## Miss Marian Gilbert Becomes Bride Of Sgt. J. S. Craddock, Jr.

Miss Marian Gilbert, daughter of Mr. and Mrs. H. M. Gilbert of Carbon, and Sgt. J. S. Craddock, son of Mr. and Mrs. J. S. Craddock of this place, were married Saturday at 9 a. m. in the First Methodist Church in Denton. Rev. Walker, pastor of the church there, performed the ceremony.

The bride, given in marriage by her father, wore a dress of black crepe, trimmed in lace, with a black lace hat and black accessories. Her corsage was a white orchid.

J. S. graduated from Robert Lee High School and received his degree from Texas Tech. The bride graduated from the Carbon High School and this month received her degree from North Texas State Teachers' College, Denton.

The couple will be at home at Camp Canlan, California.

Mrs. E. T. Sparks had a reunion of her family last Sunday and a write up of the occasion will be in next issue.

### REQUEST

Mr. R. B. Allen requests the public to meet at the courthouse Saturday afternoon, at about 2:30 o'clock, to discuss the feed situation.

We failed to include all items in this week's issue. Thanks for your indulgence.

### Game Protection

Murrell L. Buckner, Chairman of the Texas Game, Fish & Oyster Commission, and Gene Howe, a member of the Commission, arranged for the distribution areas and supervised the planting. "We are in hopes," Mr. Warner says, "that three years from now there will be a short open season on Hungarians in the Southwestern states." He points out that the Huns are great migrants, and believes that the Texas stock will in time overflow into neighboring areas of just as the birds migrated from similar climate and conditions, their original planting all the way from Western Alberta thru Quebec and Ontario, until now there are literally millions of these birds in Canada and our own Northwest.

A real honest to God effort to propagate Hungarian Partridge in the Panhandle of Texas gives high promise of success—and points the way for similar efforts in other parts of the country.

The dry hot weather has made it necessary for our city to make some added arrangements for water. Fortunately the pipe line crossed an underground supply of water and this is being tapped at a nominal expense.

**Two Million More Women Needed for War Plants; Twice That Number Ready, Says Census Survey**

**Must Replace Men At Lathes and Forges To Supply Armies**

By ELLIOTT PINE

Released by Western Newspaper Union. Nearly two million more women must be recruited for war jobs before the end of the year, says the war manpower commission. This is as many as entered industry in all of the twelve months between March, 1942, and March, 1943. In that period 1,900,000 women took over factory work of all sorts, as well as transportation and communications tasks that used to be considered exclusively men's fields.

These two million women will have to be found, along with 800,000 older men, handicapped workers and others not now employed, if vital production is not to lag in the victory phase of the great conflict, WMC officials warn. The nation has every confidence that women will come forward to man the machines.

According to census bureau surveys, there are about four million women available and willing to work, although these potential workers have only been registered in a few large cities. There are no doubt many thousands ready to help if they knew they were needed.

Women seem to be able to do almost any work that men can. Skeptics have had to admit, time after time, that they were wrong. For many years women have been employed in light factory work, like sorting parts, packing, dipping chocolates, canning vegetables, and so on, but whoever expected to see them in roundhouses, wiping locomotives, shoveling sand, or operating huge cranes and lathes in shipyards, or doing welding? Well, women are doing all these things, and doing them well. They have had to learn to use unfamiliar tools, and new ways of thinking and acting, and they have done it in a hurry.

It's in the heavy industries that the entrance of women is most startling. Figures show that during a one-year period employment of women in munitions increased 69 per cent, 36 per cent in steel making, 50 per cent in electrical manufacturing, 62 per cent in chemicals, 164 per cent in shipbuilding, and 184 per cent in aircraft factories!

These huge increases were not in jobs generally called light. While there has been plenty of need for help in all the clerical and light factory lines, the real openings have been in the heavy mechanical trades. It stands to reason that with heavy metal construction multiplied many times by war demands, and millions of men going to war, there must be a great lack of technically trained employees. Women have been the answer in Europe and they have been the answer here. They have cheerfully gone to training schools, obeyed rigid shop discipline, worked long hours at hard and unaccustomed tasks, and earned high praise from hard-bitten executives. Despite worry about "absenteeism" in some quarters, women have not been away from their jobs unnecessarily, in most cases.

**More Than 15 Million.**

At the end of March, there were 15,200,000 women gainfully employed, according to Chairman McNutt of the War Manpower commission. Of these 14,100,000 were in non-agricultural work, so about a million were on farms. Of course, all these 14 million women were not

When Mrs. Winifred Tennilli's husband was drafted, she took his place at this machine in a war plant in Ohio. She is shown pressing a button which started construction of the first airplane parts made in the plant.

strictly war workers, but most of them were doing things that were necessary, such as clerking in bakeries, or running elevators, or operating laundry machinery. It must be remembered that the civilian economy must be kept running, and that making cartridges and plane parts are not the only vital services in wartime.

But it is the women in heavy industry who have come forward to fill the breach, somewhat to the joyous surprise of everyone. A sample list of the work women are doing is given by Laura Nelson Baker in "Wanted: Women in Industry." She says women are "Sewing uniforms and barrage balloons, assembling radio tubes, drafting, wiring assemblies for bombers, inspecting, making gas masks, riveting, welding, operating gear cutters, lathes, grinders, drill presses and saws. These are but a few of the well-paid jobs that women are taking over from men. Often they show men up by their efficiency."

Many times women have found better ways to do the operations men have been doing for years. There have been many improvements in working conditions put in for the benefit of women that will no doubt remain when men return to the factories. Some of the changes introduced are, according to Mrs. Baker: "Safety devices, opportunities to change posture and position, machines at the right working height, and other provisions against fatigue are now in general practice. Steel jigs too heavy for women to lift were replaced with masonite jigs weighing less than one-tenth as much. Engineers put a new lever on a spinning lathe so it could be operated with 70 per cent less exertion than before."

So women are able to do things that used to require strength and endurance, by having a few changes

Women with technical educations are needed in research. Catherine Ferguson, a graduate of Northwestern university, where she majored in metallurgy, is assisting in the hunt for new alloys to replace strategic metals such as nickel and aluminum. She is shown beside a furnace in the laboratories of the General Electric company at Schenectady, N. Y., reading an electric pyrometer, or high temperature thermometer.

made. In fact, strength is becoming less and less important as machines take over the duties of muscles. Overhead cranes carry castings and other parts around from lathe to lathe, and shop trucks haul materials and tools about the huge plants. In really big factories, particularly in the aircraft industry, the workers ride about in busses.

Even with all these aids, war work is no "featherbed." In the shipbuilding yards, for instance, women do strenuous, dirty work, wearing cumbersome costumes for long hours. Forty-eight-hour weeks are common, and overtime is the rule some places that have been launching ships at unbelievable rates.

**Get Same Pay As Men.**

Women shipyard workers are paid the same scale as men for the same kind of work. The scale is quite attractive, too, but the work, as said before, is hard, and somewhat dangerous. Every shipyard maintains a plant hospital with doctors and nurses in constant attendance. Workers are urged to report every accident, no matter how trivial.

In the aircraft industry, too, many thousands of women are helping to turn out the 7,000 planes a month that are needed to smash the Axis. Airplane manufacturing requires people able to work to fine tolerances, to be amazingly accurate, and yet speedy. In the modern plane there are hundreds of operations necessary, and women are working at most of them. Except for a few highly technical jobs, where women have not yet been able to get in the years of experience necessary, they are doing everything from drafting to test-piloting. At the present pace, women will be able to make complete airplanes without any help from men!

This is a highly paid field, with much overtime work. Most women engaged in it have taken considerable training before entering, and

many have had some technical education in high school or college. There are comparatively few airplane factories, and most of these are located near big cities, as Los Angeles, Detroit, and Chicago. Because it is such an attractive field, women have gone into it eagerly, and there is not so much demand for new workers here perhaps, as in

In the huge ammunition plants that have made the United States the "arsenal of democracy" women can be found in many capacities. This lady war worker is tapering shell cases for anti-tank guns at the Frankford arsenal in Philadelphia.

some of the less glamorous industries.

One of the latter is the chemical industry. Here the work is not so arduous as in the manufacture of ships or planes or tanks, but it is just as vital to the success of the war. The wage rate is not so high as in the metal working crafts and similar lines, but it is still very interesting.

Chemical workers generally need some training before starting in the plant, but high school chemistry is often sufficient background for one of the advanced positions. There is opportunity for after-war careers in this field, probably more than in most other lines.

**Safety Pins Necessary, Too.**

While manufacturing of planes, guns, tanks, and other weapons and equipment used directly in combat is holding the spotlight, there are thousands of other articles most important to the army and navy that are made by companies turning out their regular peacetime products. Army quartermaster corps officers say that they buy at least 18,000 articles in the open market, that is, the same goods that are made for civilian use. Women are needed to make all these things, both for servicemen and for civilians, who must live during wartime too.

Those women who are employed on farms are doing a most necessary job, of course. They should not be tempted to leave their food production to go to a factory. Food is a "munition," and is so recognized in military circles.

With all this change in the traditional role of women, however, social minded thinkers are pointing out alarming possible after-effects when the war ends. They ask whether women who have been earning high wages and have achieved a large measure of independence are going to be content to return to their homes and live on the comparatively lower standard that their husbands' income will provide? Or whether there will not be more friction than ever between married people, as wives who formerly worked at high rates become dissatisfied with the frequently drab task of maintaining a home and caring for children? Sociologists, clergymen, jurists and others interested in social welfare are perturbed about what may happen.

There is also grave concern voiced about the effects of the times on children of war workers. Mothers who are away from their children for long hours are not able to give them that care and affection that no agency can supply. Many children do not get even the inadequate supervision of playground directors, kindergartens or nurseries. The results of haphazard parental direction in formative years may be a serious matter, a few years hence.

But this is war, and war is always profoundly disturbing to the social fabric. More optimistic commentators believe that America can recover from these shocks and come out of the war with conspicuous gains. Having millions of women who can do skilled work is hardly a thing for any nation to deplore. New products will mean a higher standard of living and thereby better health and educational opportunities for all.

**YOU WOMEN WHO SUFFER FROM HOT FLASHES**  
If you suffer from hot flashes, dizziness, distress of "irregularities", are weak, nervous, irritable, blue at times—due to the functional "middle-age" period in a woman's life—try Lydia E. Pinkham's Vegetable Compound—the best-known medicine you can buy today that's made especially for women.  
Pinkham's Compound has helped thousands upon thousands of women to relieve such annoying symptoms. Follow label directions. Pinkham's Compound is worth trying!

**When Your Back Hurts**  
And Your Strength and Energy Is Below Par  
It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood.  
You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder.  
There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. It is better to rely on a medicine that has won countrywide approval than on something less favorably known. Doan's have been tried and tested many years. Are at all drug stores. Get Doan's today.  
**DOAN'S PILLS**

# AROUND THE HOUSE

These hot nights place your fan in an open window, facing the room. The air should not strike sleepers.

People with normal digestions will have no trouble digesting hot, new breads if they are eaten together with roughage foods and not in excess.

After filling jars in canning season test them for leaks by tapping the bottoms with a knife or spoon. The sound will tell whether or not the jar is sealed.

Oil, grease and tar stains respond to kerosene. Some women put a cup of kerosene in the suds when washing work clothes.

Household ammonia will remove finger prints from window panes and glass tabletops.

A large piece of cellophane placed behind your table-top stove keeps grease spots off the wallpaper and is much more attractive than a piece of oilcloth, as it allows the wallpaper design to show through.

## Here, at Least, We Have A Man of His Word!

Jones looked coldly at his friend Smith. "A short time ago," he said, "I thought you never meant anything you said. Lately I have changed my mind."

"Oh," replied Smith, somewhat surprised, "and what caused you to change your opinion of me, may I ask?"

"You remember borrowing five dollars from me?"

"Yes."

"You said that if I lent it to you, you would be indebted to me forever."

"Yes."  
"Well, you're keeping your word like a man."

## Uncle Phil Says:

A GOOD principle, not rightly understood, may prove as hurtful as a bad.

One would rather tip than have others think one had "views" on tipping.

Half a loaf may not be better than no bread at all. It depends a great deal upon the baker.

Heaven is where no unkind word is spoken.

One may well wonder if mosquitoes believe the slapping sounds to be encores.

## Prospectors Interested In Plant That 'Eats' Gold

The plant known as "horsetail" or "scouring plant" is actually a gold eater. Found most commonly where gold is present in the soil, this plant absorbs gold from the soil and stores it in its tissues. Although approximately 4½ ounces of gold is found in a ton of horsetail, prospectors are not interested in the plant as a source of gold but, rather, as an indicator of gold in the ground. Because of its high silica content, this plant was also a favorite in olden times for scrubbing table tops, pots and pans.

## \$5,000-Acre Oasis

The Kufra Oases in the heart of the Libyan desert are among the world's most fertile spots, says Collier's. Consisting of five cities with thousands of inhabitants, they contain more than 1,500,000 trees, at least 1,000,000 more of which are date palms standing on land valued as high as \$5,000 an acre.

## ASK ME ANOTHER?

A quiz with answers offering information on various subjects

1. What was the most important naval battle of World War I?
2. What was the population of this country when Washington was President?
3. What is the approximate cost of training a U. S. pilot?
4. If it is 7 p. m. in New York, what time is it in San Francisco?
5. What is the average length of time spent by an American soldier at his meals?
6. What is the scuttle butt on a ship?
7. What is the largest army hospital in the United States?

### The Answers

1. Jutland.
2. The population was 3,929,000.
3. For a trained pilot, \$27,000.
4. It is 4 p. m.
5. The average length of time spent by an American soldier at breakfast, 19 at dinner, 17 at supper.
6. A drinking fountain.
7. The Holleran General hospital on Staten Island occupying 383 acres, with 43 brick buildings, including auditorium, recreation hall, mess buildings and garages.

## Named 'Old Glory'

"Old Glory" was first used as a designation for the Stars and Stripes on March 17, 1824, by William Driver, a sea captain of Salem, Mass. The particular flag to which he addressed the name was one presented to him by a committee of ladies as a birthday present.

### Sensitive Dogs

The German shepherd dogs that accompany coastguardsmen on night patrol duty can detect the presence of a stranger within a surrounding area of 350,000 square yards.

### NOTICE

F. A. Rix, Deputy U. S. revenue collector, will be in our city at the State Bank, Sept. 3, to help you file your Estimated Income Tax returns for 1943.

Mrs. Lizzie Hester returned to Rotan Saturday, where she will make her home with her daughter, Mrs. Miller Montgomery and family for a few months.

### First Lady Of Texas

Photo by Wynn Richards

Mrs. Coke Stevenson Jr., First Lady of the State of Texas, poses with her daughters, Scottie Gayle, standing, and Linda Fay, in front of the stately Governor's Mansion at Austin. An ardent supporter of cotton, Mrs. Stevenson is wearing a tailored dress of white pique. The little girls are wearing big and little sister dresses of striped chambray, with eyelet ruffle pinafores. This portrait will be published by the cotton industry in the July issue of Mademoiselle as the fifth presentation of the industry's "First Lady" series.

### Columnist Interviews "Old-Timer"

Boyce House, of "I Give You Texas" fame (left), believes in getting the colorful stories of Texas history from those who know them at first hand. Here he is interviewing John Justin, oldest of the Justin Boys of Fort Worth, whose father, in 1879, opened a little shop in Old Spanish Fort that has grown into the world's greatest cowboy boot factory and the only men's dress shoe factory in Texas. House is heard by 300,000 each Sunday at 12:45 p. m. over Lone Star Chain stations and his "column" appears in over 200 newspapers, with 1,000,000 readers.

**What You Buy With WAR BONDS**  
4 for 1

U. S. destroyers and other anti-submarine vessels of the Navy are equipped with quadruple tubes, meaning they are capable of firing four torpedoes simultaneously, making it more difficult for the target to escape.

Modern warfare is the most expensive destruction the world has ever experienced both for the destroyed and the destroyer. There is no point where we can stop in this war this side of peace so all of us will be required to buy an extra \$100 Bond in the 3rd War Loan.

## Good Living

Once upon a time a successful man decided to take a recess from business, and travel. Before leaving, he set up a budget to continue operations, appropriating substantial funds to three subordinates; 62½% to A, 25% to B and 12½% to C. When, after a long time, the head of the firm came back and asked for an accounting he learned that A and B both had doubled their money but the incompetent Mr. C had barely saved his principle.

What happened after that? Well, the management dismissed C and assigned his appropriation to the especially capable Mr. A. The story is told perfectly in Matthew 25:14-30. In this text is the origin of the term "five-talent man" meaning a person of exceptional ability in matters of business. It shows why business prospers in the hands of capable, energetic people. It is one of the many parables of Jesus.

## A Singular Gift

Some people naturally have more money-making ability than others, just as some have more musical talent or more eloquence in public address. There is no end to a list of skills at which men have varying abilities, for new crafts are being created every day. But the knack of making money is in a class by itself, at least in the estimation of most people. It is a skill desired by many but admired by few.

It is not unusual to hear people speak with contempt of the money-making skill and, on several occasions, curiosity has led me to ask them why they did it. Some answers have been long and some short but they all have agreed on one point. Every answer implied that accumulating capital is selfish. One woman said, "Musicians play and sing for all to hear, artists make pictures for all to see, but the man who piles up money is helping only himself."

## How Earnings Come

Hers was a tell-tale answer. It disclosed considerable prejudice and not much thought. The truth is that a man with moneymaking ability is almost invariably a blessing to his community. Of course a miser's money is no good to himself or anybody else, but people who know how to assemble capital, put it to work and manage it well, are public benefactors. Such men improve incomes for people around them more than for themselves.

The best wages are paid only where big investments have been placed and where good profits are being made. Learned economists have scientific methods of proving that wages increase with the amount of capital invested, but it's more than a mere theory. It is a thing anybody can see by looking about at other people's jobs. Common sense teaches that (1) in the long run people get paid for what they produce, (2) with good equipment they can produce more and earn more, (3) but it takes an investment to provide the equipment.

## The American Plan

Think of six foreign countries; any six you can name, large or small, rich or poor. The national income of the United States of America is equal to that of all the foreign six put together, no matter how you select the best half-dozen of the lot. This means that the average American earns far more money than the average citizen of any foreign country, and accordingly lives better.

Somebody is sure to ask: "How does this affect me? Of course our country is rich but the big corporations have everything gobbled up. National income and averages are nothing but statistics and I can't spend them. If I walk down the street and meet the millionaire who owns the plant where I work, his wealth and mine may average above \$500,000 but that doesn't make me any richer. What about me?"

## Protect Investments

The answer to such a question is plain and reasonable: Every workman in any plant is richer because of the investment in it. Wages in America are twice as high as in England, three times as high as in continental Europe and six (sometimes 20) times as high as in the Orient. It is because only in America are workmen backed up with 4.5 horsepower of installed equipment apiece, an investment of \$8,000 for the average workman's job.

Do American workmen earn more because they work harder? No indeed! They don't work as hard or as long. Their pay is in proportion to their production: twice that of an Englishman, three times that of an European, six times that of a Jap. The necessary investment has been made by men who have prospered

WEEKLY NEWS ANALYSIS

**Italy's Industrial Belt Feels Weight Of Continued Allied Bombing Attacks; Grain Crop Production Shows Decline; U. S. Airmen Hit Both Ends of Pacific**

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)  
Released by Western Newspaper Union.

**ITALY:**

**Toe and Thigh**

As the bulk of the German forces streamed across Messina straits from Sicily to the big toe of the Italian boot, Allied bombers struck at Italy's industrial belt high on the thigh of the leg-like peninsula.

As the final curtain was being drawn on the Sicilian campaign, suicidal German rearguards planted themselves in the craggy island's hill tops and mountain sides, and with mortar and machine gun fought

Entering Palermo with American troops, Private Joseph Mole of Jamestown, N. Y., found a 11-month-old abandoned waif named Josephine, seen in his arms. Relief authorities took over her care.

Allied advances fiercely, as the bulk of their forces were evacuated.

In those last hours, the German rearguards' position became more precarious as daring units from Gen. George S. Patton's American 7th army landed behind their lines, and aided by naval batteries and dive bombers slashed their way through bayonets to firmly entrench themselves on shore.

Despite heavy anti-aircraft fire which was said to have thrown up a wall of steel, waves of Allied bombers hit the important industrial center of Milan. Terrific detonations could be heard on the Swiss border miles away as the bombers pushed their way through the flak to drop their incendiaries and block-busters.

**DRAFT:**

**Induction Order**

Now that Selective Service officials have authorized the drafting of fathers October 1, plans have been drawn for induction according to the importance of a man's occupation.

Under the new plan, a new classification known as "super-eligibility" would be created, under which certain skilled jobs in direct war production would place the employee last in the draft list.

The plan also would extend the list of non-essential jobs, holders of which would be eligible for immediate call, regardless of number of children. In this case, such men would be given the opportunity to switch to more essential industries.

Thus, those in non-essential occupations would be called first, before essential and "super-eligible" employees. About 300,000 fathers are to be drafted this year.

**RUSSIA:**

**Fighting Unsurpassed**

Russia's resurging manpower rolled like a tidal wave over the endless Russian plains, and Germany's stubborn armies gave under the weight.

To the north, the Reds drove on Smolensk from two sides, leaving the Nazis a 140-mile gap in which to retreat along the corridor Napoleon Bonaparte used over a hundred years ago to pull his ragged and beaten army out of the country.

To the south, the Reds bore down on Kharkov, like they bore down on Orel, from three fronts, the north, east and south. Possessed with no natural fortifications, battered Kharkov, once the mighty "Pittsburgh" of Russia, lay exposed on the barren plains to the Reds' massed fire power and troops.

**AGRICULTURE:**

**Below '42**

Total production of the five leading grain crops was set at 5,282,000,000 bushels for 1943, 700,000,000 less than harvested last year, on the basis of estimates of the department of agriculture.

Because of favorable growing conditions in July, the department looked for a corn crop of 2,874,711,000 bushels against last year's harvest of 3,175,154,000; a wheat crop of 834,894,000 against 981,327,000; an oats crop of 1,189,546,000 against 1,244,255,000; a barley crop of 348,848,000 against 426,150,000, and a rye crop of 33,314,000 against 57,341,000.

Combined production of the four feed grains—corn, oats, rye and barley—was estimated at 111,000,000 tons below last year's yield. Soybean harvest was set at 200,328,000 bushels.

Milk production held close to last year's level and egg output was at a peak, except in the West.

**PACIFIC:**

**Hit Both Ends**

While American troops hemmed in the last surviving band of Japanese on New Georgia island in the Solomons, U. S. airmen lifted their Liberator bombers off of the Aleutian runways and headed them for the northern-most chain of islands of the Japanese empire.

As the Liberators rumbled over these islands, known as the Kuriles, 40 enemy fighter planes rose up in defense. But the Americans opened their bomb bays and death and destruction tumbled on the designated target areas. Two Liberators were shot down, but the others swung their noses homeward to complete the 1,000-mile trek.

Bad weather made the jungle on New Georgia a stew, but nevertheless

Latest addition to the U. S. fleet is this new aircraft carrier, Bataan.

less U. S. Doughboys slogged through the mire to complete encirclement of the remnants of the Japanese force on the northwest coast of the island.

**ALLIED MEETING:**

**Politics and War**

With Allied forces at the gates of the European fortress, with Marshal Pietro Badoglio's military government of Italy reportedly receptive to peace terms, and with Russia having indicated willingness to negotiate with a "democratic" Germany purged of Nazism, Prime Minister Winston Churchill and President Franklin D. Roosevelt came together for their sixth personal meeting of the war.

Flying to the North American continent with Churchill was a staff of military and naval chieftains, and joining them for discussion were ranking U. S. army and navy officers. The combination of these staffs indicated further operations of joint character, such as those in North Africa and Sicily, where the services of the two nations teamed for effective action.

As Churchill and Roosevelt met, Russia threw a bombshell into the diplomatic picture by declaring that Premier Joseph Stalin had not been invited to the conference, and therefore neither he nor an accredited Soviet representative would attend. Russia's diplomatic jockeying to share in the dominion of Europe after the war will be one of the Allied leaders' chief considerations.

**IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson**

By HAROLD L. LUNDQUIST, D. D. Of The Moody Bible Institute of Chicago. (Released by Western Newspaper Union.)

**Lesson for August 29**

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

**ISRAEL'S SIN AND RESTORATION**

LESSON TEXT—Exodus 32:7-10; 34:4-9, 27, 28.

GOLDEN TEXT—The Lord is long-suffering and of great mercy, forgiving iniquity and transgression.—Numbers 14:18.

God is righteous, and cannot look with approval or in forgiveness upon sin until His mercy has been stirred and set free to act by repentance. Then He whose wrath is hotly kindled against man's transgression shows Himself as the tender and gracious God, "keeping loving-kindness for thousands, forgiving iniquity and transgression and sin."

This grace of God is fully revealed in Christ and the redemption which He brought to man, but is prefigured in the experiences of Israel under the law.

**I. God's Wrath Kindled** (Exod. 32:7-10).

There are those who would have us think of God as a benevolent old gentleman who is easily hoodwinked by clever sinners who can talk fast to cover their iniquity. Even if He does see it, He is supposed to be so tenderhearted that He overlooks their sin. Such folk had better read these words, "That my wrath may wax hot." The wrath of God is a real and awful affection of the divine nature and it is revealed against man who sins against His holy law.

The special sin of Israel on this occasion was idolatry, which is the setting up of some material symbol to represent the invisible God. Moses had been with God in the mount for 40 days. He had been the Lord's representative in their midst. His presence had evidently been the chief stabilizing influence.

Having their eyes set on a man, or a material object to take His place, they had lost sight of the invisible God.

Whatever a man puts between himself and God, even though he may at first intend it to be but a reminder, will lead him away from God.

**II. God's Mercy Invited** (Exod. 34:4-9).

Aaron had only a weak "alibi" to offer. The golden calf had practically made itself (see Exod. 32:24). How quick man is to justify himself instead of admitting his guilt. No doubt our excuses sound just as silly as Aaron's in the ears of God.

Moses knew better. The sin was dealt with in drastic fashion. When one deals with a wild ravenous beast, there is one remedy—"shoot to kill." Not only were the leaders of the wickedness slain, but the ground gold of the calf image was put into water, which all Israel drank. Thus were they all marked as sharing the guilt of this idolatry. There is a lesson here for us. America is far from God. We need to seek His face in repentance. But let us remember that we (that is, Christian men and women) are a part of America. It is our guilt, and we ought to be on our faces before God, pleading for God's mercy upon our land.

Moses was now ready to seek the Lord's mercy for his wayward people. He is the intercessor, the intermediary.

Note that God has not changed. He is the unchangeable One. His wrath is still hot against man's sin, but man has repented, and moved out of God's wrath into His love and grace. That too is always being shown to His obedient children.

**III. God's Covenant Renewed** (Exod. 34:27, 28).

Moses had broken the first tablets of commandments. The people had sinned and were not then ready to listen to any word from Jehovah. But now they were prepared to receive it, and God renewed the covenant as He again gave Moses the law.

There is no need for despair in the heart of the one who deals with God. The missed opportunity for obedience and blessing may be gone forever, but God is still on the giving hand ready to meet the returning prodigal, ready to give beauty for ashes (Isa. 61:3) and to restore the years that the locust has destroyed (Joel 2:25). Amazing grace!

In the keeping of these commandments, Israel was assured of the blessing of God. As we pointed out last week, the real fulfillment of the law came in Jesus Christ, who did not set aside its requirements, but met them all, for all who believe in His name.

**Washington Digest**

**Many Tax Laws Suggested To Get 'Nervous Dollars'**

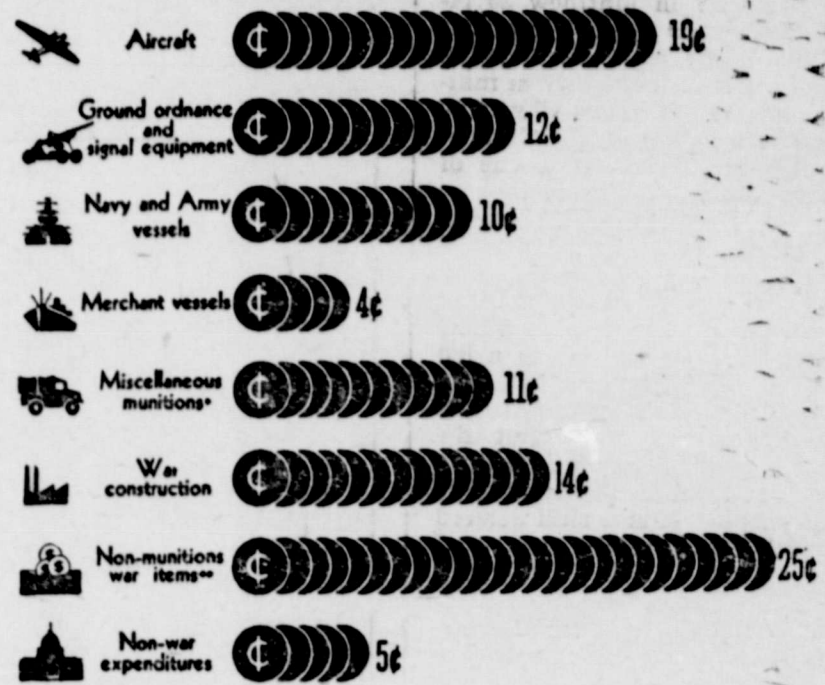

Compulsory Savings, Personal Excess Income Tax, Spending Levy Found Unpopular or Unwieldy; Orthodox Bill Seen.

By BAUKHAGE  
News Analyst and Commentator.

**'YOUR TAX- AND BOND-DOLLAR**

HOW THE GOVERNMENT SPENDS IT (First Half of 1943)

\*Automotive vehicles and equipment, clothing and personal equipment and other expenses.

\*\*Pay, subsistence, travel for armed forces and civilians, agricultural commodities for export and miscellaneous expenses.

Date-WPB

**WNU Service, Union Trust Building Washington, D. C.**

As far back as biblical days, the tax collector was an unpopular person.

Today you don't see the tax collector but you know who writes the tax laws and the folks who do (congress) lead a most unhappy life, especially in an election year such as we are approaching.

The complicated problem they face can be simply stated—think it over and figure out what you would do if you had to write a tax law. The problem is this: how to collect the most dollars and lose the least votes.

Soak the rich? Well, they have the money and it hurts them the least, but unfortunately there are not enough of them to soak. It is too bad because they are so few in number that their votes don't matter so much. (Only 46,949 people or approximately one eight-hundredth of those with incomes earn over \$10,000 a year.)

Tax the rest? That will bring in the biggest total but they are the ones with the votes.

The President says we need 106 billion dollars to run the war this year. The treasury says that out of every dollar collected, 90 cents goes to pay the war bills.

So there have been a number of schemes concocted which are aimed at getting the nervous dollars, the ones most likely to create inflation. Presumably they are the dollars that belong to the people who are now getting a lot more money than they did before the war. It would be just to take the "excess profits" to pay for the war especially because the people who are getting a lot more than they are used to are the ones who spend most freely.

So compulsory savings has been suggested. That is, making Uncle Sam collect a part of everybody's income, which would be returned after the war. Then there is a scheme to tax spending. In other words, tax the dollars which are spent on extras, dollars that get back into circulation and push up the inflation spiral. Not the dollars that go into homes or life insurance or paying old debts, but the dollars that romp off for more clothes than you need to wear, more food and more gadgets than you ought to get along with in wartime.

Then there is another tax—the personal excess income tax.

That is a tax on the amount of money that you are receiving now that you weren't receiving before the war.

**Lacking Popularity**

None of these methods is popular. There is a sentimental objection to compulsory savings. It smacks, according to its opponents, too much of totalitarianism, of an interference with the individual's personal

habits. The President is opposed to it—and his wife agrees with him—the treasury is opposed to it.

The spending tax is said to be too complicated and likewise appears to be unpopular with the treasury.

Then there is this personal excess income tax of which you will soon be hearing more. The chief objection to that tax seems to be that it is too hard to work out; that it is too hard to make it just and fair. Even the Nazis who tried it gave it up after about a year's trial.

When the personal excess income tax comes up, you will hear many arguments against it. Like many of these other "unorthodox" methods, it requires the establishment of what is called a "base period" to establish a comparison. That is, some period of time during which the amount earned by the individual is taken as a base. Then what he is making now is compared with that "base" and the difference taxed. But that is a pretty hard thing to work out because so many adjustments would have to be made for special cases that the government would never be able to examine each case and pass on it fairly.

Take the young doctor. The year before the war, he may have been graduated from medical school. Probably he had little or no income then. Then he begins to practice and in wartime, doctors are in demand. He may have made a fair income this year. Would it be fair to tax the "excess" if it were the difference between this year's earnings and the "base period" when he was earning nothing at all?

**Too Many Inequities**

Then there are many men who are getting more money now because they work longer hours or have received just and deserved promotions—all these things immediately come into the picture when you begin to straighten out the inequities, when you really try to tax a just percentage of a man's income.

And so the predictions which are being made in Washington now are that the next tax bill will be a pretty "orthodox" affair, it will simply have about the same kind of exemptions, a little higher percentage tax, and will be rushed through at the last minute after as many members of congress have objected to the clauses which they think will be unpopular with their constituents. The government needs the money and needs it quickly. The people don't want to be taxed any more than can be helped and the congressmen will lean over backwards trying to please the people.

Meanwhile, the treasury tells us that most of the money which is being earned due to the great increase in production caused by the war is going to people whose incomes are less than \$5,000 a year—seven-eighths of it. So at least seven-eighths of the taxes ought to come from that group.

# MURDER at PIRATES' HEAD

By ISABEL WAITT

W-N-U-RELEASE

THE STORY SO FAR: Judy Jason, who is telling the story, receives an anonymous letter enclosing \$500 and asking her to bid for an abandoned church to be auctioned the next day. She finds, in an old chest, the body of a man identified as Roddy Lane. The body disappears a few hours later. A fish shed burns, apparently killing an old man named Brown who is supposed to have lived there. Judy finds Roddy Lane's diamond in her handbag. Lily Kendall is found dead, with Hugh Norcross's scarf around her neck. Albion Potter gives Judy a picture of the church he has just finished. Bessie Norcross writes a confession.

Now continue with Judy's story.

## CHAPTER XVI

"She confessed to save—him!" Even I could see it, now that Victor had pointed it out. During the reading, I'd noticed a few discrepancies in Bessie's confession, but nowhere near the number he had. Take the wind itself, for instance. It couldn't have blown the blue scarf back into the Pirate's Mouth because there was a land breeze before the tide turned, and the place was entirely sheltered.

"We've got to show it to the police."

"And incriminate the brother she tried to save?"

"May not incriminate him," Victor said. "It's the cleverest thing I ever read. What Bessie says about her light not showing from the path to the bluff; little things like that. And her timing's pretty good, too, only she's forgotten Mr. Quincy was sitting on the piazza all the evening, until she wheeled him down to the church. He saw her go up to her room, before dark, and she didn't come down again. But Hugh did, he admits. I think it may have been Hugh you spoke to, later."

We were walking back rapidly to where the men were working on the boat. Thaddeus Quincy had managed the ramp somehow, and was wheeling himself toward us with his table cloth tied to his cane. He passed us, giving me a reproachful glance, I thought.

"Don't forget what I told you, Judy." And he shot a warning nod at Victor. Then he stationed himself in the middle of the road and began waving his signal.

Hugh Norcross was coming down the stairs. He came directly toward me. "Bessie says she gave you a letter for me. I don't know what's gotten into her. She won't speak to me. Locked herself in."

Was she afraid of him? I was glad I could see the men across the road and hear my aunt's movements in the kitchen. Then Bessie's despair made me forget my own fear.

"You didn't give her any more of that sleeping medicine?"

"I'll say I didn't. She takes far too much of the stuff. Why, an overdose—"

"Exactly. Don't let her have it. You'll understand when you—" I nearly said when he'd read the letter, which would have been an admission that I'd done so myself.

"You tell Bessie I'll be back soon, will you?"

"Sure," I said, glad to escape the devouring gaze of his haggard eyes.

I knocked on Bessie's door. She was crying.

"Hughie? I can't sleep! I can't sleep!"

"It's Judy. Want me to get you a cup of tea?"

"No, thank you. Did you give me the letter?"

"I heard a scrambling off the bed. Did he give you the—my medicine?"

"No. Said you couldn't have any more till night. Do let me in, Bessie—Miss Norcross. I'll rub your head if it aches so badly."

But evidently she'd flung herself on the bed again, for muffled sobs were her only reply. I gave it up finally, tiptoeing past poor Lily Kendall's room and on up into my own.

The picture of the now hateful old church stood in a corner of the hall near my door, where Victor had moved it when he'd gone to see if the \$500 was still there. It stood on a newspaper, where Albion Potter had thoughtfully placed it to save the floor. I didn't pick it up until I'd made sure about the money. It was still where I'd left it! Certain peculiarities in the letter came to my mind, and it occurred to me at least Bessie had given me some hand-writing to compare, only I hadn't examined it closely. I'd go down and try to take a look. But first I picked up the picture to put it into my room.

A wet painting isn't easy to handle, but when it's wet on both sides it is really difficult. Potter had painted the entire back of the canvas an apple green, which was even wetter than parts of the picture itself. I, too, got it on my hands,

and just when I placed the thing under one of the windows to dry, it fell over. I made a grab, fearing it would be spoiled and smooched, and caught it, doing more damage probably than as if I'd let it go. Now my hands and a bit of floor beyond the newspaper were a horrid sight. I seized the paper and tried to wipe off the place where my hand had been, mopping up the back miserably. Then I stood the picture up again and raced downstairs to wash my hands. Never heard of painting a canvas on both sides before. Perhaps the artists did it that way now, or maybe Potter had painted on the back of another picture. It didn't matter. The thing was not to miss anything outside.

I could see Mr. Quincy still waving his red banner at the dots in the harbor. The men were hammering at the bottom of the Eleanor. The boat, they called to me, was virtually water tight—they hoped. The thing was to get it to the shore. Would I go get Wylie Gerry to tell them how? It was too heavy to carry, and they were afraid they'd scrape the patch off if they just dragged it along. Weren't there any rollers?

"Uncle Wylie'll show you. He's at the bridge." If De Witt or Potter thought I was their Western Union boy they were much mistaken. I skeddaddled over to where Victor was standing beside Hugh, who had

just finished reading his sister's letter. Now he held it out to Quade.

"For God's sake, what shall I do?"

"You could destroy it."

"You read it?"

Victor nodded. "You all invited me to sort of take charge. I'll help any way I can, Norcross."

"But surely you don't think—? Bessie? She wouldn't kill an ant! She's afraid, that's all. And she'll stick to her story. You see, it wouldn't do any good to destroy this. She'd only confess all over again. She knows I'm guilty. You've got to believe me, man! I murdered Roddy Lane."

"Hugh Norcross! I—I don't believe you," I gasped, tears smarting my eyes. He didn't have the courage, I was thinking.

Victor said: "And Miss Kendall? You killed her, too, of course. Why?"

"Because she knew too much. Because she saw me coming out of Potter's room with that confounding cleansing fluid of his, and because she was on the church steps when Roddy and I had the row and I hit him. So I strangled her with my scarf. Bessie? Absurd!"

He looked like a handsome dark shadow, haunted by remorse. He crumbled his sister's letter in his hand.

"I shall tell the authorities everything. Will you agree to leave her out of this? Here, Judy," he reached in his pocket and drew out his wallet, removing a few lean bills. "Give her this."

"Don't take it, Judy. I'm telling you to keep your own mouth shut, but I suppose it's too late."

"What's all this? What's all this?" None of us had noticed the minister and Quincy, who'd come up behind

us and were listening for dear life. "God bless my soul! Not you, Norcross?"

Thaddeus Quincy wheeled back a pace and took a firmer grip on his cane, even yanking off the red cloth. "Knew it was you all the time, Norcross—last night when you wouldn't answer Judy and me."

"Yes, it was I. On my way to kill Lane."

"Good heavens, Norcross, do you know what you're saying? You don't have to admit anything," Victor said. "Less you say the better for you."

"I want to talk. I want to confess. I wish to God the police would come—say, what's Potter running for?"

We could all see the artist climbing into his car and driving like mad down the narrow Neck.

"To get Gerry to help us launch the boat."

For a moment our eyes watched the car, but our ears were tuned to Hugh. He was ranting, almost the way his sister did.

"I came down here to kill Lane for what he did to my sister. I saw him coming down the Castle driveway. We went over to the church and fought it out, man to man. Hit him too hard, I guess. Anyway, he died and I put him in the chest, just as Judy said. I ought to have locked it, but I heard someone coming."

Following the pattern—following the pattern—just like the letter.

"Hugh, let me see that a minute. I'll give it right back," I said to him. He didn't seem to care what he did. He automatically handed me the crumpled ball of a letter. I turned my back and took a good look at the writing. Neat, tiny, very individualistic. Nothing at all like mine, with the money, I gave it back to him.

"—so I tied the scarf around her neck and choked her," he was almost shouting. "But she wouldn't fall through the Pirate's Mouth, so—"

"God help us all!" ejaculated De Witt.

I could see Potter's car coming back with my uncle. "How much money was it you sent me, Hughie?" I had never called him that pet name before, but he was so distraught, and I couldn't think him capable of all those crimes.

"What ails him?" Albion Potter asked.

"He's confessed," shrilled Mr. Quincy. Anyone would have thought he was enjoying himself.

"Norcross? Well, I vum!" Uncle Wylie marched straight up to Hugh. "Keep your trap shut, young feller, me lad. Ifen you did kill Lane I guess we'll all back you up. It was self-defense, warn't it?"

"And Old Man Brown?"

"And Miss Kendall?"

The men gathered around the boat, shaking their heads and murmuring to themselves. They might be good witnesses as far as Lane was concerned, but the others—

Uncle Wylie screamed in a high falsetto, the way he did whenever he wanted anything: "Nella!"

Auntie came running. "Where'd you hide the Eleanor's rollers?"

"Hide 'em? How should I know? Up in the barn chamber, ain't they?" She stood, a trim whisp of a woman in a neat checkered bib apron, her gnarled hands on her hips. Then, catching sight of Hugh, "You sick, Mr. Norcross?"

Hugh raised haggard eyes and said nothing.

"I declare I feel a spell comin' on, too. Want some of my elderberry wine?" Her eye fell on the patch on the boat. "Land sakes! I'd rather put to sea in a barrel, 'tain't safe, is it, Wylie?"

Uncle Wylie was examining the patch. He looked at it outside and in, then he scratched his head. "Never git across the gap. Cove neither. Course we can roll her down and see. Me, I'd tear that thing off and do it right."

"Why don't you do it then?" his wife asked tartly.

"Take too long. Let's see if she'll hold water."

"Oh, what the heck!" Hugh sprang up to help get a log under the Eleanor. "Let's get going. I want the police to come. I want to be arrested before my sister comes down."

Thaddeus Quincy wheeled himself out of the way. De Witt stood with closed eyes, praying again, I thought. Potter and Uncle Wylie took hold of the boat.

Aunt Nella came down the steps and I went to meet her. She shot a querulous glance at Hugh and asked me what he'd meant. I tried to tell her in a breath.

# Smile Awhile

Her Choice  
Private Roe—I'm often compared with Lieut. James Stewart of the air force.

Private Doe—G'wan. Who would compare you with a movie star?

Private Roe—My wife. She seems to prefer Stewart.

Good Night!  
Katherine—Would you put yourself out for me?

Jack—I certainly would!  
Katherine—Well, then, please do. It's after 12 and I'm awfully tired.

One of the Many  
May—The artist says that 10,000 won't buy that picture he has on exhibit.

Sam—I'm one of the 10,000.

Smart Fella  
"Why did Sam invite only married people to his wedding?"

"Well, it's that way he figured that all the presents would be clear profit."

Bride (consulting cook book)—Oh, my, that cake is burning, and I can't take it out for ten minutes yet.

5578

REMEMBER the lovely pink and white and red Bleeding Heart plants that grew in country gardens and on country lawns? They bloomed in June along with the "pineys." The quilt illustrated was inspired by these lovely old-fashioned flowers. Block is 12 inches square. Do it in delicate green sprigged and red polka-dotted cottons.

Due to an unusually large demand and current war conditions, slightly less time is required in filling orders for a few of the most popular pattern numbers.

To obtain complete pattern for the Bleeding Heart Quilt (Pattern No. 5578) amounts of materials specified, all cutting pieces given, finishing directions, send 35 cents in coin, plus one cent postage, together with your name, address and pattern number to:

HOME NEEDLEWORK  
530 South Wells St. Chicago.

When the word went out that soldiers overseas wanted packages from home—the response was so overwhelming that Uncle Sam reluctantly had to call a halt. Today, due to shipping space, there are Post Office restrictions on packages to overseas Army men—but you can still send packages to soldiers in the U. S., and to Sailors, Marines, and Coast Guardsmen wherever they are.

When you do, remember—one of their favorite gifts is cigarettes, and the favorite brand is Camel. Sales records in Post Exchanges and Canteens show that Camel is first choice with men in all the services. So send him that carton of Camels today.—Adv.

## NO SUGAR NEEDED IN EASY-TO-MAKE ALL-BRAN MUFFINS

Here's an already favored recipe that's gaining new wartime fame... ALL-BRAN Muffins without sugar! See for yourself how the flavorsome crispness of KELLOGG'S ALL-BRAN gives these delicious muffins a texture and taste all their own!

Kellogg's All-Bran Muffins  
2 tablespoons shortening  
1/4 cup corn syrup  
1 egg  
1 cup Kellogg's All-Bran  
1/2 cup milk  
1 cup flour  
1/2 teaspoon salt  
2 1/2 teaspoons baking powder

Cream shortening and corn syrup thoroughly; add egg and beat well. Stir in All-Bran and milk, let soak until most of moisture is taken up. Sift flour with salt and baking powder; add to first mixture and stir only until flour disappears. Fill greased muffin pans two-thirds full and bake in moderately hot oven (400° F.) about 30 minutes. Yield: 8 large muffins, 3 inches in diameter, or 12 small muffins, 2 1/4 inches in diameter.

## SNAPPY FACTS ABOUT RUBBER

It did have a bearing on rubber use—the close to 24 billion gallons of gasoline used by highway vehicles in 1941. California led the states with a mark on the edge of 2 billion gallons. These are numbers for the "A" card holder to conjure with.

Tires for our fighting aircraft consume from 35 to 96 pounds of rubber, depending on the size of the plane. Inner tubes take from 24 to 54 1/2 pounds.

At a rubber plantation in Haiti, a 75-foot tree was pulled to the ground by the weight of cryptostegia vines which had fought one another to climb it.

**DEATHS FROM CANCER IN TEXAS ARE ON RAPID INCREASE**

Austin, Texas, August 26.—A steady increase of deaths in Texas from all forms of cancer is disclosed by the fact that over 45,000 persons have died of this dreaded disease within the last 10 years, according to Dr. Geo. W. Cox, State Health Officer. "The public should be warned against cancer 'quacks' and so-called cancer cures," Dr. Cox said. "Advertising of medicines and so-called cancer doctors puts dangerous misinformation before the public. Undoubtedly," Dr. Cox declared, "there are many persons who being thus delayed in seeking proper medical advice, unnecessarily lose their lives to this disease."

According to the State Health Officer there are two recognized scientific ways of treating cancer, namely, surgery and the use of radium and X-ray. Treatment must be started early and be carried out by a competent surgeon. In almost two-thirds of the cases, surgery is relied upon to remove cancerous growths, while X-ray or radium is used to good advantage in approximately one-third of the cases successfully treated. Frequently the two methods are combined.

"The greatest defense against death by cancer is early diagnosis," Dr. Cox said. "Every case is an acute emergency demanding instant attention, and it is unfortunate that so many persons suffering from cancer do not seek medical advice until beyond possibility of cure."

Dr. Cox pointed out that any unusual bleeding from any body cavity, any lump in the breast, or any surface sores, especially on the face and mouth, changed appearance of any wart or mole, and even chronic indigestion may be symptoms denoting the presence of cancer.

"Where cancer is suspected, do not delay but consult your physician at once," Dr. Cox advised. "Self-medication, serums, color lights, pastes salves, and diets are absolutely worthless in the treatment of cancer."
