

While we are away from Friona for a few days we were tempted at first to really "blast away" at something or other, just for the heck of it. We figured we'd be too far away for y'all to get at when the paper came out.

But after reading the recent issue of the Texas Press Association magazine dealing with names of newspapers we thought perhaps the article would prove entertaining for some of you. Whether or not many of y'all realized it, Texas has some whoppers when it comes to names of towns, and the newspapers in our state are no exception.

Just for conversation, have you ever seen a copy of the Jefferson Jimplecute, or the Moulton Eagle?

If these aren't enough what about the Ferris Wheel, Texas Mesquiter and the Omaha Breeze.

When we told our spouse about the Texas Mesquiter she said that would've been a good name for our paper about this time of the year.

While we were mulling over the names of some peculiar papers Johnny Wilson brought us an issue of an odd one--the Brewery Gulch Gazette from Bisbee, Arizona.

In examining the Brewery Gulch Gazette we found the paper an interesting one to browse through.

The paper is published weekly in a section of Bisbee which is dedicated to the fact that the Western lore of that country shall not pass unnoticed.

The paper deals little with actual "news" of the current times, but rather is filled with columns and articles dealing with earlier periods of life in Arizona and the West.

As we don't have room for many of the articles in the paper, but to show you what we mean we include the following:

A GOOD JOKE

"An Easterner was in town last week had a good joke played on him by some of the boys on Brewery Gulch. He was stopping at the Saddle Rock Restaurant and Room House and when one of the boys standing at the house brought in a tarantula, they thought it would be a good joke to put it in the tenderfoot's bed, which was done.

When he went to bed and saw the hairy, king-size spider he hollered bloody murder. They told him it was a Brewery Gulch bedbug.

"He took it goodnaturedly and set 'em up for the boys."

That will give you an idea of the flavor of stories for the Gulch.

Under their nameplate on page 1 appears this motto, "The sun shines on Brewery Gulch 330 days in the year, but there's moonshine every night."

With that we'll leave the Gazette.

VFD Called to GS Restaurant

The Friona Volunteer Fire Department answered a call to Golden Spread Restaurant at 11 p.m. Saturday night.

Grease which had fallen under the griddle on the stove had caught fire and momentarily got out of hand. Flames were extinguished however, before the fire department arrived.

THE AIR WAS BLACK---This picture was taken moments before the rain and wind struck Friona Monday evening. The clouds were loaded with dust and rain, a sight not too uncommon in the Plains area.

SECTION 1

DWI, Drunkenness, Hot Check Charged

Activity was moderate for Parmer County peace officers during the past week.

Raymond Everett Jr., about 25, was picked up Saturday in Bovina on a warrant for writing a hot check to E. R. Day last December 7 in Friona. The Bovina Latin American was fined \$10 and costs after pleading guilty in the county court of Judge Loyde Brewer. He was tried Monday morning. His check to Day had been in the amount of \$5.

Sheriff Chas. Lovelace investigated an unusual complaint late Wednesday evening. He was notified that a truck driver and a woman in a car had both reported having a pistol pointed at them by a man in a car, and that the car was headed toward

Farwell. The sheriff started out the highway toward Muleshoe and soon passed the suspect, who was with a companion in a 1955 Ford, traveling very rapidly. Sheriff Lovelace turned around and gave pursuit and overtook the young men, who were going "about ninety."

James Horn, 20, Lubbock, was charged with driving while intoxicated, and his companion (and cousin) Leo Horn, 19, also of Lubbock, was charged with drunken disturbance. Officers took a pellet gun from the duo, which was the "weapon" brandished along the highway and which had resulted in the complaints.

The driver plead guilty and was fined \$50 and costs and assessed three days in jail. He has paid his fine and served

sentence. Trial was Thursday in Judge Brewer's county court. His cousin appeared in Rev. Thornton's JP court, pleaded guilty also and was fined \$25.50 for his offense.

Earl Johnson, 47, Big Spring, was another DWI case. He was arrested Sunday night by Ben Moorman in Friona. He is working on the Highway 60 project in the county.

Johnson was tried Monday afternoon in county court and plead guilty. Judge Brewer gave him three days in jail and fined him \$50 and costs. His two companions, Louie Fulton, 49, Friona; and C. W. Mertz, 52, Fort Worth, were fined \$40.50 in Friona corporation court by Judge Thelma Jones on a charge of drunkenness. They both entered pleas of guilty.

Bob Sartain Uses Unique Transportation

Bob Sartain, son of the Rev. and Mrs. L. A. Sartain of Friona, has solved the gas problem and cost of transportation. He has built his own private mode of transportation.

It took Bob about a week to build his unicycle. He built it from spare bicycle parts. The task took about a week and it was another week before he mastered the art of riding it.

Bob says it takes anyone from a week to a month to learn how to ride a unicycle, depending on how much time they spend on it. He has had the unicycle now for four years.

Bob will be a junior this fall at Wayland College in Plainview where he is majoring in mathematics. He finished high school in Sundown.

Wind, Rain Delay Wheat Harvest

The heavy rains the last three days have delayed the wheat harvest throughout the Friona area.

Rains fell in most of the county Friday night, a small amount fell Saturday night and Monday evening the bottom fell out.

Heavy winds and rain fell on the entire Friona area, beginning at the Rhea Community passing on through Friona, Black and Hub Communities.

Gary Goetz, son of Mr. and Mrs. Chris Goetz of the Rhea Community reported they were nearly under water. Rains in that area have completely stopped any combining and will keep the farmers out of the

wheat fields for at least two to four days.

Dub Ingram of the Hub Community reported he had one-half of an inch Monday evening alone and this, coupled with Friday and Saturday evenings, will prevent him from combining for two days at the least.

The Black Community is in the same position. All these areas were hit by the high winds and rain Monday evening. Virginia Patton of Black said the rains were heavy on their farm and that no combining was being done at this time.

The elevators throughout the county all report complete stop-

page of any harvest.

Friona Wheat Growers said they were going full swing during the day Monday, but when the rains and wind hit they received no further amount of wheat. They had handled seven carloads that day, or 729,000 pounds. They have a full crew at the elevator and everyone was busy until the harvest was stopped.

The Continental Grain Company also reports they had received some wheat but they too will probably not receive any more until it dries enough for the harvest to begin again.

Black Grain Company reports they too had some wheat brought in but like the rest, the harvest has stopped in that community. What per cent of the wheat in the Black Community has been cut could not be determined at this time.

Tri County Elevator east of Black reports that 20 per cent of the wheat in their territory had been harvested until the rains came. Since Friday, they have received approximately 1.75 inches of rain. This will completely stop any harvest until Friday if the conditions remain as they are now.

There was no hail reported during any of these rains and no appreciable amount of damage to any of the crops. However, the high winds may have caused some damage to the wheat crops and barley was definitely damaged by the winds. The percentage of damage sustained to the barley is not known at this time.

It will be a few days before any rate of damage caused to the wheat by the winds is known. A few reports that some has blown down has come in but not enough to estimate a true picture of damage.

From the various reports received, it will be two days at the most before any harvesting is undertaken. In some areas, harvest will not begin again for at least four days. All this of course depends on whether the weather remains as is and does not bring any more moisture to the Friona area.

Group Plans Cemetery Organization

Plans are being made for a community wide meeting at the American Legion Hall Monday evening of next week at 8. This meeting will be open to the public and anyone interested in the upkeep and improvement of the cemetery should be present.

Interest in a permanent cemetery organization is good and several individuals, clubs and civic organizations have been conducting a fund raising drive during the past few weeks. Current plans call for concluding this drive at the end of the week.

Anyone who is interested in contributing to the fund and has not been contacted may do so by calling Mrs. Dan Ethridge, Mrs. Weldon Dickson, Loyde Brewer, Jake Lamb, Cayson Jones or O. J. Beene.

Names for a slate of officers will be presented by a nominating committee made up of Frank Spring, Mrs. Dan Ethridge and Mrs. Claude Osborn.

Several interested persons attended a meeting at the City Hall Monday evening. The advantages and disadvantages of different plans for providing water for irrigation purposes at the cemetery were discussed by a consulting engineer from Amarillo.

Miss Patton Elected Grand Representative

Virginia Patton, 16-year old daughter of Mr. and Mrs. Coy Patton of the Black Community, was elected Grand Representative from Michigan at the Grand Assembly of the Order of the Rainbow for Girls held in San Antonio last week.

Virginia is the first Rainbow Girl from the Friona Assembly ever to receive this honor. She will attend the Michigan Grand Assembly next year.

Virginia and Carolyn Parker received their (B) certificates during the three day assembly meetings.

The Rainbow Girls left Friona June 13 for San Antonio. The first session of the Grand Assembly took place Monday night and sessions were held twice a day on Tuesday and Wednesday.

During the Grand Assembly, Jimette McLean was a member of the Grand Choir.

Immediately following the sessions of the Grand Assembly, the girls and their sponsors went to Bandera and the Mayan Dude Ranch where they spent Thursday riding horses and going swimming.

On Friday, the girls made a tour of the state capitol. They toured the capitol building. They were conducted through the Senate Chamber, the House, the Governor's office and the treasury, where they viewed the vaults, by Rev. W. H. Townsend, Chaplain of the Senate Chamber. This tour was arranged in advance by Rep. Jesse M. Osborn of Muleshoe and State Senator Andy Rogers

of Childress.

They went to Texas University to visit Janice Bock. The girls report that Janice was very happy to see the home folks.

The group began the return drive Friday night and arrived in Friona Saturday at noon.

When asked to explain how she felt concerning the honor bestowed upon her, Virginia said, "I am very pleased and honored to have such a high award placed on me. I would like to thank the advisory board of the Friona Assembly for all the help and confidence they have placed in me."

"We had a real nice trip and I would like to thank the

of 19 to 18. Complete details were not available at press time and individual scores and winning or losing pitchers have not been made known.

Plains-Hurst was to have played Black Monday night but it also had to be cancelled. The make-up date for the game has not been scheduled at this time.

Mr. and Mrs. Ben Konis of New York City are visiting in the home of Mr. and Mrs. C. W. Dixon.

Floyd, Goetz Return From Girls, Boys State

Geneva Floyd and Gary Goetz returned recently from Girls and Boys State in Austin where they practiced and observed the different levels of government.

Gary left for Austin June 6 and returned June 13. Geneva left Amarillo June 9 and returned June 20.

While in Austin, the boys and girls were divided into cities and the cities into precincts. Two cities made a county and four counties made up the state.

The youthful representatives made a thorough study of local county, city and state govern-

ment. They conducted campaigns and elected officers from each of the governments involved.

There were two political parties, Nationalists and Federalists.

After proper officers were elected, the legislature was formed and worked on bills, resolutions and laws. The legislature, made up of youths from all over Texas, then debated the measures.

During their stay in Austin, the high school juniors visited the Governor's Mansion,

state offices, toured the Capitol Building and attended a session of the present legislature. Governor Daniel DeLiberated the inaugural address at the installation of Boys and Girls State officers.

Geneva says she had a wonderful time and really learned a lot about government. She further said one of the highlights of the week for her was the speech delivered by the Governor of Boys State. "It was real nice to see a young boy delivering a speech before all those people," she says. Gary says he also enjoyed

the week very much. He said it was a real experience and one he would not forget in a long time.

Gary was elected Chief Clerk of the House of Representatives during the week long meetings. Geneva was a candidate for State Treasurer.

Each year, the trip to Austin is sponsored by the American Legion and the Auxiliary. Two high school students are chosen. The purpose is to train young men and women in affairs of government on the state, city and county level.

"If Only ..."

The aftermath of accidental death has always been a chorus of: "If only ..."

Most shocking to us today is the anguished cry: "If only I'd known they'd gotten into those plastic cleaners' bags!"

The current number of deaths due to the attraction this ultra-thin, shiny transparent material has for youngsters, especially infants, and its property of clinging to little faces on inhalation, has shocked the nation.

That something should, and must be done about such a menace is obvious. But we do not think laws or ordinances or other publicly-administered controls can ever prevent, or even minimize the tragedies inherent in the playful, heedless, and to a large degree, helpless years of early youth.

On careful reflection, most of us will agree with the US Public Health Service and the National Safety Council that this sort of responsibility must remain with parents and cannot be assumed or met by regulation.

"We believe," says the National Safety Council, "the problem of child deaths from polyethylene film is primarily an educational problem, not legislative."

The composite advice is: Don't let your children play with these bags. Don't leave them where children can get them.

If only they would!

The "big blow" from the west reminded some of the old timers of the "black dusters" we used to have here during the thirties.

Beginning Wednesday of next week a representative of this department will be at the annex of the First Baptist Church regularly.

Editor Dave McReynolds is vacationing in "cool Colorado" this week.

Strange things have been happening at the Star office during his absence.

If Don decides to offer a reward for this information, we will keep our readers informed.

to reach us. Our service from the west doesn't seem to be any different.

We also have napkins, thank you notes and other kinds of

social stationery. Anyone interested in printing of any kind should stop by the Star office.

Some of the most amusing incidents we hear happen right here at home.

"Dear family! We rode our pasture Thursday. We saw as follows: 114 jack rabbits, 72 lizzards, 11 antelopes, 4 coyotes, 5 turtles, 5 horny toads and 3 snakes (2 racers and 1 rattler). Having a good time. Write soon. (Other side.) Your oldest son, Kim, P. S. Send

some money with the letter. We got a bang out of the signature since Kim is not only the oldest son, but the only son.

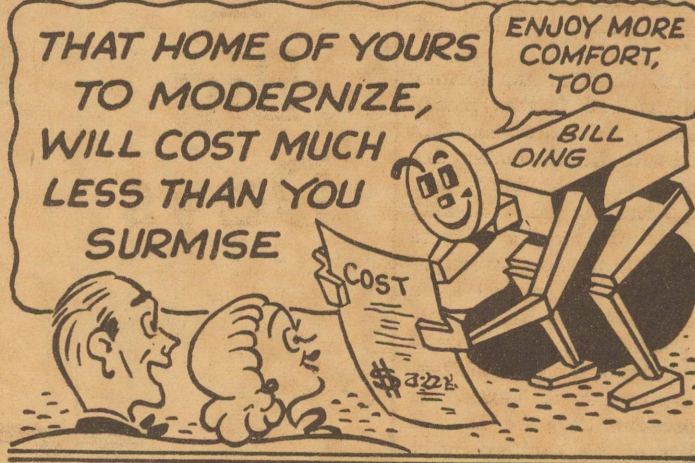

Two of the cutest little girls we've seen around town recently belong to the Walker Freemans.

Pat Foster is attending summer school in Dallas this summer. She's staying with the Ed Lonvicks.

Last weekend she accompanied the Lonvicks and a group of young people from Dallas to Lake Texhoma.

In the near future new teachers will be moving to town. All of us should always keep in mind that all new comers to our city are strangers.

Someone said, "The world is divided into three groups, viz: The small group who makes things happen; the larger group who watch things happen, and the multitude who never know what happens."

Former Residents Visit Relatives Wildcat Underway At Dimmitt

Mrs. Betty Schrock and children, J. R., Karen and Hayward, and Mrs. Dolly Woodley and Shelley all of Casper, Wyo., spent several days last week visiting in the home of Mr. and Mrs. W. E. McGlothlin and Mrs. A. E. Stanley.

Mrs. Schrock and Mrs. Woodley, daughters of the late Henry Stanley, were born in Friona and lived here several years.

Drilling of Amarillo Oil Company's third wildcat in the Palo Duro Basin area is now underway three miles west of Flagg and eight miles south west of Dimmitt in Castro County.

The Boothe No. 1, a proposed test of the Mississippian and all shallower formations, is expected to reach a depth of about 9,500 feet before completion.

Though the Palo Duro Basin wells are tests for either gas or oil, a discovery of natural gas by the Boothe well would be particularly profitable to the Dimmitt area for use as a low-cost irrigation fuel.

Two similar wildcats in the Palo Duro Basin area, the Cochran No. 1 in Hall County and Hicks No. 1 in Randall County, were both dry holes.

Amarillo Oil Company, oper-

ator of the Boothe well, is a wholly-owned subsidiary of Pioneer Natural Gas Company in Friona any more, we've with general offices in Amarillo.

Local Family Meets Unusual Challenge

For the past two years Rev. L. Aston Sartain has served as pastor of the First Baptist Church here. He and Mrs. Sartain, accompanied by Charles McKenzie, moved here from Sundown during the summer of 1957. Bobby, son of the Sartains, is a sophomore ministerial student at Wayland Baptist College at Plainview.

REV. L. A. SARTAIN

Sartain, a native Texan, was born near Jacksboro, Texas. Although he pastored country churches while still in high school, his first full time service was with the First Baptist Church at Stinnett.

He has attended Decatur Baptist College, Howard Payne College and Southwestern Baptist Theological Seminary and lacks only 14 hours having completed requirements for his B. D. degree at the seminary.

After working with the Stinnett church three and one-half years, he accepted a call from the Kamay church and worked there five years. Then after pastoring the Clarendon church four and one half years he moved to Sundown and worked with the church there five and one half years.

Sartain's hobbies are coin collecting, fishing and traveling. He has been affiliated with the Lions Club and Kiwanis Club.

When asked to relate one of his most unique experiences, Sartain gave the following account of the results of a trip he made to do mission work.

"In the summer of 1956, after about a year and a half

had much prayer and discussion and decided to ask Charles to come and live with us to attend school and share what we had to offer with us. This offer was accepted as answer to prayer by the McKenzies and our church at Sundown helped in getting him here and in clothing him and sending him to high school.

"He came on August 31, 1956, and has lived with us since then except when he returns to Jamaica to spend the summer months with his parents. Bro. and Mrs. McKenzie live by faith that God will provide their needs and he has opened through the visit I made there channels of help for them."

Mrs. Sartain, the former Naomi Landreth, has majored in elementary education and has worked with the elementary department of each church her husband has served. She also sings and does chalk talks to illustrate the message in song.

Sartain has served as a trustee of Wayland Baptist College and also on the board of district ten of the Baptist General Convention of Texas. At the present time he is a member of the State Executive Board of the Baptist General Convention of Texas and is also on the district nine board.

At one time he was a one year director of Pan-Fork Encampment near Wellington and served six years for Plains Baptist Assembly.

If a man write a better book, preach a better sermon, or make a better mousetrap than his neighbor, tho' he build his house in the woods, the world will make a beaten path to his door.

of praying for such a trip, the Lord opened the way for me to go to the Island of Jamaica, which is a part of the West Indies, and conduct revivals.

"While there visiting various communities, I walked into the yard of Rev. and Mrs. A. L. McKenzie, who are missionaries there and have a school they teach in their home. Introducing myself and others who were with me opened the way to a discussion of revivals and resulted in the couple extending me an invitation to come and help them.

"I preached revivals in two of the eight churches they were serving. While there they asked me to join them in prayer for someone in this country who was able to take their son, Charles, and help him get an education in the United States. At the time he was studying with the assistance of his parents.

"After returning home we

Gerald Neel Attends Camp

Gerald G. Neel is among 35 junior and senior Reserve Officers' Training Corps cadets from West Texas State College at Canyon who will participate in a six-weeks summer camp at Fort Hood.

The camp opened Sunday and will continue through the first week of August. This camp is part of the requirements for ROTC cadets before they can be commissioned in the Army Reserve.

Neel, son of Mr. and Mrs. Otis Neel of Hub and a 1956 graduate of Bula High School, is a senior math major. He is a member of the interfaith council and is a senior senator. He served as class president during his junior year.

MRS. LEON MASSEY

Johnny Tomlin Exchanges Vows With Leon Massey

Miss Johnny Tomlin and Leon Massey exchanged wedding vows at the First Baptist Church at 7:30 p.m. Tuesday. Charles Baldwin, educational director of the church, read the double ring ceremony before an arrangement of white and yellow gladioli flanked by greenery.

The bride's parents are Mr. and Mrs. Jack Tomlin of the Hub community and the groom is the son of Mr. and Mrs. Gordon Massey.

Background music for the ceremony and the wedding march was played by Deniese Magness at the organ. A trio composed of Jonnie Hand, LaVon Fleming and Nancy Outland sang "You'll Never Walk Alone", "I'll Walk Beside You", "Until", and "I Love You Truly" before the ceremony and "The Lord's Prayer" following the ceremony.

Jacquelyn Magness was the maid of honor and bridesmaids were Robbie Boggess, Raye Jene Jones and Joy Crow. Miss Magness wore a pale green dacron dress styled with a fitted bodice and full skirt and accented with a midriff sash. The bridesmaids wore yellow dresses styled identical to that of the maid of honor. All bridal attendants carried nosegays of yellow carnations.

Candlelighters were Jay Ann Nichols, cousin of the bride and Roger Tucker, cousin of the bride. Suzanne Tucker, another cousin of the bride, was the flower girl and Neal Richardson, cousin of the groom

was the ring bearer. Jay Ann Nichols and Suzanne Tucker wore dresses identical to the one worn by the maid of honor.

Joel Landrum of Gruver served as best man and Valton Howard, O'Neil Greeson and Weldon Massey, brother of the groom, were ushers. The bride, given in marriage by her father, wore a white wedding gown of tulle, lace and net over satin. The fitted lace bodice came to points in the front and back and had a scalloped neckline. The bouffant tulle skirt was accented with applied lace insets outlined with pearls.

Her shoulder length scalloped veil fell from a tiara of pearls and sequins. She carried a corsage of yellow roses atop a white lace covered Bible.

For something old the bride wore a wedding band, which had belonged to her maternal grandmother, on her righthand. She carried a lace handkerchief, borrowed from Jonnie Hand, and wore tear drop pearl ear rings belonging to LaVon Fleming. She wore the traditional blue garter for something blue. Mrs. Tomlin, mother of the bride, wore a pink brocaded cotton dress with white accessories and a pink carnation corsage.

The groom's mother, Mrs. Massey, wore a turquoise lace dress with white accessories and a yellow carnation corsage.

A reception followed the ceremony. Guests were registered by Sue Baxter. The serving table was centered with a floral arrangement. A three tiered wedding cake topped with a miniature bride and groom and decorated with yellow rosebuds was served with punch.

Those in the houseparty were Jacquelyn Magness, Robbie Boggess, LaVon Fleming, Nancy Outland, Jonnie Hand, Raye Jene Jones and Joy Crow. After a brief wedding trip Mr. and Mrs. Massey are at home on a farm southeast of Friona.

Baby Boy For Canyon Couple

Circle Meets In Drake Home

Mrs. Arthur Drake was hostess to the Tuesday morning meeting of the Kolvwia Circle of the Woman's Society of Christian Service of the Friona Methodist Church. The opening prayer was directed by Mrs. Will Osborn.

Mrs. Drake presided over the business session in the absence of Mrs. W. M. Stewart, chairman. The program "Literacy and Christian Literature" was directed by Mrs. Floyd Rector. She was assisted by Mrs. Coy Patton and Mrs. Tommy Jones.

Mrs. Howard Ford presented the devotional then closed the meeting with prayer.

Refreshments were served by the hostess to Mesdames Will Osborn, Roy Slagle, Guy Latta, Howard Ford, J. T. Gee, Ross Ayers, Coy Patton, Floyd Rector, Tommy Jones, J. L. Shaffer and Kenyth Cass. Also Betty Drake, who was a guest.

lby Lewellen Directs Program

Members of the Fidelis Sunday School class of the First Baptist Church met for the regular monthly business and social meeting at the home of Betty Lewellen Friday evening. lby Lewellen, co-hostess, had charge of the program.

Musical numbers were presented. Others present were Belle Maynard, Margaret Coker, Johnny Massey, Phila May Weatherly, Carolyn Carroll, Glenda Adkins, Peggy Monroe, Juanita Stevens, Ouida Capps, Barbara Maynard, Ann Osborn, Melba Allen and Katie Osborn.

Recent visitors in the home of Rev. and Mrs. Hugh Blaylock were Mr. and Mrs. Elden Bruch and son, Garry, of Appleton, Wis.

is the first boy for the couple who have two daughters, Janet and Kay.

Mrs. Treva Reece of Canyon is the paternal grandmother. Great-grandparents are Mr. and Mrs. A. O. Drake of Friona. This is the first great-grandson for Mr. and Mrs. Drake.

Mary Pflingsten Weds Ray Moore

Wedding vows for Mary Pflingsten and Ray W. Moore were read recently in Bowman Memorial Chapel of First Methodist Church at Lubbock. Rev. Dr. J. Chess Love was the officiating minister. A reception followed in the church parlor.

The bride, daughter of Mr. and Mrs. C. E. Pflingsten, attended Texas Tech last year as a sophomore. The bridegroom graduated from Tech in June. Mr. and Mrs. Moore are at home in New York City where Mrs. Moore will continue her under-graduate studies and Moore will study toward a master's degree in music.

Mrs. Frank L. Reed of Friona, maternal grandmother of the bride, was a member of the houseparty at the reception. Mrs. Moore's mother is the former Mabel Reed.

Arlene Beavers Slates Recital

Piano pupils of Arlene Beavers will be presented in a recital at the Assembly of God Church at 3 p.m. Sunday. Parents, friends and interested friends are invited to attend the recital by Mrs. Beavers.

Those participating in the program will be Pam Tims, Debbie Baxter, Connie Whaley, Cidny Bailey, Terry Fite and Paula Stout.

HD Club Meets In Jones Home

Velma Jones was hostess at the Wednesday afternoon meeting of the Friona Home Demonstration Club in her home. A pie crust demonstration was given by Edwina Fields. Marlene Drake gave a salad making demonstration. Pie, salad and coffee were served.

Plans were made for a family night meeting at the club house Tuesday, July 28. After an ice

cream supper games will be played.

Those present were L. V. Day, Carol Hardesty, Christine Williams, Stella Shirley, Phyllis Sanders, and Stella Varner, members, and two visitors, Mrs. Jay Nell Roberson and Mrs. A. C. Winchester.

Mr. and Mrs. Charles Holmes of Vanderbilt, Texas were weekend guests in the home of Mr. and Mrs. J. T. Gee. Holmes is a former superintendent of the Friona schools.

Janiece Bock Enrolls At TU

Janiece Bock, daughter of Rev. and Mrs. Hugh Blaylock and a 1959 graduate of Friona High School, recently enrolled at Texas University at Austin. She was accompanied by her parents and a sister, Charlotte Bock. On the return trip the Blaylocks and Charlotte visited the Methodist Children's Home at Waco and other points of interest. They returned to Friona late Thursday.

Personals

Mr. and Mrs. John D. Sanders and sons, Tommy Jay and David, visited John D. Sanders Sr. at the Poplar Grove Convalescent Home at Lubbock Sunday. On the way down they stopped at Plainview and picked up another son, Ted, who is attending Wayland Baptist College.

Guests in the home of Mr. and Mrs. Doyle Cummings and children, Scott, Terri, Kirk and Lisa, this week are Ralph Spear and Linda Sue Cummings of the Children's Home at Portales.

Mr. and Mrs. E.H. Cummings of Friona and Mrs. Wayne B. Stark and children, Kenny, Nate and Connie, of Hereford spent several days last week at the Cummings cabin at Tres Ritos.

Mr. and Mrs. Wayne Stark of Friona and Wayne B. Stark of Hereford joined them for the weekend. The entire group returned late Sunday.

Mr. and Mrs. William Russell of Saligman, Ariz., visited recently in the home of his brother, Charles D. Russell. The two families drove to Littleton, Colorado and had a family reunion.

Brothers Visit After 30 Years

When Mr. and Mrs. Walter Loveless of Friona visited in the home of Mr. and Mrs. J. P. Loveless in Bakersfield, Calif., recently, it was the first time the two brothers had seen one another since 1919.

Mr. and Mrs. Clyde Sherrieb took their son, Gary, to Amarillo Thursday evening. Gary went by train from Amarillo to Fort Collins where he will attend summer school at the Colorado State University.

Mr. and Mrs. Ray Whatley and sons, Edwin and Paul and Mr. and Mrs. Jack Nelson and sons, Rex and Roger, spent the weekend visiting in the homes of Mrs. J. S. Rucker and Mr. and Mrs. Gibbs Rucker at Rosedale.

Mr. and Mrs. Walter Loveless returned home Friday afternoon after spending two weeks visiting relatives and friends on the West Coast. At San Diego they were guests in the home of Mr. and Mrs. Jiggs Loveless and children.

HE SCRUBBED TOO HARD--Zollie Capps, Industrial Arts teacher at Friona High, believes in hard scrubbing to get rid of the dirt. The only trouble is, he scrubbed so hard the lettering came off and he replaced them backwards.

RELATIVES VISIT IN WILLIAMS HOME

Weekend guests in the home of Mr. and Mrs. J. B. Williams and children, Randy and Karyl, were M. Sgt. and Mrs. W. L. Poole and children of Las Vegas, Nev.; and Mrs. Florence Poole of Amarillo; Also Mr. and Mrs. Edward L. Poole and children and Mr. and Mrs. Walter Poole all of Amarillo.

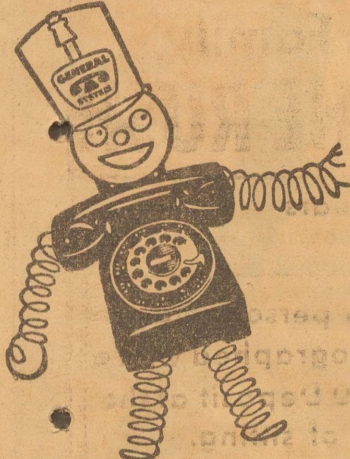

Sally Osborn Studies In Hawaii

Sally Osborn, daughter of Mr. and Mrs. Sloan H. Osborn, left Midland Friday by plane for Honolulu where she will enroll at the University of Hawaii for the summer session. Miss Osborn, a 1956 graduate of Friona High School,

finished her junior year at the University of Texas in Austin in June. She expects to return to Friona in about seven weeks.

PRIDE

(Jonah 4:1-11) Jonah had been the recipient of great grace when he was in need in the fish's belly, yet he was angry when God was gracious to Nineveh. "And the Lord God prepared a gourd," using a homely object to teach a great lesson. "Should not I spare Nineveh?" God asked his servant. God's anger with sin is born of His love for the sinner. His attitude today is the same as it was toward Jonah. Jesus had pity on Jerusalem and wept over it. He weeps over your city and my city today. But he must have messengers. How far have we obeyed? Be faithful to God and remember to attend church this Sunday. M. ALVIN ASKINS

A Healthy Community is a Christian Community Attend the Church of Your Choice

Table listing church services for First Baptist Church, Rhea Lutheran Church, Congregational Church, Church of Christ, Friona Methodist Church, and United Pentecostal Church.

This Message Sponsored by the Following Friona Businesses

WE ALSO RAISE PIGS--Larry, with hat, and Laverne Mabry of the Hub Community are shown with one of their pigs. The boys are gaining a tremendous store of knowledge and experience in pig breeding that will be of benefit to them in future years.

Not All Teenagers Are Delinquent

(Ed. Note:--This is the third in a series of articles designed to promote the good qualities of our local youth. It is an answer to all the reports, past and present, saying that juvenile delinquency is rampant and prevalent among the majority of our young people.)

From 1940 to 1958, statistics prove that delinquency among the teenagers was very erratic. High in some years and low in others. These same statistics demonstrate also the high years were marked by strong and terrible world crises.

Juvenile delinquency reached a peak during the years 1941 to 1945. After the latter year, it was marked by a tremendous decrease. Then, 1950 to 1952 showed another rise.

Why these years? They are easily recognizable by all who lived during those times. World War II during the former years and the Korean War during the latter.

The mere fact that delinquency increased during these two periods prove beyond any reasonable doubt that many outside forces can be detrimental to normal teenage behavior.

During those uneasy, feverish, restless years, the young people were without fathers to counsel with them. The great majority of mothers were in defense plants or other national emergency employment. As a result, the young were left to themselves more than ever before in their entire life. They were idle, indolent and some say nugatory.

The critics who use the latter word have not considered the times nor the fact that the rate fell immediately following those two wars. They have not considered that idleness breeds trouble on anyone regardless of their age.

And more important still, they have not remembered that all young life needs guidance. They are lead by the elders around them. If the elders are not there to guide them the young naturally may wander off the track as a young cub may do without the mother bear to lead it.

When criticism is next aimed at the young generation, remember the circumstances involved. Weigh the pros and cons and nine times out of 10, you will find two things are causing teenagers to become involved with the law. Idleness or lack of parental guidance.

Work is one of the best things in this world for the human race. When one is occupied, both mind and body, he has no time to think of mischief. Laverne and Larry Mabry are examples of the kind of teenagers who keep busy and thus do not have time

to create problems for society. Laverne, 16 years old and Larry, 15 years old, are the

sons of Mr. and Mrs. W. R. Mabry of the Hub Community. In addition to the normal chores of farming such as combining, plowing, changing water, chopping weeds and on and on, the boys have taken on additional responsibilities. They have become pig raisers. They have approximately 250

Abernathy Boy Wins WTPA Scholarship

Don Jones, already the "right-hand man" of a weekly publisher in his home town, is the winner of the 1959 journalism scholarship award of the West Texas Press Association.

Jones has just graduated from Abernathy High School, and holds down an important post at the Weekly Review. He is getting started in the newspaper work with a thorough background in community newspapering--something that has proved highly beneficial to many newspapermen in years past.

The Hale County graduate will use his \$400 scholarship to help his studies in journalism at Texas Tech. He will enter college this fall.

Jones expressed his pleasure at having received the award. He said, "To me, journalism is a most fascinating profession. It seems that the greatest possibilities for advancement lie in this field. Also, some of the greatest opportunities for civic deeds lie in the field of journalism. The duty of the journalist is to inform the public."

"... People are relying more upon the press today than ever before. To a very large extent, journalists are instrumental in pushing badly needed legislation, uncovering corruption in high circles, and in breaking down the bars of secrecy that have become so frequent lately."

In high school, the young man was a member of the

National Honor Society, was a class officer and held a position on the student council. He was MYF president in the Methodist Church.

At The Review he is a Linotype operator, pressman, floorman, and staff writer. His parents are Mr. and Mrs. Ward Jones, and he has two brothers and three sisters.

Runner-up and first alternate for the scholarship is Bob Bowers of Levelland. In third place was Leslie Whiteley of Ballinger.

W. H. Graham of Farwell, chairman of the scholarship committee for WTPA, expressed his pleasure with the applicants this year. "It is the largest group we have ever had," he said.

Competition for the award was plenty stiff among the 12 seniors who entered. There were six boys and six girls in the field this year. "All the judges have commented on the quality of the work," says Graham, "and we think it is a high honor for Don Jones to win."

The scholarship was begun four years ago by WTPA to promote journalism as a college study and career. The award is based on scholastic achievement, demonstrated ability in journalism and a bonafied interest in newspapering as a career.

Helping to select the winner this year were Graham; Wally Garets, Texas Tech; Ailese Parten, Wayland; Bill Lee, West

Texas State; and H. M. Baggarly, TheTulia Herald.

In a middle western city the other day, a police officer signaled a driver to the curb and asked to see his license. "But, officer," protested the motorist, "I wasn't doing anything wrong."

"Yeah, I know," agreed the cop, "but you were driving so cautiously, I thought maybe you didn't have your license with you."

MISS PATTON sponsors for their willingness to give up their own time to make our trip a pleasant one."

Sponsors for the trip were Mrs. Bill Woodley, mother advisor, Bill Woodley and Hugh Moseley, drivers, Mrs. U. S. Akens, Mrs. James Collier, Mrs. Irby Carlisle and Mrs. Ralph Roden.

2.25-Bale Cotton

James B. Cox, successful young Swisher County farmer, says: "By side dressing my cotton with 80 pounds of Phillips 66 Ammonia the latter part of June, we picked an average of 2 1/4 bales of lint per acre."

"I also averaged 5200 pounds per acre of maize grain, after applying 130 pounds of Phillips 66 Ammonia. I am putting down 100 pounds of Phillips 66 Ammonia on my cotton this year, and 140 pounds on my maize."

Other successful Southwestern farmers have discovered that they make more profit per

acre, using Phillips 66 Ammonia. They get more cotton that classes higher at the gin... yields of sorghum grain or ensilage are increased... profits on wheat and small grains are increased through higher grain yields and improved forage... more marketable vegetables are harvested.

Phillips 66 Ammonia can be easily applied either by you or your distributor. See us today about Phillips 66 Agricultural Ammonia... it gives you more nitrogen per dollar than any other form of fertilizer--a full 82%.

Order Your Supply of Phillips 66 Agricultural Ammonia Today!

Chevy Gives You Smarter Style Today...

Don't take it from us--take it from independent experts and from facts and figures that are now a matter of record. POPULAR SCIENCE sums up Chevy's unmistakably modern style this way: "The fact is, in its price class Chevy establishes a new high in daring styling..." This is one more reason your new Chevrolet will bring a higher allowance at trade-in time, as Chevy has over the years. A look at last year's used car prices* shows Chevrolet averaged up to \$128 more than comparable models of the other leading low-priced two.

*Guide Book figures of the National Automobile Dealers Assn.

PLUS 5 MORE BIG BESTS OVER ANY OTHER CAR IN CHEVROLET'S FIELD!

Best Brakes. Chevy showed the best brakes of the leading low-priced tests in repeated highway speed stopping tests conducted by NASCAR.* No wonder. Chevy's brakes, built for up to two-thirds longer lining life, are the biggest in its field.

*National Association for Stock Car Advancement and Research.

Best Engine. Every motor magazine has given Chevy's passenger car and Corvette V8's unstinted praise. As SPORTS CARS ILLUSTRATED puts it: "Indeed, this device is surely the most wonderfully responsive engine available today at any price."

Best Economy. No doubt about this: a pair of Chevrolet sixes came in first and second in their class in this year's Mobilgas Economy Run--getting the best mileage of any full-size car.

Best Room. Dimensions reported to the Automobile Manufacturers Association make it clear. Chevy's front seat hip room is up to 5.9 inches wider than comparable cars.

Best Ride. No doubt about this. MOTOR TREND magazine sums it up this way: "... the smoothest, most quiet, softest riding car in its price class."

NO WONDER MORE PEOPLE ARE BUYING CHEVROLETS IN '59 THAN ANY OTHER CAR!

See your local authorized Chevrolet dealer for the best buy on the best seller!

SPORTS AFIELD
 By Ted Kesting

The muskellunge is our largest strictly fresh-water game fish, and he's generally considered also the tackle-smashing-est. As a desirable trophy to show one's prowess he's been compared to the Kodiak bear. That's all wrong, since anybody with money for the trip and a good guide is about sure of a big Kodiak. But if old King Midas himself were resurrected and took to fishing, all his wealth wouldn't assure him of a fair-sized musky in reasonable time. Thus the musky's trophy value lies not only in his size and fighting qualities but in the grave uncertainties of fishing for him, according to Jason Lucas, Angling Editor of Sports Afield Magazine.

The reasons why musky fishing is so spotty--with the spots so very far apart--are fairly simple. A mature one is a huge brute needing an enormous amount of food, a great feeding range; so there can be a musky only here and there in widely separated places --barring that freak "musky run" on Leech Lake when fifty-five fish were taken in two days. Add to this natural and unavoidable scarcity the fact that they're perhaps the world's most temperamental fish about when they'll hit, and what do you get? Musky fishing!

Don't fish for muskies--but do your not-fishing for them in such a way that you're almost as likely to catch one as if you were fishing for him. Learn in just what sort of spots to look for muskies, and do all your fishing there--for bags or pike, either or both of which will almost certainly

for Smart Bargain Hunters

You'd stop . . . and you'd act . . . if you ever saw a sign like this in some store window. All of us like Bargains, hunt Bargains . . . and grab them — if we recognize them.

- But some of us don't see the biggest bargain of all — the dividend we draw from buying at home.

- Statisticians tell us that a home-spent dollar will turn over an average of three or four times in the

community before it moves on to some other area. That means \$3 or \$4 or more local trade volume for every dollar we spend here. Which makes the "\$3 for \$1" sign not too far-fetched after all.

- More local trade volume results in greater local prosperity . . . and all the fine things that go with it. Thus . . . the biggest GENUINE BARGAINS in the world: the things we buy at home.

Buy at home . . . where you get the bargains that really count

It Pays to Buy where you Live

Cotton So-So, Sorghum Swell

The condition of growing crops in the Parmer County area the first week of summer is mixed. Generally, only grain sorghum is doing excellently. All others are doing fair to middling.

County Agent Joe Jones, who has toured the farming area, says the cotton definitely does not look as good to him as it did the same time last year. The reason for this is primarily because of the rough weather of a month ago which resulted in outright loss or stringent thinning of an attractive early stand.

Late April and early May

seedings, which were looking the best ever, were washed, pelted by hail, and blasted with sand until over 75 percent of the farmers gave up and planted over.

This has resulted in a very late planting—early June. The young crop is off and running, but farm operators realize that it already has two strikes on it. Only a favorable growing season and the best of care can insure a good cotton crop this fall.

Jones reports that many farmers are spraying to control insect infestation, particu-

larly thrip. All commercial rigs are running full-blast, and individual equipment is being kept active also.

The county agent says he has had some reports that farmers are having difficulty obtaining control over the thrip. In cases where spraying does not seem fully effective, Jones recommends the addition of malathion to the chemical formula. From one-half to one pound is recommended per acre.

Agent Jones also points out that farmers may be expecting too much from too little spraying. Applications may be too far apart, or put on during times when conditions are not right.

"We may have our sprayings too far apart," he says. "Most are using a seven-day interval, and it may become necessary for us to use a five- or even four-day interval to obtain good control."

At any rate, the agent recommends that farmers keep careful watch on thrip infestation and control the insects so as to insure setting the first fruit crop on the young cotton. Farmers should do everything possible to keep the crop from being "held back" by any cause they have some control over.

Also, it is normal for poisoning for thrip and fleahopper in the early part of the growing season to end at a point estimated to be approximately 30 days before the appearance of the first bollworms. That is to allow beneficial insects a chance to build up.

However, conditions being what they are this year, Jones encourages farmers to continue to spray so long as they need to control the thrip. "If we don't there won't be much point in worrying about the bollworm anyway," he says. Most farmers are probably due a couple of more poisonings.

An estimated one-half of the 2500 to 3000 acres of sesame in the county has been lost to the bad weather, and other minor crops such as vegetables have been taking a beating also.

The recurring showers are posing serious delay to the wheat harvest, and the only crop that seems to be taking all this in and profiting by it is the new grain sorghum crop. "Our grain sorghum looks just fine," says Jones.

The biggest part of it is planted later than usual, following a trend to later plantings on

the High Plains. Purpose of the late plantings is to allow the crop to mature under more favorable weather conditions, and to avoid, if possible, one irrigation. The growing season is adequate for all popular varieties even in mid to late June.

"The feed is looking good, but it also looks like we may have another weedy year," Jones predicts. He compares prospects for weed in grain sorghum to those of 1957, when a wet spring prevented weed control in the early part of the season.

Parmer County is bidding hard for being the biggest producer of grain sorghums on the High Plains again this year. In spite of reduced price supports, nearly all land has gone back to milo, and farmers appear bent on shooting for higher yields rather than by shifting crops.

Narrow-row, double-row, and even broadcast seeding practices are common all over the area, as farmers seek higher plant populations, which through past experiences have paved the way to greater yields.

Soil fertility is high and the moisture level is adequate. Grain sorghum is getting off to a very good beginning.

Grasshoppers We Have Plenty Of

"We got 'em," says Joe Jones, county agent, this week in referring to the grasshopper population.

The leaping insects are in almost every field in the Parmer County in large numbers, and the threat of extensive crop damage seems to be increasing with each passing day.

Grasshopper population has been on the rise in the area for several years, and much of this is attributed to soil bank land which has served as large breeding nests for the hopper crop.

Soil bank land and cultivated land side-by-side pose a problem when grasshoppers appear on the scene. The owner of the soil bank land is concerned mainly with establishing a satisfactory cover crop to protect the soil from erosion. Outside of that, the land is practically untended. He is not worried about grasshoppers.

That suits the owner of the cultivated land okay, but when the grasshoppers start jumping and flying from the soil bank land into his succulent crops, trouble brews.

County Agent Jones suggests that owners of all kinds of land are going to have to reach some sort of an understanding if control of hoppers is going to be effective. Spot treatment is a defensive measure at best, and is not the way to control the locusts.

Elimination of the threat of

damage from grasshoppers will be possible only if cooperation on a broad scale is obtained, he believes.

"We haven't had any extensive damage up until now, but farmers should be aware that damage can occur," he says.

NEWS

"The Place Where Most People Trade" Friona, Texas Wednesday, June 24, 1959

You get the BIG comfort dividends in your 59 FORD...

Some cars' door openings aren't shaped to fit people! So you have to squirm and wriggle... make your body conform to the car when getting in and out.

To gain a low roof line, some cars end up with higher floor "humps" and thinly padded rear seats... a combination that's mighty rough on the middleman.

The squeezed-down, skimpy roofs of some cars aren't comfortable even for bare-headed riders. And they don't keep out excessive sunlight and glare.

NO SQUIRM

Doors in 59 Fords are wider—up to six inches wider—and door openings are contoured to fit you! You get in and out of a Ford with greater ease and comfort. The girls really like Ford's doors... for more graceful entries and exits.

NO SQUEEZE

Fords have useable seating space for six big people. The driveshaft tunnel is lower and rear seats are deeply cushioned all the way across. This means more comfort for all passengers... especially for the man in the middle.

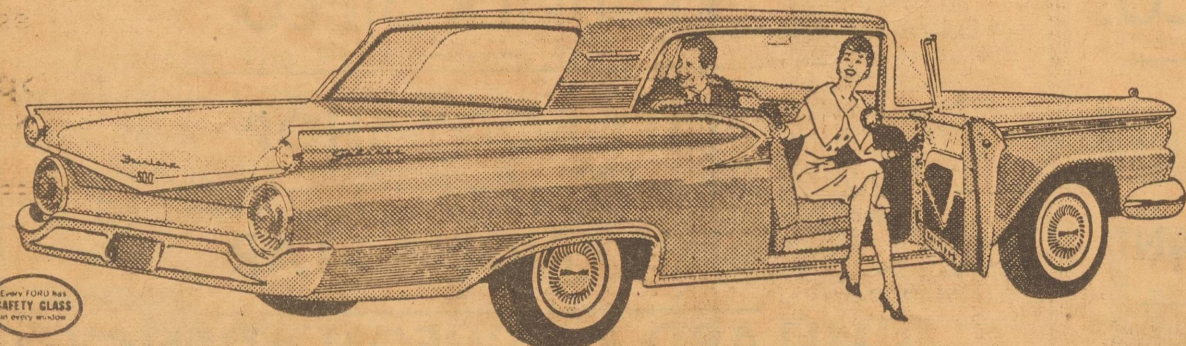

NO SQUASH

See how much more head room Ford has. Even big six-footers sit up straight without touching the roof. And Ford's big roof protects all passengers, in both front and rear seats, against the discomforts of excessive glare and heat from the sun.

Greater comfort is only the beginning of the dividends you get in a Ford. You get the World's Most Beautifully Proportioned Car. You get a big dividend in Ford prices... the lowest of the best-selling three. And you get saving dividends that cut costs every mile you drive. See and Action Test a new Ford at your Ford Dealer's. See how you can go finer... with more comfort... for less... in a new Ford!

Get ready for plow time--see us for disk blades--IH heat - treated harrow sickle blades stay sharp, fit tight, wear longer. Plow shares --buy long-lasting IH plow shares for more economical plowing. V-Belts--for every use. Top quality materials assure you of longer life. Better have an extra on hand. PCICN

The Benger Air Park ball team beat the Ford Motor Company team Saturday and we were happy since our number one son plays with the Benger team, but with just a little outside help the Ford Company could have a private team--just the employee's boys. There's John Baxter, Eddie and Johnny Parker, Jay Potts, and James Schlenker, who is close kin to the Ford Company. These boys should really develop a team spirit. PCICN

When you buy International power units you not only get power plants that pay off for years to come, but you get after sale service that stands alone in the industrial field. We, as your IH dealer, and the International Harvester Company combine forces to back up your IH power unit with the kind of parts and service support that makes more money for International owners. PCICN

Mr. and Mrs. Newt Gore are home again after a visit to East Texas. Mrs. Gore said she just chatted and visited but that Newt worked and they both enjoyed the visit and are glad to be home again. PCICN

We have a cherry tree at our house and it had enough cherries that everybody got tired of cherry picking, especially our youngest, David, who just kept complaining. The other day he informed his mother, "I guess when I really have to go to work, I'll choose cherry picking for my hobby." PCICN

They think of everything when they design International trucks. Style? Sure. Convenience? That, too. For instance: a sweep around windshield that's the largest on any pick-up. Yet not in your way as you get in and out. Come in soon and see these new International Pickups. PCICN

Rex Talley, seven year old son of the Calvin Talleys, is in Arkansas with his grandparents, Mr. and Mrs. Dudley Robason, and he's really enjoying himself. Calvin says he's been showing his granddaddy exactly how his chicken farm should be run. Rex is planning to come back to Texas via plane, but his mother says he'll probably back out because he says most of the airplanes he's seen on TV have had wrecks. PCICN

A farmer we know who has a reputation as a skinflint was visited by a government inspector. "I hear you are violating the law by paying below minimum wage," the inspector said. "Oh! Am I?" the farmer cried angrily. "Well, there's Willie, who milks the cows and does the chores around the barn, ask him." "Forty dollars a week, sir," Willie said. "And there's Sammy," the farmer said, calling over to

the other hired man. "Tell his man your wages." "Forty dollars a week, sir." "And there's the maid, Katie, ask her." "Thirty dollars a week with room and board, sir." "Any more?" the inspector asked. "Well, no--only the half-wit," the farmer said. "He gets \$10 a week, a bit of tobacco, and his food." "Could I speak to him?" the inspector said. "Sure" the farmer answered, "You're speaking to him now." PCICN

Step into a new world of power with the great, new IH tractor line. The new Farmall 560 with 5-plov pull, 6 row spread and easy control is at the top of the class on row crop tractors. Call us for a demonstration. PCICN

Little boy's definition of Father's Day: "You know, it's just like Mother's Day only not as expensive." PCICN

Farmers tell us that feature for feature the Phares and Wilkins Go-Devil is the most acceptable on the market today and will do six operations efficiently and economically. Come in and look at this all new machine before you buy. PCICN

Madge and Clifford Crow spent last week in California where they attended the horse show. The Crows have some fine appaloosa horses of their own. PCICN

Want a Johnson grass free farm? The only sure way to own one is to keep fighting. We have plenty of Sodium Chlorate--the sure killer for bindweed and Johnson grass.

H. D. AGENT'S CORNER

Jimmie Lou Wainscott

Do hungry teenagers raid the refrigerator and keep the cupboard bare? If so, extension foods and nutrition specialists suggest that you keep plenty of milk and dairy products on

hand at all times. These foods are favorites with teenagers... What's more important, dairy products are especially rich sources of the protein, minerals and vitamins needed by boys and girls during these years when they're growing so fast. A French toasted cheese sandwich hits the spot as a late evening snack. Simply put a slice of American cheese between two slices of plain or whole wheat bread, dip entire sandwich into a mixture of beaten eggs, milk, salt and pep-

per, and brown in butter in skillet. With a glass of good cold milk, this would make a perfect ending to an evening of fun and activity. For something sweet, try this Orange Fluff. Put 1/2 pint vanilla ice cream into a large bowl and let soften a little. Add to the ice cream 1 can frozen concentrated orange juice and 2 cups cold water. Beat with rotary egg beater or electric mixer until fluffy. Pour at once into tall, cold glasses and top with remaining 1/2 pint of ice cream. For party refreshments, add a half slice of orange and sprig of mint. Makes six servings. Thick milkshakes can be quickly made with your electric mixer or a rotary egg beater. Just put slightly softened ice cream, milk and flavoring into mixing bowl and beat until fluffy.

Planning a new color scheme for your home? Choose colors for the large areas first, says Charlotte Tompkins, extension home furnishings specialist. This includes floor covering, walls and large upholstered pieces. In most cases, these should be your most livable colors, or colors that are greyed in intensity.

Next, choose colors for small upholstery and the window treatment. This may be a blend of the room colors, or match or contrast with the walls.

Lastly, choose your colors for accessories and small areas --pillows, lamps, pictures, ash trays, etc. Usually this accent color is the brightest color.

For something different in picnic fare, try beef kabobs... You don't need a recipe. Just cut beef into inch-size chunks and stock an assortment of mushrooms, onions, tomatoes and what-have-you. Spear the ingredients alternately on metal skewers or long green sticks about one-fourth of an inch thick. Broil over hot coals until done. This way, everyone does his own cooking.

Want a low-calorie salad dressing for your spring green salads? Mix together 1/2 cup tomato juice, 2 tablespoons lemon juice or vinegar, 1 teaspoon salt, 1/2 teaspoon dry mustard, 1 teaspoon grated onion and 1/2 teaspoon Worcestershire sauce. Store, covered, in the refrigerator. Shake well before using. One clove may be added if desired. The entire recipe contains 25 calories.

The more turnover of frozen foods in your home freezer, the more economical its operation will be, says the U. S. Department of Agriculture... Certain fixed costs of freezer operation are large compared with other costs involved in freezing.

Therefore, the more food used and replaced, the less the cost of storing each pound.

Hot, humid weather and summertime activities bring special stain removal problems... Perspiration, mildew, fruit and grass stains can ruin valuable clothing unless they are treated promptly and properly, according to extension clothing specialists. For best results you need to act quickly. First, make certain you know what the stain is; next, classify your fabric, and finally, choose the proper stain remover. Wrong treatment or application can add to the damage.

For latest information on stain removal, get a copy of the newly revised extension bulletin... Copies are available from your county home demonstration agent's office.

With warm weather here again, comes the problem of washing and storing electric bedcoverings.

Automatic electric blankets and bedsheets should be washed, not dry-cleaned, according to extension home management specialists. Dry-cleaning fluids may injure the wiring system.

Before washing be sure to disconnect all controls from the electric blanket or sheet. If there are spots or stains, wash these first gently with solution of soap or detergent and water. Use lukewarm water for washing--about 100 degrees F. Wash one blanket at a time. Remember, agitation of the bed-covering in the washing machine for too long a period may break the electric wiring. Below are suggested methods for washing in either an agitator or tumbler-type automatic washer.

AGITATOR-TYPE AUTOMATIC WASHER. Fill the washer with warm water. Add 1 cup of mild synthetic detergent, and agitate until dissolved. Stop washer, immerse blanket in washer, and close cover. Do not agitate. Let blanket soak 10 minutes and spin out water for two minutes. Fill for rinse. Agitate for 1 minute. Spin out water for two minutes. Remove blanket. For line drying, hang lengthwise over two parallel clothes lines, preferably in the shade. When an automatic dryer is used, preheat 5 to 10 minutes using large bath towels to absorb and equalize the heat. Add the blanket and allow to tumble about 15 minutes. Complete the drying on the line. Press bindings with steam or dry iron set at low heat.

TUMBLE-TYPE AUTOMATIC WASHER. Place blanket in washer. Fill washer with warm water, adding 1/2 cup low-sudsing detergent. Then stop washer. Soak blanket for 5 minutes; then tumble it 1 minute. Advance dial so water drains out. Then advance dial a second time, and let washer fill for deep rinse; run for 1 minute. Finally, turn dial to give final drain, for 2 minutes, or until drain hose stops. Remove blanket; dry as directed for agi-

THE HAPPY HOMEMAKER

BY JUNE FLOYD

Most of us receive more magazines than we ever read and as a general rule it would be quite senseless to advise anyone to subscribe for another magazine. However, we are receiving one small tabloid size newspaper type magazine that doesn't take much time to read yet contains a lot of items of interest to homemakers.

If any of you remember the Comfort magazine which has been out of publication a number of years, you have some idea what the Women's Circle is like.

We especially liked the editorial in the most recent issue. Like so many of our other holidays Father's Day has become a nationwide business promotion. Situations like this seem to develop without anyone noticing until they become practically unchangeable. The old saying, "The hand that rocks the cradle rules the world," is just as

tator-type washer. Store blankets in airtight boxes or plastic bags. Do not place mothproofing chemicals in the electric blanket storage box or bag, as the chemicals may damage the insulated wiring.

See Stan for

Precision Machine Work

or your needs on GEAR HEAD REPAIR DRILLING B-J PUMPS Parmer County Pump Company

-FRIONA-

true in this instance as in any other. If every homemaker who objects to the commercialization of special days in the year would spend as much time changing the situation as we do complaining about it, some change would soon be noticed. In the hope that our readers will enjoy the editorial as much as we did, we are re-printing it here:

FATHER'S DAY

During the month of June we set aside a Sunday to do honor to the man of the house, and for one day out of the three hundred and sixty-five, Father comes into his own, as we celebrate Father's Day. We'll probably load him down with neckties he wouldn't want to be found dead in, and he may spend the next few weeks smoking all the brands of cigars he wouldn't buy for his worst enemy, but, like everything else that comes along, he'll take it all in stride, happy in the thought that at least, or at last, somebody remembered that he exists. For a day, he's in a different role--he's on the receiving end.

While there are many things we might get for Father, things that he really needs and could use, there is something that each and every one of us can afford, and doesn't necessitate our digging down into our funds for one single solitary penny. This important something that is owed to Father, which this modern age seems to have forgotten as belonging to him, is everyday ordinary RESPECT.

In many families, Father is merely the exchequer, and today's trend seems to allow him to retain only that title. He may be loved in a sort of abstract way--"Sure he's a great guy." But he deserves much more than this. We should be grateful to him, not only because he chose a wonderful mother for us, but for all that he has done to provide and maintain for us the home life and environment that is ours. He should be re-established in his rightful place as head of the household, and

children should be taught to respect him as such. His opinions should be honored, and his influence brought to bear in all matters concerning the discipline and well-being of the family.

Let's give some thought to this matter of honoring the head of the house, and at the same time we may be doing something to combat the ever-spreading threat of juvenile delinquency. Let's inaugurate a FATHER'S DAY that REALLY MEANS SOMETHING!

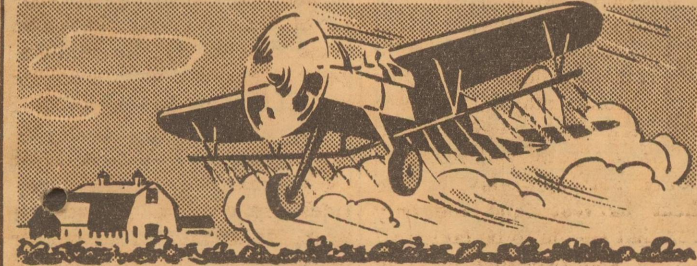

Since making a home was not intended to be a woman's job alone, there are a large number of things the head of the house should consider in this joint "do-it-yourself" project. Too many of us fail to realize the importance of full cooperation of every family member in any project the group undertakes.

Making our holidays mean more to each family member than just buying a gift is a project every member of the family can work on.

Favorable moisture for cotton production has multiplied the weed and grass problem. Fred Elliott, extension cottons specialist, suggests that cotton producers take a good look at practices which can cut the costly hand hoeing bill. He suggests rotary hoes, lateral oiling of grass and weeds in young cotton and spot spraying. Local county agents can supply information on these practices.

The development of an automatic pilot for farm tractors is expected to increase the effectiveness of cultivation for weed control, says W. L. Ulich, extension agricultural engineer.

Daily Showers Fall on Farms

Showers have fallen with almost daily regularity on the majority of farms in the Parmer County area, bringing moisture amounts of from 1 1/2 to 3 1/2 inches during the past week.

In general, the moisture has been unwelcome. It has slowed or stopped completely the harvesting of wheat, which is already running behind schedule. The velocity of the winds and the threat of additional hail has farmers extremely anxious to get the golden grain into the elevators.

Even where wheat dried out enough to permit cutting, moisture amounts have been sufficient in many cases to make the land muddy enough so that combines and trucks could not operate in the fields without great difficulty.

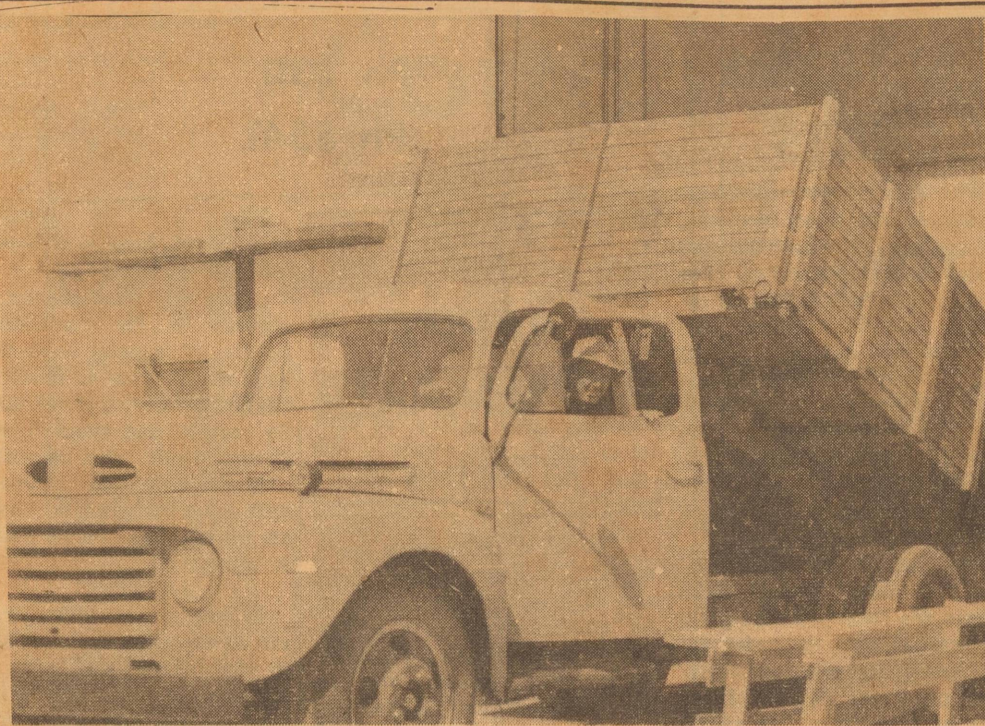

Moisture for young cotton

has been generally adequate, and most farmers would rather have sunshine than rain on this crop at the present time.

The new grain sorghum crop, on the other hand, is making good use of the rainy spells, and is coming along splendidly. This is the best start grain sorghum has had in the Parmer County area for the past five years.

In the typical thunderstorm pattern of the High Plains, most of the moisture has come in the late afternoons and evenings. Turbulent clouds and winds have sailed across the Plains almost daily for a full week now, and the first of this week, conditions gave no promise of abatement.

Ability is a poor man's wealth.--M. Wren.

UP SHE GOES!-- Modern handling equipment at Parmer County area elevators has practically eliminated the long lines of trucks that used to be common during the summertime wheat harvest. Elevator dumps gobble up the flow about as fast as it can be hauled in.

THE PARMER FARMER

by W. H. Graham Jr.

One of the most significant tests ever made at the research station at Halfway--at least in our opinion--was the recharge experiment recently. There, workers using the "two-way" well facilities found that they could return water from a surface lake left after the heavy rains at about the same speed that the well could lift water for normal irrigation requirements. The thirsty sands below slurped up the murky drink at the rate of 800 gallons a minute.

Water valued at \$1,320, based on a conservative figure of its worth per acre foot, returned to storage. The scientists avoided siltation, which is always a problem, by occasionally turning on the well and lifting the silt back to the surface.

Every 24 hours during the week-long experiment the pump was operated for 30 to 40 minutes and then back-flushed to dislodge particles. The lake bottom covered about 25 acres.

In just one week, about 22 acre feet of water was put back into the ground through this specially equipped recharge-irrigation well. Most of our irrigation wells pump from 150 to 250 acre feet of water per year, so this could be said to have been something on the order of from 10 to 15 percent of the annual water requirements.

It is easy to see how much this could mean to the irrigated Plains if the practice becomes widespread. And this is the only experiment we've heard of where a return rate that approached the normal withdrawal rate was maintained for any length of time.

The men at the station say they've invested about \$3,000 in extra equipment for this special well. There is quite a bit of this expense that the average farmer of this area won't be interested in, such as scientific measuring devices. But he will want to install the pipeline necessary to get the water from the lake to the well, and then from the well to a high point on the land being irrigated so that the usual gravity-flow system can take over from there.

Pumping out the silt and back-flushing the well does a lot of good in keeping the formation open, but eventually, the sand would probably plug up with the fine particles being carried in by the water from the lake. That's the reason that the word "flocculation" is one you'll want to include in your vocabulary, Mr. Farmer.

This is used to describe the new chemical process being introduced in experiments, which is supposed to settle the silt out of the water so that it's relatively clean when it enters the recharge well. When properly applied, the chemical has sifted out about 85 to 90 percent of the fine particles normally suspended in the muddy lake water.

These experiments are very exciting. They offer the first real promise we have had in prolonging our underground water supply almost indefinitely. If we can clean up our lake water, and get enough recharge wells to put it back underground, we may be on the track to an unlimited, prosperous irrigated agricultural economy.

What this means in terms understandable to Parmer County area farmers is even more significant. Not only does our county have the greatest underground water resources of any on the High Plains, but it also has the greatest DRY SAND resources also.

That is, the dry or unwatered portion of the Ogallala formation under our county is the thickest of any on the Plains. In many sections, we have 100 feet or more of dry sand above the water table. This happy fact means we have a ready reservoir for recharge water, and one which will hold many times our annual requirements. From a practical standpoint, we need never be concerned about what to do with our surplus run-off water.

Tests show that a farmer can "stack" water under his recharge well almost like cordwood, and that the lateral movement of this water is very slow. If farmers could be convinced that they can recover almost all of the water they put under their farm, they might be more likely to invest in and go to the trouble of handling recharge equipment.

The passage of time will doubtless see much more of this type of work.

NEWS FROM THE FARM BUREAU

BY RAYMOND EULER

Rhea Community has been busy the past several weeks trying to keep grasshoppers out of their crops. It is also noticeable that they are doing a thorough job of eradicating noxious weeds, especially bind-weeds.

Then, last week at their regular Farm Bureau meeting, they had Bill Broadhurst out there talking to them about water conservation. Walter Schueler, chairman of Rhea Farm Bureau, has a fine group of community-minded people to work with and is doing a good job of leading. It appears to us that nearly all of the people out there take an active interest in any proposed project for improving the community. They have the kind of neighborhood cooperation that many other groups covet.

Nearly any meeting of interest to farm people will see a good number of Rhea people coming in together. We are not overlooking Black Community, which has received a lot of attention and publicity for its progressive self-improvement community projects the last few years, nor Hub Community which has built the fine building that hosts many important meetings for farmers of the county. Then we know that Oklahoma Lane is in the process of building a community building to increase interest in community get-togethers and the promotion of worthy projects, too.

The thing that seems to be lacking more than anything now is some method of getting all these community groups to attend county-wide meetings that are in the interest of all of them.

We are of the opinion that it is about time for news stories to go back to the use of full

12 Parmer Licenses Suspended In 1958

Texas Department of Public Safety says 38,323 persons were listed as suspended in Texas during the year 1958.

Of the suspensions, 15,139 were suspended because of a conviction in court, of an offense making the suspension of their drivers license mandatory, such as: driving while intoxicated, driving while under the influence of drugs, aggravated assault with a motor vehicle, negligent homicide with a motor vehicle, murder with our malice with a motor vehicle, and driving while license suspended.

Another 23,184 were suspended because they had been involved in a motor vehicle accident in which \$100 or more property damage was sustained by any one person or in which someone had been injured or killed and the drivers and/or owners were not covered by liability insurance or had not filed proof of financial responsibility with the Department of Public Safety as required by law.

During 1958, there were

names instead of initials when speaking of federal and United Nations and other agencies or bureaus. We are, in fact, offering five dollars to the first young person (who graduated from a Parmer County High School this year) who gets the name in this office of the organization initiated SUNFED.

American Farm Bureau is opposing provisions of a bill authorizing federal funds for the United Nations Special Fund, which, says Farm Bureau, would, in fact be the beginning of SUNFED.

CONSIDER THIS: My son, fear thou the Lord and the king; and meddle not with them that are given to change; for their calamity shall rise suddenly; and who knoweth the ruin of them both? PROVERBS 24:21-22

12 suspensions placed in effect on residents of Parmer County. Of these, one was for conviction in court requiring suspensions of drivers licenses and 11 were for failure to show proof of financial responsibility after being involved in an accident reportable under Safety Responsibility Law.

The suspensions do not include persons convicted in court or those involved in accidents, who filed acceptable proof of financial responsibility during the year.

There are three methods of showing proof of financial responsibility for suspensions resulting from convictions; they are:

1. A certificate of motor vehicle liability insurance (Form SR-22).
2. A bond in the amount of \$15,000 signed by two persons owning real estate equal in value to at least twice the amount of such bond.
3. A certificate of deposit

of money or securities with the State Treasurer in the amount of \$15,000.

The nation's 4-H clubs now have a home of their own. It is the National 4-H Center located at 7100 Connecticut Avenue, Washington, D. C. The National 4-H Foundation has its headquarters in the Center which will be formally opened on June 16.
