## Oath Of Office Is Taken By Judge Montague At His Home In Del Rio Monday Jan. 2

Declaring that he saw no need of impaneling a grand jury, Judge Brian Montague Monday morning dismissed those summoned for jury duty and recessed court until the third week in January since his physicians have ordered him to rest and regain his strength before assuming his full duties. Monday was the first day he had been out of his home since his recent illness. The criminal docket has been set for January 16, at which time Judge C. S. Sutton from the Marfa district will relieve Judge Montague on the bench.

Judge Montague took his oath of office Monday morning at his home on Pecan Street, the oath being administered by County Judge Roger H. Thurmond.

Judge Montague began his studies for his career in 1913 when he enrolled in the School of Law at the University of Texas. Before he began his practice, he enlisted for service in the World War and saw service overseas as a second lieutenant, being engaged in the Chateau Thierry, Verdun, Meuse Argonne and Marne sectors.

On his return to the United States, he began his law practice with the firm of Kampmann and Barney in San Antonio, exactly 12 years and one day before he took the oath as district judge.

In 1922 Judge Montague was elected District attorney of the 3rd Judicial District and was re-elected to that office in 1923. In 1929 he removed to Del Rio, where he has resided since that time, having offices in the First National Bank Building.

Opening court Monday morning, Judge Montague formally thanked his friends for their support and briefly outlined his plans for the next three weeks.

Mrs. Belle Sutherland, court reporter during the past seven years, was re-appointed to that office by Judge Montague Monday morning.—Del Rio Evening News.

Lemons of this city.

## REGAN PLANS LAW ON LAND TITLE FLAWS

### New Senator Outlines Views On Pending Legislation

PECOS, Texas, Dec. 31. (AP)—Legislation to validate title to approximately 8,000,000 acres of mineral classified lands in West Texas will be the primary goal of Senator-elect Ken Regan of Pecos when he goes to the Legislature in January.

Mr. Regan, who won his first State race over a field of four opponents in the first primary, outlined his views on certain matters that will come before the Legislature, in an address before the Pecos Chamber of Commerce, of which he was twice the presiding officer.

"I believe that clarification of the land title dispute is of absolute primary importance to my district," he said. "For the reason that many thousands of West Texas citizens are facing financial ruin unless a constitutional validating act is passed immediately. Thousands of these people, who face State-instituted law-suits amounting to bankruptcy are even now ignorant of their plight. Supreme Court rulings which voided the Small land bill of the 42nd Legislature have left them without a valid title to minerals on land they have owned for as much as 20 or 30 years; have stopped oil development in a large part of my district; and have threatened every property owner in the counties where such lands are located with a financial crisis. My first task, therefore, will be to exert every bit of my ability in an effort to clear this great obstacle."

Mr. Regan declared that next in line was the matter of working out some equitable and fair basis of compensation for Texas sheriffs. "Because of abuse the entire fee system is facing discard," he said. "If such action should be taken sheriffs in many of our large West Texas counties would be unable to carry the expenses of their office from the meager salaries now paid, much less receive just compensation for their services."

In regard to the general proposition of a sales tax for balancing the State budget, he said that he believed the idea of a sales tax right in principle. Touching upon a change in the dry laws he said: "It appears to me that the recent election indicated definitely that our people are in a mood for a change—in other words that there is a 'wet' sentiment in the State."

Senator-elect Regan represents the State's largest district. It includes 27 counties, extends for 600 miles in one direction, and represents the State's vast cattle, mineral and agricultural resources.

## DETACHMENT OF FIRST CAVALRY LEAVES MARFA

### Funds Not Available For Transportation Of Families

MARFA, Jan. 2. (AP)—A motor convoy transporting personnel and equipment of the first cavalry, one of the oldest regiments in the United States army, left Fort D. A. Russell here today for its new assignment at Fort Knox, near Louisville, Ky.

The convoy of 65 trucks and automobiles carried about 400 enlisted men and five officers of the organization, which will be mechanized after it reaches Fort Knox. Tonight a halt was scheduled at Dryden, 95 miles from Marfa. Tomorrow night the convoy is expected to reach Fort Clark.

Before its departure the first cavalry destroyed a quantity of blankets, mattresses, overcoats and other wearing apparel which officers said were unfit for further use. A supply of old T. N. T. was detonated officers said its age made transportation dangerous.

Seventy-seven enlisted men with families and 22 officers remained at Fort D. A. Russell. The officers will be assigned to other posts and arrangements were being made to move the men. A problem existed in the fact that funds were unavailable for moving families of the enlisted men.

The convoy is scheduled to reach Camp Knox January 16. This convoy of trucks passed thru here last Friday enroute to Marfa and again through here Monday afternoon on their return trip to Camp Knox. C. V. McKnight, local Sinclair agent, serviced the trucks here with oils and gasoline.

## JIM FERGUSON IS IN FAVOR OF SALES TAX

### Frank Inflation Of Currency Advocated At Co-op Meet

DALLAS, Jan. 3. (AP)—James E. Ferguson, former governor of Texas and C. O. Moser, vice-president of the American Cotton Co-operative Association today expressed approval of a general sales tax.

In an address at a meeting of farmers under the auspices of the Texas Co-operative Council and the Texas Farm Bureau Federation, Ferguson gave commitment to that scheme of taxation and extended his remarks to propose abolition of interest charges, the non-issuance of tax exempt securities and the frank inflation of currency.

Applause greeted the proposal of Ferguson that "farmers organize a trust like the bankers, the lawyers and all classes of industry."

"And if the government doesn't permit this agricultural trust to arbitrarily set prices and production," he continued, "the government should be overthrown. For, if the farmer is not permitted to save himself in some manner, chaos will be just around the corner."

He declared that the Ferguson administration is searching for some manner of raising \$35,000,000 in tax revenue to substitute for the ad valorem system of taxation in Texas.

### EMPRESS TO BE SOLD

Reports were current here Wednesday that the Empress Confectionery, which went into bankruptcy sometime ago will be sold here next Tuesday.

A hearing of the creditors were held in San Antonio on December 15th.

Miss Mary Ellen Bohlman, who is teaching at Burton, Texas, spent the Holidays here with her mother, Mrs. W. F. Bohlman.

Saturday afternoon Judge Joseph Jones adjourned court and signed the minutes to conclude 17 years and one month of service as judge of the 63rd Judicial District. Judge Jones was appointed and qualified as judge of this district on December 1, 1915, at which time the district was comprised of nine counties, meeting at Fort Davis, Marfa, Alpine, Fort Stockton, Del Rio, Uvalde, Brackettville, San Angelo, and Eagle Pass.

Licensed to practice law by the District Court of Maverick County in Eagle Pass on September 3, 1883, Judge Jones has practiced law and sat on the judicial bench for 49 years. He practiced law in Brackettville until July 12, 1886, when he located in Del Rio.

At that time he planned to go to El Paso, but as he was ready to board the train, friends of his from Del Rio arrived and told him that they were leaving the city and wanted him to take over a number of cases they had been engaged for.

Agreeing to handle the cases, Judge Jones abandoned his plan to forming a partnership in El Paso and took over the offices of his friends, located at that time in a frame building on the corner of Main and Greenwood Streets. At the conclusion of that term of court, Judge Jones had more business than he had contracted for when he first came to Del Rio, and so concluded that he would make his home in this city permanently.

Completing his work Saturday, the judge declared, "I feel like a kite that has had too heavy a leaden load on its tail and now that the load has been released I am ready to fly. I shall open an office in the Jones Building for the practice of law and I will be pleased to meet my friends there and give them such advice and assistance as shall lie within my power." Judge Jones concluded.—Del Rio Evening News.

THE TIME FOR SUMMING UP

Three years of depression have ended and we can begin to sum up. Hard times have brought ill winds—but they have also brought some healthful breezes.

Businesses and individuals have been forced to "write down" fictitious valuations and standards. This has naturally caused a great deal of hardships and a long black list of bankruptcies.

Those who expanded and operated on the principle that that which goes up need never come down, and that boom prosperity would continue unabated forever, had to be deflated.

The individual has found that it is possible to live happily and comfortably on a pre-war basis. He has found that the arbiter of wages is what the dollar will buy.

These are the "healthful breezes" of depression. The decks have been cleared for action, and the way to recovery is open.

As for the problems of depression, they are still vital and intense. Writing in the Yale Review, Sir Arthur Salter observed that 1933 will be one of the most crucial years in modern history.

The pressing and increasing of weight in taxation stifles the capital (industry) of the world, creating unemployment and preventing industrial expansion and the further investment of money.

The burden of armaments, with their drain on national incomes and their constant threat to world peace, grows greater. In every important country the cost of wars past, present and future, is the major item in the national budget.

The question of foreign trade looms large on the economic horizon. In normal times, foreign sales amount to ten per cent of the gross in this country—and ten per cent is the margin between profit and loss in the average business.

Today foreign trade is almost non-existent, due largely to a new and intense spirit of economic nationalism which finds its expression in tariff wars and embargoes.

Almost every economist of distinction, here and abroad, stresses the need for revitalizing foreign trade as a factor in the work of recovery. Tied up with this is the problem of silver, which effects the purchasing power of half the world's people.

NATION'S LAW MAKERS SEEN AS HARD WORKERS

Banker Tells of Labor Put in by Members of Congress on Masses of Technical Measures

OUTLINING legislative procedure, Robert V. Fleming, President Riggs National Bank, Washington, D. C. gave the recent convention of the American Bankers Association a description of the difficulties and problems confronting the law-makers.

"The most important part of organization of the two branches of congress is selection of standing committees. There are 34 standing committees in the Senate and 46 in the House. These are the workshops of Congress and the real work of lawmaking is done in Committee Rooms.

"The task of legislating for 124,000,000 people is a tremendous one. Of recent years approximately 29,000 bills are introduced annually in the two Houses. Only a small percentage become law, but they must be weighed in committee, accepted or rejected, perhaps amended, reported out, and then considered on the floor.

"Lawmaking involves about 99% of hard and unattractive work and about 1% of oratory. Few tasks appear so easy and are so difficult as enactment of sound and satisfactory legislation. Few individuals in any line of activity work harder or longer hours than the chairmen of the important committees during a session. I have great sympathy for the members of Congress whose constituents expect undivided attention to every piece of legislation in which they may be interested.

Public Hearings "When a bill is introduced, referred to committee and printed the next step, if it is a measure of considerable importance, is to conduct a public hearing.

"Due to pressure of work and the fact that it is impossible for members of Congress to be technical experts on every subject of legislation, the committees are inclined to give consideration to the merits of arguments presented in testimony and the recommendations of the Cabinet and other officials.

"We sometimes complain about the technicalities of legislation, but when we observe organized minorities endeavoring to force class legislation through one House it is a comfort to know such measures may be caught in the meshes of technical procedure in the other and there suffer what is termed automatic asphyxiation."

Mr. and Mrs. Jeff Sessoms of San Antonio were visitors with Mr. and Mrs. H. D. Williams this past week and this week.

## A Country Editor Looks at Banking

THE editor of the Norwalk, Ohio, Herald takes a somewhat different view of the banking situation from a good many people. His idea is as follows:

"With rents falling and unpaid, real estate does not present a happy picture. Nor does the owner of carefully selected bonds feel any happier, with a bunch of them going wrong. A lot of folks very carefully invested in preferred and common stocks in the finest companies in the world and have seen them fall to perhaps a tenth of what they paid for them, and no dividends at all. Some folks kept their money in savings accounts in banks, and some banks have closed and left them high and dry. But the situation is worth looking at very carefully.

"On government authority, most banks that closed were really solvent but for frozen assets and popular timidity. Gradually the closed banks are coming out from under and depositors in even bad cases will get at least 50 per cent of their savings. That's tough of course; nobody likes to lose half of what they had scrimped and sacrificed and saved. But when you hoard and stick the roll of bills in a coffee pot or under a mattress, some plug-ugly comes along and burns your feet till you tell him to take it and welcome.

"And what about the great majority of banks that weathered the storm, met all comers and are doing business as usual, carefully and conservatively, but safely? What about the savings in those banks? They are a fall 100 per cent today—and they are the only thing we know of at 100 per cent anywhere. After all is said and done, a good well managed bank is still the best place in all the world for money or savings. Right now in Ohio the banks pay the taxes on all savings and pay their depositors not interest on their savings. We can't think, just now, of many other investments that are a tenth as safe as a savings account in a solid bank. Why, even a savings account in a closed bank is actually worth more today than most stocks."

Mr. and Mrs. F. L. Burnside have as their guests his mother and father, Mr. and Mrs. Homer Burnside of Malta, Illinois, his brother and wife, Mr. and Mrs. V. H. Burnside of Chicago, Illinois.

Vernon Buchanan was a week end visitor in Del Rio.

DENTON, Jan. 5.—Meat is a food which is almost universally used and liked. It is eaten primarily for its lean content, though its palatability is influenced by marbling, or the depositing of fat within the lean tissues.

One of the chief problems in the cookery of meat is to prepare it in such a way as to retain as much of the natural flavor as possible. The flavor is found in the juices within the muscles. To retain the juice the meat is seared at a high temperature; a small amount of the fat from the meat can be used to sear it.

Meat may be prepared in many ways. To add variety to the menu and at the same time practice economy, use some of the tougher and more unusual cuts. The various organs of the animal may be used, and delicious as well as nutritious dishes prepared.

## MENUS

Breakfast: Oranges, bacon, toast, coffee, milk.

Lunch: Brain oysters, potato puffs, spinach, popovers, preserves and milk.

Dinner: Spanish steak, rice, turnips, bread, butter, and baked apples.

Breakfast: Cream of wheat with dates, scrambled eggs, muffins, coffee, and milk.

Lunch: Cream of pea soup, combination salad, rolls, butter, chocolate and vanilla wafers.

Dinner: Rolled flank steak, baked potatoes, carrots, bread, butter and moulded fruit salad.

## RECIPES

Spanish Steak: 2 lb. beef steak, 1-2 c flour, 2 T fat, few slices of onion, salt, pepper, 1-2 green pepper chopped, 1 c boiling water, 1 c canned tomatoes. Add salt and pepper to flour and pound into meat, using edge of plate or wooden potato masher. Heat the fat and sear the meat in it. Remove to cas-

serole, add onion, green pepper, water, tomatoes and cook at 350 degrees F until tender.

Rolled Flank Steak: 1 1-2 lb. flank steak, 1-2 c flour, salt, pepper, 2 c corn bread crumbs, 1 egg, 1 onion, 2 stalks of chopped celery, seasoning. Make a dressing of the cornbread, egg, onion, celery and seasonings. Trim steak and dredge with flour pounding all the while. Sprinkle both sides with salt and pepper. Cover one side with dressing about one inch thick and roll so that fibers of the meat run lengthwise. Fasten with cord or steeper and placed in baking pan. Cover with water and cook for about 3 hours.

Brain Oysters: 1 brain, 2 eggs, 1 T milk, salt, corn meal, parsley. After the brain has been parceled separate into pieces about the size of large oysters. Dip in slightly beaten egg, to which 1 T of milk has been added and then roll in seasoned crumbs. Fry in deep fat; serve garnished with sprigs of parsley.

Baked Liver: 2 lbs. of liver in one piece, 1-2 t salt, 1 medium onion, 4 strips of bacon. Soak liver in cold, salted water for 30 minutes, or until the blood is removed. Take off outside skin if it is tough. Place in covered roasting pan. Salt and cover with slices of onion and strips of bacon. Bake in a moderate oven until the liver is done. Allow about 30 minutes per pound for baking.

## Just around the Corner

**EVEN** big-city folks must have their "neighborhood stores"! Most of them would no more think of going down town to fight their way through the crowds in search of a roast for dinner than they would of walking to the factory to get a pair of shoes.

City women know that their neighborhood stores can supply them just what they want — and that, in most cases, the service is more alert and friendly.

The same thing is true of this "neighborhood". Our merchants—the men whose ads you read in this paper — are in position to furnish your home with the best and most popular brands of goods. Not only can they save you money, but they gladly relieve you of a lot of worry and loss of time.

### Culver Academy Offers Scholarship To Texas Boys

Announcement of a valuable scholarship open to Texas boys who are in the 8th grade has been received at the principal's office of the local high school. It is one of four offered this year in Culver Military Academy by the Academy's trustees in memory of the wife of Culver's founder, Mrs. Emily Jane Culver.

The scholarship is rated among the highest prizes offered in any secondary school. It is valued at \$4,500 and covers all expenses for tuition, board and room for three years. The winner will be at no expense during his attendance at Culver except for wearing apparel, books and personal necessities.

The scholarship will go to the winner of a state-wide competition which will be conducted under the direction of a committee of Texas educators, of which Prof. Fred C. Ayer, professor of educational administration of the University of Texas is chairman. His associates are Dr. Norman R. Crozier, superintendent of schools of Dallas; Dr. C. E. Evans, president of Southwestern State Teachers College; Dr. R. L. Marquis, president of the North Texas State Teachers College; Dr. E. E. Oberholtzer, superintendent of schools of Houston; D. A. Shirley, registrar of West Texas State Teachers College; and Dr. Sam H. Whitley, president of East Texas State Teachers College.

Preliminary examinations will be held on March 18th in twenty-eight Texas towns selected as examination centers.

These centers are—Abilene, Alpine, Amarillo, Austin, Beaumont, Breckenridge, Brady, Brownsville, Dallas, Del Rio, El Paso, Fort Worth, Houston, Huntsville, Kingsville, Laredo, Lubbock, Matador, Midland, Nacogdoches, San Angelo, San Antonio, Texarkana, Tyler, Uvalde, Victoria, Waco and Wichita Falls.

Each candidate whose application is approved must stand this examination. A certain number of candidates who make the best records in the preliminaries will be selected to appear before the committee in person for final examination about May 6th.

Applications must be filed not later than March 1st with the scholarship secretary of the Academy in Culver, Ind.

Scientific methods of selection will be employed in this competition on a wider scale than in any previous scholarship awards.

The successful candidate must achieve, in tests devised by leading educators and psychologists, above average ratings in personality, emotional control, life purpose, social adjustment, originality and leadership as well as in the qualities of mentality expected of a scholarship aspirant.

The general requirements are that applicants must be recommended by the principals of their schools as outstanding students worthy of the committee's consideration; that their parents be unable to pay their tuition in Culver, that they be between 13 and 15 years of age, and that they be 8th grade students.

With these qualities required for a start and the tests applied in the course of the preliminary and final examinations, it is certain that the boy who wins the Texas scholarship will have to demonstrate stern and durable stuff. His scientifically tested capacities for achievement will unquestionably be far above the average.

The other states in which Culver scholarship competitions are being held this year are Iowa, Tennessee and Wisconsin.

### Angelo Credit Bank Leads In Cash Paid Out

SAN ANGELO, Jan. 3.—All applications on file at the San Angelo branch of the Regional Agricultural Credit Corporation are expected to have been acted upon by the appraisal analysis department by this afternoon, thus giving the local bank a clean slate on applications. Only 14 applications had not been checked by the appraisal department at the close of business Dec. 31.

Results of establishment of the government corporation here are seen in a comparison of the business done here and that at Fort Worth and Houston. At the close of the year the San Angelo branch had actually disbursed \$1,135,677.63 and had approved 368 applications for \$3,482,340.50 while Fort Worth main office had disbursed \$582,797.76 and had approved 216 loans for \$974,602.16 and Houston's branch had disbursed \$260,389.19 and approved 376 loans for \$379,919.65. The loans at Houston are running in smaller denominations. Total cash loaned out at San Angelo lacks only \$150,000 of being double the total disbursed at Houston and Fort Worth.

A total of 1,061 applications has been received here. Reduction of the interest rate, effective now, is expected to cause another increase in the number of applications.

They grow 'em big in the wide open spaces of the Big Bend country home of the finest range herds in America.

Despite the fine condition and weight of the cow she brought less than \$30, the price paid being 5 cent and three quarters a pound.
