It Depends

How You Look At It!

There are some things that appear the same almost any way you look at them! The fire that destroyed the home of Mrs. J.D. Nichols Friday is one of those things! The cooperation of friends and neighbors, the willingness of everyone to do anything they could, and the people accomplishing what they did accomplish with what they had, was something good to be a part of. (And we still remember our English rule about prepositions and sentences. There's just no better way to say it!)

When the Fort Stockton equipment and men got here they were kind enough to say that the local firemen had done a good job, and they doubted that they could have done any better with more equipment.

Young people in their 'teens were untangling hoses, running messages, passing out cold drinks, hauling furniture and belongings from the yard to places of safety; older young people were helping firemen in the actual fighting of the fire, moving out furniture, etc., and whatever they could to help.

Still older people who had more experience in operating hoses and the fire equipment were doing that and turning over some of those chores to the younger men, while the ladies were helping to take care of the personal belongings of Mrs. Nichols and seeing that it was put in some kind of order and in storage.

And those still older were staying by Mrs. Nichols' side to console her and indicate their neighborly concern and try to see to her comfort.

Others rounded up the extra tank truck, hose to lay the water line from the hydrant, kept the pumpers going, passing out cold drinks to hot workers, and did all sorts of things to help out, even some by just staying out of the way!

There is a certain comradery connected with something like fighting a fire, helping neighbors, fighting wars, etc., that draws people together in a way that nothing else does. Everyone appreciated the work done by others around them in helping ease the load in some way.

Mrs. Nichols expressed her appreciation over and over again.

There is a probability that Dryden subscribers to The Times will not get their papers before Saturday, and if not then, it will be Monday before the papers can be delivered as the truck will not run from Del Rio to Dryden on Sunday, which also means that postal patrons will not get any mail in Dryden on Sundays.

Gilbert Salazar, right, made his last run from Sanderson to San Antonio Friday of last week. He has been coming to Sanderson for almost 12 years as a mail truck driver. He is shown bidding "adios" to An-

gel Tarango of El Paso, who has been driving into here for 16 years and met Salazar here many times during the past 12 years. Postmaster J.R. Hodgkins is shown at right looking on.

Fire Destroys Mrs. Nichols' Home Friday Last Week

A fire which began at about 5:45 p.m. Friday destroyed the house occupied by Mrs. Joe D. Nichols at 105 W. Pine St. The origin of the blaze was thought to be overloaded wiring. The fire began in the area of the electric switch-fusebox.

By the time firemen arrived and could begin putting water to the blaze, the house was filled with smoke and the solid-frame structure was tender for hungry flames. Almost all of the personal possessions and furniture were taken out of the house before there was much water or smoke damage.

Mrs. Nichols, who was at home at the time, was given a comfortable chair in the shade of the garage with a Bible in her lap to watch the activity of the firemen and received the condolences of friends and neighbors.

A water tank truck belonging to Border Construction Co. came to the site of the fire to give assistance to the volunteers who were fighting the blaze, and a hose was laid from the corner of Oak St. and First St. to the pumper trucks, less than a block away. Much of the fire was in the attic and the roof, just under sheet metal and was difficult to get to.

A fire truck and several volunteer firemen from Fort Stockton came to aid the Sanderson volunteers, but arrived after the fire was well under control. Their help had been sought before the Border Construction Co. truck arrived and before the line was laid from the fire hydrant and it looked as though the fire might get out of hand.

Mrs. Nichols has occupied the house since it was built in 1924. Mr. and Mrs. Nichols resided in the home until his death a few years ago and she has continued to live there alone since that time.

Historical Appreciation Week To Be Observed June 30-July 6

In observance of historical appreciation week, the Terrell County Historical Survey Committee will host an "old-timers' reunion" at the courthouse lawn at 3:00 p.m. July 4th.

Mrs. W.H. Grigsby, president of the committee, stated that there is no age limit, young and old are invited to come by the location for a period of fellowship, renewing old acquaintances, and exchange ideas of how we can best put Terrell County "on the map".

The committee has place mats ready for distribution in local cafes and restaurants in observance of "Appreciation Week".

SUMMER READING PROGRAM HAS 27 ENROLLED

Mrs. Irvin Robbins, president of the Terrell County Public Library, has announced that there are 27 children enrolled in the summer reading program which will be concluded August 15 with a special program and the awarding of prizes.

Mail Service Halted From East Friday

Mail service from Sanderson to the east or from San Antonio to Sanderson ceased last Friday. The mail truck that leaves San Antonio daily will come to Dryden and turn around Mondays through Fridays and will stop at Del Rio Saturdays and Sundays, leaving Dryden without any incoming mail for two days a week, according to a story in the Del Rio News-Herald last week.

The lack of a truck into Dryden Saturdays and Sundays, also means that there will be no mail leaving that town either of those two days.

The story from Del Rio is that letters mailed in Sanderson for Del Rio or San Antonio, and points nearby, or to Dryden, will go to El Paso, then to Fort Worth, and thence to San Antonio and on to Del Rio or to Dryden on Mondays through Fridays.

The information to the Del Rio postmaster was from Weldon A. Tyler, transportation coordinator for the U.S. Post Office in San Antonio, according to the Del Rio News-Herald.

Roping Arena Being Re-Built

The Sanderson Rodeo Club is building a new arena north of Sanderson on US 285 further out than the last one which had to be abandoned because the land was sold. The group is putting up what appears to be a more permanent-type facility, all pipe posts and braces to support the fencing.

The arena is just across the highway from the Lee McCue ranch house, about two miles north of town, and plans are to have it ready for roping events on July 4.

The work at the arena is being done by members of the Sanderson Rodeo Club either directly or indirectly.

The rodeo ground in 1926 was located about where the American Legion softball diamond is now located and is pictured above with a crowd of rodeo fans. The wire fence through which the picture was taken was later replaced by a board fence and the area was also used as a baseball field and later as the football field. The picture was loaned by the John L. Newtons of El Paso.

About the only hope for a change in this procedure for postal patrons in Dryden and/or Sanderson is for individuals to contact their U.S. Senator, John Tower, explain the situation and ask for some help. One of the ways to change the situation for Sanderson postal patrons is to have a change of ZIP code.

Some people feel that we would be better off in the Midland SCF, rather than a change to the Uvalde SCF. But from where we sit, to help with the delivery of mail to Dryden seven days a week, and to speed delivery of mail from San Antonio, the change to Uvalde would better benefit that cause only.

The whole deal would depend on where most of the vital mail comes from - or upon how you look at it!

STATE CAPITAL Highlights AND Sidelights

by Lyndell Williams

TEXAS PRESS ASSOCIATION

AUSTIN, Tex. — A flood of Mexican aliens, estimated at more than a million a year, is pouring into Texas, according to a new Texas Good Neighbor Commission report.

More than half the illegal entrants cross the Rio Grande into Texas.

Good Neighbor Commission said the number of such entries is greater than the total number of immigrants who entered the U.S. legally from all the countries of the world.

Last year, the GNC noted, 575,000 deportable Mexican aliens were found in the U.S., and immigration officials figure one escapes for every one apprehended.

Sophisticated smuggling techniques aid the crossings.

Immigrations have a social and economic impact in virtually all regions, since the aliens move on to metropolitan areas all over the U.S. in search of better jobs and safety from arrests.

Top AFL-CIO officials promptly called for tough new state laws making it an offense to hire illegal aliens, punishable by stiff fines or prison terms.

DEMOCRATS TO DELAY — Democrats are still in a dither about whether they should "recess" their September 17 state convention until September 19 to avoid a conflict with a high Jewish holy day.

A rules change to allow the delay will be aired at a special meeting of the State Democratic Executive Committee in Austin July 16.

If hotel rooms can be made available September 19, SDEC will consider the change (to keep the convention from falling on Rosh Hashana, the Jewish New Year). But a three-fourth majority is necessary to order the rules amendment.

APPOINTMENTS — Clyde Johnson of Bulverde and San Antonio was named by Gov. Dolph Briscoe to the Texas Water Quality Board, succeeding the late Gordon Fulcher of Atlanta.

Briscoe also named E. Carl Dillard of Pearsall to the State Judicial Qualifications Commission. He reappointed five State Health Advisory Committee members and appointed as new Committee members Mrs. Edd Henard of Wellington, Mrs. Emma Nugent of Orange, Mrs. H.L. Long of Kilgore, Mrs. Marie Bynum of Longview, Rogers Wilson of Austin, W.W. Manley of Terrell, Rev. Claude Black of San Antonio, Domingo Pena of Corpus Christi, Ernest Coker Jr. of Conroe, Ronnie Boules of Pecos and Ed Baker of Arlington.

AG OPINIONS — Atty. Gen. John Hill held a newspaper's donating free space to an official's column when he is a candidate for reelection is not a campaign contribution under the law.

In other recent opinions, Hill concluded:

- A county commissioner may not be paid for serving as appointed lawyer for an indigent defendant.
- Texas Water

Development Board has a duty to approve or disapprove plans for proposed levees along any stream subject to floods or overflows.

- An appointed attorney who represents both an indigent criminal defendant in district court and a juvenile in juvenile court the same day may not receive more than one fee.

WELFARE ROLLS DECLINE — Fewer Texans got welfare benefits last year, the Department of Public Welfare reported.

The department's annual report showed Old Age Assistance was down from an average of 210,000 monthly in 1972 to 182,000 in 1973.

Aid to Families with Dependent Children declined from a peak of 121,588 in February 1973 to 118,681 families in July.

COURTS SPEAK — The State Supreme Court held unconstitutional a new state law regulating juke boxes and other coin-operated amusement machines.

Attorney General Hill called on the U.S. Supreme Court to accelerate a Texas

case challenging impoundment of water pollution funds by President Nixon.

Austin, San Antonio and Lower Colorado River Authority called on the Third Court of Civil Appeals to require the Texas Railroad Commission to force Lo Vaca Gathering Company to live up to its gas supply contracts.

The Court of Criminal Appeals upheld a life sentence given a Dallas man for assault to murder a police officer.

A hearing was set in the Supreme Court for July 17 on whether two elderly sisters can get back \$100,000 and 7,500 acres of land they gave to the Stephens County Museum, Inc.

The high court ordered the Dallas Court of Civil Appeals to take another look at adequacy of a \$4,146 damage award given a Van Zandt County man who was bitten on the hand by a neighbor's hog.

OIL ALLOWABLE SET — The statewide oil allowable for July was fixed by the Railroad Commission, for the 28th straight month, a 100 per cent level.

Major crude oil buyers asked for 3,843,362 barrels of oil daily in July, a decrease of 36,087 from June.

Commission Chairman Jim Langdon pointed out that the U.S. still imports 1.5 billion barrels of crude annually — a "very long way" from self-sufficiency.

Exceptions to the 100 per cent order were East Texas and Kelly-Snyder fields which were restricted to 86 per cent production.

BEAUTIFICATION AWARDS MADE — Seven

cities received Governor's Community Achievement Awards for outstanding community beautification projects during the last year.

Winning cities were Stanton (under 2,500); Eastland (2,501 — 5,000); Athens and Jacksonville (5,001 — 10,000); Lufkin (10,001 — 20,000); New Braunfels (20,001 — 60,000) and San Antonio (over 60,000).

Eighty-six communities submitted entries in the competition. Awards were made at the seventh annual meeting of the Beautify Texas Council here.

BUDGET HEARINGS START — Hearings of the 1976-77 state budget — the first to use the new zero-base system — are under way.

Some of the early requests by state agencies reviewed by the Legislative Budget Board and the governor's office are running almost twice current spending.

Requests, under the new plan, are divided into three levels — bare minimum, middle bracket and highest feasible.

SHORT SNORTS — Twenty key state agencies report substantial employment increases for blacks and Mexican-Americans.

New textbooks considered for school use will go on display July 1 in 20 regional education service centers.

A \$48,000 state award from the Department of Mental Health and Mental Retardation will assist Attorney General Hill in

legal research on rights of the mentally retarded.

Texas is seeking more than \$17 million in federal funds to help finance public school programs for children of migrant farm workers during the 1974-75 school year.

More than 175 Texas areas are eligible for flood insurance through a new special program administered by the National Flood Insurers Association.

"Nothing is quite so annoying as to have someone go right on talking when you're interrupting." — Elizabeth W. Spalding, The Kentucky (Bardstown) Standard.

THOUGHTS

From The Living Bible

The man who wants to do right will get a rich reward. But the man who wants to get rich quick will quickly fail. Giving preferred treatment to rich people is a clear case of selling one's soul for a piece of bread. Trying to get rich quick is evil and leads to poverty. In the end, people appreciate frankness more than flattery. A man who robs his parents and says, "What's wrong with that?" is no better than a murderer. Greed causes fighting; trusting God leads to prosperity.

Good Records Are Needed For '74 Agri-Census

Ranchers are asked to get ready for the 1974 Census of Agriculture! Good records are necessary for an accurate filing of the requested information, according to the United States Department of Commerce. The Bureau of the Census is the federal agency that will conduct the 20th nationwide Census of Agriculture during the first part of 1975. The Bureau is a part of the U.S. Department of Commerce's Social and Economic Statistics Administration.

Ranchers will receive their report forms by mail early in January. They should fill them out and return them promptly. Having accurate and detailed records will make it easy for the rancher to do this. Questions will be much like those in the last previous agriculture census which covered farming and ranching during 1969.

Questions on livestock and poultry will cover the number and kind as well as the number sold and sales value. Quantities and sales value of their products will be sought.

Details will be requested about farm products produced or marketed under contract. A few questions will be included about hired and contract labor, the number of workers and cash wages paid; also about any injuries to workers.

Further expenditure questions will cover amounts spent for feed, fertilizer, pesticides, lime, gasoline, and other farm fuels, machine hire, and livestock and poultry purchases.

There will be questions about the various types and uses of land, such as cropland not harvested, other pasture and woodland, and about the value of land and buildings on the farm.

Operators will be asked about farm-related income, such as recreational services, customwork provided other farmers, or payments for participation in government farm programs.

Two types of report forms are being prepared: one for farms with sales of \$2500 or more, and another less detailed form for places with sales of less than \$2500. No matter which form a farmer or rancher receives, he need answer only those questions that apply to his operation. He should skip questions that apply only to other types of agricultural operations.

By federal law, every report is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The mail method reinforces confidentiality. It also allows the farmer to complete the report at his convenience with accurate information from his records.

PUBLIC HEARING NOTICE

A Hearing Commission of the Texas Water Quality Board will hold a public hearing beginning at 2:00 p.m. - July 26, 1974 Council Chambers City Hall 500 E. San Antonio El Paso, Texas

in order to consider evidence relative to the Waste Load Evaluations for the following segments of the Rio Grande Basin:

- Segment No. 2307 - Rio Grande - Rio Conchos (Mexico) confluence near Presidio to Riverside Diversion Dam
- Segment No. 2308 - Rio Grande - Riverside Diversion Dam to New Mexico
- Segment No. 2311 - Pecos River - County road low water crossing near Pandale to Red Bluff Dam
- Segment No. 2312 - Red Bluff Reservoir

The evaluations have been made pursuant to Title 40, Code of Federal Regulations, Part 130, Sections 130.24,

130.25, and 130.26, and the State of Texas Continuing Planning Process which requires a waste load allocation for those segments classified as water quality limiting. Segments classified as water quality segments are defined as those segments in which the measured instream quality does not meet the Texas Water Quality Standards.

The purpose of the Waste Load Evaluation is to define waste treatment levels that will result in the stream segment meeting applicable stream standards. The general approach followed is: a) describe the stream segment, b) define the water quality problem, c) calculate the segment assimilative capacity, d) define the localized assimilative capacity by mathematical modeling, and e) establish acceptable waste discharges and schedules of implementation.

Copies of the evaluations are available upon request. Persons having questions or desiring to make comments in regard to this matter may contact Mr. Jerry Mullican, Administrative Operations Division, Texas Water Quality Board, P.O. Box 13246, Capitol Station, Austin, Texas 78711; telephone (512) 475-3454. This hearing may be continued if necessary.

Issued this 19th day of June, 1974.

COUNTY HISTORY APPRECIATION WEEK
