### Farmers Cutting Down Debts, Lloyd Reports

Farmers and ranchmen generally are cutting down debts at a more rapid rate than at any time in the history of the land bank system, reported John A. Lloyd, director of the Floydada National Farm Loan association upon his return from a conference of representative directors of 19 associations held at Lubbock on April 30.

This group of directors, meeting with officers of the Federal Land

Bank of Houston, reported that farmers' cash is flowing into debt retirement and that the land bank's loans are in the best condition in 10 years.

The directors urged that land values should be appraised on the normal agricultural value rather than according to market trends. This policy helped to prevent wholesale foreclosures during the depression and is equally important now in times of rising prices, they said.

Total land bank commissioner loans outstanding through these 19

associations represented at this meeting amounted to 14,876 for \$30,910,851.03.

will be normal again soon, it is thought.

A Worried Mind

Exam Week Floydada High School

Dear Reader: Four years ago a perfectly normal and happy little girl entered high school with her hopes running high, wide, and expectantly toward the day, or night, when she would proudly bear home a sheep-skin statute from Floydada High School.

Then one day she found that she was a senior. She also found that she was a very popular young girl and that life was indeed a bowl of cherries.

Of course she didn't study. No one studies their lessons their senior year, so why should she? She had never studied before so she shouldn't have to now.

Meanwhile, each day while this little girl drowsed through period after period of classes, many terrible things were happening. Verbs were being conjugated before her unseeing eyes.

Report Found In Files Only A Sample Of What Goes On

The following report was found in the file when it was straightened at the close of school this year. It is only a sample of what goes on in F. H. S.

A. O. Beck, son of Mr. and Mrs. A. O. Beck, has served the graduating class as president, has been leader in all senior class activities, and is the best all-around boy in the senior class.

There was a Young Lumberjack and his Young Bride. They lived in a tiny box cabin with two small brooks, in a place where neither beast Orman would disturb their haven.

So-o-o-o-o Eddie Wayne took the rest of the girls home right away, but (take careful notice you Conners fans) he and Dorothy Tye took their own good time.

MRS. OWEN

A Namely Story

This is to be a Love story, a tender story which takes place somewhere in the North Woods not so very long ago.

There was a Young Lumberjack and his Young Bride. They lived in a tiny box cabin with two small brooks, in a place where neither beast Orman would disturb their haven.

This stranger looked like a King and her heart wilted before his gaze even as a delicate flower withers in the Ray of the noonday sun.

Mr. Linder wishes to express his appreciation to the students for their cooperation during this school year.

Very wise advice was given by Dr. Hill concerning the future of the graduates. He gave several examples of student who had worked their way through college and were now holding important positions.

**Co. Editors Next Year**

Dorothy Tye and Evelyn Elliott will be co-editors for 1942-43. They have been associated with the Floydada schools all their lives and plan to graduate from here next year. They are conscientious, hard-working journalists and have a brilliant career ahead of them in this line. Dorothy plans to major in journalism when she goes to college. Evelyn plans to enter college also and hopes to be either an air hostess or a reporter for a large newspaper.

Florence Jones is a methodical, highly efficient person who is known all over the school for her friendly, sweet-tempered disposition. She ranks high in home economics, but she plans to enter upon a business career. Her starting-point will be Draughon's Business college in Lubbock. She came to F. H. S. from Lakeview her freshman year.

Cleo Kirk came from Center her freshman year. She is popular with all her school-mates and has a poise and dignity seldom found in a high school student. As for her future—well—it might be said that (censored) is indeed a lucky man. "Let's of happiness and success, Cleo."

Loretta McAda entered the journalism class the last half of this year. She has a poetic mind which she often uses for such as the senior poem which was printed in the senior edition. She has no definite plan for the future, but she would like to enter nurses' training.

Floy Jean Hale has been a student in Floydada schools all her life. She is a brilliant journalist and has one of the top-ranking grade averages of the year. Although she has a full-rounded social life, she found time to win state championship on a dress she made in home economics last year.

Ruby Poore has taken journalism only the last half of this year. She came to F. H. S. from Lakeview her freshman year and plans to graduate next year. She has no definite plans for the future.

And last, but certainly not least, comes R. T. Tyler, life-long resident of Floydada, and the only male element in the F. H. S. journalism department. R. T. has a remarkable sense for news and has been invaluable in hunting and finding news leads.

In closing, be it said that much credit and thanks is due to Oran Beck, La Perne Eubanks, Bryan Collins and the former Odene Hilly—who is now Mrs. Frank Breed—for their excellent work during the time they assisted in editing the paper. The journalism class as a whole expresses appreciation to each and every person who has helped them in any way this year.

## Home Economics Projects Open Next Monday

The Home Economics departments are planning to start the summer projects Monday morning.

Those planning to take summer projects are Neoma Burgett, Mildred Hicks, Mattie Pearl Patterson, Clara Neil Latham, Elizabeth Pierce, Jeanne Edwards, Ludean Ray, Edna Earl McNutt, Jean Wester, Nita Carter, Wanda Gene Dunavant, Inez Hinsel, Maurine Medlen, Arla Vee Bishop, Billie Louise Durham, Janelle Burke, Elizabeth Daniels, Lucille Thompson and Florine Hamn.

## EDITORIAL

What do the pictures that hang so serenely year after year in the halls of F. H. S. mean to you? Are they pictures to be stared at like bill boards announcing a big three ring circus or is there some special reason why you pause before them as you pass through the hall?

Perhaps they bring to your mind memories almost forgotten, memories that are not of the class as a whole, but of each. As teachers, you comment to one another about these pictures. Each face recalls to you some particular trait or characteristic of the student. Sometimes you wonder what this person is doing at the present time.

If one of those persons does something outstanding, both teachers and students rush to the hall to find his picture.

Many of the boys that graduated last year, the year before, and all the years before are now serving their country. So now more than ever, you pause before them and point with pride. Sometimes you gaze reverently into a face that has already met his death while in service.

Some of the things that have been in school for a long time are forgotten and never paid any attention to, but the pictures will always be new. Everyday a large part of the teachers and students will find time to look into the many faces.

As seniors, each of you will want to leave a clear record behind so that after you are gone and the teachers and students, some of them your beloved friends, look at your picture, their thoughts of you will be pleasant ones.

Joe Rushing gave that hayride. Imagine! Someone was still wanting to know Monday morning who they were supposed to be for the nice time.

We have just about cussed and discussed this hayride as much as we dare. If it wasn't the last of school, there might be a lot of perfectly nice students kicked out of dear old F. H. S. if we told more.

Leona Jones and Floyd Bradford can absolutely beat the world when it comes to passing sweet smiles in typing lab, the 3rd period. Too bad school is out, but then, maybe they can discuss their typing possibilities sometime during the summer. Or is it typing they are so interested in? Couldn't be!

Speaking of Floyd Bradford, he and Lella Williams have been keeping each other company every day during the 5th period study hall, and from the expressions on their faces it must be pretty nice company at that. Is it possible that Floyd is a two-timer? Could be?

Has anyone ever noticed just how much Oran Beck stays around the office during the sixth period? Wonder who keeps the office that period? Something is undoubtedly attracting his attention there, for typewriters can be found all over the building and not just in the office.

Wonder why Wayland didn't go with Helen the other night? Could it be possible that it was because she had a date with Roy Baxter? Jim Simpson and Mary Frances Jones make a cut pair don't they? Seems to me they have been seen together quite a lot here lately. Wonder what they have in common besides brains? Maybe it's getting serious though. Well, they have our best wishes!

Could Josephine be crowding Betty out of Toot's heart? We aren't sure but anyway we happen to know that Josephine let it be known that she wanted to march with Toots at the graduation exercises. However, if we know two-

### Saturday Straw Hat Day; Lay Away The Felt

Saturday is Straw hat day in Floydada. Marking the change of the seasons, when wintry and spring blasts give way to the more balmy days of the warm season, straw hats take the place of the old felt and John Citizen beds himself with a new lid.

The most reasonable spring in many years sees trees and shrubs putting on their gay spring array, and mankind is tempted to follow suit by donning a changed garb, drabness of the winter giving way to the brighter mood of the new season.

Accordingly, please remember to lay the felt aside, go to your favorite dealer Saturday and change over. You'll feel better for it, and probably be better for it. Later straws, especially the kind that come from Central and South America, are likely to be a bit difficult to obtain because of shipping needs of the armed forces and the food requirements of the country, now vying for the space in ships of the coastwise and Pan-American registry.

### From where I sit...

by Joe Marsh

RUMMAGING through my desk the other day, I came across some snapshots of friends of mine made back in 1933.

If you don't think time flies... if you don't think this world ever changes... you ought to look at the women's hats and dresses in those pictures taken 9 years ago! Wow!

It gave me quite a start... and then it set me to thinking... and rememberin'! Lots of things sure happened in 1933. A new administration in Washington... the turning point of the depression... and the coming of Repeal.

I remember the re-legalization of beer. It came before Repeal, when Congress amended the old Volstead Act to allow legal sale of "3.2" beer.

What talk and arguments they had in those days! One argument I remember well... was that beer would do a lot to help bring back prosperity. I wondered at the time whether that argument could be proved.

I thought about that again the other day. I decided to check up and find out.

Well, I found out plenty. I found out that legal beer has made more than 3 billion dollars in taxes since 1933. It has made more than a million new jobs.

According to one of the reports I've seen, beer has put more than 15 billion dollars into general business circulation. Goodness me, that's a lot of money.

Beer is sold today in every state in the Union. Every state benefits from beer's jobs and taxes. And I guess there's no denying that beer did do its share in bringing back better times.

I'm glad it did, too, because beer is such a pleasant, appetizing beverage. And it stands for moderation and moderate people... it's not likely to get you in trouble.

## Cotton Fabrics Come To Front; Days Get Warmer

National Cotton week, May 15 to 23, being observed in Floydada this week brings a keen sense of appreciation for the product. War conditions favor National Cotton week. Unusually varied assortments of merchandise beckoned from stores and shops as the days grow warmer. Everywhere the homemakers and general public is becoming cotton-conscious. The entire approaching season points to the importance of this fabric. Occasions of every need, work, play and dress-up all demand cotton. Cottons now enjoy a favorable place in the fashion world.

This product in everyday life of the American citizen plays an important role. It is used in many items other than clothing. For example in furniture, automobiles, tires, cooking paints and scores of other uses. Today the cotton industry is continually producing new uses for the product.

Dresses and suits of cotton offer a cool freshness that is easy to keep sturdy, bright colored and economical. Floydada merchants are displaying cottons this week that have appeal. Read their ads for many of the cotton things.

## Stretch Sugar In Canning Of Your Fruit

Canning more fruit with less sugar is a wartime problem for housewives this summer. Juice from well ripened fruit may be used in place of part or all of the sugar sirup.

In spite of sugar rationing the Government is encouraging the home canning of more fruit to improve family diets and health, and to help relieve the country's wartime transportation load. Home economists of the U. S. Department of Agriculture suggest ways to stretch sugar in canning.

Can more fruit and preserve less is the first rule. Canning fruit or juice requires less sugar than making jellies, jams, marmalades and preserves. Fruit or fruit juice may be canned successfully with little or no sweetening.

Canned fruit will keep safely if jars are packed with fruit and then filled with fruit juice instead of the usual sugar-sirup. Canned fruit may be sweetened later when served. The sweeter juicer fruits like sweet cherries and peaches are best for putting up in their own juice.

Fruit may also be canned with just enough sugar-sirup in each jar to give a slightly sweet flavor and the rest of the space filled with juice. Cook fruit in an open kettle to draw out the juice, and then pack hot and cover with hot juice.

Fruit juice may be bottled or put up in jars with little or no sugar. No extra sweetening is needed if the juices of sweet and tart fruits are mixed and bottled together. Fruit for juice is processed at simmering rather than boiling to hold the natural fresh fruit flavor and color.

Mild-flavored sirups like honey or corn sirup may also be used in canning fruit. Honey or corn sirup may be substituted for as much as half the sugar in canning, but a larger proportion of sirup will mask the delicate fruit flavor—as will a sirup with a distinctive flavor, such as maple, sorghum, or molasses.

Saccharine a coal tar product with a very sweet taste, cannot be used in canning because it becomes bitter when heated, but in diabetic

Pinch salt

Scald 1 1/2 cups milk in double boiler, then add the flour which has been thoroughly mixed with the honey and salt, and cook for 15 minutes. # Revised AAA Payments Reflect War Needs; Demand Wiser Use Of Land, Labor, Equipment

COLLEGE STATION, May 14.—Wiser use of land, labor and equipment in producing wartime food is the aim of recently announced parity and conservation payments to be made Texas farmers co-operating under this year's AAA program.

Payments also act as levers to assist farmers in continuing soil conservation practice and in converting from production of crops with big reserves to crops the country needs to increase quickly, Geo. Staughter, chairman, Texas AAA committee, announces.

A parity payment of 13.5 cents per bushel will be made to cooperating wheat growers, but no parity payments will be made to cotton and rice farmers because their 1941 returns, including conservation payments, is at or above the parity level.

New conservation rates of payment, which are paid producers for seeding special crops according to AAA regulations, also have been announced and replace rates originally designated. New cotton rate is \$1.20 per 100 pounds instead of \$1.25, while the wheat conservation rate of 10.5 cents per bushel has been reduced to 9.9 cents.

The payment rate on Commercial peanuts, which does not include peanuts for oil under the Food for Freedom program, has been reduced from \$1.45 per ton to \$1.25 per ton, and the rate on Irish potatoes has been changed from 2 cents per bushel to 1.8 cents per bushel. The 1942 rice payment will be 3.88 cents per bushel instead of 4.86 cents.

New payment schedules do not include changes in the soil-building allowance rates or soil-building practice payment rates under the 1942 conservation program, the AAA chairman said. Necessary changes in these rates will be made later when more adequate information becomes available concerning the extent of participation in this phase of the program.

Wheat Loan Program Announced COLLEGE STATION, May 14.—Basic loan rate for this year's wheat crop in Texas is \$1.34 per bushel but individual prices will vary according to locations.

The loan program, with rates based upon returns equivalent to 85 per cent of parity, became approved when wheat farmers approved marketing quotas in national referendum May 2. Unofficial vote indicates Texas wheat farmers approved quotas by approximately 89 per cent while national approval is expected to average about 82 per cent.

General provisions of the loan program are similar to those of the 1941 program, according to P. C. Colgin, state AAA commodity loan specialist.

Three Loan Programs Announced COLLEGE STATION, May 14.—Texas grain sorghum, rye and barley growers will have a loan program again this year.

Loan rate for farm-stored rye grading No. 2 or better will be 60 cents per bushel at all locations. Barley loan rates, on farm-stored basis, will be 55 cents per bushel for No. 1, 54 cents for No. 2, 52 cents for No. 3, 49 cents for No. 4 and 45 cents for No. 5. Rates on grain sorghum, on same type storage, will be 55, 53, 50, and 45 cents per bushel respectively. Mixed barley and grain sorghum rates will be 2 cents per bushel less.

If grain is stored in warehouses, storage must be paid in advance, otherwise a deduction of 7 cents per bushel will be made from the loan rate, P. C. Colgin, state AAA commodity loan specialist, announced.

# Health Officer Advises Typhoid Vaccination

Austin, Texas, If you have not been vaccinated against Typhoid fever within the last two or three years, Dr. George W. Cox, State Health Officer, advises you to go to your doctor or the nearest health officer and have him give you the three "shots" that will protect you against the disease.

"The three shots that will protect against Typhoid are given at intervals of one week apart," Dr. Cox stated. "As it takes some time for the protective treatment to be established throughout the system, it is wise to delay in having it done. My advice is, have it done now so that immunization may be complete before summer arrives."

This advice was addressed particularly to Boy Scouts, Girl Scouts, and other youngsters who are looking forward to spring and summer hikes and trips. It is, however, meant also for others, young or old, whose business or pleasure during the summer will take them to places where there may be doubt as to the purity or safety of the water supply or as to the care with which food is handled.

HOPE THAT THE FLAVORS MAY EQUAL THE SOUNDS Fashion predictions in sundaes, ice creams and sherbets, sound like a catalogue of new colors in women's clothes or cosmetics. Mellow ripe fruits, picked at perfect maturity, rushed to the processing plant for crushing, canning, and freezing, are finding popular favor under such tempting names as "Royal apricot," "Stanwick nectarine," "Toga nectarine," "Passion fruit," and "Klondike strawberry."

Laboratory research accounts for a wide variety of frozen crushed and pureed fruits from the West coast competing with old standby flavors for sundae toppings, ice cream, sherbets, and beverages, the U. S. Department of Agriculture reports. The appeal of these new frozen fruits lies in their natural fresh fruit flavor and color, preserved by picking the fruit at full ripe stage and handling it with speed from the field or orchard to the freezing plant.

The Western Regional Research Laboratory of the Department has studied the best varieties for freezing, the preferred methods of handling, and also popular taste. These investigators predict that some of the

THE PENNEY WAY IS THE THRIFTY WAY \* THE THRIFTY WAY IS THE AMERICAN WAY

# Sell Your Scrap Metal, Urges Uncle Sam--Supply Getting Low

Do you have any scrap metal around you place that ought to be on its way to the furnaces of America to make machine guns, tanks, howitzers and battle ships? It is possible that you do have and that you fully intended to get it in shape to sell weeks ago, but have just neglected to do so. Uncle Sam says that so many people with good intentions have put off getting their junk on the market that the scrap metal heaps at America's war furnaces is getting low and that these furnaces face the prospect of being shut down unless the junk metal gets to them with more speed. This is what he is saying to everybody that will listen--junk dealers, machinery dealers, farmers--anybody that has or might have some junk that ought to be getting out of the corners and into the production line.

## May 18-23 Junk Iron Week

A check-up by the Floyd County War board indicates that there are several hundred tons of scrap metal rusting in the fence corners, around buildings, in lots. In fact there is enough junk left right now in Floyd county to cover a section of land several feet deep. And it is actually believed that this is no exaggeration, at least a very slight one.

Although farmers and everybody else are busy and short-handed for junk is so urgent that next week--May 18-23--has been set aside as the week to get more junk iron to the market. The need is urgent. The price has been set and the dealers are paying the prices that will meet the demands of the government. Furthermore, if you will take the time to get your junk iron together and arrange it so that it can be handled quickly your junk dealer will send for it if you have no way of getting it to market. That is just how serious and how important the matter is. It requires days and days to re-heat a scrap metal furnace and get it back into production after it has once cooled off. The war and navy departments are calling for more and more materials all the time and the government does not want a single one of these furnaces to have to cool off because somebody had good intentions but did not get in there and do something about it. Here are some of the things that your junk metal can do:

Five hundred pounds of scrap metal is required in the building of a 2,000-pound aerial bomb;

A 50-caliber machine gun uses 50 pounds of scrap metal;

A 75-millimeter howitzer requires half a ton of scrap metal; and a 16-inch naval shell requires the same;

In the construction of a medium 27-ton tank the manufacturer uses 18 tons of scrap;

A three-inch anti-aircraft gun requires three tons of scrap metal, and to build a 35,000-ton battleship 9,000 tons of scrap is used.

**Save Your Farm Needs**  
This program does not call for you to sacrifice your angle irons, your steel shafting, your bearings and things like that that you need on your farm. You are not expected at this time to sacrifice these because your efficient operation of your farm is just as important as battleships. But all that scrap that you are not selling, because you don't want to take the time to dismantle a machine is needed and it is badly needed.

This is the message of your Uncle Sam. It is the message of your neighbor. It is the message of the boys in Australia, in Ireland and all the far-flung battlefronts in the fight for victory over tyranny.

## Nazarene Church Crusade For Youth To Start May 18

An "interdenominational crusade of youth" is scheduled to be held at the Presbyterian church beginning Monday night, May 18 and continuing through Friday, May 22. The meeting is being sponsored by the Church of the Nazarene with the district young people's leader, Rev. Hadley A. Hall, as leader. Services will start at 8:45 p. m.

The young people of the various churches of the city are requested to furnish special music and singing. Christians of all denominations are urged to attend and pray for the success of the campaign.

We are in an awful crisis and the greatest burden is resting on the shoulders of youth. Maturity and age are called upon to pay the bills and do the work, but Youth is called upon to do the fighting. They need spiritual equipment as well as material, to successfully win the conflict. Let's give them that while we have them with us. They will soon be gone from us.

Rev. Hall is well qualified to lead in this crusade. He was the youngest minister ever ordained by the Kentucky district of his church. He served for two years as the youngest elder on the Kentucky West Virginia district, three years as the youngest elder on the Washington-Philadelphia district and one term as the youngest elder serving as an evangelist in his denomination.

Remember that Sunday is Teacher's Appreciation day. Let's show our appreciation for our teachers by being on time with well-prepared lessons.

## First Baptist Church News

We are grateful for the splendid attendance upon the Mother's Day services at our church. Now that the school vacation is come we will have some changes in the personnel of our church. We regret the absence of many of our teachers during the summer but wish for them a profitable vacation period and will be looking for them back in the fall. Now that we are losing some we need to work all the harder to enlist those that remain. We hope to have the best summer that we have had.

Our Vacation Bible School starts Monday. Let every boy and girl be present for the parade Monday morning at 8:30. Sunday morning the pastor will preach on the following subject, "Enlisting The Unenlisted." Sunday night we will observe the Lord's Supper, please let every member be present.

## City Park Church

(J. G. Malphurs, Minister)

"Mother's Day" did us at the City Park church no good. Attendance by the members was away off from the average. We were glad to have visitors from other towns who, in part, made up for what we lost. The mother that stayed home to entertain her children, or to be entertained by them, did both herself and them and the church an injustice. (Mat. 10:37; Heb. 10:25)

At the 10:30 hour next Sunday the minister will bring an encouraging talk to the members. Others are invited to hear it. The sermon at the evening hour will be unusual, for it will be the funeral sermon for John Blank. Many years ago the funeral was often preached a long time after the man had been buried. In these old time funerals the preacher was supposed to tell the truth as best he understood the life of the deceased, and, according to the Bible, was to say whether or not departed was saved or lost. You are invited to hear this sermon.

We need some victory prayer meetings. Our nation can not dance itself into victory over our enemies. The victory will come quicker if we will humble ourselves before God in prayer, like Joshua when he pled for victory over the enemies of Israel. (Joshua 7:6-12) Let all who want victory attend prayer meeting on Wednesday night.

## WHAT WE ARE IN WAR FOR

If you wonder why it comes about that America and Japan and Germany and Italy have clashed in war—if you're looking for a short way to tell, take the Bill of Rights from the Constitution as your guide. In these brief words are the difference between freedom and slavery. The Bill of Rights is a brief of what we are fighting for and point the way to what we intend to have when the war is over:

1. Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.
2. A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed.
3. No Soldier shall, in time of peace, be quartered in any house, without the consent of the Owner, nor in time of war, but in a manner to be prescribed by law.
4. The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the person or things to be seized.
5. No person shall be held to answer for a capital or otherwise infamous crime, unless on a presentment or indictment of a Grand Jury, except in cases arising in the land or naval forces, or in the Militia, when in actual service in time of War or public danger; nor shall any person be subject for the same offense to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation.
6. In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the state and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witness against him; to have compulsory process for obtaining witnesses in his favor, and to have the Assistance of Counsel for defense.
7. In Suits at common law, when the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury, shall be otherwise re-examined in any Court of the United States, than according to the rules of the common law.
8. Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishment inflicted.
9. The enumeration in the Constitution, of certain rights, shall not be construed to deny or disparage others retained by the people.
10. The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States, respectively, or to the people.

The war is bringing about a number of unpredictable things. For instance, it is now being found that the paper situation is not so bad as it was originally thought, except in one particular. This particular is the need of the war makers for pulp to make explosives with, and thus put the army and

navy into competition with paper makers for pulp. But the paper that we print on and the kind the government uses for its records, is not the kind that is made from waste papers the different agencies are picking up and selling. Waste paper goes into box and package making. And there the shortage is. So far as getting paper to advertise with, such as book paper, there isn't any shortage. In fact, the way things have turned around paper makers and distributors would like to find an outlet for their product. When the automobile and refrigerator, radio and bathtub makers went "out of business" they and other manufacturers similarly situated, left the paper makers and a lot of big volume printers out on a limb. The printers, seeing the handwriting on the wall, offered their plants on the market at what they would bring and the paper makers are marking time until some other customer is found or until the government finds a need for what they make. Big as the demand of the government is for paper, it requires only a small percent of the potential volume of the paper mills. As we understand it, that is about the situation as outlined by the management of the paper mills themselves.

Speaking of shortages, about the biggest shortage is going to develop in wool along about the beginning of next year. Two or three times this nation's domestic production of wool is going to be necessary for military needs. Private need is just going to have to wait for another and better day. We've got to give all we can to the army and navy, of course. Which means for you and me, collect all winter clothing, blankets and accessories of wool, clean them good and protect them against moths against next winter. If you allow moths to ruin woollens this summer very likely you can't replace them next winter at any price.

Enthusiasm for the price control measures being taken now by OPA is going to grow, it is freely predicted. While the program is calling for much work and study on the part of your retail dealers this week, the pinch of the price ceilings will not be as severe as it was thought and, many believe, the adjustment will leave the average dealer in much better position to meet competition. The average dealer has only enough money in his business to finance it under average conditions. The dealer with unlimited funds, on the other hand, goes into market, buys too much and hoards against price rises which the average fellow must take as he gets to them. Meanwhile the public is protected against the vicious circle, too. There is nothing to make the dealer sell at the "ceiling," he merely operates under the "ceiling." If it works out as beautifully as the theory has it everybody is going to be happy in this part of the world, except the cattle, sheep and hog men who bought to sell at a higher price. The price on these items is not likely to keep on jumping because the packer will have a "ceiling" and he is not going to bid on something at a price that won't show him a little margin, based on March operations.

The following correction appeared in a newspaper: "We stated last week that Mr. John Doe was a 'defective' in the police force. This was a typographical error. Mr. Doe is really a detective in the police force."—Santa Fe Magazine.

Query: Is it better to stay up half the night waiting for the boy friend to go home, or to marry him and stay up half the night waiting from him to come to it?

## As A Farm Woman Thinks

By Nellie Witt Spikes

AS A FARM WOMAN  
Mothers are going back to ordinary duties this Monday morning after having much honor and boundless love shown to them by their families on Mother's Day.

Some will wear a new dress, spread a lovely bedspread on their beds, tie fancy aprons around their waists, or pin a sparkling brooch on a new dress, but the thing they will remember longest is the tight hugs of strong arms, the loving kiss, the read and re-read letter or beautiful card. My three children with their children were with me for the first time on this date in many years.

Vince Jones, the father of Mrs. Henry Barber of Floydada and my mother's own beloved cousin, was a good man. His passing makes us sad. But when we reach the better land, he will be there with the same sweet warm welcome he gave to visitors in his earthly home. Kind and just, upright and true, he lived his days in a home near Weatherford, making friends and rearing a family which America is proud to own. I can see him setting out young switches which would bear luscious fruit, planting black seed which would turn into melting melons, milking cows for sweet milk and yellow butter, sitting at the head of his well supplied table, his sweet wife, Laura, at the other end, thanking God for the meal and his family. Going to the church he loved, sitting in his arm chair reading the Weatherford paper and the Bible. A good man, leaving footsteps so clear that others coming after can follow and not miss the way. I loved him when I was a child and he and his wife newly married, keeping me for a night, petting me and making

## Poet's Corner

(Edited by Mary D. Waters, Wolfforth, Texas)

### Semper

Always good,  
Always just  
God is one  
Man can trust.

Always Love,  
Always sure,  
God is one  
Hold, secure.  
—Lillie Litrell Looney.

This poem was published in Fletcher Davis' paper, March 1937, Hondo, Texas.

### Faith

The storms of life shall not prevail  
Nor panic fears, obscure my goal.  
My Saviour guides and sets the sail  
His love, the bulwark of my soul.  
Then confident, I can afford  
To go where'er he leadeth me;  
With His great plan, in sweet accord  
One step ahead enough to see.

—Jessica Morehead Young.

### Eternal Spring

The trembling Earth is sick today,  
Sits a-souring her tender breast,  
But around her feet violets bloom,  
And in her hair the birds will nest.  
Her arms are holding vanished dreams,  
Her hands are lame and wan,  
But on her brow is a crown of buds,  
And in her throat a sweet spring song.  
Her back is bent with burdens of War,  
Her face all furrowed with grief and pain,  
But in her eyes is a merry smile,  
For in her heart is Eternal Spring!

—Gerturde Friend Scoggins.

much over me. I loved him when I was a grown woman, feeling his love for all members of his Jones connections, and enjoying again staying with my husband and mother an unforgettable night in his home.

Sweet fragrant waxy-white blossoms of the locust tree, swaying in the light of a clear moonlighted night, a mocking bird pouring out his thanks of the world; a couple of little boys, softly stirring in their beds, a golden-haired little girl whispering to grandmother; the pyracantha white with misty bloom. These are defense stamps to paste in our soul-books, in time growing into bonds the enemy of all peace and freedom cannot break or destroy.

Won't the little black ants be surprised this summer when they hunt up the sugar bowl, or rather the sugarless bowl? How much sugar they have carried off grain by grain in summers past before one found the long black line, coming and going, coming and going!

A high-up specialist in foods says that turnips supply as much Ascorbic Acid (Vitamin C) as strawberries and advises folks to be economical and buy turnips instead of strawberries. Well maybe so, just chew a way on your dish of turnips happy that you are getting vitamin C.

Did you ever write a Maybe? Maybe I love you and maybe I won't. Maybe I will marry you and maybe I won't. So on a page or so full. They were very nice to write and to read when you were supposed to be studying your lessons. How your heart would beat as you tried to guess which boy wrote our Maybe. I remember my cousin, Hardy started his this way! Mebbe I love you. He thought it was one word.

Last week when I was reviving a scene of the past, I stated that the Jones family started west on my fourth birthday, May 4, 1888. Well, that was the year I was born and the family migration was May 4, 1892. So much for that.

I have been remembered with two announcement cards from the Floydada High. Misses La Fern Eubanks and Helen Day. I feel complimented that they thought of me (and hope I can attend the exercises.

Such a happy, bustling, important time to young people, graduation time. The pretty new dresses, the stately long gowns and caps, the mementoes and mysterious packages. Flowers and parties and sermons. These things are evidences of the freedom young folks have in America. May all you young graduates look as lovely and as manly as you can on this blessed graduation time. May the things you have learned, the associates you have learned to value and love, all the good and the true that has been thrown in your path, follow you all the days of your lives, is the wish of a Farm Woman, boys and girls of all the graduating classes in this land of the Brave and the Home of the Free.

Below are some lines written by youth that is very appropriate for this time.

How beautiful is youth! How bright it gleams  
With its illusions, aspirations, dreams!  
Book of Beginnings, Story without end!  
Each maid a heroine, and each man a friend;

All possibilities are in his hands,  
No danger daunts it, and no foe withstands;  
In its sublime auracity of faith,  
"Be thou removed!" it to the mountain saith,  
And with ambitious feet, secure and proud,  
Ascends the ladder leaning on the cloud!

— Longfellow

There is nothing can equal the tender hours  
When life is first in bloom,  
When the heart like a bee in a wild of flowers,  
Finds everywhere perfume;  
When the present is all and it questions not  
If these flowers shall pass away  
But pleased with its own delightful lot  
Dreams never of decay

### Sewing Room Will Be Opened Monday For Red Cross Work

Mrs. O. M. Conway, Red Cross Production Chairman of Floyd county, announced this week that the W. P. A. sewing room on the third floor of the court house would be opened Monday for the use of workers who would do Red Cross sewing.

"This room is being made available in order to get all of the sewing now on hand out of the way before the canning season begins," Mrs. Conway said. "And it has been announced that we will not have any more until August."

Mrs. J. B. Jenkins is relieving Mrs. S. W. Ross as sewing supervisor for an indefinite time and she will be present each day or she will appoint someone to take her place.

Mrs. Conway said it was believed that a number of the clubs would come and bring their lunch and spend the day sewing for the Red Cross. There are at present 500 two-piece skirts for eight year old

girls to be made, also some work for experienced knitters.

### Weather and Crops

Some are planting, some are not. That's the story as to Floyd county cotton farm operators this week.

To those who are not, putting high-priced seed into cold ground looks like too long a risk. To those who are, the argument is that there

is a season in the ground that won't be there long and its time to plant.

Mr. Grasshopper continues much in evidence. Many farmers are alarmed and are throwing out poison bait, but their efforts have been nullified somewhat by coolish weather. Grasshoppers actually are eating crops and grass now in many areas of the county. Those who are not poisoning have two or three thoughts in mind—their cattle and the possibility of poisoning them, the fact that a hard rain might come, drown the hoppers and save the trouble and expense, and the possibility that the hoppers might take wing when they reach maturity. County Agent Gordon and many farm committeemen are making strenuous efforts to get

County Agent Gordon and many farm committeemen are making strenuous efforts to get

a county-wide program of extermination now while the problem is much simpler than it might be later.

**Wheat A Mixed Story**  
 Some mighty good wheat in the county is heading out and a few fields are making grain. Other fields are too young and need rain. A considerable late-planted acreage will not be cut, farmers say. Apparently it was damaged by green-bugs and will not rally until too late in the season. Most barley is declared not to be good. Many wells are running on wheat in the irrigated belt. The first crop of alfalfa is practically ready to cut.

Finest early spring range in many years is in evidence and cattle are doing fine, with good calf crops and little disease affecting the animals.

### Apportionment From State School Fund

Three dollars per capita for rural schools from the state school fund received and distributed this week by County Superintendent Clarence Guffee, leaves only \$3.50 for the scholastic year still due from the state of \$22.50 set at the beginning of the year.

Additional good financial news for the schools comes from the superintendent's office in the announcement that the final payment on state rural aid fund also has been received in the amount of \$853 for the year 1941-42.

Mrs. Paul Looney is reported ill with strep throat infection Tuesday.

### No Old Papers For Awhile Now; Warehouse Full

If you've been holding old papers and magazines for the Boy Scouts or some other agency to pick up, no need for awhile until further notice. Scoutmaster John N.
