Austin — Accusations and denials fill the air as investigators dig into details of how US Trust and Guaranty and other now-defunct companies operated.

Rep. Bert McDaniel of Waco, lawyer for US Trust, told House investigators he had no knowledge of payment by any A. B. Shoemaker company to influence legislation.

McDaniel said he sponsored a bill to bring such companies under securities regulation and voted for a similar bill which passed the law-making bodies. He said he abstained from voting on HB 240 which would have placed US Trust under the state banking laws.

Former State Sen. R. C. Lanning of Austin said he knew of no payments by Shoemaker to legislators. Both McDaniel and Lanning, an attorney who resigned from the Board of Control to represent Shoemaker during the legislature, said they had done nothing illegal or unethical.

Renne Alfred Jr., former Insurance Commission attorney, declared that bank affidavits on insurance company assets cannot always be taken at face value. He cited a case involving the now-defunct Commercial Security Insurance Co. of Houston. It showed a bank deposit of \$250,000. But, said Alfred, this was \$50,000 in cash and a note for \$200,000 with a restriction against drawing on the account.

Bank officials immediately denied this. They declared they had proven in court that there was no restriction against this account.

Alfred also testified that the Insurance Commission received information in a report in September, 1954, that would have enabled it to close down US Trust then.

Two executives of large legal reserve life companies presented industry views in an appearance before the senate committee. Emphasizing Texas legal reserve life companies' long record of no loss to policyholders, they declared they felt such companies had been unfairly damaged by recent developments.

Present insurance laws are adequate, they said. The problem now is enforcement. Along this line they suggested the possibility of a single commissioner with sole power. This drew quick fire from Gov. Allan Shivers. These companies, he said, had asked his help during the last session of the legislature to set up the present three-man board system.

US Trust operated without a license from May 31, 1955, until put into receivership December 12, an Insurance Commission attorney told the senate investigating committee. Paul Connor said that all company licenses expire May 31, but by "tacit understanding" they continue operating until the commission takes action to deny a new license.

Quizzing of employees brought only a strengthened conception of US Trust as a "one-man business" but shed no light on whether more than \$50,000 in cash withdrawals was used to buy influence. Former staffers told the House committee that money from checks drawn to "cash" went to the president, and they had no knowledge of what he did with it.

Both House and Senate committee chairmen stated they want to question Shoemaker as soon as he is able to appear. He has been in a hospital since his January 7 suicide attempt.

Meanwhile, the Insurance Com-

grand jury is investigating the death of a Gregg County Negro youth. Dugger denied a statement by Prince that he was trying to "create racial unrest" in the area.

Mrs. Margaret Allen, who served with U.S. Senator Price Daniel when he was Attorney General of Texas, will join the Senator's staff in Washington, D. C., early in February. At present she is a receptionist for Attorney General John Ben Shepperd.

State revenue from interest has increased from \$150,620 to \$1,160,273 in the past five years by placing additional money on time deposits, according to State Auditor C. H. Cavness.

Women who have refrained from paying their poll taxes to avoid jury service have sacrificed their vote in vain, say county officials. In all counties except Jefferson, names of all persons paying any sort of county tax are put in the jury wheel.

itions of the school system here; no less or no more than we, though; and because of the fact that we, too, are interested, we would like to see such action as they advocate have every advantage if and when it comes to a vote.

This column suggests that the "School Survey" come out into the open and get a move started for the things they expressed as needed, but first go to the school officials who were chosen by the people to handle the affairs of our schools.

Every citizen in the county has a right to air his or her opinions to the school board and to the public, but we think the airing of those opinions in anonymity is wasted air and will not get the support of the people, regardless of how worthwhile they may be.

We hope none of the women of Terrell County surrendered their right to vote this year because they feared the payment of their poll tax would subject them to jury duty.

Any woman who pays a county tax in her own name or jointly in the name of herself and her husband is subject to jury call—unless she can prove a legal exemption—for her name goes into the jury wheel with the payment of the tax whether or not she pays her poll tax.

Under the new jury law, women who have children under the age of 16 are exempt from jury duty. So are registered, practical, and vocational nurses; wives of lawyers, and wives of men called to serve on the same jury panel.

Otherwise, women have the same statutory exemptions as the men.

Exemptions must be pressed in person before the judge in charge of the jury panel.

WHO GETS HOW MUCH

Basically an economic system must fulfill two social needs of the population it serves; (1) it must produce adequate goods and services; and (2) it must bring about an equitable distribution of goods and services. The Communists and socialists, who seek to undermine and ultimately destroy our American system, can't get far trying to attack it on the basis of production, for it has an unmatched record; so they concentrate on trying to persuade the people that capitalism doesn't spread the wealth, that a few rich people get most of it while the poor get poorer.

They have had some notable success with this false propaganda. In the 8th film of "The American Adventure" educational series, just completed by the National Education Program for use on television, in schools, industries and the armed services, the students in the "American Adventure" classroom are asked the question: "Who gets most of the national income in America?"

Many Uninformed

A student speaks up quickly. "Doesn't most of the national income go to a small percentage of the population?" he asks. "Aren't the majority of our families in the lower income brackets—below \$3,000 a year?" Other students

nod in agreement, indicating they are either uninformed or misinformed. The answer to this question constitutes a crushing blow to the Communist and Socialist propaganda. It is a tribute to the American system. An awareness of the true facts prepares anyone to block and stamp out the effectiveness of the left wing propaganda.

The film on wealth distribution in America shows with the documentary graphs that 40 per cent of America's 50-million families have incomes of from three to six thousand dollars; another 30 per cent have incomes above six thousand. Only three per cent have incomes above \$15-thousand, and if all the money they receive were to be divided equally among the population, it would mean only a few cents a day extra for all of us. Only 5.7 per cent received \$1,000 or less; and many of these are elderly people and small farm families. The big statistic is: about 85 per cent of all income in America goes to 93 per cent of our families. In other words America's wealth is widely distributed. The old propaganda slogan—"the rich are getting richer and the poor are getting poorer"—is actually the opposite of the facts.

Opportunities Dramatized

Another fallacy of the Socialists which "The American Adventure" series knocks down is their claim that the frontiers of opportunities in America have dried up, that our economy has "matured" and will not continue to grow; and therefore the government ought to take over the economic responsibilities for the citizens. The 9th film in the series is entitled, "The Spirit

of Enterprise." It tells the true story of a young couple selling frozen custard at a carnival—the opportunity they found, their ambitions, their enterprise, their hardships, and their heartwarming success.

Not enough Americans, in school and out of school, know the secret of our great production, how the mechanism of our system actually works. The 10th film of the series answers the question, "What Makes America Tick?" The answer lies in five freedoms: (1) Freedom to work; (2) Freedom to dream; (3) Freedom to compete; (4) Freedom to advance; and (5) Freedom to invest. Each of these freedoms is shown in action in the everyday life of our nation.

Benefits of Profit

One entire film, No. 11, is devoted to an examination of profit—how much is being made, who gets it, and what it does to accelerate the progress which brings benefits to all Americans. Quite surprising to many people is the fact that corporation profits are only about five per cent of the national income, that corporations make on an average only three and one-half cents profit on each dollar in sales, and that the profit pennies and

dollars make life better for one.

The subject of security freedom is explored in the film. Through discussion and weighing of facts it is found genuine security can't be or accepted as a gift, but come from inner development, good citizenship practices. The 13th film sets forth a checklist of American citizenship obligations, after reviewing the lessons contained in the first ten series. A discussion guide has been prepared for film.

Each film runs 12 and minutes. The National Education Program is a public-service, non-profit making firm being made available at the lowest possible cost.

New Future For Your Present

How many ties did you get for Christmas? For once I didn't come up with any—could have used a couple this year, too. Instead I got three wool muffers. Never wear a muffler.

Some people are determined to do something about the Useless Gift Problem—they're holding a "White Elephant Party" Saturday at the Community Hall.

Handy Peterson's the chairman. "Bring any presents you'd rather give than receive," he says. "Chances are you'll swap them off for something even worse—but it ought to be fun."

From where I sit, it's sometimes pretty hard to give a man exactly the present he wants. Other people so often have tastes and preferences that differ from our own—for example, think of all the people you know who claim coffee's the beverage, and all the others (like me) who'd rather have a glass of beer. Being able to make your own choice is the greatest "gift" of all.

YOUR HIGHWAYS BY JAY SCOTT

Ten years from today... in the year 1966... Roy Fruehauf, President, Fruehauf Trailer Company, has predicted:
The nation's motor transport fleet, now 10 million vehicles, will grow to 15 million.
America's freight trailer fleet, now 700,000, will be double.
Many units in these fleets will be powered by the atom.
There'll be more and more plastic trailers.
Trucks and trailers will be equipped with every type safety device, including airplane type steering gear and even radar screens.

Piggybacking - which just began to grow in 1955 - will become the biggest single revenue producer for America's railroads.

The railroads will begin replacing the nation's 716,000 box cars with flat cars each carrying two truck trailers.

Fishybacking, the carrying of loaded truck trailers on steamships, will grow to great importance.

Trucks and trailers will be carrying 99 percent of the mails on runs up to 300 miles.

All this traffic will be moving over the most modern of highways. Toll highways will connect Miami and Chicago and New York and San Francisco.

There'll be special lanes for trucks and trailers... push button garages... truck streets... moving sidewalks... less congested cities.

'Mister Roberts' To Be Here For Three-Day Showing

The sensational Broadway comedy hit, "Mister Roberts," has been brought to the screen starring Henry Fonda, James Cagney, William Powell and Jack Lemmon. Produced by Leland Hayward for Warner Bros., "Mister Roberts" has been filmed in CinemaScope and WarnerColor. The highly-heralded comedy opens Wednesday, February 8, at the Princess Theatre and will run through Friday night.

"Mister Roberts" takes place aboard a navy cargo ship, the USS Reluctant, which has been given the nickname of "The Bucket" by the crew. Lieutenant Roberts, second in command, years for more active sea duty and in his efforts to transfer into combat duty has incurred the displeasure of the captain, tyrannically portrayed by James Cagney. The captain, eager for promotions and honors, such as the potted palm tree presented him as a sign of achievement in loading and unloading cargo, refuses to relinquish his hold on Mr. Roberts despite the combined efforts of the crew and the other officers to persuade him otherwise. Roberts' eventual transfer and the rise of Ensign Pulver, Jack Lemmon, from passive to active participation in the affairs of the ship comprises the main plot of the comedy. Some laugh highlights are the crew's first shore leave, Pulver's romantic encounter with a sextet of nurses and "Doc's" home-brewed Scotch whiskey.

In the title role of the film is Henry Fonda who created the role of Broadway in the play written by Thomas Heggen and Joshua Logan. Fonda "enlisted" into the stage hit soon after his discharge from actual naval service in the same rank as that of the fictional "Mister Roberts." He helped establish the show as the biggest hit of the season, which enjoyed a run of more than 1,000 performances on Broadway.

James Cagney, in his role of the captain, reportedly turns in a laugh provoking performance as he bellows and struts in his portrayal of the captain with the pet potted palm tree.

Returning to the films for the first time since his award winning performance in "Life With Father" is William Powell as the benign "Doc".
