NUMBER 37

## Death of J. B. McCaleb

Jessie B. McCaleb, 84, resident of Robert Lee community since 1925, died Saturday night in a San Angelo hospital, where he had been for the past month.

Funeral services were held at 4 o'clock Sunday afternoon at the Paint Creek cemetery near Robert Lee. The Rev. J. H. Halford pastor of the Pecan Baptist church of which Mr. McCaleb was a member for 17 years, officiated.

Survivors include the wife, three sons and three daughters, 18 grand children and 14 great-grand children.

## Local Items

Mrs. Wilbanks and daughter visited Mr and Mrs. H. I. Murtishaw who had recently moved to San Angelo from their ranch, last Sunday.

Mrs. E. V. Lowrance was rushed to hospital in San Angelo Friday.

Mrs. J. F. Keading and Miss Gloria Morton of Wichita Falls, were visiting in Robert Lee Saturday.

Wilson Carwile of Brownwood was visiting home folks Saturday and Sunday.

Leslie Wouland and Mr. and Mrs. H.C. Murtishaw and daughter Mary Grace visited with Mr. and Mrs. Willred Sparks in Sherwood recently.

Shame On Us, look at our cemetery. Somebody get behind a clean up campaign and have our cemetery cleaned up before Mother's Day.

Miss Mary Theo Lord the telephone operator had an appendectomy last week at a San Angelo hospital, and returned home on Thursday.

Pft. Nathaniel C. Brown Jr., son of Mrs. N.C. Brown of Robert Lee, has begun an intensive course of study in aviation mechanics at the Amarillo Army Air Field.

## Bond Drive

Our \$13,000,000 Bond Drive is going over Robert Lee is bearing her share. There are folks buying bonds as a savings account that never had one before, it will bear fruits when the war is over, a blessing in disguise.

Our quota for county is \$77,000 we have raised 71,714 up to Wednesday. We must get the balance Friday.

## Excellent Reviews

The English Department of the high school is presenting a series of book reviews by students. On Thursday of last week Ruth Ann Taylor reviewed See Here by Pvt. Hartgrove, and on Monday Billy McCutchen reviewed To Have and to Hold by Johnston. Melba Braswell is to review Marcia Schuyler by Hill on Tuesday of next week. Both Ann and Billy each gave excellent reviews, and the students are expecting Melva's review to be just as good as theirs.

## Penal Code

(Published at the request of the Grand Jury of Coke County, Texas.)

### Article 6909.

Every person, before he shall set up and carry on the trade or occupation of a butcher or slaughterer of cattle in this State, shall file a bond to be approved by the county judge of the county in which he desires to carry on the business, in a sum not less than two hundred, nor more than one thousand dollars, payable to the State of Texas, conditioned that he shall keep a true and faithful record in a book kept for that purpose of all cattle purchased or slaughtered by him, with a description of said animals including marks, brand, age, color, weight, and from whom purchased and the date thereof; that he will have the hide and ear of such animal inspected by the inspector or some magistrate of the county within 20 days after it is slaughtered, and that he will not purchase any cattle that has been slaughtered by another unless he hide and ears of such slaughtered animal accompany such animal offered for sale, and that he will not purchase any animal that has been slaughtered by another when the ear marks or brands on the hide accompany such animal, when offered for sale have been changed, mutilated or destroyed. Any butcher or slaughterer of cattle who shall violate any condition of said bond may be sued upon his bond at the instance of the county or district attorney of the county where such bond is given. All sums recovered by suits upon said bonds shall be paid into the county treasury, and become a part of the available school fund of such county.

### Article 1447. Penal Code.

If any butcher or other person engaged in the slaughter of animals shall kill or cause to be killed any unmarked or unbranded animal for market, or shall purchase and kill or cause to be killed any animal, without having taken a bill of sale or written transfer from the party selling the same, he shall be fined not less than \$50.00 nor more than \$800.00

### Article 1449. Penal Code.

If any person engaged in the slaughter and sale of animals for market in this county, city, town or village in this state shall fail to report to the commissioners court of the county in which he transact such business, at each regular term thereof, the number, color, age, sex, marks and brands of every animal slaughtered by him since the last term of said court, accompanied with a bill of sale or written conveyance to him of any animal slaughtered, save such as were raised by himself, which shall be specified, he shall be fined not less than \$50.00 nor more than \$8.00.

### Article 1451. Penal Code.

Whoever shall carry on the bus-

## P.T.A. Officers Elected

Mrs. Marvin Simpson was re-elected president of the association for next year. Other officers elected to serve a second year were: Mrs. Bryan Yarbrough, vice pres.; Mrs. T. A. Richardson treasurer; and Miss Eunice McLure, secretary.

Officers were then installed by Mrs. Drue Scoggens, a past pres. The P.T.A. voted to buy its third War Bond. The senior class won the representative award.

## Preaching At Sanco

Harvey Wayne Hulse of Robert Lee will preach at Sanco at the 11 o'clock hour Sunday May 2. All invited to attend.

## Local Items

H. C. Murtishaw Jr. visited home folks last Monday. He is employed at the Bombardier Field.

Mr. and Mrs. P. E. Mahon of Lamesa spent the week end visiting Mr and Mrs J. N. Buchanan.

Mr. Read Barnett left Saturday for Orange Texas to visit a brother returning home Monday.

Mrs. R. A. Stroud and Fatima Ann of Pyote, Texas, are visiting Mr. and Mrs. Frank Percifull.

Mrs. J. N. Brannan of San Angelo spent the week end in the J. N. Buchanan home.

Gifts for all occasions and we wrap them free. CUMBIE & ROACH

Business of a butcher or slaughterer of animals without having filed with the clerk of the county clerk of the county court of the county in which he conducts such business the bond provided by law shall be fined not less than \$5.00 nor more than \$200.00

### Article 1452. Penal Code.

Every person who shall carry on the business of butcher or slaughterer of animals and shall fail to keep a true and faithful record in a book kept for the purpose of all cattle purchased and slaughtered by him, together with a description of each animal, including brand, age, color, weight and from whom purchased and the date of purchase, or shall fail to have the hide and ears of such animals inspected by the inspector or some magistrate within 20 days after such animal is slaughtered, shall be fined not less than \$20.00 nor more than \$200.00.

### Article 1453. Penal Code.

Any person engaged in butchering or slaughtering an animal who shall purchase any cattle that have been slaughtered by another without the hide and ears of such animal accompanying the same, or shall purchase any animal that has been slaughtered by another when the ear mark or brand on the hide accompanying the same when offered for sale, has been changed, mutilated or destroyed shall be fined not less than \$50.00 nor more than \$200.00.

## Singing Convention

The Coke County Singing Convention will begin its exercises at the Robert Lee School building Sunday May 2, at 10:30 a. m. Don't forget to bring your lunch and song books. We are expecting good singers and hope to have a good crowd to hear them.

## Baptist W. M. S.

Mrs. W. J. Cumbie was hostess to the W.M.S. last Monday afternoon with Mrs. S. R. Young in charge of the program. Subject "Individual Witness" Mmes. Paul Good, J. H. Hunt, B. M. Gramling and Rev. Hunt gave interesting talks.

Refreshments of coconut pie and ice tea were served to those present. Next Monday will meet with Mrs. Paul Good in the Bible Study.

New Dresses arrived at CUMBIE & ROACH

## Notice

The Workers Conference of Runnels Association will meet with the Drasco Baptist Church May 4. Every one is urged to attend.

# Farmer Plots Crop Acreage Under New AAA Program; Agency to Assist Drive To Meet Record Wartime Production

Committeemen Will Carry Grievances to War Boards; Goal Is to Raise Yields Per Acre; All Problems Will Be Dealt With on Local Basis.

The 1943 farmer is on his honor! Like the boy taking an examination at school, it's up to him and him alone. He's strictly "on his own."

Under the 1943 agricultural adjustment agency plan, the farmer for the first time has the full responsibility for measuring his acreages on specific crops and reporting the results he gets. Formerly this was done by AAA employees, but the new scheme will conserve travel, cut down wear and tear on tires and cars, and decrease the use of gas and oil.

Now it is up to the farmer to check on his own fields.

He appears to be happy about this change in program administration, department of agriculture reports show. While AAA committeemen—themselves farmers—will continue to give him every assistance, the responsibility for carrying out production plans and doing his share in the national program rests with the individual operator.

Spot checks will be made periodically to determine the status of community and county production, and farmers are being asked to keep records and lay out their crops so that reports can be made easily and quickly.

Goals this year call for about 5 per cent more production than in 1942. Basis for the 1943 AAA program to reach these goals is "local action." It recognizes that the job of production adjustment—of shifting crops to meet war needs and planning acreage to the best advantage—must be worked out and carried out on the individual farms. It can't be done in Washington, say the committeemen. It must be done locally, to conform to the local situation.

Instead of a national over-all goal "formula," each state and county has been left free to adopt the means which seem best suited to the particular section concerned. Wide latitude is given the committeemen in making goal assignments. They are not only allowed to determine such assignments on a "capacity of the farmer to produce" basis. They are expected to use such a yardstick.

Capacity to produce varies according to the character of the farm land, machinery and labor available, and many other factors. Each region has its individual problems which must be taken into consideration in determining what the specific area may reasonably do in a given period.

**AAA Committeeman Will Keep Government Informed**

The role of the AAA committeeman will be that of an important go-between who keeps the government informed on the farmer's progress and problems, and the farmer informed on what the government

Committeeman will hear grievance.

expects of him and what it is doing to help him circumvent obstacles that present themselves.

Adjustment, the process of helping the farm operator to scale his crop production upward or downward to fit into the national agricultural picture, has always been one of the major activities of AAA. It helps farmers meet production problems by providing guidance and assistance in producing the kinds of crops that are needed in the required amounts, working in co-operation with other units of the department of agriculture.

Community farmer committeemen in 1942 totaled 89,000 regular elected committeemen and about 58,000 al-

ternates. County committees totaled 3,029 with 9,087 members. The county committeemen are responsible to the state offices, which in turn report to the regional offices. Uncle Sam's millions of farms depend upon the AAA committeemen to keep them informed of changing phases of the over-all national program, of the state's particular part in the 1943 farm plan, and of the numerous details having to do with production goals and how they can be met.

AAA county chairmen are also chairmen of the County Farm Transportation committees, which issue certificates of war necessity for mileage rationing, and the County Farm Machinery Rationing committees, which ration many types of farm equipment. In the matter of labor shortage, the community committees report localized needs to the county committee and war board chairman, the latter then carrying the problems on to the proper authorities.

Chairmen of AAA state and county committees head up the war boards which correlate the efforts of department of agriculture agencies to assist farmers in their war production.

Getting the right fields into the right kind of production and getting higher yields out of every acre through better farming practices is the basic theme of the committeeman's work in 1943.

**Committeeman Will Help Arrange Cooperative Action**

Among his activities is helping to arrange co-operative use of scarce machinery and co-operative transportation programs. Many localities already have worked out successful schemes for sharing trucks

Mr. Farmer's on his own.

and trailers, as well as binders, combines, picking machines and other mechanical aids to planting and harvesting essential war crops. Facilities for storage of crops are sometimes another item for him to handle.

Assistance in the various loan and purchase programs instituted by the Food Distribution administration and Commodity Credit corporation is made available through the AAA committeeman. Increased production of peanuts, soybeans, hemp (under a special program), castor bean seed, Irish potatoes, and many other crops has been greatly aided by such programs. New applications for insurance on the 1943 cotton crop will be handled by the committeeman, and he will in addition keep farmers informed of the availability of loans, insurance and payments under the program.

Program objectives of AAA also vary in certain instances from past planning. Emphasis is falling still more heavily on the need for better yields per acre. To achieve this, more attention is being given to production practices which immediately increase yields.

All-out activity in the use of lime and phosphate, contour cultivation and terracing, for example, is being urged. Over three-fourths of 1943 production practice payment funds for the country as a whole will be used to promote such "quick" helps to better crops. In the East Central region, about 80 per cent of such payments are going for promotion of this immediate-yield program.

Production practices, reports show, are feeling the "localizing" influence just as are other branches of the AAA program. Formerly the rates of payment for different practices were worked out on what might be termed a national basis. This year the various regions determine the soil building allowances for the farms in their particular areas, with relation to the particular problems involved. In the Southern region each state has its own basis for determining soil building allowances.

Reason for this localization is obvious. Production practices may be

more easily adapted to the individual areas and the individual farms within them. In turn, available funds may be used to the best advantage and with the greatest efficiency.

Acreage limitations have been removed on a number of crops which previously had such limits. Except for short staple cotton, tobacco and perhaps one or two other crops, farmers are urged to exceed their goals in 1943. This is particularly

Will aid cooperative plans.

true of dairy products and meat.

Goals for most crops are minimums, calculated as the least possible amount which will keep the national efficiency at a reasonable level, and at the same time provide for the armed services and war plant workers and give assistance to America's Allies.

AAA committeemen and the farmers, working hand in hand, are doing their best to develop and carry through the most efficient and productive individual farm programs they can. Problems of every sort stand in their way—labor, machinery, transportation and material shortages being paramount.

By their close personal co-operation, however, they make possible an equally close relationship between the farmer and his government.

America's farmers have a tremendous production job ahead of them. Demands for food such as they are now attempting to fill have never before been made upon any nation. Last year they upped production 12 per cent over '41. Another 5 per cent increase is hoped for in '43.

## Grandma Learns Blueprinting in Aircraft School

In San Diego there's one school in a great building left over from the San Diego exposition—another in a church—another even in a once-vacant storeroom. They're crammed with students the like of which has never been seen before.

Two grandmothers, one white haired, the other pink-cheeked and marcelled, bend together with compass and rulers over adjoining desks. They are both learning to be mechanical draftsmen, to turn out their share of the ten acres of blueprints required to build a single flying battleship.

"How on earth," you ask the Consolidated Vultee teacher, "do you manage to guess that a grandmother can learn some engineering, when she decides she wants to help in the war?"

"It's not so difficult at that," you are told. "First we look for evidence of artistic talent. Perhaps a woman has done painting, or drawing, or fine arts design. Perhaps she laid a career aside to bring up a family. If she can draw, and if she is intelligent, we can easily teach her mechanical draftsmanship. She is straight on her way into the engineering department."

In California, where the airframe industry of the nation centers, literally hundreds of thousands of people have gone to school, and are today at work doing precision jobs. Most of them were never before in a factory.

In an age that has been called revolutionary, here we have the real revolution.

The lure of wartime money is not enough to have done this. In San Diego, for instance, Consolidated early realized that the sort of workers needed must be appealed to on the basis of their patriotic willingness to serve.

**Kidneys Must Work Well—**

For You To Feel Well

24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood.

If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at night, swelling.

Why not try Doan's Pills? You will be using a medicine recommended the country over. Doan's stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get Doan's today. Use with confidence. At all drug stores.

**DOAN'S PILLS**

# AROUND THE HOUSE

Next time the steps need painting, try painting every other step; let these dry, then paint the others. It takes a bit longer, 'tis true, but it's a lot handier and the kiddies will love having to take 'em "two at a time."

To remove old wallpaper, wet with a solution of one tablespoon of saltpeter in a gallon of water. Works best if the water is hot.

Small bits of soap in a thin cloth bag are as effective as a large cake of soap for use in a bath.

If a little piece is chipped off walnut furniture, touch up the spot with iodine applied with a piece of cotton, then go over the surface with furniture polish.

Keep the tops of your spice tins very secure as the air tends to make spices lose their flavor.

To keep tacks handy, drill a three-eighth inch hole, two or three inches deep, in the handle of your tack hammer. Fill this with tacks and plug the end with a cork.

## It's Interesting to Watch Departments Whizz By

Desirous of bucking up business, the proprietor of a large department store engaged an "efficiency expert," whose chief delight was changing the departments round.

One day a section would be at the top of the building; the next it would be in the basement or where the restaurant used to be.

After three weeks of this an old lady approached a worried-looking shopwalker and asked if he could tell her where the hardware department was.

"No, madam," he replied wearily, "but if you'll stand here for a few minutes, I'm sure you'll see it go by."

## Day Is Lost or Gained at International Date Line

The International Date Line is a convenient name for the 180th meridian where, by international agreement, Monday (say) changes to Tuesday if one is going west and changes backwards to Sunday, if one is going east.

Obviously these changes cancel themselves out, in the long run, though to live on the 180th meridian can lead to all sorts of amusing complications.

Why is all this unavoidable? Well, we count our days by sunrises in practice. If one travels swiftly west one's day lengthens, because the sun seems slower in setting in the west. The opposite happens when we speed to the east. There must be some spot (any spot would do, but all nations have to agree where it shall be) where travelers must adopt another day or shed one.

They can get back what they have lost, or lose what they have gained, simply by turning and going back home.

## Weight of Birds

Hummingbirds, which weigh about one-twelfth of an ounce, are the lightest birds in the U. S. Heaviest birds are the wild turkey, trumpeter swan and the Canada goose, which weigh from 15 to 31 pounds.

## SNAPPY FACTS ABOUT RUBBER

Stout chains and padlocks bind each of the four wheels to the bumpers of a Trenton, N. J. woman's car when she parks it in the streets at night.

It was not until 1916 that the U. S. made its first annual appropriation for Federal aid highways. Good roads, good automobiles and good tires are companion necessities in modern motoring.

It is generally believed that at speeds below 35 mph, tire blow-outs, whether front or rear, are not particularly dangerous for alert drivers, other things being equal. Another good reason for keeping to the rubber-saving 35 mph limit!

In return for their stimulated rubber growing and collecting activities the United States has agreed to pay South and Central American countries from 35 to 45 cents a pound for rubber until the end of 1946 at least. Before government price freezing, rubber was selling in the U. S. at 22 1/2 cents a pound.

*Henry Shaw*

## How the Joneses, Hansons And Smiths Were Named

Some family names grew out of first names. Thus, we have Johnson (son of John), Peterson (son of Peter), Hanson (son of Hans), and so on. The common name of Jones also came from a first name. Long ago in England, it was the custom to speak of a man by a single name—as John or Richard, or whatnot. Sometimes the members of his family were called "the John" or "the Richards"—or "the Richards" in the case of a family with Richard as the father. The names "Johnses" seems to have been changed to "Jones," to make it short.

A great number of names sprang from occupations. The name of Smith became common in early days because there were so many smiths at work. Not only were there blacksmiths, but also goldsmiths, silversmiths, arrowsmiths and locksmiths.

### Last Chance

"Well, we have exhausted reason, logic, common sense, and justice; what more can we do?"  
"I guess we'll simply have to go to law."

The boys in Australia sent us this one. A mother kangaroo had patiently scratched her stomach three times, but when the process was to be renewed a fourth time, she snatched two baby kangaroos from her pouch, spanked them, and said: "How many times have I told you not to eat crackers in bed!"

### Literate Fellow

"I must find another tailor. This one reads too much."  
"Reads too much?"  
"Yes. Every time he writes to me he begins, 'On going through my books!'"

### Phone Conversation

Voice—Hello, how are you this morning?  
Lady—I'm splendid, thank you.  
Voice—Then I guess I have the wrong number.

### Her Touch

A parson had occasion to reprove a small boy for swearing.  
"If you feel you must say something just say 'Bother!'" he said. "Your father doesn't swear, does he?"  
"Oh no, sir!"  
"Well, then; if he were working in the garden and suddenly stepped backwards on to a rake which flew up and hit him from behind, what would he say?"  
"He'd say: 'You're back early, dear.'"

### The Real Problem

Hubby—Have you ever wondered what you would do if you had Rockefeller's income?  
Wife—No, but I have often wondered what Rockefeller would do if he had mine.

An antique is something no one would be seen with if there were more of them, but which everyone wants when no one has any.

### Love's Strength

There is comfort in the strength of love, 'twill make a thing endurable, which else would overset the brain or break the heart.—Wordsworth.

3. The rank of colonel in the army corresponds to what rank in the navy?
4. What city pioneered in introducing music into the public schools?
5. What literary work is credited to a member of the court of Croesus, king of Lydia?

6. How long is the period for which a patent is granted in the United States?

7. What is the average number of hen eggs to a pound?

### The Answers

1. Seven times.
2. A sailor is sent to the brig; a soldier, to the guardhouse.
3. Captain.
4. Boston, in 1837.
5. Aesop's Fables.
6. Seventeen years.
7. Approximately ten.

## Uncle Phil Says:

**A Popular Fallacy—**  
Some believe opportunity is a chance to rake in money without earning it.

You have to cultivate good habits. Only the bad ones grow wild.  
The man who sings his own praises is usually a soloist.

## An Old Proverb—

Never shift your tongue into high gear until you are sure your brain is turning over.

"The man who wants to marry should make a little money first," says a social worker. Afterwards his wife has to make a little money last.

Success comes from cans. Failure is packed in can'ts.

## Clean and Bright

You can believe in honor till you have achieved it. Better keep yourself clean and bright, you are the window through which you must see the world.—George Bernard Shaw.

Three Things  
Virtue and Hope, and Love, like light from heaven, surround the world.

The Southwest's recognized business training school, providing courses to fit every student's need from thorough business training to intensive shorthand, typing, or bookkeeping; also radio for both men and women. \$1.00 a year in Coke and adjoining Counties,  
\$1.50 a year elsewhere.

**Co-operation**

It is just essential for every man, woman and child to read and study about the economic frame work of our nation as it is for our senators and congressmen. Too often the whole matter is left to elected officials without moral support from home and the official is taxed beyond his ability to see through it all. Swayed by slick tongue orators with shady profit making legislative schemes for selfish motives, he is persuaded to vote for laws that pull down and destroy the very things we are working for, complacency on the part of our home folks will help to drag our problem in the dust.

This is a government ruled by the people and for the people provided we do not lose all sense of government and quit. We have a war to win first, wake up and be sure that victory is sweet.

THE **2<sup>ND</sup>** WAR LOAN DRIVE IS ON!

# Winner Take All!

There is one stark and simple fact about war which you had better get straight . . . *and quickly, too*  
**THERE IS NO SECOND PLACE IN A WAR — IT'S EITHER WIN OR LOSE!**

This war is being fought for tremendous stakes . . .

- ... for your life and your liberty.
- ... for your church and your children.
- ... for your freedom and your future.

And it's **WINNER TAKE ALL**. Don't forget that for a minute.

The winner will dictate whether tomorrow you shall be a free citizen of a free world, or a helpless serf to a "master race."

The winner will dictate whether you shall live and prosper under the Four Freedoms, or toil hopelessly in the darkness of a "New Order."

The winner will dictate . . . because the winner takes all.

The winner takes all. All you own, all you hold dear.

The winner is being decided right now... today... this very minute . . . on battlefields all over the world. Will you stand idly by . . . or throw all your weight on *our* side?

The weight of mighty tanks and planes. The weight of thousands of guns and millions of shells. The weight of billions of dollars . . . 13 billions your country asks you to lend during this Drive.

Your country wants to borrow every idle dollar you have—every dollar except what you need for the barest necessities of life.

You'll have to give up some luxury or comfort which was dear to your heart. You'll have to postpone some pleasure which you had been eagerly anticipating.

But what of it?

Your sons and brothers and husbands are *dying* out there . . . fighting your fight. Surely it is no sacrifice to *lend your dollars* while they are giving their lives.

They need your help. They need the weapons your money can buy. If one of the War Loan volunteers calls on you . . . greet him with open pocketbook. Remember, Uncle Sam's goal is 13 billion dollars in April.

Don't wait to be asked. Go to your nearest bank, investment dealer, broker, Post Office or issuing agency and lay your money on the line. Remember, it's an *investment* you're making—an investment that pays a good return and insures a happier future for you and your loved ones.

So *lend* up to the limit.

You'll sleep better for it.

There are 7 different types of U. S. Government securities—choose the ones best suited for you:

**United States War Savings Bonds—Series E:** The perfect investment for individual and family savings. Gives you back \$4 for every \$3 when the Bond matures. Designed especially for the smaller investor. Dated 1st day of month in which payment is received. Interest: 2.9% a year if held to maturity. Denominations: \$25, \$50, \$100, \$500, \$1000. Redemption: any time 60 days after issue date. Price: 75% of maturity value.

**2½% Treasury Bonds of 1964-1969:** Readily marketable, acceptable as bank collateral, these Bonds are ideal investments for trust funds, estates and individuals. A special feature provides that they may be redeemed at par and accrued interest for the purpose of satisfying Federal estate taxes. Dated April 15, 1943; due June 15, 1969. Denominations: \$500, \$1000, \$5000, \$10,000, \$100,000 and \$1,000,000. Redemption: Not callable till June 15, 1964; thereafter at par and accrued interest on any interest date at 4 months' notice. Price: par and accrued interest.

**Other Securities:** Series "C" Tax Notes; ½% Certificates of Indebtedness; 2% Treasury Bonds of 1950-1952; United States Savings Bonds Series "F"; United States Savings Bonds Series "G."

WEEKLY NEWS ANALYSIS

**OWI Predicts 6% Cut in Food Supply; Bombers Strafe Italian Supply Ports As Allies Close Axis Tunisia Trap; U. S. Promises MacArthur More Planes**

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)  
Released by Western Newspaper Union.

Typical of the harvest of Axis prisoners in the Tunisian campaign is this batch of German soldiers guarded by a lone British Tommy. They were taken in the early stages of the drive northward, after General Montgomery's Eighth army had shattered the Mareth line.

**SOUTHWEST PACIFIC: Battle for Air Control**

While Gen. Menryyo Sato, chief of the Nipponese military affairs bureau in Tokyo threatened Jap air raids on the United States, enemy planes continuing a battle for control of the air over a wide area at the approaches to Australia mounted a 100-ship raid at Milne Bay, New Guinea. Allied fighter planes, alert to the danger, shot 30 of the enemy raiders out of the sky.

Meanwhile, Allied air forces ranging over the vast battle area described by Gen. Douglas MacArthur as "our bomber line—the first line of Australian defense" attacked a Japanese convoy of six merchant ships and three warships approaching the enemy base at Wewak, 450 miles north of Port Moresby, New Guinea. Three of the merchantmen were hit, including two 8,000-ton and one 5,000-ton ships.

In answer to warnings from General MacArthur's headquarters of the increasing strength of Jap air, sea and land force concentrations threatening Australia, Secretary of War Stimson promised that enough planes would be sent to the South Pacific to counter the rising Jap power.

**TUNISIA: 34 to 3**

As the Allied armies closed in on the Axis' last mountain bastions in Tunisia, the gravity of Marshal Rommel's supply problem was shown by the heavy German reliance on aerial transport from Sicily.

That this supply problem would become even more critical was evident from two facts: 1—The Axis had lost all but three airports in Tunisia; 2—Rommel's thin supply line was being menacingly depleted by American Flying Fortress attacks.

Typical of the potency of the American aerial offensive was a raid on Axis rear bases at Castelvetrano and Milo in Sicily in which 84 enemy planes were destroyed with the loss of but three American aircraft.

With the Mediterranean at their back, the forces of Rommel and Col. Gen. Von Arnim were hemmed into an area less than the size of Connecticut in Northeast Tunisia. The Axis did, however, have the advantage of holding mountainous positions difficult for the Allies to storm.

The strongly fortified ports of Tunis and Bizerte were the Allies' final goal. Operating under the supervision of Commander-in-Chief Gen. Dwight D. Eisenhower, the British First army in the North, American and French forces in the center and General Montgomery's British Eighth army on the South steadily closed the trap on the Axis.

**MEAT: Ceilings Deferred**

Following through on President Roosevelt's directive to "roll back" the cost of living items found too high, OPA Chief Prentiss M. Brown suspended until May 17 the price ceiling schedule on beef, veal, lamb and mutton.

Meat trade sources disclosed that the OPA had received complaints that its previously proposed standard prices on these meats would have resulted in higher prices.

**FOOD: You'll Get Less in '43**

Controversies might rage over whether the Office of War Information had or had not sugar-coated its estimates of forthcoming food shortages, but the sober fact remained that civilians will have at least 6 per cent less to eat this year than they consumed last year.

Warning that the food situation is serious, OWI experts said, "There will be more or less continuous shortages of some kinds of food—such as canned vegetables (and) . . . meat products." Civilians, however, will get enough to eat. In fact, compared to the pre-war years they will have about 3 per cent more food.

Among food supplies on the debit side for 1943, OWI roughly estimated: 11 per cent less meat, 21 per cent less butter, 11 per cent less cheese, 3 to 25 per cent less canned vegetables, 27 per cent less canned and shell fish. Among items on the credit side, OWI calculated: 30 per cent more chickens, 57 per cent more margarine, 13 per cent more frozen fruits, 7 per cent more wheat and 13 per cent more rye. Listed among food supplies that will be about the same as last year were: Fresh and frozen fish, eggs, fluid milk and cream, lard and other cooking fats, fresh citrus fruits, potatoes and sweet potatoes.

**RUSSIA: Sparring Tactics**

Still sparring like prize-fighters seeking advantageous openings, the Red and Nazi armies on the far-flung Russian front held each other off in preparation for the cudgelling blows that will fall when dry ground makes movement possible.

Military activity was confined to minor skirmishes. In the Kuban valley of the Caucasus, the Russians mounted attacks which resulted in the capture of a series of pillboxes and trenches from the German defenders.

In the Donets river area the Germans attempted another offensive in the Izyum sector, but were repulsed, a Soviet communique said. North of Chuguev in the Kharkov area, Russian artillery was credited with dispersing a German infantry battalion.

**AIR RAIDS: Sardinia to Stuttgart**

From Sardinia to East Prussia, Allied bombers struck at Axis-held Europe with increasing fierceness as the tempo of "softening up" raids continued to rise. British, American and Russian planes had simultaneously taken the offensive.

Among spectacular raids was the vast British foray against the big German industrial city of Stuttgart. Observers reported that planes on this raid could be heard roaring across the British Channel toward the continent for an hour and a half.

Nazi radio broadcasts were the authority for reports that Red air forces had raided Koenigsburg in East Prussia a three times within a five-day span.

American Flying Fortresses continued to destroy Axis shipping facilities with punishing attacks on the port of Cagliari in Sardinia.

**BALKANS: Hitler Builds Fences**

Even as Hungary was reported pulling 200,000 men out of Axis ranks on the Russian front, a Rome broadcast announced that Adolf Hitler in a move to strengthen his Mediterranean defenses had called in leaders of his Balkan satellites for conference.

The seemingly frank tone of the Rome broadcast, plus reports from neutral Spain and Sweden that German engineers were dissatisfied with defense works in the Balkans led observers to believe that the Axis was on a fishing expedition for clues to possible Allied invasion plans.

Commenting on a conference between Hitler and Rumania Premier Ion Antonescu, the Rome radio said: "The Fuehrer and the Marshal restated their decision to continue the fight against the enemies of Europe until unconditional victory has been achieved."

**ARMY: Cuts Food Waste**

Better planning by mess officers and co-operation by cooks and KPs has reduced the amount of food wasted at army camps by more than half since the beginning of the year, it was disclosed when testimony of a private hearing of the senate war investigating Truman committee was made public.

Before the army's conservation program was inaugurated as much as 20 to 25 per cent of the food served at camps was wasted. This wastage has now been reduced to about 11 per cent—a saving sufficient to feed a million civilians for a year.

Figures on the extent of army food conservation were presented by Maj. Gen. E. B. Gregory, quartermaster general. He told the committee that army food purchases had to be sufficient for an average of 2,100,000 men overseas and 4,500,000 men in this country during 1943. He indicated that the average size of the army will be 6,600,000 this year.

**PLAIN TALK: Business Gets Lecture**

Silver-thatched Commerce Secretary Jesse H. Jones gave business in general some of his native Texas "plain talk" when he appeared as a speaker before the Committee for Economic Development in New York.

Pointing out that the nation cannot "indulge in another depression," but must pay the costs of this war which he said had been estimated at around 250 billion dollars, Jones said "the problem will be to provide jobs at a living wage for every person willing to work."

Business must form its own post-war plans and meet the problems ahead with its own practical solutions if it does not want the government to step in and do the planning for it.

**RENTS: No Boost Now**

Landlords and tenants were informed by the OPA that present rent regulations will be continued. In rejecting rent control change proposals by the National Associa-

PRENTISS M. BROWN  
OPA frowns on rent changes.

tion of Real Estate Boards, the OPA ruled that any such changes would be in conflict with the President's orders "to hold the line" against inflation.

Commenting on the realtors' suggestions, Price Administrator Prentiss M. Brown said that "while the proposals do not explicitly request any general increase in the rent level, their adoption would clearly achieve such a request."

While the OPA is considering a few minor changes in its rent rules, Brown asserted that so far as the basic program is concerned, "I do not intend to alter either its method or administration."

**Washington Digest**

**Terrible Hatreds Kindled By 'Blood Revenge' Spirit**

Rumors From Embattled Nations Hint of Plans For Organized Extermination of Enemy Peoples.

By BAUKHAGE  
News Analyst and Commentator.

WNU Service, Union Trust Building, Washington, D. C.

It was a soft, Washington spring afternoon. The late shifts of government workers were hurrying home. The two guardian magnolias that stand on the White House lawn were tipped with the rays of the setting sun. My thoughts were neither on this blissful scene nor on the latest news of the battlefield which I had just finished broadcasting. Frankly, I was concerned chiefly with dinner.

The announcer was just finishing the "commercial" and I was picking my hat up from the sofa in the studio when I saw the engineer beckoning to me from behind the glass wall of his goldfish bowl. He held up a paper on which was printed "Stop in News Room—Important!"

I did. The atmosphere was tense as it is frequently these days. A notice had just appeared on the news ticker to the effect that the White House was about to release an important statement.

It is possible, but not probable, that the thing we were all thinking that statement was going to announce but didn't, will happen before these lines reach print—the invasion of Europe. Until it does, we shall continue to expect it and while the busy home front keeps our nose pretty well to the grindstone, one hint from overseas and an atmosphere of suspense envelops the Capitol.

**Secrecy's Curtain**

Meanwhile, there is the feeling that tremendous things are happening under a heavy curtain of secrecy in Europe even the hint of which does not reach the press or the public.

Russia, of course, is a mystery. What is happening there? Is the remarkable Red army, which in the past has seemed to be able to draw endless men and supplies from nowhere after each crushing defeat, finally exhausted? Spring came early to the steppes this year and the Germans, if they are able, will launch their annual summer offensive a month earlier. They hope to be able to break the Red army this time and then hold back the remnants with a sparsely manned but intricate line of defense while they turn their attention to the Allies in the West.

No one knows what the strength of Russia is today. One does know that a terrible hate has been enkindled in the whole race against the Germans and it is reported that the Red army has threatened that if Soviet forces ever do reach German soil, they will leave no human being living. One story has been spread through Switzerland that if an Allies' army is on the continent when Russia breaks Germany's eastern frontiers—if she does—that the Germans will open their western front to the Allies and let them in rather than expose themselves to the Russians.

**Plan for Prisoners**

Another report has seeped out of Russia. It is continuously repeated that simply because of the inconvenience of caring for prisoners, both the Germans and Russians have been shooting men who are captured or who surrender. On the other hand, the Russians are said to be carefully preserving some of the men they take. Russian propaganda, dropped over the German lines, is very alluring. Some of the pamphlets instruct the German soldiers to surrender and bring with them the leaflet which acts as a passport.

Then, according to a report which has come in from a neutral country, the prisoners are carefully examined and a small percentage weeded out for Soviet indoctrination. They go through a long course of instruction so careful that it is said finally only 10 per cent are accepted as satisfactory. These elite are then trained to be used as the spearhead of a political invasion of Germany.

Hatred, like that in Russia, has poisoned all Europe. There is a belief now on the part of many of the conquered countries that the Germans, having given up hope of victory, intend to go forward with a systematic extermination of other races within their reach, as they have in Poland and with the Jews, so that regardless of what happens, the Teutonic stock will dominate

numerically when the war is over. To meet this, the other nations are talking about turning the tables and beginning organized mass murder of Germans everywhere the moment the Nazi armies lay down their arms.

Only the other day, I talked with a widely traveled Russian newspaper man, who said frankly that he believed this was the proper course. How powerful this spirit of blood revenge really is and whether it will be carried out, one can only guess.

Another mystery of which there are only tiny hints is the power and scope of the underground movements in the occupied countries and the extent to which Allied agents are now working hand-in-hand with the saboteurs in France and Belgium and particularly Holland. Hints leak out.

**Saboteurs**

A secret German report which reached Allied hands stated the following:

"Sometime ago, English parachutists landed near Prague. When they were held up by the local police, they obeyed the order, 'hands up.' But they carried a special device on their belts with a pistol from which cords ran to their hands. The latter fired the pistol. Thus they succeeded by a quick and appropriate movement in accounting for the policemen."

Here is a part of another enemy report, revealing the activities behind the lines. It came through Italian military channels:

"During the attack on the Fuka Aerodrome (Africa) the enemy Allied troops put up distress signals. They succeeded in enticing the sentries away from their posts for a time and successfully carried out their sabotage."

Reports have come of British saboteurs gaining entrance to factories in the daytime, planting time bombs and leaving. A device has been perfected which can be carried concealed in the hand—I have held one—attached by a clever means to a tank car or a locomotive, it would blow it to pieces. That is only one of hundreds of ingenious gadgets which have been perfected for this strange work of secret destruction that is going on everywhere. Even more ingenious are the methods which the underground organizations in France and Italy are using to obtain arms and supplies for the insurrection when the moment comes.

Some day, "an important statement from the White House" will come, heralding events many of which we have not even dreamed.

While the airplane factories turn out bombers and fighters, the air-minded leaders continue to make their air plans for peace. The latest scheme which has come to my attention is an announcement from the Northeast Airlines company which says this company has made application for a helicopter service to carry air mail and air express in New England.

These little planes that can rise straight up and hover, can land on a parlor rug. They would, in this proposed service, land on the roofs of post office buildings—provided, I take it, that the buildings are not of the rococo vintage with peaked and pointed and turreted roofs.

The service would carry first-class as well as air mail, according to the application filed with the Civil Aeronautics board. Four hundred points would be included. The little "flying automobiles" would not only fly between towns and cities but would carry mail from urban centers to the large airports where the mail would be transferred to the air liners.

A national labor service act still hovers just beyond the horizon. The chief purpose of Manpower Commissioner McNutt's intricate plans, including shifts of men from non-deferrable industry to war work is to build the machinery so that when the act is passed it can be put into effect at once.

Now that the farm labor problem has been taken off McNutt's doorstep, and with the definite "back-to-the-farm" trend, congress may ease up on McNutt and give him the money he needs to build his pre-national service machinery.

# BOMBS BURST ONCE

By GRANVILLE CHURCH

W.N.U. SERVICE

THE STORY SO FAR: Jeff Curtis and his wife, Lee, are already on their way to Tierra Libre when he receives a note from Zora Mitchell warning them not to come. When they arrive in Tierra Libre they find both Zora and her husband dead. It is Mitchell's job as chief engineer for a fruit company that Jeff has been called to fill. Later Jeff's friend Bill Henderson is killed, and Jeff suspects his employer, Senor Montaya, of murdering him and the Mitchells because they had found a clue to the strange things going on at the plantation. Other sinister figures are the company chemist, Dr. Toenjes, and the flyers, Ryden and Lannestock. A man named Collins arrives from the Canal Zone to see Mitchell, and Jeff hires him without arousing Montaya's suspicions. A talk with Jerry McInnis discloses that Montaya is part German and is dealing with the Nazis. Collins reveals his identity as a U. S. naval intelligence officer. When he and Jeff discover hidden German bombers, he realizes that there will be trouble. He has just persuaded Montaya to let Lee and the children leave "for a few days."

CHAPTER XVIII

"Buena, bueno," Montaya finally said, more smoothly. "There is no need of this heat. It will be only for a day or two. But understand, this visit must not be used as an opening wedge for regular contact with the Associated people. That I will not have during our construction period."

His dignity recovered, he turned to Emilio, who had been standing by, staring incuriously into the distance. "Help to get Senora Curtis and the children across to Riverbend."

"Si, Senor."

Curt mounted the steps. At the dispatcher's office he put in a call for his house at San Alejo.

"Hiya, Lee. Surprise. Pack for yourself and the kids. You're visiting Jerry and Marta for a day or two. They're having an anniversary dinner tonight—"

"But Jeff, what anni—" "I'm sorry I can't go. As I told you, I'm completely tied up until the new shovels are in operation. Anyway, you have a good time for the both of us. I'm sending the car for you now. Can you be ready in forty minutes?"

"I think so, dear, but—" "No 'buts,' I can't go and that's that. If you wait for me you may never see them. There's no telling when I can get a day from the job."

He hung up. This last should tell Lee the urgency of the situation without giving the operator—undoubtedly listening in—anything to chew on.

But Lee reached Tempujo by noon. The kids bounced about in excitement, clutching at Curt. He turned them over to Emilio, together with the three small bags Lee had brought.

Then he held Lee close, whispering while pretending to kiss her. "Don't look so anxious, sweet. Keep a clear face. Everything's under control, and I'll be with you sooner than you think."

He managed to slip into her palm a note folded tightly. "For Jerry." Curt then handed Lee into the boat and watched the crossing. He saw her met on the other bank—that would be Jerry, God bless him!—and they waved across at each other.

Monahan had been all day at the tractor-shovels. Their progress had been slowed today by more difficult terrain. More filling, more matting had been necessary. He returned to Tempujo along with Curt and Emilio, and after the three had showered and changed clothing, they had supper together. Collins was finishing his at a table by himself. He looked a good bit fresher than he had this morning. He'd shaved and it was clear he'd slept all day.

After supper Curt went to his office, followed as usual by his body-guard.

Eight, nine, ten o'clock came, and still Curt applied himself. There was plenty to be done, he might as well do it. Emilio looked in on him once, annoyed but making no comment. Curt merely looked up, then back at his desk again.

Ten-thirty. Curt rolled up what prints he'd been using, stacked his papers. He came to the door of the drafting room, stretching and yawning. In the middle of the stretch he stiffened. Emilio looked up, instantly alert—almost suspicious. Curt's eyes, without having turned his head, seemed to be piercing the darkness beyond the porch.

He banked on Emilio's drowsiness to keep him from realizing immediately that no one can see into darkness from a lighted space. In a low voice, keeping his lips stiff, Curt said, "There's somebody out there, out behind those palms. Size and shape looks like—Collins, I'd say. Put out your light."

As he spoke he reached behind him to side the door of the drafting room and switched off the lights there. Emilio's reaction was to snap

off the table lamp and move catlike to the door, reaching for his gun. Then Curt struck. The butt of his own gun caught the native behind the ear. Emilio went down without a sound.

Curt hauled the unconscious man into the bedroom and shut the door. He closed the hinged bamboo shutters over his window, then turned on the light in the adjoining shower room and left that door open a crack.

There was no rope available, so he ripped a sheet into strips to bind the man's hands behind him, tie his feet, his legs. He soaked these strips in water so they couldn't possibly be worked loose. He fashioned a gag, pried open the teeth, secured it in place. Then he picked up the inert form and tossed it on the bed.

Before snapping off the bathroom light a glance at his wrist showed it was ten-forty. He'd better get the crew together. Jerry should be on this side by now, to meet Monahan upriver away from lights.

On Sunday nights Tempujo settled down earlier than on Saturdays. Already most of the residence lights were out, and only one end of the mess-hall showed activity. His eyes now adjusted to the dark, Curt could see through the screen door what looked like two trunks to the palm tree in the yard. "Collins?" he called softly.

"Yo."

Curt picked up a camera and flash bulb he'd set apart earlier, then let himself out and down the short path.

For several minutes neither spoke, then as Curt was grumbling, "Wish they'd hurry, I'd like a

Emilio went down without a sound.

smoke," Collins touched his arm and pointed in the dimness.

Curt grunted. "Yeh, that's them."

Two figures were making their way toward the bungalow, taking advantage of every patch of heavy darkness. The four men joined forces.

"Lee and the kids?" were Curt's first words.

"Okay," McInnis answered. "By luck, the San Timoteo's taking on fruit. They're aboard now. The Old Man's given orders to speed the loading and be ready to pull out at daylight with whatever load they have by then. He'll get heck from Distribution," McInnis chuckled, "but I guess his shoulders are broad enough."

Monahan stopped them at a cache he'd prepared earlier in the evening, and all four shared the load—the big bundle of dynamite, the three cans of black powder, the fat coil of fuse.

Getting to the motorshed and running a car outside the yard limits unseen proved easy. Once under way, Curt sketched a quick picture for McInnis of what they'd found last night, what they were headed for.

McInnis grunted a couple of times, and at the end said, "Okay, what's the program?"

Curt went over it. At one point Collins interrupted.

"We'll get there about midnight. Monahan's job is set for one. Not sure that'll be time enough for me. Got to study those fuse mechanisms. Chances are they'll be simple enough, but I can't be sure."

"Okay, another half hour, think?" Collins considered. "We'll have

to chance it," he said reluctantly. "can't take all night. Anyway, these explosives will do the job on the planes in case I can't set the bombs for explosion. Yes, make it one-thirty."

"Okay, got it," said Monahan.

"Another thing," Collins went on, "once you men get the dynamite planted you'll have to clear out. I'll finish priming the bombs alone. Then if anything goes wrong we won't all grow halos. You'd be no use to me anyway."

Nothing happened to impede them. They reached the foot of the Quebrados in good time, despite running without lights. There Monahan melted into the night to grope his way up a trail.

As Curt and McInnis were loading themselves gingerly with explosives—the dynamite and two cans of powder—Collins spoke up.

"It won't take all three of us to break in. I'll be planting this last can to knock out that bridge behind us. Have that much done."

"Good."

Curt cut a length of fuse for the job, took the rest of the coil, and with McInnis got under way for the hidden hangars.

They reached the fence and Curt led the way cautiously to the spot where he'd broken through last night. He played his flash along the ground. Good. The leaves and debris scattered over the soft fill of the hole he'd used before was undisturbed.

"Yeh, but I don't like this, Curt. Looks too easy. I can't believe they don't keep some kind of watch. You would, I would, they're not dumber, are they? You could have got through last night by sheer luck."

"I know. It's been in my mind, too. But there's nothing we can do about it except keep alert."

McInnis' words were prophecy. It was as they were hauling at the strip of corrugated sheathing—a noisy job itself—that they heard the running feet. So there was a patrol maintained! The two men jumped away from the wall and fell flat in the dry grass. The feet pounded around the end of the building, a flash played back and forth and picked out the hole in the fence, the sprung sheet.

The guard lunged for the fence, but there came a shot from beyond it, from the other side. Collins! A quick stab from Collins' flashlight showed the German close to the fence, his arm upstretched, the man ready to spring. Another shot, and the man went down.

"Finished my job at the tracks," Collins called anxiously, "and heard this guy as I neared the fence. Then the shot. Are you okay?"

"Yes," cried Curt. "There's a hole in the fence, Collins."

He raced around the end of the building and to the front. He had a clear view to the other end of the field. A few night lights showed, as they had last night. Under one of these, the one outside the clubroom, two figures stood like statues. Men listening. Presently they seemed to relax. They moved out of the light, not fast as though alarmed, and the clubroom lights snapped on. Curt relaxed, too. The shots had been behind the buildings here, the sounds wouldn't have carried sharply to the other end—he hoped. He returned to the others.

Collins and McInnis had forced entrance to the hangar. All three had flashlights tonight, and Curt found McInnis taking a quick look-see for himself. Collins was at the bomb room door, forcing the lock. Curt and McInnis joined him.

Inside the long partition they spent a moment studying the layout. The cylindrical casings were pointed at the bulkhead, which was constructed of thick planks. When assembled, there'd be a space of about two feet between the noses of the bombs and the heavy wall.

"Okay, men, it'll work," Collins said. "Get busy on your jobs, I'll handle mine."

The room was wired with lights. Since no beam could escape outside, Collins snapped the switch and immediately got to work on a study of the first tail fuse at hand.

"Huh," he said dismally, "they're the arming vane type. Well, guess I can revolve them by hand. Nose piece, I understand that well enough. Pull the pin and they're set for impact."

These bombs were designed for loading on planes, assembled, but not set for explosion. On release from the plane, the arming pin of the nose fuse would have to be pulled, to free the mechanical restraint that prevents the fuse from firing the detonator. In the case of the tail fuse, however, that "brake" would be released automatically by the revolution of the arming vane as the bomb fell through the air.

## IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL LESSON

By HAROLD L. LUNDQUIST, D. D. Of The Moody Bible Institute of Chicago. (Released by Western Newspaper Union.)

### Lesson for May 2

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

#### CHRIST'S CHARGE TO PETER

LESSON TEXT—John 21:15-24. GOLDEN TEXT—Greater love hath no man than this, that a man lay down his life for his friends.—John 15:13.

Breakfast for a hungry fisherman—that is what our loving and thoughtful Lord had provided on the shore of Galilee. He wanted to talk to Peter, but He knew this was needful first. There are some folk who think that following Christ is a doleful matter, devoid of every pleasure. Jesus never taught any such thing.

Here we find Him with a glowing fire upon which fish is broiling, and with bread ready for these hungry men. It was just like Him thus to meet in most delightful and satisfying fellowship those who serve Him. Draw up to the fire, Christian friends who are standing afar off. You may be so timid that, like the disciples, you will not dare to call Him by name (v. 12), but if you will come, you will find that the precious fellowship will soon warm your heart.

With the meal over, Christ turned to Peter and in their conversation we find the latter required to

#### I. Face Responsibility (vv. 15-17).

With kindly persistence our Lord brought Peter face to face with his responsibility of full-hearted devotion to Him. Before service can be rendered there must be a right relationship to the Lord.

Three times Peter was asked to declare his love for Christ. Such a public confession was quite in place, before the man who had thrice denied his Lord was restored to a place of leadership. The words "more than these" (v. 15) indicate that Jesus was asking of him a high measure of devotion. It is no more than He has a right to expect of us.

The conversation after breakfast that morning was a very profitable one. One is reminded, by contrast, that few of our mealtime discussions are very useful. Many (perhaps most) after-dinner speeches and conversations yield little profit. Here is an occasion when such was not the case. One wonders whether we would not be wise to take the suggestion and turn our thoughts and those of our dinner guests to spiritual things.

#### II. Feed Christ's Flock (vv. 15-17).

We review the same verses to point out that an expression of love to Christ means nothing except as it manifests itself in service. Like Peter, we are to be diligent about feeding His flock, whether they be the young and inexperienced lambs, or the mature sheep of the fold.

We tend to specialize. Even in soul-winning some give themselves to child evangelism while others reach only adults, and would hardly think of dealing with a child. True it is that we have varying gifts, and one does one type of work better than another. But let us avoid over-specialization. Every needy soul is a challenge to us as we present the gospel.

The word "feed" should be stressed. Here again the church has frequently failed. Men and women are won to a decision for Christ, and then forgotten. Sheep must be fed if they are to grow. A teaching ministry must accompany the evangelistic effort. They belong together, and to neglect either is to fail, at least, in that measure.

#### III. Follow Him to the End (vv. 18-24).

Endlessly ingenious are the devices of Satan. He who had sifted Peter like wheat (Luke 22:31) and had rejoiced in the weakness of his denial of Christ, now saw him stepping out into victorious living. He heard the prophecy of the martyr death of Peter. So he put into his heart a question. Why should he suffer? What about John? What was the Lord going to do for him?

When our enemy cannot trip us up with temptation to personal sin, he resorts to the device of jealousy. Many promising Christian workers have become useless because they have taken their eyes off Jesus and put them on the persons and work of other Christians. Doing a work which was difficult and unnoticed but very important to God, they have felt the urge to quit because someone else seemed to have the easier task and receive more recognition.

The answer of Jesus in verse 22 plainly states that it is not the place of one disciple to judge the course of life of another, nor to gauge his own devotion to Christ by another's place or service.

## JUST

No Moss on It  
"What's that stone in Ann's engagement ring, Joyce?"  
"A rolling stone, my dear. I had it once."

Was He Surprised!  
"Who was that pretty little thing I saw you with last night?"  
"Will you promise not to tell my wife?"  
"Surely, I promise."  
"Well, it was my wife."

Selfish Thought  
"What are you thinking of?"  
"Oh, nothing much!"  
"Don't be so self-conscious."

### A Cinderella Chair Gaily Steps Out

HERE is how you can play Fairy Godmother to a kitchen chair. Pad the back as shown here, using at least three layers of cotton batting for the front of it and one for the back. Next, cut an 18-inch circle of cardboard and use it for a pattern for marking the shape of the round seat on boards or

plywood. Cut out the wooden seat and screw it to the chair. Save the cardboard pattern.

Cover the front of the chair back next, tufting it with covered buttons sewn through the back with a long needle. Sew the back of the cover in place with stitches hidden under welting. Tack a strip of muslin around the seat, and sew the ruffles to it. Now, pad the round cardboard; stretch covering fabric over it; then sew it in place on the chair.

NOTE: Readers are writing to tell us that the new BOOK 9 should be called the Victory Book as it contains so many ways to make pretty things for the home that could not otherwise be had for the duration. Copies are available by mail post-paid for 15 cents. Address:

**School Closes May 14**

The 1942-43 term of the Robert Lee Public Schools will close Friday, May 14, 1948.

On Sunday evening, May 9, 8:30 P. M., The Rev. E. D. Henson, pastor of the First Christian Church in San Angelo, will preach the Baccalaureate Sermon. The services will be at the Methodist Church.

Friday evening May 14, 8:30 P. M., the Commencement Exercises will be held at the High School Auditorium.

Due to Rationing and other interferences, there will be no other programs in connection with the closing of school. We hope to have the programs at the end of school for another year. All patrons and friends of the school are cordially invited to attend these two services.

Geo L. Taylor, Supt  
Robert Lee Public School.

**Notice**

Farmers who sell butter will not be required to register on form R 1609 until after May 1, and that all they need to do until then is keep a record of their sales and the stamps they collect for such sales and be in position to make a report on these sales when they register.

**Wheat For Feed**

Farmers of Coke County who wish to purchase some of the feed wheat released by the government should place orders at the county agents office at once. The price of this feed wheat is \$1.04 per bushel. Try to place your orders by Saturday, May 1, for this feed wheat.

Signed: Travis B. Hicks
