

Council Names City Manager

A. L. Outland; Retired Officer Lands Position

ARLEY L. OUTLAND New city manager

Arley L. Outland was named city manager Monday night following an interview by the city council.

He will assume his duties in Friona Friday morning and will be assisted for a short time by Albert Field, outgoing manager.

Outland, a retired Army Lieutenant Colonel, presently resides in Oklahoma. He is the brother of Hank Outland of Friona.

He has had no experience as a city manager but has served in many positions of responsibility in the Army.

Outland was born at Wewoka, Oklahoma May 27, 1915. He attended and graduated from Wewoka High School in 1934 and entered the University of Oklahoma in the fall of 1935.

After working his way through college, he graduated from the military department in 1939 and received a commission as Second Lieutenant, Field Artillery. He entered active duty in June, 1940.

He was a member of Kappa Kappa Psi, National Honorary Band Fraternity while at the University of Oklahoma and is a member of the Presbyterian Church.

He served as battery and battalion commander of Field Artillery units in 1942-43 and 1953-54. He was stationed at Fort Jackson, S. C. and Hokkaido Island, Japan.

During 1954-55, he was assigned as Division Inspector General in Honshu, Japan, and enjoyed a similar assignment at Fort Sill, Okla. in 1960.

He was assigned to Division Artillery combat intelligence staff in 1944-45. He served in this capacity at Fort Bragg, N.C. and in combat areas in the European Theatre.

In addition to serving as pro- (See Manager, Page 2)

Elementary Teachers Attend Reading Clinic

The accent was placed on reading speed and comprehension at the reading clinic in Odessa which was attended by two Friona teachers Friday and Saturday.

Miss Jo Phillips, third grade teacher, and Mrs. Juanee Green, fourth grade, recalls the new machines and methods shown at the clinic with anticipation.

"They (reading machines and methods) are sure to be in widespread use before long," Miss Phillips commented.

The purpose of the clinic was to acquaint teachers with new media and techniques of instruction and to show how these new methods can be successfully incorporated into the reading program of today.

One of the speakers at the clinic was Dr. Dorothy Kendall

Braken, director of the Reading Clinic at Southern Methodist University. She is also the author of numerous books and articles on the subject of improving reading skills.

Stanford E. Taylor was also called upon to address the group. He is president of the Education Development Laboratories Inc. in Huntington, N. Y. In addition to writing several books, he is the inventor of several machines which serve as aids in improving reading ability. Some of his machines were demonstrated at the clinic.

A "Scanner" was one of the machines shown. A small oval of light moved vertically down the left side of a page at a moderately rapid pace and the student is required to quickly glance at the sentences in order

to keep up with the light. Another machine which is reported to be of appreciable aid in improving reading skill is a "flasher." It flashes numbers or words on a screen at a very high speed and the student must attempt to comprehend the content. The machine may be adjusted for various speeds and students are grouped according to their progress.

"The machines will be a great help because of the need for speed and because of the great volume of material that must be covered by professional men," Miss Phillips said.

"Some of these machines are being used now by doctors, lawyers and industrialists," Mrs. Green added. She has been (See Teachers, Page 2)

While looking back through our old files, we noticed that this is the anniversary of the tornado which swept through the county and town last year. Seems like we have been spared any such similar disaster this year. In fact, if the weather doesn't get too cold, we will have seen one of our better years, according to what long-time residents tell us.

The sudden twister last year swept through the town and countryside leaving a trail of destruction. It ruined crops, blew down a drive-in theatre and turned trailer houses over.

We sure are thankful that such tumultuous weather has not been repeated. In fact, we are knocking on wood now.

Maybe tornadoes won't strike in the exact spot twice either.

-TH-

We managed to get down to the school Monday night to attend the meeting of the school board. Now, we have been in a good many meetings of similar bodies but never have we seen one operate with such an acute sense of responsibility.

These men on the board really impressed us with their attention to details concerning the operation of the school. Everything transacted was done with the taxpayer in mind. This is not always the case with bodies in a similar position.

We think Friona is fortunate in this respect.

Much of the Monday meeting was given over to discussing the need for a new field house for the football teams. We certainly agree with the general feeling that something needs to be done about the present conditions which the players must work under here.

Friona probably has the poorest housing facilities for their football squads of any school which our teams will meet. The old barracks building has just about seen its last days. The song about "This Old House is Getting Old" couldn't apply more to any other building.

The players just don't have room to store their equipment, or to move around properly while getting dressed for practice and games. Approximately 100 boys, including the seventh, eighth and freshman teams must use the building, which is roughly 100 by 25 feet, to store their gear, change and shower in.

This just isn't enough room.

Now the school board can't upset the budget by jumping in and spending money to improve conditions this year. And it is a little late in the season.

But, some improvement definitely needs to be made before the next season gets under way.

Anyone who isn't in full agreement with us and isn't willing to support a move to improve conditions for the team should just walk through the building some evening. One look at the splintered floors, inadequate shower facilities and cramped quarters should be enough to change their minds.

After a person looks at the building, we shouldn't have to say another word. If he (or she) is not prejudiced by some antagonistic attitude, he will call or personally speak to one of the school board members and request that some action be taken before the next season, or as soon as conditions will permit.

-TH-

It seems like our Alma Mater is in about the same condition as Friona is when it comes to winning football games.

Tech managed to keep the A & M teams backed up for the two years before being admitted to Southwest Conference play but was held to a 14 to 14 tie in the rain-soaked game at College Station last year.

In the battle at Tech last Saturday, there seemed to be no question as to which team was going to go the farthest this year. A & M really lowered the boom in the one-sided flasco when it came to scoring.

We didn't get to watch the game but, considering the outcome, listening to it on the radio was heart-breaking enough. We would probably have been very hoarse from yelling as well as having gnashed fingernails if we had been at the game.

I suppose we will just have to continue to look to the future. We have had plenty of practice during the past years.

Boosters View Bowl Movies

Friona Boosters Club watched movies of the 1960 Cotton Bowl gridiron battle between Texas University and Syracuse at their meeting last Monday.

Sound and color movies of the 1957 game between Syracuse and Texas Christian University will be shown at the next meeting in the school cafeteria Monday at 7:30 p.m.

There were 38 members in the club who had paid the \$2 dues agreed upon by the organization when the by-laws were accepted last week.

Tickets for the West Texas State College and Hardin-Simmons game are expected to be available this week, according to Raymond Cook, high school principal.

The Boosters Club is completing plans to furnish transportation and refreshments for all the football players for the Student Day game at Canyon Oct. 21.

Tickets will be 50 cents for any student, teacher or parent who takes a student to the game. The club is making tentative plans to leave from in front of the high school at 5 p.m. in order to arrive in ample time for the 7:30 kickoff.

Tickets will be a block of reserved tickets which will allow all of the visitors from Friona to be seated in the same section. Tickets may be obtained from the school principals, Superintendent, or Booster Club.

Special

Any farmer who is interested in increasing his cotton acreage by 25 per cent should appear at the Hub Community House Monday night at 8 p.m.

VFD Starts Candy Sales

Friona's Volunteer Fire Dept. will begin a door-to-door candy sale to raise funds to help pay for the new fire truck which the Panhandle Firemen's Association has purchased for the Boys Ranch at Amarillo.

The candy will sell for \$1 for each one and one-half pound bag. Varieties salt water taffy, cinnamon, chocolate and licorice. Six varieties will be included in each bag.

Firemen will start on the drive at 6 p.m. and offer the candy to as many people as possible. Later purchases can be made from any member of the department.

In order to pay the Friona share of the truck, \$12,600 are needed. The truck will be delivered to Friona April 20, 1962 and will be delivered to the Boy's Ranch on the second Saturday in May, Ralph Shirley, fire chief, reported.

THE LADY THINKER . . . Miss Beth Akens gives a moment of deep thought to the essay which she will write for the Daughters of the American Revolution Good Citizen essay contest.

Beth Akens Chosen For Contest Entrant

Beth Akens, 16-year-old senior, will write the essay which will represent Friona High School in the Daughters of the American Revolution Good Citizen

essay contest. Miss Akens will write her essay of 300 words or less on the subject of "A Republic--If You Can Keep It." This is the subject selected by the DAR for all essays in the current competition.

The topic is reported to be the reply given by Benjamin Franklin to a woman when she asked him what kind of government he had given them as he was leaving the constitutional convention.

The contest is open to senior girls only. Miss Akens was chosen from the girls in her class on the basis of "leadership, dependability, service and patriotism." She must submit the essay by Nov. 6 to the state DAR board.

Phillips Appears In County Court

Mrs. Zelma Phillips, Texico, was apprehended and charged with check law violation last week in Parmer County. She appeared before Judge Loyde Brewer and received a sentence of \$1 and costs. She also received the check given to Buck's Super Market in Farwell, according to Charlie Lovelace, sheriff.

In other action, Donald Rule, Friona, was bound over for the next session of the Parmer County Grand Jury following the filing of a suit by his wife for non-support. Rule posted a bond of \$500.

DON'T BLOW THAT HORN . . . a Gee (Rodney Dod) grabs for the horn which Sandra Hoover (Maribelle) is about to blast as a warning to a classmate that college officials approach their hideaway in Dod's residence during rehearsals for the junior class play, "One Wild Night." Casting of the theme act farce was completed last week and practice began in earnest this week.

Trustees Discuss Fieldhouse Need

Considerable discussion of the need for new fieldhouse facilities for the football teams highlighted the meeting of the School Board Monday night.

Board members were in agreement that a new building was needed but could not be attained this year. They promised to give the matter serious consideration for the next year and do what they could toward bettering the situation.

Funds are not available at present to finance the construction of a new building and it is late in the season to start making changes at this time.

"If taxes come in good and the budget works as well as it has been doing in the past, we should be able to do something about a new building next year," D. C. Herring, president of the board said.

"I think we could certainly pay for the building over a two year period," Alton Farr,

school superintendent, added.

A committee--the coaches--from the Boosters Club appeared before the board to request their consideration of the need for a new fieldhouse and to offer the assistance of the Club in any capacity which the board deemed suitable.

Dan Ethridge, school tax assessor-collector reported the collection of \$366.32 in delinquent taxes. Only \$5,000.68 remains on the delinquent rolls for collection at this time.

In addition, there was \$16,000 collected from the current tax assessment. Total taxes assessed amounted to \$235,912.24 this year as against the \$222,169 for the last period.

The total assessed taxable value of property in the school district was given as \$13,408,698 for the 1961-62 taxes. Last period assessments showed a total value of only \$12,695,289 which is an increase of \$785,409 this year.

Payment of the 60 local maintenance bills were approved for payment along with 15 transportation bills and other expenses incurred during the past month by the school.

School budget and various funds were reported to be in accordance with plans.

Farr informed the board of the expected need for additional hand uniforms next year providing the band continues to expand at the anticipated rate.

Unlocked Cars Invite Thieves

Police Chief Ben Moorman warns all Frionians against the dangers of leaving valuables unattended in unlocked cars. Too often, when this is done, some unknown person takes advantage of the situation.

Mrs. C. M. Phipps recently had a billfold containing \$100 in cash and some personal cards stolen from her car while it was parked near Houser's Grocery, Moorman reports.

If anyone finds cards or other personal items belonging to Mrs. Phipps, she would certainly appreciate having them returned to her or left at the City Hall.

1st Try Proves Tops For Mrs. Schuman

A complete novice won the football contest last week. Mrs. Mary Schuman, Rt. 1, Friona, correctly picked the winning team in nine of the football contests to chalk up a decisive victory in her first try of the year.

Her nearest competition was A2C Earl V. Perdue of Cannon Air Force Base. He emerged with eight correct picks and only 10 points error in the scores between Friona and Muleshoe in their Friday battle.

Sue Moten, Bovina, was the only other entrant who managed to correctly predict the outcome of eight games. She missed the tie-breaker score by 27 points to win third place.

The majority of the entrants foresaw the outcome of six games but the West Texas-Wichita upset proved to be the undoing of 80 per cent of the predictions. The San Francisco-Los Angeles tilt was next on the list of "most often missed games." It was also the one game missed by Mrs. Schuman.

Eleven loyal fans chose Texas Tech to win over Texas A & M in the one-sided flasco Saturday. After six weeks, Frankie Allen is leading the field with a score of 43 out of a possible 60. C. H. Veasey is second in the

race for the trip to the Cotton Bowl game and \$55 in expense money. He has 42 correct predictions.

Mildred Agee is third with 41 correct choices.

Court Report

The following report of cases filed in Corporation Court in Friona during the month of September was submitted by Ben Moorman, city police chief.

No drivers license	5
Speeding	1
No U turn	1
Improper start from parked position	1
Excessive noise	6
Improper parking	2
Stop sign violation	4
Fail to yield ROW (Accidents)	2
Negligent Collision (Accidents)	2
Drunks	4
Warning Tickets	12
Total	40

There were 39 cases submitted during the month of August.

LUCKY NOVICE . . . Mrs. Mary Schuman correctly picked the winner of nine of the ten football contests in her first try at the weekly Cotton Bowl contest last week.

Editorial Comment:

Nations' Great Losses

Twice in less than a month, tragedy has struck and left us without the services of a great and vital leader in this time when, more than ever before, we need great men.

First came the heart rending news that Dag Hammarskjold went down with his plane in Africa. His death left the one organization in which we could place some hope for preventing the third World War without the solid and level-headed leadership which it must have to be effective.

But this was not the end of losses for Americans--and especially for Texas. We learned last week that Texas' senior statesman Sam Rayburn was incurably ill with cancer.

After 48 years of serving in the House of Representatives with 22 years as Speaker Of The House, the 79-year-old Democrat must surrender his gavel to another man.

The silvery haired political strongman has earned the respect of this and other nations during his lengthy term. He has enjoyed the reputation of a man who could "get things done when they most needed doing." Few men of history have been able to view both sides of a dispute with his clarity and objectivity and then proceed to initiate a suitable compromise.

As for Hammarskjold, he too was a man who lived by high principles. After seeing him stand unyielding behind his decisions and built the United Nations into a force so powerful that the Russians began to feel the pressure, we can only wonder if any "trioka" could be as wise and forceful even if they were all three wrapped into one.

To stand lightly by and pay little heed to the selection of men to carry on in their places would be the greatest injustice we could do these men who devoted the better part of their lives toward shaping a peaceful and livable world.

Many great men remain in leadership positions in America and in the world, but to remove one is like unto cutting a link in a chain. If the link is not replaced or repaired, its power and reach is broken.

We must think now,--and be ready to act when the time comes.

READING WHEEL . . . Miss Jo Phillips (left) and Mrs. Juanez Green show J. T. Gee, elementary principal, one of the teaching aids demonstrated at the reading clinic in Odessa last weekend. Both teachers were highly impressed with the possibilities of the new machines and methods for teaching high-speed reading. They look for much of what they observed to be put into practice in "the very near future."

---MANAGER---

(Continued from P. 1)

Outland was the third applicant interviewed by the City Council. The position was opened with the resignation of Albert Field Sept. 19. Field has accepted the city manager's position in Muleshoe and will move there as soon as he can locate suitable housing and relinquish his duties here.

Outland and his wife, Lorene, presently reside in Lawton, Oklahoma. They have three children; Linda, 11; Robert, 17; and Lorna, 19. Linda and Robert are attending school in Lawton. Lorna is presently enrolled in Oklahoma University.

Outland does not plan to bring his family to Friona until after the school mid-term. He does not wish to remove the children from school in the middle of the term.

Outland was the third applicant interviewed by the City Council. The position was opened with the resignation of Albert Field Sept. 19. Field has accepted the city manager's position in Muleshoe and will move there as soon as he can locate suitable housing and relinquish his duties here.

---TEACHERS---

(Continued from P. 1)

teaching in Friona for five years.

Most impressive was the Control Reader machine. Experiments reported by the Friona delegates indicate that comprehension and reading speed greatly improve when this machine is used. A slot of light moves across the screen and reveals a small portion of a sentence, or line, but never

backs up. This tends to force the reader to go forward and prevents his eyes from jumping back to a word or phrase already covered and thus slowing the reading.

The principle of the machine is based on tests which show that the average eye is continually jumping back to a word which is already been seen. The machine eliminates this by forcing the reader to go forward.

The Clinic in Odessa was the only one of its kind in Texas

and one of twenty in the United States and Canada. Approximately 100 teachers attended the Tachistoscopic demonstration. Neither Mrs. Green nor Miss Phillips who has taught in Friona for 12 years had previously attended this type of clinic. They attended the clinic at the request of J. T. Gee, elementary principal, and under the sponsorship of the school. Gee has received an invitation to send a delegate to the clinic.

Ginsburg Attends Taxation Session

Robert Ginsburg returned Wednesday from Houston where he attended a three-day session on taxation sponsored jointly by the Texas Society of Certified Public Accountants and University of Houston.

Extensive attention was given to the procedure to be followed in the state sales tax with additional instruction on the new or recently changed forms of federal tax procedure.

Mrs. Ray Joe Riley

Scott-Riley Wedding Read In Church Ceremony

Wedding vows were exchanged between Jo Eddy Scott of Hereford and Ray Joe Riley of Dimmitt at First Methodist Church in Hereford October 7. Parents of the couple are Mr. and Mrs. Ira Scott of Hereford and Mr. and Mrs. Ray Joe Riley of Dimmitt.

Rev. Gilbert Davis, Jr. read the single ring ceremony before an altar of greenery flanked by bouquets of white gladioli and mums and centered with candelabras holding white tapers. The bridal aisle was covered with a white cloth and pews were marked with white satin bows.

Wedding music was presented by Mrs. James Alston of Hereford, who also accompanied Ben Gollehon of Dimmitt as he sang "The Lord's Prayer" and "Claire de Lune."

Mrs. Edwin Morrison, Jr. sister of the bride, served as matron of honor. Bridesmaids were Betty Mae Scott, sister of the bride, Mrs. John Noakes of College Station and Barbara Gregory of Spur.

Bridal attendants wore identical dresses of topaz antique satin fashioned with fitted bodices, scooped necklines, brief cap sleeves and skirts of unpressed pleats forming bells. They wore matching hats of velvet and carried bouquets of chrysanthemums in fall colors.

Serving the groom as best man was John McSpadden, Bill Smith, Ellis Huddleston and Jimmy Cluck were groomsmen. Ushers were John Glibreath and Edwin Morrison, Jr.

Given in marriage by her father, the bride wore a formal gown of white silk organza, with a bouffant skirt. The fitted bodice was embroidered in a lacy effect and trimmed with seed pearls and sequins. The long tapered sleeves were also embroidered in lace. Her shoulder length veil of white tulle fell from a jeweled tiara.

Her only jewelry was a pearl necklace with diamonds, a gift of the groom.

A reception at Hereford Country Club followed the ceremony. Guests were registered by Jan Scott, sister of the bride. The serving table was covered with a white linen cutwork cloth and centered with an arrangement of bronze and gold mums.

Miss Carolyn Williams of Dimmitt and Miss Mary Dufur, Miss Glenda Allison and Mrs. M. T. Rutter of Hereford assisted at the bride's table. For her wedding trip to New

Mexico, Mrs. Riley wore a wool suit of deep plum with matching accessories and an orchid from her bridal bouquet.

Mr. and Mrs. Riley will make their home on a farm near Hart. Mrs. Riley is a 1955 graduate of Hereford School and received her bachelor of science from West Texas State at Canyon in 1958.

She taught science in Friona High School two years and did graduate work at the University of Texas. She also attended St. Anthony's School of Nursing in Amarillo.

Riley, a graduate of Springlake High School and Texas Tech, did graduate work at Tech and taught there. At the present time he is farming in the Sunnyside community in Castro County.

Deborah Sands of Odessa was the flower girl. She carried a basket of fall flower petals. Scott Johnson of Dumas, cousin of the bride, was ring bearer. He carried a white heart-shaped pillow trimmed with lace.

Calvin Coolidge took the oath of office as president at 2:30 a.m. on August 3, 1923, at the home of his father.

Vitamin D is the rarest among ordinary foodstuffs.

NOVEMBER WEDDING PLANNED--Mr. and Mrs. Clyde W. Weatherly are announcing the engagement and approaching marriage of their daughter, Celia Dee, to Jerry Dewayne Loflin, son of Mr. and Mrs. J. A. Loflin of Stinnett. Wedding vows will be exchanged in a Thanksgiving ceremony, November 25, at Friona Methodist Church.

Following the theme of study "New Dimensions In Philanthropy", Mrs. O. J. Beene and Mrs. Virgil Zeman presented a report on "Girls Town Past and Present" at the Tuesday evening meeting of the Modern Study Club at the club house.

Opening number on the program was a devotional presented by Mrs. Howard Ford. Two flute solos, "Melody In F" and "Gavotte", were presented by Sharon Reeve accompanied by her grandmother, Mrs. F. W. Reeve, at the piano. Refreshments were served to 21 members and the two guests by Mrs. Fay Reeve and Mrs. Charles Allen, hostesses.

Boy Born To G. Parsons

Mr. and Mrs. Gabriel Parsons of Amarillo became parents of a baby boy Sept. 23. He weighed 7 lbs. 1 oz. and was named Gabriel Kirk. Grandparents are Mr. and Mrs. Joe Parson of Brownwood and Mr. and Mrs. Joe Beaty of Friona. Great-grandparents are Mr. and Mrs. T. E. Parson of Brownwood and Mrs. D. W. Smith of Plainview.

Gabriel Smith of Brownwood is a great-great-grandfather.

Jaycee Wives Make Plans

Plans for a regular monthly meeting were made at the Friday afternoon meeting of the Jaycee Wives, in the home of Mrs. Troy Young. Three members of the Dimmitt Jayceettes were guests. An explanation of possibilities of organizing a club here were discussed by Mrs. Gloria Isaacs, Bobbie Bruegel and Marjorie Mathis.

Mrs. Robert Dickcy of Friona was also a guest. Members present were Mesdames Walter Haws, Jack Burnett, Billy Siford, Ronald Smiley, Billy Nazworth and the hostess.

Calvin Coolidge took the oath of office as president at 2:30 a.m. on August 3, 1923, at the home of his father.

Vitamin D is the rarest among ordinary foodstuffs.

Women Hear Guest Speaker

Mrs. Hudson Phillips Sr. of New York, mother of Rev. Hudson Phillips Jr., was guest speaker at the Friday afternoon meeting of the Interdenominational Church Women at the Calvary Baptist Church.

Theme of this year's study program is "Great People of the Bible."

Fifty-two women attended the meeting. Mrs. C. W. Dixon, program chairman, invites all women of the community to attend the next regular meeting at Friona Methodist Church, December first.

Locals

Mrs. Frances Howard was a guest in the home of her mother, Mrs. A. O. Drake, last weekend. Mrs. Drake returned to Abernathy with Mrs. Howard to spend the remainder of the week.

R. N. Ginsburg returned to Friona Wednesday of last week from a three day tax seminar in Houston. It was a state meeting of Certified Public Accountants.

Mr. and Mrs. Karl Bender and Mrs. H. H. Weis of Friona and Viddian Weis of Perryton spent Sunday visiting relatives in Amarillo. They visited in the homes of Mr. and Mrs. Vialo Weis and family, Mr. and Mrs. Alex Stevens and family and Mr. and Mrs. Bill Weis and family.

Other guests in the Bill Weis home were Mr. and Mrs. Edward Rummans and family and Mrs. Ruby Renner of Shasta, Calif.

Sunday visitors in the home of Mr. and Mrs. John Benger were Mr. and Mrs. Alan Bridges, Mr. and Mrs. H. R. Clarke, Mr. and Mrs. Marvin Clarke and children all of Amarillo and Mr. and Mrs. LeRoy Clarke and children from Spokane, Wash. Bridges is Mrs. Benger's brother. Mrs. H. R. Clarke is her sister and Marvin and LeRoy Clarke are her nephews. LeRoy Clarke is being transferred from a missile base in Spokane, Wash., to Altus, Oklahoma.

Mr. and Mrs. Bill Schwab and sons, Darrell, Randy and Mike, and Mrs. Bill Buth and Leslie Joe spent the weekend visiting relatives at Shattuck, Oklahoma and Higgins, Texas.

Mrs. Beulah Munden and Mrs. Mabel Massey of Cleburne, Texas, visited in the home of Mr. and Mrs. Otis Massey last week. Mrs. Munden is Massey's sister and Mrs. Massey is her sister-in-law.

Weekend visitors in the home of Mr. and Mrs. Bill Wooley and sons were Mr. and Mrs. Sheb Wooley and Christ of Hollywood, Calif. and Mr. and Mrs. H. G. Wooley and sons, Bill and Ricky, of Clovis.

Mr. And Mrs. Jimmy Ralph White

Mrs. Jake Lamb Presents Program

"The Holy Spirit" was the topic chosen by Mrs. Jake Lamb for the Oct. 4 morning meeting of the Mekka circle of the Woman's Society of Christian Service of Friona Methodist Church in the church sanctuary.

Mrs. Guy Latta presented the devotional.

Those present were Mes-

dames James Boyle, Keith Brock, Joe Collier, Arthur Drake, J. T. Gee, R. W. Ginsburg, Esther Haws, O. C. Jones, H. C. Kendrick, Lamb, Latta, David Moseley, Floyd Rector, J. L. Shaffer, Billy Sides and Lucy Vestal

Rites Conducted For Mrs. Burkett

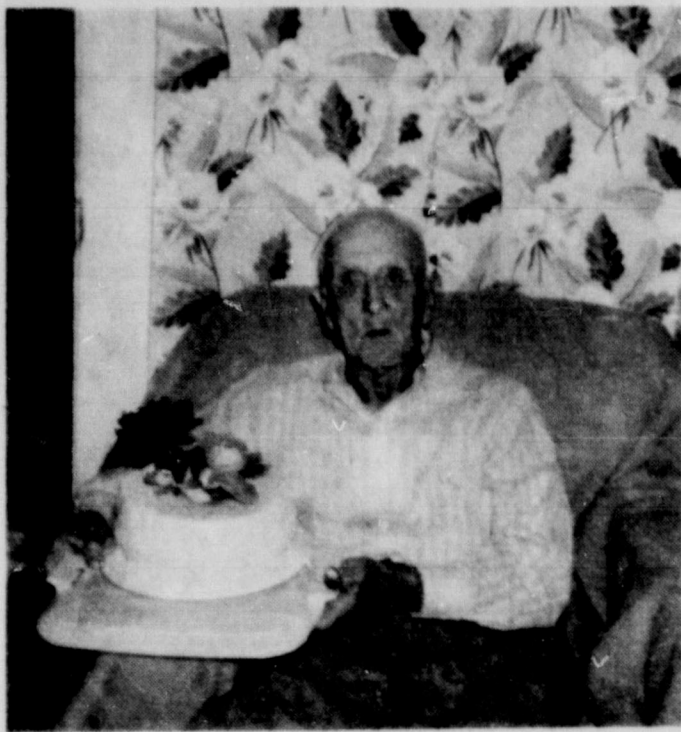

Funeral services for Mrs. Alan Burkett of Dora were conducted at Sixth Street Church of Christ at 3 p.m. Saturday, M. B. McKinney of Dimmitt, former minister of the church, officiated. He was assisted by Paul Smith.

Mrs. Burkett was fatally injured in a school bus-truck collision southeast of Dora early Thursday morning. She was born January 13, 1909, at Duke, Oklahoma, and lived here before moving to Eastern New Mexico about three years ago.

Survivors, in addition to her husband, include her mother, Mrs. J. F. Miller of Friona; three daughters, Mrs. J. B. Taylor, Mrs. Ansel Renner and Mrs. Delmar Renner all of Friona; three sons, Charles Kirk of Lubbock, and Jay Don and Jack Mickey Burkett of Dora; one brother, Roy V. Miller Sr. of Friona; eight grandchildren and a number of nieces and nephews.

Pallbearers were L. C. Gaines, L. D. Hays, Claude Mears, Fern Barnett, Raymond Fleming and Lester Dean. Burial was in Portales Cemetery under direction of Claborn Funeral Home.

Mrs. O. J. Beene and Mrs. C. W. Dixon attended the annual Dimmitt High School ex-students reunion Saturday. Over 300 persons from California, Colorado, Oklahoma, New Mexico and Texas were present.

"TOO OLD FOR CANDLES." - This remark was made by F.H. (Granddad) Hadley as he observed his 93rd birthday at his home in east Friona with a few relatives joining him for cake and coffee Oct. 3. Present were Mr. and Mrs. A. H. Hadley, Mrs. Leo Bails, Mrs. Gibbie Trigg and Carl Hadley of Friona and Mrs. L. D. Cannon and Mrs. Marvin Gaddy and Danny Lynn of Muleshoe.

Political Discussion Sparks Club

Highlight of the September 26th Progressive Study Club meeting at the club house was a discussion of problems involved in the unification of Berlin by Beggy Ginsburg and Gloria LeVeque.

Current proposed legislation was discussed by Joy Lindeman and Edwina Field read several scriptures. Lunell Horton,

chairman of the finance committee, reported receipt of \$140 from the Money Doll project.

Plans were made for a Christmas bazaar and coffee. Date will be announced later.

Refreshments were served by Winifred Hurst, Gloria LeVeque and Pat Nichols, hostesses.

Literature; Art Studied At Woman's Club Meeting

Twenty members of Friona Woman's Club met Wednesday afternoon, Sept. 27 for a study of literature and art. Each member present answered roll call by naming a recently read book.

Mrs. J. D. Sanders, was a guest speaker. She gave a comprehensive study of flag etiquette. Mrs. R. W. Ginsburg discussed "Literature, the Voice of the Century." Mrs. Carl Maurer illustrated her talk on "Art of American Needlework Through The Century" with a display of heirlooms belonging to club members and other Friona citizens and representing the many different types of handwork that were characteristic of various sections of the country.

One patchwork quilt, recognized as definitely American, was pieced with individually cut pieces that followed no set pattern. A wool Crazy Quilt had irregularly shaped pieces outlined with embroidery. One hand woven coverlet of wool was carded, dyed and woven by members of one family.

Needlework displayed included drawn work, Battenburg embroidery, cross-stitched samplers, crochet, knit counterpanes with original designs, braid work and needlepoint.

Two very unusual exhibits were tiny hair wreaths woven to preserve locks of hair of members of the family of Mrs. F. W. Reeve and a large picture of hair roses made by the grandmother of Mrs. Fred White and Miss Lola Goodwine. The wreath was centered with colored wool flowers and the brown flowers, made from the hair of each of Mrs. Minnie Goodwine's family, were interspersed with gray roses made from the hair of the family's

ONE FOR THE SHOW

Two spinsters were discussing men.

"Which would you desire most in your husband, brains, wealth or appearance?" asked one.

"Appearance," the other answered, "and, the sooner the better."

Lubbock Rites Conducted For Mrs. Mauldin

Funeral services were conducted for Mrs. Oran Mauldin, 55, of Friona in Lubbock Sunday at 3 p.m.

Mrs. Mauldin was born August 4, 1905, in Dawson County. She moved to Friona in 1957 where she resided with her husband on their farm about 9 miles north west of town.

Mrs. Mauldin died Thursday evening "apparently from a heart attack." She was dead on arrival at the Farmer County Community Hospital at 7:15 p.m.

She is survived by her husband, four daughters, three sons

and 19 grandchildren. Her daughters are: Mrs. George T. Moore, Lubbock; Mrs. Donald Lawler, Lubbock; Mrs. Benton Ross, Lubbock; and Mrs. Russel V. Sharp, Littlefield. Sons include Oscar Mauldin, Florida, and Robert O. and Gilbert W. Mauldin of Lubbock.

SCARCITY of pure water is fast becoming a major problem for growing municipalities. By 1975 this country will be using 88 per cent of all available water, says the Population Reference Bureau, compared with the 8 per cent used in 1900. And cities, many of which already have water shortage problems because of growing population, are expected to experience a total population increase of 35 million by 1975.

Something To Think About

6th. Street Church of Christ
Box 515 -- Friona, Texas

Once there was an old woman who couldn't make up her mind. She kept putting off decisions hoping that someone would make them for her. Then one day she had an idea, "I'll have other people make up my mind for me." Delighted with her idea, she sat down and made a list of the decisions she had to make. What kind of roast shall I have Sunday? What should I do about the leak in my roof? Why are my rose bushes dying? Now then, she asked herself, "Who should make up my mind for me?" Picking up her pencil, she wrote the name of the village druggist beside the first question, the shoemaker's beside the second, and the milkman's next to the last. Then with a sigh she said, "Thank goodness, that's done and my troubles are all over." Actually they had just begun. These were good people, but not qualified concerning the questions she expected them to answer. As a result she ended up with a tough roast, leaky roof, and dead rose bushes.

Unfortunately, many people follow the same questionable procedure when they have to make decisions that concern their souls. They must decide which church; which creed; which name etc. and they too ask, "Who shall make up my mind for me?" In most cases it is a parent, sweetheart, employer or friend. There is a much safer course to follow dear friend - why not let God help you. His answer is in His Holy Word.

come to church sunday

After three days they found Jesus in the temple, sitting in the midst of doctors, both hearing them, and asking them questions. (Luke 2:46.)

One snowy day I was busy skimming through some books in a store. An old woman came in. She spoke to me, and I looked up and answered her greeting.

She began to relate her life story. She said she was 79 years old and lived by herself in an apartment. She went on to tell that her only child was now a practicing lawyer and that she had two children. After five minutes of talking, she said, "Thank you for listening."

As I thought about the parting words, I decided that listening is both an art and a ministry. It has value not only to the listener, but also to the one who talks and shares. As a boy, Jesus asked questions and listened to the doctors in the temple in Jerusalem. By His example we are encouraged and challenged to develop the art. We are called upon to cultivate and use the ministry of listening - with interest and concern.

**A HERITAGE OF TRUTH...
A FRONTIER OF FREEDOM...
LIGHTING AMERICA'S WAY—
YOUR NEWSPAPER**

Ever think about what you get for your money in your daily paper? Of course you get the news and many other features, but your pennies purchase a great deal more. In a sense, you're investing in a heritage left by our founding fathers... freedom to print the truth as we see it. You're also buying a stake in the future — our obligation to advance the cause of freedom, wherever there's news.

To The Eye Of Local Visitors

AUSTRIAN LIFE IS VARIED - COLORFUL

The sleek, 707 jetliner leveled off at cruising altitude and knifed its way through the darkness toward Germany. On board, five Frionans settled back to experience the shortest night of their lives.

Arthur Drake, his wife Luella, and three daughters had boarded the plane only a short time before at 9 p.m. In New York to begin the longest lap in their trip to Austria. Drake on his way to attend International fairs in Klagenfurt and Ried as America's "Diplomat for grain sorghum."

At 11 p.m., airline hostesses served dinner as the plane streaked toward its destination at supersonic speed. The sound of the engines had been left somewhere behind the plane as it passed through the sound barrier.

Light began to filter through the cabin windows just an hour and one-half later. As the sun lit up the sparkling panorama, passengers stared wonderingly at the brilliant wonderland below. Great columns of pure white clouds stood like mounds of "melting snow" in a field of bright blue ocean.

Breakfast was served at 2:30 N.Y. time, a short while before the plane landed at Frankfurt, to end the first jet flight for the Drake parents and the first plane ride for the girls.

One month later, on Sept. 6, the Drakes returned to Friona, tired but with many fascinating tales of Austrian people, their lives and habits.

"On the whole, the people are hard workers, clean, friendly and polite as can be," Drake said.

"Most all businesses wash their windows every morning," he continued. "But I don't really know why because there just isn't any dust or flies to get them dirty."

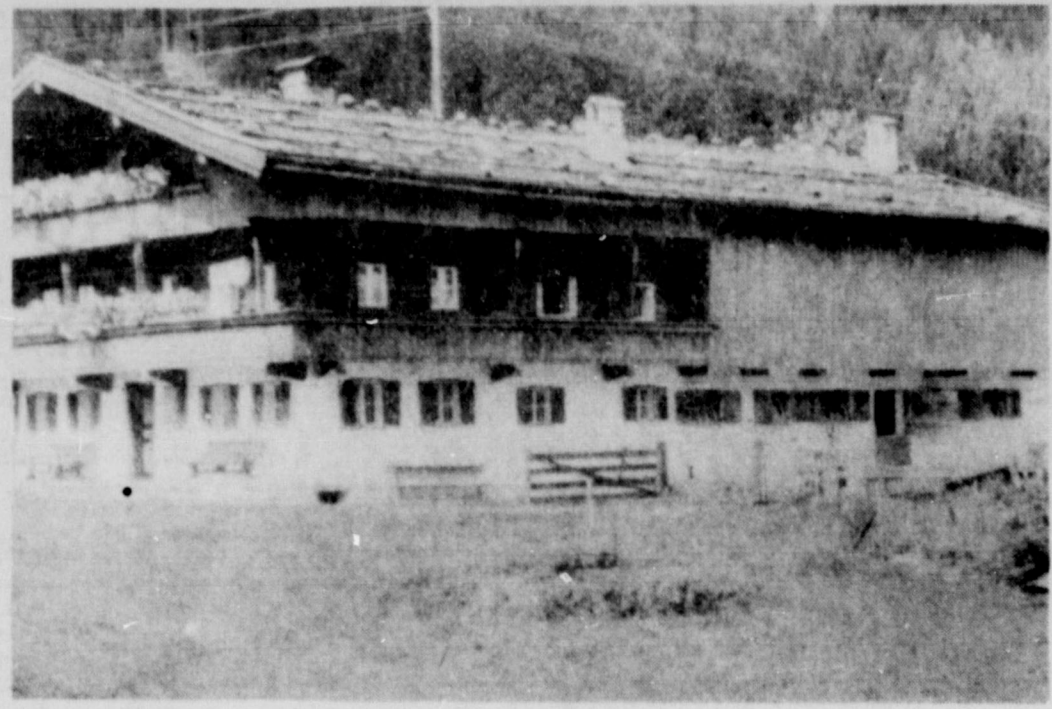

"People sweep the streets with brooms," 11-year-old Peggy reminded.

"Women are the street sweepers," Betty, 17, said.

Women and old men sweep the streets of the towns and

ON TOUR . . . Arthur Drake stands with his wife, Luella, and daughters, Betty, Erma, and Peggy while their guide explains the historic aspects of Kings' Lake in Berchtesgaden, Germany. They found time to visit many famed historic sites during their month-long visit to Austria and neighboring countries.

AUSTRIAN COMBO . . . most Austrian houses are built with the barn attached. The house is in front with the barn attached on the rear. Notice the rocks on the roof to help hold the shingles in place during storms, and the flower boxes along the front of the house. Houses do not have screens because there are no flies, mosquitoes or bugs to bother.

even the roads between the towns. Rainy weather does not slow up their work very much. "They don't stop for anything," Drake said. "If they work in the rain, they get more money."

A visitor to Austria might wonder at the number of men carrying brief cases. Almost everyone carries some such case in which nestles his lunch. "Their lunch is usually a roll of some kind of meat like salami and a big hunk of bread," Drake commented. "They will buy a bottle of beer for a drink, find some place to sit down and have lunch. They drink beer like we drink cokes," he added.

Some of the men wear leather shorts which they let out as they grow. Such shorts are not washed until they are thrown away.

Women are never seen in anything other than dresses except in some of the very large cities.

Most of the women, particularly the farm women, wear ankle length dresses with built-in aprons.

"And their shoes have very high tops," Peggy commented. Women also run many of the businesses such as concession stands and market booths, and work in the fields like men.

"A lot of the girls won't marry farmers because of the hard work which they know they would have to do," Mrs. Drake added. "They move to the city to find something to do instead."

"It seemed strange to see

both the women and the men wearing their wedding bands on their right hands, too," she added.

Buildings are solidly constructed according to the Drakes. One building they visited in Salzburg, which has been owned by the same family for 300 years, is now being used as a bakery.

"Where we have lawns around our houses, they have gardens," Erma, the eldest daughter, said. "And their barns are built right onto their houses."

"Most all of the windows have

flower boxes, even the windows in the barns," Mrs. Drake added.

Austrian people don't seem to have many washing machines yet. Most of the washing is done with rub-boards and tubs.

"Some farm women even have to do their wash with just a flat board," Mrs. Drake said. "They get out in the front yard with a board that looks like a bread board that we use to roll out bread on and start doing the week's wash."

Some of the people have plumbing -- hot and cold

water--but the water is heated with wood or coal. The people usually start the water heater in the morning and when the fire burns out, there is no more hot water for the day.

"Most of them cook with wood or coal, too," Mrs. Drake added.

The Drakes found time to visit many strange and historic places during their stay in Austria. Perhaps one of the strangest was a "swimming pool for horses."

"In the old days, people would run their horses into the pool to wash them," Drake said.

Germany, and Hitler's birth place in Brunner, Austria, were among some of the places visited.

On Sept. 21--between the two fairs--the Drakes traveled to Vienna and to Venice, Italy--a city with water for streets. The next day, they crossed over historic Brenner pass.

Later, they acquired visas and took a short trip into Communist Yugoslavia.

"The Yugoslov people are poorer and don't seem to be as happy as the people in Austria," Drake said. "They don't ever smile," Peggy added.

They were allowed to carry

(Continued on page 7.)

LIKE A TOY VILLAGE . . . the typical Austrian settlement nestles in the rolling hills. Most all the houses are small and have steep pitched roofs. Businessmen wash their shop windows every morning morning but there is no dust to get them dirty as there is in most of the United States.

Braves Add Two; Lose One Thursday

Eighth grade football team added two more victories to their mounting list during the past week. The seventh grade team failed in their attempt to beat the Canyon team Tuesday.

The eighth graders played Farwell last Thursday and teamed up with the seventh graders against the two Canyon teams Tuesday evening.

In the battle with Farwell, Johnny Claborn plunged the final two yards in the first quarter to open the scoring for the evening. Tommy Sherley ran through the Farwell wall for the two additional points.

Farwell evened the score with a returned touchdown and points to leave the score tied at the half. In the third quarter, Farwell scored again but failed in the attempt at extra points.

On the final play of the game, Tommy Sherley fired a pass to Jesse Shirley for the tying score. Rickey Coon took the pigskin over for the additional points to leave the final score

16 to 14 for Friona.

In the seventh grade tangle with Canyon, the Friona team failed to score until the last quarter. Canyon ran the score up to 18-0 in the first half.

Ted Renner whipped a pass to Danny Nettles in a 20 yard touchdown play to score for the Braves. Mike Wooley raised the score two points with an extra point run but the clock ran out with the score 18 to 8 for Canyon.

Tommy Sherley plunged the final yard to score six for Friona in the first quarter of the eighth grade match with Canyon. Extra point try failed.

Canyon turned around and matched Friona's feat to leave the score tied at the end of the first quarter.

Additional touchdowns by Johnny Claborn and Tommy Sherley outmarched the one Canyon tally to raise the score to 22 to 12 at halftime.

in and around FRIONA

WITH JUNE

Due to the absence of Ella Faye Holcomb, society editor, I have been filling in at the front desk in the Star office this week. Although I don't really feel at home at this desk, I am thoroughly enjoying seeing a number of Frionans with whom I seldom come in contact.

Mrs. Holcomb is on vacation and is baby sitting with her new grandson in Amarillo. Little Jerry Steven White was born early Wednesday morning last week and his mother, formerly Elaine Holcomb, were dismissed from Northwest Texas Hospital Saturday afternoon.

Does anyone know why Friona doesn't have a Garden Club? Maybe there is enough interest in growing beautiful flowers and arranging them without any organized effort. In most cities the size of this there is an active Garden Club and I'm just curious about the matter.

If anyone is taking nominations for the beauty spot in Friona this week, I'd like to submit the window box on the south side of the home of Mr. and Mrs. Newman Jarrell Sr. Think the blossoms are geraniums. At any rate, they are red and are beautiful.

It is real amusing to observe these same men when they are all playing on the same team. When the Chieftains are playing, all Frionans are for them all the way.

With all the interest in adult education at the present, there are courses in just about anything a person wants to study. One report I heard last week was that plans were being made for a course in thinking. Now I'm not sure whether such a thing is really being planned or the report was just a joke.

If such a course becomes a reality, I surely do want to get my name on the list. Won't someone who is "in the know" please clue me in?

Do any of our Friona weather prophets know when we will have the first killing frost? In years past it seems that some of the daily papers have conducted contests on this subject, but I haven't seen a report of one this year.

Perhaps the Star could have a local contest. If you want to enter, just let some of us know your favorite date.

AUSTRIAN FARMER . . . returning from the mill where he and his family have been grinding feed. A great many of the wagons in Austria are pulled by cows. "We did not see a pickup during our entire stay there," Drake said.

Austrain Life--

1500 Dinors each (equal to about \$2 in U. S. currency) into Yugoslavia. While on a sight-seeing tour, they stopped for a cold lunch.

"We couldn't get a Coca Cola, as hard as shoe leather, allowed to sell it. We finally ordered 'Uga - Cola' which tasted like prune juice," Drake said.

The meal consisted of salami, "as hard as shoe leather," and a slice of bread which was "very dry." The meal cost \$750 Dinors (about \$6) for the five members of the family.

Generally, everything is cheaper than it is in America but it is not quite as good by U. S. standards. Gasoline is one thing that is much higher. It costs about 60 cents per gallon.

"Austrians will hook carts onto bicycles or scooters and haul almost as much as we do in pickups," Drake commented. "A lot of the cars and trucks run on diesel oil. Most of the people ride bicycles or scooters though," he added.

According to Drake, there is very little crime in Austria. "About all the policemen have to do is direct traffic," he said. Commenting on the difficulty of getting water, Drake said: "They don't know what drinking water is. Everyone drinks beer or wine. You have to ask for water if you get it, even in cafes."

Asked if she would like to live in Austria, blonde haired Peggy replied, "Ugh, No!" "We are all glad to be home," Drake added.

Mules Stampede; Trample Chiefs

The Chieftain eleven proved unable to stop the Mule stampede in the Friday gridiron contest in Muleshoe and the Mules marked their first win of the season.

The Friona eleven was unable to sustain an offensive or stop the Mule drives, to leave the game with a 47-6 loss.

The Mules moved the ball through the Friona line to register their first score four plays after Friona kicked the opening ball.

The Muleshoe team couldn't seem to be stopped as they opened the way for long runs by their fleetfooted backs. The Mules tallied 28 points before the Chieftains crossed into paydirt for the first and only time.

Floyd Reeve hit Gary Snead with a 23 yard touchdown pass in the middle of the second quarter to spark a deafening crescendo from the numerous Friona fans. Try for extra point failed.

Following the Friona kickoff the ball changed hands so fast and furious that fans had a hard time keeping up with it.

Muleshoe fumbled and the ball was recovered by Friona. On the next play, Friona fumbled and lost the ball to the mules again. The following Mule pass was intercepted by Gary Renner. The ball was still in the center of the field at the end of the half.

The Chieftains have been undergoing grueling practice during the past week but hold out little hope of halting the Tuffa wave at Chieftain field Friday night at 8 p.m.

LEGAL

Statement Required By The Act of August 24, 1912, as Amended by the Acts of March 3, 1933, July 2, 1946, and June 11, 1960 (74 STAT. 208) Showing the Ownership, Management, and Circulation of The FRIONA STAR, published weekly at Friona, Texas for October 1, 1961.

1. The names and addresses of the publisher, editor, managing editor, and business managers are:

Publisher, W. H. Graham, Farwell, Texas.

2. The owner is: (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual member, must be given.)

W. H. Graham, Farwell, Texas.

Joe A. Osborn, Austin, Texas.

3. The known bondholders, mortgagees, and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages, or other securities are: (If there are none, so state.)

None.

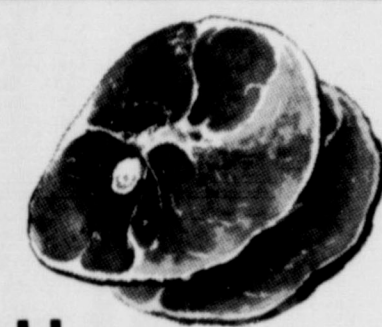

4. Paragraphs 2 and 3 include, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting; also the statements in the two paragraphs show the affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner.

5. The average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the 12 months preceding the date shown above was: (This information is required by the act of June 11, 1960, to be included in all statements regardless of frequency of issue.) 1460.

W. H. GRAHAM, Publisher Sworn to and subscribed before me this 1st day of October, 1961.

NOW! A NEW WORLD OF WORTH!

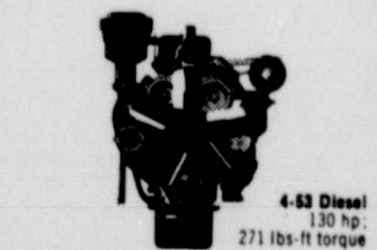

'62 CHEVROLET JOBMMASTER TRUCKS WITH NEW High Torque Power!

Here's new High Torque power for every weight class—light, medium and heavy . . . the most powerful engines in Chevrolet history . . . sure saving power and dependability for every job!

There are plenty of powerful reasons for Chevy superiority. High torque reasons. Reasons that range all the way from a mighty new High Torque 409 V8* for heavies, right down to the thrifty Sixes . . . including the High Torque 261 Six* that's available for the first time in light-duties.

Loads of other reasons, too. Like the new work styling with downward-sloping hoods

that let drivers see up to 10 1/2 feet more of the road directly ahead. Like Chevrolet's proved Independent Front Suspension for even smoother riding, easier working trucks. Like the heavier duty hypoid rear axles for middleweights and the rugged new I-beam front axles* (9,000- or 11,000-lb. capacity) available for extra-tough jobs on Series 80 heavyweights. Like the longer lived mufflers. Like work-proved Corvair 95's (2 pickups and a panel) that haul up to 1,900 lbs. of payload with low-cost dependability and sure rear-engine traction. Like to know more? See your Chevrolet dealer.

4-53 Diesel 130 hp; 271 lbs-ft torque
NEW CHEVROLET-GM DIESEL DURABILITY Here's new earning power for middleweights . . . rock-bottom maintenance costs, compact size, low weight, top torque and top power.

409 V8 252 hp; 390 lbs-ft torque
NEW HIGH TORQUE V8 With 16 1/2 per cent more torque than ever before available from Chevrolet.

THE HIGH PLAINS FARM AND HOME

Sedimentation Tests Confront Area Farmers

Farmer County wheat farmers may have to change their practices in order to maintain wheat income.

Starting with the 1962 wheat crop, premiums for quality, based on sedimentation tests, will be included as part of the

price support operation. The sedimentation scale will replace the protein scale used in the past.

The premiums, which will reflect the baking quality of wheat better than the current premiums do, are being included because of the need to encourage production of more high quality wheat, both for domestic use and for export.

The previous price support program provided premiums based on the quantity of protein in wheat offered by producers. However, protein content is not a reliable and conclusive gauge for identifying wheats capable of producing desirable bread flour.

The protein or gluten strength of wheat is the characteristic of wheat that when milled into flour and baked as bread results in a light loaf demanded by the retail trade.

Baking quality is related to wheat strength. And the strength of bread flour is measured by its ability to develop into a strong dough as the water and other constituents are mixed with the flour. The best bread flours can absorb a high percentage of water in making a dough.

The sedimentation test is a simple and rapid way to estimate the strength and quantity of wheat protein. It does not require elaborate milling equipment needed for bread-baking or mechanical dough testing. This test can be made at elevators and other points of delivery.

In making the sedimentation test, a crude white flour is first made by grinding and sieving about 200 grams of wheat, using prescribed equipment and procedures.

A small weighed portion of the flour is mixed with water and a lactic acid reagent in a glass cylinder. The cylinder is then allowed to stand for exactly five minutes.

The volume of the sediment in the cylinder is read in milliliters. The volume of the sediment depends largely on the quantity of gluten in the wheat and the extent to which the gluten is swollen (gluten quality). The test is thus a measure both of quantity and quality of gluten which are the principal factors involved in wheat strength.

Sedimentation values range from about 3 for very weak

wheat, up to about 70 for the strongest wheat. Wheats with a sedimentation value of 40 or more are preferred for flour for use in commercial bread baking.

Wheat with sedimentation values of 60 and over usually contains a protein content above 14 percent, is of superior gluten quality, has superior baking strength, and is suitable for mixing with weaker wheat for production of commercial bread flour.

Wheat varieties recommended for use in this area are Tascosa, Concho, Crockett, Bison, and Kaw. Tascosa has proved to be the most acceptable with irrigation, according to Prentice Mills, ASC office manager.

Other acceptable varieties are Comanche, Ponca, Aztec, Westar, Improved Triumph, Triumph, and Wichita.

School Lunch Program To Expand

More than 14 million of the expected record enrollment of 46 million children in the nation's schools will participate in the National School Lunch Program this year, reports the U. S. Department of Agriculture.

Last year, well over \$1 billion worth of foods, equipment and services were required to provide the 2.3 billion lunches consumed by the 13.5 million participating school children. Payment of this billion dollar lunch check comes from three basic sources -- roughly 60 per cent is paid by the children with the remaining cost about equally divided between state and local sources and the Federal Government.

The program, in its present form, began in 1945 when Congress passed the National School Lunch Act "to safeguard the health and well-being of the nation's children, and to encourage the domestic consumption of nutritious agricultural products."

When the new program got underway in the fall of 1946, less than one school child out of six was able to buy lunch at school. This year one out of three will eat lunch at school. Of the total lunches served, about one in 10 is served free to children who cannot afford to pay.

4-H Members Show Steers At State Fair

Farmer County will have four 4-H Club representatives at the State Fair in Dallas next week. Bobby Tomlinson, Farwell; Eddie Wood, Friona; Miss Darla Howell, Friona; and Kim Buske, Friona; will show their steers in the stock show.

They will leave Sunday to participate in events of Oct. 10-20. The three Herefords and one Angus will be shown Thursday at 8:30. Buske will show the Angus.

The steers will be released or auctioned off Oct. 20, at 9:30. Steers for this division must weigh between 800 and 1100 pounds.

They will be rated on the basis of the judges' estimation of the steers' cut-out value (the number and quality of lean cuts which the steer would produce).

NEWS FROM THE

FARM BUREAU

BY RAYMOND EULER

County Farm Bureau Officials are disappointed in the apparent complacency of the county organization. As much complaint as is heard on the street, at the elevators, barber shops and in government offices, it would seem that when an opportunity is given for farmers to voice their opinions so that they would have the strength of over 82 thousand other farmers united in Texas Farm Bureau and over a million and a half farmers in American Farm Bureau, they would take advantage of it. Such is not the case, and as everyone knows, the voices on the street corners do not change or accomplish anything. Confusion might be an exception.

However, Farm Bureau has successfully fought some of the shackling legislation and will continue to fight with some success. Actual participation would multiply the strength of the organization. Membership helps immensely, of course, but inactive members cannot be aware of problems when they arise, and individual support or opposition cannot be activated without knowledge.

Disregarding the poor attendance, the convention was good. Discussion of the subjects presented was good, and voting was apparently enthusiastic. One thing very evident throughout the meeting was that all those present believed that LESS and not more government control and intervention was needed in agriculture. This was, in fact, one of the resolutions unanimously approved. We are sure that this is one resolution that will have state and national approval in Farm Bureau. We have heard that some other organizations that have been taking the opposite view are finding much change of opinion among their membership.

Harry Hamilton, who has served as director and chairman of the legislative committee for several years was elected president for the coming year. He should be able to do a good job of directing the county organization from every angle. The new directors, James Norton, Dee Whitwood and Grady Nelson are all old members who are expected to serve well and intelligently. Vernon Symcox, who was re-elected has already proven his ability as a leader.

The Plains Irrigation Gas Users Association presented a resolution that received unanimous approval. If you are an irrigation farmer, we believe this organization merits your full support. You can give your support by contacting the banks or the county judge or any of the members. Bruce Parr is president, and Carl Schlenker is vice president in this county. CONSIDER THIS: The wicked shall be a ransom for the righteous, and the transgressor for the upright. Proverbs 21:18

AND WE PUT AN EYE HERE . . . John Ensor, 1 1/2-year-old son of Mr. and Mrs. James Ensor, Oklahoma Lane, shows Stephanie Kelso, 1 1/2-year-old daughter of N. D. Kelso, the art of making a Jack-O-Lantern out of one of the thousands

of pumpkins in his father's field. Ensor planted 22 acres of pumpkins this year and has four varieties. They range in weight from an average of four pounds for the Sugar Pie to an average of 20 pounds for the Connecticut Field varieties.

Stripper Operation Affects Cotton Quality

The 1961 cotton harvest is now underway. Cotton harvesting in this area normally reaches its full peak around 10 days to 2 weeks after a killing frost.

County Agent Daryl Coker, estimates that as much as 70 to 85% of the county's cotton crop will be harvested this year with mechanical strippers. Coker further states that, with this much of the cotton crop being harvested with strippers, it is of the utmost importance that farmers keep in mind that it pays to operate the strippers in a good workmanlike manner to preserve the quality of the cotton.

The agent further stated that this will require good planning on the part of the farmers because, due to the bumper crop prospects, gin yards can be expected to be crowded and the round trip time on cotton trailers will at times be long and drawn out. The agent made the following statements as key points to keep in mind throughout the harvesting season:

1. Do not operate strippers too soon after frost or the use of desiccants. Allow ample time for all the leaves and leaf stalks (leaf petioles) to dry out completely before starting the strippers. Green leaves and leaf petioles will stain the cotton as it goes through the stripper and is loaded onto the trailer. Cotton stained in this manner can easily cost the farmer \$10 per bale in grade.

Proper timing of the harvesting operation is important. A drying period of 2 to 3 weeks after frost is needed to condition properly the cotton plants for stripper harvest. But with further delay plants deteriorate and broken stems and branches are gathered with the stripped cotton, which with weathering lowers fiber quality.

2. Don't start strippers too early in the morning following heavy dews or showers. Research has shown that harvesting cotton with too high a moisture content can cost the farmers \$10 to \$15 a bale in quality. Cotton gins best at a lint moisture content of about 7 1/2%. A good rule of thumb is to squeeze a few holes and if the cotton bounces back after

being squeezed it is, normally, dry enough to harvest. If the cotton stays in a ball after being squeezed in the hand, it will be too moist for good harvesting and ginning.

3. Provide ample trailer space for each bale of cotton. The USDA estimates that it takes up to 450 cubic feet of space for one bale of machine stripped cotton. To tramp and crush cotton into too small a space results in lower grade cotton. Ewengins with the most elaborate and expensive systems cannot remove all of the small "pin and pepper" trash that is ground into seed cotton when it is tramped into the trailer.

4. Use separation devices on strippers such as blowers and green boll boxes. Throw the green bolls out on the turnrow and allow them to dry out and open before carrying them to the gin. Too many green bolls indicate that you are attempting to strip too soon after frost or desiccation. Use wood slatted or wire sided trailers. This will allow leaf and other trash to blow out of the trailer.

5. Keep strippers and trailers

clean. Do not over lubricate. Wipe off excess grease and keep the trailer beds free of dirt.

6. Keeping the strippers centered on the row and operating at the proper speed will help eliminate barkly cotton.

7. Keep a few tarpaulins on hand in case of rain or dust storms.

World's Greatest Nickel Source
The world's greatest source of nickel is the Sudbury District of Ontario. From this area, which is about 200 miles north of Toronto, comes more than 60 per cent of all the nickel produced by the free world.

Farm Bureau Elects Officers At 13th County Convention

New officers were elected and appointed delegates to the state convention at the Farm Bureau County Convention in the Friona PCA office Thursday night.

Resolutions expressing the county bureau's stand concerning upcoming state and national legislation were acted upon following officers' and committees' reports. The resolutions will be presented by the delegates at the state convention.

The bureau last year supported five legislative bills which passed, six that failed to pass and opposed two bills, or parts of the bills that passed. Eight bills were opposed which did not pass.

Weed Committee Chairman J. T. Jones expressed his appreciation to the "over 100 men" who helped the eight-man committee in its fight against hindweed in the county.

Over 5,000 pounds of weed poison was reported distributed along county roads and 132 sacks along state highways. Approximately 34 acres received weed sterilant applications, Jones reported.

Additional amounts of poison purchased through local stores and applied were not known but were estimated at an appreciable amount.

"When the weed committee was first formed (1954), we couldn't buy it (hindweed sterilant) anywhere in the county," Bruce Parr commented from the floor. "We had to get it from Hierford or some other such town." Parr was chairman of the committee when it was formed.

Following several nominations and reelection speeches from the floor, ballots were cast for 1962 chairman and directors.

Harry Hamilton was elected county president. Directors were: Dee Chitwood, Lazbuddie; James Norton, Bovina; Grady Nelson, south Friona; Vernon Symcox, Oklahoma Lane.

Symcox was the only member re-elected.

Resolutions which were passed by the 22 men and 10 women present at the convention are as follows:

NATIONAL BLOC VOTING. Be it resolved that Farmer County Farm Bureau opposes "bloc voting". That is, the casting of a vote on matters of concern to each member of a cooperative when the membership has not registered a consensus on the subject at hand. Bloc voting too often allows an organization to cast an influential vote, supposedly representing the desire of many members, when it is possible that the membership would have voted a majority in the opposite direction.

FARM LABOR-BRACEROS. Be it resolved that Farmer County Farm Bureau favors continuation of the Bracero program, but opposes regulations that tend to eliminate the advantage of using braceros.

DOMESTIC LABOR. We oppose regulations that would require registration of crew leaders.

WAGE AND HOUR. We oppose the application of Wage and Hour law for agricultural labor.

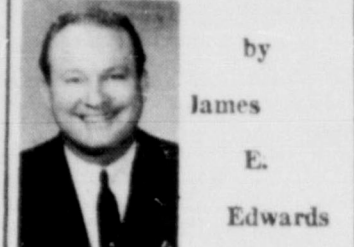

Be it resolved that Farmer County Farm Bureau favors legislation proposed for providing Federal financed medical aid for the aged.

Be it resolved that Farmer County Farm Bureau favors less government intervention and control in agriculture.

The resolutions will be presented at the state convention in Galveston Nov. 12-15 as representing the wishes of the 510 members of the Farmer County bureau. The 1962 officers were also chosen to serve as state delegates.

FOOTSAVING EDUCATION

by James E. Edwards

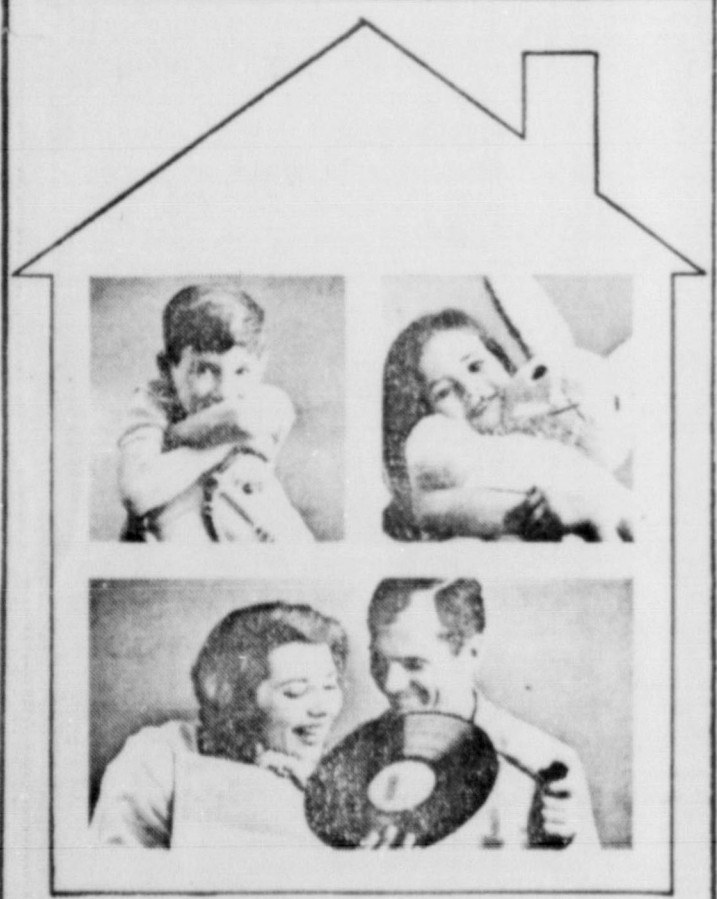

Why do we cling to the idea of supporting babies' feet and ankles?

It is a natural error. A home economist told me that more than half of the housewives who use electric dishwashers wipe the dishes before they put them away. The dishes are clean and sterile but, after years of wiping dishes, it is natural to assume that a little work on our part will make them cleaner. Actually, the dish towel is less likely to germ-free than the washed dishes.

The extra work of lacing up high shoes gives the performer of the task a "virtuous" feeling but the exercise will benefit the wrist and the finger muscles of the lacer rather than the foot and ankle muscles of the infant.

The foregoing applies to normal feet and does not apply to the Orthopedic cases which require braces or other corrective devices.

The HAPPY HOMEMAKER

BY JUNE FLOYD

Homemakers who enjoy working with flowers and flower arrangements will probably be interested in a new product which is now on the market. This product is known as "Flower-Dri."

One of the ingredients is silica gel, an industrial chemical used in baby powders and for the preservation of dry freshness in foods and pharmaceutical preparations.

This product is available at department stores, florists, garden supply and chain stores including supermarkets. Although it isn't very expensive Flower-Dri retains its usefulness indefinitely. It is a special blend of silica gel and is an admixture of blue and white particles. When it becomes saturated with moisture from the flowers, it turns entirely white and is then reactivated by baking in an oven, until the blue returns.

The method developed for drying flowers takes advantage of the affinity of the silica gel for moisture. In about a week of contact with the chemical, moisture is almost completely removed from the flowers, leaving their appearance unchanged and preserving them for months.

This unique way of drying flowers, is simple to follow and keeps flowers as fresh looking and colorful as when first picked.

Step one--Cover the bottom of any sealable container with "Flower-Dri" to a depth of two inches. Insert short-stemmed fresh flowers. Cover with "Flower-Dri."

Step two--Cover container and seal with tape. Put away for one week in a place where the containers will not be disturbed.

Step three--after flowers have dried, remove from "Flower-Dri" carefully. Make stems from florist wire, wrapped with green floral tape.

Step four--Your dry flowers retain the color and fresh appearance of new flowers in bloom and can be arranged the same way. They will last this way for months and months.

Looking for something easy yet different to serve for refreshments on the porch or patio? Try these Walnut Drop Cookies, made with sweet cooking chocolate, and dress up with a glaze that's made simple by melting another package of the sweet chocolate and spreading it over the cookies while they are still warm. To go with the cookies served cool refreshing iced tea or coffee.

APPLE PANCAKES
 1 1/2 cups pancake mix
 1 tablespoon granulated sugar
 1/2 teaspoon cinnamon
 1 egg, well beaten
 1 cup milk (at room temperature)
 1/4 cup butter or margarine, melted
 1 cup finely chopped apple
 To pancake mix, add sugar and cinnamon; mix lightly. Combine egg, milk, shortening and apples. Add to pancake mixture, beating until smooth. Bake on hot greased griddle, turning only once.
 Serve hot with butter and your favorite pancake syrup. Makes about 16 four-inch pancakes.

WALNUT DROP COOKIES
 2 packages (1/4 pound each) Baker's German Chocolate
 2 cups sifted flour
 1/2 teaspoon soda
 1/2 teaspoon salt
 3/4 cup butter or other shortening
 3/4 cup sugar
 2 eggs, unbeat
 1/2 teaspoon vanilla
 1/2 cup chopped walnuts

Since this is National Fire Prevention Week, it is a good time to remind homemakers that a lot of fires around the home can be prevented if proper precautions are taken.

Do you replace frayed cords on electric appliances? Do you keep your attic and other storage places free from articles which can become fire hazards? Do you always keep sharp and breakable objects out of reach of small children? These are just a few of the things that all of us should do to make our homes fire proof and accident proof. Fires and accidents are two things that we should be constantly on the alert for.

If you find your breakfast menus hard to vary, try including the following recipe in your collection. Whether you prefer ham, sausage or crisp bacon, you will always enjoy.

STRENGTH FOR THESE DAYS
 From The Bible

For Thou art my hope, O Lord God; Thou art my trust from my youth.

—(Psalm 71:5)

In the vigor of youth, one inclines to assume that his strength will overcome all obstacles and insure success, without any other help. But how joyous and useful life will become when youth realizes the need of the love of God, and His guidance and His help, which are so freely given.

HD Agent Demonstrates Cake Making, Decorating

"Can you tell the difference between a home cake and a cake made from a mix?" This is a question trained leaders will be asking in all home demonstration clubs in the county during October club meetings.

Sixteen volunteer leaders were trained in the program "Cake Making and Decorating" in a meeting conducted Tuesday morning, September 26 in the home of the county home demonstration agent, Miss Ettie Musil.

The secret of successful cake baking varies in different altitudes of 3000, 5000, and 7000 feet. There is a difference in proportions of baking powder, sugar, and milk for these altitudes. For all altitudes the right pans are very important. If homemakers do not have pans of the size given in the recipe, they should choose one of the same depth, and as nearly as possible of the same area.

Cost and time comparisons of the two cakes were made during the training. A difference of one penny was made between the cost of the commercial mix and home kitchen ingredients. However, the commercial frosting mix cost twelve cents more than home mix.

Leaders who will present more information in club demonstrations are: Mrs. Roy Miller, Mrs. J. B. Williams, Mrs. Walter Cunningham, Mrs. Buck Fallwell, Mrs. Ralph Broyles, Mrs. Luella White, Mrs. R. L. Foerster, Mrs. Elmo Dean, Mrs. A. L. Reznik, Mrs. John Hand, Mrs. Walter Schueler, Mrs. Cecil Dykes, Mrs. Harold Travis, Mrs. Keith Brock, Mrs. Bill Carthel, and Mrs. Beryl Fish. Visitor was Mrs. C. C. Christian.

Still At Work On Depletion

One more step was taken this month toward a long-sought goal--the goal is a federal income-tax deduction for the depletion of underground water within the High Plains Under-ground Water Conservation District.

A pre-trial hearing was held in the U. S. District Court in Amarillo, September 25, before Judge Joseph B. Dooley as a prelude to the full-fledged trial which has been scheduled by the Court for January 3 in Lubbock.

The purpose of the pre-trial hearing was to establish agreement between the attorneys and the Court concerning procedures to be followed in the trial and to agree upon certain stipulated facts pertinent to the case.

Marvin and Mildred Shurbet, a farm couple who reside in southwest Floyd County, filed this most-important legal suit against the Internal Revenue Service. Mr. Shurbet is a former member of the Board of Directors of the High Plains Water District.

The Shurbets contend that property owners who can establish an actual cost in the underground water beneath their land and who are using the water to produce income should be entitled to deduct this cost on their tax returns as the water is exhausted.

The trial of this case will culminate seven years of diligent work by the High Plains Water District.

In 1954, the first of two requests was submitted to the Internal Revenue Service. These requests asked the IRS to consider underground water in the High Plains Water District as a depletable natural resource under existing federal tax laws, thereby making landowners in this area eligible for a tax deduction as depletion takes place.

These requests were submitted to the Internal Revenue Service, but were disallowed. It was determined that the only other feasible means of gaining the tax-deduction was through the courts.

Savings To Farmers

We have 4", 6" and 8" Re-conditioned Pumps. One year Warranty. These units with or without Power Plants, SEE US and SAVE.

TEXAS PUMP EXCHANGE
 1012 17th St. Lubbock, Tex.
 Phone PO 3-5426

Dear Mr. Farm Owner:

Here are a few good reasons for borrowing money. Do you want to build a new home? Perhaps you need underground irrigation tile to conserve water and increase your yield. Or maybe you would like to buy more property.

These are major projects and few of us have the capital to finance them without borrowing money.

We would like the opportunity to discuss a long term low interest rate farm loan with you. We will loan the maximum on your farm, you pay no brokerage or appraisal fees.

If I may be of help to you on arranging a loan or assisting you on your real estate to buy or to sell, please do not hesitate to call me.

Very truly yours,

Our Farms Beat Russ By 60%

American farmers annually produce some 60 per cent more food and fiber than the Russians, even though the U.S.S.R. has three times as much land and eight times as many agricultural workers.

Secretary of Agriculture Orville L. Freeman, in an article in IMC WORLD, employee publication of International Minerals and Chemical Corporation, points to these figures as evidence of "an unparalleled success story... which will attract hungry people even before the story of man in space."

Freeman writes that this is a "remarkable demonstration of the superiority of private versus State agriculture" within Russia itself.

He reveals that although less than five per cent of Russia's tilled acreage is privately owned, this private agriculture produced 65 per cent of Russia's potatoes, 82 per cent of its eggs, and 50 per cent of its green vegetables.

Milo Is Fare At Luncheon

Bruce Parr, Friona, and more than 40 officers and guests of the Grain Sorghum Producers Assn. dined on grain sorghum muffins and steaks marbled with grain sorghum oil recently in a meeting hosted by Texas Tech. The noon luncheon, held at the Hickory Inn, was the scene of reports by Tech agricultural researchers on projects related to expansion of grain sorghum production and markets. Grain sorghums hold great promise for better nutrition in underdeveloped areas of South Asia and South America, Dr. Mina Lamb, nutritionist in the Home Economics School, reported. New markets for the sorghums will open if ways can be found to adapt sorghums to the eating habits of the peoples in underdeveloped lands, she said. Marbling of meats with sorghum oil is attracting attention of persons who are studying the possible relation

between diet and heart disease, said Dr. Ralph Durham, animal husbandry department head who has led in development of the technique. Possible value of such marbling is in the substituting of oils for fats in diets of heart patients, he explained.

Durham predicted that if artificial marbling of meats is widely accepted, consumer demands will cause animal production and market shifts that eventually will benefit grain sorghum producers. Officers and directors of the Grain Sorghum Producers Assn. toured the Tech Meats Laboratory building and new facilities on the Tech Farm before attending the luncheon.

Tech Agriculture Dean Gerald Thomas received a large color photo of sorghum harvesting on the High Plains. The gift from the association was presented by President Frank Moore, Plainview.

HD Agent's Notes

BY MISS ETTIE MUSIL

October 12 to 21 is National Apple Week. Can you think of any fruit that is so tasty and versatile as the apple. America's number one dessert is apple pie, plain with cheese, or a la mode. Fall shipments of apples will reach their peak in October, so we should be seeing a drop in price of apples. And this year's crop is estimated at 15 percent more than last year. If you haven't come by for copies of our popular bulletins, you'll have to do so for the many recipes using apples. These bulletins are free, too. In the "Quick Meals" bulletin you'll have recipes for apple puff, baked apples, cinnamon apples, and pineapple and apple crisp. Then to add sparkle and zest to a meal try tomato-apple chutney that you may can by directions in the "Pickles and Relishes" bulletin. Call or write and we'll be glad to send you these bulletins. Have you always admired your friends who could bake

such delicious apple pies? Yes, and so many times you tried your luck with not so good apple pie. How about trying this pastry mix for never fail pie crust. This is the simplest of the mixes and one of the most popular. Sift flour once before measuring. Then measure and sift 8 cups flour and 2 teaspoons salt together. Blend in 2 1/2 cups shortening into the flour and salt until pieces are the size of small peas. This recipe makes eleven cups of mix. Store this mix in a covered container in a cool place. Use one cup of mix for each crust. Two cups should be used for a two crust pie, as apple pie. Add just enough iced water to hold dough together, about 2 tablespoons to each cup of mix. If lard is used, reduce fat to two cups. For good results pie dough should be handled as little and as lightly as possible. Use heavy cloth over board and a cloth

Larger Quantities of Feed Grains Going Under Price Support

Farmers placed a total of 476 million bushels of corn under price support through February 28, nearly 100 million more than a year earlier and the largest on record for that period. This would indicate that the total for the loan period, which extends through May, will be above the previous record of 551 million bushels in 1948-49. In addition to new-crop corn under loan, farmers are holding about 220 million bushels of corn under the resale program from the 1956 to 1959 crops. On March 3, CCC available stocks totaled 1,416 million bushels of corn making a total of 2,112 million bushels under Government ownership or price support. Substantially larger quantities of oats, barley and sorghum grain were placed under price support in 1960-61 than a year earlier. The period when loans were available for these grains ended January 31. The 20.3 million bushels of oats placed under price support was more than double the 8.3 million a year earlier. Barley increased from 40.8 million last year to 49.6 million in 1960-61 and sorghum grain from 115 million to 203 million bushels.

A total of 20.5 million tons of all feed grains had been placed under price support through February this year, 5.6 million tons more than in the same period of 1959-60.—The Feed Situation, U.S.D.A.

Grains: Price Support Activities as of February 28, 1960 and 1959 (All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

Guard Against Grain Insects

A large portion of Texas' 1961 grain crop is now in storage throughout the state. This represents a large investment on the part of many people, but in some instances this could turn into large losses if the storer is careless about insect damage, say C. F. Garner and R. L. Ridgway, extension entomologists. Proper care on the part of the storer can prevent such damage, however.

Periodic inspections at about two-week intervals should be made to determine whether or not injurious insect infestations are present. By taking probe samples at various areas and depths, and then sifting the grain through 10 to 12 mesh screens, the owner can determine if insects are present. If one granary weevil, rice weevil or lesser grain borer, or as many as five insects of other species such as flour and grain beetles, cadelle or grain moths, are found per quart sample of grain, the storage bin should be fumigated, say the entomologists. Before fumigating the bin, the owner should remove any wasted grain that may have ac-

cumulated outside the structure. A recommended residual spray should then be applied to the outside walls and any other areas around the structure that may harbor insects.

There are several precautions that should be taken before and during the fumigation process. All electrical equipment should be checked and any defective wiring repaired. No one should be allowed to smoke near the building or equipment during fumigation. Any hose used should be long enough to allow the equipment to be placed a safe distance away from the structure, and all hoses and connections should be checked for leaks. In most cases, especially if they are working inside the storage structure, the persons applying the fumigant should be equipped with proper gas masks. A mask with a full faceplate and a United States Bureau of Mines approved canister should be used. No canister should be used after it has had 30 minutes continuous exposure to the fumigant. Any fumigant that comes in contact with the user should be washed off immediately.

Farmers Can Register Trailers For \$5.00

The last regular session of the Texas Legislature amended the Texas Motor Vehicle Registration Law to allow farmers to register their farm trailers and farm semi-trailers for a \$5.00 fee providing the gross weight is not less than 4,000 or more than 10,000 pounds. Farm trailers weighing less than 4,000 pounds, gross weight, are still exempt from registration by statute. Those exceeding 10,000 pounds, gross weight, must register as a regular commercial trailer.

Captain J. L. Miller, License and Weight Section of the Department of Public Safety, advised however that any vehicle bearing the \$5.00 plate must not: (1) exceed 30 MPH, (2) be operated for hire, (3) have steel or metal wheels in contact with the pavement and it must be equipped with an adequate hitch to remain secured to the towing vehicle and be operated and equipped in conformity with all other provisions of the law. Violation of any of the above sections of the law nullifies the \$5.00 registration fee and the trailer will be subject to the registration fees and penalties as prescribed by law.

This does not change the existing law which requires that all trailers or semi-trailers having a registered or gross weight in excess of 3,000 pounds be equipped with clearance lamps, side marker lamps, and reflectors as well as a tail light and stop light, if the stop light on the towing vehicle is obscured. Captain Miller further stated that all machinery type vehicles, other than machinery used solely for the purpose of drilling water wells and road construction machinery, must now be registered with regular license plates and title applied for. This includes oil field drilling and servicing machinery, regardless of whether such machinery is a unit within itself or is mounted on a conventional

vehicle or chassis. Water well drilling units and road construction maintenance equipment are required to have either the \$5.00 registration plate or a regular registration plate, depending upon how the equipment is used. Captain Miller suggested that anyone needing further information should contact their county tax assessor and collector.

WITH THE COUNTY AGENT

DERYL COKER

If you have barley and wheat on your farm and plan to graze both, plan to graze the barley first, for barley is not as vigorous in cold weather as wheat. Also, barley will freeze back if hit by real low temperature worse than wheat.

Some farmers have put in demonstrations on wheat, and are planning to keep the results for next year. If you have a rates of fertilizer demonstration, or irrigations level's effect on fertilizer rates on wheat, I sure would like to work with you in obtaining the results.

I would, also, like to congratulate Richard Chitwood in his winning the Santa Fe Award which is a scholarship and trip to the National 4-H Club Congress in Chicago. The Santa Fe Award is a very difficult award to win, it requires work in nearly all phases of 4-H Club Work. The competition in this awards program is one of the hardest in the State. We hope Richard has set an example

to other 4-H members and prove that anything can be won if enough effort is applied.

Proper management of the residues from the sorghum crop now being harvested can prove of great benefit to farmers of Farmer County, if managed in the right way.

These sorghum residues if properly maintained on the surface throughout the critical part of the year will provide humus for the soil when plowed under next spring.

This humus in the soil will keep the soil opened and allow moisture to penetrate faster. This will help to prevent a mud seal from being formed by hard rains, and, also, reduces washing problems.

Sweeps or blade type implements are the best to work the soil with as they cut underneath and do not disturb the surface material so much.

By no means should these stalks be burned.

Prices Steady As Numbers On Feed Up

Prices for both slaughter cattle and feeder cattle remained generally steady during September. The number of Fed Cattle marketed from the twenty-six feedlots reporting information to the "Texas Feedlot Report" declined during the month while the number of cattle placed on feed in these feedlots increased by 26 percent.

In the monthly summary for September, Lloyd Bergsma, Director of the Texas and Southwestern Cattle Raisers Association Cattle Feeders Division points out that although placements in Texas feedlots during September increased from the previous month, indications are that number on feed in Texas are below last year at this time.

"The uncertainty of feed grain prices resulting from the government Feed Grain Program coupled with a narrow and sometimes negative margin between slaughter and feeder cattle prices has caused hesitation on the part of many feeders to purchase feeder cattle at this time," Bergsma said.

There has been a significant increase in the percentage of calves being placed on feed in Texas feedlots. Feeders are attempting to improve their profit prospects through the feeding of

calves which offer better feed conversion and result in a lighter weight finished carcass which have been in better demand in Texas Markets. Bergsma stated that he expects the available supply of fed beef from Texas feedlots to decline during the next 30 days. If the demand continues strong some increase in the price of fed cattle is expected.

SHARKS had a busy season this last year. Thirty unprovoked attacks on humans were recorded, and there were 11 instances in which a shark was provoked and attacked. Most of the victims were fishermen; one was a skin diver who was bitten by a shark he had speared, and one lifeguard was knocked off a surf ski.

Urge Kids To Stay In School

A "Back-to-Stay-in-School" campaign directed at high school and college students has been initiated by the U.S. Office of Education under the leadership of Dr. Sterling M. McMurrin, Commissioner of Education, it was announced today by J. H. Bond, Regional Director, Department of Health, Education, and Welfare, Region VII, of Dallas.

The campaign will be a year-round effort. George D. Hann, recently appointed Office of Education Regional Representative in Dallas, will head the campaign in Region VII, Bond stated.

Over 900,000 students dropped out of the Nation's schools last year, although 70 per cent had the ability to finish high school and probably go on to college. Since the drop-out rate will vary from one community to the next, the problem must be approached from that level.

Dropping out of school has a number of implications for the student and the community. The student is restricting earning power substantially by dropping out of school. The community suffers when a student drops out of school, because this reduces the supply of trained manpower available to expanding business and industry.

Hann suggests that officials of schools, local governments, employment agencies, business and industry can help by individually and collectively conducting a "Back-to-School" campaign.

Did you know the bathtub was invented in 1850 and did you also know the telephone was invented in 1875? This probably doesn't mean much to you, but just think, if you were living in 1850, you could have sat in the bathtub for 25 years without the darn phone ringing.

Girl Scout Notes

Troop 144 met Wednesday in Fellowship Hall of Friona Methodist Church. The group was divided into patrols and refreshments were served. The Busy Scouts were served by Cindy Ingram and the Monarchs were served by Sue Rodgers.

Basic parts of an airplane were discussed and each girl was instructed to plan a plane trip from a booklet secured from Braniff Airway System.

Those present were Kathy Jones, Linda Fallwell, Cindy Ingram, Sue Rodgers, Lou Cochran, Glenda Mings, Shirley White, Carolyn Kirby and Vicki Moorman. Mrs. Bob Riethmayer is leader of this troop. Taps were sung before dismissal.

On Sept. 4 Brownie Troop 93 met at the Sixth Street Church of Christ annex. New members are Vonnie Brooks, Brenda Stout, Paula Hassengflue and Rhonda Ragsdale.

Troop officers elected for this semester are Vonnie Brooks, president; Susan Vestal, vice-president; Myra Sue Day, secretary and Amelia Sims, song leader.

Following division into patrols, patrol and assistant patrol leaders were elected for six weeks. Sept. 11 Mrs. Russel O'Brian explained the tenderfoot requirements to fly-up into Intermediate Scouts.

She also discussed badge work and exhibited various badges Brownies may be able to earn. Stress was placed upon courtesy to parents, teachers, sister Brownies and others.

On Sept. 18 Mrs. Ralph Shirley showed all Brownies and Girl Scouts a safety film. Then Ben Moorman outlined rules of traffic safety for bicycles and pedestrians.

Making kindling and learning how to use a knife preceded a cook out at the home of Car-

la Sue Mann September 25. October 2 Mrs. Ralph Wilson taught the troop to use a compass. Each girl then made a trail and sketched a map by use of the compass.

Leader of Troop 93 this year is Mrs. Alice Whaley. She is assisted by Mrs. Sue Rector and Mrs. Christeene Mann.

On September 4 Girl Scouts of Troop 105 met at the Congregational Church for the first meeting of the new year. Mrs. Bill Bandy, the leader, discussed badges. Members of this troop are second class scouts and are ready to start working on badges.

Plans were made for Maize Days at the Sept. 11 meeting. During the business meeting the following officers were elected: Pat Roberts, president; Lark Jarrell, vice-president; Pamela Turner, secretary; Darla Perkins, song leader; Vickie Payne, treasurer and Connie Whaley, reporter.

Members of this troop were guests of Brownie Troop 93 at the showing of a safety film. Traffic safety was then discussed by Ben Moorman.

Monday, September 25, the group hiked to the site of the proposed Girl Scout House then dramatized good and bad hikers.

October 2 the troop hiked to Mrs. Whaley's home for a cook out. Each patrol built its own fire and cooked campfire stew, popped popcorn and baked apples.

Mrs. Bill Bandy is the leader of this troop. She is being assisted by Mrs. Cass Perkins, Mrs. Clayton Taylor and Mrs. Billy Dean Baxter.

Girl Scout Troop 144 met Monday after school in Fellowship Hall of Friona Methodist Church. After refreshments were served an imaginary airplane trip was taken by the group. Members of this troop are working on airplane badges. After singing taps the troop was dismissed.

Report of Condition of

"THE FRIONA STATE BANK"
