NO. 24

COWBOY REUNION AND BIG RODEO

Sanderson Expects to Give One of the Best and Biggest Cowboy Reunion and Rodeo of the Season, Aug. 29, 30

Business Mens Goat Roping Contest, Cowboy Novelty Race, and Other Special Laugh Producers

H. A. (Hack) Johnson returned to Sanderson the first of the week and is getting everything in readiness for the cowboy reunion and rodeo which is to take place in Sanderson on the above dates.

This Rodeo will consist of bronc riding, steer riding, goat and calf roping, wild horse race and rope horse race. Every event will be a contest with cash prizes with all entrance fees added. Buffalo riding, with \$10 in cash to anyone that can qualify. Ben H. Brown will be here with one of the worst outlaw horses west of the Pecos. Mr. and Mrs. Dan McAnaley, formerly of Fort Worth will be here for the riding. Mrs. McAnaley is one of the best riders in west Texas. There will also be a feature known as the Cowboy novelty race, a laugh hitter, even makes the old maids laugh; besides a host of other features which we do not have time or space to mention.

There will be no barbecue but Sanderson can boast plenty good eating houses, of which we will mention: The Kerr Hotel, with regular meals and plenty of good cool sleeping rooms; the Ware House, home-cooked meals and clean beds; the Loma Alta Cafe, regular meals and short orders; the Highway Lunch Room, short orders and lunches. You will also be able to secure sleeping quarters in a number of private homes.

You will notice in our advertising columns the number of business firms that are pulling for a big time at the Rodeo; visit

these different firms sometime during the two days you are here, they will give you a hearty welcome.

The following are some of which expect to participate in the program each day: Charley Turk, Harry Goode, Emmett Buck, Herman and Joe Chandler, all of this vicinity and several others who have not yet handed in their names. Mr. and Mrs. Dan McAnaley of Fort Worth; Angee Wilson and Grover King of Alpine; Walter and Boy Babb of Langtry; Dave Pool of Girvin and Lee Lane of Rankin. Charley Chandler and Doc Turk, old time cowpunchers of Terrell county, will pull some good ones, be sure and see them, it will be worth the money.

One of the big features of the day will be the Merchants goat roping contest. In order to enter in the contest you must be a merchant, barber, lawyer, or doctor. No age limit.

A shade will be arranged over the grand stand, there will also be ample room to park your cars to witness the performance.

There will be a big cowboy dance each night at the Catholic Athletic Club Hall, which is an exceptionally large building with one of the best of floors. The music will be furnished by a six piece nigger orchestra out of Lubbock. You can not afford to miss these dances.

Come, bring your wild horses and roping horses and take part in the rodeo. There will be people here from far and near and a royal time for all is expected.

Make your appointments at Lucile Beauty Shop and be ready for the Sanderson rodeo, as it is our wish to serve all of you.

Mr. and Mrs. Jess Haley have as their guest this week, Mrs. Haley's mother, Mrs. Waterhouse of San Angelo.

1929. The increased production was attributed to the larger number of sheep shorn and increase in the average weight per fleece. The increase in weight was two-tenths per cent per fleece.

Number of sheep shorn in the 13 western range sheep states, which produce nearly 75 per cent of the total output, was 29,834,000 this year compared to 28,713,000 last year. Wool produced in these states totaled 242,849,000 pounds in 1930 and 226,872,000 pounds in 1929. This represented 84 per cent of the increase for the United States.

Terrell County Oil Activities

This county is now being flooded with geologists. A geologist by the name of Jones was here last week in company with an oil man by the name of Dunning from Los Angeles, Calif., both representing men with means in the oil fraternity. These men are enthused in the future outlook of conditions in general and more especially with the area in the immediate vicinity of the Wooley-Jones test well in the northeastern portion of the county. Our correspondent recently received a communication from Kenneth Rich Wooley and a Los Angeles Jew, both stating that Leonard Jones will amply test the area in the vicinity of their leases. Quite a few geologists of major companies are enthusiastic over the present location of the Wooley-Jones test well, and are of the opinion that this well will come in a producer before it reaches the depth of 4000 feet.

An inquiry reative to the purchase of oil and gas leases in the vicinity of Block 153, T. & St. L. Ry. Co. survey, recently received. The Danciger Oil Company endeavored several years ago to purchase a lease on a good size drilling block in this area, but failed to acquire same due to the fact that the Darby Petroleum Corporation backed out on the deal, as well as a certain individual.

Quite a few oil men from Shawnee, Okla., owning acreage in the vicinity of Block D-10, T. C. Ry. Co. survey, have been recent visitors to this city in the interest of their holdings and were indeed surprised to find that Roy A. Reynolds, a consulting geologist and independent operator has already acquired a lease on a certain eighty acre tract within less than a mile of their acreage, and were astonished at the fact that a certain geologist of a major company has estimated this lease to be worth at least a million dollars ahead of development.

The last issue of the Oil and Gas Journal of Tulsa, Okla., states on page 84 as follows:

"Roy Reynolds, consulting geologist and independent operator, Fort Worth, Texas, has been selected to make a geological tour and inspection trip through several European countries, for a group of New York bankers."

Several other geologists of dependable reputations have also acquired some protection in the way of oil and gas leases in Block D-10, T. C. Ry. survey. —Reporter.

TRUTHFUL ADVERTISING

Usually the argument is made that every business concern should advertise. Generally speaking, this is true, but there are exceptions. In fact, some concerns hardly dare to advertise, because they can not make good according to requirements of modern business practice.

When advertising is untruthful or misleading it does more harm than good. Only an enterprise which fulfills the promises made in its advertising can stand the spotlight of publicity. Hence, when we find a store or other business establishment boldly advertising its wares or service, month after month, year after year, we may generally conclude that it can and does give real values.

Observing the advertised businesses of any community, large or small, will enable one to identify the most dependable concerns in that community. Only efficient and reputable establishments dare to advertise.—Boerne Star.

BUSINESS HOUSES

Please all of you that have flags have them in motion the morning of the 29th. Make things look like a big time, which we are going to have.

H. A. Johnson, Rodeo Mgr.

American Legion Post Organization

At the meeting Thursday, August 7 1930 for the purpose of ascertaining the wishes of World War Veterans relative to organizing a local post of the American Legion, it was the unanimous desire of those present that a post be organized, and that all ex-service men in the county who are eligible be given an opportunity to become charter members.

Officers for the year, 1930 were elected as follows:

C. A. Wilburn, Post Commander.

A. E. Creigh Jr. Post Adjutant.

Tip Frazier, Post Finance Officer.

T. P. Breeding, Post Service Officer.

The next meeting is to be held September 4, 1930, at which time application for charter will be duly signed, constitution and by-laws approved and other necessary officers elected.

It has been determined that there are about sixty five ex-service men in the county who are eligible for membership. Approximately one-third of these have already handed in their application. If you who read this are one of the men eligible for

School Opens September 8th.

School opens here Monday morning, Sept. 8th. at nine o'clock. All patrons are cordially invited to attend the opening exercises. A short program will be given in the Auditorium, and from there the pupils will retire to their respective places to assume their school duties.

We will be glad to have patrons visit with us at any time. We want you to feel welcome to come and see the work your children are doing. Your co-operation with pupils and teachers will help to make this one of the best school years that Sanderson has ever known. B. J. Brannon.

membership, be proud you can join the American Legion. Hundreds of thousands of men would rejoice indeed if their lives could be so made over that the Legion might be open to them. It is better to be in the Legion than to explain why you are not. The American Legion invites you to comradeship. Buddie, Join Up! Applications can be secured from A. E. Creigh Jr. or F. L. Burnside.

Engine And Eight Cars Leave Track

Traffic over the Southern Pacific lines between Sanderson and Del Rio were blocked several hours Wednesday of this week on account of an east bound freight train leaving the track between Pumpville and Hijito, as to what we get from here say, at this point there are numerous curves in the track. The train consisted of a heavy duty engine, 41 loaded cars and 10 empties, four of the cars which left the track were loaded.

Engineer O. J. Vineyard and fireman J. R. Goodykootz, both of Del Rio were pretty badly shaken up. George Skay, also of Del Rio, brakeman, received injuries, but is reported as having no bones broken.

Two steam derricks one from San Antonio and one from Sanderson went to the scene. A temporary track was built before traffic could be resumed.

Visit Lucile Beauty Shop while the Sanderson rodeo is in session. August 29th. and 30th.

We Carry Everything Handled in a General Store

DRY GOODS

The Season's New and Best Styles

Some Timely Food Suggestions

By NELLIE MAXWELL

Man is but man, inconstant still, and various;
There's no tomorrow in him like today;
Perhaps the atoms, whirling in his brain,
Make him think honestly this present hour;
The next a swarm of base, ungrateful thoughts
May mount aloft—Dryden.

When the green tomatoes are fully grown they may be sliced, dipped in crumbs and egg and fried as ripe ones, making a most tasty luncheon dish.

Eggs Baked in Tomatoes.—Cut off the tops and scoop out the centers of six tomatoes. Put one-half teaspoonful of butter into the cavity, then drop in a raw egg, being careful not to break the yolk. Season with salt and pepper and add another bit of butter on top. Set into gem pans to bake. Serve with a cream sauce.

Everybody likes french toast when it is well prepared. Beat two eggs slightly, add one-half teaspoonful of salt and two-thirds of a cupful of milk. Dip the slices of bread which are cut in uniform thickness into the mixture, cover well on both sides and fry on a hot griddle which is lightly greased. When brown on both sides serve hot with maple syrup or cinnamon and sugar mixed together.

As America produces a large part of the cheese made in the world, we should have a higher appreciation of its food value, as do the countries on the other side of the oceans. We serve it more as an appetizer than as one of the most nutritious foods.

There are those who like, buy and enjoy fresh cheeses that are chewy and tough when cooked. Cheese should never be cooked at a high temperature, any more than milk or eggs. There are countless most delightful dishes which have cheese for a basis, but most of such dishes when palatable are prepared from well seasoned cheese. Cheese should be kept and properly cared for for a year before it is ripe enough and of good flavor.

Sliced Green Tomato Pickles.—Slice a peck of firm well developed green tomatoes, also slice six good

sized onions. Put a layer of the sliced tomatoes in a large dish, sprinkle with salt and add a layer of onions. Repeat until all are used. Let them stand overnight. In the morning drain, add one quart of vinegar, one cupful of brown sugar, two sticks of cinnamon, and a tablespoonful of cloves, tied in a bag. Put over the heat and cook until the tomatoes are tender but not broken. Pack into a stone jar, pour over the vinegar and when the pickles are cold add one-half cupful of grated horseradish and a tablespoonful of mustard seed. If the horseradish roots are too small to grate put them in whole. Cover with a weight and keep the jar well covered. These pickles are best when not too sweet.

Tomato Salad.—Soften two tablespoonfuls of gelatin in one-third cupful of cold water. Now add two cupfuls of boiling water, two slices of onion, four celery leaves, four whole cloves, one-half teaspoonful of salt and two bay leaves. Cook with two cupfuls of tomatoes for twenty minutes in a covered dish. Strain and heat again to the boiling point and add the gelatin; stir until it is well dissolved. Now add one-half cupful of celery and one-fourth cupful of chopped sweet pickles. Pour into a shallow pan which has been rinsed in cold water. The gelatin should be an inch thick in the pan. Set into a cold place to stiffen. When cold cut with a heart cutter into heart shapes and serve on lettuce; surround with salad dressing.

In every family there are a few cherished recipes of good things which have been handed down through the years and which are enjoyed by each succeeding generation. Grandmother's cookies, noodles, pickles or mince meat. We outgrow our fondness for some foods that we liked when young, but the food mother prepared continues to be the favorite.

Spiced, Pickled Peaches.—Take three pounds of sugar, three cupfuls of good vinegar, one ounce of cloves, two sticks of cinnamon, boil all together, then add seven pounds of ripe peaches which have been washed and the fuzz rubbed off. Cook the peaches in the spiced vinegar which has been boiled for a few minutes. Drop in a few at a time and when thoroughly scalded put into the cans. Boil the syrup down for a few minutes and pour over the peaches and put in jars.

Tomato Catsup.—Take three dozen ripe tomatoes, three red peppers (the hot ones), six onions, all chopped fine. Add two teaspoonfuls each of cinnamon, mustard, and one of cloves all ground. To three cupfuls of vinegar add one cupful of brown sugar and three tablespoonfuls of salt. Cook all together for two hours, very slowly, then put through a sieve, reheat and bottle and seal.

Child Should Have Enough Nourishment to Last Fourteen Hours

(Prepared by the United States Department of Agriculture.)

Does your child wake you up before daylight? Or sleep fitfully during the night? Perhaps, in your conscientious endeavor to avoid heavy, rich, indigestible foods at supper time, you have swung too far in the other direction, and given just too little nourishment to carry him—or her, as the case may be—through to the family breakfast hour. That's a long stretch, from five-thirty or six o'clock in the afternoon until seven or eight o'clock the next day. Fourteen hours. As a child spends the time just preceding his last meal in the incessant activity or normal play, he needs material for replacing what fuel his body has consumed, material for the repair and growth of body tissues; in particular, he needs vitamins, which may be quite lacking from the cereal-type of supper so often given to children.

By the time a child is two he should have learned to know and like a sufficient variety of foods so that it is not necessary to repeat at supper the cereal menu which constituted his breakfast. Supper can be made so much more interesting and furnish the child with more of the foods he needs without being too heavy or rich. A child specialist of the bureau of home economics of the United States Department of Agriculture points out that it is often quite easy to give the child for his supper some of the foods prepared for the family evening meal.

The little girl in the picture is having buttered carrots, scalloped tomatoes, bread and butter and a glass of milk. For dessert with this meal she

will have a pudding or custard. All of the cooked foods were prepared for the family meal the same day, and so did not require extra work on the mother's part. If the family supper includes some fresh spinach, peas, potato, or other vegetables, any of these might be given in place of the tomato. Orange pulp in a sherbet cup, sliced ripe bananas or peaches, or some other fresh fruit would be suitable for

Milk is Essential for Protein.

dessert. Another good menu would be baked potato, buttered string beans, bread and butter, a glass of milk, and baked apple scraped out of the skin.

It is a good thing to give baked potato frequently, with other vegetables, since it has been found that potatoes cooked in their skins conserve valuable minerals and vitamins. A baked potato is less dense and pasty than some of the other starchy foods, and is a convenient means for serving plenty of butter, which the growing child needs. A glass of milk should always be given at supper time to furnish protein and other nutrients needed by the child. Try setting a glass and a small pitcher of milk at the child's place. If the pitcher has a handle that fits the child's hand comfortably, he will soon learn to pour out liquids steadily.

EATING RAW PORK IS DANGEROUS

(Prepared by the United States Department of Agriculture.)

Reports that trichinosis has caused the death of three persons and illness of 30 other residents of Reading, Pa., recently has led the United States Department of Agriculture to renew its warnings against eating raw pork. In Reading the disease was the consequence of eating raw pork sausage.

Trichinosis is produced by a minute, parasitic worm that infests the meat of swine without noticeably injuring the animal. This minute worm is taken into the human body by eating raw or undercooked fresh pork. In the human body these worms, or trichinae, produce a disease known as trichinosis, which somewhat resembles typhoid fever. Trichinosis is a painful and dangerous disease which does not respond to treatment. All fresh pork in whatever form should be thoroughly cooked to make it safe.

Leaflet 34-L, "Trichinosis," prepared by the United States Department of Agriculture to explain this disease and methods of avoiding it, is available free to anyone requesting it.

Delicious Cool Drinks

Delicious cooling drinks which contain valuable food materials may be made from both skim milk and whey. Clean, sweet skim milk is as valuable as whole milk for its supply of lime, its good type of protein and its vitamin B which promotes growth and stimulates the appetite, but it does not supply the abundance of vitamin A which increases resistance to infection and also promotes growth. It has a lower energy value than whole milk because of the loss of fat.

to the wise who are making midseason and early fall dress selections should be sufficient.

Lightweight Woolens for Fall Wear

By JULIA BOTTOMLEY

Comes now that restless time of the year, the betwixt and between days when it is not yet fall, nor has summer yet taken its final departure. 'Tis the midseason period when the style-minded are beset with longings for something to wear that is obviously new—costumes which have the twang of fall in their colors with the lightness of summer in the weight of their weaves.

In answer to this off-with-the-old and on-with-the-new cry of fashion's followers behold an initial showing of frocks most beguilingly styled of lightweight woolens, whose autumnlike hues are irresistible. Wonderful new shades! Wine tones, dark greens, many different browns and that which is very, very new, the "off-black" shades, so dark are they. The latter promise to be as popular as were the "off-white" tints some little time ago.

There is no doubt about these lightweight and sheer-of-weave woolen dresses being the really new note for early fall. Some of the materials at a casual glance give the impression of sturdy tweed. In reality they are often almost transparent, daintily supple, and delightfully comfortable in the wearing.

No more intriguing are these new woolen fabrics than is their styling. Especially is that slender look which all women covet emphasized in low-placed flares and snug-fitted hiplines.

A very recent silhouette is that of a cloth princess street dress which adopts a surplice fastening extending diagonally from the front neckline down to the knee-deep circular flare. Other outstanding styling details include boleros of every known variety,

the all-around types competing with those open at the front. Frequently hiplines are worked with intricate seamings, bands and yoke effects. Buttons, plants and belt also flourish in the new modes.

Dark colors, whether black, navy, wine-red, brown or deep green are for the most part relieved with touches of

white or light-tinted lingerie. A simple and youthful frock of light wool mixture is shown in the picture. The new neckline is interesting. The dress is trimmed with white silk, and it will be observed that in the majority of instances contrasting detail is accented.

It is the consensus of opinion that this is to be a woolen season—a word

Sandman Story for the Children

By MARY GRAHAM BONNER

As David wandered along on his adventures through the Living Map—the map of the western hemisphere which had come to life for him—he saw some of the map people digging for gold.

All were little people about the size he had become for his series of adventures.

"We do the same on the Living Map as they do in your world," they told David.

"We want to show you how important each part of the Living Map is."

When he reached the end of California he thought he would go on up toward the North again, just a little distance at a time.

So he took a side path which led off into Arizona and walking up a little way he came to the most wonderful gorge he had ever seen.

It made every other canyon or gorge seem like nothing at all beside this.

Instead of looking up at mountains he was looking down at mountains of rock which seemed to have been turned upside down.

The rock was of all colors and there were great parts of the wall

So Marvelously Wonderful.

of the canyon which were of marble, too.

He stepped very, very carefully for it looked very dangerous—dangerously beautiful.

In fact he was feeling a little dizzy and he thought he wouldn't stay here much longer.

It was a trifle too thrilling. Suppose he should fall?

He almost felt then as though he were falling—perhaps this feeling

came upon him because he was feeling so dizzy.

So, very slowly he left the canyon. So this was the Grand Canyon of Arizona of which he had heard.

David thought he knew why it had been so named.

It was all his own idea but he felt there might be some truth in it.

Years and years ago, he fancied, this canyon had been discovered. Perhaps the real, the very first, discoverer was not known.

So marvelously wonderful was it, so great and magnificent and terrible, that it had taken away the breath of the discoverer just as it had taken away David's breath for a second.

The discoverer wanted, no doubt, to give it some big and splendid name.

But when he tried to speak he couldn't even find his voice and when he found it there seemed to be no words in which to describe what he saw and felt.

He probably wanted desperately to give it a beautiful name, David thought, and all he could say to himself was—oh, it's so grand—so grand!

It's a grand canyon.

That was indeed just what it was!

SCENIC PLAYGROUNDS OF AMERICA

By G. M. MILBOURN

Eternal Ice

The amazing variety of the natural wonders appearing in western North America is nowhere more strikingly displayed than in our contrasting national resources of perpetual ice and apparently inexhaustible boiling water.

Millions of Americans know of Old Faithful geyser, Firehole lake, Roaring Mountain, the Frying Pan, the Minute Man, and other Yellowstone park wonders which contribute tons of boiling water to the Missouri river system every day of the year, in delightful contemplation of Old Man Weather and his winter rampages. Thousands of 1928 and 1929 visitors to the park also know of the new "Imperial" geyser, a spirited debutante of the summer of 1928, which twice daily spouts to a height of 100 feet or more from two to eight thousand tons of water; this volume, which involves a continuous two-hour eruption, would water a city of perhaps 25,000 people.

But very few people have stopped to contrast this national legacy of gar-

The Carbon Glacier.

gle-hiss-and-steam with an equally interesting phenomenon of perpetual ice masses which defy the summer's heat waves just as unconcernedly as the geysers face the prophecy of a long, hard winter. Very few Americans realize that there are acres and acres of perpetual ice within the United States alone, at less than half the elevation of the famous boiling-water basin—far lower than Denver, Reno, the Black hills summits, or the Grand canyon rim, and even lower than many Appalachian uplands of the Atlantic seaboard!

Still more amazing, perhaps, is the fact that the lowest but least-known ice bank lies within 55 miles by air, or 75 by auto, of a city of half a million people, and that only an easy hike of less than two miles is needed to reach the 100-foot cliff of immemorial ice from the auto road.

This lowest American ice field is the Carbon glacier—elevation 3,290 feet—on the north side of Mount Rainier, in the state of Washington. Like some of the immense prehistoric ice teeth of Glacier National park which are out deep box-shaped, cliff-walled valleys only to melt away completely in their depths, the Carbon glacier (although in general a part of the octopus-shaped ice pattern which reaches practically to the summit of the peak) has in fact gnawed so deeply into its mountainside bed that a towering precipice wall of its own making now completely isolates it from the summit glaciers. By contrast, its southern slope rival, the better known Niangua glacier, which finally dies a dirty, ignominious death at 4,000 feet amid the stares of bus-bundled humanity en route to Paradise valley, begins on the summit crater's rim, and loses two full miles of elevation before its final boulder-buried and almost shame-faced witting. There is defiance and grandeur rather than apology, however, in the imposing precipice of ice with which the dogged old Carbon glacier makes its last bow after fighting its way 600 feet lower.

Mount Rainier (pronounced re-near) is reached by highway from Seattle or Tacoma, Wash., usually by the Longmire-Paradise valley route which also permits rail travel, as far as Ashford, via the Milwaukee road. The Carbon glacier is easily accessible in dry weather only, and via Fairfax instead of Ashford; Fairfax is reached by the Northern Pacific railway, but inquiry should be made regarding automobile transportation the other 15 miles.

Travelers desiring to go on a glacier with both safety and information as well as thrills will find guide parties available by foot at Paradise Valley, Rainier, and by horse and foot at Glacier National park, Montana.

The Chinese Slant

Tommy Gubbins, who handles most of the Chinese talent used in pictures, was talking with two Chinamen who had just returned from an engagement in London.

"It is most ridiculous place," said one. "They have there a game which they call sockum football, wherein the Englishers propel an inflated bladder hither and hither with their august toes."

"Yet, in this most peculiar London there is a fog so dense that one could proceed on for half an hour before it was discovered that the honorable ball itself had been lost."

Science Finds That Watermelons Are Valuable in Diet

Eating Watermelon With Zest at a Picnic.

(Prepared by the United States Department of Agriculture.)

General opinion formerly credited the watermelon with being very good to eat but not much as a source of nourishment. "Mostly water with sugar to flavor," was the prevalent idea. When we were youngsters we liked to take part in contests to see who could eat the most of this luscious fruit.

But now benevolent science has discovered that watermelons are actually valuable in the diet. In short, they furnish vitamins, not one, but many. Eat watermelons and you will replen-

ish your stock of vitamin A, necessary for growth and physical well-being, and of vitamin C, important for the nutrition of the teeth and other parts of the body. You will also supply yourself with vitamin B and G, which science has shown to stimulate growth and normal development.

These boys and girls in the illustration do not seem to be disturbed because the watermelon they are eating with such zest happens to be good for them. The picnic lunch includes sandwiches, fruit beverages, and milk, but the watermelon is the main attraction.

CHAPTER VIII—Continued

Well—if Jinny had not spoiled it for me, I had had a fair chance of tearing the heart out of Grace's secret, sweethearts notwithstanding. I might have a chance yet. At all events, I would not give up while a shred of hope remained. On that resolution, I went to sleep.

Next morning there was fine music, when the carriers got to work clearing and felling the timber we wanted for the raft. Jinny stood beside me on the river bank, tall and thin and motionless as one of the long palms that grew in the sheltered verge of the great river. Her beautiful, hungry face, with its avid eyes, was fixed on the sliding Romilly river. The sound of the carriers' clearing had shifted further away; back, back, went the axes, dully, muffled by distance. There was a pause; through it arose, excitedly, the voice of a Mambore cannibal singing the death song of the tree. . . . Followed a rending crash, and shouts in chorus.

There is something in the fall of a great tree that lets things loose; things that have nothing to do (on the surface) with trees. Genevieve Treacher had been one woman in the instant before that crash. In the instant after, she was another—another of the many Jinnies, to know all of whom would have needed great part of any man's days; would have been worth it . . . perhaps. . . .

She swung round from the river; she faced me, tall as I, filled, as I, with the fires and forces of youth; strong, supple, as a tigress, brave as a tigress, a woman made for the wilds, if ever one was so made.

"I'm not asking marriage, Phil Amory," she said. "I'm asking—just a hut down somewhere at the mouth of the river, and we wait for you to come back, since you won't have me on the trip. And I'll stick to you—and follow you—" She fought for breath. "You pulled me away from the sharks," she said. "You sent your trip to blazes and never cared. You're the first real man I've ever—ever—Phil, will you leave me in that hut when you go?"

She was as modest, almost virginal, in her self-betrayal as any girl. I don't know how, but in that moment I recognized a truth that, so far, had not come my way. I realized how such a woman as Jinny may regenerate herself; I realized, with a wrench of soul and body painful beyond all telling, that I, and no other, was the man to help her to it.

But between us stood the wrath of Pia, my white rose, my star, Pia who some day, God willing, should pass the fiery gate of dreams with me, into a paradise of which I was unworthy, which, nevertheless, I could not give up, if the salvation of a hundred Jinnies stood in the way.

If there had never been a Pia. . . . Jinny, like many flame-haired, flame-spirited women, was ever-so-little dairymaid. She read my thought.

"Phil—strite, Phil," she said. "Is it because of me you go, same as you yourself have gone, I'll lay—that you won't? Because, if that's all—"

I couldn't answer her. I put my hands on her wide, thin shoulders; her face was on a level with my own, and I kissed it. "You're the best girl in all the world, and I love you, Jinny," I said.

Unerringly, she read my meaning through my words.

"I'm the best girl—but one?" she said.

To deny Pia was to trample on the cross of my faith.

"Yes," I answered, feeling as if I had struck her.

"Then, if there hadn't been any Miss Lauriers in the world, it'd been all right with you and me?"

I could not answer her. There was no need. She flung me away with a suddenness and strength that all but sent me down among the trampled palm leaves by the river side. She was transformed, instantly, into a hag of the streets. As she might look in twenty years' time, battered, destroyed, so she looked now, in one awful moment of prophecy. She gave a scream that reminded me of the screams of torn horses during the war, and ran wildly down the bank of the river. I don't know where she thought she was going—maybe to a spot further on, where the current swept, deep and oily, past a high corner of the bank—where, if she had leaped, the alligators would have had her before I or any other, could have done anything to help—but she was, in another moment, checked, as I was checked in my pursuit, by the amazing, unexpected sight of a government launch on a lower reach of the river, rapidly heading towards myself and Jinny.

They stopped as soon as they saw us, and slung out a dinghy. I saw Bassett was in charge. The launch was drifting with the current; Bassett secured her by a cable passed round a tree, before he came up to me and to Jinny, who was standing white, staring, but more or less self-possessed, a little distance away.

"Well," he said, with a certain forced cheerfulness, "so you've saved me half my trip; that's very obliging of you."

"May one ask," I demanded, "what the blazes the government is doing up here?"

"You can ask without the blazes. The government has business anywhere. We've been sent up to save this young lady from being carried off by cannibals like the star in a picture

show. The G. S. was at Daru in the Tauri, and news came down the coast—native telegraph, you know—that a white 'Sinabada' had gone up the Romilly in a canoe with half-a-dozen boys, meaning to strike inland. So the G. S. turned a handspike and had three cat-fits, and packed me off without my lunch. So here's the Tauri to take her back; only I see you've been beforehand with us." He glanced with interest at the figure of Jinny, who was contriving to look amazingly dignified in my khaki shirt and trousers. "By the way, Sheep," he went on, "what's become of your expedition?" For he, like every one else "down West," had known of my departure.

It was difficult to answer him. "I came back," was my lame reply.

"Well," he said, "well"—after a pause during which he had looked swiftly, keenly, at both of us. "I suppose I'm to have the pleasure of fetching you along to Daru also?"

I was thinking rapidly; calculating just what this new turn in my affairs might mean. The Tauri was a fast launch; she could take me home in a day and a half; half a day to fix up matters there, and get stores. Then a day and a half back, in the Tauri

"I'm Not Asking Marriage, Phil Amory," She Said.

again—I calculated that the government would owe me so much for doing its work at my own cost. Half a day for contingencies. Two days to get through my four days' cut in the bush. . . . Eight days in all from now ought to see me—should see me, if I were alive—once more at the point where I had turned back. If there was no one ahead of me—

"I suppose," I said to the waiting Bassett, "that you didn't see any sign of another party on the river."

Bassett was busy lighting a cigarette.

"You suppose wrong then," he said, his head bent over his hands. "There's a prospecting and exploring party down at the river mouth at this minute." He did not look at me as he spoke. Bassett was—is—a little gentleman.

"How soon can we get away?" was my reply.

"As soon as you can chuck your carriers on board, and get you and this lady on."

He kicked me, slyly, and I replied, as intended, with an introduction to Jinny.

"I'm sorry to offer you such rough accommodation, Miss Treacher," he apologized, fixing her with his grave ministerial stare. "But you are fairly lucky to be alive this minute, which I suppose is some compensation."

"Do you?" said Jinny. "I don't," and turned her back on him. I could only tap my forehead, and nod significantly at Bassett. "The bush," I explained, as he moved a little away. It was explanation enough, for any one who saw less clearly through a

stone wall than Bassett usually did. We made a very silent party, dropping down river. With the current, and the speed of the launch, it was a comparatively short journey. Dusk of next day found us on the opening reaches of the Romilly's estuary, with the gulf of Papua, flat and gray as a pewter table, opening out before. There was a long strip of beach at the river mouth; you could scarcely see it at that hour. But if you could not see the beach, you could see, quite clearly, that which stood upon it—the pointed shapes of several canvas tents.

"We'll stop here for a few minutes," said the magistrate. "I didn't call going up; just hailed them, and asked if they had seen anything of a white woman."

"What did they say?" I asked.

"One of them—Caxon it was, I think; I hear he went with them—shouted back that they hadn't, and asked who she was, and what it was about."

"Caxon?" I said. "Who were the others?"

"Only one other white. You know him—Spicer." He gave an order to the brown, bare-limbed steersman; and our boat took a wide sweep, and began heading inshore.

"Caxon?" I thought. "Spicer is not such a fool as he looks." For Caxon, old-time goldminer and survivor of a past era of mining successes, was about the ablest prospector who ever washed a dish between Daru and the Mambare.

"Do me a kindness, Bassett, will you?" I said. "Don't mention to anyone ashore just where it was that you picked us up."

"Right. You not coming?"

"No fear."

"Miss Treacher coming?"

"I don't—"

Silently Jinny's head appeared above the coaming, cutting off my words. She stepped out on deck. There was still some light left; I could see that she had found Bassett's store of clothing and looted it ruthlessly. A clamor of dark-blue silk circled the waist of her—my—trousers; she had white socks on, and a silk tie about her neck.

I looked at her in amazement, as she swung lightly down into the boat, avoiding my eyes (she had not looked at me, or spoken to me, since we came aboard). I saw her go ashore with Bassett, disappear among the tents.

Before I had time to grow more than a little impatient, the boat was back again, and the launch under way. What had Jinny been saying, doing, out there in the camp? Why had she been so anxious to go ashore, and why, now that she had returned, was she still keeping hidden, avoiding sight or sound of me?

Bassett was sitting on the cabin roof, a whitish blur in the dark. I edged up to him and asked him point-blank—

"Did you—anyone—say anything ashore?"

He knew what I meant. He did not look up, or turn his face, but he answered immediately, in Bassett's own crisp, precise way—

"I saw Spicer. I asked him what the delay was; asked if I could assist in any way. He said no; it was all right; they had stopped because he wished to buy sago; they'd be off tomorrow at daylight. I got back to the boat then. Miss Treacher—he spoke carefully, seeming to weigh his words even more than usual—"Miss Treacher stayed behind for a while; I waited for her."

"Was she—" I stopped; it was difficult to phrase.

"There appeared," said Bassett precisely, "to be something in the nature of a friendly understanding between her and Mr. Spicer. I gathered an impression that she was pointing out to him something in connection with the course of the Romilly river."

On pursued the launch; the stars fell away right and left from her wake. Going forward, where I could be more or less alone, I sat on deck, and digested as best I could this unwelcome news. It did not help matters, or make me more hopeful, that I heard, once in a way, a sound like some one, down below, trying to stifle bitter weeping.

(TO BE CONTINUED)

Power of Softness

A bank of snow six feet thick will stop a bullet shot at the distance of 50 yards. The bullet will not penetrate that downy bank of snow, but it will go through the solid embankment when fired at three times the distance. It is delightful! The bullet shatters the steel, penetrates the solid bank; but the soft feathery snow has a way all its own, and it takes in that murderous lead and loves it, and, as it were, soothes it.

First Steam Carriage Met With Disapproval

The London Times reprints the following from its issue of August 5, 1829: A Gurney's steam carriage arrived on Monday, at the Cranford Bridge Inn, from an experimental tour to and from Bath. The success of this trial much exceeds the most sanguine friends of the invention. . . . Mr. Gurney, his brother, Colonel Viney, Captain Dobbin, and assistants started from Cranford bridge about 4 a. m. They proceeded at a most rapid rate to Maidenhead, which they reached, notwithstanding two or three delays, in about an hour and five minutes—a distance of nearly fifteen miles. After this proof of their capability of speed, they traveled more leisurely, until they arrived near Maidenhead where . . . they were attacked by some brutal fellows, who, imagined they were "come to take the bread out of their mouths." To prevent similar occurrences, it was thought advisable to draw the carriage the remainder of the way by horses. Having exhibited the powers and practicability

of the invention publicly in Bath, the party left early on Monday morning to return. Prudential considerations induced them not to light their fire until they had passed the place of their late annoyance. They then lighted, and amidst the most provoking delays in securing supplies of water, coal, and charcoal, came the last 84 miles in about 12 hours, thus giving the proof experimental of the capacity of using steam carriages on our ordinary roads.

TO VIEW ECLIPSE ON TIN CAN ISLE

Rendezvous for Scientists in October.

Washington.—"Tin Can Island" in the south Pacific will in October be the rendezvous for many distinguished scientists, assembled there to observe an eclipse of the sun.

"Tin Can Island," which also enjoys the more dignified name of Niuafofou, will be in the path of totality for the eclipse, which will be visible over the south Pacific on October 21 and 22, according to the location of the observer with reference to the international date line.

Although information regarding foreign observers is yet unavailable here, it is known that at least four American institutions will send scientists to Niuafofou. Some observers may locate themselves on the small island of Nurakita, also in the path of totality. Commander C. H. J. Keppeler, United States navy, will be in administrative charge of the eclipse expedition from the United States naval observatory. This will be his second eclipse expedition, as he commanded the successful expedition to Hilo, Philippine Islands, for the eclipse in May, 1920.

Lieut. H. C. Kellers, United States navy, will be the medical officer of the expedition. In addition to his medical duties, he will also collect specimens of fauna and flora, and will have charge of the meteorological observations. He has been on two previous scientific expeditions to distant corners of the world, and is said to be extraordinarily well qualified for the difficult tasks which are foreseen.

Revan P. Sharpless, junior astronomer, will have charge of the coronal photography for the observatory and will have with him a 15-foot camera, besides other small ones. Photography is considered an extremely important part of the expedition's work.

Besides these members of the staff of the naval observatory, distinguished scientists from educational institutions will accompany the expedition.

Drum Used in Revolution Is Discovered in Attic

Indianapolis, Ind.—A drum, the deep tones of which served to rally American fighting forces in several battles of the Revolutionary war, rests in the attic of Joseph W. Church, surrounded by dust.

The instrument, with its hand-made tacks and it shell of solid maple, is intact but has not been used in any war since the great victory over England a century and a half ago.

Its known history is brief, but visitors to the Church home are aroused to speculation over the story concerning it.

Church said the drum was carried in the revolution by Timothy Church, a brother of John Church, who was a great-grandfather of the present family.

The two men fought in the battle of Quebec and were taken prisoners when the Americans were routed. Timothy died in prison but gave the drum to his brother, who later gave it to his son, Isaac, who, in turn, passed it to his son, George Church.

"My father moved to Marion county in 1845, and the drum has been mine since I was a year old," Joseph Church explained.

Funny Book Saved Settler From Execution

Washington.—The story of a book so amusing its reader laughed when death impended and thus saved his life is revealed in the musty records of the War department.

Related by an old Indian chief of the Dakota Indians and recorded in a War department report now yellow with age, the tale has as its major character an unknown Iowa settler who was captured by the red men.

The Indians prepared to kill him. He showed them grains and seeds of various kinds, but they were not interested. Finally the white man pulled a book from his pack and began to read. He grinned, chuckled, finally laughed aloud. Unable to understand a seemingly supernatural being who laughed when death approached, the Indians let him live.

There was one missing link in the story. The name of the book was not given.

Home Accidents Still Menace, Report Shows

Chicago.—Home accidents are still a serious hazard in this country, according to the latest monthly reports of the National Safety council.

While much emphasis is laid on our toll of automobile accidents, this report shows that 11 of the 39 cities reporting to the council during a recent month suffered more home accident fatalities than auto deaths. Among the entire 39 cities, representing a total population of 11,000,000, there were nine home fatalities for every ten accidental auto deaths.

Nearly 50 per cent of these home deaths were caused by falls, proving that this hazard continues into warmer weather. There was, however, a large falling off in deaths from asphyxiation and suffocation, which caused 27 per cent of home deaths in January but only 10 per cent in May.

Among all home fatalities, there are three times as many deaths to children under five years of age as to children from five to fourteen years.

Argue Over Ironing of Shirt; One Is Killed

New Orleans, La.—There's going to be a murder trial here soon because a man objected to his stepson's using electricity to iron a shirt. The stepson, Peter Gendusa, twenty-three, is charged with killing Anthony Lopez, thirty-eight, in the argument.

Trousers Save Life

Bethlehem, Conn.—Homer Somers owes his life to two pairs of pants. Homer wore double trousers when he went wood chopping to protect his limbs from the brush. Hearing a rattle, he glanced behind him just in time to see a rattlesnake strike his leg. The fangs failed to penetrate both thicknesses and Homer killed the snake.

Flying Golf Ball Hurts Attorney

San Francisco.—Archibald J. Treat, prominent San Francisco attorney, was in a serious condition at a local hospital, suffering from a possible fracture of the skull.

He was accidentally hit on the temple by a golf ball at the Mill Valley Country club. The accident resulted from a sliced drive by Taylor Merriman of Mill Valley.

LAWYER TRIES SUITS FOR 98 CENTS EACH

Bargain Prices Are Achieved in Detroit.

Detroit.—Lawsuits are traditionally expensive, but there is in Detroit one lawyer who was able to report to the Detroit Bar association in its annual meeting recently that he has achieved bargain prices. He has cut his total costs per case to an average of 98 cents each during the last year.

He is Louis C. Miriani, attorney and counselor of the Detroit Community fund and director of the legal aid bureau of the Detroit Bar association.

"Last year we reported a reserve of \$35," Mr. Miriani reported. "It was a bad check received as an attorney fee in a divorce case. This item does not appear this year. The trust company reports that it reduced the item by debiting here and crediting there."

Helps Thousands. The legal aid bureau is the salvation of thousands of persons who find themselves entangled with the law and no money to pay an attorney. It deals in tragedy, major and minor.

"Let me quote a letter from one of our more prosperous clients," Mr. Miriani suggested.

"Dear Sir: "If a landlord wants me to move, but I won't, how much notice do I get?"

"If there is any charge for this don't send it, because I won't pay." In quantity of business there isn't a law firm in the city that can compete with the legal aid bureau. How do they get their clients? Let Mr. Miriani tell it.

"During the last year the courts and government officials sent us a total of 2,252 cases; the newspapers, Nancy Brown et al, accounted for 556 more; the social agencies brought in 764, and an army of satisfied customers 3,000 more."

Mistake Its Purpose. Not long ago a newly admitted lawyer called and requested a job with a reputable law firm at \$300 a month. When it was explained that the bureau was to assist poor people, he said, "I thought legal aid meant getting jobs for unemployed lawyers."

"Dear Legal Aid," wrote a trusting mother, "Please send me some cod liver oil for my baby, she needs it bad. Also will I lose my house if I don't pay on the contract . . . her stomach ain't so good, so please take care."

There's a bit of choice legal terminology and an unmistakable desire for action in the letter from a lawyer in a small eastern village:

"Our client says that she has coming \$125 alimony.

"I would say that you should get a writ of arousal to poke him up to pay."

"When you write send some money, or do something."

Childish Marvels in Arithmetic "Fade Out"

An English newspaper gives particulars of the case of a two-year-old Belgian boy, Andre Lenoir, who is able to multiply accurately any two five-figure numbers without hesitation. His is not the only case of phenomenal power in this direction—usually lost as soon as a real knowledge of mathematics is gained. One of these calculating boys was George Parker Bidder, who was exhibited in his childhood as an arithmetical marvel. He became an engineer and was associated with Robert Stephenson. He was a founder of the Electric Telegraph company and became president of the Institution of Civil Engineers. Another wizard who could do anything with figures was Jacques Inaudi, who visited London in 1883. He did not lose his gift as he grew up.

Preserving Johnson Home

At Raleigh, N. C., the city now is improving the home of Andrew Johnson, seventeenth President of the United States, after removing it to Pullen park. The old log cabin gradually will be restored to its original state. Old-fashioned palings have been built around the house, which is now a center of attraction for tourists.

Rand Gold Mining

The gold output in the Rand, Johannesburg, South Africa, is increasing, the production for the first quarter of 1930 being 30,000 ounces in excess of the similar period in 1929.

When Food Sours

Lots of folks who think they have "indigestion" have only an acid condition which could be corrected in five or ten minutes. An effective anti-acid like Phillips Milk of Magnesia soon restores digestion to normal.

Phillips does away with all that sourness and gas right after meals. It prevents the distress so apt to occur two hours after eating. What a pleasant preparation to take! And how good it is for the system! Unlike a burning dose of soda—which is but temporary relief at best—Phillips Milk of Magnesia neutralizes many times its volume in acid.

Next time a hearty meal, or too rich a diet has brought on the least discomfort, try—

MRS. YATES ENTERTAINS

Mrs. Jimmie Yates entertained a few of her friends Friday afternoon of last week with a bridge party. The room was very beautifully decorated with various flowers of the season. Mrs. C. M. Breeding, won high score, a mixing bowl. Mrs. Lewis Lemons second, a large bath towel. The prize awarded for the lucky cut of cards went to Mrs. Jim Kerr, a set of salt, pepper and tooth pick holders. Refreshments were served consisting of fruit punch, frozen Philadelphia salad, crackers and fruit rolls. A color scheme of pink and blue was carried out very artistically.

Those present were as follows: Vestdames: Joe Kerr, Jim Kerr, Clyde Griffith, A. E. Creigh, Jim Nance, Lewis Lemons, C. V. McKnight, Will Savage, J. W. McKee, C. M. Breeding, J. W. Brannon and Herbert Buchanan.

Doreas Sue Lattimore of Sanderson will be among the 113 students who are to receive degrees, certificates and diplomas at the summer quarter commencement held at the Sul Ross State Teachers College, August 23. Miss Lattimore is to be awarded the permanent elementary certificate.—Sul Ross Normal.

Don't say
"no"
to nature

Who's speaking, when kiddies tease for sweets? It's nobody else than Old Mother Nature, who calls for quick energy food. Sugar is most necessary to children. Give it to them freely, but wisely diluted with lots of water, and with fruit juice for flavor and health. Dr. Pepper is the ideal combination; delicious, healthful and safe.

AT 10-2 & 4 O'CLOCK

IT'S WISE TO **CHEVROLET** CHOOSE A SIX

Announcing a new production record

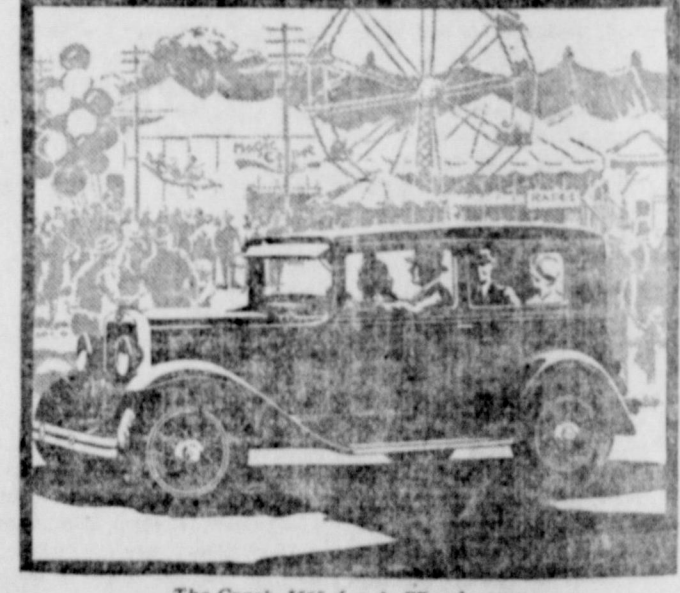

2,000,000 Chevrolet Sixes now on the road

Since January, 1929, Chevrolet has produced and sold over 2,000,000 six-cylinder automobiles—nearly five times as many as any other manufacturer has ever built in an equal length of time.

These 2,000,000 buyers have chosen Chevrolet because it offers many desirable qualities not obtainable in any other car so low in price—

—the smoothness, silence and flexibility of a modern six-cylinder engine—the comfort and roadability of a modern, full-length chassis—and the style, safety and distinction of bodies by Fisher.

Yet, despite these fine car advantages, the Chevrolet Six is unusually economical. Its gas, oil, tire and upkeep economy is unsurpassed. And

The Coach, 1565, f. o. b. Flint factory

any model can be bought for a small down payment and easy monthly terms! Come in today. Learn for yourself why two million buyers have agreed—"it's wise to choose a Six."

Some Distinguishing Features

50-horsepower six-cylinder motor . . . 48-pound crankshaft . . . full-length frame . . . four semi-elliptic springs . . . fully-enclosed four-wheel brakes . . . four Lovejoy hydraulic shock absorbers . . . dash gasoline gauge . . . Fisher hardwood-and-steel body . . . adjustable driver's seat . . . safety gasoline tank in the rear . . . non-glare VV windshield . . . and, for your protection, a new and liberal service policy.

Modern production methods assure high quality

"Lovers' Leap"

ROBERTSON'S FOLLY, MACKINAC ISLAND, MICH.

LOVER'S LEAP MACKINAC ISLAND, MICH.

By ELMO SCOTT WATSON

HAVE you a "Lovers' Leap" in your locality? If you haven't, then it's unique, and you might well capitalize upon that fact and, in advertising to tourists the attractions of your region, assure them that "this is the only place in the United States which does not have among its scenic beauties a Lovers' Leap."

Just how many of these places there are is unknown. But start anywhere in the East and drive West and you'll find plenty of them. There's one between Little Falls and Dunabe, N. Y., a rocky hill overlooking the Erie canal and the Mohawk river. Visit Starved Rock park between Ottawa and La Salle, Ill., and you will be shown a rocky projection "from which an Indian warrior and his sweetheart leaped to death in the river, rather than deliver themselves into the hands of their enemies." Visit Independence, Iowa, and they will tell you that Cedar rock, near Quasqueton, is also called "Lovers' Leap" where "the Indian lovers, Wapsie and Pincon, from whom the Wapsipicon got its name, are supposed to have plunged to their deaths in the swirling waters of the river." And out in Oakland, Calif., they will sell you a post card picture of "Lovers' Leap on the road between Oakland and Knights Ferry where a mythical Indian maiden committed suicide by leaping into the river."

While nearly every township or county can boast of at least one Lovers' Leap, Mackinac Island in northern Michigan has the distinction of having two places where love's young dream found a tragic ending. The guide books will tell you of "Lover's Leap"—This lone pinnacle rises to a height of 145 feet above the waters of Lake Michigan about a mile west of the main part of the city. The legend which gives it its name is that in the long ago the beautiful Lotah, an Indian maiden of the Ojibway tribe and only daughter of a famous chief named Wawonosh, watched from this height the departure of her lover, named Geniwegwon, with a war expedition across the water; and to the rock she came day after day to await his coming. At last the party returning without him, brought word of his death and the distracted maiden not caring for life any longer leaped from this cliff; the lifeless body was found by her father at the foot of the precipice the evening after.

Then there is Robertson's Folly. Where "This told that a young and beautiful Indian girl was wooed and won by this dashing young Lieutenant Robertson, but the poor maiden soon learned that he was to depart for the East at an early date to marry a white girl. He granted her a last farewell meeting at this their trysting place, and in a desperate struggle she succeeded in precipitating him and herself over the cliff."

But if you want the story of a Lovers' Leap with a wealth of detail, go to Linn Creek, Mo., where there has been handed down from pioneer days this tale of Lovers' Leap above the clear waters of the Niangua river before it flows into the murky Osage:

"A century ago the mighty Osage and Shawnee tribes dwelt along these streams. They were fighting enemies, and bones of big-framed giants, war clubs of stone, rusted arrows-heads of curiously fashioned metal and other

LOVER'S LEAP NEAR OAKDALE, CALIFORNIA

LOVER'S LEAP NEAR INDEPENDENCE, IOWA

signs of struggle have been found for years by plowboys as they turned over the rich alluvial soil along the river bottoms.

"Grey Eagle was then a medicine man of the Shawnees; his daughter was Laughing Water. A young warrior of the Osage tribe came up the racing waters of the Niangua in his canoe on a pleasant day, and stopped before the birch bark tepee of Grey Eagle. The head of the young warrior flaunted his eagle feathers; a deer-skin shirt and leggings, and buckskin moccasins encased the form of this young giant. Tails of wild animals hung from a wampum belt and a bow and arrow swung across his broad shoulders. These intimate details have been carefully preserved in connection with the world-old story of "love at first sight."

"Laughing Water rose gracefully to welcome him, but she reckoned without her haughty father, to whom the sight of an Osage was poison ivy. But none the less, Laughing Water had a mind of her own, as daughters of a tribal chieftain should have, and she encouraged the shots from the love arrow of the Osage warrior.

"Day by day the young couple roamed the forest or floated on the silvery waters of the Niangua. Laughing Water sang like birds in tree tops, or laughed till the forest rang with melody as her lover related his stories of wonderful adventure. Then as now, lovers it would seem were prone to spread a glamour around their past.

"The Osage warrior came to friendly terms with the Shawnee braves, as their bitter jealousies vanished before evidences of his skill as a fisherman and hunter and prowess as a warrior. They took him into their council, but old Grey Eagle would not mix medicine potions that would enable him to become a son-in-law.

"Courtship of this pair lasted during the summer, and every means of winning the father's consent proved unavailing. Laughing Water was urged to flee the tribal domain and become one of the Osage people. But her Shawnee blood would not permit, so the young couple decided since they could not live together they would die together. Thus united in the land of the great silence their love would be unhindered by the wishes of a medicine chief.

"Face to face and hand to hand the Indian lovers plighted their everlasting troth, sought a high bluff on the river beneath which the waters formed a great swirling eddy, cast themselves far into the channel and no trace of them was ever discovered."

A similar detailed account of another Lover's Leap, which bears the more prosaic name of Jump mountain, was told in a recent issue of the Lexington (Va.) Gazette, prefaced with this editor's note: "The following article has been contributed by a friend who is satisfied that the account is historical:"

"At a distance of about three miles from the Baths, and easy of access, is the Jump, one of the mountains that form the Goshen pass, gradually rising in height until at the distance of a mile and a half from the river it terminates abruptly, making a depth to the bottom below of two thousand feet, and presents a view as extensive as interesting.

"The valleys of the Baths and Walker's creek were once the favorite hunting ground of the Cherokee tribe. While out on a hunt on one occasion, the Cherokees ventured in what is now known as the Little Calf Pasture, to which their neighbors, the Shawnees across the mountain, claimed an exclusive privilege. They were ordered off, and refusing to go, a fight ensued, which ended in a discomfiture of the Shawnees, who proceeded at once to collect and assemble their braves for another trial at arms.

"After several fights the Cherokees were finally driven through what is now known as Goshen Pass, and continued the fight around the base of the mountain only to be renewed in a more sanguinary form on the highlands of Walker's Creek.

"There the Cherokees organized for the last and final conflict. The Shawnee warriors had concentrated—the onset was made—the war-whoop was sounded, and a defiant shout rang back as a welcome. The arrows whizzed as so many winged messengers of death, and the tomahawk whirling through the air, doing its work of blood, was accompanied with a yell of exultation which noted another brave had fallen.

"Amidst the scene of carnage and death, far above the noise of battle, its savage yells and its death shouts, a wild shriek was heard, and an apparition, with streaming hair and outstretched arms, was seen flying through the air from the mountain summit, only to disappear mysteriously at its base. This strange and supernatural sight was witnessed by the warriors below. They were awestruck. Their superstition was aroused. The fight ceased. A council was called. The calumet was smoked. The tomahawk was buried. A peace was concluded. Both parties believing that the Great Spirit was angry, and had hid his face under a cloud. From enemies they became friends, and as a pledge of future reconciliation, collected and buried their braves in one common mound near the junction of Walker's and Hay's creeks.

"The incident which had caused a cessation of hostilities was as tragic as singular. The Cherokees, aware that the fight would be a severe one, had sent all their squaws and papoose some distance to the rear, except a pretty Indian maiden, whose interest in a young chief had induced her to climb a mountain acclivity nearby, from which she could witness the stirring scenes below. In the hot test of the fight, beholding her chief, whose war-whoop was as well known to her as his warlock, fall by the hand of a fierce Shawnee, in a moment of despairing love, with one wild shriek leaped from the mountain top into the abyss below, following her favorite chief to better hunting grounds. From this incident the mountain obtained the name of Jump. The Indian mound almost level with the ground, is well remembered by some old persons in the vicinity when it was 30 or 40 feet high, showing the mortuary list on that occasion of the Cherokees and Shawnees to have been large."

Improved Uniform International Sunday School Lesson

By REV. P. B. FITZWATER, D. D., Member of Faculty, Moody Bible Institute of Chicago (© 1938, Western Newspaper Union.)

Lesson for August 24 JONATHAN AND DAVID: A NOBLE FRIENDSHIP

LESSON TEXT—1 Samuel 18:1-4; 20:14-17, 22, 34, 43, 42; 11 Samuel 1:17-27. GOLDEN TEXT—A man that hath friends must show himself friendly and there is a friend that sticketh closer than a brother. PRIMARY TOPIC—Two True Friends. JUNIOR TOPIC—David and Jonathan, Friends. INTERMEDIATE AND SENIOR TOPIC—Finding Worthy Friends. YOUNG PEOPLE AND ADULT TOPIC—The Friend Who Does Not Fail.

The friendship of David and Jonathan has become immortalized in the world's thought. It was unique in that it occurred between two men of rival worldly interests. Jonathan was the crown prince, heir to the throne according to hereditary rights. David was heir by divine choice and arrangement. Jonathan knew this and magnanimously waived his natural personal rights in favor of the one he knew God had chosen.

1. Friendship Established Between David and Jonathan (1 Sam. 18:1-4). 1. Love at sight (vv. 1, 2). Following the interview of Saul and David, after the victory over Goliath, Jonathan's soul was knit with that of David. He loved David as his own soul. While there was mutual love, this pleasing trait stands out more prominently in Jonathan than in David.

2. A covenant established (vv. 3, 4). The bringing of David into Saul's home gave opportunity for expression of love between Jonathan and David. This love resulted in the establishment of a covenant between them. Following this love covenant, Jonathan stripped himself of his court robe and his equipment and gave them to David. This act was a virtual abdication of the throne to David.

3. Jonathan Decried David Against Saul's Frenzy (1 Sam. 19:1-7). David went into the battle with Goliath out of zeal for God and true religion, not for personal glory, but it turned out as always, that because he put God first, God honored him. On David's return from victory over the Philistines, according to oriental custom, he was met by a triumphal chorus of women of all the cities of Israel, chanting praises to him for his victory over their enemy. They ascribed more praise and honor to David than to Saul. To hear sung the praises of a shepherd boy as surpassing his own was too much for Saul. It aroused murderous envy which had been slumbering in his heart and moved him to attempt twice to kill David. This is not an imaginary sin. Its counterpart may be found in many of our own hearts. The only cure for this dreadful evil is to put God first—to think more of him and our duty to him than our reputation before men. In Saul's third attempt to kill David, Jonathan defended him before his father, from whom he secured the oath that David should not be slain.

4. Jonathan Revealed to David Saul's Murderous Attempt (1 Sam. 20:30-40). The beginning of the new moon was celebrated by sacrifices and feasting at which all the members of the family were expected to be present (v. 5). David's excuse for being absent was that he might go home to attend the yearly sacrifice of his family. The annual feast was more important than the monthly feast. Matters were now so serious that Jonathan and David renewed the covenant between them. In this renewal the terms were broadened beyond the life of Jonathan (vv. 14, 15). Saul's anger was now so fierce that for Jonathan to be found in David's company was most dangerous, so he cleverly planned a sign by which he could make known to David Saul's attitude and purpose. True friendship is proven in warning those who are exposed to danger.

Concerning friendships, observe: 1. It should be made while both parties are young. This is the time when hearts are capable of being knit together. 2. Real friends are few. Great care should be exercised in the formation of friendships, for while loving everybody, it is possible to have only a few friends. 3. Both parties must be God fearing. David and Jonathan both recognized their obligation to the Lord, and that his help was essential to the welfare of both.

IV. David Mourns for Jonathan (11 Sam. 1:17-27). When David learned of Jonathan's death he sincerely mourned, remembering his undying loyalty and his personal worth.

Love is the Conqueror Love alone in this world is the conqueror; by love alone can the nations of the world be brought into the paths of peace; to pursue and to attain love is to pursue the one thing needful to attain the only thing in the world.—Rt. Hon. Stanley Baldwin.

God's Presence or Absence I think I can say, through grace that God's presence or absence alone distinguishes places to me.—William Burns.

Are You Traveling?

Use Cuticura Soap and hot water to remove the dust and grime and thoroughly cleanse your face. Anoint with Cuticura Ointment if there is any irritation, roughness or pimples. Cuticura Talcum is refreshing and cooling.

Proprietors: Fetter Drug & Chemical Corp., Malden, Mass.

Concertina's Centenary

The concertina celebrated its centenary last year. It was invented and patented by Charles—afterward Sir Charles—Wheatstone in 1829. He must have been a wonderful man, for his inventions seem to have been legion. Sir Charles invented for example, the stereoscope, by which the appearance of solidity is obtained through the mental combination of two pictures, and the polar clock, which made it possible to tell the time by the light from the sky although the sun might be invisible. It was he who made the electric telegraph available for the public transmission of messages. And in between his scientific studies he sandwiched the invention of our little musical friend the concertina.

Monster Skyscraper

The new Chrysler building in New York is 71 stories high and topped by a 185-foot final spire of stainless steel weighing 27 tons. From the sixty-first floor setbacks the Chrysler tower changes into a multi-arched dome which finally converges into the needle-like final. The 8 elevators have a speed of 1,000 feet a minute. The total floor area is about 1,200,000. The total load of the building, including all live and dead loads, is equal to the combined tonnage of three large battleships—112,800 tons. About 21,000 tons of structural steel were used. It rises 1,044 feet above the curb line.

Peace Memorial

The National Association of Gardeners is planning an international peace garden as a permanent memorial commemorating good will between the United States and Canada. The idea is the conception of Henry J. Moore of the Ontario department of agriculture. The garden is to be located at some spot accessible to the peoples of both countries. A committee has been appointed to collect \$5,000,000 by popular subscription.

Interpreting the Wren

"I don't know much about this stuff they call bird lore," says Uncle Amariah, "but I've been listening to a wren out our way, and I find that his song is to be interpreted about as follows:—'If I were just a little bigger I'dock that cocky robin and get mesome of those cherries.'" — Lafayette Journal and Courier.

Speeches

"Do you think that a man's political influence depends on his ability as a public speaker?" "Not altogether," answered Senator Sorghum, "I have found that the speeches which sometimes counted for most were made in strictest privacy."

Eoosting Stamps Wanted

Postage stamps bearing attractive pictures of Britain which would attract tourists have been proposed to the postmaster general. Scenes of landscapes, flowers and animals would be used. One enthusiast says that the pictures would also brighten stamp albums throughout the world.

The cotton industry has some part to play in more than one-fourth of America's business activities.

Miscellaneous Shower

Last Friday evening Mrs. E. P. Peeples of Dryden gave a miscellaneous shower honoring Mrs. Jess Haley and Mrs. Luther Clark, from 3 to 5 p. m.

After a very pleasant evening Mrs. Peeples served cake and ice cream to the following guests: Mesdames M. G. Northcut, C. C. Chambers, Lon Chambers, A. A. Henning, A. F. Buchanan, Presley, W. R. House, Waterhouse, Jess Haley, Luther Clark. Mrs. Haley and Mrs. Clark received many useful gifts.

Mr. and Mrs. H. B. Ballard, parents of Mrs. O. C. Traweck, who have been here for some time, left for their home at Nacogdoches, Thursday of last week.

Mr. and Mrs. Joe Kerr made a business trip to Dryden last Thursday evening.

Birthday Party

W. J. Banner celebrated his birthday Monday on the ranch with a barbecue dinner consisting of goat. They also served chicken, salad, cake, pies, watermelon, coffee and ice tea.

His family was down, also Mr. and Mrs. Robert Duncan and C. A. Morland.

STOCK NEWS.

One day this week Russell Menzie shipped two cars of sheep to Fort Worth market.

Loyd Brandenburg shipped four cars of sheep this week to Dunkinville, Texas. They were purchased from Arvin and Corder.

Bill Johnson of San Antonio visited his brother, H. D. Johnson, several days last week.

Mr. and Mrs. J. C. Brewer left Tuesday of this week for their home in Nacogdoches. Mrs. Brewer is a sister of Mrs. Traweck.

Mr. and Mrs. R. E. Stirman left Monday morning of this week for a vacation in California. While away they will visit in Los Angeles, San Diego and other points.

Mrs. Luther Clark and two boys left Sunday of this week for Cline after spending several days with her parents, Mr. and Mrs. A. A. Henning of Dryden.

Mr. and Mrs. A. A. Henning of Dryden left Tuesday for Eagle Pass to work on a ranch there. Mr. and Mrs. Blalock are occupying the Henning home.

Mrs. J. W. McCloud, proprietor of the Dryden Hotel, left Sunday of this week for Balmoray, where she will make her home.

Mr. and Mrs. Robert Doak was shopping in Sanderson Saturday.

Save money and keep it at home. Let us do that next job of printing for you. The Times.
