EDGAR B. HOWARD BUSINESS VISITOR IN FLOYD COUNTY

Edgar B. Howard of Philadelphia, Pennsylvania, was a business visitor in Floyd County...

E. E. Hinson and M. L. Solomon attended a convention of Frigidaire dealers held in Fort Worth Monday of this week...

Mr. Marvyn English and son, Bobbie, Mrs. Russell King and Mrs. Dorris W. Jones spent Saturday visiting with relatives in Lubbock.

Home D. Jones of Garland visited in Floydada Thursday night and Friday with Mr. and Mrs. Wilmer Jones Jr. and Mr. and Mrs. Dorris W. Jones.

Construction Work Started on New Barn at Latta's

One of the latest improvements in the rural section is a new, modern type barn being constructed at S. J. Latta's farm east of Floydada.

H. D. Butler Passes; Rites Held Tuesday

H. D. Butler, pioneer resident of Floyd County, died at his home here Monday afternoon at three o'clock following an illness of several weeks duration.

Mr. Butler was born February 20, 1855 in Louisiana, being at the time of his death 83 years, eleven months and ten days of age.

Survivors are three sons, F. M. Butler and W. T. Butler of Amarillo, D. F. Butler of Dallas; two daughters, Mrs. J. G. Martin and Mrs. J. V. Daniel of Floydada.

Funeral services were held Tuesday afternoon at 2:30 in the First Baptist Church with the pastor, Rev. Vernon Shaw, conducting.

Mr. and Mrs. C. P. Loper are expected to return today from Hobbs, New Mexico, where they have been visiting with their daughter, Mrs. Dick Fenner.

BORN - To Mr. and Mrs. Roy Collins, Tuesday, January 31st, an eight pound boy, according to the Daltida Hospital and Clinic.

Mrs. W. T. Moore who has been seriously ill for several days is thought improved.

Lorenzo FFA Conducts Second Degree Here

The Lorenzo High School Chapter of Future Farmers of America conducted second degree initiation ceremonies here last night for fourteen members of the Floydada High School chapter.

Miss Thomasine Cox, who is attending Amarillo Junior College, spent Sunday visiting with her mother, Mrs. Nora Cox in Floydada.

Mr. and Mrs. Elmer Caudle of Dimmitt spent Sunday visiting with Mrs. Caudle's sister, Mrs. J. B. Bishop, Mr. Bishop and family.

Tom Bishop and Miss Bernice Bishop of Amarillo spent the week end visiting in Floydada with their mother, Mrs. Jennie Bishop and other relatives.

Mrs. Wilson Kimble and Mrs. Homer McDonald left Saturday for a visit in Fort Worth and other points.

HIGHWAY COMMISSION DESIGNATES NORTH ROAD AS HIGHWAY 207; ALLOCATES SUM FOR CONSTRUCTION

Works Progress Administration To Match Appropriation of State With \$70,000.00

Floydada Men Attend Meet In Lubbock

E. E. Hinson, M. L. Solomon, J. L. Wright and Martin Brown, all of Floydada, attended a meeting of electrical appliance dealers and salesmen held at Lubbock Thursday night of last week.

The meeting and demonstrations was given by Nunn Electric Company and included discussions on developments in air conditioning, stoves, Zenith Radios and Leonard refrigerators.

Mr. Hinson and Mr. Solomon represented Radio Electric Company and Mr. Wright and Mr. Brown attended from Brown's Household Supply Company.

Last Rites Held Saturday For Mrs. A. L. Glenn

Mrs. A. L. Glenn, age 34 years, died in a Plainview hospital Friday following several days illness.

Funeral services were held Saturday afternoon at 3 o'clock at the Sandhill Church of Christ.

Funeral services were held Tuesday afternoon at 2:30 in the First Baptist Church with the pastor, Rev. Vernon Shaw, conducting.

Funeral services were held Tuesday afternoon at 2:30 in the First Baptist Church with the pastor, Rev. Vernon Shaw, conducting.

Funeral services were held Tuesday afternoon at 2:30 in the First Baptist Church with the pastor, Rev. Vernon Shaw, conducting.

Funeral services were held Tuesday afternoon at 2:30 in the First Baptist Church with the pastor, Rev. Vernon Shaw, conducting.

Oden Chevrolet Building Car Lot

Oden Chevrolet Company is moving location of its used car lot from south of the building to just north, between Stansell-Collins Company and the Chevrolet building.

Mr. and Mrs. Elmer Caudle of Dimmitt spent Sunday visiting with Mrs. Caudle's sister, Mrs. J. B. Bishop, Mr. Bishop and family.

Tom Bishop and Miss Bernice Bishop of Amarillo spent the week end visiting in Floydada with their mother, Mrs. Jennie Bishop and other relatives.

Mrs. Wilson Kimble and Mrs. Homer McDonald left Saturday for a visit in Fort Worth and other points.

Mrs. Joe Glover and sons, Dan and Willard of Shamrock, Texas, visited in Floydada during the week end with her sister, Mrs. B. Hatley and Mr. Hatley.

Old Fashioned Revival at Assembly Church

An old time revival meeting is in progress at the Assembly of God Church, located at the corner of West Virginia and Third Streets.

God is blessing and saving souls, crowds are increasing each night. Evangelist Jewel Clark is bringing the messages each night at 7:30.

Monday night if the Lord is willing we will bring the message on "A Woman's Right to Preach". Sunday night we are having a headline service. All are welcome.

National Cotton Council Is New Organization

Leaders in the cotton industry from producers to merchants assembled in Memphis, Tennessee, November 21, 1938 to put their own diagnosis on the ills of the cotton industry and from this meeting grew the National Cotton Council which has set up a state council in each of the states of the cotton producing south.

Each of these states organizations have caused a county cotton council to be named and on this council for Floyd County are J. W. Jennings, chairman; A. B. Colson, and J. S. Hale, members.

The National Cotton Council's main object is trying to stimulate more uses for cotton. Today the cotton industry faces the greatest crisis in its history.

The following are indispensable facts: That the surplus of cotton is the largest in history of the world; production of cotton is the largest in history; world consumption of cotton is steadily increasing but consumption of American cotton is decreasing both at home and abroad.

To date we have a solution to the production of cotton but we have done virtually nothing to solve the problem of increasing cotton consumption.

It is the thought of the National Cotton Council that we can increase the consumption of American cotton both at home and abroad by cooperating and uniting the efforts of the entire cotton industry to that end.

County Agricultural Agent D. F. Bredthauer, states that every cotton farmer, ginner and buyer, of Floyd County has been invited to attend this meeting and give the county cotton council their full support in helping to put over this worth while movement which may be the forerunner of solving many of our present cotton problems.

Hospital Notes

Mrs. C. V. Jones, City, underwent a major operation Monday, January 30th.

Duane Griggs underwent a minor operation Sunday and was dismissed Wednesday.

Fred Griggs is in the hospital recovering from a major operation which he underwent Monday.

L. M. Ezell is receiving treatment for a broken thumb.

Roy Lathem underwent a tonsilectomy Sunday and is thought recovering.

Let Cavanaugh do your Printing.

Unconfirmed reports from Austin this week indicate that the State Highway Commission has designated the highway north of Floydada to South Plains as State Highway Number 207 and allocated \$30,000.00 for improvement of this portion of the road.

Information regarding the project was divulged to County Judge G. C. Tubbs in a telephone conversation with G. M. Garrett of Lubbock, district resident engineer with the Texas Highway Department, yesterday.

It was indicated that should the project go to completion a sum of approximately \$70,000.00 will be appropriated by the Works Progress Administration to match the \$30,000 designated by the Texas Highway Department. A large portion of this money will be used to furnish labor for unemployed in Floyd County but at the present time it is not known when, if ever, the construction will be started.

Members of the commissioners court and the county judge are planning to go to Lubbock Saturday to confer with Engineer Garrett. The Floyd County men recently went to Austin and appeared before the State Highway Commission in the interest of the 207 project.

Services Held Saturday For W. A. Huckabee

Last rites for W. A. Huckabee, age 73, were held Saturday morning at his home in Center community.

Mr. Huckabee, who had been a resident of Floyd County for 22 years, died Thursday night at 10 o'clock.

William Archie Huckabee was born August 14, 1866 in Mississippi and moved to Johnson County, Texas as an early age with his parents, Mr. and Mrs. Calvin Huckabee.

He was married to Miss Gertrude Hampton in Tarrant county on December 4, 1890 and to this union were born nine children, two of whom preceded Mr. Huckabee in death.

The family moved to Memphis, Hall county and resided there for five years prior to moving to Floyd County in 1917.

Surviving are the widow, five sons, C. C. Huckabee, A. J. Huckabee, C. H. Huckabee, Burl Huckabee and Earl Huckabee, all of Floydada; two daughters, Mrs. Ola Warren and Miss Eula Huckabee of Floydada; one brother, D. R. Huckabee of Munday, Texas and two sisters, Mrs. M. E. Sanders of Elida, New Mexico and Mrs. Matilda Hampton of De Leon, Texas. Surviving also are sixteen grand children.

Funeral services were held at the home of Mrs. M. Noland, N. R. Austin, B. L. Breed, Fess Whitfill and Ollie Meek. Interment was in the Memphis cemetery.

Four County Singing Well Attended Sunday

A regular fifth Sunday convention of the Four County Association was held at the Rushing Chapel in Fairview community Sunday. Singers were present from Floyd, Motley, Hall and Dickens counties.

In a brief business session for the day it was decided that Dickens county would be given entrance into the association to make it a five-county organization. Next regular meeting will be held in April, place for which has not been set.

Local singers report a very good singing and expressed appreciation for the hospitality shown by the residents of Fairview community.

Miss Ion Drake, of Canyon, visited Tuesday and Wednesday in Floydada with Miss Ann Bradley at the Floydada Hospital and Clinic.

Weekly News Analysis
U. S. May Force Orient Peace Through Guam Defense Gossip
By Joseph W. La Bine

EDITOR'S NOTE—When opinions are expressed in these columns, they are those of the news analyst, and not necessarily of the newspaper.

Asia

On December 31, January 14 and January 19, respectively, the U. S., Britain and France warned Japan that they disliked her violation of China's "open door." Nothing happened. So painful was the silence that China's Foreign Minister Wang Chung-Hui finally suggested that democracies might be using the wrong tactics. His proposal: To follow these strong diplomatic notes with formal proposals of settlement, even unto actual terms.

What Foreign Minister Wang forgot is that neither the U. S. nor France nor Britain yet feels obligated to beg for peace with Tokyo. But if Japan would make the overture—

And that is precisely what the U. S. state department now seems bent on making Japan do.

As the crow flies, Guam lies 1,500 miles southeast of Tokyo. This 150-

THE ISLAND OF GUAM
Mr. Lippmann stated the case.

square-mile tract has belonged to the U. S. since 1898, lately becoming a potentially important base for Pacific commercial aviation. But since Japan began flashing her fangs Guam has become even more important as an outpost to protect America's back door. The need for such an outpost is illustrated by Japan's illegal fortification of nearby, mandated Caroline and Marianne islands.

Official Washington thinks Japan is using outlaw tactics in her Chinese invasion, her illegal fortifications and—of less importance to the U. S.—by threatening to fish Russian waters whether Moscow approves or not. When President Roosevelt's \$552,000,000 emergency defense program reached congress, an item of \$44,000,000 was listed for naval air and submarine bases. Now this has been boosted to \$65,000,000, and \$5,000,000 of the sum would be authorized at Guam for deepening the harbor, making landing fields and enlarging marine barracks.

This drew from Japan exactly the protest Washington expected and wanted. When Tokyo objected that Guam's fortification would be an aggressive move, the White House commented that Columnist Walter Lippmann's remarks just about fit the picture: "Congress should authorize the fortification of Guam, and then the state department should invite the Japanese to discuss the question under Article XIX of the Washington treaty (nine-power pact guaranteeing China's open door). In this discussion we could say to the Japanese if they do not wish Guam to be fortified they might return to the treaty by dismantling fortifications in the mandated islands."

President Roosevelt has remained free of the controversy by pointing out that congressional authorization for rearmament is one thing, but that authorization is worthless without appropriations.

Meanwhile the game of democracy vs. dictator became still more bitter as Japan at once tightened her belt and stuck out her tongue. As the diet opened its new session in Tokyo, Premier Kiichiro Hiranuma announced (1) that wartime control measures would be placed on a permanent basis and (2) that Japan has no alternative other than to "exterminate those who fail to understand" her aim in China.

Said Foreign Minister Hachiro Arita: "What Japan desires is the creation of a new order which is to secure the permanent peace of east Asia, that is to say, the construction of a new east Asia upon an ethical foundation wherein Japan, Manchukuo and China, while each preserving her independence and individuality, will stand united and linked together for active collaboration and mutual aid . . ."

Germany

Dr. Hjalmar Horace Greeley Schacht gained a good world name by rescuing the German mark during post-war inflation. He has headed the Reichsbank ever since, switching over to Nazidom despite its unorthodox policies of self-sufficiency which are diametrically opposed to recognized economic and political principles. Though Germany's finances have suffered through foreign trade losses, Doctor Schacht was miraculously able to restore a measure of economic prosperity.

But this has been a personal victory, won not through Nazi merits but through Schacht friendship. Because he held such a good name, Doctor Schacht was able to travel in select foreign circles where Nazis Hitler, Goering and Goebbels would not be accepted. Result: He wangled many a foreign trade concession, especially from England.

The belief that he may have been wolfish despite his sheep's clothing is further illustrated by the Schacht plan for disposing of German Jews, whereby democracies would agree to stimulate consumption of Nazi exports.

But Doctor Schacht has been summarily dismissed as Reichsbank president, a sudden coup which observers can interpret in either of two ways:

Pro-Schacht. Because of the unique confidence foreigners place in Doctor Schacht, Reichsfuehrer Hitler may believe him more useful as an international salesman than a banker. Since he is to remain in the cabinet (without portfolio) there are rumors he will attempt to peddle

GERMANY'S WALTHER FUNK
If Dr. Schacht become a salesman?

Jews and exports abroad, meanwhile speeding up the return of war-torn German colonies.

Anti-Schacht. His successor to the bank presidency is Dr. Walther Funk, economics minister who champions the Reich's barter trade principle. This theory differs as night and day from U. S. Secretary of State Cordell Hull's reciprocal trade system, and Doctor Funk's appointment indicates Germany will continue to expand her foreign trade along unorthodox barter lines.

But an even greater fear of German bondholders is inflation. Long a foe of excessive borrowing, Doctor Schacht saw his financial suggestions abandoned time and again last year as the Austrian anchluss, Czech crisis and Sudeten acquisition drew Germany deeper into the red. That inflation is coming may be indicated by the fact that 1938 saw currency circulation rise 20 per cent, bank clearings 50 per cent and bank deposits, 15 per cent.

Medicine

Until the New Deal, socialized medicine received little publicity. Last spring President Roosevelt appointed an inter-departmental committee to investigate health programs, this group subsequently clashing with the American Medical association and bringing to a head monopoly charges now pending against the association. Predictions are that the U. S. will inaugurate its comprehensive public health program before the justice department gets around to hearing A. M. A.'s case, thereby lessening the value of this proceeding. The prediction is bearing fruit in President Roosevelt's long range health program just presented to congress.

The program: Beginning immediately, federal-state expenditures would be increased to \$850,000,000 annually by 1949. Funds would go generally to help poor people receive medical and hospital care, to establish clinics, encourage vaccinations, develop maternal and child welfare clinics and stimulate disease-control measures.

Treasury

In 1934 congress gave President Roosevelt two broad monetary powers. Under one he could reduce the dollar's gold content by 50 per cent, though since 1934 the rate has been 59.06 per cent. Under the other power the President created a currency stabilization fund with increments accruing from the government's revaluation of gold holdings. Originally estimated at \$2,000,000,000, the fund is used to protect the dollar's value on international exchange, preventing undue fluctuations.

Both powers expire June 30 and the White House has already asked that they be renewed until the current presidential term expires January 15, 1941. Although lawmakers consider neither grant dangerous, the mere fact that gold devaluation and the stabilization fund are "powers" is enough to make this year's fiery-eyed congress balk.

Biggest opposition will grow out of the treasury's refusal to divulge even the size of the stabilization fund, the two-billion-dollar figure being only a guess. Though softened by well-substantiated reports that the government made about \$6,000,000 profit on the fund last year, Michigan's Sen. Arthur Vandenberg is expected to demand a full public accounting before voting to continue the President's power.

Taxation

Two former U. S. treasury secretaries, Andrew W. Mellon and Ogden L. Mills, condemned the inequity of tax exempt federal, state and local bonds. Since his "soak-the-rich" revenue proposal of 1935, President Roosevelt has fought tax exempt securities and one other unpopular exemption, that on federal, state and local employees' salaries. If these exemptions could be abolished the U. S. government figures it would net eventually \$300,000,000 annually from government securities, plus \$16,000,000 from employees' income taxes.

One day before the President offered this program to congress in a special message, he sent Treasury Undersecretary John W. Hanes to pave the way before a special senate committee. Said Mr. Hanes: "The time for action has come."

The Constitution's Sixteenth amendment gives congress power to "lay and collect taxes on incomes from whatever source derived," therefore the administration thinks statutory enactment rather than constitutional amendment will suffice. Later, after congress has spoken, the courts can decide whether its action is constitutional. Argued Mr. Hanes:

Tax exempt securities now permit many large-income persons to escape income taxes entirely, therefore they are unfair. The \$65,000,000,000 in tax exempt securities now outstanding (of which some \$50,000,000,000 would be taxable) is so formidable that it discourages investment in private enterprises involving risk. Thus industry cannot compete. As for income tax exemptions, the U. S. Supreme court has already set a precedent by ruling that salaries of such quasi-public agencies as the Port of New York authority are subject to federal taxation.

As might be expected, state and local groups jumped into the fight overnight. Argued the Conference of State Defense: Tax yield would not approach the immediate treasury estimate of \$70,000,000 a year. Moreover it would work hardship on states and municipalities by increasing financing costs. The statutory procedure would be unconstitutional. Most important, once congress power to tax income of state and local securities has been established, a situation could arise in which congress would attempt to tax state

TREASURY'S HANES
"The time for action has come."

revenues. Argued the U. S. Conference of Mayors, in a similar vein: Federal and state governments may recoup from income taxes the higher costs to municipalities in interest on their bonds. Observers thought income tax exemption could be repealed easily, but were less confident about tax exempt securities.

People

In Rome, Premier Benito Mussolini happily announced that 1,631,000 Italian babies were born in 1938, an increase of from 22.7 per thousand in 1937 to 23.6.

In Paris, the duke and duchess of Windsor moved into their modest new home, leased for two years.

Bruckart's Washington Digest

Theory of Spending Ourselves Out Of Depression Seen Unwise Course

Evidence in Congress of Definite Determination to Cut Down on Appropriations; Sound Sense of American People Always Finds Answers to Our Problems.

By WILLIAM BRUCKART
WNU Service, National Press Bldg., Washington, D. C.

WASHINGTON. — It always has been my conviction that the American people will find a sound answer to every national problem, if they are given the facts and the time to figure out what those facts mean. They may be swayed temporarily; they may be led or herded or threatened and these conditions may put them in a wrong spot temporarily, but I repeat that if they are given time, the national conclusion, the collective thinking, will be along sound lines.

They are demonstrating these things as a fact, again. There is no doubt about it. For five or six years, a considerable majority of the nation's citizenry was following the theory of spending ourselves out of the depression. It was an unsound course, obviously, but money was made to do a lot of talking—as money in billions of dollars will talk. Lately, however, hardy American thinking has been carrying the majority back to normal understanding, and the influence of spending by the federal government is sagging, distinctly.

Notwithstanding the statements, frequently heard from Republican sources, that "you can't beat Santa Claus," or the variation that "you can't beat \$4,000,000,000," there is plenty of evidence to show that there is quite a definite determination to quit that sort of thing. That is, there is a determination in most places outside of the so-called inner circle of New Dealers. Especially is this true in the halls of congress where, unless there is an earthquake, many important steps will be taken by senators and representatives in the direction of sound government finance. The old and familiar American traits of initiative, of saving, of living within one's income, are coming to the surface very rapidly and the restoration of these traits to places of respectability in American life is being reflected on capitol hill in Washington.

Opposition to Philosophy Of Spending Breaks Loose

It will be recalled how the opponents of President Roosevelt's philosophy of spending showed their mettle in the house of representatives when that body voted to cut \$150,000,000 off of the deficiency relief appropriation. Mr. Roosevelt asked for \$875,000,000. The cut was accomplished despite some hair-raising stories from official sources in the administration that elimination of any of the requested funds would mean suffering, maybe starvation, maybe quick death, for many thousands of persons.

Well, the house members (or a majority of them) did not believe those stories, and thus they made a start at cutting governmental spending. They gave an indication at the same time that there must be a general revision of the federal government's machinery for relief of the unemployed. During the debate and in the corridors, one heard frequent expressions that congress had appropriated last year the funds the administration thought necessary to maintain relief until the end of next June. But profligate spending had used up the money and the professional relievers had returned for more. Some of the debate was quite acrimonious and various charges were hurled that the relief officials had tried again to "buy" the election, that being why the funds ran short.

Immediately after the house was through with the relief bill, the opponents of spending in the senate started after the appropriation. There were many in that body who wanted to appropriate only for two months, proposing that in the meantime there should be a brand new relief setup devised. But the majority sentiment was swayed by the general argument that, whatever the shortcomings of the Harry Hopkins relief methods, poor people should not be made the goats; it was no fault of the unemployed who needed help that Mr. Hopkins, now the secretary of commerce, had made a mess of the relief program.

Beginning Only Foretaste Of What Is Coming

While it seems that a cut of \$150,000,000—which is about one-fifth the amount asked—represents something substantial, this beginning is only a foretaste of what is coming. The spenders have had their innings for five or six years, or since Mr. Roosevelt's "economy act" of 1933 was abandoned as a pattern of government. They have used various names and descriptions, such as "pump priming" and "spending to restore prosperity," etc. It appears now, however, that their days are numbered. I do not mean that everything in the way of government cash sop is going to be thrown out of the window at once. I believe I can see, however, that

curtailment of federal waste has begun; that the national belt is going to be pulled tighter by a couple of notches and that, sooner or later, even the beneficiaries of the federal cash will note the stigma and slacken their demands.

One of the leaders in this direction has been Sen. Harry Byrd, the Virginia Democrat, who is just as hard boiled in preserving a sound national government as his senior, the redoubtable Carter Glass. Through thick and thin, Senator Byrd has been attacking the spending policies, calling attention to the dangers of an increasing national debt and the certainty that the country as a whole must bear the burden of added taxation. He did this the while administration sharpshooters were firing one broadside after another at his head or hide.

The other night, Senator Byrd got on the radio and told the country again what was happening. He had some new facts and figures about the situation. The Virginian asked some rather pertinent questions, too, about the situation in England. He pointed out that England has not been running deficit after deficit and that, as a matter of fact, while the United States was adding more than \$21,000,000,000 to its national debt, England was balancing its budget and making some headway in reducing its national debt.

States Take Heed and Start Cutting Expenses

Due largely, the senator thought, to the fact that England had tried to live within its income as an individual would do, that nation had a national income in 1937 that was 118 per cent of its income in 1929. Which is to say that it was more prosperous than in 1929. Senator Byrd pointed out that this had happened while our government was running from a billion or so to five or six billions into debt each year. He suggested, moreover, that if the United States had done as well this country's national income would now be \$88,000,000,000 instead of the \$60,000,000,000 which was estimated for 1933. The thought was then advanced that England had not tried to "harry and frighten business" which was employing people who wanted work, not charity.

There are other things happening besides the Byrd attacks and the congressional action on relief appropriations to indicate the growing strength of those who believe spending borrowed money has been, and is, unwise. Word has come through to Washington of the action of several governors who are insisting that their states avoid getting into the hole. Governor Cochran of Nebraska, a Democrat, and Governor Bricker of Ohio, a Republican, each has put their respective state legislatures on notice that expenditures are to be pared to the bone. There are others who could be named, but from the information we have here in Washington, Governors Cochran and Bricker are the outstanding examples.

It might be said that these refer only to states and not to national policies. Very well. No state executive could get away with such a program unless he had the backing of a majority of his own people. If they believe that way about state affairs, there is no reason to think they will take a contrary view concerning the national treasury and funds which it must borrow to spend.

'Pump Priming' Gifts to States Force Them to Borrow

Further, nearly all of the federal appropriations for "pump priming," when granted to states or lesser jurisdictions, are offered on condition that the state, or city or county, must put up an equal amount. In hundreds of cases in the last six years, this policy has resulted in states or lesser subdivisions of government being forced to borrow on its own bonds in order to get hold of the federal cash. The result: new debt. It becomes clear, therefore, that if the state executives insist on reduced expenditures, they are unlikely to accept these federal gifts because of the probable added debt burden.

Another thing likely to happen in some of the states is added taxes. The state legislatures are due for an awakening as to the actual condition of their state finances. Some may dodge it this year, but facts will have to be faced. When new taxes come, what a howl there will be! That howl will be heard in congress, too, both concerning state and county and city taxes on the one hand and national taxes on the other hand. It appears to me that taxes will prove to be the best antidote for the poison of borrowing to spend that can be found.

"Panic in the Dark"

HELLO EVERYBODY:
Here's the story of a cock-eyed railroad accident that everything seems to work just from what it should. You know, when anyone mentions a railroad accident to me I immediately think of a collision. Marcella Timer of Clifton, N. J., was in one once only wasn't a collision, but as a matter of fact, was the opposite of a collision.

That sounds pretty doggone near impossible, and it. Two railroad cars coming together can cause a serious accident. On the other hand, two cars getting together and farther apart every minute—well—that ought to be about the safest thing on tracks. But it was the evening distance between two cars that threw Mrs. Timer into the lap of Adventure and caused all the trouble, panic, and suffering that you're going to read about.

Marcella's husband is a traveling representative of a New York firm. In the summer of 1925 he was covering New England territory. The Timer's home was in Ridgefield Park, N. J., but Marcella with her two children, a and a baby girl not quite a year old, was touring New England with her husband.

It was about the middle of July and they were in Hartford when the baby developed a colic and began running a high fever. Marcella decided to take the children home to Ridgefield Park. She took a West Shore train at Weehawken about four-thirty in the afternoon.

"I don't know whether you're acquainted with the West Shore railroad at this point," Marcella writes, "but it has a long meadows about seven miles from where it begins. I had

Passengers began to show signs of uneasiness.

been through this tunnel and had never given it a second thought. But many are the thoughts Marcella has given that tunnel since.

She boarded the train for Ridgefield Park and found the next to the last coach. The train started, and everything went as usual. It was about half way through when the train slowed down and came to a gradual stop. That wasn't unusual. Trains often did that. Marcella paid no attention to it and did any of the other passengers.

After a while the lights went out. That WAS unusual. The passengers began to get restless. A conductor was running up and down the side of the coaches swinging a red lantern. A second conductor stationed himself at the door. The day had been hot enough in place, but down there in the tunnel it was stifling. The windows were all closed to keep out the poisonous gases that filled the tunnel at all times, and what little air there was in the beginning was being used up.

The baby, whose fever had mounted, began to scream at her lungs. Several other passengers began to show signs of distress. Some of the men got up and approached the door, but they would not let them pass, nor would they give any satisfactory answer why the train was standing still in a dark and gas-ridden tunnel.

For a few minutes after that all was quiet. Then, suddenly, panic gripped the people in that dark, stifling car. One man leaped to a window and threw it open. "They can't keep us here to suffocate like rats," he shouted. "I'm getting out!" He clambered through the window, and many others followed. And almost immediately the coach was filled with the sulphurous poisonous gases of the tunnel.

"Then," says Marcella, "terror such as I had never before gripped me. My baby stopped screaming suddenly and became very still. My little boy leaned with unsteady arms against my side. In the pitch darkness everyone was peering for breath. Some man shouted to everyone to lie down on the floor. I couldn't get down with the two children. But I prayed and how I prayed!"

Coal Gas Fills Passenger Coaches.

"Women were fainting and men's lungs were wracked with cough that only filled them with more coal gas. I felt as if steel were gripping at my throat. Then I began to sink into a dark, black pit of nothingness that seemed to be coming up on me. I tried to fight it off, but it seemed it was no use. Deeper and deeper into the gloom I sank. Subconsciously I felt the train just stop by that time it didn't mean anything. It is the last thing I remember. Then I was unconscious."

Now let's go back and tell the part of the story that you didn't know anything about. What had happened was this: The coupling had broken, and the front part of the train had gone leaving the last two coaches behind in the middle of the tunnel. It was the exact opposite of a collision, but the conductors thought that it was serious, nevertheless. One of them went out into the gas-filled tunnel with a red lantern to make sure that they weren't hit by another train, while the other tried to help passengers from leaving the comparative safety of the car.

When the front of the broken train reached the meadows, the two cars was discovered and an emergency engine was sent immediately. But it had taken 20 minutes to accomplish that, meantime the passengers in those two stranded cars had had a lot of coal gas.

Ambulances were waiting when they reached the mouth of the tunnel to give first aid. "And maybe you think we didn't need it," Marcella says. "My little boy and I were revived almost immediately. I was only with a terrific struggle that my little girl's life was saved. And if Marcella had to go through another railroad accident, she'd pick a good old-fashioned collision in preference to any of these trick accidents where the cars all go in different directions."

The Greatest Novelist

There is a wide diversity of opinion among even the greatest literary critics on the subject of the greatest novelist of all time, but John Cowper Powys in his "Enjoyment of Literature" says of Dostoevsky that he is as much greater than all other novelists as Homer and Shakespeare than all other poets: "For he is superior to the rest in all the main essentials of fiction. He is a greater artist, a greater psychologist, a greater prophet, a greater thinker."

Many Uses for Bees

The heather which covers the land's great hunting moors is more use than as a food source, in that Highlands honey is used for everything from beds. Alternating with mortar, it was built into the walls of houses and was also used for thatching. Comfortable once made of it and it is very popular as a pot pourri dye was extracted from it and in Northern Scotland often twisted into one

MOUNTAIN MAN

OLD CHANNING WIRE'S NEW STORY

Here's a redblooded tale of the U. S. Forest service that will appeal to every lover of better Western fiction! There's action in every chapter—believable, thrilling action with Uncle Sam's forest guardians fighting lawbreakers and forest fires in the West's high Sierras.

And through it all runs a romance told with a maximum of heart-warmth, a minimum of saccharine.

Whether or not you're a "western" fan, you'll agree "Mountain Man" is one of the best adventure tales you've ever read!

START IT IN THIS ISSUE!

ODDITIES AT THE FAIR

NEW YORK—Here are a few of the strikingly unusual exhibits that will find at the New York World's Fair 1939:

A parachute tower from which visitors may "bail out" at an elevation of 250 feet and land on a "happy landing."

Solving "magic carpets" which you may look down from a height of two miles.

"The City of Tomorrow" the 200-foot Perisphere.

Tree of Life carved from trunk and branches of an ancient tree in Connecticut in honor of Revolutionary War heroes.

"Brodie" jumping six days from a reproduction of the Brooklyn Bridge.

The most valuable wheat field in the world in full production.

A million dollars worth of diamonds, rubies, emeralds and sapphires in one glittering display.

A steel-walled bathysphere which descent has been made down in the black depths of the ocean.

A "rocket gun" by which passengers will be shot to the moon.

A model of a human eye so sensitive that visitors may enter it and see out upon the Fair's busy streets just as if the eye were doing the looking.

A hundred blooded cows milked daily on a revolving platform.

An orange grove transplanted from all the way from Florida.

Automobiles with living drivers in hair-raising collisions by somersaults.

The largest opal in the world, well in operation with drillers in the "cast."

The largest model railroad constructed.

Appets 14 feet tall dramatizing the contents of the famous bathroom medicine cabinet.

Displays of rare orchids, renewed every three days by plants flown to the Fair from Venezuela.

The tremendous discharge of 10,000,000 volts of man-made lightning.

A Brazilian exhibit building erected on stilts.

A floor made of cotton.

Ricksha runners from South Africa six and a half feet tall and clad mostly in feathers, horns and beads.

A waterfall cascading from the high roof of a building.

Mural paintings that change their colors while you're looking at them.

Fireworks set to music in related patterns of color and light.

A city entirely populated by midge.

An automobile speedway half a mile long on top of an exhibit building.

Mighty snowstorms sweeping down out of a clear Spring sky.

A building turned inside out with its roofbeams on the outside.

Moving chairs traveling around in a building so visitors won't have to walk.

A flight to Venus so real you'll swear you've been there and met the folks.

The tallest mural paintings in the world.

A model of New York City so large that the Empire State Building is reproduced 23 feet tall.

A sphere 200 feet in diameter seeming to revolve on jets of water, like the little silver ball in the shooting-gallery.

A fountain that sings.

Paintings that have to be destroyed every night and done all over again next morning.

A "Fountain of the Atom," with electrons and protons dancing around a pulsating shaft of light.

"The West" Still Prevails For College Students

Austin, Texas, February 1.—At The University of Texas, 320 students are getting an education and living comfortably for the price of three packages of cigarettes daily.

The 320 students are residents of the University's fifteen cooperative houses, established on the campus since 1936. In cold figures they are actually paying board and room expenses with 50 cents a day, figures released here today show.

University officials estimate that the whole group saves \$40,000 a year, and declare that if cooperative housing could be provided for the entire campus, enough money would be saved annually to retire the State deficit in ten years.

While the average student spends \$30 and the dormitory resident, \$45 to \$55 a month, the "cooperative house" spends an average of \$15.90 for room and board.

"Cooperative housing will revolutionize America's system of living," one administrator predicted after checking comparative living costs.

"If we turn out two hundred students a year who know they can live comfortably on that little money think of what may happen ten years from now when the movement has spread back home."

The secret of the cooperative house is a "share-the-work" plan, according to Dick Rubottom, young assistant dean of men, who has managed the housing since 1936. Everybody has a job in running the house, and expenses are knocked into a cocked hat.

He points to the case of the average student.

For food, he spends 37 per cent of his budget; utilities, 14 per cent;

wages and maintenance, 16 per cent; equipment, 3 per cent, and laundry, 2 per cent.

For an hour a day, he is responsible for some job around the house. It may be dishwashing, sweeping the floor, care of the yard, bedmaking, cleaning the table. If he is a finance expert, he may be put in charge of the house's bookkeeping.

With cost of operating the house whittled to a minimum, the students turn to buying.

Thirteen of the houses purchase all their groceries and supplies in a "pool". The whole group buys only after Austin merchants have submitted competitive bids.

In addition to being a "saver", the cooperative house resident is also a "money maker", Dean Rubottom states. Figures show that about 65 per cent of the University's student body earns all or part of its school expenses. But practically all of the "cooperative housers" work.

Some are student library assistants some "graders", some work as student janitors filling station attendants. One boy is a full-fledged radio announcer.

As a rule, after subtracting for his job and his housework, the student has about ten hours left each day for class attendance, study and recreation.

Thirteen of the houses are for men, two for women. The same general procedure is in force at all the houses, Dean Rubottom declares.

The units may or may not elect a housemother. Their furniture is either their own or owned by the housemother. New members are either elected by the residents themselves or recommended from a long waiting list, by the Dean's office.

The girls' units—probably farthest advanced—handle everything including cooking, without outside help.

TIPS to Gardeners

Know Your Herbs

HERBS are becoming more popular each year because they are easy to grow and help make everyday dishes more appetizing and flavorful. Here are important facts about the more important herbs which you can grow in your backyard garden:

- Anise**—Seeds used to flavor bread, cake, cookies, candy; green leaves good for flavoring salad.
- Borage**—Leaves and flowers give unusual tang to fruit drinks and are good salad garnish; blossoms good cut flowers.
- Caraway**—Seeds used to flavor bread, cake, cookies, cheeses, baked apples.
- Chives**—Young leaves eaten like onions, or cut up to flavor soups and salads.
- Dill**—Seeds and leaves used for making dill pickles.
- Sweet Fennel**—Fresh stems eaten like celery or used in salads; bulb at base eaten raw or cooked; leaves add flavor to sauces and soups.

Marjoram—Used for seasoning poultry dressing; young leaves good for soups and salads; makes attractive house plant.

Sage—Excellent in meat and poultry dressings.

NEVER SLEEP ON AN "UPSET" STOMACH

Neutralize excess stomach acids to wake up feeling like a million

To relieve the effects of over-indulgence—escape "acid indigestion" next day—do this: Take 2 tablespoonfuls of Phillips' Milk of Magnesia in a glass of water—AT BEDTIME.

While you sleep, this wonderful alkalizer will be sweetening your stomach... easing the upset-feeling and nausea... helping to bring back a "normal" feeling. By morning you feel great.

Then—when you wake—take 2 more tablespoonfuls of Phillips' Milk of Magnesia with orange juice.

That is one of the quickest, simplest, easiest ways to overcome the bad effects of too much eating, smoking or drinking. Thousands use it.

But—never ask for "milk of magnesia" alone—always ask for "Phillips' Milk of Magnesia"

PHILLIPS' MILK OF MAGNESIA

IN LIQUID OR TABLET FORM

Busy Line

"Is the new office boy any good, Perkins?"

"Not much, sir. He spent most of the morning trying to get 'Established 1834' on the telephone."

NERVOUS?

Do you feel so nervous you want to scream? Are you cross and irritable? Do you avoid those dearest to you?

If your nerves are on edge and you feel you need a good general system tonic, try Lydia E. Pinkham's Vegetable Compound, made especially for women.

For over 60 years one woman has told another how to go "smiling thru" with reliable Pinkham's Compound. It helps restore build up more physical resistance and thus helps calm quivering nerves and lessen discomforts from annoying symptoms which often accompany female functional disorders.

Why not give it a chance to help YOU? Over one million women have written in reporting wonderful benefits from Pinkham's Compound.

Fate of Extremes

The fate of all extremes is such, men may be read, as well as books, too much.—Pope.

BETTY'S IDEA

"Silence!" exclaimed the teacher, as she was writing on the black-board.

Unfortunately, little Betty did not hear her.

"I say," she said, pointing to Betty, "do you know what silence is?"

The little child thought for a moment.

"Yes, miss. Silence is what you don't hear when you listen for it!"

Obliging

Grocer—Then you don't want no cranberries?

Customer—No; I've changed my mind. I see your cat is asleep in those cranberries.

Grocer—Oh, that'll be all right, I don't mind waking the cat up.

City Cameo

"And why did you leave your last situation as secretary?"

"Because I wouldn't let my chief kiss me."

"That's a pity, because in other respects you seem as if you'd suit me admirably."

SAFETY TALK

Crossing the Road
HERE'S the modern part of the ancient poster:
Why does a pedestrian cross a road—at the wrong place without looking?
That's what the National Council is trying to find out in an examination of the which proved that at least of the pedestrians killed in areas and 40 per cent of those killed in cities were in places other than intersections.
In 1937, the loss of life in these classifications amounted to the 5,600 mark.

The President's Salary

The salary of the President of the United States is set at \$75,000 a year with an additional \$25,000 for traveling expenses. The wife of the President is paid \$25,000 a year for household expenses and can usually further appropriation if needed. The government salaries of head butler, valet and wife's secretary. The President's wife has several young officers of the navy, known as sons.

Still Coughing

Even if other medicine don't seem to help, don't be discouraged, try Creomulsion. Your druggist is sure to refund your money if you're thoroughly satisfied with the results obtained. Air Map of Manhattan and New York World's Fair Grounds

NEW YORK—An aerial photographer recently obtained this remarkable picture showing the skyline of New York with its relation to the grounds of the New York World's Fair 1939. An artist has painted on lines indicating distances from certain points in Manhattan to the Fair grounds. These distances, and other facts, concerning road and bridge approaches to the exposition which is preparing to handle 60,000,000 visitors, are:

(1) From Empire State at Fifth Avenue and 34th Street, in the heart of the retail shopping district, to the Fair grounds, 7 miles.

(2) From Wall Street, in lower Manhattan, to the Fair grounds, 8 1/2 miles.

(3) From the entrance to the Triborough Bridge, 5 1/2 miles. (Motorists can make this trip without encountering a single traffic light).

(4) Holland Tunnel through lower Manhattan across Williamsburg Bridge (No. 9) to roads leading to the Fair.

(5) The Battery. (6) Brooklyn Bridge. (7) Manhattan Bridge. (8) Navy Yard. (9) Williams Street Bridge. (10) Queensboro Street Bridge. (11) Grand Central Parkway. (12) Newark Airport (now being enlarged at a cost of \$30,000,000). (13) Whitestone Bridge furnishing direct gateway from New York and Canada.

Now comes word from down at Austin that an epidemic of girl's nonsense organizations with Greek letter names seems to be sweeping the University of Texas campus. Among these nonsense organizations are the Nutt's, Nu Upsilon Tau Tau, which has existed for years and years. During the fall the Punk's Pi Upsilon Nu Kappa, organized, and now come the Foo's, Falphd Omicron Omega, who went so far as to coin their first Greek letter. The club pin is an exclamation mark. You may rest assured that college students will help draw the plans for the 'nuttiest' of all the new fads—the 'goofiest' of 'campusology' pastimes. Among the most common practices are 'knitting' by members of football teams, 'Shoe Races', for benefit of freshmen and the parade of—shirts—outside of pants—also for undergrads—There's this much about the entire 'insane'—practice—they really have fun—and that's what 'they learned in college'.

Today's the day—when the groundhog—comes out for a look around and see does he make a shadow—there's a large amount of 'ferdinand' connected with stories about this groundhog—as a matter of fact—it has even been known to come true—that if the ground hog sees his shadow—it will be six weeks until winter is over—Oh Yez—Guess I'll give you a bit of valentine poultry—This paper is white and the ink is black—If I tell a 'whopper' I'll take it back—Now isn't that sweet—Someone will be nominating me for poet laureat—one of these days.

Here's one for the Dictators—The

boundary isn't wide and I can step it—I'll take over' and you can't help it.

February is the birthday month of one of America's greatest—Don't tell me you know already—it's Mr. Washington—He couldn't tell a lie—he had already cleared out the underbrush with his axe—and other than that—George—had severed the cherry tree with his little hatchet—And another man—'Honest Abe' Lincoln—the backwoodsman from Illinois—'The Great Emancipator'—You can see his likeness almost any day—that is—if you have the money—a penny will do—Once visited Lincoln's tomb in Springfield, Illinois—every day—there's a large crowd present at the spot—and each day those famous words of Lincoln's—which he spoke when he boarded the Presidential Special to go to Washington as President—to the effect—'I do not know when, or if ever I will return'—and when he returned it was to be buried.

Noticed in the daily papers—that the Gallup Poll on what the nation is reading revealed that the bible is first—'Gone With the Winds'—is second with 'The Citadel', 'Green Light', 'Northwest Passage', and others in the group preferred by the American public—So much has been written and said—so much publicity has been given Margaret Mitchell's 'Gone With the Wind'—until it's become a by-word—personally I select 'Green Light'—a story that within itself contains enough religious inspiration—Naturally the bible comes at the head of the list for any Christian people.

The Boomerang Dollar campaign recently conducted by a number of co-operating Floydada business firms, was very successful—A number of Floyd County people have commented by saying, 'Well, I had never considered the matter—That's right, if we help the business man, he can help us'—How true, How true.

A trash fire originating on a nearby lot and at the rear of the Plainsman Tower Saturday afternoon threatened the first floor, where the editorial, advertising, publishing and business

A City Farmer

Aiken 4-H Club Met Thursday, January 29

Never rub the soap on the hair when shampooing it, Mrs. H. P. Clements, 4-H club sponsor, told the Aiken Club girls, Thursday, January 26, 1939.

Rubbing the soap on the hair makes it streaked, and sometimes splits the ends. When brushing the hair, brush it in a rotary motion.

Bernice Pyle, Myrel Jones, and La Faun Hodges were new members present. Thirteen members who attended were as follows: Martha and Jo Ann Clements, Clara Gloyna, Clementine Clark, Louise Seago, Velma Crank, Barbara Jeanne Goode, Frances Stambough, Bernice Pyle, Myrel Jones, La Faun Hodges, and the sponsor, Mrs. Clements.

Reporter.

Forest Service Concentrating Tree Plantings

The United States Forest Service is at this time concentrating their shelterbelt plantings in the north-west corner of Floyd County, on irrigated farms only, in the following communities: Providence, Lone Star, Prairie Chapel, Aiken, Irick, and parts of Lockney. All irrigation farmers of these communities interested in these plantings are asked to call at the office of County Agricultural Agent, D. F. Bredthauer, Floydada, to sign applications for these plantings. Applications must be signed within the next ten days. The Forest Service is able to accommodate some twenty-five or thirty farms at this time.

The purpose of shelterbelt plantings is primarily, to protect soil from wind erosion, protect growing crops, particularly in the early spring when they are subject to being blown out or badly damaged by high winds, to conserve soil moisture, to furnish protection for livestock, to furnish food and cover for insectivorous and upland game birds, in later years, to supply fuel, posts and other wood products, to protect and beautify the farm home and the community, and in other ways to contribute to the general well-being of the region.

Plantings will be located where, in the opinion of the Forest Service and the land owner, they will give maximum protection to the farm.

The plantings will consist of from 3 to 10 rows of trees and shrubs, depending on the type of planting the landowner desires. We recommend at least one planting consisting of 7 to 10 rows of trees on every farm, because only from the wider plantings will the landowner get all the benefits of a shelterbelt.

The trees will be furnished and planted by the Forest Service without charge. After planting the trees will become the property of the landowner. However, the landowner must agree not to remove or sell the young trees.

The landowner must agree to exclude all livestock from the planted area. If fencing is necessary, the landowner will furnish the fencing material required.

The landowner must prepare the ground for the planting in a manner acceptable to the Forest Service.

Proper cultivation is one of the most important operations toward successfully establishing and growing trees. Without good cultivation the planting will probably be a failure. Since the trees become the property of the landowner after planting, it will be his responsibility to do this necessary cultivation.

R. O. Keschner, United States Forest Service, Plainview, is engineer in charge of plantings in this section.

Malcolm Lider Is Mentioned In College Sports

Waco, Texas, February 1.—Malcolm Lider, speedy track and football star from Floydada, will be dividing his time with the two sports this spring as he intends to work out with the football team aside from his regular training for participation in Baylor's track program.

Lider was not among the sixty five candidates who reported for Coach Morley Jennings' initial call for grid prospects but is expected to report some time next week.

The "Floydada Flyer" is being strongly considered for a regular halfback berth on next fall's Bruin team and is due to see a lot of service.

Lider is a 10 second man in the 100-yard dash and is likely to make a good showing in the University's track meets.

SANDHILL BAPTIST CHURCH PROGRAM FOR NEXT SUNDAY

Rev. G. W. Tubbs, pastor of the Sandhill Baptist Church, has made the following announcement for that church for Sunday, February 5: Sunday School 10 o'clock. Morning Service 11 o'clock. All members urged to be present. Visitors invited.

Let Cavanaugh do your Printing.

21st Annual Bible Lecturship to Get Large Attendance

Abilene, Texas, February 1.—Early correspondence indicates that nearly half the states in the union will be represented at the 21st annual bible lecturship at Abilene Christian College scheduled for February 19 through 23.

Prominent church of Christ ministers from over the Southwest each year fill the roster of speakers. This year's list includes about 20 men, with Yater Tant, minister from Denver, Colorado, coming the furthest to deliver his lecture.

General theme of the lecturship this year is "Christian Stewardship." The six round-table discussions will center around "The Church." These discussions are set for Tuesday through Thursday, one each morning and one each afternoon.

The college is sending out hundreds of invitations and will play host to the several hundred expected. Last year's out-of-town attendance was estimated at 400 visitors.

Grandson of Golithly Dies Hobbs, N. M.

Funeral services for the infant son of Mr. and Mrs. Wheat of Hobbs, New Mexico, held Sunday afternoon in a funeral chapel at Hobbs. The week old child was the son of Mrs. R. E. Golithly of Hobbs.

Mrs. Golithly, R. E. Golithly and Mrs. Buck Bishop attended the last rites. The funeral was officiated by Rev. J. L. Lavin, a sister of Mrs. Golithly. The pastor's brother, Richard, age 10, and another sister of Mrs. Golithly, age 10, accompanied Mrs. Golithly to Floydada Sunday morning for the services.

When Eyes Turn Westward

Until this year, Germany's annual quota of immigrants to the United States was 25,957, boosted to 27,370 since Germany took over Austria. As above figures show, this quota was never used up, though in the 12-month period ending last July 1, German emigration to America showed a decided upswing. In recent months this has become even more marked, and today every westbound boat carries more refugees. The current fiscal year's quota is already near exhaustion.

Refugees get their first glance at the Statue of Liberty, wondering what the new land holds in store for them. Once in New York, they are bundled off to refugee headquarters.

America owes many of its most prominent residents to German persecution. Above: Albert Einstein, famous scientist, who has taken out citizenship papers here.

Edouard Benes, resigned president of Czechoslovakia, who is now a visiting professor at the University of Chicago. He was known as "Europe's smartest little statesman."

Max Reinhardt, long an important figure on the stage, who came to the United States two years ago, and is now directing a Broadway play. He is becoming a citizen.

Lotte Lehman, star of New York's Metropolitan opera, is herself "Aryan," but has two "non-Aryan" step-sons. She recently took out first citizenship papers here.

An American citizen (left) greets his Polish Jew brother and nephew as they arrive in New York in search of a haven. But thousands of others (right) still huddle in concentration camps.

Where can these persecuted men and women find a home?

Star Dust

- ★ Smart Claire Trevor
- ★ The Beadle Is a Fox!
- ★ Marg Wins Over Dad

By Virginia Vale

CLAIRE TREVOR'S experience shows plainly that it's a wise movie actress who has a radio contract up her sleeve. If she hadn't all signed and sealed for that "Big Town" program with Edward G. Robinson she might still be making B pictures for 20th Century-Fox.

That's what she was doing when she was given the rather small role of "Francie" in "Dead End," the Goldwyn picture. She played it magnificently, everybody raved about her performance—and then she went back to her own studio, and into B pictures again.

She couldn't persuade Darryl Zanuck that she ought to break away from the type of thing that she had been doing for his company. So, last May, she stepped out. She was convinced that, as a free lance, she could get the kind of picture work that she wanted. If she couldn't, she'd do without it. After all, there was always that radio salary, rolling right in!

One thing that she wanted, and got, was the leading feminine role in "Stage Coach." One thing that she didn't want, and didn't take, was a long contract with Warner Brothers. One more thing that she wanted very much and took was marriage, last July, to Clark Andrews. He directs that radio program that has played such an important part in her life.

Ever since they told Cary Grant that he'd be the beadle on that new radio show entitled "The Circle" he's been asking other people if they knew what it meant. He does the looked it up immediately, but he's gauging other people's intelligence by their replies. First he queried the other star performers on the program—Ronald Colman, Carole Lombard, Lawrence Tibbett, Groucho and Chico Marx and Robert Emmet Dolan. His private quiz program brought out an amazing amount of misinformation. One girl said a beadle was something that hung on a necklace. And everyone was disappointed when they heard that a beadle is just a herald.

Hal Roach has given his daughter, Margaret, a full-fledged dramatic role in "Captain Fury." That marks a victory for 17-year-old Margaret. Her father didn't want her to be an actress, so she went out and got minor roles in pictures made by other producers. He also sang in a night club. He finally gave in, and now she is happy, and all set to play an Australian settler's daughter who provides romance for John Warburton in the picture.

From Jean Hersholt, who is president of the Motion Picture Relief fund, comes a story on the "Screen Guild Show," which is broadcast by CBS every Sunday, 7:30 to 8:00 p. m. eastern standard time. Practically all of Hollywood's famous folk, as well as many of those behind the scenes, are contributing their services to it.

They receive no salaries for their work. The money which ordinarily would go to the artists, writers, producers and technicians is turned over to the Motion Picture Relief fund. It will be used to build a home for the aged and needy of the motion picture industry.

Be sure to listen to this program if you want to hear your favorite screen stars; they are all booked to appear sooner or later.

Nelson Eddy, whose marriage to Mrs. Ann D. Franklin, former wife of Sidney Franklin, motion picture producer, recently came as a surprise to studio officials, is taking a vacation from that coffee program. That is, if you call making a concert tour taking a vacation! He will return to it later in the year.

While he is gone Donald Dickson takes his place. He made several appearances on the program last season. Dickson is one of the few important singers who have come to the top by the radio route. He was singing regularly on a radio program when he was signed by the Metropolitan Opera company; before that he sang in local operatic productions in Cleveland, Ohio.

ODDS AND ENDS—The latest Cinderella story from Hollywood concerns young Dana Andrews, a lad from Texas. It's said that Samuel Goldwyn discovered him when he was piping gas and wiping windshields at a service station not far from Hollywood. James Ellison has been ordered to grow a beard for "Picardy Man," and his wife would like to use one of his razors on the man who cut him for the picture.

WHAT to EAT and WHY

C. Houston Goudiss Touches Upon the Food Values of Fish and Shellfish; Shows How They Can Help to Improve Nutritive Quality of the Diet

By C. HOUSTON GOUDISS

A PRESENT-DAY nutritionist might easily quarrel with the traditional distinction between fish, flesh and fowl. For the flesh of fish, cattle, swine, sheep and poultry is commonly referred to as "meat," and the nutritive values of all these foods properly may be considered together. Their composition is very similar, consisting principally of protein, water and fat, with the chief variation occurring in the fat content. They also average about one per cent of minerals and contain some of the vitamins in varying amounts.

Fish vs. Other Flesh Foods

There is a wide variation among the different kinds of fish in the amount of fat they contain. In general, fish have less fat and more water than other forms of meat. Their tissue fibers are also shorter, which makes for ease of digestion. In many cases, their flavor is less pronounced because there are fewer extractives.

For this reason, fish is considered less stimulating, and that is also why it is often served with some sort of sauce, or with a lemon garnish to point up the flavor.

The proteins of fish are regarded as equally useful with other forms of meat for helping to build and repair body tissues. Most lean fish are richer in minerals than fatty fish; in this respect, they resemble lean meats.

Salt water fish are notable as a source of iodine, required for the proper functioning of the thyroid gland. It is desirable that this mineral be included in the dietary to help prevent simple goiter.

The Cattle of the Sea

The most significant difference between fish and most other flesh foods is that with the exception of certain shellfish which are produced under government regulation, "crops" from the sea are neither planted by man, nor cultivated by him.

Unlike the farmer or the cattle man, the fisherman gathers his "harvest" without the previous effort of sowing seeds or cultivating plants; without the necessity of providing shelter or fodder.

To a man or woman who has never enjoyed the experience of catching fish for dinner, the sea may suggest nothing but an expanse of blue-green water. But to those who are familiar with the habits of its denizens, the sea is a fascinating place . . . teeming with life. It contains many forms of vegetable materials, of which seaweed is the best known. These provide food for the lower forms of animal life which inhabit the waters. They, in turn, are eaten by larger creatures. In the final analysis, all forms of animal life

in the sea, as on land, are dependent for their sustenance upon the sun, which stores up energy in green plants.

Fish as a Source of Vitamin D

The sun is concerned, too, with the production of vitamin D, as it is by means of sunshine that our best source becomes available. Fish liver oils are the richest natural sources of vitamin D. This vitamin is necessary for the proper utilization of calcium and phosphorus in building strong bones and sound teeth. We prize highly the liver oils of the cod, halibut, salmon, swordfish and tuna for their fine amount of this precious vitamin.

The body oils of certain fish are also valued for their vitamin D. Some varieties that are notable in this respect are salmon, herring and sardines. It is agreeable as well as economical to obtain vitamin D by serving seafood, because fish supplies so many other valuable nutrients at the same time.

Fish Is Universally Available

There are perhaps more varieties of fish than any other type of first-class protein food. A government bulletin has listed 40 kinds besides smoked and salted fish and the various shellfish.

Thus the use of fish provides ample opportunities for varying the menu. Moreover, though fish is more perishable than other flesh foods, it is available today in every town and hamlet, however remote from the waterways.

No matter where she lives, the homemaker can choose from a wide variety of canned, dried, smoked, salted and quick-frozen fish. And both transportation and refrigeration have been so improved that fresh-caught fish are distributed far inland.

The quick-frozen fish should be handled as carefully as fresh fish, kept under refrigeration, and used within a reasonable time after purchasing. Canned fish, naturally, requires no refrigeration, and a supply can always be kept on hand both for everyday use and for emergencies.

The most important canned fish, in terms of the amounts packed and sold, is salmon. This flavorful fish is an excellent and economical protein food which is also notable for its energy value; its calcium, phosphorus and iodine; and as a source of vitamins A and D. Other canned seafoods that are sold in volume include tuna, sardines, shrimp and

clams. Canned crab and lobster meats and oysters are also to be found upon the shelves of most grocers, together with other varieties of seafood, some packed in tomato sauce.

When using canned salmon and other kinds of fish that have been put into the cans before cooking, it is advisable to conserve the juices which cooked out during the sterilization process, as these contain valuable nutrients.

Varieties of Shellfish

Clams, oysters, shrimp and scallops differ somewhat from other forms of seafood, chiefly in that they contain some carbohydrates. They have very little fat. Oysters are rich in iodine and they might be compared to the glandular organs, such as liver and kidney, as a source of three vitamins, A, B and G.

Place of Fish in the Diet

The most important contribution of all forms of fish is their proteins, which as we have seen may be used interchangeably with those of beef, pork, lamb, veal and poultry. The iodine of sea-foods and shellfish is also extremely important, and in some varieties, the content of vitamins A and D. The more fatty fish, including mackerel, salmon, eels, herring, catfish and shad are comparatively rich in energy values. The fuel value of cod, flounder, perch, smelts and haddock, which are low in fat, and halibut and whitefish which have a moderate amount, may be increased through the use of a rich sauce, or they may be cooked in fat.

Taking into consideration its food values and economy, and when the preserved forms are utilized, its ease of preparation, the homemaker who desires to feed her family well should serve fish or shellfish, in some form, much oftener than once each week!

Questions Answered

Mrs. L. C. A.—There is absolutely no basis for the old superstition that fish and milk should not be taken together. Some persons might have been made ill by taking fish and milk at one meal. But in that case, we must conclude that the individual must have been allergic to one of these foods; or possibly the fish was not fresh.

Mrs. M. McK.—It has been calculated that the amount of vitamin G now believed to be necessary for helping to maintain good health might be supplied by a pint of milk, one serving of grapefruit, one whole egg, five slices of whole wheat bread and one serving of turnip greens.

Fashion News in Patterns

flare, so that you can wear a real petticoat under it, or sew in petticoat ruffles, for rustle and charm. Above the doll-waist, the bodice is gathered over the bosom, and has a crisp little frill that simulates the line of a bolero. High-shouldered sleeves complete its Victorian charm. The whole thing does nice things to your figure, and it's just about the most seductively feminine fashion you can choose. Make it of taffeta, flat crepe or silk print.

Skating Suit With Hood

Whether you ice or roller-skate, this is the thing to wear! And since the skating silhouette will be very smart for spring in sports clothes, too, you'll want a run-about outfit made with this same pattern, later on. The fitted, high-shouldered jacket, buttoned straight up to the throat, is excellent style for street and sports wear, as well as the swirling skirt. If you make this suit to wear for ice skating or in a cold climate, line both skirt and jacket of wool.

The Patterns.

No. 1669 is designed for sizes 12, 14, 16, 18 and 20. With long sleeves, size 14 requires 4 3/4 yards of 39 inch material. With short sleeves 4 3/4 yards. Requires 4 3/4 yards of pleating.

No. 1673 is designed for sizes 11, 13, 15, 17. Size 13 requires 1 3/4 yards of 54 inch material for long-sleeved jacket, 1 yard for short-sleeved jacket, 1 3/4 yards of 54 inch material for the skirt and 5/8 yard for the cap. To line jacket, 1 1/4 yards of 54 inch material; to line skirt, 1 3/4 yards; to line cap, 1/2 yard.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

CHOOSE FERRY'S

Dated Seeds
you know they'll grow

DISAPPOINTING stands of vegetables and flowers may be caused by seeds that have become too old to produce first-class crops.

It is difficult for gardeners to distinguish between "stale" seeds and seeds in their prime. To help you, all Ferry's Seed packets are dated. But first, Ferry's Seeds must pass rigid tests for germination and vitality.

When buying your seeds, look for this year's date-mark, "Packed for Season 1939." It's on the back of every packet in your local dealer's convenient display of Ferry's Seeds.

FFA Students Enter National Essay Contest

Several students in Future Farmers of America, Floydada High School chapter, have entered the National Essay Contest conducted by Swift & Company. The essays, using as a general topic the curing, packing and shipping of meat products, are graded on a basis of originality, facts and interest.

Students submitting essays are Jewel Elza, Roy Latham, Oran Beck, Granville Billingsly, James Anderson, Russell Patterson, W. T. Elza, Gordon Latham, Leland May, Harvey Lee Newberry, and James Turner.

Keith Tye, student in Texas Technological College in Lubbock, is visiting in Floydada with his parents, Mr. and Mrs. W. O. Tye.

Miss Jewel Lane, who has been employed with the County Agent's office, left the first of this week to make her home at Shamrock.

\$600.00 Taken in Robbery of Consumers

Floyd County officers are working for clues that may lead to the identification of the person or persons who burglarized the Consumers Fuel

Association offices here sometime Sunday night and escaped with \$598.81 in checks and cash.

The robbers' "take" represented the greatest portion of the Saturday receipts of the company, a farmer owned fuel association. According to officers who investigated the burglary, the guilty parties gained entrance through a rear window in the office. The cash was taken from a safe in the main office.

Mr. and Mrs. E. C. P... and Mrs. Trenton T. D... ghter, Sharon, spent... noon visiting in... were accompanied by... J. McRoberts and Mrs. Roberts who had... and Mrs. Verner Norman.
