WORK CONTINUES ON SURVEY FOR RED BLUFF DAM

There has been no let up in the efforts and interest of those working in behalf of the Red Bluff irrigation project.

According to a statement given a representative of the Enterprise this week by R. G. West, representing the Texas Board of Water Engineers and the U. S. Geological Survey, the Red Bluff proposition is entirely feasible and promises much for greater irrigation facilities in the Pecos Valley.

"The proposed Red Bluff project would hold enough water to adequately irrigate all lands now in cultivation in the valley below together with a large acreage added," said Mr. West Wednesday night.

In addition to his work of making records for the Red Bluff project Mr. West is installing automatic testing machines at different points on the river and the program outlined for future work here in this section will keep him here two years.

Mr. West's most important work here is the installation of a gauge on the Pecos river, just below the Red Bluff proposed site.

OPERATIONS ARE RESUMED ON SITE IN CULBERSON CO.

J. D. Wesner came in from Breckenridge this week to take charge of the Lewis-Jones well, in Section Block 101, Culberson county.

Mr. Wesner has brought with him a car of fishing tools and other extras that may be needed and he is prepared with a standard rig and many other items of equipment to go to a great depth if necessary for a real test of that territory.

Mr. Anthony is very hopeful over the prospects, with the present men in charge of the actual work at the site.

MANY BIRTHS IN OCTOBER Austin, Tex., Nov. 10.—During the month of October there were 12 sets of twins born in Texas of which 42 were male and 30 female, which breaks all records, according to a report of vital statistics made public today by State Health Officer M. M. Carrick.

Total number of births reported was 6909, of which 6035 are white and 874 negro, while the number of deaths reported was 2456, of which 2064 are white and 392 negro.

Mr. and Mrs. Jesse Williams of Saragosa, are the happy parents of a fine son, born to them Tuesday morning. Jesse is wearing a broader smile than usual and says the youngster is a dandy.

REEVES COUNTY FARMERS URGED TO GROW GRAPES

That there is a resource, yet unrealized, right at the door of farmers of Jeff Davis and Reeves counties, even greater than an oil field, is the opinion of men from California and the Ozark region of Arkansas and Missouri who have been visiting in Southwest Texas recently.

To quote the words of one "It is the greatest fruit country in the United States, for producing both quality and quantity, if land holders would only put themselves to the task of putting out their vineyards and orchards."

That grapes will grow on irrigated farms of Reeves county has been known for a long time. Farmers who have tried it declare that some of the finest grapes to be found anywhere have been raised here.

Lee Cochran, a prominent farmer of Springdale, Ark., who has been in the middle of the great fruit section of the Ozarks for years has been in Pecos and surrounding country for several days and he declares that there is no better soil or climate for high grade apples and grapes than that of Reeves and Jeff Davis counties.

"I have never found an apple from any other corner of the earth with as fine a flavor and as rich color as those grown in the Davis Mountains this year," said Mr. Cochran. "Your high altitude, cool nights and abundance of sunshine produce a color and flavor to fruit grown here that can not be extolled anywhere else."

He then went on to tell how that within two years time from planting a vineyard can be bringing in a handsome income.

"Of course it costs a little to put out a vineyard" continued Mr. Cochran, "but after it is started it is a veritable mint for the owner. It'll cost from \$80 to a \$100 per acre perhaps to secure the plants, put them out, stake the land etc. But there'll be some grapes gathered the first year and the second year a good income can be realized.

It is also pointed out by some who have given thought to the matter that only a few acres give one man all the work he can do and to develop the country into orchards and vineyards would make homes and employment for hundreds more people.

KANSAS PEOPLE MUCH INTERESTED IN PECOS Mrs. C. H. Willoughby received a telegram from her husband Thursday morning saying that people in Kansas are very enthusiastic over the Pecos oil field.

CRUDE ADVANCES FIFTH TIME IN THIRTY DAYS Pittsburg, Pa., Nov. 10.—The fifth advance in the price of oils within the last 30 days was noted at the opening of the market here today.

FIRST ARRIVALS FOR DISARMAMENT

FROM ENGLAND

FROM BELGIUM

FROM ITALY

World war heroes from all nations have commenced to arrive in the U. S. for the Disarmament Conference called by President Harding.

NEWS IN BRIEF FROM EVERYWHERE

Ten men were killed Tuesday in Kentucky's election rows. Nine of them died in Breathitt county and others were seriously wounded.

Governor Neff will begin an inspection of the State prison system on November 21 and is to be accompanied by members of the Penitentiary Advisory Commission.

Unless prices of corn advance and price of coal comes down Secretary Wallace declares hundreds of farmers in the West will burn corn for fuel.

Nearly 5,000 teachers from the schools of Texas are expected to attend the State Teachers' Association which convenes in Dallas November 24 to 25.

The Philippine question promises to be a bone of contention in the world disarmament conference which is to be held in Washington within the next few days.

Three definite programs—an American, a British and a Japanese—will be before the Arms Conference in Washington the coming week, when it begins the discussion of disarmament.

Arguments are being presented before the Interstate Commerce Commission in Washington for a reduction of rates on livestock shipments in Texas and the Southwest.

GOOD RESULTS FOLLOW CLEANING OUT WELL

Every effort made by the drillers in Toyah-Bell well to clean out the heavy sand that is obstructing the flow of the oil is being rewarded with entirely satisfactory results.

A trench has been made for the pipe line and work on the line is finished with the exception of connecting it with the tanks.

Leases are selling at higher and higher prices and much speculation is being carried on with leases for miles around the Toyah-Bell well.

The eleven other wells that are going down in this territory are progressing rapidly toward the strata where the operators expect the golden flow.

BELL NO. 1 HAS OIL

The derrick is completed over Bell No. 1, where the derrick burned ten days ago and drilling is expected to be resumed here in a few days.

T. & P. CO. ENTERS FIELD

One of the most encouraging events of the week was the announcement that W. K. Gordon of Ranger fame, general manager of the Texas & Pacific Coal and Oil Company, with headquarters at Thurber, is entering the Pecos oil field.

PECOS - ANGELES PROGRESSES

The Pecos Angeles is drilling below 775 feet in red gumbo formation with a ten-inch hole and is making good time.

LAURA WELL FREE OF WATER

The Sunshine Oil Corporation's Laura, eight miles north of Pecos, is now being drilled below 2400 feet in a dolomite formation that makes for rapid drilling time.

HAWKEYE-PECOS REAMING

The Hawkeye-Pecos Oil Company's crew is busy doing straight reaming preparatory to carrying their ten-inch casing below the present depth of 675 feet and down to 1200 feet.

WESNER-ANTHONY TO BEGIN SOON

The old Lewis-Jones well, recently taken over by J. D. Wesner and H. F. Anthony, is again the center of activity 30 miles northwest of Toyah. The well is in Section 2, Block 101, Culberson county.

The Pinal-Dome Corporation is drilling below 317 feet in anhydrite formations.

TROXEL CLEANING OUT

All materials have reached the locations and preparations are being made for placing the pump in the Troxel well. But due to the gummy nature of the gypsum which lays just above the oil sand, considerable time is being required to clean out the hole.

He that lends an easy and credulous ear to calumny is either a man of very ill morals or has no more sense and understanding than a child.—Menander.

STOCKMEN TO GET FINANCIAL HELP

That the government is offering to furnish one hundred million dollars to producers of the Southwest in helping to handle their products is encouraging news.

This money is loaned to the banks at the rate of 6 per cent and they are authorized to loan it at a rate not exceeding 8 per cent.

Cattle raisers and farmers who own ranches and equipment sufficient to handle a given number of cattle, may borrow through the system an amount approximating, if not equaling, the purchase price of the livestock which they propose to buy.

Owing to limitations already placed upon the banks and loan companies, it developed that there are many large loans which they are unable to handle.

FEDERAL COURT MEETS Federal Court for the Pecos district is to convene in Pecos Monday morning.

A TONIC

Grove's Tasteless chill Tonic restores Energy and Vitality by Purifying and Enriching the Blood. When you feel its strengthening, invigorating effect, see how it brings color to the cheeks and how it improves the appetite, you will then appreciate its true tonic value. Grove's Tasteless chill Tonic is simply Iron and Quinine suspended in syrup. So pleasant even children like it. The blood needs QUININE to Purify it and IRON to Enrich it. Destroys Malarial germs and Grip germs by its Strengthening, Invigorating Effect. 60c. (Advertisement)

5 ACRES FOR \$50

Section 4, Block B-20, one mile from drilling contract; has been cut into 5-acre tracts, which will be sold at \$50 each.

1,718,945 WORKERS IN TEXAS IN 1920

Washington, Nov. 6.—There were 1,718,945 persons ten years of age and over in Texas, according to the late census, engaged in gainful occupations. This includes all occupations except those of women doing housework in their own homes and having no other employment, and those of children working at home on general housework or chores. The number is 37 per cent of the total population of the State (4,663,228), and 48.3 per cent of the population 10 years of age and over. In 1910 the 1,556,866 gainful workers were 40 per cent of the total population of the State and 54.6 per cent of the population 10 years of age and over.

Of the gainful workers of Texas in 1920, 82.3 per cent were males and 17.7 per cent females. The male gainful workers constituted 76.6 per cent of all males 10 years of age and over in 1920, as against 82.7 per cent in 1910, while the female gainful workers constituted 17.8 per cent of all females 10 years of age and over in 1920, as against 24.1 per cent in 1910. Of the gainful workers of Texas in 1920, 46.2 per cent were engaged in agriculture, forestry and animal husbandry, 1.8 per cent in extracting minerals, 15.6 per cent in manufacturing and mechanical industries, 7.2 per cent in transportation, 9.5 per cent in trade, 2.7 per cent in public service, 4.4 per cent in professional services, 7.8 per cent in domestic and personal service and 4.7 per cent in clerical occupations. Members of the Baptist Ladies' Missionary Society held a social meeting at the home of Mrs. W. L. Ross Tuesday afternoon. The tea was well attended and a most delightful afternoon was spent.

IT LOOKS LIKE A FIGHT
We read with some surprise, the other day, and herewith pass on to our readers for earnest consideration, the following gem of thought: "The only group insistent on lower rates are the farmers, who, unfortunately, are not a success as business men, but having been coddled and petted by the political element for generations, blame every one but themselves for their own inaptitude and inefficiency. No one with knowledge of the subject will deny that the farmers needs help, but what he needs is not the credit of the whole United States Government, thereby sacrificing the greater, more just and far more important claims of the industrial and mercantile people, and he must understand that his job is to raise the crop and let other people who understand that phase of it market and distribute them. Until then, our business groups will have this continuous and growing unfair competition for capital and credit, for the farmers, claims that he is the basis of all our wealth as well as the means to sustain life."

This was taken from a weekly periodical printed in New York City, one devoted to forecasting business conditions for city business men. Notice the important points made: That farmers are failures as business men; that this is due to generations of coddling by politicians (the establishment of the Department of Agriculture, for example); that the credit needs of industrial and mercantile people (for example, stock and grain gamblers) are far more important; that the farmer is merely a peasant whose job is to produce—in the historic North Dakota phrase, to "go home and slop the hogs;" that marketing, distribution, and the profits thereof are for those who understand them; that the farmer is not the basis of all wealth.

We are surprised and sorry. Not that any one should hold such ideas, but that those who hold them feel themselves strong enough to dare put them in print. Such minds can be persuaded of the truth only by clubbing. And we have hoped that the fight for control of marketing by farmers would not have to include very much clubbing of figurative heads. But it looks otherwise—Farm Journal.

Sleep is to a man's whole nature what winding up is to a clock.—Schopenhauer.

ASPIRIN

Name "Bayer" on Genuine

Take Aspirin only as told in each package of genuine Bayer Tablets of Aspirin. Then you will be following the directions and dosage worked out by physicians during 21 years, and proved safe by millions. Take no chances with substitutes. If you see the Bayer Cross on tablets, you can take them without fear for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve tablets cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid. (Advertisement)

ARMISTIC DAY IS OBSERVED BY PECOS, STATE AND NATION

As the Enterprise goes to press Pecos is all tuned up for a big celebration of Armistic Day as a holiday and many are gathering for the big event.

All Pecos joins with the State, the Nation and sister countries abroad in paying homage to the fallen dead in the late world conflict which came to a close three years ago today.

A long program of athletic events is scheduled and an interesting time for every one promised. The program is given under auspices of the Chamber of Commerce and Richard Briscoe Post, American Legion.

In keeping with the importance of the day Governor Pat M. Neff has issued the following proclamation, which should be read by every citizen of Texas:

Millions for Destruction
"Nov. 11, 1918, is one of the greatest days in human history. The first was immortalized by the birth of the Savior, who came to make free the souls of men. The second was according undying fame by the Declaration of Independence, which proclaimed to all the world the equality of men. The third, Nov. 11, 1918, chronicled the fall of autocracy and the triumph of democracy; sounded the death-knell of the divine right of kings and proclaimed the divine right of the people.

"On the morning of this day, 20,000,000 men were in arms; on the evening of this day there was not an unfriendly shot being fired around the world. On the morning of this day millions of dollars each hour were being spent for the destruction

of human life; on the evening of this day the preservation of human life was the earth-encircling thought. On the morning of this day discord and bloodshed cast a shadow over every civilized land; on the evening of this day peace on earth was the one absorbing thought wherever civilization floated a flag. On the morning of this day the wheels of commerce were standing still; on the evening of this day the five continents and seven seas were preparing to fling wide their doors of trade.

Should Honor Soldier
"In the work and welfare that made possible this day the courageous sons and daughters of Texas, fighting by the side of 4,000,000 other brave American patriots, performed a heroic part. It is indeed fitting that all our citizens should do honor to our valiant soldiery, who, fighting on land, on sea and in the air, added imperishable lustre to American arms and undying glory to the flags of freedom throughout the world.

"Now, therefore, I, Pat M. Neff, Governor of the State of Texas, do hereby designate Friday, Nov. 11, 1921, Armistic Day. Let the click of factories and the whirl of wheels be hushed in the busy marts of men. Let the people of the State assemble in the temples of God, the institutions of learning and in public forums generally, and join with the American Legion in solemn and impressive exercises worthy the memory of all those who by their suffering and sacrifices made the day immortal."

MACHINERY BEING SECURED TO MAKE SOFT WATER TEST

Nothing futher of special interest has developed in the test for a soft water supply for Pecos, since Mr. Niederkorn of the Pecos Ice and Light Company made his announcement of intention to test the "P" wells sixteen miles Northeast of Pecos.

Pumps and engine are being secured to make the test and will probably be set up for the trial within a few days. An effort is being made by Mr. Niederkorn to secure the necessary equipment locally to save time and expense of bringing new and costly machinery from some other city for the work. He will do all possible to make a good test and that speedily.

Another rumor was afloat, but could not be verified, that one of the oil companies drilling in the field had discovered an amply supply of good water and was considering piping it to Pecos for the town's use.

REMINISCENCES

Some twenty or twenty-five years ago I was in the Washington office of Major J. W. Powell, Director of the U. S. Geological survey and in conversation with him, relative to the arid region of the U. S., he gave me a copy of a report he had just made to Congress.

In this book there is a map showing the drainage districts of the arid region of the United States.

The district drained by the Rio Grande will be of more interest to you than any other; but as it has been surveyed and reurveyed quite often you have probably all the data on it that you wish.

The most Southerly of the Districts is that of the Pecos Basin, which I will briefly outline: The extreme northern area lies about twenty-five miles northwest of Mara, New Mexico, and is only sixty miles from the Colorado State line and thirty miles west of the 105th Meridian and about thirty-five degree thirty minutes north latitude.

The western perimeter was very nearly due south, in a somewhat undulating line, passing only twelve or fifteen miles east of Santa Fe and within fifty miles of Albuquerque. It goes through the Mescalero Apache of New Mexico about twenty-five miles east of El Paso; at this point it is two hundred and twenty-five miles wide measured along the inter state line of Texas and New Mexico to Red Bluff, this point there is a ledge of solid rock, extending across the valley, both toward the west and east for an unmeasured distance in each direction. Apparently a most admirable location for a dam site and the empounding of water.

The most northerly or tip end of this drainage district has its origin near Mara, New Mexico, as previously described and here is the Head Spring of the Pecos River.

The eastern perimeter has a general southeastern direction for more than four hundred miles, it passes a little west of Los Vegas, Hot Springs.

As a rough estimate I figure that the Red Bluff Basin has a perimeter of about nine hundred and thirty miles and an area of about thirty four thousand square miles. All the water flowing through this area, perennial as well as storm, goes into the Pecos River above Red Bluff.

Thos. H. Bomar. Jealousy is a secret avowal of inferiority.—Massillon.

WORK RUSHED TO RESUME DRILLING IN BELL NO. ONE

Neither time nor effort are being spared in rushing to completion the equipment at Bell No. 1 that drilling may be resumed there soon. It is expected now that the drill will be pounding away again within a week or ten days.

The crown blocks were placed on the new derrick Wednesday afternoon and everything will be completed ready for the drillers to take charge by the end of this week, it is predicted. Then it will probably take a week for them to rig up. A big truck load of materials were taken from the Texas & Pacific express office Wednesday and hurried out to the well site. The load consisted of a bale of sand line, rolls of bull rop and a roll of belting together with a box full of eats for the workmen. Bunk houses and engine room are being fixed up and everything put back in better shape than before.

Oil is now standing 250 feet in the hole, according to R. F. Grissom, one of the men in charge at the well. Two strata of oil bearing sand have been struck and the well is now down 2200 feet deep. It is about five miles west of the Toyah Bell well.

WHAT MOTHER EARNS

"She has never earned any money—she lives on an Ohio farm, but she lives on almost every other farm. She is somebody's mother, maybe your own. She has earned nothing. No, but during her thirty working years she has served 432,983 meals; she has made 3,123 garments, 32,000 loaves of bread, 5,390 cakes, 7,932 pies, 1,500 gallons of lard; she has grown 1,432 bushels of vegetables, and has raised 7,660 chickens; churned 5,430 pounds of butter; put up 3,625 jars of preserves; scrubbed 177,725 articles dry; and she has put in 35,839 hours of sweeping and washing and scrubbing. At accepted prices for this work it is worth \$115,480.50. She can't retire on her savings—she has to keep on. Not earnings! No. How do you define the ordinary woman's contributions to her family wealth?—Collier's Weekly.

Thought takes a man out of servitude into freedom.—Emerson.

Notice

November 7, 1921.

To Our Customers and Friends:—

The organization of the Agricultural-Live Stock Finance Corporation is now about completed. The Charter will probably be secured this week, and the company be actively engaged in business by the 10th to the 15th of November, if not sooner.

It is the purpose of this notice to place at the disposal of our customers and friends, the service of this Bank in any matters connected with the handling of loans through the new concern. We have found in a great many instances that prospective borrowers prefer to first talk matters over with us pertaining to this class of business and learn something of the requirements, in order that they may put their application in proper form, and meet such details as are necessary.

We invite you to call at our office, should you feel inclined to take advantage of such service as we are able to render. You can rest assured that it is our pleasure to serve you in this mater.

Very truly yours,

The Pecos Valley State Bank

H. & G. N. RY. LANDS FOR SALE IN REEVES COUNTY

Surveys Nos. 45, 47, 53, 55, E. half of 51, and 55, in Block 4; and Nos. 45; 47 and W. half of Block 5.
The surveys in these blocks are situated from 6 to 8 miles from Pecos City, in the arid section of the Pecos River country and will be sold only in whole sections.
Also, surveys No. 49 in block 6 and Nos. 9, 13 and 15 in block 7.
Also, surveys Nos. 1, 3, and 5, fronting on the Pecos River, in Reeves county, and Nos. 19 (a river survey) Pecos county.
Also 12 surveys in block 11 and 3 surveys in block 12. None of these are river lands. All are in Pecos county.
All these lands are under lease for oil, gas and mineral purposes and any sale of same will be made subject to such leases.
J. C. LOVE of Pecos is agent for the sale of all these lands situated in Reeves County and application should be made to him for the purchase of same.
There is no local agent for the sale of the lands in Pecos County, and parties desiring to purchase any of same should apply to the undersigned.

EUGENE CARTLEDGE, Agent and Attorney in Fact.
AUSTIN, TEXAS

WHY THAT LAME BACK?

That morning lameness—those sharp pains when bending or lifting, make work a burden and rest impossible. Don't be handicapped by a bad back—look to your kidneys. You will make no mistake by following this Pecos resident's example. Ask your neighbor.

Mrs. R. E. Miller says: "Several years ago my back was weak and lame and ached constantly. My kidneys acted too often and that annoyed me very much. It didn't take many boxes of Doan's Kidney Pills to cure me."

Mrs. Miller gave the above statement October 27, 1913, and OVER THREE YEARS LATER on April 7, 1919, she added: "I still recommend Doan's Kidney Pills highly. They are fine. I use a few of Doan's occasionally and they keep my kidneys in good condition."

Price 50c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Miller had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

Senator Tom Watson complains that Senators are kept on the jump by those "devilish machines known as motorcycles" when near the Capitol. What a pity a few machines cannot be used in the Senate chamber!—Cincinnati Enquirer.

CONSUMPTION OF OIL EXCEEDS PRODUCTION

Washington, Nov. 10.—Consumption of petroleum and its products exceeded production and imports in August for the first time this year. Stocks of all refined products decreased sharply while domestic tank farm and pipe line stocks of crude continued to increase, although at a reduced rate. Thus the net decrease of stocks at refineries during August was 7,639,737 barrels. Domestic pipe line and tank farm stocks of crude increased 3,756,000 barrels, but stocks of Mexican crude held by importers decreased 3,112,000 barrels, so that stocks of crude and refined decreased as a whole 6,999,737 barrels, or at the annual rate of 82,380,823 as shown on the barometer.—The Oil World.

KENTUCKY FIELDS SHOW DECREASE IN PRODUCTION
Lexington, Ky., Nov. 10.—Oil runs from the Eastern and Southern Kentucky fields, as reported by the Cumberland Pipe Line Company for the week ending October 22, totaled 69,680.13 barrels, as compared with 74,049.43 barrels for the previous week—a decrease of 4,369.30 barrels.

THE CAVEMAN'S DAIRY

The goat is one of the oldest animals of the creation. It was the companion and the dairy supply of the caveman. The first suit of clothes was the skin of a goat. In Abraham's time riches was counted by the number of goats kept. Jacob gained Isaac's blessing by the meat of a savory kid. Why not be wise in the knowledge of the ancients? Goat meat is considered the only pure meat by the Hindus. Goats are the healthiest of animals and thrive well in confinement. The goat is clean, intelligent, gentle, easily handled, takes little space. Six goats can be kept for the feed of one cow. They will produce twice as much of a richer and safer milk. * * * The milk of a healthy goat is white, rich, and of fine flavor. Goat milk is best because it has more protein, fat, mineral and vitamins. It tastes like pure, fresh, rich cow's milk, only it has no cow taste. Under sanitary conditions, goat milk keeps longer than cow's milk. It has less water, more butterfat, albumen and solids than cow's milk. The fat globules are one-fifth smaller than cow's milk. The walls of globules are one-fifth thinner, consequently break down easier. Are acted on quicker by the gastric juice in the stomach. * * * The curds of goat milk, like mother's milk, are soft, fluffy, very small. Cow's milk takes two and one-half hours to digest; goat milk half an hour.

It is the safest food because it is practically free from tuberculosis. In three years two goats only, among 500,000 were said to be infected with tuberculosis. * * * Being practically free from tuberculosis, goat milk can be taken raw. Cooked or pasteurized milk loses some of its most valuable properties. Raw milk is a live milk, has all the physiological properties needed. It is the only way nature intended it to be taken for the growing young. * * *

Forty per cent of the children die from want of proper food, or malnutrition. Milk is the only proper food for growth; it has no substitute. Don't let your child be one of the 40 per cent; goat milk will assure that. Goat milk is best of all—it is richer, purer, safer and costs less. It is baby's best food, next to mother's milk, and often better.

It is retained by the weakest stomach, when all other foods fail. In countries where people live longest, they feed on goat products. Goat milk makes delicious butter, and the best of cheese. Goat meat is not surpassed by any other, for quality or flavor. A roasted kid is a dish for the most fastidious. It makes the finest of sausage and a large variety of potted meats. Goat milk makes the most delicious ice cream, delicate cakes and pastry. Cakes made with goat milk need no butter, and are of finer texture.

Buy a goat for your milk supply and beat the H. C. L. Give your children goat milk and save doctor bills. Goats can be kept in the back yard as well as on the ranch. A goat will pay for itself in six months, a ready supply of milk at the back door. Goat milk saved many of our boys at the front; they helped win the war. Buy a goat and bring economy, health and happiness to your home.—Dr. C. P. DeLangle, in Angora and Milk Goat Journal.

CLING TO OLD MARRIAGE IDEAS

To the visitor in Athens, who sees anything of the home life of the people, it is surprising and sometimes puzzling to see several brothers, perhaps, unmarried, while one or two of their sisters are wed. Not knowing the custom of many of the Greeks, the visitor may think that Athenian men always marry late in life, while girls always marry when they are young. But, if they mention this supposition to any one who knows, two questions will be asked before an answer is given.

"Is the family rich?"

"No."

"Are there any daughters of the house unmarried?"

"One—the youngest."

"Ah, then," the information giver will smile. "How could a son get married when a daughter is unmarried? Perhaps there is the question of dowry still unearned."

But what has all this got to do with it? The inquirer may ask in bewilderment.

"Just this," his friend will reply: "It is the custom. In all well regulated homes no brother may marry while even one sister is unmarried. Besides, it is still the old habit for girls to marry only according to their ages. The oldest girl must be married first, the second oldest second, and so on."

"Does it always happen this way?"

"Not always. Sometimes of course brothers will fail in their duty. They will become enamored of some pretty face, and—but we're not talking about bad young men. We're speaking of the brothers who are good. They hold fast to the old Greek custom. You see, don't you, that it makes a young man eager to help his sister get married, and makes them anxious to contribute to their dowries?"

"Naturally," the questioner begins to smile.

"Some good young men have remained unmarried for years, and have given all their hard-earned savings to the dowries of their sisters. This is the reason in some cases that there are many Greek young men in the United States. Many are the dowries which have come across the ocean. And when this duty is done, then the good Greek gets married."

TEXAS STANDARD FORM LEGAL BLANKS

THE ENTERPRISE HAS IN STOCK AND FOR SALE A COMPLETE LINE OF THE FOLLOWING BLANKS

- Contract
- Bill of Sale
- Warranty Deed
- Stock Mortgage
- Quit-Claim Deed
- Oil and Gas Deed
- Affidavit in Effect
- Chattel Mortgages
- School Land Deed
- Power of Attorney
- Vendor Lien Notes
- Transfer of Royalty
- Sale Option Contract
- Mineral Transfer Deed
- Affidavit to An Account
- 88 Form Oil and Gas Lease
- Permission to Take Deposition
- Assignment of Oil and Gas Lease
- 88 Form Producers' Special Lease
- Release of Mortgage or Deed of Trust
- Petroleum and Gas Prospect Application
- Metallic and Non-Metallic Mineral Application
- 88 Form Trans-Pecos Oil, Gas and Mineral Lease

THE ENTERPRISE IS PREPARED TO PRINT ANY OTHER BLANKS ON SHORT NOTICE

JUST SO IT'S PRINTING, THE ENTERPRISE CAN DO IT AND DO IT JUST A LITTLE BETTER THAN THE OTHER FELLOW. THERE'S A NIFTY, PLEASING APPEARANCE ABOUT EVERY JOB TURNED OUT OF THIS OFFICE—AND YOU AND THE ONE TO WHOM YOU WRITE OR SEND PRINTED MATTER KNOW IT IS AS GOOD AS THE BEST

No subscription taken for less than six months.

Entered as second class matter October 22, 1915, at the postoffice at Pecos, Texas, under the Act of March 3, 1879.

Representative of the AMERICAN PRESS ASSOCIATION

A good way to start the day off is with a brisk walk toward your place of business—with a smile on your face and a cheerful "good morning" to everyone. The response will be alarming.

Someone has wisely said that there are only two classes of things we need to worry about—namely, the things that have happened and the things that are going to happen anyhow. Really what use, then, is there to worry at all.

To talk the sunshine spirit will drive the clouds away. To talk in a cloudy manner only tends to cultivate cloudiness. The man with the sunshine spirit will make all about him feel more cheerful. Talk sunshine. Forget the language of clouds.

The success attained in the fight against tuberculosis is worthy of notice. The death rate from this disease has fallen to the low level of approximately 120 per 100,000 population. This represents a saving of over 75,000 lives a year, as compared with the death rate of fifteen years ago.

When it becomes cheaper for any country to burn corn or any other food than coal or regular fuel there is something economically wrong with the country. There are thousands of men, women and children in the United States who are unable to get enough corn meal or any other food to properly live. And there are in the earth thousands of tons of coal and thousands of people needing it to keep warm during these biting winter days. Yet the price of coal is so high and the price of corn so low that it is cheaper to burn corn in many sections than to sell it and buy coal.

STOP TWO MINUTES TO PRAY President Harding's injunction to the people of the United States to stop today at noon and for two minutes stand at attention and pray is worthy of the serious consideration of everyone.

The average person does not do enough meditating anyway. It is seldom that one meditates for as much as two minutes at a time, unless he is under a dark cloud of sorrow, grief or disappointment. To stop occasionally and meditate brings one's thoughts inward and when an individual looks introspective he is sure to find it profitable, for then it is that he sees himself to the extent that he can make amends, reparations and put himself on a more satisfactory ground with his God and his fellow men.

The great conflict that was fought and on the 11th day of November, 1918, was ended, brought many to their knees in sorrow; and during the several years that preceded that memorial day there many minutes, yes, hours and days, spent in profitable meditation and prayer. Now let us observe the President's injunction and stop long enough to meditate, to pray and to consider ourselves as real citizens.

THAT IRRIGATION PROJECT Too much praise cannot be given those who are behind the proposition to secure government aid in building the great Red Bluff irrigation project on the Pecos river. The completion of this would mean more to the Pecos Valley farmers, business interests and towns than anything that has been started in this section in a quarter of a century. It means that thousands of acres that are not now getting enough water will be watered sufficiently. It means also that thousands of other acres now untilled will be made to bloom as the rose. It means that hundreds of farmers may be given homes that are not now enjoying such a privilege. It means that more money will pour into the pockets of everyone who has any kind of legitimate business in the towns of this section of the state. Let there be no discouragement said about it. Let all push hard until the successful completion of all our efforts

are realized. It may take some time but it will be well worth all efforts and patience invested in it.

MONEY FOR STOCKMEN It seems now that the moneyed men of Fort Worth and some other cities of the Southwest have at last gotten together in a fashion that will be of great help to the livestock man. They have organized the Agricultural Livestock Finance Corporation to handle money offered for loan by the War Finance Corporation of the government. The first named organization has been perfected at the suggestion of the head of the War Finance Corporation that the government's loans to the livestock men and farmers may be handled in a more satisfactory manner to all concerned. The rate of interest to be charged by the loaning agencies is prescribed by the government's agency—the War Finance Corporation, the limitation being that not more than 2 per cent be charged for handling the minor loans to the stockmen and farmers and making 8 per cent the maximum to be paid for loans in helping the ranchmen and tillers of the soil. It is also stated that an amount equal to the price of the livestock, a farmer or ranchman proposes to buy to stock his ranch, may be secured through this plan. If the theory of it works and the limitations put about the system are enforced the Enterprise does not see any reason why it should not be a great blessing to the stockmen and farmers of Texas and other Southwestern States.

PROHIBITION FAILED TO KILL GRAPE INDUSTRY Fear that prohibition would ruin the grape growers of California has been allayed and new vineyards are being planted all along the coast, according to L. R. Flock, assistant engineer of the Elephant Butte irrigation project. Mr. Flock has just returned to El Paso with his bride, formerly Miss Grace Minnich, from a 3,000-mile honeymoon trip which took them through a number of national forests and irrigation projects in Arizona, California and Oregon. "In addition to grapes," said Mr. Flock, "fig trees are being planted by thousands in California. One orchard near Fresno is claimed to be the largest in the world, having 16,000 acres planted to figs."—El Paso Herald.

MUCH LAND IRRIGATED IN THE SUNSHINE STATE New Mexico land now irrigated and irrigable land under projects under construction total 945,981 acres, according to a folder issued by the A. T. & S. F. railroad, copies of which have been received by L. M. Lawson, project manager of the reclamation service. "The cost of the Elephant Butte dam was \$5,000,000 and the total cost of the project up to January 1, 1921, was about \$10,000,000," the pamphlet states. Of the Carlsbad project the pamphlet states: "The irrigation works consist of a reservoir with a capacity of about 60,000-acre feet, 17 miles north of Carlsbad; a distribution reservoir with a capacity of 6,000-acre feet at Avalon and a canal system that extends about 25 miles south to Malaga. "Possibilities for development of water power are great in many parts of the State. It is estimated a hydro-electric plant at the Elephant Butte dam will produce 24,000 horse power, or between 100,000,000 to 150,000,000 kilowatt hours."—El Paso Herald.

REHABILITATION OF T. & P. MOST REMARKABLE FEAT The transformation of the Texas and Pacific Railroad in the last twenty months from a rival of the Arkansas railroad and to well-known slow train into one of the best railroad properties in the South, with a record now equal to any of the other larger railroads for the movement of trains and traffic, is one of the transportation marvels of recent years. This transformation has taken place with such a steady persistency that now the road has reached a place where it no longer is ashamed to look its rivals in the face and it has won the admiration of the people along its line in the two states it traverses. Railroad men assert that no greater transformation of a railroad has ever been brought about in the same length of time. At the close of the war the receivers, C. L. Wallace, of New Orleans, and J. L. Lancaster, of Dallas, Tex., determined that as rapidly as money and men could be obtained they would carry out the original building program to the end. The Texas and Pacific Railroad stretches almost straightaway from New Orleans to El Paso, a distance of 1164 miles, traversing a varied and rich country through Louisiana and Texas. Operating only on the revenue derived from the railroad and without borrowed capital, the receivers first began their attack on the roadbed. They bought 250 miles of eighty-five-pound steel rails, and most of this has been laid between New Orleans and Baird, Tex., making a heavy track over the whole system. They followed this up with the purchase of 400,000 square yards of ballast and 1,200,000 new cross-

ties. The ballast and the ties practically are all down. Seventy wooden bridges have been replaced by steel and concrete structures.

Telephone dispatching circuits have been installed along the entire line. Following a fire the car and engine shops were rebuilt at Marshall, Tex., and the company now has a plant that is capable of turning out the finest passenger cars and largest locomotives, if necessary. All the locomotives have been converted from coal burners to oil burners. Storage containers for 1,000,000 barrels of oil were built. New equipment includes fifty steel passenger coaches, each with a seating capacity of eighty-eight persons; ten of the finest steel dining cars, twelve steel baggage and express cars, and two steel baggage and mail cars; eleven light Mikado freight locomotives; fourteen six-wheel switch locomotives; fourteen Pacific type passenger locomotives; thirty Santa Fe type freight locomotives, 160 tank cars; 300 steel Roger ballast cars, and a weedburner that through the use of superheated air kills vegetation along the rails and on the roadbed.

Recently the running time of the through trains between New Orleans and Dallas was reduced four hours. Through sleeping car routs have been established between New Orleans and El Paso and New Orleans and Denver. In the last two months 97 per cent of the passenger trains have been operated on schedule time.

A LETTER FROM REV. FRED B. FAUST

Clovis, New Mexico, Nov. 8, 1921. Mr. John Hibdon, Pecos, Texas. Dear Brother Hibdon: Your generosity never failed in allowing me as much space as I required in your paper. I ask but once more to say a word which I did not have opportunity for saying before leaving (I liked to have said the best town in the universe, but I might have to beat the stuffin' out of Clovis if I said it) Pecos.

I cannot forget the kindness, generosity and loyalty of the people whom I learned to appreciate for their real worth. I only wish I had the time and power to express to each individual this appreciation. You may imagine that we fairly devour almost every line of the Pecos Enterprise when it comes. It almost amounts to a family row to read it.

In your issue of Nov. 4, 1921, I see Brother Thurston's letter. What he said of Brother Garner is true and then some more. What he said of Brother Magee, well, his pastorate of seventeen years manifesting every element of a Christian gentleman speaks with a power which no frail word of mine can approach. As a preacher, teacher, citizen and a Christian gentleman, he embodied the qualities borne out of the heart of God. The impress of his life is buried deep in every institution and movement and enterprise that has helped to make Pecos a better town. If I had been at the funeral my feeling of loss would force me into the pew of those that mourn.

Brother Thurston does not quite understand his appointment in being assigned to Pecos. He is following only in Apostolic succession. Brother Joe was so ugly until he was interesting and practically all since have been afflicted with a lack of good looks. The first qualification, it seems, for a preacher to be considered for Pecos, is that he must be ugly, then other qualifications are taken up and discussed in their order. You have found Brother Thurston a man of deep study and broad experience. He will deliver himself with power and poise that will build up the church in its most Holy Faith. If you could but know the record of his pastorate in Mexico, where he served for four years and could have heard some of the things which I have heard the Texico people say to me personally you would "rejoice and be exceedingly glad, for great is your reward" for putting up with some of the things you have had in the past. You have already discovered this and more. Again thanking both you and the church and the people of the town for all you have meant to me and mine, I am most cordially yours, FRED B. FAUST.

CATHOLIC CHURCH NOTICE Low Mass will be read at nine o'clock every second, fourth and fifth Sundays of the month in St. Catherine's church, Third and Pine streets, Pecos. Mass will be read at Toyah on the first and third Sundays. VICTOR C. JANNES, Rector.

To Stop a Cough Quick take HAYES' HEALING HONEY, a cough medicine which stops the cough by healing the inflamed and irritated tissues. A box of GROVE'S O-PEN-TRATE SALVE for Chest Colds, Head Colds and Croup is enclosed with every bottle of HAYES' HEALING HONEY. The salve should be rubbed on the chest and throat of children suffering from a Cold or Croup. The healing effect of Hayes' Healing Honey inside the throat combined with the healing effect of Grove's O-Pen-Trate Salve through the pores of the skin soon stops a cough. Both remedies are packed in one carton and the cost of the combined treatment is 30c. Just ask your druggist for HAYES' HEALING HONEY. (Advertisement)

NOTICE OF SALE Notice is hereby given that on the 28th day of November, A. D., 1921, at 2:00 o'clock P. M. there will be sold at Public Auction to the highest bidder for Cash at front door T. P. Freight Depot in Toyah, Reeves County, Texas. The following articles shipped by W. E. Hascha from Laredo: Acct. Reisor, Texas, on 9, 14, 20, consigned to Toyah Lubr. Production at Toyah, Texas. Refused by consignee one well drilling Machinery, No marks. Owner may obtain shipment prior to time of sale by submitting proof of ownership and paying all accrued charges including cost of this advertisement. GEO. W. HENDERSON, Agent. 12-4t.

FOR SALE—I have one hundred shares of stock for sale in the Pecos Natural Oil Company—the company that brought in the Toyah Bell. For price address, N. H. Curtis, 503 S. 5th St. Arkansas City, Kans. 1t*

NOTICE TO HUNTERS If you have any luck and bring down a nice buck, get a cat or soyote skin or a good bird specimen and want it mounted or made into a rug, phone or call at Walker's Tailor Shop. I do all kinds of taxidermy work correctly and true to life. Work guaranteed and prices right. W. A. Jones, Taxidermist, phone 28. 13-3t

Judge Jas. F. Ross and family came in Tuesday from their farm at Balmorhea where the Judge has been seriously ill for the past few weeks. He is very much better now and will be out in a short time.

Anthony & Norwood sell anything. See us. (Advertisement) 1t. If you have anything to sell. List it with Anthony & Norwood. 1t. (Advertisement) If these people can gamble \$100,000.00 in putting down a well can't you gamble a few dollars on a lease? O. J. Green Merc. Co. 13-2

The Commercial Club of the Pecos High School will have a demonstration of their work at the High School auditorium Tuesday evening, November 15th, at 7:30 o'clock. There will be special musical numbers in addition to several addresses by business men of the city. The public is most cordially invited to attend the exercises.

DANCE Mr. and Mrs. Marian Slack were at home at a very pleasant little dance Saturday night in honor of Mrs. Slack's sister, Miss Corrie Biggs. A most delightful time is reported.

FOR SALE OR LEASE 100 acres in S. E. corner Sec. 26, Blk. 58, Tsf. 1, T. & P., Culberson Co. Write owner, R. McFadden, 304 No. Rosedale, Tulsa, Okla. 1t* (Advertisement) The big money is made in leases, buy a few acres close to Torah Bell. You will never regret it. O. J. Green & Co., Pecos, Tex. 13-2

Help! Help! Help! Help! \$10,000.00 Wanted Quickly

To finish drilling this well to production. Location by R. M. Holden of New York City, as eminent an authority as ever visited and geologized the lands of West Texas and whose findings have been enthusiastically approved by many geologists who have visited the property. Every prediction made by Dr. Holden has so far proven true including the accurate foretelling of the outcome of the Grant Wonder and Miracle Wells of Pecos County.

Located on Section 25, Block B-19, Ward County, at a point on a Mammoth Oil Structure running through Loving and Ward Counties, and at a point on that structure where it is joined by a second oil stream coming from the Northeast. Dr Holden said we would open up THE GREATEST SHALLOW OIL FIELD IN TEXAS. Other geologists have said that ALL WE NEEDED TO DO TO SECURE BIG PRODUCTION WAS TO DRILL THE WELL. C. H. Willoughby, the Oil Wizard of the Now Famous Toyah-Bell No. 2, spent two days on the property with me last summer and stated that I WAS DRILLING OVER THE BIGGEST POOL IN THE ENTIRE FIELD. He was in my office this week and voluntarily offered to put that statement in writing, if I so desired.

I have been selling leases in the vicinity of this well at \$25.00 to \$50.00 per acre and consider them the best investment in the field at that price. They would be splendid investments at \$10.00 per acre if my well was never drilled, both on account of the geological situation and other development going on in the vicinity. I HAVE SET ASIDE ONE THOUSAND ACRES THAT I WILL SELL AT \$10.00 PER ACRE, not only that but listen.

I have just returned from California where I am acquiring ONE THOUSAND ACRES OF VALUABLE OIL LEASE North of Santa Maria, the home city of the Pinal Dome Oil Company, the strongest developing company in the Pecos Field. This land has production on three sides at no great distance with main line of the Southern Pacific Railway across the lease and a 2000 foot switch on the property; it fronts the ocean and there are pipe lines close by. Several wells drilling on adjoining leases, one of them by one of the great and successful Huntington Beach developers. My geologist said we would secure big production at 1500 to 2500 feet. ample California capital is available for drilling California wells and I anticipate no trouble in financing that proposition.

In order to better handle my business I have organized the Two States Oil Company. The Ward County Well has already been turned over to the new company; the California and all other properties will be turned to it as soon as acquired.

NOW LISTEN: For a short time I will give \$10.00 worth of stock in the new company with every acre of lease taken at \$10.00 per acre, LESS THAN ONE-HALF OF THE PRESENT SELLING PRICE OF THE LEASE ALONE. This stock will entitle you to participate in the production of the Ward County Well and all other properties secured by the company. UNQUESTIONABLY THE GREATEST VALUE AND THE GREATEST POSSIBILITIES OF ANY OIL INVESTMENT OF THE YEAR.

Lands will be assigned closest to the derrick to the first people who send in their money, the last to order will receive the tract furthestest away. None will be over four miles from the derrick and all leases will cover lands on the Main Oil Structure, and PRESUMABLY OF EQUAL VALUE AS OIL PRODUCERS.

ACT QUICKLY. Orders by telegraph advised; remittances can follow by mail.

E. L. STRATTON, Gen. Sales Agent PECOS, TEXAS

BRIDGE CLUB

An interesting meeting of the Thursday Bridge Club was held at the Ira J. Bell home, with Mrs. Donald Bell hostess. The first part of the afternoon was occupied with a business meeting at which four new members, Mrs. Marian Hudson, Mrs. H. B. Prickett, Mrs. Harry Anderson and Mrs. Ira J. Bell were voted into the club. Other matters were disposed of and later a number of guests came in to enjoy the bridge games.

A Halloween color scheme was charmingly carried out in the table decorations and further emphasized in the delightful two-course refreshment plate served by the hostess, assisted by Mrs. Ira Bell and Mrs. Charles Kendall.

Invited guests were Mrs. J. A. Drane, Mrs. David Tudor, Mrs. C. J. Charske, Mrs. M. W. Collie, Mrs. Charles Kendall, Mrs. Ralph Sparks, Miss Sparks, Mrs. Paul Goodwin, Miss Grace Duncan, Mrs. H. B. Prickett, Mrs. Marion Hudson, Mrs. Carl Smith, Mrs. Clem Calhoun, Mrs. Harry Woods, Mrs. Roger Wolfe and Mrs. Edwin Mayer. Club members present were Mrs. Monroe Kerr, Mrs. J. W. Moore, Mrs. W. H. Browning, Mrs. Walter Sutherland, Mrs. O. J. Bryan, Mrs. Mable Beauchamp, Mrs. G. C. Parker, Mrs. H. C. Roberson, Mrs. John Howard, Mrs. J. E. Starley, Mrs. W. W. Dean, Mrs. Dorothy Heard and the hostess.

CALOMEL SALIVATES AND LOOSENS TEETH

The Very Next Dose Of This Treacherous Drug May Start Trouble.

You know what calomel is. It's mercury; quicksilver. Calomel is dangerous. It crashes into your bile like dynamite, cramping and secking you. Calomel attacks the bones and should never be put into your system.

If you feel bilious, headachy, constipated and all knocked out, just go to your druggist and get a bottle of Dodson's Liver Tone for a few cents which is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start your liver and straighten you up better and quicker than nasty calomel and without making you sick, you just go back and get your money.

Don't take calomel! It makes you sick the next day; it loses you a day's work. Dodson's Liver Tone straightens you right up and you feel great. No salts necessary. Give it to the children because it is perfectly harmless and can not salivate.

ITCH!
Money back without question if HUNT'S GUARANTEED SKIN DISEASE REMEDIES (Hunt's Salve and Soap), fail in the treatment of Itch, Eczema, Ringworm, Tetter or other itching skin diseases. Try this treatment at our risk.

CITY PHARMACY

Colds Cause Grip and Influenza
LAXATIVE BROMO QUININE Tablets relieve the cause. There is only one "Bromo Quinine." E. W. GROVE'S signature on box. 5c.

BIG SPRING HOPEFUL
In the wildcat wells put down in the Big Spring county, practically the same strata of gas and oil were hit as were struck in the Toyah Bell and if oil in commercial quantities exists there we have every reason to believe that it will be developed here. When more work in the Big Spring field is started plans will be made to make deep tests, as deep as this well in the Pecos section, instead of starting out with the expectation of striking oil just below the grass roots.

—Big Spring Herald.
Don't buy till you figure with us. O. J. Green Merc. Co. 13-1

Twelve deep tests going down. Better buy a few leases before it is too late. O. J. Green & Co., Pecos, Tex. 13-2

NOTICE OF SALE OF PERSONAL PROPERTY

The State of Texas, County of Reeves.
Notice is hereby given that the undersigned, John F. and James Fred Nelson, acting under and by virtue of a certain chattel mortgage executed and delivered to them by the El Paso-Saragosa Oil Company, a trust estate, of date February 25th, 1921, duly registered in the Chattel Mortgage Records of Reeves County, Texas to which reference is made, will proceed to sell at public sale, for cash, to the highest bidder, in front of the Court House door, in Pecos, Reeves County, Texas, on Wednesday, the 23rd day of November, 1921, between the hours of ten o'clock a. m. and four o'clock p. m. of said date, the following described personal property, to-wit:

Six hundred (600) feet of ten-inch standard well casing, now situated on the drilling site of El Paso-Saragosa Oil Company, near Saragosa, in Reeves County, Texas.

Said sale will be made to satisfy an indebtedness due the said James Fred Nelson and John F. Nelson by reason of a certain promissory note executed and delivered to them by said El Paso-Saragosa Oil Company, of date February 25th, 1921, for the sum of \$1,592.21, due thirty days from date, and 10 per cent attorney's fees, said note bearing a credit of \$1,100.00 of date March 18th, 1921, said note being secured by the Chattel Mortgage above referred to covering the well casing above described. Default having been made in the payment of said indebtedness, said sale will be made to satisfy the same.

Witness our hands this 9th day of November, 1921.

JOHN F. NELSON,
JAMES FRED NELSON,
By J. A. DRANE,
Their Attorney.

LIFT CORNS OR CALLUSES OFF

Doesn't hurt! Lift any corn or callus off with fingers

Don't suffer! A tiny bottle of Freezeone costs but a few cents at any drug store. Apply a few drops on the corns, calluses and "hard skin" on bottom of feet. They lift them off.

When Freezeone removes corns from the toes or calluses from the bottom of feet the skin beneath is left pink and healthy and never sore, tender or irritated.

Habitual Constipation Cured in 14 to 21 Days

"LAX-FOS WITH PEPSIN" is a specially-prepared Syrup Tonic-Laxative for Habitual Constipation. It relieves promptly but should be taken regularly for 14 to 21 days to induce regular action. It Stimulates and Regulates. Very Pleasant to Take. 60c per bottle.

If you own land in Reeves or Loving counties, and want to sell oil and gas leases send me description of land and price for five year commercial lease.

J. W. MOORE,
Pecos, Texas.

A SMALL PURSE

For one of moderate means an investment in oil means the making of a sacrifice. So great care should be exercised, first in selection of a competent dealer, and then in the class of acreage purchased.

IT IS

on this basis that we solicit your business. We have some splendid tracts, both large and small, close to all wells in this field.

PORTERVILLE, TEXAS

PROBABLY A SECOND BURKBURNETT

Located in the Center of a Large Body of Rich Irrigated Valley Land
and in the Immediate Vicinity of the Most Intensive Oil
Development in the History of the World, Previous
to Big Production.

You know what happened at Burkburnett, at Ranger, at Eastland, at Breckenridge, at Huntington Beach, at Signal Hill and at each of the recent oil fields. Mexia as the latest sensation and possibly the greatest in Texas oil history, furnishes an object lesson of what may be accomplished by those who have the foresight to invest small sums wisely at the proper time. Many leases at Mexia that could have been purchased at \$100.00 per acre, (10 ordinary city lots), in 1920 have increased steadily in value till they are now selling at \$50,000.00 per acre, and the end is not yet.

Every newspaper or magazine reader is familiar with the history of Burkburnett, where the "Common People" came into their own, where oil gushed from every town lot on which a shallow well was drilled, where hundreds of people went to bed poor and woke up the following morning rich beyond their wildest expectations. What made the change? The drilling of one well largely through the faith of one woman who was convinced oil lay beneath. When the drill brought up a golden flow hundreds, yes thousands, of investors flocked in and bought small properties at enormous prices, or drilled wells on lots, paying royalties daily to the owners in hundreds, thousands and tens of thousands of dollars. History that reads in terms so great as to be almost beyond belief.

One well drilled with little or no geological research made Burkburnett the Wonder Town of Oil History. Many wells are drilling near Porterville, while numerous geologists have stated unqualifiedly that the Greatest Oil Field in the World would be developed in that district. NEVER AN UNFAVORABLE REPORT FROM ANY RELIABLE SOURCE. The town lies in the best Permian formation for oil drilling in the west half of Texas, according to the State Geological Survey (See Bulletin No. 47, furnished by the University of Texas, Austin, Texas). According to the United States Geological Survey the two great oil streams of the American Continent form a junction in the Pecos Field, with Tampico to the south (See Oil and Gas field map of the U. S. Geological Survey, Department of the Interior. Draw a line from Canada to Mexico, another from the Pennsylvania Oil Fields to Porterville. These lines in the shape of a letter Y cross all American oil fields, excepting the coastal oil fields of California).

The Toyah-Bell No. 2, the first Big Sensation between Ranger and the Pacific Coast. The initial gas flow was estimated at 100,000,000 feet; the oil commenced blowing in immediately.

Porterville lies in the center of the most intensive development in the entire Pecos Oil field, where over 50 experimental wells have been undertaken. The Toyah-Bell No. 2, the Record Breaking Wonder Well between Ranger and the Pacific Coast, lies a trifle over a mile to the east. The drill penetrated the oil pool close to the dividing line between gas and oil, positive proof that it is not over the apex but to one side of the main body of oil. State and Federal Geologists have always claimed that the Pecos River followed the apex of an oil structure. Geological Maps issued by the State of Texas show Porterville in the midst of the Permian Formation, the best prospective oil land in the entire Pecos Oil Field. If these eminent authorities are correct, and who dare contradict them, THE MAIN OIL POOL LIES AWAY FROM THE TOYAH-BELL ON THE SIDE TOWARDS THE RIVER, THE SIDE TOWARDS PORTERVILLE. The town lies on the highest point in the river valley for miles, THE POINT WHERE THE UPLIFT IS GREATEST, THE POINT WHERE THE OIL IS CLOSEST TO THE SURFACE.

The famous Bell Well that caused the greatest sensation in oil history during 1920, now drilled 1600 feet deeper and showing exceptionally good gas and oil signs, lies to the west.

The Pinal Dome Company, unquestionably the strongest developing company in the entire field, a company having the reputation of always developing oil in a large way, is drilling to the North-east. At this time they are over 3000 feet deep.

The Pecos-Angeles, three miles away and on the side opposite from the Toyah-Bell, is drilling rapidly on one of the best structural formations in the entire field.

Consult the map and you will see that THIRTEEN OTHER BIG DERRICKS have long since commenced operations in the vicinity. Each of these, successful or unsuccessful, will contribute their share towards the prosperity of the town—IN ALL EIGHTEEN TIMES AS MANY CHANCES AS WERE ENJOYED BY BURKBURNETT.

PORTERVILLE

Is the only town in Loving County as yet unorganized and certain to be its county seat.

Is the only postoffice north of Pecos within a radius of 40 miles.

CONSIDER THIS CAREFULLY: Several months ago people were suffering from a bad attack of oil hysteria and with their eyes shut were buying anything called "oil stock" or "oil lease." As a matter of fact not over five per cent of the area of any oil district, possibly less, is capable of producing oil. People who bought or who buy within that area, have a run for their money, the other ninety-five per cent have nothing. As a rule the investing public knows nothing of the inside facts of oil development and should be careful to purchase only from reliable sources who offer for sale securities and titles covering lands geologized by men of science and pronounced good, and what is equally important, if early profits are to be expected, in vicinities where immediate development is certain. The buyer of stock is absolutely at the mercy of the company in which he takes an interest; the purchaser of an oil lease secures title to oil produced on the land excepting one-eighth which goes to the owner of the land; the purchaser of a tract of land in fee SECURES EVERYTHING, THE BEST INVESTMENT IN THE WORLD. Such we offer you in the lots at Porterville.

Maps, plats, price lists, application blanks, etc., mailed free on request. It must be understood that all prices are subject to sharp advances from time to time, as oil develops in the field, as well as in the vicinity of this townsite. Immediate action is advisable and may be necessary in order to secure the benefit of present prices.

Is on the graded and graveled Pecos-New Mexico Auto Highway.

Is in the center of a bend in the Pecos River containing 7000 acres of valley land furnished with ample water for irrigation by a system put in operation in 1908, where crops of oats, wheat and alfalfa have been produced that have been rarely equalled in any country and 2 bale cotton never surpassed in the State of Texas. Grapes of the California varieties and peaches have been grown nearby equal to California's best.

The climate, according to the U. S. Weather reports covering 40 years, has the least variation summer and winter of any portion of the United States.

Any oil investment of merit is attractive, as it poses the greatest possibilities for big, quick profits of any investment known. THIS IS THE BEST OF ALL. You are in line for enormous profits three ways, if you purchase property in this town.

FIRST: This town unquestionably lies over an oil pool, or oil stream. A well on the townsite 66 feet deep has traces of sulphur and has shown a film of oil on each bucketfull of water pumped from it the last 13 years. With oil now developed adjoining the town, its future is assured.

SECOND: With oil developing elsewhere in the vicinity, the town will boom as no other oil town ever has and all property values will rise rapidly.

THIRD: Lying in the center of an irrigated lands district property values would unquestionably increase steadily, regardless of oil development.

The Santa Fe Railway runs along the west side of the Pecos River. Porterville lies on the east side. The river between is bridged by a massive, single span steel bridge.

Five hundred residence and business lots owned by the Porterville Irrigation Company, a corporation organized under the laws of the State of Texas, are offered for sale at prices ranging from \$100.00 to \$1000.00 each, either for all cash subject to a 5 percent discount, or one-third cash and the balance in monthly payments, not to exceed five. Titles clear of incumbrances and taxes paid for 1921.

Money received from the sale of lots will be used as far as necessary in perfecting the grading of all roads, cutting out a few blocks as yet ungraded and other civic improvements.

FORTY-TWO PARTY

The attractive H. R. Anderson home was the scene of one of the most attractive social affairs on Friday, when Mrs. Anderson entertained her friends with Forty-two. Various colored chrysantheums, with pot plants, added a charming decorative note to the reception room, where the hostess was assisted during the afternoon by Mrs. Hugh Roberson, Mrs. J. W. Parker and Mrs. Alfred Tynally.

At the close of an interesting series of games a delicious two course luncheon was served. Included in this delightful hospitality were: Mrs. J. E. Starley, Mrs. G. C. Parker, Mrs. J. W. Parker, Mrs. Ralph Sparks, Miss Sparks, Mrs. A. G. Taggart, Mrs. David Tudor, Mrs. S. C. Vaughan, Mrs. R. C. Warr, Mrs. E. J. Weyer, Mrs. A. E. Wilcox, Mrs. R. E. Williams, Mrs. Roy Wilcox, Mrs. J. W. Moore, Mrs. A. Tynally, Mrs. B. A. Oden, Mrs. Add Owens, Mrs. W. W. Dean, Mrs. L. W. Anderson, Mrs. J. W. Brooks, Mrs. W. H. Browning, Mrs. Walter Browning, Mrs. O. J. Bryan, Mrs. John Camp, Mrs. Jim Camp, Mrs. Frank Cavett, Mrs. Wylie Cole, Mrs. M. W. Collier, Mrs. H. T. Collier, Mrs. A. J. Cooksey, Mrs. Frank Rarey, Mrs. Cid Cowan, Mrs. J. A. Drane, Mrs. G. E. Finley, Mrs. Wm. Garlick, Miss Grace, Miss Rose Briscoe, Mrs. Tom Harrison, Mrs. John Baker, Mrs. J. B. Heard, Mrs. Mrs. John Howard, Mrs. W. A. Hudson, Mrs. Chas. Manahan, Mrs. Marion Hudson, Mrs. R. E. Johnson, Mrs. H. H. Johnson, Mrs. R. S. Johnson, Mrs. Buelah Wilson, Mrs. Chas. Jordon, Mrs. Monroe Kerr, Mrs. H. B. Prickett, Mrs. Max Krauskopf, Mrs. Tom Ivy, Mrs. J. G. Love, Mrs. H. N. Lusk, Mrs. H. N. McKellar, Mrs. L. Butler, Mrs. Ethel Reynolds, Mrs. H. C. Roberson, Mrs. Louis Roberson, Mrs. G. S. Rowden, Mrs. W. W. Runnels, Mrs. I. J. Sims, Mrs. Albert Sisk, Mrs. Clay Slack, Mrs. Carl Smith, and Mrs. R. Stine.

What is more, the railroad company has, according to the Standard Oil Company's complaint, refused to render "undercharge bills" for the 2-1-2 cents additional per hundred. So the latter company complains to the Public Service Commission, which, after it had recovered from the shock, promised to take the matter up.

COAL FOR SALE. Good Colorado coal. A whole car load on the track now. Price \$17.50 per ton delivered. Get your coal while it is cold. Don't delay—F. W. Piehler, The Acme Laundry Agency, Pecos, Texas.

R. C. WARN

PECOS CITY, TEXAS

To Acreage Owners and Buyers:

The PECOS VALLEY OIL FIELD is coming to the front.

The PECOS VALLEY will be a big oil field shortly.

Many fortunes are made or lost in a new oil field, and the man that has first hand, reliable information, makes the money.

Real EXPERT information is necessary and worth a lot of money at the proper time.

If you own acreage here and your residence is elsewhere, you need expert advice from now on.

If you figure to buy oil properties here, you need expert advice also.

For the last two years I have been at the services of one of the oil corporations here, the first corporation to make extensive geological surveys of his field and open and prosecute drilling operations in Reeves, Loving and Ward Counties.

I have obtained day by day, by personal experience, work, study and association with some of the best Geologists that have made various surveys of this field, information and data of immense value.

A special Geological report and survey on a certain tract of acreage, would cost hundreds of dollars, and not all oil investors or oil property owners can afford to employ and pay big prices to technical experts to secure special reports on what they want when they want to buy or sell, unless it involves a large amount of money. They generally rely upon public information, friends advice, hearsay, luck or promoters' literature, etc, and most of the time buy valueless properties or sell valuable acreage at the wrong time.

On account of my work in this field, the experience and knowledge I have of it, my past experience in other fields, and my constant study and observation of all development work now going on, am prepared to give CONFIDENTIAL INFORMATION on any piece of prospective oil property, or any well in this field, by mail or wire, at any time, for \$5.00, and such information, if taken as they are, can be worth a lot to you, or save you from loss at the present or in the future.

If you are an oil man you need my advice and wires more than anyone else as they will be worth hundreds of dollars to you in railroad fares and time.

When you come to the conclusion that you need disinterested expert advice, and you must have it in a hurry, write me what you want to know enclosing money order or check for \$5.00, state if you want an answer by mail or wire, and I will give you the information and advice you ask, based on my own knowledge of actual facts and conditions as they are.

Reports and surveys of any tract at prices to be agreed upon.

A. V. DE PASCALE
Oil Scout and Engineer
PECOS, TEXAS

PERSONAL

L. C. Rice of the National Life Insurance Company, with headquarters at Albuquerque, New Mexico, was a business visitor this week in Pecos, inspecting the oil field.

R. D. Earnest was a visitor in Pecos from El Paso this week, looking after his oil interests.

Mrs. O. J. Green and children will be the guests of Mrs. M. M. Leeman and children at the ranch for the week-end, the party going out Friday morning.

L. B. Jones, who has been in Pecos for the past week looking after his oil interests, left Wednesday for his home at Jermyn, Jack county.

Mrs. M. M. Leeman left last week for Edmond, Kent county, where she will teach the ensuing year.

Kenneth Palmer and two little daughters, Opal and Vivian, came in Sunday from Stephenville. Mrs. Palmer and the baby are still visiting relatives there and will return to Pecos later.

Mrs. Stacy Boatright has returned from Balmorhea, where she visited her brother, L. L. Barlow, and other relatives.

G. B. Finley, prominent ranchman, who got his leg broken several days ago while on his ranch, is at his home in Pecos and is said to be improving rapidly. His horse fell on him while riding in the round-up.

Mrs. H. N. McKellar returned from Dallas Thursday. She underwent an operation in a Dallas hospital several weeks ago and is said to be improving rapidly.

L. W. Anderson left for Dallas Wednesday on a business trip.

Mrs. Julia Magee will leave Friday or Saturday for Fort Worth to re-enter the Texas Christian University, from where she was called a few weeks ago on account of the serious illness and death of her illustrious father, Bro. H. L. Magee.

Joseph Duncan, father of Mrs. H. L. Magee, who was called here recently on account of the death of Bro. Magee, left Wednesday for his home at Auburn, Mo.

Mr. and Mrs. Thomas J. Ashe and children moved into town this week from the experiment farm, where they have spent the past year. They will occupy their own residence in the southwest part of town.

Misses Jane Looby and Ora Pruett and Messrs. Phil Pryor and M. N. Earlenbach attended the round-up at the ranch of Mrs. J. L. Moore at Brogado Sunday.

John Cowley is up and in fine fettle and is expected home tomorrow.

Coy Thomas of Big Spring, brother of Mrs. Horace Trout, arrived in Pecos Thursday afternoon to attend the Armistice Day celebration and visit Mr. and Mrs. Trout a few days.

J. E. Bartlett of Santa Anna, an old-time four-sectioner of Reeves county, was in Pecos last week on his way to the mountains, hoping to secure a buck deer to take home with him. Accompanying Mr. Bartlett was John Wheatstone. Ed is looking "fit" and well kept.

S. M. Polk, Jr. and Clint Moreland of Santa Anna, were looking over the Pecos oil field last week and were elated with the prospects for a gusher in the Toyah-Bell.

Thos. R. Roberts, for years blacksmith in the Texas & Pacific shops at Toyah, was laid off Tuesday and came over Wednesday to investigate the possibilities of a situation with Wagoner Oil Well Supply Co.

Mrs. Rose Harvey of Dubuque, Iowa, came in this week to look after business matters and is the house guest of her friend, Mrs. D. A. Dodds. Mrs. Harvey has oil interests in the Pecos field.

Mrs. J. L. Moore came in from her farm-ranch on Toyah Creek Wednesday and left yesterday for Fort Worth on business.

BLANTON OBJECTS:
MEASURE PASSES
Washington.—Objection from Representative Blanton to unanimous consent for the consideration of a bill offered by Representative Hudspeth of Texas, transferring Pecos county from the jurisdiction of Del Rio to the El Paso Division of the United States District Court for the Western District of Texas, resulted in the immediate passage of that measure under suspension of the rule.

The bill, designed to relieve lawyers of Fort Stockton and that section from the necessity of making a trip of 200 miles or more and permitting them to return processes at Pecos City instead of Del Rio, was deemed of little moment and had received no attention from the Republicans until Blanton interposed his objection. Then a dozen Republicans championed the cause of the astonished Congressman from the El Paso district and when they ascertained that the bill did not affect or touch Blanton's district, Floor Leader Mondell suggested that Representative Hudspeth ask for its passage under suspension of the rules. This was done and, sensing the hostility his objection had aroused, Blanton offered no further obstacles to passage of the measure.

The Quinine That Does Not Affect the Head Because of its tonic and laxative effect, LAXATIVE BROMO QUININE is better than ordinary quinine and does not cause drowsiness nor ringing in the head. Remember the full name and look for the signature of E. W. GROVE, Inc.

FT. STOCKTON OPERATIONS

Bower, Hale & Lamb are drilling in liemostone, around the 1,500-foot level, in their well on Section 34, Block 26, University lands.

The Bower, Hale, Lamb & Findies well, on Section 592, G. C. & S. F. railway survey, is holding the attention of the drillers this week with a fishing job.

The Humphreys Company, drilling the David well on the Sherbino ranch, Section 55, Block C4, G. C. & S. F. railway survey, is very busy this week setting casing to the bottom and with the conclusion of that job, drilling will be resumed.

Grant No. 6—the old Oregon-Texas Drilling Syndicate well—drilling on Section 19, Block 140, T. & St. L. railway survey, is working in limestone at the depth of 1,180 feet.

The task of setting casing to the 3,000-foot level is about at an end in the Twin Cities Oil & Gas well on the Kokernot ranch, near Hovey, and double tour drilling will soon be under way.

Contractor Humphreys has suspended drilling in Luse No. 3, pending the securing of another and heavier machine to take the place of the one which he had secured for the starting of this well but which he is compelled to release because of the owners having engaged, prior to granting Humphreys the use of the machine, to spud in a well for other parties the first of this month. Humphreys has not changed his opinion of the Luse No. 1, which he contracted to drill on Section 15, Block C3, E. L. & R. R. railway survey, and he says the future of the well looks as good to him now as it did the day they started work. To what depth Luse No. 3 will be drilled is problematical and Humphreys, as a matter of fact, has no definite advice, other than drilling will be continued just as long as the men who are furnishing the finances feel sufficiently encouraged to go ahead.

Superintendent Eddleman, connected with the Detroit Oil Company,

a Las Cruces, New Mexico, organization of business men interested in putting down a well on Section 102, Block 10, H. & G. N. railway survey,

has moved in an Okell rotary drill with a location about two miles to the northwest of the Bower, Hale, Lamb & Findies well. Hole has already been made to the depth of 125 feet.

PRUETT LUMBER CO.

Twenty-five years experience in Pecos should give us an idea about how to supply your wants. We are always on the job. Lumber prices have hit the bottom. Now is the time to get ready for the next oil boom which is expected daily.

PENNSYLVANIA TIRES AND TUBES

At the Following Low List Prices

	NON SKID TIRES	TON TESTED TUBES
30x3	\$12.35	\$2.00
30x3 1/2	14.95	2.35
31x4	22.35	3.15
32x3 1/2	19.40	2.70
32x4	25.80	3.25
33x4	26.85	3.40
34x4	27.35	3.55
34x4 1/2	36.45	4.85

These new factory prices on this popular 6000 MILE TIRE are based on lower prices on raw material and greatly increased production which presents to the tire buyer savings never dreamed of even in pre-war period.

PECOS MERCANTILE CO.

HARDWARE DEPARTMENT

TEXAS IS "BEATING BACK" TO SOIL GROUND AND PROSPERITY

Many millions of dollars were lost on Texas during the crash of 1920 because of the deflation in prices that came upon us like a thunder bolt from a clear sky.

Although only a year has passed the great people of the great state of Texas are rapidly "beating back" to solid ground.

Texas has livestock interests that, although poor markets, low prices are still with us contributes largely to its wealth.

Texas has a cotton crop, even though short, is bringing a good price and stimulating every other market.

Texas has a wonderful corn crop and will fatten its winter meat.

Texas has oil fields that are producing millions of dollars worth of the liquid gold, with the price going gradually upward.

Texas has millions of courageous, enterprising people, who are carrying the flag of progress forward—Texas is "beating back" to prosperity.

NOTICE

No hunting or fishing allowed on U ranch lands. Anyone caught will be prosecuted.—Popham & Popham, be prosecuted.
