### **Applique Is Keynote Of Remodeled Room**

COLOR is important in making harmonious rooms from odds and ends, and nature is the best source for color inspiration. The soft golden color of wheat, the orange-red of poppies and the blue of cornflowers were worked into

the charming applique design you see here over the desk.

Stretched over a piece of cardboard to fit an unused picture frame this piece of applique work became the keynote for the interesting furniture group you see here. The top of the old desk was cut away and it was boxed in be-tween book shelves. The padded stool was made of a box. The sketch shows how the applique colors were repeated in paint and fab-ric. The desk accessories also repeat these colors.

NOTE-Now is the time to start a really interesting piece of hand work that will fit into that room that you expect to re-model next spring. A stamping pattern, color guide and directions for all the stitches in the graceful applique design shown here may be obtained for 15 cents. Address:

#### JAP ATROCITIES: 'Death March'

"Death March on Bataan." In these four ghastly words, the late Lieut. Col. William Dyess, who led a party of officers and men in escaping from Jap imprisonment, told a still more ghastly story of horror and atrocity committed against the heroic U. S. and Philippine defenders of Bataan by the enemy. On 85 miles of road leading from

Bataan to San Fernando, Colonel Dyess related in a war and navy department release, U. S. and Fili-pino troops plodded along from dawn to dusk for six days, thirsting under a piercing sun. Sick and delirious were dragged from the straggling columns and cruelly put to death. In one instance, prisoners were forced to bury three Americans and Fili-

pinos alive at bayonet point. Conditions in prison camps were equally atrocious, the army and na-vy report revealed. At one camp, the death rate was 20 Americans and 150 Filipinos a day in the first week. In the second week the rate jumped to 50 Americans and 500 Filipinos through starving and overwork.

### Strike at Supplies

To make sure that there will not be another Tarawa when doughboys land in the Marshalls astride our supply lines in the mid-Pacific, U.S. bombers continued pounding defense installations in the islands. On New Britain, Allied bombers

## ITALY:

### At Nazis' Rear

With their supply lines leading to Cassino under fire of the Fifth army advancing inland from their invasion beachheads below Rome, the Germans launched a series of counterattacks in the new battle region while their long-range artillery sought to break up Allied troop concentrations.

Near Cassino U. S. and French forces moved through rugged Nazi fortifications to ring that key to the broad highway to Rome on two sides, while farther to the south, British units battered against the right flank

of the enemy defense line. By surging inland after their landings on the sandy beaches below Rome, the Fifth army threatened to cut off an estimated 100,000 German troops in the Cassino area, some of whom were being withdrawn back to counter the new Allied thrust. As the Germans moved back to meet the threat, Allied bombers roared in to machine-gun the columns.

#### FARM PRICES: Supports Announced

Subject to congressional approval, the War Food administration announced support prices for 34 principal farm products, with the only big decrease being the \$1 per hundredweight for hogs effective October 1.

Loans for corn and wheat would be made at 85 per cent of parity, and for cotton, rice and tobacco at 90 per cent of parity. Potato sup-ports would be pegged at 90 per cent of parity compared with 92 in 1943.

On a per bushel basis, support prices would be higher on soybeans by 14 cents, flaxseed 10 cents, barley and grain sorghums 10 cents and sweet potatoes 10 to 20 cents.

Peanut supports would be raised by \$10 a ton, sugar beets \$1.50 a ton, and sugar cane 30 cents a ton.

With over \$1,000,000,000 in socalled luxury levies agreed upon, only silver plated flatware (knives forks, etc.) escaped taxation. Otherwise, the lawmakers decided upon a

20 per cent tax on jewelry. In raising \$1,000,000,000, the legislators recommended a 25 per cent tax on cosmetics and toilet articles; 1 cent tax on every 5 cents of amusement admissions; 30 per cent tax on cabaret or night club bills, and \$20 annual tax on pool tables and bowl-

ing alleys. It was also recommended that air mail postage be boosted to 8 cents and locally delivered mail to 3 cents.

#### CIVILIAN TIRES: Less Predicted

Because chemical difficulties have been encountered in processing oil into synthetic rubber ingredients and military requirements have in-creased, a cutback in civilian tire production from 30 to 20 million casings for 1944 loomed.

Production of heavy duty tires for busses and trucks also was expected to fall below expectations, since a mixture of natural rubber is required for manufacture of these casings and the natural rubber stockpile has dropped to a low level, partly because of the failure of South American growing programs to fully develop.

The rubber pinch also has affected recapping plans, with the government again specifying reclaimed scrap for retreads.

### **RUSSIA:** Form Trap

Fighting raged on two widely separated sectors of the 800-mile Russian front, with the Reds fanning out below Leningrad in the north, and the Nazis counterattacking to strengthen their position 80 miles from the Rumanian border in the south

As the Reds surged forward below Leningrad, they chewed two big holes in the Germans' positions on the northern and southern ends of this front, threatening to swing toward each other and throw a loop around the enemy's rear.

Far to the south, the Germans pushed slowly into Russian lines above the Rumanian border, keeping massed Red armies off balance, more than attempting any real breakthrough. In Poland, Nazi resistance stiffened.

#### **Reject Mediation**

The U.S. offer to mediate Russia's claim to one-third of prewar Poland was rejected by the Reds, and the situation became even more complicated with Foreign Secretary Anthony Eden's declaration that Great Britain could not recognize any territorial changes made during the war without consent of the parties concerned.

Russia's rejection of the U.S. mediation bid emphasized Stalin's disposition not to deal with the present Polish government - in - exile, which he has accused of strengthening Germany by its requests that an impartial commission investigate Nazi charges that the Reds slew 10,000 Polish officers near Smolensk.

SOLDIER VOTE:

### **Big** Issue

Already a big issue of the present congressional session, the question of soldier voting in 1944 became a bigger issue when President Roosevelt directly appealed to the legislators to provide for federal supervision over service balloting.

Declaring that a system of absentee voting in which states would determine eligibility and print complete ballots would involve too much shipping and time, the President asked that the federal government be allowed to distribute blank ballots on which soldiers would then write in the names of their election choices or merely the name of the political party they favored.

Champions of states rights as-sailed the President's recommendations, standing firmly for state supervision over registration to assure that each ballot is cast by the registrant himself, and objecting to the services' power to decide the voting time because permission might be given just before or in the midst of a great battle, when soldiers might feel that the country

a notable achievement since certain crudes have a wax content of only three-fourths of 1 per cent. In 1944, emphasis will be placed on production of micro-crystalline waxes, which have proven especially useful in packaging food rations

because thin coatings resist moisture and the substance retains its flexibility in low temperatures. Micro-crystallines are further useful in proofing army shoes against mustard gases and protecting metal parts from the elements.

Because industrial requirements for alcohol in 1944 will approximate

632,000,000 gallons and keep distilleries operating at 150 per cent of their rated capacity, no whisky will be manufac. tured this year. War Production Czar Donald Nelson declared.

Alcohol reserves had dropped to 80,-000,000 gallons by De-Donald Nelson cember, 1943, a dan-

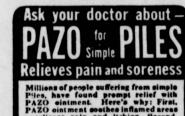

gerous level, Nelson said, because synthetic rubber plants, arsenals, powder plants and tank terminals for lend-lease require a working inventory of 30,000,000 gallons.

To assure 1944 supplies, Nelson said the War Production board was seeking to secure sufficient molasses and corn for distilleries, to persuade the British to meet their own requirements by processing molasses from the Caribbean, and rushing new grain alcohol plants to completion.

#### **TELEPHONE RATES**

Interstate telephone rates will be reduced March 1, by agreement beween the Bell Telephone system and the Federal Communications commission. Subscribers will be saved about eight million dollars a year, it is estimated. Putting night long distance telephone rates into effect at 6 p. m. instead of 7 p. m. will account for most of the reduction, or about 51/2 million doilars.

The remainder is accounted for by a lowering of the overtime rate on interstate teletypewriter service.

### **New** Simplified Plan For Food Rationing Explained by OPA

On February 27, 1944, the Office of Price Administration will simplify food rationing. All red and blue stamps in War Ration Book Four will have the same point value: 10 points each. Tokens valued at one point each will be given as "change.

The new simplified plan is especially beneficial to merchants. It will reduce the number of stamps they have to handle by at least 60 per cent. Under the present system stamps have point value of 8, 5, 2 and 1 points. Thus, the average value of each stamp is 4 points. Under the new system each stamp will have a value of 10 points.

It will speed up the checking of points on merchandese and remove considerable congestion for the merchant during busy hours.

It will mean a saving of thous-Unless you're an old hand at gardening, you'd better stick to the ands of hours for all persons handling ration currency. Tokens are made in two colors-

JESUS ON THE MOUNTAIN AND IN THE VALLEY

LESSON TEXT-Mark 9:2-8, 17-27. GOLDEN TEXT-I believe; help thou mine nbelief.-Mark 9:24.

The vision of the mountain top prepares the believer for service down in the valley. "Where there is no vision the people perish," said the wise man of old (Prov. 29:18). For want of a true vision of God, a knowledge of His truth, and the Godgiven constraint which makes men give themselves in sacrificial service, the people will perish in their sins.

But let men come to know the truth as it is in Christ, learn to know Him as the Son of God glorious and powerful, and then let them translate their knowledge of Christian truth and their personal spiritual experiences into the daily ministry to the needs of their tellow men, and there will be songs of salvation and joy.

1. Knowing (vv. 2-7).

The transfiguration of Christ doubtless meant much to Him in preparation for His coming death and resurrection. It was a fore-gleam of His kingdom glory.

In this lesson we are concerned with the experience of the disciples rather than the feelings of our Lord. Fundamental in both Christian life and service is a clear understanding of the person and work of Christ. One may come to Christ knowing little more than that He is the divine Saviour, and one may enter into Christian living with a meager knowledge of the doctrines of the Bible. But the Christian who fails to grow in knowledge will not grow in grace as he should.

God sets no premium on ignorance, in fact it is quite evident that the great blight on the Christian church today is the appalling lack of understanding of God's Word.

The disciples came to a fuller conviction that He was the Son cf God as they saw Him transfigured and heard the Father say, "This is my beloved Son." They learned more plainly the truth of His coming death for the sins of all mankind. They saw in the indescribable beauty of that moment the foregleam of His coming glory. What important truths these are-His deity-His redemption-His coming kingship. Do we have a clear grasp of these truths? If not, let us search the Scriptures.

II. Growing (v. 8). "Jesus only." He filled their vision and their hearts. They had made spiritual progress as they had seen His glory and heard the commending voice of the Father.

Letter games are fine for starting off a party. Give each guest a letter to tie around his neck as he enters, and as others appear, let each one dash around to others to make up words. Select about 10 guests and make them have something unusual. For example, have a man with two unmatched socks, a girl with two different colored hair bows, someone who wears his watch on the left arm, a girl with two different colored earrings, etc. Everyone is provided with a list of above so he knows what to look for. effective life and testimony. They may not be in outward manifestation, in fact they are more often in the inner recesses of the soul; but they transform men and send them forth to magnificent living for God. One wonders if much of the dearth of power in the Christian church is not to be attributed directly to the lack of such experiences with God.

The disciples had an unforgettable mountaintop experience. Even so have many others found the secret of power.

Let us remember that such privileges are not reserved for a few, they are the birthright of every Christian. Power without knowledge is a dangerous and destructive thing but knowledge without power is a dead thing. Let us study God's Word, but let

the truth be baptized in the overflowing spiritual power of a personal experience with God.

In regeneration all that Christ is and has for us is made available. If we have not taken out our inheritance let us do it at once.

III. Serving (vv. 17-27).

One of the lessons that seems hard to learn and to keep constantly ef-fective in the life of a Christian is that mountaintop experiences of spiritual uplift are not an end ir themselves, but a preparation for service. All too often we come to regard such times of peculiar blessing, whether in the privacy of our own room or in the great conference of Christian workers, as something which should glow warmly in our own hearts, making us glad in the Lord, and not as a preparation for ministry to others. Jesus and the disciples went up

to the place of prayer, into the place of glory, and down to the place of service. How fitting is that sequence.

Much confusion exists in the church because those who have foolishly abandoned God's Word and substituted the energy of the flesh for spiritual power have been most diligent in service to humanity; while those who know and accept the truth about Christ, and who profess to believe in the power of the Spirit-filled life, have failed to serve their needy neighbors.

"But Jesus took him by the hand and lifted him up" (v. 27). Verses 28 and 29 indicate that the disciples might have done the same by be-lieving prayer.

### **How Boris Died**

#### **By Frank Gervasi**

(WNU Feature-Through special arrangement with Collier's Weekly)

Here is the inside story of how King Boris of Bulgaria died last August, as told to me by Vassili Dimitroff, a young secretary of the Bulgarian legation in Istanbul.

The death of Boris was mysterious. Some said he died suddenly after too many bullets, and others insisted that his death was from natural causes. The truth seems to lie somewhere in between, according to

Bulgaria, the first to abandon Ger-many in the last war, apparently was about to repeat the performance just before Italy surrendered. Hitler knows that there is a strong pro-Russian element within Bul-garia, which had gained power and

prestige with Soviet successes. One day, two Bulgarian "doctors" arrived in Istanbul. These men, sur-prisingly, had diplomatic passports. They visited the Russian ambassa-doc with whom they lumbad and dor, with whom they lunched and had a long talk, and returned to Sofia the same evening. The next day, Von Papen talked to Nazi Foreign Minister von Ribbentrop on the telephone, and a day later Boris was summoned to Berchtesgaden. Hitler saluted lean, nervous Boris

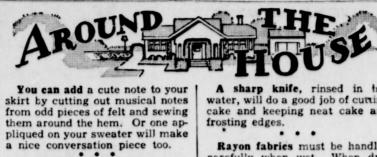

coldly. It had been Hitler's custom to greet Boris with kisses on previous meetings. Now there were none. In the room with Boris and Hitler were Von Ribbentrop and an'i translator Schmidt, whose services ren't required, for Boris spoke r. I man. In the finale, Hitler shoved a paper under Boris' nose with the command, "Sign that!" It was an alliance binding Bulgaria to Ger-many for the duration and specifying that all pro-Russian and anti-Nazi elements within the country

#### Turkey Quitting Mazis.

Hitler has been trying to put the queeze on another state in the Balkan area—Turkey. By an agreement obtained by Von Papen under threat of invasion in 1941, Turkey is obliged to sell all its chrome to Germany as of October, 1943, when the Anglo-Turkish treaty affecting this valu-able mineral expired. The first two shiploads, bound for Constanta on the Black sea, however, were torpedoed by Russian submarines, and it is doubtful whether Germany's commercial treaty with Turkey will greatly benefit the Reich.

That is apparently all right with the Turks, who have been almost completely in the Anglo-American camp.

Money flows freely in Turkey. Everyone seems to have plenty of Turkish liras in Ankara and Istanbul, although the country itself is saddled with the high cost of main-taining a large army and is actually extremely poor.

German Peace Planner. Von Papen at 70 looks like what he is—the old and blunted tool of he is—the old and blunted tool of German Balkan policy. He walks with his foxy head thrust forward. Lately, Von Papen has been talk-ing freely to Turkish friends about the possibility of the Fuehrer's downfall. He even speaks of him-self as Hitler's possible successor. Canny diplomat that he is, Von Papen has also circulated what he calls his "Peace Plan," which is really a blueprint for a negotiated peace such as the Junker militarists of Germany would like to obtain.

# "So can your boy be proud of you!"

"You've earned some sort of medal yourself, I'd say, for giving lots of us drivers safe warning. Good thing you kept harping on rationing. You said limited driving couldn't keep clearing out the rank acids always left from combustion; they'd linger and corrode the engine. But you said that plating, of course, wouldn't soon let metals corrode. And you convinced me, all right, about keeping my engine OIL-PLATED with your patented Conoco Nth oil. Now my OIL-PLATED CONOCO engine is seeing me through, and I say good for you!... helping the home front! They all should know how Conoco Nth gives engines protective OIL-PLATING !"

The how of it is that Conoco Nth motor oil-popular-priced -includes a costly modern synthetic. Its strong "power of attraction" fastens and maintains the OIL-PLATING on inner surfaces. Despite engine inactivity, the unavoidable acids aren't "working right through" the OIL-PLATING, and so the

wartime risk of corrosion is cut! The more extras you're doing to hustle the boys home, the more you need your car and Your Mileage Merchant's Conoco Nth. OIL-PLATE today. Continental Oil Company
