profitable irrigation practice.

Much however, remains to be learned, even by the best informed. When a man installs a pumping plant for instance, whether it be a windmill or a steam or gasoline engine plant, he is very desirous of knowing how much land he should attempt to irrigate. In other words he asks, "How frequently shall I irrigate my crop and with how much water to make the biggest and best use of my pumping plant but the same time feel assured that the crop will not suffer from too much water?"

In their trips throughout the agricultural sections of the Territory the Farmer's Institute workers of the station are very often confronted by this question but it is one to which they are at present but little prepared to give a definite or satisfactory answer.

The importance of the problem suggested by such a question cannot be over estimated when it is considered that there is a vast amount of excellent land in both the Rio Grand and Pecos Valleys which lies above the present irrigation systems but which it should be possible to irrigate from underground water sources if the supply available could be made to cover an area sufficient to justify, from a business standpoint, the more or less expensive means necessary to secure the water. For many years the New Mexico Experiment Station has been carrying on investigations having as their end the determination of the most favorable amount of water to apply under the climatic and soil conditions prevailing in the Rio Grande and Pecos valleys which lies above the present irrigation systems, but which it should be possible to irrigate from underground sources.

With this end in view investigations have been started upon those mesa soils lying above the present irrigation systems which because of their location probably, will not be covered by the proposed extensions of these systems. Such soils are better adapted for irrigation and for the growing of various special crops than those lying along the river bottoms. They are loose in texture and uniform in quality, being exactly opposite in these respects to the soils of the river bottom. It is proposed to attack the question, known generally as "The duty of water," from the soil and soil moisture standpoint carrying along with the comparison of yields under various irrigation schemes, a parallel study of the distribution and movement of soil moisture to determine how effective is the particular method of irrigation used. Such an investigation will yield results less dependent upon the low conditions than work of a similar nature previously carried on to which the criticism can be justly applied, that the results are only applicable to the certain special climatic and soil conditions existing in the locality. It is hoped therefore that the work now proposed will yield information which can be applied to a variety of soil and climatic conditions so that the work will be of value not only to the Rio Grande Valley but to other sections of the territory.

In order to irrigate the mesa land upon which the experiments are to be carried out, an expensive pumping plant is being constructed. This consists of an open concrete lined pit seventy one feet deep, in the bottom of which driving wells are sunk to a further depth of thirty feet into water bearing quicksand. A two step centrifugal pump of high efficiency type will be placed at the bottom of the pit and will be driven through vertical shafting by steam engine at the surface. The water is conducted to the tract to be irrigated by piping and is their distributed by a system of fluming and sewer tile patterned after the systems used by individuals very largely throughout the Riverside district of California. Everything is being laid out with a view of making results, when secured, absolutely reliable, so that all possible doubts as to the accuracy of the mechanical side of the work will be eliminated. Experimental irrigation work will be commenced at the beginning of the next irrigation season and mean while soil moisture investigation upon the tract are being carried forward so that when the water is actually applied some knowledge will be had of the character and conditions of the soil previous to the application of water. The whole investigation forms one of absorbing interest to those engaged upon the work and it is their hope to secure results not only generally applicable to the conditions of the territory but distinctly better from a scientific standpoint than similar work carried on at the New Mexico station or elsewhere in previous years.

For Drygoods and Gents I  
nishing call at Peoples Brothers.

### HEAVY FALL OF SNOW

The following from the Albuquerque Citizen, seems almost impossible to us here in the Carrizozo Valley, and we could hardly believe it but for the snow we see on the mountains east of town and the load of snow and ice brought in by trains coming from Santa Rosa Torrance, Tucumcari and other points north.

During the latter part of the week the territory put on its Christmas clothes in proper style judging from what is evident from Albuquerque and according to reports from other sections. The fall of snow Friday and Saturday in the Sandias and Manzano was probably the heaviest of the season. John B. McGuiness, assistant forest ranger on the Manzano reserve, arrived in the city Saturday to spend Christmas here, reports a very heavy fall of snow in the Manzano and the southern part of the territory. From Albo station on the Belen cut-off for many miles out on the plains east of the Manzan the snow is fourteen inches on the level. In the mountains it is in places four and five feet. It is six and seven feet in the canyons of the Jemez national forest north of this city and the snow fall was very heavy in the Pecos country and on the Santa Fe range. Temperature for the past week has been unusually low all over the territory and heavy ice has formed on the lakes and streams.

### A CORRECTION

In our rush last week we overlooked an error in the notice of sale of Gallacher & Co. to Ziegler Brothers, and the signature which should have been Gallacher & Co., was given in the other way. The notice appears in its proper form in this issue. Ziegler Brothers are well known in this region and their many old friends will be glad to welcome them back into the commercial circles of Lincoln county.

R. B. Boylan and wife of Michigan, who have been visiting at the Vera Cruz Mine a few days, were pleasant callers at this office this morning.

We extend to our Friends and Customers our thanks for their kind patronage during 1907, and take this opportunity of wishing you one and all a Merry Christmas and a Happy New Year.

If not paid within six months) .....\$1.50

## NEW MEXICO'S AGRICULTURAL POSSIBILITIES.

The delusion that New Mexico in the main is a desert and an arid country in which agriculture and horticulture can never have but a very limited space is becoming dispelled by actual occurrences, by successful experiments, and by reclamation of thousands of acres by irrigation projects and by intense culture of the soil, in many sections where it was thought heretofore impracticable or impossible to raise agricultural crops. In addition to the great irrigation projects which have been constructed and will soon be constructed by the U. S. Reclamation service there are several great irrigation companies which will within a year or two have between 150,000 and 200,000 acres of fine farming land under irrigation and for disposal to farmers and settlers at very reasonable rates.

When it is considered what has been done in Colorado in the past three decades under much harder and adverse conditions it is not at all romancing to announce that within the next ten years New Mexico will outstrip its neighbors to the north in agricultural and horticultural products. What has been done for instance in and about Greeley, Colorado, can and will be accomplished in this territory on acreage twenty times the acreage now contained in the Greeley agricultural district. The story of the Greeley section, its development and its present highly prosperous condition reads like a fairy tale but it is a fact never the less. Similar facts concerning agricultural development will within the next five or ten years be the rule in New Mexico. The Greeley story which is very interesting is told editorially by the Denver Republican in a recent issue and the New Mexican hopes to be able to tell similar stories within the next few years concerning agricultural advance, progress and success in the sunshine State. Says the Republican:

"We have often spoken of wonderful development of the farming region of North Colorado of part of which Greeley is the center. The farmers there have no complaint to make of poor crops or low prices; and the evidence of their prosperity is seen in the fact that Greeley is growing and improving in a way that gives no sign that a financial storm struck any other part of the country.

"Farming is the corner stone of our national prosperity, and no better illustration of it can be found than in the country surrounding Greeley.

Intelligence and industry have combined in that fortunate part of the state to produce the best results, which are seen in carefully tilled fields beautiful homes and an abundance of what may be called the luxuries of country life. The farmers are all rich, and it is no wonder, for their land rivals in fertility the far famed valley of the Nile, and irrigation is a guarantee against failure of crops.

"Greeley is the local trading point of part of the region in question, and draws to itself the wealth of the farms. It is improving rapidly through the construction of many new buildings, and there is every reason to believe the prosperity now enjoyed will grow constantly."—New Mexican.

## APPRECIATING GOVERNOR CURRY'S WORK

The Albuquerque Citizen finds that Governor Curry is doing great work towards the successful entertainment of next year's National Irrigation Congress to be held in its city and to show its appreciation for the Governor's efforts and work it brings him out as a candidate for the first Governor of New Mexico as soon as it becomes a state in the Union. The Citizen is very enthusiastic and evidently believes what it says and there are a great many people throughout the territory agreeing with this opinion which reads:

"Governor Curry, in devoting his time and energy towards the assistance of the committee having in charge the entertainment of the National Irrigation Congress, is showing the sort of spirit that New Mexico has needed in her governor for so, these many years. George Curry is a governor of New Mexico and made of the stuff that New Mexicans are made of. He is working to advance the interest of the territory on every hand and he would undoubtedly be elected the first governor of the state of New Mexico if that happy day ever arrives. The more the possibilities of the National Irrigation Congress loom up on the horizon, the more important the matter becomes and thank goodness we have a governor who takes off his coat and works in the harness along with every one else for the public good. The national Irrigation Congress will be a success never doubt it."

Governor Curry has been tried and found wanted—in fact, imperatively needed.

Talk of financial stringency has vanished from the press of the east. Conditions are becoming normal again.

Mr. Roosevelt is said to be the only living American with self denial enough to throw up the job of president of the United States.

Governor Curry says six good men can do the preliminary statehood booming in Washington. But he must not forget that noise went a long way to blow Oklahoma through the gate.

Governor Curry does not propose to allow grass to grow under his feet when it comes to keeping the New Mexico statehood movement going and punching up next year's irrigation congress. He is putting in first class work for both projects.

Arizona has taken advantage of the temporary lull in incorporating new companies to have a new territorial seal cut. The secretary says he is afraid to handle it for fear the cactus sculptured thereon will cut his fingers.

Governor Curry's visit to Pecos valley and his voyage on the lines of the Eastern Railway of New Mexico are proving beneficial in many directions and especially for the statehood cause, and is arousing interest in the holding of the National Irrigation Congress next year. Governor Curry is certainly getting very close to the people.

During the past few days snow and ice on the telegraph systems in the Eastern states have delayed telegraph communications between New York and western cities, and yet the country is moving along and prosperity is again asserting itself. New York is not near as big as it was even five years ago, but the country and its business interests outside of New York are growing constantly.

The people of New Mexico are showing a very laudable ambition to make the holding of the Sixteenth National Irrigation Congress in Albuquerque next year the greatest public event of the kind not only in this territory but also in the great southwest that has ever occurred. No local jealousies of any kind, great or small, are existing and there will be nothing but the best of good will and the utmost of cooperation and help by the people for the project if the board of control continues in the sensible and efficient manner in which it has commenced. This is very refreshing and greatly gratifying. There has been entirely too much jealousy and sectional envy in New Mexico. This seems to have disappeared and if its disappearance is real and permanent it will portend and bring about great good for all people of the territory.

## IT'S A WAY WE HAVE.

From Phoenix Arizona. Democrat  
Phoenix never experienced a finer winter day than that of yesterday. At the same time it was 22 degrees below zero in Lander, Wyo.

### Mineral Application No. 25.

United States Land Office, Roswell, Chaves County, Territory of New Mexico, October 22, 1907.

Notice is hereby given that A. R. Byrd, claiming the Old Abe Mining Lode, covering about 1500 linear feet, bearing north 86 deg. 9 min east on the Old Abe vein, lode or mineral deposit, and on adjoining or branch lodes or veins, all bearing gold, silver, lead, copper and other valuable minerals, with surface ground about 600 feet in total width, the length and width on the official plat of said lode, said lode lying, being and situate in the north-west quarter of Section 3 T. 10 S. R. 11 E., N. M. P. M., unsurveyed, in the Bonito Mining District, Lincoln County, New Mexico.

The said claimant is about to make application to the United States for patent for Old Abe Lode or Mining Claim, which is more fully described as to metes and bounds by the official plat, and by the field notes of survey thereof, now filed in the office of the Register of the District of Land subject to sale at Roswell, New Mexico, which field notes of survey describe the boundaries and extent of said claim on the surface.

This claim is adjoined on the east by survey No. 649, renowned O. K. lode; and on the west by the Continuation lode, unsurveyed, A. R. Byrd, claimant. There are no other adjoining or conflicting claims known. This claim being more particularly described as follows:

Beginning at Cor. No. 1. Identical with the N. E. location cor. and with cor. No. 2, Survey No. 649, renowned O. K. lode.

A porphyry stone 24x14x9 ins. set 12 ins. in the ground, with a mound of stone 1 1/2 ft. high 2 ft. base, alongside chiseled X 1-1307 on E. face; whence a pine 10 ins. diam. bears S. 46 deg. 10 min. W. 5.6 ft. dist.; and

A pine 4 ins. diam. bears S. 67 deg. W. 25.1 ft. dist., each blazed and scribed X B T 1-1307.

An oak 8 ins. diam. bears N. 37 deg. 46 min. E. 30.9 ft. dist. blazed and scribed X B T 1-1307.

Thence N. 85 deg. 8 min. W. Va. 12 deg. 25 min. E. 1345.06 ft. to cor. No. 2. Identical with the N. W. location cor. A porphyry stone 24x14x5 ins. set 12 ins. in the ground with a mound of stone 1 1/2 ft. high, 2 ft. base, alongside, chiseled X 2-1307, whence an oak 8 ins. diam. bears S. 72 deg. 17 min. E. 27.1 ft. dist.; and an oak 8 ins. diam. bears S. 69 deg. 11 min. E. 27.9 ft. dist., each blazed and scribed X B T 2-1207.

Thence S. 0 deg. 9 min. E. Va. 12 deg. 10 min. E. 292.42 ft. W. end center, 592.42

ft. to cor. No. 3. A porphyry stone 24x12 x11 ins. set 12 ins. in the ground, with a mound of stone 1 1/2 ft. high 2 ft. base alongside, chiseled X 3-1307; whence a spruce 18 ins. diam. bears N. 81 deg. 10 min. E. 68.5 ft. dist.; and a spruce 25 ins. diam. bears N. 76 deg. 43 min. E. 72.9 ft. dist., each blazed and scribed X B T 3-1307. The S. W. location cor. bears N. 89 deg. 19 min. W. 111.7 ft. dist., an oak stake 2 ins. square, marked S. W. cor. Old Abe.

Thence S. 86 deg. 9 min. E. Va. 13 deg. 18 min. E. 1343.14 ft. to cor. No. 4. Identical with the S. E. location cor. A porphyry stone 24x10x9 ins. set 12 ins. in the ground with a mound of stone 1 1/2 ft. high, 2 ft. base alongside, chiseled X 4-1307, whence a pine 6 ins. diam. bears N. 21 deg. 9 min. W. 24.8 ft. dist.; and an oak 4 ins. diam. bears N. 75 deg. 41 min. W. 30.1 ft. dist., each blazed and scribed X B T 4-1307. Cor. No. 1, Sur. 1306, Bonito lode, bears N. 55 deg. 15 min. E. 288.33 ft. dist. A quartz stone showing 10x7x12 ins. above ground, with a mound of stone alongside, chiseled X 1-1306; whence a pine 20 ins. diam. bears S. 1 deg. 46 min. W. 34.8 ft. dist.; and a pine 22 ins. diam. bears S. 17 deg. 40 min. E. 14.3 feet dist. each blazed and scribed X B T 1-1306.

Thence N. 0 deg. 9 min. W. Va. 11 deg. 21 min. E. 311.11 ft. Cor. No. 1, Sur. No. 649, renowned O. K. lode, a porphyry stone, showing 12x5x10 ins. above ground, chiseled 1-649, with 1 oak bearing tree 7 ins. diam. westerly 21 feet distant; and 1 fallen pine bearing tree southerly 40 ft. dist., each blazed and scribed B T 1-649 300.09 ft. E. end center, 568.42 ft. to cor. No. 1, the place of beginning. Containing a total in area of 17.854.

The notice of location of said claim is of record in the office of the Recorder of Lincoln County, at Lincoln, in the Territory of New Mexico, located by Joseph Beckman on the 14th day of March, 1896, and filed on the 17th day of March, 1896 in Book Q, page 431, deemed by quit claim to claimant A. R. Byrd, by said Joseph Beckman the 18th day of November, 1901, and filed for record on the 12 day of October, 1907, and recorded in the office of the Recorder at Lincoln County, Lincoln New Mexico, Book Y, pages 392-393.

Any and all persons claiming adversely the mining ground, vein, lode or premises, or any portion thereof, so described, surveyed, platted and applied for, are hereby notified, that unless their adverse claims are duly filed as according to law, and the regulations thereunder, within sixty days from date hereof, with the Register of the U. S. Land Office at Roswell, in the County of Chaves and the Territory of New Mexico, they will be barred, in virtue of the provisions of said statute.

HOWARD LELAND, Register.

### MINERAL APPLICATION NO. 26.

United States Land Office, Roswell, Chaves County, Territory of New Mexico.

October 28, 1907.

Notice is hereby given that A. R. Byrd, claiming a group of contiguous mining locations, to-wit: The Crow Group, comprising the Crow Lode, the Georgia Belle Lode, the Young American Lode, the Margaret Lee Lode, the Josephine Lode, and the Jennie Louis Lode, covering about 1,500 linear feet, bearing N. 80° 58' E. on each the Crow Lode, the Georgia Belle Lode, the Young American Lode, the Margaret Lee Lode, the Josephine Lode and the Jennie Louis Lode, claiming on each vein, lode or mineral deposit, and on adjoining branch lodes or veins, all bearing gold, silver, lead, copper and other valuable minerals with surface ground, about 600 feet in total width on each, the length and width of each said location being fully shown below, and on the official plat of said group, lying, being and situate in Sections 2, 3 and 35, in Tps. 9 and 10, S. R. 11 E., unsurveyed, in the Bonito Mining District, County of Lincoln, Territory of New Mexico, is about to make application to the United States for patent for each and all of said mining locations or claims, constituting said Crow Group, which are more fully described as to metes and bounds by the official plat, and by the field notes of Survey thereof, now filed in the office of the Register of the District of Land subject to sale at Roswell, Chaves County, New Mexico, which field notes of survey, describe the boundaries and extent of said group of claims on the surface, as follows, to-wit:

GEORGIA BELLE LODE, beginning at Cor. No. 1, identical with the N. E. amended location cor. and with cor. No. 4, Crow lode, of this survey. A porphyry stone 24x10x4 ins. set 12 ins. in the ground, with a mound of stone 1 1/2 ft. high, 2 ft. base alongside, chiseled X 1-4-1306; whence the cor. of secs. 2, 3, 34 and 35, Tps. 9 and 10 S., R. 11 E., N. M. P. M. bears N. 11° 48' E. 1466.37 ft. dist., a scattered mound of stones (I can find no marked stone); from which a pine 22 ins. diam. bears S. 89° E. 71.9 ft. Dist. marked T. 10 S. R. 11 E. S. 2 B. T. No other bearings available.

Thence S. 80° 58' W. Va. 14° 4' E. 1328.39 ft. Tan-bark Creek, 5 ft. wide, course S. 1457.39 ft. Road bears N. and S. 1491.39 ft. to cor. No. 2, identical with the N. W. amended location cor. and with cor. No. 3, Crow lode, of this survey. A porphyry stone 24x12x12 ins. set 12 ins. in the ground with a mound of stone 1 1/2 ft. high 2 ft. base alongside, chiseled X 2-3-1306; whence a pine 24 ins. diam. bears S. 38° 45' E. 78.6 ft. dist., each blazed and scribed X B T 2-3-1306. Cor. No. 4, Sur. No. 649, renowned O. K. Lode, bears N. 46° 35' W. 394.94 ft. dist. a porphyry stone showing 7x5x2 ins. above ground, firmly set, chiseled 4-649, with a pine bearing tree, 28 ins. diam. S. SE. 31 ft. dist., and the stump of another, 12 ins. diam. N. W. 5 ft. dist., each blazed and scribed 4-649 B. T.;

Thence S. 10° 3' W. Va. 12° 15' E. 214.59 ft. W. end center, 690.30 ft. to Cor. No. 3. Identical with the SW. amended location cor. A porphyry stone 24x10x10 ins. set 12 ins. in the ground with a mound of stone 1 1/2 ft. high 2 ft. base alongside, chiseled X 2-3-1306; whence a spruce 28 ins. diam. bears N. 0° 16' E. 59.2 ft. dist. and a spruce 18 ins. diam. bears N. 22° 11' E. 83.5 ft. dist. each blazed and scribed X B T 3-1306;

Thence N. 81° 27' E. Va. 12° 15' E. 177.00 ft. Road, bears N. and S. 296.00 ft. Tan-bark Creek 5 ft. wide, course W. of S. 1487.96 ft. to Cor. No. 4. Identical with the SE. amended location cor. A porphyry stone 24x13x12 ins. set 12 ins. in the ground with a mound of stone 1 1/2 ft. high 2 ft. base alongside, chiseled X 4-1306; whence an oak 6 ins. diam. bears N. 5° 19' E. 17.2 ft. dist. and a spruce 8 ins. diam. bears N. 1° 1' E. 35.8 ft. dist., each blazed and scribed X B T 4-1306;

Thence N. 10° 3' E. Va. 14° 4' E. 238.87 ft. E. end center, 613.76 ft. to Cor. No. 1, the place of beginning. Total Area, Georgia Belle Lode 19,640 acres.

LOCATION. This claim is located in the NE. 1-4 of sec. 3, T. 10 S., R. 11 E., N. M. P. M., unsurveyed, in the Bonito Mining District, Lincoln County, New Mexico.

ADJOINING CLAIMS. This claim is adjoined on the north by the Young American lode, of this survey; on the east by the George Washington lode, unsurveyed, A. R. Byrd, Wm. Hoyle, Chas. Hamilton, et al. claimants; on the south by the Georgia Belle lode, of this survey; and on the west by Barry's Strip, unsurveyed, Mr. Berry, claimant. There are no other adjoining or conflicting claims known.

YOUNG AMERICAN LODE. Beginning at Cor. No. 1. Identical with the NE. location cor. and with cor. No. 1, Margaret Lee lode, of this survey. A porphyry stone 24x8x6 ins. set 12 ins. in the ground with a mound of stone 1 1/2 ft. high, 2 ft. base alongside, chiseled X-1-1-1306; whence an oak 8 ins. diam. bears south 35 1/2 ft. dist. and an oak 6 ins. diam. bears S. 36° 40' W. 54.6 ft. dist. each blazed and scribed X B T 1-1-1306. The cor. of secs. 2, 3, 34 and 35, Tps. 9 and 10 S., R. 11 E., N. M. P. M., previously described, bears N. 22° 13' E. 213.78 ft. dist.

Thence S. 81° 24' W. Va. 14° 4' E. 1487.53 ft. to Cor. No. 2. Identical with the NW. location cor. A porphyry stone 24x12x3 ins. set 12 ins. in the ground with a mound of stone 1 1/2 ft. high, 2 ft. base alongside, chiseled X 2-3-1306; whence a pine 24 ins. diam. bears N. 73° 29' E. 59.9 ft. dist. and a pine 28 ins. diam. bears N. 79° 52' W. 19.7 ft. dist. each blazed and scribed X B T 2-3-1306. No other bearings available.

Thence S. 10° 3' W. Va. 13° 55' E. 86.00 ft. Middle of Tan-bark Creek, 5 ft. wide, course SE. 317.33 ft. W. end center, 634.76 ft. to cor. No. 3 in road. Identical with cor. No. 2, Crow lode, of this survey; whence the SW. location cor. bears S. 80° 58' W. 15 ft. dist. Identical with the NW. amended location cor. Crow lode of this survey, previously described. Witness cor. bears S. 10° 3' W. 72.28 ft. dist. Identical with witness cor. No. 2, Crow lode of this survey, previously described.

NOTICE TO THE PUBLIC

In another column of this paper you will see the announcement of our purchase of the stock of merchandise of Gallacher & Co.

In going into business in Carrizozo, we are not doing so as entire strangers having been in business in White Oaks for nearly 20 years. Our past history can speak for itself as to the manner in which we transact business. Our aim is to carry in addition to the stock of goods carried by our predecessors a full line of dry goods, clothing gents' furnishing goods, in fact a complete stock of everything.

The quality of our goods and prices will be right and we solicit a share of your patronage.

Yours respectfully Zeigler Brothers

**EDUCATIONAL ASSOCIATION**

We join their many friends in wishing them long life and happiness

**CHANGE OF BUSINESS**

GALLACHER & COMPANY SELL TO ZIEGLER BROTHERS.

Dec. 17 1907—To our friends and customers in Carrizozo and Lincoln county: We have this day sold our entire stock of merchandise and good will to Ziegler Brothers.

All outstanding accounts due us to date will be collected by us and all persons having claims against us will please present them at the store not later than January 1st, 1908, as one of us will be there to settle them prior to that time.

Thanking you for the liberal patronage extended us, and bespeaking a continuance of the same for our successors, and with the compliments of the season we are,

Yours truly, Gallacher & Co.

Engineer Walter Woner left the first of last week for a visit with his parents at WaKeeney, Kansas.

A most enjoyable party was given at the residence of Joseph White last evening. Music, games and conversation were the features of the evening and the young folks who took part all report a good time

Owing to the snow last Sunday the Christmas treat which was prepared for the members of the Baptist Sunday School was postponed until next Sunday, when all the children will receive a treat of candy

Dr. M. G. Paden left for New York the evening of the 25th to take a course of post graduate work at one of the large hospitals of the city. Dr. L. H. Seteff will take his place as railway physician while he is away.

for domestic use.

Order of A. H. Harvey at the Townsite Office.

**XMAS AT WHITE OAKS**

Xmas Tree at White Oaks. I came here last evening and am glad of it. I saw the children of the town in the enjoyment of a visit from Santa Claus—not in imagination, but the real thing.

He was dressed like Santa anyhow! not for a moment did I think it was Santa, for the reason that he spent too much time on this one visit, considering many tedious Engagements, but he really had on Santa's Clothes I didnt know Santa had an extra suit.

My doubt was expelled this morning when Ed. Chew admitted that Santa had on his clothes.

After a couple of hours of the same entertainment which only childhood can give with a Christmas bright expectations, with a jingling of sleigh bells, and a rustling voice on the stage and behold there was Santa Claus in all his glory.

His appearance was hailed by applause. He frightened some of the children, but the older people held to their seats firmly. Santa in a lieurely way addressed the audience. "He said"

Children and Friends. I am glad to see you. We are on the Eve of the morrow—for that matter at this time of day we always are "but" the tomorrow will be celebrated throughout the Christian world with appropriate ceremony.

Let tomorrow then take care of itself and we will attend to the money making this evening.

I have spent my life in making such preparations for this date every year, that the sunshine of happiness for children should not be closed on the morn with disappointment. Although my enterprise has called for herculean, gigantic and tremendous efforts, I confess that I enjoyed it.

Think for a moment what I have to do in one night, this is only one visit of the billions I must make.

I must have done them before The necessary celerity of my motion permits my stopping to change my clothes, these get a little warm down in the Tropics.

To be continued.
