LISTEN TO LUKE

By Albert ---

The work of painting, cleaning up, and fixing up suggested recently by the local Community Park Committee, was a good suggestion and one that has been taken by some. And there are those who beat the committee to the suggestion.

And then there are some real problems that will be difficult to handle!

We looked at a house on Oak St. Saturday morning of last week that was badly in need of some attention. The walls are about to fall down, there are two cesspools that are partially uncovered and weeds and trash are taking the place.

There are steps being taken to relieve this and some other situations that are eyesores, hazards, and detriments to valuations of property nearby.

Anything that can be done to alleviate such situations would be helpful to our town.

The leadership that has fallen into the hands of, or that has been taken over by the lieutenants of the militant Negroes is leading those people and this nation to the edge of the greatest catastrophe of our age.

The man who has used the title of Rev. - Abernathy - according to some reliable information, is a disgrace to ministers, his race, and to Americans.

And our nation's leaders who are letting men like him dictate terms and activities are also a disgrace to their office, to their electors, and to their nation!

Would our leaders permit you or me to put an expensive and attractive mobile home in front of the Jefferson Memorial, or in front of any other memorial in Washington, D. C., for any period of time and for any reason, regardless of how legitimate it might be considered to you or to me! And would they build, or permit to be built, rest room facilities, utilities facilities, etc.

Then why should they for any other person or group?

There is no greater wrong than a wrong committed in the name of righteousness!

And on the same subject, this disgraceful leader of the militant minority has now made serious threats against this nation not even cleverly veiled, and the threats are being overlooked by our leaders who only listen.

And in the meantime, our representatives and senators keep sending news letters home about how hard they are working to continue to control the salt cedar along the Pecos, get the appropriations through for buying McKittrick Canyon, or getting the poor mail situation straightened out.

We have been berated at times for not publishing the news letters from all of our representatives. In our humble opinion, and you all are entitled to yours, most of what is said by politicians nowadays can be summed up and digested in the next line:

We have never heard so many words used to say so little!
And maybe you think the same thing about me!

AN EDITORIAL---

Sanderson residents have become aroused!

The arousal came at about 4:00 A. M. Sunday morning!

It was at that time that another explosion occurred at the home of Mr. and Mrs. A. J. Riess. The force of the detonation broke a window on the porch and knocked items off the wall inside the house. It also scared that family tremendously, and all other families in that portion of town according to their nearness and according to the force of the explosion.

There is no need to mention - but we will for the record - that there is no reader who would accept this frequent occurrence at their house agreeably.

And no one should expect the Riess family to accept it agreeably.

Whatever triggered such actions by a person or persons now is beside the point. The harassment of this family, and of the neighborhood, and of the community has reached a point that should cause every resident to be ready to take whatever action is necessary to see that it doesn't happen again, or if it does, the person or persons guilty be punished to the full extent of the law.

In a conversation with Sheriff Bill C. Cooksey Monday morning, this writer sought information concerning the previous bombings and rumors we had heard concerning investigations about them, and the sheriff stated that he had absolutely nothing in the way of evidence up to this point to point the finger of guilt to anyone. He also stated that he had exhausted every known effort to apprehend the guilty person or persons. He asked us to appeal to the citizens for help of any kind to stop what he said was in his opinion one of the most cowardly, gutless acts of which he had personal knowledge. He said that if any person would give him any information he would welcome it, or if they would rather give the information to the grand jury they would have the opportunity when that body met next month.

The sheriff's department is only two men and they can't be everywhere at once. There is so much they can do and so much they can't.

If the cessation of this action takes the cooperation of us as citizens, then we should give all the cooperation we have or not complain if no one else does and if your home is the next one that is bombed for whatever reason!

Our entire system of law enforcement is no stronger than we as citizens, grand jurors, petit jurors, or in whatever capacity make it to be.

Today is a new day and a new opportunity to begin all over in seeing that we have a quiet and peaceful environment, a place that is pleasant for us and our neighbors.

And above all a good place for the rearing of our children in an environment of good examples by the adults.

Should we settle for less?

Mrs. Ken McAllister underwent major surgery on Monday morning in a Fort Stockton hospital and is in satisfactory condition.

Oil and Gas Output Is \$5.2 Million In Terrell County

Oil and gas wells provide approximately \$5.2 million a year of Terrell County's economic output, according to statistics released by the Texas Mid-Continent Oil and Gas Association.

Based on most recent U. S. Bureau of Mines production figures, the Association compilation showed that Terrell County produced crude oil valued at \$1,500 in 1966 and natural gas valued at \$5.2 million.

Texas oil production in 1967, responding to demands for more domestic crude as a result of the Israeli-Arab conflict, totaled 1,050,000,000 barrels, a statewide increase of about 5% over 1966.

"Production from Terrell County last summer helped prevent any oil scarcity for U. S. consumers at a time when one-third of the world's supply was cut off. We must keep in mind that it may be difficult for Texas fields to sustain production in future emergencies if the discovery of new reserves continues to lag, due to lack of exploratory drilling," one of the Association officials stated.

The annual study showed that Terrell County ranked 125th in Texas counties in total value of its production of some 499 barrels of oil and 39.7 billion cubic feet of natural gas.

County landowners and others with mineral interests cashed checks totaling about \$646,000 during the year. Likewise, the county's flow of oil and gas generated \$362,000 a year in production taxes paid by producers and royalty owners to the state treasury.

Reports show that 38 persons directly employed by the oil and gas industry in the county have an annual payroll of \$125,000.

Suicide's Body Found Near Here

The body of a man was found in a cave on the Harrell ranch east of Sanderson last Tuesday evening by Juan Sanchez, a laborer on the ranch.

Peace Justice W. G. Shoemaker ruled death self-inflicted after examination of the evidence.

Sanchez reported the finding of the body while looking for some sheep in Sanderson Canyon and noticing a foul odor emitting from the cave. It was late in the afternoon when Sheriff Bill C. Cooksey went to the cave and no effort was made to remove the body that night. It was reported by Cooksey that a .38-calibre pistol with one spent bullet was in the right hand of the man, later identified as T. W. Glowinski, 29, of Homewood, Ill., and he had been shot in the head two or three weeks previously.

The wallet on the body aided identification, Cooksey stated. It is surmised that the man,

VOTE SATURDAY JUNE 1

TO: The Citizens and Voters of Texas FROM: Preston Smith, Candidate for Governor

The purpose of this message is to ask for your support and vote in the Second Democratic Primary Saturday, June 1.

As your Lieutenant Governor for the last six years, I believe I have qualified myself to seek the high office of Governor. You know I finished second among 10 candidates in the First Primary, about 29,000 votes behind the leader with 1,750,000 votes cast.

With your help we can win this runoff against an opponent who has no public record of any kind . . . one who is aligned with groups that want to reject the progressive, constructive programs built by John Connally and his predecessors and replace them with so-called "liberal" ideas of their own.

I want to continue and improve on the start we have made in education, pollution control, law enforcement, highways, water conservation, promotion of industry and tourism, and many other vital areas.

I am proud to have been a part of Texas government for 18 years. Opponents may harp about what is wrong in Texas; I happen to think there are a lot of things RIGHT in Texas. I am proud of my state and its people.

Things can be even better, and I want to work with you in that direction.

It's more or less in the political tradition to lambast your opponent and say a lot of ugly and cutting things about him. I don't want to engage in personalities; my opponent has no public record to criticize. Therefore I am running for Governor on my own merits.

It may be pretty ambitious for a farm-born, farm-raised Texas boy, who worked his way through Texas Tech and spent his adult years in business activities in Lubbock, to aspire to be Governor. You will be the judges as to whether my experience and proven qualifications entitle me to be elected. I will accept your judgment with real gratitude for your past support and friendship.

Please remember that if I am elected, my door will always be open to any Texan who has any problem whatever that the Governor can help with. I will always be interested in good government. I will always be interested in you.
