

Lakeview FM Road, Lockney Loop Get Approval Of State

Roaring Springs Road Also Gets Engineer's Nod

Important additions to the farm to market road system in Floyd County, including a new road to Lakeview, was pledged by District Engineer O. L. Crain, of the State Highway Department Friday afternoon of last week, following a conference with members of the Floyd County Commissioners Court in his office.

Returning home late the same day Judge J. D. McBrien said the additional mileage also included five blocks on East 12th Street in Floydada, which will be incorporated into the system, connecting at East Missouri Street on 12th with State Highway 207, making a total of approximately 16.8 miles.

Also the highway department will take over the loop in East Lockney that connects Highway 70 and Farm to Market Road No. 598 to Lone Star likewise will extend State 135 through Lockney from the east along Locust Street, seaward to a connection with Highway 70 about 1.3 miles west of the city to make a connecting loop for city and east-bound traffic.

The whole addition to the state maintained roadway will be about 13 miles.

Taking over the approximately six blocks on Twelfth Street in east Floydada from Missouri Street to the Highway 70 junction at East Crockett Street will relieve a situation for the City of Floydada on which the council asked the Commissioners Court for help several weeks ago. Increase of traffic on this street has made upkeep a difficult matter for the city.

The new pavement from Floydada to Lakeview has been sought for many years, first as a part of a principal highway from Floydada to Crosbyton and that failing, later as a farm to market project.

The road will extend south, according to plans agreed upon by the Commissioners and the highway engineer's office, from the southeast corner of Floydada townsite to the northwest corner of the Joe Dunn farm, thence east to the C. N. Bailey northwest corner, thence south to the B. L. Bred southwest corner, thence east again along section lines to tie in with Highway 651 one mile north of Lakeview School.

It is quite likely the Highway Department may do some preliminary work on the three new projects, but it will depend upon circumstances whether the work is completed in the year of 1959, Judge McBrien was told. The new construction is part of a two-year program and may not be completed until 1960.

On the road northwest of Aiken, which is being urged also by the Commissioners Court there was not complete agreement in the session Friday with the highway engineer. Right-of-way problems that originate in Hale County are indicated as holding up the final agreement there.

The county also has had dropped in its lap a most important mile and a half of new road south of Dougherty that will tie in with the new pavement being built westward from Roaring Springs. It will give a direct all-weather route to and from the south Motley County city, the new oil field and the Roaring Springs picnic and swimming resort.

O. L. Crain district engineer, told County Judge McBrien the new mile and a half will be a "present" to the county, that it will not be charged to the county's grants.

The additional mile and a half is in the two-year program, with the probability it will be built next year, since the Motley County end of the project is already in the "mill".

Climax to Woes of Hospital Is Near; Board Hopes for Way Out

Menard Field, a member of the Board of Directors of the financially ill Peoples Hospital, Saturday afternoon told a gathering of stockholders and local people that the board has been making an effort to find a way out for the hospital, and have had some encouragement.

Promise from a Dallas source that an investigator will be sent out to check on the hospital's assets has been received, Field said.

Field pointed out that the hospital has been bettering its financial position in the past two and a half years. Twenty-seven hundred dollars in old debts have been retired and a \$4,300 claim for withholding taxes not paid the federal treasury in the years 1951, 1952 and 1953, together with penalty and interest, has been retired at the rate of \$25 per month. Of this debt to the treasury only \$800 remains to be paid.

The hospital has been operating on a cash basis for the past two and a half years, he pointed out, and additionally the hospital's overall assets have improved by \$10,000 from the Ford Foundation, spent for betterments in clinic and hospital and on improved patient's rooms.

The meeting was called especially to consider the situation which developed following a suit filed in district court to foreclose an old mortgage debt of \$11,250 held by National Farmers Union Property & Casualty Company, which is set down to be heard in district court on Sept. 8, the suit was filed in January.

F. C. Harmon, chairman of the board of directors, who presided at the Saturday afternoon meeting, said that in addition to the first lien held by the mortgage company there are about \$10,000 due on second liens, with all outstanding indebtedness now at a figure of about \$40,000. This includes about \$4,000 state, county and city taxes, which have been levied in past years.

Directors maintain that the hospital was organized and has been operating as a non-profit concern for all these years and the taxes should not have been levied. An effort is being made to get these assessments cancelled.

"The hospital is in much better position than it was five years ago," said Mr. Harmon, "except for the fact that its debts are older."

The Saturday afternoon meeting was held in the district court room.

The hospital authorities have not employed a lawyer, Mr. Harmon said, pointing out that the debt being sued upon is acknowledged by the board.

Cancer Figures Are Given For Floyd County

(Special to The Hesperian)
NEW YORK — How serious a problem is lung cancer in Floyd County? How many local residents die annually because of it? How does the local rate compare with that in other sections?

New facts and figures, throwing some light on the subject, have just been issued by the U. S. Public Health Service. The report comes closely on the heels of the agency's announcement that a study of 200,000 veterans indicates that the death rate for smokers is 32 percent higher than for non-smokers.

Among residents of Floyd County, according to the new vital statistics breakdown, the number of deaths from cancer and other malignant growths came to 19 in the year ending January, 1957.

Of this total, the number attributed to lung cancer was only 1, or 5.3 percent.

Throughout the country, 13.9 percent of all cancer mortality was due to lung cancer. In the State of Texas the ratio was 13.8 percent.

Once again, a controversy rages over the reported link between cigarette smoking and cancer.

The PHS declares the study adds further to the growing weight of evidence that there is a high degree of statistical association between lung cancer and heavy prolonged cigarette smoking.

It adds, however, "It is obvious that heavy smoking is not the sole cause. Lung cancer also occurs among those who do not smoke." The cigarette industry vehemently challenges such findings. It takes the position that there is no conclusive evidence of a clinical nature to support the claim that smoking is a health menace.

In Floyd County, the PHS report shows, the number of deaths due to cancer in all its forms was higher, in proportion to population, than in most parts of the United States during the year.

The rate, among local residents, was 176 such deaths per 100,000 population, as compared with 147 per 100,000 for the nation.

It was higher also, than the State of Texas rate, 111 per 100,000.

Couple Exchange Marriage Vows In Ceremony at Olton

Marriage vows were exchanged Friday evening at 7:30 o'clock by Miss Bettie Lois Daniel of Olton and Ronald Perry Curtis of Lubbock in the Olton Methodist Church with the bride's uncle, Rev. N. S. Daniel of Phillips, performing the double-ring ceremony.

The bride is the daughter of Mr. and Mrs. R. R. Daniel Sr. of Olton, and is the granddaughter of Mrs. S. S. Daniel of Floydada and the late Judge S. S. Daniel and A. C. Bledsoe of Phillips. The bridegroom's parents are Mr. and Mrs. W. H. Curtis of Dimmitt.

An arch of green foliage, baskets of white gladioli and white candles in candelabra featured the altar decorations for the ceremony. The bride's cousin, Mrs. J. E. Walker of Floydada, played nuptial music and accompanied the soloist, Miss DeVerly Daughter of Olton.

Linda Ray of Olton and Kent Clark of Floydada, cousins, were candle lighters. Ushers were Joe Ben Mitchell, Dimmitt, John Barbee, Lubbock, Jack O'Breath, Dimmitt, and Lewis Crowder of Lubbock.

Jimmy Curtis, Dimmitt, served the bride groom as best man. Ring bearers were Spookie Daniel, Clovis, N. Mex., and Vickie Ray, Olton. The bride's honor attendant was her sister, Mrs. Richard Snell of Albuquerque, N. Mex., and her bridesmaid was her sister-in-law, Mrs. Rainford, Daniel Jr., of Clovis.

They wore dresses of powder blue polished cotton styled with bouffant skirts and fitted bodices. Narrow headbands held their brief white veils and they carried cascade bouquets of blue carnations.

Given in marriage by her father the bride wore a floor length gown of white lace and tulle over taffeta. The fitted bodice was styled with a boat neckline accented with seed pearl embroidery, and long fitted sleeves. A wide panel of lace extended to the hemline of the flowing tulle and taffeta skirt. Her veil was caught to a small crown of seed pearls. She carried a Rainbow Bible topped with a bouquet centered with a white orchid.

A reception followed the wedding in the church parlor. Assisting the couple in the receiving line were their parents and the honor attendants.

After a trip to New Mexico the couple will be at home in Lubbock where Curtis is with the Bill Barnett Real Estate Agency.

Mrs. Curtis was graduated from Olton High School and attended West Texas State College. Her husband is a graduate of Danahill High School and has done college work at West Texas State and Texas Tech.

Attending the wedding from Floydada were the bride's grandmother, Mrs. S. S. Daniel, her aunt and uncle, Mr. and Mrs. L. L. Clark Jr. and son Kent, and Mr. and Mrs. J. E. Walker, cousins of the bride.

Backyard Party Given Neighbors

A neighborhood barbeque was given Thursday night in the backyard of the John B. Stapleton home. Barbequed steaks and all the trimmings were served to six families.

Those attending were the host and hostess, Mr. and Mrs. John Stapleton and their children, Mr. and Mrs. T. L. Holland and family, Mr. and Mrs. L. D. Simpson and family, Mr. and Mrs. Floyd Lawson and family, Mr. and Mrs. Bill Tye and family and Mr. and Mrs. M. J. McNeill and daughter.

Most interesting hobby we've heard of lately is a kind of 'once upon-a-time' club. Several hundred women, scattered over the nation, belong to the National Story League. Its object is to encourage the creation and appreciation of the good and beautiful in life and literature through the art of storytelling.

We sat by a member at dinner recently. She was an attractive middle-aged woman with the look of a person who enjoys life.

"We don't do it for money, just for the pleasure we can bring to others with our stories," she explained. "We go into hospitals, libraries, homes for children, the blind, and others who are lonely."

She was the editor of Story Art magazine, a small bi-monthly that prints original stories, shows volunteer story-tellers how to make a "tellable" story from a real-life incident, reports on the activities of the 126 leagues in the United States, and gives other helpful information. She sent us some copies and we read with interest of this movement, now 55 years old.

What a wonderful way to spend leisure time! Nothing to buy, nothing to sell -- not even anything to hold in one's hand, or put upon a shelf. But its rewards are real -- the grateful look in an invalid's eyes, the earnest attention of a restless boy, the wide-eyed wonder of a little girl whose imagination is stirred by a picture woven from words. Add to that the very special gift to a push-button world: the joy to be found in old-fashioned, heart-warming tales.

In these dollar-minded days, it's refreshing to learn about a non-profit hobby, shared by unselfish women, which develops their own talents for the good of mankind.

As A Farm Woman Thinks

(Nellie Witt Spikes)
Like a house that has vanished, so is wisdom to a fool; and the knowledge of the ignorant is unexamined talk.

To a senseless man education is fetters on his feet, and like manacles on his right hand.

A fool raises his voice when he laughs, but a clever man smiles quietly. To a sensible man education is like a golden ornament, and like a bracelet on the right arm.

Sirach 21, 18, 19, 20, 21.
—From the Apocrypha.
So the wise man of old taught that education is a good thing.

And the schools of this mighty nation think and teach the same thing. One of the finest writings I have read lately came from the Kaufman Herald written by Jack Callan.

"Maybe it was just a house . . . but it was filled with memories -- sweet ones too -- for the Marion Fox family.

"Fire the other day burned the Marion Fox old homestead to the ground. Built fifty-six years ago his rafters were of native black walnut. Most of the material that went into the structure once grew as trees in the very vicinity.

"There was a sawmill nearby, where the timber was cut to specifications. Neighbors worked on the house during the season when their crops did not require their daily attention. According to Mr. Fox, Jim Moore, was the carpenter. His wages were \$1.50 per day -- which he took in fresh meat at 5 cents a pound. Other workers received 75 cents a day and were paid in corn at 50 cents per bushel. Mr. Fox traded a cow to the sawmill to cut the timber. The house contained four large rooms on the first floor and one room 14x32, upstairs.

"The ashes rest gently -- except when strong winds whip some of them away -- on land first settled by Mr. Fox's grandfather -- Joseph Fox -- in 1851.

"Houses, like people, come into this world . . . and one day leave it. Once they are lived in they become animals -- miraculously endowed with life. Tiny handprints are on the wall -- the bedroom where

The Santa Rosa

After the wave of American-flag passenger ships placed in service early in 1957, there was a lull of almost a year. This was necessitated by the time required to construct large and complicated liners from the keel up, as distinguished from conversion of existing ships.

First delivery of an American ocean passenger vessel from entirely new construction in six years was that of the Grace Line's *Santa Rosa*, pictured above arriving in Upper New York Bay June 16, 1958, from Newport News, where she was built. Her other "firsts" include the following: first new American-flag passenger vessel built for the inter-American trade since the early 1930's, first all-steel ship completed under the American Merchant Marine's \$2,000,000,000-plus fleet-replacement program.

The *Santa Rosa*, which replaces a famous ship of the same name, sailed from New York on her maiden voyage to Florida, West Indies, and South American ports June 26, 1958.

Tim was born . . . the Christmas tree that still sparkles and glitters in a familiar corner -- the strange eyes can no longer see it . . . Grandmother washing the dishes as she sits in her wheel chair . . . Mother busy preparing the family meal . . . the preacher on Sunday getting your favorite piece of chicken . . . the day you caught Betty kissing her beau . . . they are all there . . . alive and vibrant in every house that has been a home.

"Only skeptics deny that houses don't live . . . and have souls -- even as you and me."

Thanks a million, Mr. Callan for your wonderful piece. Grandfather Joseph Fox was the grandfather of Mr. Spikes and Marion is a cousin.

The sidewalks of Falls have been hot, the days not tempered with cooling winds, the cares of life have been many, but Tom L. Davis went on meeting his many friends and loving and enjoying the many members of his fine family.

Today we know that the streets he will walk are of pure gold, the cares, aches and pains all gone. We know that many friends and kin welcome him there, but in a few short minutes the distance from Falls to Heaven was bridged by the passing of Tom L. Davis and the ones left behind grieve and are sad.

Does Jesus care when I've said good-by
To the dearest on earth to me,
When my sad heart aches, till it nearly breaks,
Is it aught to Him? Does He see?
Oh yes, He cares.

I know He cares,
His heart is touched with grief;
Though the days be weary,
The long night dreary,
I know my Saviour cares.

Although the hall came down like glittering balls and shredded the fine crop at the Gillon place, there was a shower that followed a few days later that brought joy and solace to the family. The shower did not come from the skies but was brought by scores of friends of the families of Walter Ellis Gillon and Mary Fridy, Silver, linen, kitchen equipment, bedroom supplies . . . pottery from sunny Italy, gold rimmed china, crystal as glittering as the hail of ice, but fortunately the kind that made one happy . . . pictures and a TV set; how the shower came in such wonderful abundance . . . every gift a good wish and prayer for the happiness of two young people soon to be made as one in the Holy Bonds of Matrimony. Bless you both and every one that have added to your pleasure.

According to the U. S. Bureau of Advertising, ADVERTISING ranks first with women, over all other newspaper content, for interest and readership! Women actually read ads in preference to anything else in the newspaper. (For that matter, ads rank third with men for readership!) And reading the newspaper is a favorite habit with American women.

So, if you have a product to sell--display it in an ad in your local newspaper. If it's for the home, write it to the housewife's point of view. For, more than anyone else, she'll read it. And, more than anyone else, she's the one who does the buying for the family!

Conservation Plan of ASC Is Explained

In the meeting called by the ASC Committee last Thursday night at the District Court Room Floyd County farmers were given information on the new long range program for soil conservation.

Thos. J. Hutchins, office manager of Floyd County ASC, went over the 5 and 10-year plans for conservation reserve contracts for the farm operators present, representing most all portions of the county.

The average rate for payment in Floyd County will be about \$13, with the rate of payment based on the individual farm, Hutchins said.

Farmers have until Sept. 26 to file a request with their county Agricultural Stabilization and Conservation Committee for a maximum rate for their farm under the 1959 conservation reserve phase of the Soil Bank program.

Then, after the maximum farm rate is determined, farmers have until Oct. 17, 1958, to apply for a conservation reserve contract.

The ASC Committee emphasizes that under present legislation, there will be no acreage reserve program in 1959.

Respose Lags On Delinquent Tax Payments

City of Floydada has no intention of working undue hardship on any delinquent taxpayer but does have intention of pressing the demand for payment of back taxes even to the point of bringing suit.

This is the burden of a warning statement issued this week at the city hall on direction of the city council. The council has recently completed a delinquent tax list and has inaugurated a tax collection campaign.

The council will make most any kind of a definite agreement for those who want to pay up but do not have the ready money and would like to meet their just part of city government expenses by making installment payments. Justice to those citizens who do pay their taxes promptly demands the city to use every means at hand to make collections, however. City tax attorney will be instructed to proceed with law suits in instances where no effort is made by the property owners to pay off.

SURVIVAL STOCKPILE ODCM Has Vast Supplies In 'Bank' If U. S. Is Hit

One of the nation's largest "bank accounts" against the possibility of enemy attack is the Office of Defense and Civilian Mobilization's stockpile of strategic materials. Stored away in 43 ODCM warehouses across the United States are about \$225,000,000 worth of medical and engineering supplies - enough to aid millions of Americans after an attack.

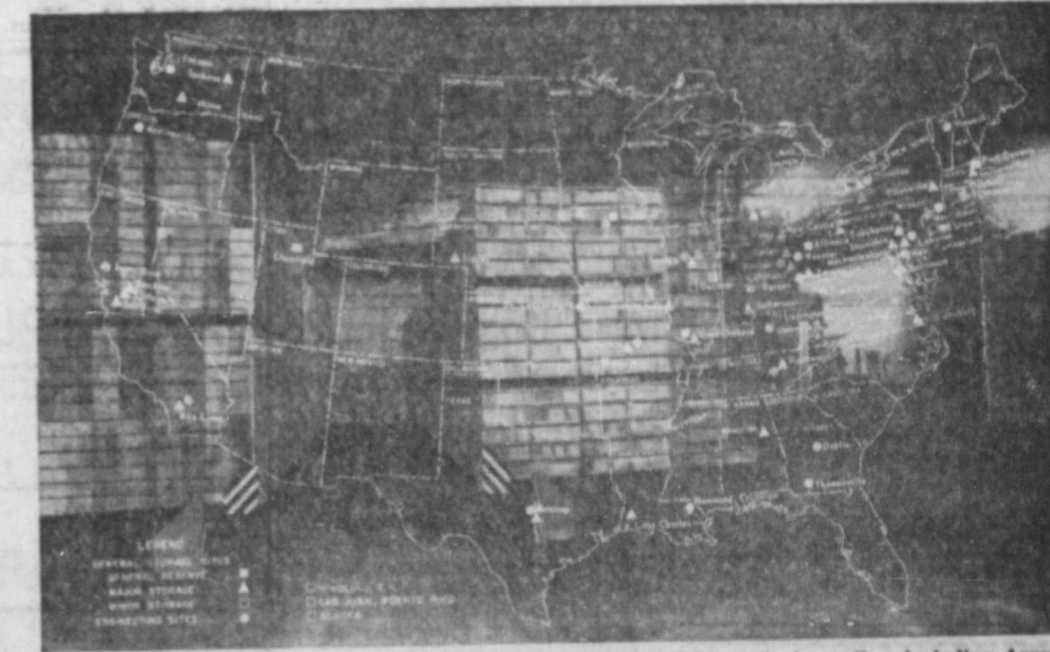

MEDICAL STOCKPILES include 1,932 civil defense emergency hospital units and back-up supplies estimated sufficient for the emergency medical care of 4 1/2 million persons for three weeks.

In the engineering stockpiles are approximately 25,000 tons of equipment and supplies. They contain material essential to restoration of public facilities - water pumps, generators, purifiers, storage tanks, pipe and similar items.

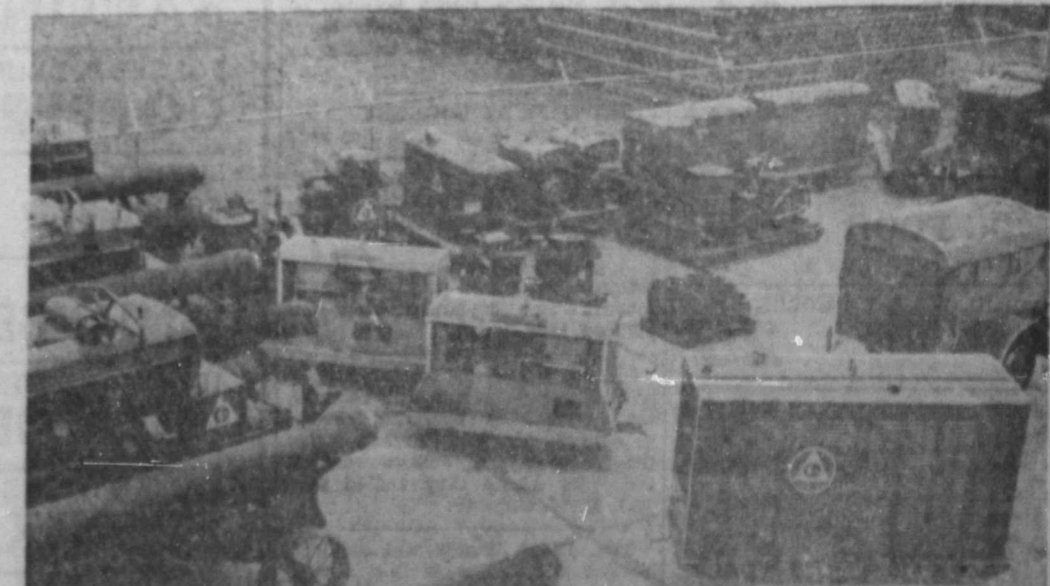

To assure that this survival "hardware" will be located where it would be most needed after an attack, ODCM has chosen warehouse sites convenient to but outside the nation's 92 critical targets.

Among these storage sites are three "general reserve" warehouses with stockpiles designed to supply any section of the country. Most unusual of these reserve storage areas is the vast underground warehouse in a converted limestone mine near Neosho, Mo.

IN THIS HUGE privately-owned cave, shared by ODCM with the stockpiles of industrial concerns, is 14 acres of space served by special automatic sprinkling and ventilating equipment.

THIS IS A VIEW of a civil defense portion of the 14-acre underground storage facility in a converted limestone mine near Neosho, Mo. It has built-in automatic sprinklers and special ventilating equipment. The Office of Defense and Civilian Mobilization has stockpiled here for use after attack about 2,500 tons of supplies, including Army hospital cots, stretchers, and supplies and equipment for 200 complete civil defense emergency hospitals of 200 beds each. Superimposed in white is a map of ODCM storage sites across the nation at strategic locations. (ODCM Photo)

TYPICAL UNIT of civil defense stockpiled engineering equipment showing the pumps, generators, water purifiers, and some of the miles of flexible-coupled pipe which could be used after an attack to provide a stricken community with pure water. Some of this "hardware," grouped is "Ten-Mile Units" to service ten miles of pipe each, already has been used in natural disasters to pump out flooded areas, and to bring in and purify water for towns with dry reservoirs. DEEP WITHIN a mountain in southwestern Missouri, freight cars await unloading of civil defense equipment to be stockpiled there for use in case of enemy attack. The siding, extending 600 feet into the mountain, can accommodate 16 railroad cars simultaneously. The Office of Defense and Civilian Mobilization facility, part of a limestone mine, contains a vast array of medical supplies and "hardware" to be used in recovery operations in the event of an attack on the United States. Soil Unit Maps Ramsey School Water Shed

It was announced this week by A. W. Dalrymple, work unit conservationist of the Soil Conservation Service, in the Floyd County Conservation District, with offices in the Agricultural Building in Floydada, that there will be a meeting on Thursday night, August 28, at 8:00 p. m., in the courthouse, to discuss the results of an Engineering Survey recently completed by the Soil Conservation Service in the Old Ramsey School Watershed, located six miles north of Floydada.

Dalrymple states that this is a very important meeting in that a decision is needed at this time on whether or not to proceed any further with work in the watershed. Facts and figures will be presented at the meeting with reference to conservation practices needed and the approximate cost to the Federal Government and to the individual land-owners to carry out this important conservation work. The completion of this survey brings to a close the work the Service can do unless the land-owners in the area decide to cooperate by installing the conservation practices found necessary by technicians of the Soil Conservation Service as needed to completely treat all the land in the watershed, according to Dalrymple.

This project has the strong support of County Judge J. D. McBrien and Precinct Commissioner Hugh Counts. County roads in this area have been very difficult to maintain in the past due to the large amount of un-controlled water that hits them after heavy rains.

There will be five road crossings in the project which will be constructed and financed by the County.

The remainder of the expense of construction of structures in the project will be borne by the individual land-owners and the Federal Government, under the Great Plains Conservation Program.

The practices called for in the project would draw 70-80 percent payment from the Government under this program.

Dalrymple stated that when completed, this project would be the first in the United States, under the Great Plains Conservation Program, according to his best information and knowledge.

This 5500 acre project would be very important to the people in the area in that they would not only receive 70-80 cents on the dollar from the Federal Government

to carry out the conservation work in the project, but would also increase the value of their land several dollars per acre, according to Dalrymple.

Three Ex-Winds Are Coaching At Crosbyton High

The Crosbyton Chiefs this year have another ex-Whirlwind on their coaching staff. Jack Meredith, head coach has been with the Chiefs several seasons. Meredith was assistant here under Preston Watson until about 1933.

Bert Grimes, another member of the Crosbyton coaching staff, played under Meredith's coaching here and was a member of the fine 1932 team which won bi-district. Grimes was an outstanding guard for the green and white. He has been serving as assistant to Meredith on the coaching staff.

This fall they were joined by Billy Carmack who was a teammate of Grimes on the '32 team here. Carmack was quarterback for the Wings and went on to play college ball at McMurry. He has been coaching at Idalou before moving to Crosbyton.

Patients Develop Flu and Pneumonia

Both Mrs. R. E. Young and Mrs. G. B. Jenkins of this city are back in Lockney General Hospital after being released last week. Mrs. Young was dismissed from the hospital after receiving treatment for a slipped disc in her back. She came home Monday and had to go back Tuesday, a week later, with a case of flu. Her husband said she was resting fairly well and may be able to return to Floydada by the week-end.

Mrs. G. B. Jenkins underwent a major and a minor operation and was released on Aug. 26. Mr. Jenkins said he had to take her back to the hospital this past week-end with what physicians diagnosed as pneumonia. Her condition is improving daily however.

Two of the Jenkins' daughters, Mrs. Lila Taylor of Petersburg, and Mrs. Norma Wheeler of Lubbock, have been with their mother some of the time as has another daughter, Mrs. Kenneth Ring of Dougherty.

Grass And Weeds Represent Menace

B. J. Baker, fire marshal said this week property in the city is still being endangered because of dry grass and weeds. The past two weeks there have been from eight to ten grass fires, one which could have been serious, and others which could have caused the loss of property.

One fire started from a railroad flare, catching the grass and burning close to gas tanks near the Texaco Warehouse.

Another grass fire was brought under control by the Floydada fire boys Sunday afternoon in back of KPLD, when sparks blew from the garbage and caught weeds and grass on fire between the radio station and the Copada Drive-in.

Other grass fires reported by Baker were minor ones.

Singing Groups Promise to Take Part In Fair Event

Report Willis Singers

have been contacted from over the tri-state area and a large number have promised they will attend. Meanwhile arrangements have been made for the folding chairs to seat the big group under the tent. The chairs are coming through the Moton-Clark rental service of Amarillo.

Also the grounds have been worked by hand and by machinery, the parking lot leveled and the dirt spread to make the fill at the tent site. Road machinery from Precinct No. 2 has been used and any number of trucks have been put

into service hauling dirt. Among donors of trucks to use at the grounds were C. L. Henderson, Gene Belt, Leon Wofford, J. Bert Bobbitt, Raymond Tucker, J. R. Belt, and others.

Clean Up Day at the Fair Grounds was Monday. Beginning at 9:30 volunteers made a big showing, cleaning and making the grounds and buildings spot and again under the direction of the fair committee.

A large number of outstanding gospel singers have been contacted from over the Tri-State area. A large number have indicated they will attend. There will be singing for everyone, on Thursday night, Friday night there will be more singing. The well-known "Willis family" from Arlington, Texas, will be presented in a free concert.

Saturday night September 13, will be a square dance under the tent. This will be under the direction of Raymond Tucker. (No contest.)

The E. L. Phillips singers from Hereford will be there. Mr. Phillips is a singer as well as a piano player, also Mrs. Phillips sings. They say they will bring others with them.

Mr. and Mrs. "Hoot" Gibson will attend. Mr. Gibson is an outstanding personality among singers everywhere. Has a pleasing bass voice and is a vice president of the Texas-Oklahoma Singing Convention.

The W. M. Bailey Quartet from

White Face, Tex., will come. They will have a good group. Two or more of their group play. Mrs. Bailey is extra good.

The H. D. Covingtons from Lamesa will be there. They also sing well and will add to the singing.

The Bruce Martin family from Matador will attend. They sing as a family group as well as Mr. Martin directs.

The Clifton-Sullivan Quartet from Dickens County will attend. This is a neighborhood group and enjoy singing. They will add to the program.

A large number of Floyd County people will remember H. D. "Shorty" Marshall. Mr. Marshall, before feeling health forced him to retire, was our Raleigh Products Agent, with Floydada and adjoining counties as his territory. "Shorty" as all know him, is a gospel singing booster and has been around many years. He will be with us.

An unusually talented group are the Trio from Pampa. Two of the group, father and daughter, both play the piano. The daughter, Ramona is outstanding. They all sing well and have been together for several years. This group did not attend last year.

Some of the singers who have already agreed to attend are, Mrs. Lucy Sims and group from Clovis, N. Mex.

Mrs. Sims will be remembered as the lady who was nearly murdered some months ago by a negro. The knife attack occurred in Mrs. Sims' clothing store in Clovis. She was badly slashed and was left for dead. Motive robbery.

Everyone that knew her remembers what a wonderful singing voice she had. She was so badly cut about the throat that she is not able to sing as she once did, but only in the lower register of the voice. However she is one of the best boosters of gospel singing found anywhere.

She is the widow of the late W. Alden Sims who before his death was connected with the Stampaxer Music Company of Dallas. He was also one of the very best song writers of the South.

Another outstanding group is the Spur Quartet from that city. This is composed of Glenn Jones and daughter, Glenna and others.

News of Harmony

(By Mrs. Chelma Williams) HARMONY, Aug. 25 — We have just concluded a week of revival services at the Carr's Chapel Church, Rev. D. C. Read of Wellman was the visiting preacher. He is the son of our pastor, Rev. J. W. Read. D. C.'s wife and three children also attended the services.

We had a very good revival with several re-dedications and one new member taken in on profession of faith. This new member is Nita Karen Scott, daughter of Mr. and Mrs. Zant Scott.

Brother D. C. is starting a revival this week at Sterley and all who can attend these services are cordially invited and will receive a blessing, I'm sure.

Both preachers and their families have been entertained in the homes of members for noon and some evening meals. A love offering was given the visiting preacher Sunday night.

Chelma Williams and Seaton Howard of Petersburg attended a P. O. C. Meeting in Amarillo Tuesday of last week.

Mr. and Mrs. Bill Tucker and children returned home Monday night from a short trip into Arkansas, Missouri and Oklahoma. They have been entertaining her sister Marie, and family from Cortez, Colo., since they returned home. The group, with other relatives enjoyed a picnic in Plainview Wednesday evening.

Childress has a real nice park so if you are passing through and would like a nice place to stop and rest or eat lunch, why don't you drive to the park?

One thing we noticed that was unusual to us, was the fact that the playground for smaller child-

ren is fenced. Mothers can let their children play here without fear of them getting lost or falling in the water.

VIEWSOND COMMENT

Housing Situation Bad. The housing situation in Floydada of late is always bad and it becomes really aggravated in the last two weeks of August when people begin to make their fall and winter plans. This year is no exception. Private enterprise seems to be lagging in this respect. Makes one wonder if some kind of a public housing plan is not needed. A good many houses in Floydada could be made not only livable but desirable with this kind of a plan. Also houses which have deteriorated beyond re-doing could be replaced. Is it feasible? It is being done all over the country.

After an election, even when we occasionally are on the winning side, our thoughts always go first to the loser. Peculiar thing, we've often sat among the jubilant crowd, our mind with the lad or lady who didn't make it. How'll he react? Will he be likely to take it in stride or will he be spoiled? We've seen a few who were never the same again.

Recall the story of the hail fellow, well met candidate, who expected to win hands down, but was rudely awakened by the returns. With practically no votes to his credit he telephoned the judge asking for a permit to carry a gun. Demurring to the request the judge wondered why. "With no more friends in this town than I've got I want a gun to protect myself," was the reply.

Another truer story is of the man who got only three votes in a big box, where hundreds of votes were cast. The candidate told with a grin that more than 17 men by actual count had claimed those three votes. He knew there were 14 of them liars. What he didn't know, he said, was, whether all 17 were liars. Many men vote and never tell. All his votes may have been that kind.

Why people tell a candidate they are going to vote for him, even encourage him, knowing full well they do not intend to give him their support, is one of the queer things about human nature. We know it happens that way. Maybe they want to be agreeable. Possibly it is a desire to be liked or to make the candidate "feel good." The candidates who swallow all that talk are the ones who get fooled worst and turn sour after election day.

Evidently we were much in error when we regretted the loss of the senator ship to Lyndon B. Johnson by our Hill Country candidate. Not that Governor Stevenson would not have made a good senator. What we mean is it develops that it took an EBJ to make the 85th Congress click, what with all the diverse ideas, both north and south. Mr.

Johnson has made the president look good despite the lack of leadership in the White House. But all this is preliminary to saying that we may have as tough a time accepting Raph Yarborough as "our" senator as we did Lyndon B. Johnson. Quite probably Yarborough has what it takes, but we're stubborn.

That Lakeview Road, promised at last, is the one that many years ago was the most traveled in all the county. It still carries a heavy load of traffic in competition with the hard-surfaced roads the State Highway Department has built. A good many of the mistakes the Highway Department has made in this county, however, can be charged to our own backwardness. The department has built roads where we would let them—and when. The department is beginning now on a road building program they should be finishing. The cost will be more for a much less ambitious set of roadways than we were offered. We live, possibly we learn.

We have a military man for a president, which is why it is logical to him that troops should be sent in to "put down rebellion" in the State of Arkansas, down at the school House that is. Nobody in the United States not a military man, would have done such a thing. But you can't think civilian if you've been military from just past the knee britches stage. Not only Texas people but people all over, have knitted eyebrows over the president and his law-making Supreme Court. As to the president's action, one queries if the president can send in troops to enforce one Supreme Court ruling, which one is it he could not send troops in to enforce?

Now has the season of our discontent arrived again. School starts next Monday and all the little fellers have got to pack back and forth those saddle blanket report cards the nice young mothers thought up. You ought to see one of those monstrous report cards, clean finger nail bracket and all.

The survival of the fittest is the ageless law of nature, but the fittest are rarely the strong. The fittest are those endowed with the qualifications for adaption, the ability to accept the inevitable, and conform to the unavoidable, to harmonize with existing or changing conditions. — Dane E. Smalley

N. Mex. Wants Deer 'Harvest' of 50 Thousand

Two New Mexico Department of Game and Fish supervisors were in Floydada last week making informal calls on hunters and fishermen of this area, especially as hunting ambassadors of good will.

They were Wm. A. Humphries, of Albuquerque, from the Northwest Area of the state, and Tom Moody, of Roswell, supervisor for the southeast area of the state.

Texas hunters in New Mexico checked up a perfect safety record in 1957, reports the supervisors.

"Of the many Texans who hunted in New Mexico last season, not one fatality or personal injury was reported," Humphries said.

"Last year we planned for a harvest of 50,000 deer, but only 37,000 were taken. However, the fault wasn't in the out-of-state hunters, most of whom were Texans. They were 70 per cent successful in bagging their deer, compared with a 50 per cent record of success for resident hunters."

"We have established hunting dates and ranges, together with several other-sex seasons, with an eye toward a 50,000 deer harvest again this year."

The dates, areas and regulations are designed to give the hunter every possible chance of bagging his deer," Humphries added.

Humphries said New Mexico's nonresident big game hunting license is unique among the Western States in that it permits the hunter to bag not only a deer but a bear and a wild turkey as well.

New Mexico's 1958 deer hunting season opens October 1, for bow-hunters only, and October 15, for gun hunters as well. Season ends with a special either-sex deer hunt December 13-14 at San Andres-Orgun, north of El Paso.

Has Life Been Found On Mars

Humans gaze into unfathomable depth of space and ponder over the great mystery of the Universe. Do the other planets support life and if so do the other inhabitants look like us?

This is a question for which Virgil, the world touring illusionist and Julie, "The Sweetheart of Magic," have an answer.

You will see their solution to this age-old problem when they bring their "Evening of Enchantment" to the stage of Floydada High School auditorium on September 16, under

the sponsorship of Band Boosters Club.

If there is life on Mars, Virgil and Julie contend there is a possibility of intelligence and where there is intelligence there must be some kind of system of government with its rewards and punishments.

This has inspired them to create a fantastic series which they call "The Weird Execution on Mars." In this scene they depict how a Martian being could be invulnerable to weapons of earth. During this act a marked bullet will be fired from an atomic weapon right through the body of a living breathing Martian glamor girl.

Virgil and Julie have spent their lives developing fantastic and beautiful masterpieces of entertainment for the world, and have recently returned from a five-year global tour

of 32 countries and have been in press and public cities of the world in giving mystery papers.

OKLAHOMA Mr. and Mrs. J. D. Turner returned Thursday from Oklahoma City where they attended the annual meeting of the Oklahoma Medical Society.

By Mrs. R. H. Tinsley, Chairman, Women's Department, Floyd County Fair
The Fifth Annual Floyd County Fair will be held September 11, 12, 13, at the Fair Building, where it has been held the past three years.
With added classes in many divisions, larger premiums in some of the classes, and the bountiful supply of vegetables, fruits and field crops in Floyd County it just can't help being a bigger and better fair.
Last year in the Women's Department the number of exhibits were less than the year before -- So, Come on Girls! Let's make our department the best in the whole fair this year. With the nice spacious room upstairs (out of the dust); good superintendents ready and willing to work in every division -- and your cooperation by bringing whatever you have, we can do just that.
In the women's department products will be accepted in all divisions at 8:00 A. M. September 11th, the opening day of the fair. Entries will close at 1:00 o'clock P. M. that same day. Judging will start at 2:00 o'clock p. m. on the same day, the 11th.
Miss Clara Pratt of Lubbock will judge the foods and Miss Gina Brazzelle of Plainview will judge the textiles.
Girls get your entries ready for your department; and boys, don't forget those model planes, rockets, cars and other craft items for the Youth Department.
Fair books are available at this time - and they are free.
You will find them at the Extension Office in Floydada and at many of the stores in Floydada and Lockney.

"Made \$15 an acre grazing wheat—cut a 40-bu. crop"

Bill D. Wood, who farms 640 acres, says: "My records show the dollar profit in applying Phillips 66 Agricultural Ammonia pre-plant to wheat land. On my irrigated wheat, I paid for my seed and fertilizer and made \$15 net an acre grazing it, when I used Phillips 66 Ammonia. The next year, I cut a 40-bushel wheat crop."

Other successful Southwestern farmers use Phillips 66 ammonia to give them higher grain yields... and more profitable grazing. The 82% nitrogen in Phillips 66 Agricultural Ammonia gives young wheat a fast start, supplies plenty of lush, protein-rich forage that puts on more beef at less cost per pound.

Many of these farmers plow down Phillips 66 ammonia in the fall on maize land. They know that the 82% nitrogen helps decompose crop residue, to provide extra plant food and make the soil more productive. Remember, Phillips 66 ammonia gives you more nitrogen per dollar than any other form of fertilizer—a full 82%.

The Medley family motored on to Dove Creek, Colo., where they were guests of Mr. Medley's brother, Jack and family. Dove Creek, known as the Pinto Bean center of the world, was just that, but farmers there had a fear of not being able to save their crops due to needed moisture.
