

"By Helping Business You Help Yourself"

The Floyd County Plainsman

FLOYDADA, FLOYD COUNTY, TEXAS, MARCH 4, 1943

NUMBER 13

District OPA office Public to

March 4.—Asking the help insure fair distribution of the limited group of rationing Feb. 1943. Lubbock district office of Price Administration merchants were restricted to impose a restriction pair to a customer.

Reports from Dallas Wednesday morning stated that Billy's condition was much improved, and that Mr. and Mrs. Woody would return home in a few days.

Billy has been employed in a plane factory at Dallas during the past year and has been making his home there during that time.

Billy Woody is Ill In Dallas Hospital

Billy Woody, son of Mr. and Mrs. B. P. Woody, is ill in a Dallas hospital with pneumonia, according to information received by his parents Monday. Mr. and Mrs. Woody was carried to Childress Monday night by Sheriff Lee Howard and Bob Smith, where they left by train for Dallas to be with their son.

Reports from Dallas Wednesday morning stated that Billy's condition was much improved, and that Mr. and Mrs. Woody would return home in a few days.

Billy has been employed in a plane factory at Dallas during the past year and has been making his home there during that time.

Sgt. George H. Cardinol at Camp Dunlap

Camp Dunlap, Niland, Calif.—"Can you bake a cherry pie, Johnnie Boy?" is a bit of doggerel that has turned into a practical question as far as the armed forces are concerned.

In the Marine Corps, the answer is in the affirmative. Most of the Marine cooks, including the field cooks, have gone through the Marine Corps' cooks and bakers' school.

A combat or field cook such as leatherneck Sgt. George H. Cardinol, of Floydada, Texas, has had, in addition, a course in field baking.

A cook in civilian life, Sgt. Cardinol resolved to be something else in the Marine Corps. Completing recruiting training, he was transferred to—you've guessed it—the messhall.

There he peeled potatoes, washed dishes, waited on tables until he got so tired of it that he decided to learn to cook the Marine way.

Now he goes out in the field with a truck and trailer, sets up his portable kerosene stove, builds a wood fire for heating dishwasher and starts throwing edibles into the big kettles until Marines within a quarter of a mile can sniff the desert air and determine with out having to ask what's cookin'.

Typical field breakfast is bacon and eggs, scrambled, dry toast, coffee and an apple or orange. Dinners may include roast beef and spinach—and there is plenty of sand in the Marines' spinach, desert winds being what they are. Canned and hydrated foods are used mostly, as field rations must be compact.

Greatest difficulty in open air cooking, the sergeant explains, is sand and dirt, and weather. Sometimes it rains. That makes the kitchen pretty messy, he says. Field cooking does not permit the variety of interior cooking. But the open air stimulates the leatherneck appetite, which is the same compensation for a cook that appeals to the actor, Sgt. Cardinol says.

ROY E. SMITH IS PROMOTED TO RANK OF CORPORAL

Roy E. Smith, 41, son of Mrs. Della Mae Smith Route two, Floydada, Texas, has been promoted to the rank of corporal, according to information received here this week. He has been assigned to duty at Garden City Army Air Field, at Garden City, Kansas, with the field lighting service.

Definition of a budget: Telling your money where to go, instead of wondering where it went.

Canadian Paratrooper Train in United States

Maybe the jump master is telling them the old one about sending their chutes back if they don't work or maybe he's got a new one. Anyway, he seems to be peppering the boys up as they tensely await order to jump. Picture was made by Photographer Harry Rowed while in flight high above the Fort Benning School.

ANOTHER excellent example of the high degree of co-operation which now exists between the United States and Canada in the fighting of this greatest of all wars is the training of Canadian paratroopers at the big U. S. Army school at Fort Benning, Ga. It was originally planned that after the first batch of paratroopers were trained for Canada at Fort Benning that a Canadian school would be set up at Camp Shilo, Manitoba. Unexpected delays in the obtaining of certain equipment made it impossible to carry on the parachute training at Camp Shilo this winter so an arrangement was made with United States authorities to train additional Canadian paratroopers at Fort Benning. The U. S. Army was anxious to test equipment under special winter conditions, so facilities were provided for the doughboys at Camp Shilo. Thus a simple swap was made that was characteristic of the manner in which the United States and Canada have been working almost as one unit in a joint war effort.

The Canadians are tickled with the opportunity of visiting the southern United States and their letters home have been full of praise for the hospitality and good fellowship shown them by the people of the South.

The formation of a parachute unit in the Canadian Army is in line with the policy that has made it one of the most highly-mechanized and hard hitting forces for its size in the world. Although the country's small population has made it impossible to ever place a large army in the field, Canada has determined that lack of volume in manpower will be made up by quality.

Next spring the United States troops at Camp Shilo will return to their country and the Canadian troops at Fort Benning will return to Camp Shilo. Like American paratroopers, the Canadians receive extra pay for their hazardous duties. Very stiff standards have been set up for the Canadian paratroopers. Already there have been far more volunteers for the special unit than there are vacancies. A significant indication of the future duties is the fact that thirty per cent of the paratrooper unit will be made up of French Canadians who are bilingual. The paratrooper soldiers are required to be not more than 185 pounds in weight with no recent fractures and almost perfect eyesight. They must also have specially good feet and ankles.

Next stop terra firma. Captain H. A. Fauquier, Ottawa, brother of famed R.C.A.F. ace Johnny Fauquier, steps out into space from the big transport plane as the jump master signals him with pat on the leg. Notice the special release cord strapped across parachute and fixed to plane.

ARTHUR A. DAILEY IS MADE SANTA FE RAILWAY ADVERTISING MANAGER

Amarillo, March 4.—The appointment of Arthur A. Dailey as general advertising manager of the Santa Fe Railway, succeeding the late R. W. Birdseye, was announced today by T. B. Gallaher, passenger traffic manager. A native of Nebraska, Dailey has been assistant general advertising manager for the railroad since 1937. He is a veteran of World War I and a graduate of the University of Illinois.

Properly Feeding The Dairy Herd Is Important

A well balanced feeding program for a dairy herd should comprise about one third hay or silage, one-third pasture and one-third concentrates. This is the suggestion of G. C. Gibson, dairyman for the A. and M. College Extension Service.

A Jersey cow weighing about 1,000 pounds will eat about 20 pounds of dry matter in roughages daily. If this is obtained from tender green grass containing 85 per cent of water, the cow would have to eat 134 pounds of grass. If gotten from silage she would have to eat 60 pounds daily. The sum of this is that one pound of hay is equivalent to three pounds of silage, and about six pounds of green grass based on the dry matter contained.

Hay should be fed the year round, Gibson advises, even when cows are on good pasture. In that case they will not eat much hay, but the moment the pasture begins to fail they start eating more, if the hay is before them. Experiments show that production of milk was maintained more evenly where cows had access to hay at all times.

Good green grass is the best and cheapest feed for a dairy cow. But, Gibson points out, the catch in that is that a high producing cow cannot hold enough grass to entirely meet her requirements. Accordingly, it is necessary to feed some dry roughage and concentrate feeds additionally.

Since a pound of digestible nutrients from roughages is as valuable as a corresponding amount of concentrates, and usually much cheaper, as much as possible of the feed requirements should be sought from roughages. Dairy men agree that more of them fall down on the roughage requirement than on any other part of the herd feeding program, Gibson says. Pasture management designed to control brush and weeds to permit grass to grow, plus one ton of hay and three tons of silage per cow will correct this. If silage isn't available, provide two tons of hay.

MISS LA VERNE HANDLEY BECOMES BRIDE OF TRESSMON GLOVER

Miss LaVerne Handley, daughter of Mr. and Mrs. S. J. Handley, of 621 East Tennessee street, and Tressmon Glover, son of Mr. and Mrs. J. R. Glover, of Campbell community, were united in marriage Saturday morning at 9 o'clock at the Primitive Baptist Church at Cone, Rev. W. R. Dale officiating.

Mr. and Mrs. Glover were accompanied to Cone by their parents, Mr. and Mrs. J. R. Glover, and daughter, Juaneal, and Mr. and Mrs. S. J. Handley.

Mr. and Mrs. Glover will make their home in Floydada.

Farmers Are Encouraged to Meet War Goals

Texas farmers were asked this week to plant as much of their cotton allotments as they could but not at the expense of other crops vital to the war program.

In encouraging farmers to meet war production goals first and then planting cotton, George Slaughter, chairman, state AAA committee, said that land and labor should be used for feed and food crops which produce more oil and meal per acre than cotton.

"Nearly all farmers are working short-handed and must make their labor count for maximum production of the things we need," he said in comparing oil and meal value of cotton, soybeans and peanuts.

According to production records, one acre of peanuts in Texas yields 203 pounds of meal and 110 pounds of oil and one acre of soybeans produces 457 pounds of meal and 53 pounds of oil.

In addition to meal and oil, an acre of peanuts also will yield from 1,000 to 1,200 pounds of high quality hay.

Referring to planned production, Slaughter said that under last year's program, when goals were established for agricultural products, approximately 7,000,000 tons of protein feed were produced as compared to the former all-time high of 4,776,000 tons, produced in 1941.

"We can exceed last year's production if 1943 goals are realized but we can't do it with cotton alone. It will take peanuts, soybeans and feed grain crops," he said.

Produce Ration Book Before Purchasing Gas

Lubbock, March 4.—The gasoline attendant is not forsaking courtesy when he asks to see a motorist's ration book and checks the windshield sticker and license plate, Lubbock District officials of the Office of Price Administration reminded.

The attendant merely is fulfilling provisions of rationing regulations to safeguard mileage rationing from misuse, they said.

Attendants are required to ask for mileage ration book before delivering gasoline; be sure the correct ration sticker is properly displayed on the vehicle; be sure the vehicle is the same as described on the ration book cover; deliver no gasoline if ration book expiration date has passed; if there are not enough coupons for the current period to cover purchase or if the coupons are not properly endorsed on the back by the purchaser; detach coupons from book and accept no loose coupons, and "follow all instructions and regulations in checking and handling coupons."

Posters captioned "Official Notice to Gasoline Consumers" and informing the motoring public the station attendant is required to fulfill those requirements are being distributed to gasoline retailers through oil company channels, according to information received from Washington.

"Failure by you or the attendant to observe these rules will constitute a violation of the mileage rationing regulations," the posters state.

LET CAVANAUGH DO YOUR JOB PRINTING

Douglas Hollums Assumes Charge of Express Office

Douglas Hollums was checked in as American Express Agent Monday, succeeding Somer Hollingsworth, who had served as agent the past year, following the resignation of his father, A. S. Hollingsworth. Mr. Hollums will be assisted by his wife in the office work.

Mr. and Mrs. Hollingsworth left Monday afternoon for Lubbock where they will visit his brother, Lewis Hollingsworth, and will go to Midland and visit his parents, Mr. and Mrs. A. S. Hollingsworth, before reporting for induction in the air corps at Lubbock March 11.

Hal Ray Hall is Visiting Parents

Hal Ray Hall, of San Francisco, California, station U. S. Navy at Treasure Island, arrived Monday night to visit his parents, Mr. and Mrs. Grady Hall. He arrived at Amarillo Monday morning and Mrs. Hall went to Amarillo and brought him home.

Hal Ray will probably be here until Saturday, and is to report back for duty March 9.

Mr. and Mrs. Hall have another son, T. G. Hall, in the service of the U. S. Army, and he is stationed at Luke Field, Arizona.

Motion pictures of all University of Texas football games, including the ones with Northwestern and T. C. U.—Texas lost both of these—are now in circulation in service camps throughout the nation, Coach D. X. Bible has announced.

FARM LABOR PROGRAM ANNOUNCED

College Station, March 4th.—Secretary of Agriculture Claude R. Wickard, national food administrator, has called on the A. and M. College Extension Service to assist with a gigantic program for the placement and training of farm and non-farm labor for tending and harvesting 1943 crops. G. E. Adams, vice director, and C. Hohn, assistant state agent, said recently upon their return from a St. Louis conference devoted to the government's new program designated to remove some of the hazards from the farm labor situation.

In general, the program involves the recruiting and placing of local rural labor, promoting more efficient use of all farm labor that is available, and the placement of non farm youth in the Victory Farm Volunteers and the proposed Women's Land Army composed of nonfarm women. Mobilization of a crop corps of 3,500,000 workers in the United States this year is regarded as probable.

A survey of labor resources available and of possible labor needs during various seasons of the year will be made by county Extension Service offices over the state. Use of Texas' "human chain of information" to farm families, set up last May by County Agricultural Victory Councils, will be sought.

"Our food situation may become so serious that farmers will welcome the help of inexperienced labor," Mr. Adams said.

A lot of folks think we are good because we pretend to be shocked at the sins of others.

WORK FOR IDLE FARM MACHINERY

There's a job waiting for every piece of idle farm machinery still capable of service. The only problem is to bring the job and the machine together.

According to M. R. Bentley of the A. and M. College Extension Service, C. W. Jackson, Harris County agricultural agent, has found a way to do this. He listed all of the available idle farm equipment in the county and made the information accessible to any one seeking it.

The list was sent to the farm machinery rationing committee, which has assisted a number of farmers in obtaining pieces of idle equipment which they needed in their 1943 farm production program. Vocational agricultural teachers, farm implement dealers and leading feed retailers in the county also were given copies. All of these have given assistance in placing some of this equipment on farms where it was needed seriously.

Employment of this plan uncovered an interesting fact, Bentley observes. Many farmers requiring certain equipment badly discovered through the list that nearby neighbors had the particular part they were seeking.

Bentley, who is extension agricultural engineer, says that L. A. Pierce, Webb County agricultural agent, has a similar program under way.

A man is that irrational creature who is always looking for a home-like atmosphere around a hotel and hotel accommodations when he is at home.

Fireless Cookers Again Are Coming Into Demand

College Station, March 4th.—With another World War in progress, the fireless cooker is coming into its own again. Hazel Phipps, specialist in food preparation for the A. and M. College Extension Service, says reports are reaching her about increased home construction of this inexpensive, safe, and efficient device. In Denton County, for example, Mrs. Edna W. Trigg, county home demonstration agent emerita, has been besieged with requests for help in making fireless cookers. She is an "old hand at the job," she says, for she helped with the construction of hundreds of cookers as one of the pioneer county Extension agents during the first World War. A fireless cooker is simply a

well-insulated box which keeps the heat in and the cold air out, Miss Phipps explains. It is best suited to the preparation of dishes that need long slow cooking—such as baked beans, soups, stews. Or it can be used for cooking the less tender cuts of meat and cereals.

With the aid of the cooker, busy homemakers can put certain types of dishes in the cooker, go about her farm work during the day, and in the evening find the main part of her meal ready to eat, the specialist continues. Canteen workers can use fireless cookers to keep food warm when it is cooked in one place and served in another. Directions on constructing and using a fireless cooker can be obtained from any county home demonstration agent.

A psychiatrist says the unmarried are considerably more likely to go crazy. Go crazy and get married, eh, doc?

WOMEN'S ARMY AUXILIARY CORPS RECRUITING MONTH IS DECLARED BY GOVERNORS

Austin, Texas, March 4.—Gov. Coke Stevenson of Texas has joined four other chief executives of states comprising the Eighth Service Command in proclaiming March as Women's Army Auxiliary Corps Recruiting Month.

The action followed an appeal for complete civilian cooperation in the WAAC recruiting drive issued by Major General Richard Donovan, Commanding General of the Eighth Service Command.

"Whereas Major General Donovan has requested all patriotic citizens to observe March as WAAC Recruiting Month, and to bend every effort toward the stimulation of enrollments in the Women's Army Auxiliary Corps," Governor Stevenson wrote.

"Whereas, Texas is an integral part of the Eighth Service Command, and charged with a large share of the responsibility of furnishing womanpower for the WAAC, and,

"Whereas, Texas has always fulfilled its obligations to the nation, and its people recognize the need of utilizing the skills and aptitudes of women as well as men in the service of our country during this greatest of all emergencies;

"Now, therefore, I do hereby proclaim March as WAAC Recruiting Month in Texas, and call upon all citizens for sincere participation in, and wholehearted support of this vitally important

effort."

Similar proclamations were signed simultaneously by the governors of Arkansas, Oklahoma, New Mexico and Louisiana.

Army officers said the proclamations would touch off continued and intensive recruiting campaigns to fill the Eighth Service Command's quota of 8,000 WAAC enrollees during the first quarter of 1943.

—V—

Cheese manufacture in Texas in January dropped 37 per cent from the level set in the same month of last year, the University of Texas Bureau of Business Research reports. Reason for the decline is that milk used in cheese manufacture can be sold readily as fluid milk, the Bureau report explained.

We've noticed that some people know a lot more when you try to tell them something than when you ask them something.

DO YOUR PART

Do your part
in doing our part
you and I
in this war
for our country,
and not die?
We will see
that you are trying
to keep this country free.
From the Nazis
and from the Japs
we should do
a little more perhaps.
I don't realize just yet
if there's a war going on
if those service boys
have already gone.

Do you know it well
as they are doing their part
in fighting for us
and their heart.

Do you do
as those boys
do here and there
in only life's joys?

We want to be free
we all have to fight
we have to keep fighting
day and night.

Do not depend on some one else
to do it all alone
we all have to work
in front or at home.

Those fighting fellows
are over there
just sit back
if you didn't care.

In your war
as of any one
we all do our part
we'll get things done.

Melaine is working at Douglas
Plant, Santa Monica, Califor-
nia helping build air planes for
the army. Two of her sisters are
working there also.

**Farm Youth of U. S.
Looks to Tomorrow**

TOMORROW'S farmers and farm homemakers are second to no school group in their enthusiasm for investing in War Bonds and Stamps to make sure their future is secure. Through the Schools At War program they are investing what they save and earn in War Stamps and Bonds.

First evidence of this is the amount the 4-H Club boys and girls and the FFA boys invested in war savings in 1942 from "Victory Pig" and other projects. A million and a half 4-H Club members put \$6,000,000 of their own savings in War Bonds and Stamps and sold \$2,500,000 worth of War Savings to their neighbors. Nearly a quarter million members of Future Farmers of America invested more than \$1,500,000.

Spurred by the realization that the financial welfare of farm families the next 20 years depends on how wisely they use today's higher incomes from increased food and other wartime production, both groups have set their goals still higher for 1943.

These farm youths are building financial reserves, and urging their parents to do the same, for after-the-war necessities, to meet financial emergencies and to help them get started in college.

They're building reserves today for tomorrow's farm buildings and for the other things they will need when they're tomorrow's farmers and homemakers.

His Pigs Go to War
Young Johnny Clay of Rocky Mount, North Carolina, is typical of farm children raising victory pigs and devoting profits to War Bonds.

**Schools Open Drive
To Buy 10,000 Jeeps**

THE little jeep which is serving so nobly from Guadalcanal to Africa has become the symbol of the gigantic efforts of millions of American school children in their War Savings program.

Thousands of public, private and parochial schools soon will be displaying a certificate of honor from Secretary of the Treasury Henry Morgenthau, Jr., signifying that they have paid for at least one jeep by buying \$900 in War Stamps and Bonds.

Countless others will be flying the Schools At War banner awarded to schools with 90 percent pupil participation in War Savings.

Ten thousand jeeps and a hundred bombers! This is the new goal of America's schools as 30,000,000 children continue their Schools At War program under the auspices of the Treasury Department and the U. S. Office of Education.

Results so far in the program reported by Dr. Homer W. Anderson, Associate Field Director in charge

Battle Flags of the Schools
of the education section of the War Savings Staff, are:

More than 7,000,000 elementary and high school students from 30,000 schools At War scrapbooks for state and local exhibits.

War Stamp and War Bond purchases may reach a grand total of \$300,000,000 for the school year.

Processed Canned Foods Are Dangerous

College Station, March 4th.—Hoarders who try to evade the intention of the point rationing system by transferring commercially canned food into glass jars are running a risk of fatal food poisoning.

Winifred Jones, specialist in food preservation for the A. and M. College Extension Service quotes a warning against this practice from Dr. Russell M. Wilder, physician and nutritionist with the Food Distribution Administration. "Reprocessing of foods removed from cans is unsatisfactory for homemakers to undertake and may be dangerous," Dr. Wilder says. "Not only does the product become a soupy mass with decreased food value, but it may be unsafe to eat."

Miss Jones suggests that families who wish to have an abundant supply of vegetables and fruits should produce and conserve their own at home rather than follow a practice which is contrary to the intent of the rationing program as well as wasteful of food and food values. She points out that home canned products were exempted from the rationing regulations to encourage an increase in home production and preservation.

Prospects for jars for home canning indicate that an adequate supply will be available, the specialist says. This is because production of glass jars is not restricted, and there would be enough lids to go around. The USDA Bureau of Home Economics believes a few tin cans will be on the market, but Miss Jones warns homemakers they must not expect enough to go around.

"We won't have all the types of containers we're accustomed to, but there will be some new war time containers to take their places," she concludes. Synthetic fiber jar rings made of soybeans will be one innovation.

MRS. Y. ONSTOTT, FORMER RESIDENT OF FLOYDADA, DIES AT BROWNFIELD

Mrs. Y. Onstott, of Brownfield, died at her home there Friday, February 26, at 1 o'clock. Funeral services were held Saturday at 4 o'clock at Brownfield.

Mrs. Onstott was a former resident of Floydada. Her husband operated the Onstott Dry Goods Company store here in 1934. The family moved to Lubbock from Floydada and for several years they have made their home in Brownfield.

Survivors include her husband, Y. Onstott, three sons, Kindell, Amon and Vance, all of whom are serving in some branch of the U. S. Army.

Mrs. J. A. Grigsby returned home this week from Abilene where she had been visiting her daughter, Mrs. Carrie Bishop for the past three months.

People who look back these days may not turn into a pillar of salt, but they may turn into a telephone pole.

Santa Railway System Promotes L. H. Powell

Amarillo, March 4.—The appointment of L. H. Powell, formerly of Amarillo, as assistant to chief engineer, system, of the Santa Fe Railway was announced today by G. W. Harris, chief engineer.

A native of Baird, Texas, Powell is a graduate of Texas A. and M. College and has been employed by the Railroad since 1917. He joined the company as a computer at Amarillo, Texas, and was promoted to accountant at Chicago in 1919. He has been an assistant engineer since 1920.

The promotion of Charles H. Sandburg as assistant bridge engineer of the Santa Fe System, a newly created position, also was announced by the railroad.

Sandburg was born in Minneapolis, Minn., in 1901. He was educated at the University of Minnesota where he received his Bachelor's Degree in civil engineering in 1926 and his Master's Degree in 1929. He became a licensed structural engineer in the State of Illinois in 1934.

He joined the railroad in 1926 as a draftsman at Chicago and was promoted to assistant engineer in 1930. He was transferred to Las Animas, Colorado, in a similar capacity in 1939. He has been an assistant engineer at Chicago since 1940.

BURIAL FOR McCLURE INFANT HELD SATURDAY

Funeral rites were held Saturday afternoon at 3 o'clock at the City Park Church of Christ for the infant daughter of Mr. and Mrs. J. C. McClure. Beth Lavelle McClure was born February 26, 1943, at the Floydada Hospital and Clinic and lived six hours. Rev. J. G. Malphurs, minister of the local church, officiated. Interment was made in Floydada Cemetery with Harmon Funeral Home in charge of arrangement.

Mr. and Mrs. George Hulsey and son, George, Jr., of Oklahoma City, spent the week-end with Mrs. Hulsey's mother, Mrs. P. G. Stegall, returning home Wednesday morning.

Saying the wrong thing is misfortune; but trying to explain it is disaster.

Political Announcements

Those whose names appear below have authorized The Floyd County Plainsman to announce their candidacy for nomination for the office under which their name appears, subject to the action of the City Election to be held on April 6, 1943:

- FOR CITY MARSHAL—
Bob Smith
- FOR CITY SECRETARY
Silas E. Duncan
T. T. Hamilton

Texas Farm Products Purchased By FDA

College Station March 4.—Large war-time purchases of Texas farm products during January were reported today by E. L. Upshaw, Austin, state representative for the Food Distribution Administration and member of the Texas USDA War Board.

Among the larger items were 3,200 bundles of hog casings and 2,040,048 pounds of other meat products; 13,795,000 pounds of livestock feed; 57,535 bales of raw cotton; 1,571,715 pounds of dried whole eggs; 11,800,000 pounds of milled rice; and 2,600,000 pounds of shortening. Other purchases included 1,500,000 pounds of soybean oil; 6,000 gallons of concentrated grapefruit juice; 120,000 pounds of uncolored oleomargarine; 283,950 pounds of wheat flour; and 40,000 pounds of oleo oil.

These commodities were bought for Lend Lease, territorial food programs, Red Cross and other special programs.

TO THOSE INDEBTED TO, OR HOLDING CLAIMS AGAINST THE ESTATE OF C. APPLEWHITE, DECEASED:

The undersigned having been duly appointed Executor of the Estate of C. Applewhite, Deceased, late of Floyd County, Texas, by G. C. Tubbs, Judge of the County Court of said County, on the 15th day of February, A. D. 1943, hereby notifies all persons indebted to said estate to come forward and make settlement, and those having claims against said estate to present them to him within the time prescribed by law at his residence at 1108 Quincy Street, Plainview, Texas, where he receives his mail, this 15th day of February, A. D. 1943.

G. C. APPLEWHITE,

Executor of the Estate of C. Applewhite, Deceased. 11-4p

VETERAN TELEPHONE RE-ENLISTS

Desk telephones—sturdy veterans that figured in the growth of America's telephone system for years and years—are being called back for wartime service.

More and more, telephone materials and telephone production lines have been shifted to supply things the Army and Navy must have. That means less and less for the nation's telephone system.

So thousands of these old-timers are coming off the shelf, ready to do their part in meeting today's tremendous demand for telephones.

They are good telephones—first-class talking instruments. And they'll do a first-class job of carrying the calls of a nation at war.

LET CAVANAUGH DO YOUR JOB PRINTING

"I'm buying War Bonds today for an all-electric kitchen tomorrow!"

"It isn't often that I can spend my money twice... but War Bonds let me do exactly that!"
"They're wonderful, anyway. Every time I buy one, I feel inside the way I do when a band plays the Star Spangled Banner! I sort of feel I'm doing something for my country and the boys in the service."

"Then when I get down to earth again, I realize that I'm doing something for MYSELF as well. I'm really saving money when I spend it for War Bonds. I get to dreaming about what I'll do when this war is over, and about the things I want to buy. Things like the rest of the equipment for that electric kitchen I have my heart set on, but can't get for the duration."

"That's why, when I buy War Bonds 'til it hurts, it doesn't really hurt at all!"

Canada's Tanks Roll Off Production Line And Into Battle

These heavy infantry tanks of a bilingual battalion from Quebec are part of the Canadian Army Tank Brigade, photographed during intensive manoeuvres in England. The outfit has been built into a powerful, effective striking force which will make its strength felt on some allied offensive front soon.

ONE of the first of the United Nations to take up arms against Axis aggression, Canada, after three years of war, finds her industries fully mobilized, peak production being expected early in 1943. Although her peace-time industrial facilities are small compared to the manufacturing might of the United States, the Dominion nevertheless has become one of the main weapon-producing countries on the side of democracy. Canada constitutes the main source of supply of motorized equipment for the British Empire. It has turned out thousands of fighting vehicles every week and has delivered more than 300,000 motorized units since the start of the war.

In addition to a large output of Bren gun carriers, in service in every theatre of war, Canada is producing two types of tanks. One is the British Valentine, a rugged infantry tank which has been sent to Russia in large numbers. It is produced by the Canadian Pacific Rail-

Part of the production line in the Ram tank factory, second largest arsenal for tank production in the world. Heavily armed with machine guns and cannon, the Ram is powered with a Wright Whirlwind engine, a versatile war machine.

way Company in its Montreal Angus shops. The Soviets regard it highly. The other is the Ram, a cruiser tank designed by Canada's famed tank man, Major General F. F. Worthington. A crack medium tank, Canada's Ram is said to have contributed largely to new British and

American designs for cruiser ships. Indicative of the progress accomplished in Canada in the production of war equipment is the fact that in 1942 Canada is turning out 10 tanks and armored fighting vehicles for every unit it produced in 1941.
