## Attorney General Report Shows Gambling Devices Not In Upton

The offices of County Attorney and Sheriff were highly commended in a letter this week by State Attorney General Price Daniel regarding the absence of slot machines and other gambling devices in Upton County.

The Attorney General's office is sending out lists to each county of the state giving the machines that paid the required federal tax for operation, but there are none in Upton County.

The text of the letter, addressed to County Attorney John Menefee, is as follows:

Dear Mr. Menefee:

As you know, the conference of prosecuting attorneys here on March 30-31 unanimously mmm to request this office to mail to each County Attorney a list of

the parties who paid the 1950-51 Federal tax on slot machines and gaming devices in his county, together with a copy to the appropriate District Attorney. These lists are now being mailed, and I am pleased to advise that there will be none for your county, since the Bureau of Internal Revenue does not show that taxes were paid on any gambling devices in your county for this fiscal year.

Due to the absence of payments of the \$150 per machine tax it may be assumed that your county is free of these gambling devices, since it is very seldom that anyone would display such a machine in violation of the Federal tax statutes. I congratulate you and the other law enforcement officers of your county and hope

that you will be able to continue such a good record in the future. According to the Kefauver Committee reports, slot machines and similar gaming devices are the "easy money" support of the national crime syndicates, drawing from two to three billion dollars annually from the people of the nation.

I appreciate the cooperation of the County and District Attorneys of our state in waging such a vigorous campaign against organized crime that present violators will close shop and outside hoodlums and racketeers will know that Texas is no place for their business.

Sincerely yours,  
PRICE DANIEL,  
Attorney General.

## Possible Completion Seen By Coming Fall

April is usually the month that brings smiles to the brows of farmers with rains... but this year it's different, at least for the farmers in the Pecos County area eight miles south of McCamey.

We still don't have the usual (?) and needed April showers, but with the work of the Upton County Commissioners' Court, and County Judge G. H. "Bud" Fisher, it looks as if April might bring a paved road into the farming area from McCamey.

The Upton County Commissioners are seeking permission from the State Highway Department

to use Farm-To-Market road funds of Upton County to pave the road leading from the present paving in Upton County into the ever-growing farming district.

Judge Fisher expressed hope this week that the road may become a reality before the fall of the year. He is gathering pertinent data and information from various agencies, business men and organizations relative to the importance of the road, and will present the material and arguments to the Highway Board in Austin at an early date.

## McCamey School Board Seeks Consolidation With Pecos District

A proposition that would enlarge the McCamey Independent School District by consolidating the Girvin-Bakersfield District is out of the talking stages, and will come up for action in the immediate future.

The consolidation hinges on Crockett County granting a strip of land that will join the two school districts.

Talks on the proposition have been underway for nearly a year, but have never reached any point where action can be taken.

The Girvin-Bakersfield School

District is dormant at the present time, and unless they become active by September, the law requires them to consolidate.

Also, the law stipulates that they must consolidate with an adjoining school district, and this is where the "Crockett County Neck" comes into the picture.

Members of the Board of Trustees of the McCamey Independent School District, along with those from Bakersfield and Girvin, plan to meet with the Crockett County School Trustees, and the Independent School Trustees in the immediate future to seek a por-

tion of the Crockett County 'neck' so that the two school districts join each other.

The date of the meeting will be set by the Crockett County boards.

An approval by the Crockett County school men would bring about immediate action by the McCamey and Pecos County boards for the consolidation of the two districts.

The Pecos County area would include the farming area, Bakersfield and Girvin and the intervening ranching areas.

## Greif-Coker Engineers Open Local Office May 1

Greif is married and has two children, Sherrie Lyn, 3, and Bill one year old. His family will join him in his move to McCamey immediately.

Stockton branch until his resignation.

Coker is a native of Magdalena, N. M., and attended college at New Mex. A&M. He became associated with the Highway Department in 1937, and been with the agency continuously, except for the period of three years he served in the army engineers during World War II. He has served the department in the Ft. Stockton branch for the past two years. He went to Ft. Stockton from Junction.

**THE CASE OF PAVLOV'S DOG**

A Russian scientist by the name of Pavlov (this was before the days of Communism) once made an interesting experiment with his dog. At intervals, when the dog was very hungry, he fed him. At the same time, Pavlov rang a bell. By and by, instead of feeding the poor pooch, he just rang the bell alone. Then something almost unbelievable happened. The mouth of the hungry dog began watering at the sound of the bell, although no food was put before him. Pavlov's famous experiment had established in the dog what scientists now call a "conditioned reflex." He had seen the food and heard the bell together so often that his mouth automatically watered at the sound. As is well known, scientists frequently perform experiments on dogs and then apply the lessons learned to the human race. The "conditioned reflex" is one of them. In the United States since the depression, it seems as though we have been almost as thoroughly conditioned as Pavlov's dog. The fare which has so often been placed before us could be called "crisis" (we have had an unending series of them, haven't we?) The bell which has been rung so often when the crises were announced to us could be called "patriotism" (how many times have we been called upon to support the government in policies which we knew were wrong?) We have not yet—at least, all of us haven't—been conditioned to such a point that we cannot help supporting the government automatically, as the Russian people have. So whenever the government calls upon us to support another socialistic plan—such as the nationalization of portions of industry—under the guise of solving another "crisis," let us keep in mind the lesson of Pavlov's dog. Unlike the dog, we have the power of reason to fight the conditioned reflex.

**Low Truck Load Limit In Texas Seen As Hindrance To Defense**

AUSTIN, Tex.—Texas has more military installations and greater petroleum production than any other state in the nation—and the lowest truck load limit. Because of defense needs, the urgency for an increased load limit is therefore particularly acute in this state, J. E. Taylor, executive director of Texas Motor Transportation Assn., said recently. Taylor displayed a letter from the Defense Transport Administration, emphasizing the necessity for motor transportation to carry more of the nation's military and civilian traffic. The letter quoted a speech made by Defense Transport Administrator J. K. Knudson before the National Tank Truck Carriers, Inc., at Boca Raton, Fla. Knudson stated that the US is faced with a national emergency and that the transportation problem is a thorny one, inasmuch as there is an unprecedented shortage of railroad cars, and inland waterway facilities are now over-taxed. First warship ever sunk by a U.S. submarine was a Japanese submarine torpedoed in mid-Pacific by the USS Gudgeon in 1942. Typewriters at The News.
