News Review of Current Events "REFORM" BILL PASSED Measure Giving President Vast Powers Squeezes

Through Senate . . . May Die in House

Senator Pat Harrison of Mississippi, chairman of the senate finance ommittee, is here seen telling members of the press what his committee had done and proposed to do to the revenue measure so that it would be less objectionable to business and to the country in general. It already had made radical changes in the bill as it was passed by the house.

Wide Powers for President DRESIDENT ROOSEVELT'S reorganization bill squeezed through the senate by the close vote of 49 to 42, after a fierce fight. A motion to recommit, which would have virtually killed the measure, was defeated by a vote of 48 to 43.

Opponents of this bill are convinced that it paves the way for a dictatorship in the United States.

The measure was sent on to the house, which already has passed bills covering some of its features. There is no certainty, however, that the senate measure will ever be brought to a vote in the house. Chairman O'Connor of the rules committee said it should be allowed to slumber peacefully in some pigeonhole.

The bill authorizes the President, by executive order, to transfer, regroup, co-ordinate, consolidate, segregate the whole or any part of or abolish any of the 135 bureaus, agen- ill, and Justice Reed took no part cies, and divisions of government. Excepted from this section, however, are the federal reserve board, the corps of engineers of the United States army and the independent, quasi-judicial and regulatory estabmission, the federal trade commission, the interstate commerce commission, and the national labor relations board. It abolishes the civil service commission as now constituted, and the general accounting office. It creates a new "department of welfare," and it authorizes six more \$10,000 a year assistants to the President.

and that he had obstructed the work of the authority.

Utilities Must Register

IN A 6 to 1 decision, the United States Supreme court upheld the registration provisions of the Wheeler-Rayburn public utility act of 1935, but did not pass on the constitutionality of other parts of the law, including the death sentence for holding companies.

The court sustained an order of the New York Federal District court requiring the Electric Bond and Share company and 14 associated utility holding companies to register with the Securities and Exchange commissioin or else be denied the use of the mails and other facilities of interstate commerce.

Chief Justice Hughes delivered the court's opinion. Justice McReynolds, who wrote no opinion, was the only dissenter. Justice Cardozo, who is

The Floyd County Plainsman, Thursday, April 7, 1938

Japan's Regime in China APAN announced officially the inauguration of the "reformed Government of the Republic of China" in Nanking. This puppet state is intended to replace the regime of Generalissimo Chiang Kai-shek and is headed by Liang Hung-Tze as chairman of the new executive yuan, a position equivalent to premier.

The Chinese were still fighting the invaders desperately along the Peiping-Hankow railway and claimed the Japanese were suffering heavy losses.

Profits Tax Out

DAT HARRISON meant what he said about altering the revenue bill that was passed by the house. His senate finance committee is making the changes. By a vote of 17 to 4 it eliminated from the measure the undistributed profits tax principle, substituting therefor a flat corporation income tax of 18 per cent

As a further means of stimulating business and investment the committee adopted a provision drastically modifying the capital gains and losses tax. The committee removed capital gains on assets held for more than 18 months from the income tax category and substituted instead a flat rate of 15 per cent. which was what business and industry wanted.

In an effort to clear the way for speedy enactment of the tax relief legislation, the committee rejected a system of processing taxes on wheat, corn, cotton, tobacco, and rice, which the administration desires to finance proposed additional bounties to farmers amounting to \$200,000,000 a year.

Jews Must Quit Vienna

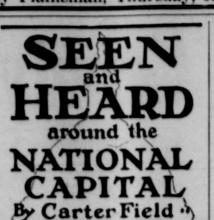

THERE are 300,000 Jews in Vienna, and all of them must leave that city within four years. This was announced in the Austrian capi-

tal by Field Marshal Goering, Hitler's right - hand man, who set forth a program for the economic reconstruction of Austria. He said: "Vienna must again become a German city. No city with 300,000 Jews has a right to call itself a German

Gen. Goering city. Vienna has to fulfill economic and cultural tasks, and this is impossible with Jews. Therefore, they must leave."

Goering said he had intrusted the task of removing the Jews to Seyss-Inquart and that it must be accomplished quietly and mercifully by legal means.

There was great rejoicing

Washington .- In considering the new naval appropriations it must be remembered that this billion-dollar program, as it is called, is in addition to the regular 1939 program, which had already been provided. Besides, it is in addition to new building now going on but authorized previously.

For instance, two battleships, totaling 70,000 tons, are now under construction. Two more of 35,000 tons each, are in the so-called regular 1939 program. But three more with 105,000 tons additional tonnage, are in the so-called billion-dollar program. This makes the total additional tonnage to be eventually added to the present United States navy 245,000 tons!

Incidentally even this may be boosted. The navy had been figuring on still bigger ships, and may get an amendment in before the keels are laid, which would make the tonnage of each of the three battleships provided in the new billion-dollar program as much as 43,-000 tons. Which, if it happens, as it probably will, would make the boost, in battleships alone, 269,000 tons.

No new aircraft carriers were provided for in the regular 1939 program. But there are two now building, with a total tonnage of 34,000. In the billion-dollar program two more, with 30,000 total tonnage, are added, making four new carri-

ers and a total of 64,000 tons to be added to the navy.

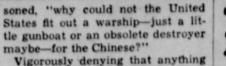

Eight cruisers are now under construction, totaling 80,000 tons. The regular 1939 program added two, totaling 10,000 tons, but the billiondollar program adds nine more, with 68,754 tons additional. Thirtysix destroyers are under way, with a total of 56,200 tons. The regular 1939 program added eight more, with a total of 12,000 additional tons. Along comes the billion-dollar program with 23 more, adding 38,000 tons.

Needs New Destroyers

So no less than 67 destroyers are to be added to the navy!

This is not so surprising when one considers the history of destroyers in the American navy. At the time

Vorld war thi e type

of the kind would be tolerated, an official pointed out the rigidity of the neutrality laws, and the President's proclamation so recently restated by Secretary of State Cordell Hull, and then slyly added:

That's Different

"Of course, if the Chinese should succeed in doing anything of the sort from any other country's ports, it would be none of our business. Virtually we have recognized a state of belligerency, and even if Japan should argue that the commerce raider was in truth a pirate, it seems to me we have been bothered, in the very recent past, with so called pirate submarines in the Mediterranean."

"I don't think such a thing would annoy the Russians any," another official commented slyly. "It just might be that they would lend a little help."

This last, so far as is known here, is not in the picture at all, though use of adventuresome young Americans is said to be distinctly a part of it. For the scheme, the Chinese would need men experienced in handling small naval guns. though they need not be anything like as expert in their line as the American aviators already aiding the Chinese.

The idea of a submarine, it is said, has been considered but reluctantly abandoned. Unless the Russians would actually supply an experienced crew, it was considered impossible, it is understood, to obtain men capable of operating such a craft, even assuming the Chinese could get possession of an undersea boat.

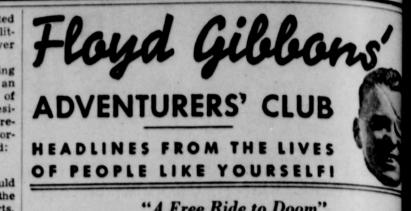

But even a little gunboat, it is contended, could cause Japanese commerce a lot of grief before it was finally run down.

Reorganization

President Roosevelt has succeeded better than any but the most optimistic of his advisers had dreamed, a couple of months back. in his drive for reorganization of the government. It is due to one of those strange political factors, and is directly connected with the President's technical defeat on the Supreme court enlargement battle.

Unfortunately for those who disagree with the President on his reorganization proposals - and privately the measure has very few friends even among the most loyal administration Democrats on Capitol hill-the men who took the leadership in the fight to hamstring it were the same men who led the fight against packing the Supreme court

At first blush this might appear

"A Free Ride to Doom" By FLOYD GIBBONS Famous Headline Hunter

HELLO EVERYBODY: I've seen a lot of articles lately, in newspapers magazines, warning automobilists not to pick up stran along the road. Well, sir, today I'm going to warn strangers not to get too chummy with these doggone mobilists.

And I'm not more than half kidding about that, either, boys and It's a poor rule that won't work both ways, and you can get in just as of a jam picking up with some bird in a car as the bird in a car a giving a lift to the guy with the wiggling thumb at the side of the

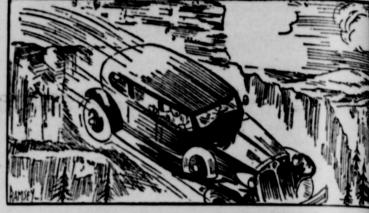

If you don't believe that, listen to the story of Ernest A. Keb of Richmond Hill, N. Y. Ernie took a ride one time, back in the summer of 1934, with a bird he'd never seen before-and the ride came darned close to being the last one Ernie ever took

Picked Up by a Strange Motorist.

Ernie had been up in Calgary riding wild horses in the roder was on his way home. He had hiked through Glacier National part he had arranged to meet a friend at a small town in Montana didn't want to keep him waiting.

Valier was the name of the town and Ernie was within 15 mile when a man came along driving a brand-new car. The man pul beside Ernie and asked him if he wanted a ride. It didn't take figuring on Ernie's part to decide that this was an easier mode d than the "Shanks mare" system he had been following. He climb the seat by the driver and they were off.

But Ernie had no more got into that buzz buggy than he be have his doubts. There was something queer about the driver.

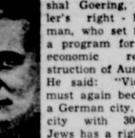

Over the Side of the Mountain They Went.

seemed cordial enough when he had offered Ernie the ride, but his good will seemed to have ended. When Ernie passed a casu mark, the fellow ignored it. He kept his eye on the road and the seemed to be moving faster and faster with every foot they went

They had gone quite a distance before Ernie discovered w the trouble was. His companion was well under the influence of liquor.

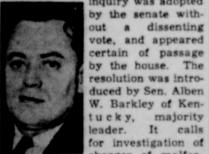

Fast Driving on a Dangerous Road.

That didn't look so good to Ernie. The fellow was driving t than was safe, even with a sober man at the wheel. By this time is n advantage. They were the vic- hitting fifty on a road where a sane driver would not have gone

Ten Men to Probe TVA

CIVE senators and five representatives will do the investigating of the Tennessee Valley authority, for the resolution for a joint committee inquiry was adopted

charges of malfea-Sen. Bridges sance and dishon-

esty made by the ousted chairman, A. E. Morgan, and includes eight of the twenty-three charges originally made by Senators Bridges and King in their first resolution for a congressional inquiry. It also calls for "fishing expedition" into the activities of private utility companies and their injunction suits against the TVA.

Sen. H. Styles Bridges, the New Hampshire Republican, in a radio debate declared the administration was trying to obscure the charges of scandal within the TVA by forcing the inquiry to cover the private utility angle. "The administration's strategy has been to cover up TVA dirt by a phoney counter-attack," he

He was answered vigorously by Sen. Lister B. Hill of Alabama.

Legality of President Roosevelt's action in ousting Chairman Morgan from the TVA board is still a mater that the courts probably will be called on to settle. Mr. Roosevelt wed" Morgan after receiving from Acting Attorney General Jackon an opinion that he possessed the equired authority. He reported the n to congress and said he had named Harcourt Morgan chairman.

Reasons for the removal of A. E. organ as given by the President are that he had made grave and us charges against his col-es and refused to substantiate at the White House bearings,

throughout Germany when Cardinal in the consideration of the case.

Colonel House Dies

DEATH after a long illness ended the notable career of Col. Edlishments, such as the board of tax | ward M. House, whose name, durappeals, the communications com- ing the World war era, was familiar to millions. He

passed away in New York at the age of seventy-nine years. Shunning publicity and personal glory, House devoted himself untiringly to what he deemed the best interests of his country and for years his influence,

especially in inter-Col. House national matters was great. An early supporter of Woodrow Wilson's political fortunes. he became Wilson's trusted adviser after his election to the presidency and continued to help direct his course immediately before and during the war, making frequent trips

to Europe. He was Wilson's personal representative in the Versailles peace conference. Later he and Wilson disagreed and their close association came to an end.

tucky, majority leader. It calls

GENERAL FRANCO'S insurgent army blasted its way through the loyalist lines and entered the province of Catalonia, moving far toward Barcelona, the third capital of the government forces. In this rapid advance about 100 towns were captured in a single day and many villages were demolished by bombardment by a fleet of 200 war planes said to have been contributed by Italy and Germany.

Italy warned France that any French intervention in Spain "might compromise peace on the European continent." The organ of the Italian foreign office, Informazione Diplomatica, published the statement, declaring Italy was "following with greatest attention the campaign of French leftists for intervention in Spain."

Silver Buying Halted

SECRETARY OF THE TREAS-URY MORGENTHAU announced that the United States had discontinued the purchase of Mexican silver until further notice. This probably was a direct result of Mexico's expropriation of foreign oil properties, which Secretary of State Hull considers a hard blow to his "good neighbor" policies. Price of silver was cut 1 cent an ounce.

The United States Treasury has been buying 5,000,000 ounces of newly mined Mexican silver each month, paying around \$2,500,000 for col-it at the artificially maintained New Jork price, which gave Mexico siz-ings, able profits.

Innetzer, archbishop of Vienna, issued a solemn declaration urging the people of Austria, most of whom are Catholics, to vote for the union with Germany at the plebiscite on April 10. The document was read in all Catholic churches. It warmly praised the Nazi rulers and pledged allegiance to Germany. This stand of the Catholic hierarchy made certain an overwhelming victory for Hitler in the plebiscite. It also led the Nazi chiefs to hope for a new accord with the Vatican.

Britain Ready to Fight

GREAT BRITAIN will not flatly pledge herself to fight to save Czechoslovakia from German aggression. But she will use her arm-

aments to fulfill her treaty obligations to France and Belgium, and is ready to go to war in their defense if they are unjustly attacked. That was the warning to Hitler uttered by Prime Minister Chamberlain in the house of commons, in the most

Neville important statement of British foreign Chamberlain policy since the World war.

Declaring his belief that peace will be maintained. Chamberlain said: "I cannot imagine any events in Europe which would change the fundamental basis of British foreign policy, which is the maintenance and preservation of peace. However, that does not mean that nothing would make us fight."

Cheers greeted this declaration. Though he said central Europe was not an area where vital British interests are at stake, he gave plain warning that if German aggression should result in war there, Britain might be forced into it. He flatly turned down Soviet Rus-

sia's call for consultation against aggressor nations.

Wheat Crop Estimates

DREDICTION by the bureau of agricultural economics of the Department of Agriculture is that this year's wheat crop will be 830,000,000 bushels, or 160,000,000 bushels in excess of the 1932-36 average. The survey estimates that the wheat carry-over in 1939 will be around 300,000,000 bushels.

The record wheat crop is based on the following factors: If farmers seed the acreage indicated in the prospective-planting report, and if average yields are obtained, this year's spring wheat crop, including durum, will total about 200 000 000 bushels. This, together with the winter crop of about 630,000,000 bushels, indicates a prospective out-put of \$30,000,000 bushels.

of vessel which could be rushed to completion with some hope that they would be finished before the war ended. Moreover, the destroyer was considered one of the most effective agencies with which to fight submarines, at the time the chief danger to the Allies.

So America rushed out destroyers. The end of the war found the navy with more destroyers than it knew what to do with. Most of them were tied up, their parts greased, and kept in storage, so to speak. As a result there was not much destroyer building, especially as the armament limitation confer-

ence came along in 1922. But naturally these have all grown obsolete together. So the navy really needs a new fleet of destroyers.

Now under construction also is one destroyer tender, of 9,450 tons. The billion-dollar program adds five more, with a total of 45,000 tons. It also adds four seaplane tenders, with a total of 33,200 tons to the one authorized previously, at 8,800 tons.

In the regular 1939 program the navy got an oiler of 8,000 tons, a mine sweeper of 600 tons, and a fleet tug of 1,150 tons. To these will be added three repair ships, totaling 28,500 tons, in the billion-dollar program.

Chinese Get a Hunch

A Chinese commerce raider. aimed at accomplishing against Japanese commerce what the faous Confederate privateer Alabama did to United States shipping during the war between the states. is under serious consideration. Officially this will be denied, of course, but several factors in the Alabama situation are being studied by those interested.

The Alabama, it will be recalled, was fitted out in England, and had a very long and effective adventure in destruction before she was finally sunk by the U. S. S. Kearsarge off Cherbourg.

The present idea is said to have originated due to publicity for the grievance of American fishermen and the salmon industry generally in the Pacific Northwest and Alaska. In fact, the germ of the idea is said to have been sprouted when an indignant union leader wanted to know why the United States couldn't have an "accident" similar to the sinking of the Panay by Japanese, and then be very, very

"sorry" in a note to Japan. "If," he added grimly, "Japan ever heard about it."

A shrewd Chinese official is said to have read this, and then remembered the Alabama episode.

"If the British could fit out a pri-vateer for the Confederates back in the sixties," he is said to have rea-Tok-kell-ya.

tors in that more spectacular battle. Victory should be like a snowball, growing as it rolls. As with Napoleon up until Russia. As with Hitler up until heaven knows when. But this is politics, not war, and while there are some similarities, there are some sharp differences. Any fight on Capitol Hill can be won only with the aid of a very large number of Democrats, men who are elected by the Democratic organizations back in their states. It so happens that the Democrats have almost unprecedented majorities in both house and senate.

Now a Democratic senator, figuring both on his renomination and re-election fight, has to walk care fully.

Watch Their Step

A great many of the senators who made the victory of the anti-court packing leaders possible were not so spectacular as Sen. Burton K. Wheeler in that fight. Now they are unwilling to side with Wheeler again, lest to them be attributed all the hostility to the administration that is connected with Senator Wheeler's motives.

In short, if there had been no court fight, the President would have less strength in his present fight to win more power for the chief executive in the conduct of the government.

Beyond the shadow of a doubt, had there been no court fight, Senator Wheeler's amendment, which would have required the approval of congress to any change in the government the President might make, would have carried instead of losing by a vote so close that the change of three senators would have reversed it.

Had there been no court fight, the amendment of Sen. David I. Walsh of Massachusetts, to exempt the civil service commission from the President's dictatorial powers would have prevailed instead of being defeated. But Walsh, too, had some prominence in the anti-court packing fight. The Bay State senator is not afraid of being branded. He knows his state pretty well, and has never been accused of political stupidity. But others, lacking his grip on their states, also lack his courage, however they may agree with him on this issue down in their hearts.

than thirty—a long, steep downgrade that ran along a sloping more ridge. The ground fell away on one side of them into a deep more gully and on the other side it rose straight up-a wall cut out d rock by the graders who had leveled the roadbed.

The small car bounced about perilously on the rough, uneven but that didn't seem to bother the man at the wheel. Instead of i down he fed the machine more gas. The needle of the speed climbed to sixty-then to seventy.

Ernie began to get nervous about that time. The car was a along now at a speed that almost upset it every time it came to as It bounced about the surface of the road in a thoroughly alarming ner. Ernie kept his eye glued on the driver, watching his every and ready to grasp the wheel in the event that he should lose t of the car. It seemed nothing short of a miracle to Ernie that it gone off the road or smacked into something long before.

Plunged Right Off the Mountain Side.

They had gone skidding around a curve on two wheels a had just come to a long, straight stretch. The road ahead look smooth and in good condition, and for the first time during t ride Ernie felt comparatively safe. He drew in a deep bre and heaved a sigh of relief-let his eyes wander over the las scape for a second. And then it happened.

Says Ernie: "I had no sooner taken my eyes from the man! saw the car leave the hard road and go off onto a soft shoulder. speed we were making, that shoulder was fatal. The sudden chat surface swerved the wheels of the car and over the side of the mo we went, the car turning over in the air as it left the ground. The seemed to spin about in a dizzy circle for a few seconds and the crashed to the slope at the bottom of a sheer drop of 40 feet.

"We hit the slope with a crash-so hard that the motor car was knocked right off the chassis and buried itself is ground where we struck. But the rest of the car, with both di in it, continued to roll down the slope at a terrific speed. It re over six or eight times and finally crashed into a rock with a force that I went sailing 50 feet through the air. After the lost consciousness."

A 40-foot drop, six turns in a tumbling car and a 50-foot through the air! The driver was dead when they found him, and B ell-he got a bump on the head, three busted teeth-and that And he's still wondering if he's really as tough as those figures seem to indicate.

Franklin Feted in Paris

When Benjamin Franklin was in Paris in Revolutionary days seeking help for America, he received such ovations as the old Spartan had never dreamed of. Parties were given in his honor, at which the most beautiful women were chosen to embrace him in turn. No man of quality was complete without a ring or snuff-box with his medallion. "These," he wrote to his daughter, "have made your father's face as well known as that of the moon, so that he durst not do anything that would oblige him to run away, as his phiz would discover him wherever he should venture to show it."

One One's Own Resources

'Finding ourselves'' seems like a singular, almost self-contradictory, expression, but it refers to a sound principle recognized by psychologists as well as spiritual leaders. As

SUNDAY

a matter of fact, modern psychology has begun to recognize and use spiritual laws and principles which alone bring about human happiness and efficiency. Too frequently this borrowing from Christianity is only recognition of principles while denying the power of God, but at east it indicates that those who have contended that the best place to learn psychology is in the Bible with the Holy Spirit as the teacher were right.

A word of warning-let no one who studies this lesson fall into the serious error of thinking that some formal religious service will bring redemption and favor with God. We are saved by grace through faith in the Lord Jesus Christ-"not of works, lest any man should boast." It is then by the new birth that we are "created in Christ Jesus unto good works which God hath before ordained that we should walk in them" (Eph. 2:8-10).

It is the Christian who needs to "find himself in service." Only as he thus yields to Christ does he really find the life worth living. The words of Jesus in verse 35 of our lesson are solemnly and gloriously preferred) to The Sewing Circle, true. If you save your life for yourself it will wither and die in your hands, but if you give it to Christ He will return it to you glorified.

> I. Clear Confession (vv. 27-30). Even those who deny to our Christ the recognition of His deity, and the devotion of life which is His just due, must, if they are at all intelligent, admit that no man ever lived who has made such an impact n human history. Even in the days

of his life on earth those who did not accept Him as Christ regarded Him

as the resurrected form of one of the

nes lag in their work-do are intended-fail to re

Note the divine "must." While it is true that wicked men showed their hostility toward our God and His Christ by hanging Him on Calvary's cross, yet it was to die for our sins that He came into the Loss of sincerity is loss of vital world. The cross has rightly come to represent God's love to the world rather than man's hostility to God. Error now asserts itself, and strangely enough it is the very one who had the clearest grasp of the truth regarding the Messiahship of Christ and boldly expressed it who now objects to the revelation of the coming death and resurrection of Christ, and lends his voice to rebuke the Master for speaking of it.

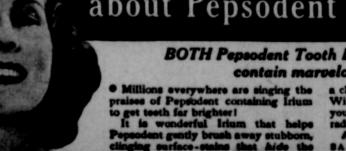

Satan hates the cross and the open grave. Jesus won the victory over him there. He did not want to hear of it before it took place and used impulsive Peter for a mouthpiece to object. He doesn't want to hear about it now and uses many a skillful and gifted preacher to speak "The offense of the against it. cross" (Gal. 5:11) has never ceased.

III. Consecrated Life and Service (vv. 34-38).

"Let him deny himself" (v. 34). That command we have construed to mean that we should perform little acts of self-denial, foregoing some comfort or pleasure, possibly for a few weeks. It does not mean that at all-but does mean the renouncing of self and self-will, and a complete yielding to God's will. Likewise, to take up one's cross does not mean to bear some of life's little disagreeable experiences; it means again to die to self and to live for Christ.

Careful attention should be given to the solemn questions asked and statements made in verses 35-37." These are not the reasonings of a man-they fall from the lips of the Son of God. What, He asks you, will you give in exchange for your soul?

Building, Maintaining **Family Health**

N THE C. Houston Goudiss articles that have appeared weekly in this newspaper previous to this one, the nationally known food authority has described FOOD, as it provides the key to mental and physical power; PROTEINS, the foods you cannot live without; CAR-BOHYDRATES and FATS, foods that provide motive power for the body machinery; and MINERAL SALTS, that you must have in order to build strong bones, healthy nerves and rich, red blood.

These subjects have been treated in an interesting and understandable manner, free of scientific terms, principally offering advice to the housewife that will aid her in the problem of feeding the members of her family such foods as will build and maintain their health.

Every one of these articles has a definite place in your scrapbook for future reference. If you have missed any of these discussions, the publisher of this newspaper will supply them upon your request. If you have not already done so, start a department of these informative articles in your scrapbook at once!

He children and working men and been fully determined. It does, however, appear to be necessary for successful reproduction and is Vitamin B is found in yeast, found especially in wheat germ whole wheat cereals, oatmeal, and lettuce.

VITAMIN G PROLONGS YOUTH

Vitamin G is necessary for growth and for the maintenance of health and vigor at all ages. It helps to ward off old age by prolonging the vigorous middle years. It is essential to the health of the skin, and recent experiments demonstrate that cataracts in the eyes may be due to a deficiency of this vitamin, which is found in yeast, and in liver, kidneys, egg yolk, milk, cheese and green leafy vegetables.

One authority claims that chronic disorders of the throat, stomach, lungs, colon, heart and kidneys may be traced to vitamin and mineral deficiencies.

Certainly enough has been learned of vitamin chemistry to make clear that the homemaker fails in her duty who does not provide vitamins in abundance for every member of her family. Both children and adults depend upon you for their food supply. It lies within your power to help them to health and happiness or condemn them to weakness, illness and sorproper utilization of calcium and elderly-get enough vitamins to afford them the health that sciteeth. Picking for Taste

A VOID the common mistake of letting vegetables grow too long before picking. Younger vegetables are more tender, more nourishing, and more palatable. Root trate, egg yolk, cod-liver oil, thin crops-radish, carrot, beet-are at their best when hardly half grown.

Pick peas just before pods fill out completely. Pick corn just at the "milk" stage, that is, when the kernel, gouged with the finger nail, yields a milky juice. Use summer squash when small, soon after the blossom has dropped off.

Other vegetables, of course, should be allowed to mature more completely before using. Tomatoes should be ripened well on the vine as should winter squash. Cantaloupe are at their best when they need not be pulled from the stem, but roll off the vine at a touch.

There are, of course, exceptions to these rules. For instance, some may wish to use green tomatoes for special dishes or for canning; or they may wish to allow beans to grow to the dry stage.

What Is the Cause of "Spider-Web Check"?

If not properly "fed" with a good oil polish, furniture in time develops what is known as "spider-web check!" This appears on the finish, like wrinkles on the human face-fine lines, spreading here and there in a spider-web pattern. This crazing, this light cracking, is known in furniture language as "checking" and "spider-web checking" better describes the condition. This is the danger-signal, on finish! It's the indication of "starving" wood! A warning to the housewife, that if the finish is not cared for immediately and properly, the furniture will develop cracks, ridges and splits. "Spider-web check" is generally the result of either one of these two causes: Polish-neglect -or the use of a poor, cheap pol-ish-without the essential fine, light-oil base. When the furniture is periodically "massaged" with a reputable oil polish (the best is non-greasy), the pores of the wood are "fed" and the piece is preserved. Then "spider-web check" will not appear! The use of a quality oil polish is the best preventive formula for this ugly, detrimental check!

WHO SAID THAT A GOOD LAXATIVE HAD TO TASTE BAD?

Who said that you have to screw up your face in disgust every time you take some-thing for constipation? You have to do nothing of the kind!

Taking a laxative can be every bit as pleasant as eating a piece of delicious chocolate-provided you take Ex-Lax. Ex-Lax gives you a thorough cleaning out-but it works smoothly, easily, without throwing your eliminative system out of whack, without causing nausea or fits to perfection. Notice the stomach pains.

> For over 30 years, Ex-Lax has been America's favorite family laxative. Now it has been Scientifically Improved. It's actually better than ever! It TASTES BETTER than ever, ACTS BETTER than ever—and is MORE GENTLE than ever.

Equally good for children and grown-ups. 10¢ and 25¢ boxes at your druggist's.

Now Improved - better than ever! EX-LAX

POULTRY OUTLOOK FOUND FAVORABLE

dicts Higher Egg Prices.

Supplied by the United States Department Somewhat higher prices of eggs next year as compared with this year are foreseen by the bureau of agricultural economics in a review of the poultry and egg situation. This conclusion is drawn from the smaller number of layers which will be in farm flocks next year and the expectation that the rate of egg production will be somewhat lower.

The larger supply of feed this year is expected to have a material effect on the poultry situation. The total production of the four feed grains, corn, oats, barley, and grain sorghum, this fall will be the largest since 1932. And the wheat supply for poultry feeding will be larger than in recent years. With the number of grain-eating animals at a low point, there will be unusually ample supplies of grain for poultry, especially in some of the Corn Belt states. In other words, the bureau says, the feed situation next spring will be much more favorable to producers than in 1937. Largely as a result of the ample feed supply, it is expected that the hatch of chicks next spring will be larger than the small hatch this year. This leads to the conclusion that while poultry supplies will be smaller in the first half, they will be larger in the last half of 1938 than in the corresponding periods of 1937. Higher prices of chickens are looked for in early 1938, whereas ENTERTAINED 1934 lower prices may be the rule a year from now.

Stocks of eggs in cold storage which will affect egg prices next year are likely to be much less than they were in 1937, because of smaller marketings.

While the production of fall and winter broilers this year is expected to be heavy, the price is not likely to be depressed correspondingly because the general meat supply is smaller.

Turkey production this year is estimated at 10 per cent less than it was in 1936. With prices expected to be higher than they were last year and possibly higher than in 1935, the hatch and production of turkeys in 1938 probably will be increased over this year.

COTTON ACREAGE QUOTAS ANNOUNCED BY AAA OFFICE College Station-The county cotton

The Floyd County Plainsman, Thursday, April 7, 1938

creage quotas for 1938 have been announced by the state AAA office at Texas A. and M. College. The state allotment of slightly more than 9,800,000 acres was divided among the counties on the basis of the past Government Bureau Pre- five years' cotton acreage diverted from eotton under previous farm programs, Geo. Slaughter, chairman of the Texas Agricultural Conservation Committee, said.

The method of the distribution to ounties is prescribed in the new farm act, which also provides that sounty committees shall divide the county acreage allotment to the vatious cotton farms. Provisions are made for small cotton farms, and new producers will receive quotas from a state reserve, Slaughter pointed out. The distribution to the remainder of the cotton farms will be on a percentage basis of the tilled land. The percentage factor will be uniform one for the county or for an administrative area within the county, but no farm may receive a quota in excess of the greatest acreage planted to cotton in any of the past three

vears. Twenty-four counties received cotton quotas in excess of 100,000 acres. The largest quota, 175,781 acres, went to Ellis county and the second largest 167,519 acres, to Navarro county. Hill, Lubbock, Lynn, Me-Lennan, Nueces, and Williamson counties received quotas of more than 150,000 acres. Floyd County received quota of 50,474 acres.

MISS RUTH JENKINS STUDY CLUB

The 1934 Study Club met Tuesday night, April 5, at the home of Miss Ruth Jenkins at 329 West Houston Street, in a Pre-Easter program.

The meeting opened with a business session, in which Miss Helen 262 gune management demonstra-Kruger was voted into the club as a tion preserves which have been esnew member.

OLDSMOBILE AND INTERNATIONAL DEALER

MR. WATTS-HIS-NAME Says

Fast-Growing Pigs Are the Best as Breeders The best swine breeding stock

usually comes from the heaviest cigs, said H. W. Taylor, extension swine specialist at North Carolina State college. So a good way to select breeding stock, he added, is to weigh the lit-

ters at weaning time. If all sows and litters have had the same care and feeding, the litters which are heaviest at weaning

time will be those from the best sows. The boar and sow pigs selected

for breeding purposes should be taken from these heaviest litters. Boar pigs to be raised for pork should be treated when four to five weeks old, Taylor continued. At

this age the treatment does not shock the plg as much as it will later, and the young pigs recover more rapidly. He also pointed out that sanita-

tion and balanced rations are two of the most important factors in hog production. "If you have not tried farrowing and raising pigs on clean land, give it a trial," he said.

Agricultural Notes The flesh of sharks is a source of poultry food. . . .

Sugar cane requires 9 to 13 months to mature. . . .

Duck eggs have a greater fat content than hen eggs.

The Iowa college of agriculture at Ames has more than 5,000 students.

Sugar and sirup have been manufactured in limited quantities from watermelons.

An expert claims that farmers put back only one-third of the phosphate they take out.

Turkeys can be made to lay eggs earlier than normally by use of lights in their houses.

A turkey at McCook, Neb., drove a pheasant hen from her nest and hatched the fledglings.

Canada's creamery butter output In the first eight months of 1937 totaled 170,705,417 pounds.

Devices for the artificial hatching of chickens from eggs were known

Ireland's potato crop is being turned to new uses. Industrial alcopol factories utilize farm surplus.

The best winter protection to alfalla is a growth of from six to eight inches or more to hold the ng the 4-H Club Boys meeting.
