

THREE NEW OIL COMPANIES TO MAKE DEEP TESTS

ROTARY STARTS ON LAURA WELL OF SUNSHINE-FEDERAL COMPANY

The people of this section have from the start had all the confidence in the world that when the Laura well was completed to the proper depth it would be a real gusher. There has to date been spent on this well some four to five hundred thousand dollars and it is not a well yet and the greatest depth to which they have ever reached was 2,780 feet or thereabouts. There was never at any time or anywhere anything ever thought of to detain and obstruct the way to the making of hole which has not occurred to the Laura, beginning from almost the very start of the work. Our people were disgusted and the management of the well were sore to the core and at times considered the matter of abandoning the well and the entire field. But their obligations to those who had put their money into the proposition kept them from doing so and they have kept at the job in face of all the difficulties which at times have appeared to be insurmountable.

At last it is believed they have surmounted every obstacle in securing a contract with the Granger Drilling Company and the installation by these people of one of the very best rotary rigs in the entire country. Mr. Granger and Mr. Green, both of this company, this week assured the Enterprise that they had no fears but that the well would be finished up now in record time. They do not appear to care what the condition of the hole is or what it may contain and say that is of little or no consequence to them. They now have the rig installed and were ready to start up yesterday, and to prove their faith in the ultimate and rapid completion of this well to "pay sand" or to 4,000 feet, they have contracted to drill another well for the Ramsey interests and say they will be ready to move the rig over by the time these people have their derrick erected and are ready for them.

Those who have visited the well recently say it looks like a fine outfit and have the utmost faith in the early completion of this well and the ability of the drillers in charge. This is really what the editor considers the very best bit of oil news the Enterprise has been able to give the public in some months, and the feeling that something will be known of this well in the next few weeks is general in our community.

The Laura well is the property of the Sunshine-Federal interests, the Sunshine Oil Co. being the pioneers of the Pecos oil field and people all over the United States are interested therein.

NEW POSTMASTER TO TAKE CHARGE SEPTEMBER FIRST

R. E. Johnson, recently appointed postmaster at Pecos, informs the Enterprise that he will take charge of the office on the first, but that through the courtesy of Postmaster McKellar, he will go in the office Monday and learn the outs and ins of the office under the present administration before taking formal charge.

Mr. Johnson informs the Enterprise that the old force will be retained and that the probability is that no new faces will appear at the windows outside of the change in postmasters. This bit of news will be noted with pleasure by the patrons of the Pecos postoffice since the force there are very courteous and obliging and it is doubted if any improvement could be made by a change.

CLUB ENTERTAINMENT

The Merry Wives Club entertained at dinner, at the beautifully appointed home of Dr. and Mrs. Jim Camp, Tuesday evening, August 22, in honor of Judge and Mrs. W. A. Hudson, who are leaving soon for Dallas to make their future home.

The dinner was charmingly served by three beautiful young ladies, the Misses Mary Stine, Virginia Runnels and Dorothy Sisk.

Mrs. E. L. Collings, in a very pleasing manner, acted as toastmistress, and called upon Dr. Camp, who in a very clever way expressed regrets at losing these good people from our midst. Judge Starley, being called upon, made a very appropriate response. Mrs. L. W. Anderson, the club president, in a few, well chosen words presented Mrs. Hudson with a set of silver salt spoons as a gift from the club.

The evening was spent in playing 'Forty-two,' the ever-popular game, and at a late hour all reluctantly bid the host and hostess good-night. Besides the honorees, Judge and Mrs. J. E. Starley, Mrs. McGreggor and Mr. C. W. Tudor were present.

ONE NEGRO SHOOTS ANOTHER INFLECTING FLESH WOUND

J. M. Scanlan, in town yesterday from Toyah, reports a shooting affair in that city on Wednesday of this week. It appears that two "coons" had a difficulty over a colored dame with the result that one of them fired at the other and plowed a furrow through his chest, inflicting a very painful flesh wound which is thought not to be serious. The one who did the shooting had not been apprehended when the report was made to the Enterprise and it is believed he made his get-away on a freight train which pulled out soon after the shooting occurred.

LATER—Deputy Sheriff Bob Middleton will go to Big Spring this afternoon to bring back the offender who was captured by the sheriff's department there.

TWO NEGRO BOYS HELD

A telegram from D. E. Bardwell, Sheriff at Sweetwater to E. B. Kiser requested the apprehension of two negro boys who went through Pecos on a freight train Wednesday night. They were arrested at Toyah by Deputy Sheriff Jones and brought to Pecos by Deputy Sheriff Middleton Thursday morning. It is not known why these boys are wanted. Their names are Robert King and Otis Amos, each fourteen years old.

PECOS BRASS BAND

The new organization to be known as the Pecos Brass Band held a meeting Monday night for the purpose of ordering instruments and electing officers and the following officers were elected: Francis Wara, president and business manager; Jesse Hardy, secretary and treasurer.

It is expected that another meeting will be held Saturday night at which time it is hoped Mr. Blount of Midland will be here. Those wishing to join the band are requested to come in at once and get in as one of the charter members and help make it a go.

It is to be expected that a band of any consequence will have to have the support of the business men of the town, but the boys say that before asking help they intend to show the public that they mean business.

ANDERSON-CONNALLY

Joe Anderson and Mrs. Rena Connally were united in marriage at the home of the pastor of the Christian church on Sunday night, the pastor, the Rev. C. A. Johnson, officiating.

Mr. Anderson is one of the firm of Shaffer & Anderson, which has just dissolved, and is quite popular as a gentleman and business man. He takes over the business of that firm in Pecos while Mr. Shaffer takes the business in Carlsbad. N. M. Mr. Anderson has lived in Pecos for some time and has made many warm friends.

Mrs. Anderson has lived in Pecos for some time and has made many warm friends here.

The Enterprise joins with a host of friends of this happy couple in wishing for them a happy and prosperous voyage upon the matrimonial sea.

INSURANCE STATISTICS

The statement of insurance statistics compiled from the books of W. W. Dean Insurance Agent, shows the amount of premiums paid for insurance during the years 1920 and 1921 amounted to \$15,443.43. Losses paid \$30,266.28. The increase in business for first six months of 1922 was a fraction over ten percent for the same period in 1921.

Wm. Meyer will leave Saturday morning with his family for California where they expect to make their home. Mr. Meyer called on the Enterprise today and stated that he had been a resident of Reeves county for the past sixteen years and the only incentive he had for leaving was in hope of improving the health of Mrs. Meyer who has been seriously ill for some time. He stated, however, that he would be back as soon as a well came in and had great hopes that that would be only a very short time now. Mr. Meyer was a good citizen and it is with regret that the Enterprise has to chronicle the departure of this splendid family from Pecos.

T. H. Beauchamp and daughter, Miss Ruby Mae, left last week for Midland where they are visiting Mr. Beauchamp's daughter, Mrs. Jim Sharp. From there Miss Ruby will go to Sherman where she will enter Kid-Key College for another year.

J. B. Heard and family and Miss Marjorie Thurston are expected to return tomorrow from a weeks visit to the ranch home of Green McCombs in the Guadalupe Mountains.

WHAT DRILLERS ARE DOING IN THE PECOS OIL FIELD

TOYAH-BELL WELL

The pump has been installed in the Toyah-Bell well and was started up Wednesday of this week. When the pump was started, the well began to flow and if it keeps up its reputation in the past it will keep up this stunt. However, it is expected that it will be some time before all the water is pumped out of the well and a flow of pure oil is obtained. The management is sure this will be the case after the pump has been run for a short time. The stuff now being taken from the well is a mixture of oil and water and the oil is being taken from the water and saved for fuel for the No. 2 well of the Ramsey Oil Co.

RAMSEY WELL NO. 2

B. Ramsey of the Ramsey Oil Co., reports the signing of a contract this week with Granger & Green for the completion of the Ramsey Well No. 2, about five hundred feet from the site of the Toyah-Bell well in Loving County. According to Mr. Ramsey this well will be started as soon as the derrick is complete and the machinery placed in position, however this will not be done until after completion of the Laura well, but the drillers say they will be through with that by the time the rig is completed and they are ready for the machinery. This is looked upon as very good news by our people who know that the Toyah-Bell is a real oil well which was run in the making, and have the utmost confidence that the new well of the Ramsey Oil Co. will come in a producer and forever settle the question of the Pecos Oil Field as being the real stuff.

This well will be finished up with the rotary outfit of the Granger Drilling Co. The well is now down to 567 feet and the hole is in first class condition, and the contractors have agreed to put the well down to 4500 feet or production.

THE TATUM WELL

The Tatum well being drilled by the Tatum Lease Syndicate of Toyah has reached a depth of 1111 feet and the last cuttings of black lime shows a saturation of oil when put to a test of chloroform and as best that can be ascertained the oil is of an asphalt base. Owing to the dropping of a bit work has been halted for a few days but drilling will be resumed by Monday at latest.

The Owen No. 2 was unfortunate in separating their six and five-eighth inch casing as it was lowered. There will be no difficulty in picking it up but it only delays the completion of the well that every one is so anxious to see completed. The depth is 2810 feet.

The Willoughby No. 1 has completed straight reaming and setting casing cutting off water but the progress of drilling could not be learned today.

Negotiations for a refinery for the Toyah shallow oil are still under way but of course they are slow terminating. Those interested reported that they had nothing just yet to make public on that proposition.

PROGRESS AT THE BELL WELL

The Bell well struck a big flow of gas at 2731 feet on March 17th, starting out with an initial production of about thirty million cubic feet per day. It went down to less than half that amount when water began to bother and from that date to this the management have been continuously fighting to set casing below the gas. This was finally accomplished on Thursday and the 5 3-16 inch casing was successfully set, shutting off the gas, which is now coming continuously and with great force up between the 5 3-16th and 6 5-8th inch casings. So strong is the gas flow that it is impossible to work at the well until this gas has been bradenheaded off. The part necessary to bradenhead off the gas are being expected on every train having been ordered from Fort Worth by express.

It is expected it will take two or three days to connect up this gas and when this has been done, it will be possible to drill on down with a dry hole. The casing is set in a hard lime, which it is hoped will be found to be the cap rock of the Delaware sand.

The unusual conditions found in this well, which are now being surmounted, proves that the workmen in charge of the work at the well are capable of handling almost any proposition that may come up and the management looks forward to a speedy completion of the well with a production commensurate with the size of the structure, which is undoubtedly one of the largest in the State.

The depth of the sand, which is proven by the Pinal Dome well, is certainly 250 feet thick and the oil

VISITORS FIND HERSHENSON STRUCTURE FINE

The editor accompanied a party of about twenty-seven out to the Hershenson well, section 13, block 51, Twp. 10, T. & P. Ry. survey, in southern Reeves county last Sunday. The day was mostly cloudy and pleasant and light showers fell in the afternoon in portions of that section of the county.

The party feasted after reaching the property on sandwiches, melons, etc., after which they took a survey of the property from the hillside and later in cars. It appears that Geologist Christner and B. T. Biggs located the structure and passed upon it as being superb. On the hillside the rocks are plainly to be seen slanting toward the well from every direction. On the north, however, and around the well the erosion has been so great that the hills are almost if not quite gone. As nearly as the writer could see the well is somewhere near the peak of the dome and the indications look good to one with the limited knowledge of domes and anticlines as is that of the writer.

The Hershenson well is being drilled by the owners of the lots which comprise the newly laid off township of Hershenson which is on the same section as the well, or probably a mile to the east of the location of the well. Of course, there is nothing there now except the townsite, but it is proposed to grade the streets, put in parks and otherwise beautify the townsite. These lots are now being sold at \$100 for the resident lots and \$200 for the business lots and the purchase of a lot entitles the holder to a 1-2600 part or interest in the well and ten acres surrounding the well. It is proposed to put the well down to 4,000 feet unless pay sand is struck at a lesser depth.

The Hershenson well has probably the largest hole to start with of any in the field. They are drilling with an 18-inch bit and the hole so far is much larger, and when the party were there Sunday they were waiting for a large casing with which to cut off the water before going on down with the well. Owing to the size desired, 20 inches or more, it was discovered that it was not easy of access. The well is now drilling at around 100 feet and in blue shale, showing the formations are shallower than at any other place in the field, so far as the Enterprise knows. Mrs. Hershenson owns in fee or has leased a large body of this land surrounding the well and in case oil is struck will have so much money she will not know what to do with it.

Those in the party Sunday who enjoyed the trip and saw the sights in that part of the county are:

- John Hibdon
- John A. Griffin
- Judge T. F. Slack
- Mr. and Mrs. Monroe Slack and children
- Mrs. H. C. Zimmer
- M. E. Richardson
- Miss Mattie Lee Wilson
- Mr. and Mrs. Glenn Breen
- Sam Biggs
- Mrs. L. Hershenson
- M. Hershenson
- Eddie Hershenson
- Miss Annabelle Hershenson
- Mr. and Mrs. Robt. R. Landrum
- Mr. and Mrs. Simmons
- Sam Breen and mother.

In the interest of efficient work the county extension agent in Catron County, N. Mex., equipped his automobile with low-gear shifts to overcome a rise of 2,000 feet in 2 miles on one of the two main roads across the county and other obstacles to travel, according to a report to the United States Department of Agriculture. Until he did this he could only reach certain sections of the county by horseback or by detouring from 100 to 150 miles. The county seat of Catron County is 107 miles from the railroad, which gives some idea of the difficulties of carrying on efficient extension work in this region.

Ira J. Bell is home from an extended trip east and while he has nothing to give out now he may have something of importance relative to the Pecos oil fields in a few days.

saturation of this sand, as is shown by the Toyah-Bell well, as well as the many showings in the Bell well, which most undoubtedly have come from the Delaware sand which lies below the bottom of the well at the present time, promises a big production.

No well in the country has ever shown as many evidences of big oil below as has the Bell well and Pecos and West Texas are watching for its completion with great interest.

MUTUAL OPERATING COMPANY NOW CONSTRUCTING DERRICK

It has been said that the "darkest hour is just before day" and that seems to prove true in the Pecos oil field as well as in many other places. While several wells in the Pecos field have continued to function and make hole, many others have long since ceased to operate on account of the financial depression, and are seemingly waiting for those who are drilling to bring in a gusher before attempting to raise funds with which to continue work on their holdings. This appears to be about the only thing many of them can do. But since this is a fact there has been no abatement in interest in the field, and no one has lost one iota of the faith in the ultimate development of one of the greatest oil fields in the world right here under our noses.

To justify this last assertion or statement is the fact that not only one, but several companies are just now beginning operations in the field and each and every one of them is composed of men of means and of the very best and most influential men of these United States. This alone looks good to all our people since these companies are coming here with the avowed intention of making deep tests on their holdings and have the money with which to do it regardless of the sale of leases. They do not have to wait on the sale of leases to continue operations.

Of the new companies to enter this field and one of which is now erecting one of the best standard derricks ever erected in this section, according to Manager Bukowski, is that of the Mutual Operating Co. of Los Angeles and Pasadena, California. The latter gentleman has been on the ground for some three weeks and began the erection of a standard 84-foot derrick on Monday of this week. This rig is about three miles west of Red Bluff on the line of Texas and New Mexico, but over on the New Mexico side. The material is now on the ground for the rig, including iron and everything needed, and a new road has been constructed from Red Bluff to the site of the rig. McDonald, an experienced rig builder of Big Spring has the contract and is now on the ground and actually erecting the rig which will be, according to the best information the Enterprise is enabled to get, the "Sampson rig of the entire valley."

Willis Wright, president of this company, says that every dollar in cash to put this well down to 4,000 feet or to pay sand is the property of the company. They have arranged with the Code ranch for the use of the ranch house, furniture and all other property there which can be used to house the workmen, including all houses, sheds, residence, furniture, pumps, etc., and this will also be used as headquarters for this company while in the field.

This company is composed of such men as Mr. B. C. Kiehl, president of the Broadway Store, one of the biggest concerns on the Pacific coast, C. H. Pease, secretary and one of the strong business men of his section of California, Arthur M. Hadley of Pasadena, J. W. Fletcher, president of a two million dollar wholesale lumber company, J. L. Mauldin, capitalist and president of the One Hundred Per Cent Club of Los Angeles, Prof. E. R. Schroeder, for thirty-seven years president of a Los Angeles business college. These are all said to be capitalists and men of high standing with statewide reputation for veracity.

So, as the Enterprise sees it, this will be one of the strong companies operating in the field, and if not misinformed, one which will not have to wait to sell leases to go ahead with the work.

Another company which will enter the field at a very early date so the Enterprise is informed is the Portland-Pecos Oil Co. all the company being capitalists of statewide reputation for putting over things in the state of Oregon with residences mostly in Portland. Among those to put over this proposition and men who are well known are Thos. M. Hart, president, also business man of Portland and capitalist; C. M. Idleman, formerly close friend and neighbor of President Harding, and ex-attorney general of Oregon; M. G. H. Gunther who is secretary and treasurer, and F. Friedlander, both wealthy capitalists.

This company will at an early date begin operations near the site of the well of the Mutual Operating Company over in New Mexico and will put down a deep test on the same structure as the well of the latter company.

Still another company which will develop the structure across the border in New Mexico is that of the Indiana-Pecos Oil Co., organized by Willis Wright and

composed of some of the most prominent capitalists of Los Angeles, California, Indianapolis, Indiana, Shelbyville, Indiana, Portland, Oregon, and other parts of these states mentioned.

The directors of this company are: Enos Porter, Shelbyville, Ind.; Willis Wright, Los Angeles, Calif.; M. L. Clawson, Chas. M. Cooper, W. N. Harding, Ed Selva, Edward D. Moore, J. Buenagel, all of Indianapolis, Ind. and Ira J. Bell of Pecos. The officers are: Enos Porter, president; Willis Wright vice-president; J. Buenagel, vice-president; M. L. Clawson, secretary, and Edward D. Moore, treasurer. Among the names of the stockholders of this company appears some of the most prominent and wealthy citizens of California, Indiana, Oregon and Washington, D. C. M. L. Clawson, secretary of this firm, is an able attorney of Indiana, and has a state wide reputation.

This is about the status of the new oil companies which will be drilling in the Pecos oil field in a very short time—in fact, just as soon as arrangements can be made to begin work, and according to Willis Wright, who has had interests here since the field was first started and who has had some of the most noted geologists in the country to examine and report on his structure, which is beyond doubt, according to his statement and the best proof the Enterprise can get, as good as any in the entire Pecos field.

In fact, it looks as if there was no such thing as hard times and close money, when such companies as these are represented to be enter the field and all with ample money with which to put down deep tests without the sale of a single acre of leases and no stock. Mr. Wright states that leases will be sold because they have a large acreage and the companies are willing for the other fellow to "get in on a good thing," but that they do not need the money to put down these wells.

With this bit of news the editor feels better than he has for months as regards the outcome of the Pecos oil field. That there is oil here and plenty of it he believes as firmly as he believes he breathes, but it at times looked as if all our developers, almost all of them, would go broke before a well was brought in. Now since these companies are to enter the field and several of the older companies operating here it certainly looks more hopeful for this field and the Enterprise now feels sure that before all the holes now going down and these new ones to be started that the pool will be tapped and the lid lifted for greater fortunes for those who have stock to the field and held on to their property.

WELL TO BE DRILLED AT A CENT A FOOT— PAY AFTER DRILLING

J. J. Wheat is "daddy" of a proposition to drill an oil well in the territory of the Toyah-Bell in Loving county at one cent per foot and that one cent to be paid only after the foot is drilled. His proposition is new to the people of this country and is, in the opinion of all to whom the proposition has been made, one of the fairest that could possibly be thought of and it is the sincere opinion of the Enterprise that it will be snapped up like a cyclone and that not one-half of those who would like to get in on this proposition will have an opportunity to do so for the reason that it will be drilled before half of the people find out what the proposition is about. Using the language of Mr. Wheat, himself, the proposition which he has made will be as follows as nearly as he wishes to make it known until he begins his advertising campaign next week.

"Beginning with the next issue of the Enterprise, I will offer to those interested, a chance to help develop oil near the Toyah-Bell well, in Loving county. Every one who has been there and has seen the Toyah-Bell well, knows oil is there.

"You will be asked to pay one cent a foot on this well, and all payments to be made after the footage is made. Not one cent of your money will be paid for anything except the actual footage made.

"This project will be thoroughly explained in the Enterprise next week. I want you to see it and read it, for I feel certain you will be interested."

Mrs. E. A. Fraum is quite ill at her home on Seventh and Cypress streets. Her condition has been such that her daughter, Mrs. R. F. Keiton has been continually at her bedside.

ASPIRIN

Insist on Bayer Package

Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer product prescribed by physicians over twenty-two years and proved safe by millions for

- Colds
- Toothache
- Erysache
- Neuralgia
- Headache
- Lumbago
- Rheumatism
- Pain, Pain

Accept only "Bayer" package which contains proper directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100. Aspirin is the trade mark of Bayer Manufacture of Monocetacidester of Salicylic acid.

LOOKING THROUGH

A GLASS BRIGHTLY A network of fine roads is being built across Texas. And looking forward to that day when they will have been completed, and linked up with good roads in other states, the Automobile Association says:

"When the territory around the Gulf and across southern Texas and southern New Mexico, Arizona and California is opened with an overland highway the motorist will get to that sunshine belt by the most direct road and spend the winter roaming eastward and westward and in camping, fishing and visiting the wealth of historical scenes for which that south country is noted."

In the winter, the association continues, northern people will come down and visit us by the millions.

In summer, people from the southern tier of states will motor north and return the call, cooling off meanwhile and enjoying their vacations.

The Automobile Association of America estimates there are 9,500,000 passenger automobiles in the United States, and 50,000,000 people are potential motor travelers, all willing to take to the road for warm winters and cool summers.

We are led to hope that when our good road are built, about one-fourth of the population of the United States will winter with us, while another fourth will spend their summers in the north and east.

But while we are planning vacations, winter and summer, for almost half our entire population, let's remember that somebody has to work. Somebody's got to make a living.—El Paso Herald.

60,000 BOYS AND GIRLS

IN JUNIOR SHORT COURSES

Over 60,000 boys and girls, enrolled in club work under the supervision of extension workers employed cooperatively by the United States Department of Agriculture and the State agricultural colleges, enjoy the advantage of junior short courses and camps every year. These short courses have become a popular feature with the farm boys and girls and are eagerly looked forward to by them throughout the year.

The courses are patterned somewhat after the farmers' and home makers' weeks, which have been conducted by the agricultural colleges for several years. Besides the instruction given, emphasis is laid on the social and recreational side of junior extension work. Most of the colleges give a course in rural leadership, emphasizing the importance of boys and girls becoming local leaders of clubs.

West Virginia, which besides having 3 State camps for rural leadership for boys and girls, also maintains 40 county training schools. Those schools are held in connection with county camps, and the

farm boys and girls enjoy an outing of from 1 week to 10 days at very small expense. Most States provide similar programs at the college or at some desirable location in the State, and a considerable number—as, for example, Montana and Minnesota—conduct county camps.

Do You Awake Tired and Weak? Know the Joy of Restful Sleep by Taking Ironized Yeast

Do you arise in the morning as unrefreshed as when you retired? Are body, brain and nerves all run down? This terrible weakness which afflicts so many may be blamed on the lack of vitamins and iron in modern foods. Supply these invigorating elements by taking two pleasant tablets of Ironized Yeast three times a day. Everyone knows that yeast is a wonderful builder of strength and energy. But Ironized Yeast embodies a new secret process, known as "ironization," which enables the yeast to produce its results twice as quickly. It tones up the great vital organs, soothes the worn-out nerves and makes you feel like a new person. Get Ironized Yeast today and take a new lease on life, or to try it entirely free, simply mail postcard for Famous 3-Day Trial Treatment. Address Ironized Yeast Co., Dept. 56, Atlanta, Ga. Ironized Yeast is recommended and guaranteed by all good druggists.

Sold and recommended by all good druggists, such as Pecos Drug Company.

The new Goodyear Cross-Rib-Tread Cord

A Real Cord Tire for Small Cars at a Popular Price

The new Goodyear Cross-Rib Tread Cord in the 30 x 3 1/2 inch clincher type is a tire that the small car owner will warmly welcome. It gives him, at a price lower than the net price he is asked to pay for many "long discount" tires, every advantage of quality cord tire performance, for it is a quality tire through and through. It is made of high-grade long-staple cotton; it embodies the reliable Goodyear quality of materials; its clean-cut tread engages the road like a cogwheel. The scientific distribution of rubber in this tread—the wide center rib and the semi-flat contour—gives a thick, broad surface that is exceedingly slow to wear. The tough tread stock in this tire is carried down the side-walls clear to the bead, making it rut-proof to an extraordinary degree. In every particular it is a representative Goodyear product, built to safeguard the world-wide Goodyear reputation. Despite its high quality, and the expertness of its construction, it sells at a price as low or lower than that of tires which lack its important features.

The 30 x 3 1/2 inch Cross-Rib \$12.50
Cord clincher

This price includes manufacturer's excise tax
Goodyear Cross-Rib Tread Cord Tires are also made in 6, 7 and 8 inch sizes for trucks

H. & G. N. RY. LANDS FOR SALE
IN REEVES COUNTY

Surveys Nos. 41, 47, 53, 55, E. half of 61, and 63, in Block 4; and Nos. 42, 48, 67 and W. half of 61, in Block 5.

The surveys in these blocks are situated from 2 to 3 miles from Pecos City, in the central part of the Pecos River country and will be sold only in whole sections.

Also, surveys No. 49 in block 6 and Nos. 5, 13 and 15 in block 7.

Also, surveys Nos. 1, 3, and 5, fronting on the Pecos River, in Reeves county, and Nos. 10 (in Reeves county) Pecos county.

Also 12 surveys in block 11 and 3 surveys in block 12. None of these are street lots. All are in Pecos county.

All these lands are under lease for oil, gas and mineral purposes and any sale of same will be subject to conditions.

J. G. LOVE of Pecos is agent for the sale of all these lands situated in Reeves County and application should be made to him for the purchase of same.

There is no local agent for the sale of the lands in Pecos County, and parties desiring to purchase any of same should apply to the undersigned.

EUGENE CARTLEDGE, Agent and Attorney in Fact.
AUSTIN, TEXAS

Richard Lloyd Jones
says

Rural America Will Do It

Law enforcement is more generally practiced and respected in rural districts and small towns than in the larger cities.

All the great cities were, by a large majority, opposed to the elimination of the saloon. And yet it was the saloon in the large cities that did the most of the soul- and body-destroying business.

Bad in any place the saloon was at its worst in the big towns. Yet the majority favored its retention and today register protest against prohibition. On the other hand, by a large majority, the small towns and the rural districts favor the laws of decency.

For this reason the smaller towns do not today experience, as do the larger cities, that which has been termed the crime wave.

The committee on law enforcement of the American Bar Association, headed by Judge William D. Swaney, of Chattanooga, Tenn., has recommended to the lawyers of the land that a very drastic national law be enacted which will prohibit the promiscuous sale of firearms.

This committee declares that the pistol serves no special purpose in the community today and that it should not be manufactured except so far as government and official needs may require under proper legal regulation and control.

The committee points out that there were nearly 10,000 unlawful homicides in this country last year and 1,200 percent in the last ten years.

The committee also maintains that deliberate murder, burglary and robbery will seldom be attempted unless the criminal is armed. It also points out that crime percentages in Europe are very much less, due to the fact that it is difficult for civilians to acquire firearms and the penalty is severe for carrying them.

Our big cities are so busy with what they regard as the pressing business of the hour, that they are less likely to weigh the moral worth of an issue than are the smaller towns and rural districts. Therefore, the moral support of a righteous redress against a wrong social tendency comes from the less populated places.

The big town men too often think they are the big idea-builders. That is their big mistake. It is the small towns that both make and save the big towns.

It is the small towns and the farmers of the land who put across the big ideas.

Restriction of manufacture and sale and possession of pocket fire-pieces must come and it is rural America that will bring it.

BEING AN EDITOR

George Fitch once wrote a vest-pocket essay on "The Editor." Fitch began his newspaper career as a reporter at \$6 a week, but more recently was a literateur at many times \$50 a week. The last sentence of his observations, which are printed below, probably explain why Mr. Fitch gave up editing for contributing:

"An editor is a red, nervous man who decides what shall go into a newspaper and explain why it got in afterward."

"The editor works at an antique desk entirely surrounded by old papers and noise, and produces the results which enable the business manager to sit in a room fitted with mahogany furniture and Persian rugs and to respond to toasts at great banquets in solemn state and a dress suit."

"It is the editor's duty to feel the pulse of the world and hold the stethoscope to business; to assist at the birth of history; to translate the present, refute the past and arrange the future; to illuminate ignorance, reward merit, put the spotlight on villainy and the pulmotor on reform; to make statesmen and desecrate demagogues, to elect presidents, crown heroes and secure bigger salaries for baseball pitchers; to act as an alarm clock for public opinion, as an elevator for political candidates, and as a goat for every man who says something in a careless moment and who repents too late by declaring that he was misquoted; to embalm truth, an-

ihilate error, to bring the national tear for great misfortune and the national laugh at great foolishness.

"An editor can lower a tariff, head off wars, harness the wrath of the whole people and raise a million dollars for food sufferers. And some editors are so powerful that they can raise their own salaries \$10 a week."

"Editors are seldom praised, but they do not mind that. Editors do not often save any money and if they do, the business office feels as cheap about it as if it had paid too much for printer's ink."—Texas Commercial News.

August 9, 1922

To whom it may concern: We have read the statement in the Dallas Times-Herald in which Mr. Bentley's headquarters reported that the Terrel school board had unanimously endorsed the candidacy of Mr. Bentley. We wish to say that the Terrel School Board has taken no action whatever in the matter and any report to the contrary is untrue.

S. G. EDWARDS,
President Terrel School Board.
S. E. NOBLE,
Secretary Terrel School Board.

The Quinine That Does Not Affect the Head
Because of its tonic and laxative effect, LAXATIVE BROMO QUININE is better than ordinary Quinine and does not cause nervousness nor ringing in head. Remember the full name and look for the signature of E. W. GROVE, Inc.

CALOMEL MAY TURN ON YOU NEXT TIME

Next Dose You Take May Salivate And Start World Of Trouble

Colomel is mercury; quicksilver. It crashes into your bile like dynamite, cramping and sickening you. Colomel attacks the bones and should never be put into your system.

If you feel bilious, headachy, constipated and all knocked out, just go to your drugist and get a bottle of Dodson's Liver Tone for a few cents which is a harmless vegetable substitute for dangerous colomel. Take a spoonful and if it doesn't start your liver and straighten you up better and quicker than nasty colomel and without making you sick, you just go back and get your money.

Don't take colomel! It makes you sick the next day; it loses you a day's work. Dodson's Liver Tone straightens you right up and you feel great. No salts necessary. Give it to the children because it is perfectly harmless and can not salivate.

The World's Greatest Baking Powder

A Drop of Ink Makes Millions Think

AN AMERICAN MAGAZINE reporter once asked John Wrigley, the fifty million gum magnate, what he attributed his huge business success to, and the man replied that it was 90 per cent advertising.

Mr. Wrigley is used as a study among journalism classes as the man who accumulated three fortunes and each time spent them for advertising, after which he started in over again.

It is a well known fact that he spent one million dollars advertising his gum products on Broadway, New York, alone.

THE FUNDAMENTAL FACT —

however, is that after the gum king had spent three fortunes on advertising he did not stop. He let drop a secret that may well be applied to any business, however big, or however small:—

"That advertising is a good deal like feeding a furnace—you have to keep shoveling in the coal in order to keep the fire alive."

A little "ad" dropped here and there in your local paper is really of little value. It is the persistent, weekly and daily call that makes the people sit up and take notice.

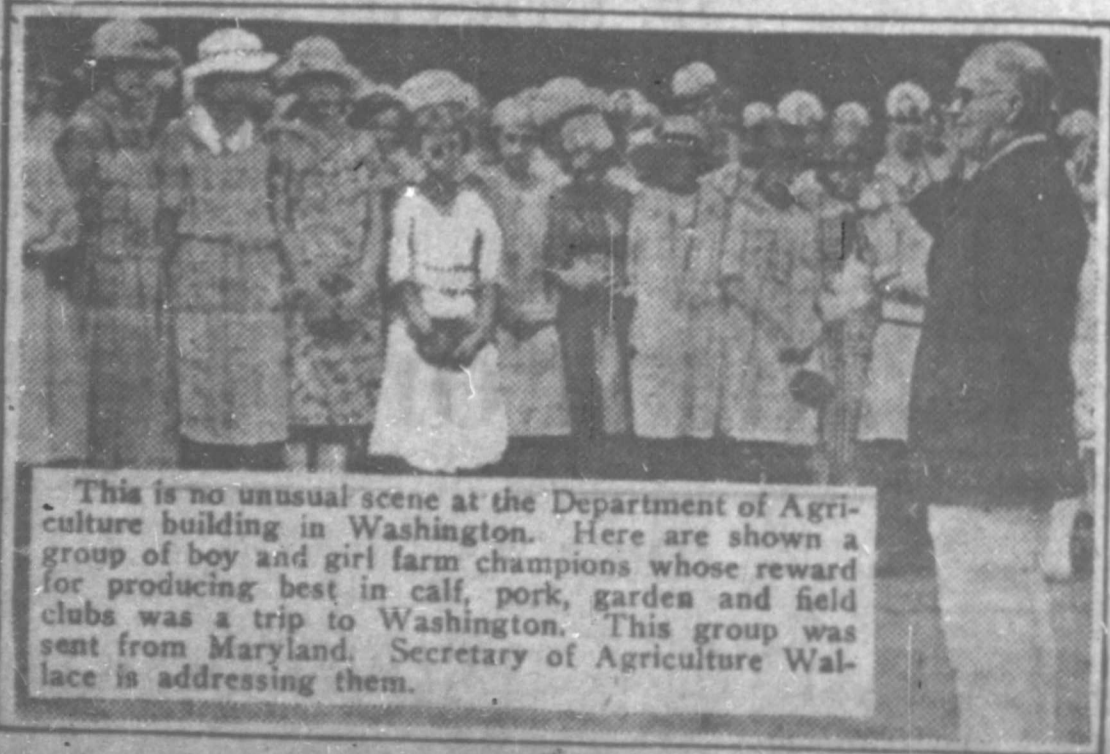

WHAT THE ENTERPRISE CAN DO

It can place advertising, based on the inch rate, in 2,300 homes, virtually circulated among 11,500 people for 50 cents. To attempt to reach the same number of people by post card, the only other means of communication, would cost \$115.00.

It can readily be seen that there is no argument from an economic standpoint as the cheapest and most effective way of reaching the public.

THE PECOS ENTERPRISE

Our Farm Champions in Washington

This is no unusual scene at the Department of Agriculture building in Washington. Here are shown a group of boy and girl farm champions whose reward for producing best in calf, pork, garden and field clubs was a trip to Washington. This group was sent from Maryland. Secretary of Agriculture Wallace is addressing them.

Foreign Advertising Representative THE AMERICAN PRESS ASSOCIATION

Do not forget to go to the polls tomorrow and cast your vote for the man of your choice. There are important offices to be filled and it is your duty to vote and have a say as to who will fill them.

If any idea of the opinion of the public can be obtained by the talk on the streets and in business places of the town the action of the city council in reducing the salaries of the officers and employees of the city will receive the approval of about ninety-nine per cent of the taxpayers of the city. One councilman suggested to the Enterprise that the council had about as much right to reduce the wages as it did when it raised them to a figure which is now unreasonable and unwarranted.

A mob is a monster, with plenty of heads, but no heart, and in every instance, very little brains. That's the reason we are opposed to the Ku Klux-Shutack (Oklahoma) Monitor. But the other objection, which is paramount, is the fact that they work under cover and masks, which makes it possible for thugs, cut-throats and bullies to practice their nefarious deeds under the cloak of the order.

KUN-OFF PRIMARY SATURDAY

The run-off primary will be held tomorrow and the question of who will be our next district judge as well as U. S. senator will be settled. These are both important positions of trust which mean much to our citizenship. The matter of the senatorship is a hard one for the writer to decide and he will not attempt to direct the public as to their vote in this race. Taking their speeches, from both sides, and judging the men by their mudslinging, in either case our people are stung good and strong and it is now a question in the mind of the writer if it would not be better and safer for the citizens of Texas to go to the polls Saturday and cast a vote for Andy Gump instead of either Mayfield or Ferguson. Judging by the speeches of the two Andy is head and ears above both of them.

The district judgeship lays between Judge Charles Gibbs and Tom Garrard and is an important office. The voters should weigh carefully the ability of the two candidates and their fitness for the office and go to the polls and vote for the man who they believe will better serve the entire people and conserve the finances of the district. As is well known by our people this officer can cause to be spent needlessly much of the peoples money.

Another important office upon which the people will be asked to decide, at the Saturday primary is that of superintendent of public instruction. This is also an important office and one in which much good or much harm to the public schools of the state can be done. Of course the state now pays for the text books but that is no reason why these text books should be changed and a new set purchased every few minutes. Bentley, according to the best information the Enterprise has, is in favor of a change in the text books which will cost the voters and taxpayers of the state a large sum of money. Marrs is in favor of retaining the text books now in use. It is presumed, since he had to do with the selection of them in the first place. Besides Bentley is endorsed by the Klan which is very offensive to many of our citizens.

Whatever you do and whoever you vote for every voter in this district and in the entire state, for that matter, should go to the polls on Saturday and cast a vote for the man of their choice. While there are not as many men to decide upon at this primary as at the first one it is just as important that these officers be elected by all the voters as it was in the first primary. So do not forget the date and do not neglect to go to the polls and cast your vote.

THE APOTHEOSIS OF HYPOCRISY

The government goes right on ignoring the prohibition law on sea while making some ineffective efforts to enforce it on land. remarked August Butch, of Anderson, South, when he arrived last week from Europe. Mr. Butch further stated that passengers on the George Washington are being served with liquor from the government on board the ship and then

inviting the government to arrest and prosecute them when they reached shore.

It would certainly be a nice legal question as to whether the government could use money from the United States Treasury to sell liquor on its ships at a profit and then prosecute a purchaser for violation of the law.

It is true the government is in an awkward position. The Shipping Board is spending thousands of dollars to stimulate passenger traffic, but much of the money is wasted because a dry ship has a hard time to win travelers.

The majority of the people of the United States may be dry but they don't travel the ocean enough to back up an American Merchant Marine along lines of moral conduct.

Official dignitaries who publicly espouse prohibition have their cellars, the private room at the public banquet is a recognized factor at all "successful dinners." Even the offices of some of our Congressmen are said to be storehouses for booze.

Summed up, the country stands today the apotheosis of hypocrisy.

The American Merchant Marine seems to rest in the balance, but hypocrisy will sink the ships quicker than any restriction. Let us have enforcement or repeal, one thing or the other.

THE HEN CALDS FOR HELP.

Finally the food profiteers have looked horns with a real opposition.

They face the inexorable persistency of the great American hen and panic reigns. Some years ago the American hen gave warning that she might prove a dangerous enemy and bring about fair prices, but the shrewd profiteers countered, and when the hen laid in sufficient volume to feed the people the cold storage warehouse was conceived.

Instead of being distributed at prices governed by the law of supply and demand, eggs were stored, kept from the people, and doled out at uniformly high prices.

It appears, however, the great American hen has been thinking.

The result is she has again come to the front with a production so bewildering that the cold storage plants cannot take care of it.

True, in spite of this, eggs in New York are selling from 60 to 75 cents a dozen but the bump is at hand.

If the hen gets a little support from the public and a little tiny egg strike be started, the backbone of the price extortion will be broken.

It is all very well to store eggs, but when it comes to erecting more and more great steel and concrete structures equipped with the expensive freezing plants to take care of them, then it may be thought better to sell the present stock at a fair price. There are now 303,000,000 dozen eggs in storage—more than three dozen for every person in the United States.

And the great American hen is still on the job.

SURPRISE CONTEST IMPROVE.

QUALITY OF MILK DELIVERED
Surprise milk contests—contests in which the milk sold by various dealers in a city is compared by taking samples occasionally without warning—have been very effective in improving the milk supply of many cities. Contests of this kind carried out with the assistance of the United States Department of Agriculture have shown remarkable results in a number of western cities. The bacterial counts and the total milk scores for the cities were made up from each of the delivery systems.

In Long Beach, Calif., the average bacterial count in the first contest was 118,238; in the last contest it was down to 11,823. In the first the average score of the milk sold there was 71.56, and in the last it was up to 90.67. The milk sold in Riverside, Calif., improved in bacterial count from 101,500 to 8,522, and rose in score from 82.93 to 93.63. Los Angeles dealers, as a result of these surprise contests, made great improvement in the quality of the milk supply, bringing down the count from 84,169 to 12,690 and raising the score from 80.69 to 91.65. The figures for Portland, Ore., changed from 148,490 to 13,970, and from 76.19 to 92.52. The number of bacteria in a cubic centimeter of Seattle milk was brought from 64,124 down to 31,297, and the score was lifted from 80.50 to 88.24.

A milk dealer does not like to be surprised with dirty milk on his wagons especially when the results of the tests are to be published in the local papers. When his score goes up he finds the number of his customers going up; when the bacterial count increases he finds an increase in the number of ex-customers.

The natives of the island of Guam are learning that there is a better way of keeping their pigs at home than the common practice of tying them to a tree or stake by a short rope fastened about the foreleg, according to reports to the United States Department of Agriculture. A pen of bamboo which will accommodate one sow and litter, or three or four growing pigs, and may be moved frequently has been introduced by the local Federal experiment station and is gradually supplanting the tying method on the island.

For courteous treatment—prompt and efficient service—by expert mechanics Phone 247. Green's Motor Service Co. 2-17

MANY APPLES TO BE SHIPPED

Local orchardists are making arrangements to ship their crop of apples to the market as soon as possible. According to reports, a large yield of this crop is expected in some of the leading orchards although much fruit was damaged by late frost and hail. The C. A. P. orchard will produce about seventy carloads of first class Canos, Arkansas Blacks, Gordon Grimes and other kind of apples. J. H. Holloman and other fruit growers will also have several carloads of apples to ship.

The shipments will not equal the shipments made last year, but will be a source of great income to the orchardists. The worms have been responsible for a shortage in the fruit crop regardless of the spraying of the trees several times.

Very little is known concerning the apple crop of Hope, although several carloads will be shipped. The shippers expect to receive approximately one dollar per box for the crop this year.—Artesia Advocate.

BOY SCOUT MEETING.

I hereby issue a call to all the scouts of troop No. 1 to be present at the regular meeting on next Tuesday evening. Mr. Dean will meet with us at that time for the purpose of giving instructions in the principles of drilling. It is very important that every member be present at this meeting, because Mr. Dean has kindly consented to meet with us, and it is not right to ask him to give his time to this work when only a few are present. So please let's every one be there this time. Don't forget! Tuesday at 7:00 p. m. Thank you.

J. L. SPEARS, Scout Master.

TO THE LADIES OF PECOS.

The Parent-Teacher Association will serve lunches at the school building during institute week as they did last year. Reasonable charges for the lunches will be made and the proceeds will go to pay for re-equipping the school grounds with swings, etc., and whatever other necessities are needed. So you will be called upon by committees to donate provisions for the lunches.

MISS REBECCA A. ANDERSON.

Miss Rebecca A. Anderson, passed away Sunday, August 20, 1922, after a short illness at the home of her brother-in-law and sister, Mr. and Mrs. J. C. Alexander, at the age of 78 years.

Miss Anderson was converted early in life and joined the Baptist church in which she lived a consistent christian life. Possessing the christian graces of patience, kindness and brotherly love, she has gone home to a better and fairer world.

Funeral services were held Monday morning at ten o'clock at the family residence in the north part of town, conducted by her pastor, the Rev. J. M. Garner, after which the body was laid to rest in Fairview Cemetery to await the resurrection morn. Sympathy and condolence is extended to the bereaved.

MRS. C. S. GILPIN, PASSES AWAY

Word has been received in Pecos of the death of Mrs. C. S. Gilpin the 18th inst. at the home of her parents at Hatch, New Mexico, where she was visiting. Mr. and Mrs. Gilpin and one son, Lionel, had been residents of Pecos for sometime, moving to El Paso about two months ago. Mrs. Gilpin had been in poor health for several months. She was a good woman and had many friends in Pecos who are grieved at her passing away. She was a member of the Methodist church and lived a conscientious christian life. She is survived by her husband, several children and other relatives, to all of whom the Enterprise joins with their many Pecos friends in extending sincere sympathy in this hour of bereavement.

Judge W. A. Hudson this week

slipped his household goods to Dallas and he and Mrs. Hudson expect to leave for that place tomorrow, where they will make their home. Judge Hudson is a well known lawyer, a close student and observer and a good man and his leaving Pecos will be regretted by our best people. Judge Hudson is no stranger in Dallas since he once lived there and yet has many friends in that city who will welcome him back as will our people regret to lose him. The Enterprise along with a host of Pecos and Reeves County friends while regretting to lose them as citizens of the county, will wish them much happiness and prosperity in their new home.

C. W. Waddington was over from Toyah

the early part of the week in search for casing for the Tatum well. Mr. Waddington says they have as fine prospects for a real oil well as any in the field and that they have plenty of free oil now showing on the slush. They are expecting to "hit pay" at almost any stroke of the bit, but must first cut off the water and be ready to receive it. He says that if things don't hurry up in some of the other wells they will yet bring in the first gusher.

W. W. Dean, Life Insurance in old line company. 2-51

The person who made the statement that "There is nothing new under the sun" was not well informed. We now have the statement coming from Paris, France, of women having their little toes amputated as a fad and fancy.

This operation is necessary in order that smaller shoes might be worn. Of course some fool American women will adopt this French toe amputating. There is no telling what we will adopt next. When it comes to cutting on the human body which God Almighty has made perfect in order that we might adopt some new styles, we are certainly showing ourselves to be no better than the ancient barbarians. All of our extremes in the way of dress fashions come from the degenerated race of people. It is strange that Americans, the most enlightened nation and people in the world should be led in fashion and customs by a people who are far beneath our standards in morals and education. We should set the fashions and customs for the world instead of having inferior races setting them for us. Let Americans be original, and quit aping the French and broken down aristocracy of Europe. The first American woman that amputates her little toe should be severely dealt with. If this French race of infidels want to whittle upon their bodies, let them do so, but we hope Christian America will refrain from this ugly heathen style of cutting off the toes. The body is the earthly temple of God and the man or woman that defiles and maims it will be held strictly accountable.—Lockney Beacon.

B. C. Lanier was over from Toyah Tuesday and Wednesday of this week on business. He had just returned from a business trip to California where he went in the interest of the Toyah Refinery and reports that he hopes to close a deal in the near future whereby the refinery will be put in at an early date and by men with plenty of capital to put it over in the best possible shape and put in all the machinery needed to do the very best that can be done with the oil taken from the shallow wells of the Toyah fields.

Chris Jensen of the Jensen Syndicate of Denver, Colorado, is in town this week. Mr. Jensen is an oil man and while he is here looking over some propositions which may mean a great deal to the field he says he has nothing to give out at present. Mr. Jensen is a fine looking gentleman and knows the game and is able to corral all the money needed to float anything he undertakes.

Mrs. M. E. Randolph and son, Will, and daughter, Mrs. Boatright, and grandson, Junior Boatright, returned this week from a two weeks outing, taking in the San Angelo and the Sonora country. Mrs. Boatright says that in places it is very dry while in other parts of the country visited the vegetation is green and the country looking fine.

George Ross, Walter Ruhlen and Wm. Kerr, graduates from the Pecos High School last Spring, will this year matriculate in the University of Texas Austin, and will leave soon for that place.

Mrs. C. J. Magee has returned from a very pleasant trip of a few weeks to California. She will probably leave next week for her school work in Chicago.

Little Helen McKellar who was operated on last Friday for appendicitis is getting along nicely which is good news to their many friends.

Jim Scanlan was over from Toyah looking after business matters yesterday.

For Accident and Health Insurance see W. W. Dean. 2-51

6,000 ACRE ANCELL RANCH LEASED FOR WILD CATTING PLAY

The following from the Wichita Falls Record-News will be of interest to Enterprise readers from the fact that one of the members of this firm is C. R. Troxel who operated for several years in the Pecos and Toyah oil fields. Mr. Troxel is a good hustler and if the signs do not show wrong it is evident that he is soon to come into his own and make a lot of money. The article referred to follows:
Leasing the 6,000-acre Ancell ranch, and forming the Brewer-Douglas syndicate which has made contracts for several tests which will test every part of the ranch, a group of Electra operators have recently concluded the largest wildcatting transaction in the Electra field for months.
With several of the tests under way and with others due to go down in the

near future the next few months should prove or disprove the correctness of their guess that the rich production of the Gladiolus pool will be found again on the next "high spots" to the south and west—lying just south of Beaver creek and on the Ancell ranch.

J. R. Brewer, one of the pioneer Electra operators and royalty owners; L. P. Douglas, Electra royalty owner; C. R. Troxel, veteran oil operator, compose the Electra group. As backers they have Reese S. Allen, one of the best known of the independent operators and two or three others.

FINANCIAL REVIEW

Prepared for The Enterprise By The First National Bank in St. Louis.

June oil exports totaled 236,553,274 gallons against 235,402,281 in the previous month and 204,506,813 in June 1921.

Exports of gasoline and naphtha in June totaled 53,835,115 gallons against 38,577,005 in previous June; value increased from \$9,304,800 to \$12,356,792.

Kerosene exports, amounting to 69,432,705 gallons, valued at \$6,380,701, increased 5,236,843 gallons over June last year but value decreased.

Gas and fuel oil shipments aggregated 53,178,155 gallons, valued at \$3,095,816 in 1921 month. Twelve months reduction was 12,737,556 gallons, larger than in any other petroleum product.

Lubricants exported in June totaled 25,893,005 gallons valued at \$6,235,776. 10,000,000 gallons less than in June, 1921.

Crude oil exports have increased, but average export price in the fiscal year just ended was \$1.814 a barrel against \$3.441 in year preceding.

CLASSIFIED

FOR SALE

FOR SALE—One blue enamel nickel plated four hole range. Used six months: cost \$125 new; will sell for \$70 cash. Apply at Enterprise office.

FOR SALE—At a bargain, forty acre irrigated farm, 32 acres in alfalfa, rest will be planted to alfalfa this fall. Good five room house. Tools and Team go in deal. \$2,000.00 cash down, balance three years. This farm carries a farm loan of \$2000.00 payable thirty-two years. Apply to Box 143, Saragosa, Texas. 51-4t

FOR SALE—Navajo saddle blankets of best grade in sizes up to 38x66 inches, in colors desired, sent C. O. D. postage paid at \$7.50 each. Money will be refunded if not satisfactory. New Mexico Rug Co., Box 2, Gallup, N. M. 32-22*

FOR SALE—Or will consider drilling contract; tracts forty seven and forty nine, section eighty-six, block thirty-three, of the H. & T. C. Survey Loving county, Texas. Located between the Toyah-Bell and Bell No. 1. The title is good and the rental is paid to January 1923. Write J. A. Law, 4284 South Harvard Blvd., Los Angeles, Calif. 49-1f

FOR RENT

FOR SALE OR TRADE—Lots 4, 5 and 6, block 49, West Park Addition. Only a late model Ford will be considered.—C. A. Martin, 1922 Lyles St., Waco Texas. 5-2t

FOR RENT—Either rooms or light housekeeping apartments, all nicely furnished, Michigan. Phone Mrs. H. S. Ross, 117. 27-1f

FOR RENT or SALE—Furnished or unfurnished houses. Real estate for sale or trade. Oil Leases near wells. What have you to offer? L. E. Smith. 48-1f

WANTED

Wanted—Ten thousand chickens. Will pay cash.—J. W. Moore, Pecos, Texas. 44-1f

MISCELLANEOUS

NOTICE TO TRESPASSERS—Notice is hereby given that no trespassing of any nature will be allowed on Section 247, H. & G. N. R. E. Survey, in Reeves county. Trespassers will be prosecuted to the fullest extent of the law.

H. H. Harrington, Owner 1-3t* John J. Bush, in Charge.

NOTICE—is hereby given that the partnership lately subsisting between Mark Shaffer and Joe Anderson, of Carlsbad, New Mexico and Pecos Texas, County of Reeves in the State of Texas, and County of Eddy in the State of New Mexico, under the firm name of Shaffer & Anderson and operating Lunch Counters and Cold Drink Stands at Carlsbad, New Mexico, and Pecos, Texas, was dissolved by mutual consent on the 23rd day of August, A. D. 1922.

PRIMARY DEPARTMENT OF S. S. ENTERTAINED

Mrs. Bettie Lee Muck, the efficient superintendent of the primary department of the Methodist Sunday School, assisted by her splendid corps of teachers, the Misses Fannie Quillian, Lucile Thurston, Virginia Runnels and Dorothy Sisk, and the secretary of the department, Mrs. Hoefs, entertained the children of the department Thursday afternoon at her home.

WEATHER CONDITIONS VERSUS RAILROAD TRANSPORTATION

Railroading has important weather problems to contend with, and its people must call on the Weather Bureau of the United States Department of Agriculture for continuous and reliable information as to conditions prevailing in various parts of the country in order to take adequate precautions to protect its passengers and freight from injury, damage, loss of time, or other inconveniences.

Temperature extremes affect all steel and iron work, such as rails or car wheels. Warnings of very cold or very hot weather indicate that arrangements must be made to keep them in good running order by replacements or repairs. Snow is regarded as the great enemy of rail transportation, and information furnished by the snow reports of the Weather Bureau helps to forewarn the railroads as to districts where windbreaks or snowsheds should be erected or snowplows made ready.

Ice storms and thunderstorms often put electrified lines out of order. High winds will sometimes derail trains. Snow and sand, impelled by strong winds, often pile upon the tracks and delay transportation. Heavy rainfall produces luxuriant vegetation, which is a great nuisance on earth-ballasted roads, while any excessive moisture shortens the life of ties and other woodwork.

Weather affects not only the railroad tracks and rolling stock but also the goods transported. This is especially true of perishable foods. In addition to pre-cooling and icing stations which are maintained, refrigerator and heater cars are used, and a close watch kept on Weather Bureau announcements in the districts where perishables must be moved.

BIRTHDAY PARTY

At the home of Mrs. Tony Middleton Saturday, August 19th, little Miss Irene Davis celebrated her third birthday anniversary. The afternoon was happily spent playing games.

Those present were: Mary Kathryn Couch, Jack Oglesby, Jeanette Roberts, Ila Mae O'Neil, Nell and Arnold Bowie, Billie McCarty, Lois and Davis Holdman, James and Barbara Stagner, and little Miss Maye Belle Holdman.

BIRTHDAY PARTY

On Thursday of this week James and Walter Garner celebrated their birthdays by entertaining a group of their little friends with a party. Sixty-three kiddies participated in the fun previously planned by those in charge. The Garner youngsters feel that they are in an entirely new class now that their store-house of presents will equal that of old Saint Nick himself.

WHAT REEVES COUNTY BOYS ARE DOING AT C. M. T. CAMP

Sergeant Stephen Ward Jr., of Camp B. C. M. T., Fort Bliss Texas, writes the Enterprise the following interesting letter:

"I have been asked to write you and tell you how the students of the C. M. T. Camp entering from Pecos are getting along.

"Seven had in applications from Pecos and all passed except one. The camp was opened on July 26, 1922. In our physical examination, only one was turned down from the Pecos bunch and that was Henry Sullivan, and we all miss him and regret that he is not with us.

"Out of the six left in camp we are not all split up among different branches of the service. Tom Anderson, a graduate from last years course at Camp Travis was made corporal of Squad No. 1. Anderson is having some real experience at handling his squad and getting them out for reveille and retreat. Anderson is also making one of the best records at the rifle range.

"Joe Holt is a private in his first year at the C. M. T. Camp and is showing up fine and says he will be back next year.

"Jester and Krauskopf are making themselves popular among the boys with their wild west stories, with which they entertain a crowd every night. They are both making a splendid record at the range.

"Heard Reynolds is one of the boys who is off to himself. He belongs to the artillery and is having some great sport shooting the 75 mill and on mounted, drill. Really he has great outcome and says the C. M. T. Camp is making a man out of him.

"I have written you what all the other boys are doing and will now tell you about myself. After about three or four days drill I was made Sergeant, which is the highest office a white course man can hold at any of these camps. It is a great life to come to one of these camps and I think that is why every boy should make these camps his hobby, and I recommend it to every boy in America. I will finish my course next year and am going to bring every young man I can with me."

HUMAN WEIGHT ON OTHER PLANETS

Which weighs more, a pound of iron or a pound of feathers? The old conundrum isn't so foolish, after all. Very much depends on the location of the iron and the feathers. According to calculations made at the United States Naval Observatory, the weight variations of the same body, taken from planet to planet and star to star, would be many and surprising.

A man who weighs 160 pounds on the good old earth would weigh 50 pounds on Mercury, 136 pounds on Venus, 63 pounds on Mars, 400 pounds on Jupiter, 171 pounds on Saturn, 158 pounds on Uranus, 139 pounds on Neptune and two pounds on Antares.

Here is a chance for the stout woman who finds reducing a rather slow process to forget her troubles by imagining herself on a planet or an asteroid. If she wishes to do it, there might even be a sudden exodus of the overfat to Antares. Relative—not Mr. Einstein's, but this observational variety—has its charms, after all.

YOUNG MAN! YOUNG WOMAN! MAKE YOUR OWN SUCCESS.

BE SOMETHING WORTH WHILE.

Let your own ability carry you to the top. But let us coach you in preparation, for we have proven we know how. Don't start the climb without our thorough training in modern business methods. You will save yourself time and money by getting a thorough practical business education in a school with prestige and influence. Our courses are the most thorough, complete and practical to be found, and are given in the shortest time. The training is worth months of effort—but why spend months in another school when you can get it in weeks here. With the best and most modern systems of business training known, their merit proven by the wonderful growth of our institution with the most capable teachers that can be had and complete, up-to-date equipment in all departments, we will prepare you in a short time and at a small cost to take a position, which we will secure, that will lead to your success.

We offer you the opportunity. Will you take advantage of it? Your time and money spent in securing the business education we will give you will be the best investment you can ever make. Think! Act! You'll never get ahead by following the crowd that hesitates. The old adage that "Success come to those who wait" is not true in these days. Success never comes—it is always going. It is up to you to catch it, and to do so you must prepare yourself. There always are plenty of positions for competent people.

Fill in and mail the coupon for large free catalogue and full information about our courses and what we can do for you. We also teach by correspondence.

CARD OF THANKS

We wish to thank our many friends for the kindness and floral offerings given in our sad hour of grief in the illness and death of our loved one, Rebecca A. Anderson. Also do we thank Rev. J. M. Garner who delivered the funeral sermon. MRS. J. C. ALEXANDER AND FAMILY.

READ THE WANT ADS TODAY

THE MOST FOOLISH THING OUR TOWN IS DOING

Our town needs cooperation that they may put in an adequate system of water-works. One that could soon be self-sustaining, and save the people enough on insurance rates, and taxes to build better schools, libraries, parks, pave all the street and otherwise build a model town.

Did anyone ever know of a town constructing a first class sewer-system and not having water-works? That is exactly the situation in Pecos.

Our town having shallow flowing water is supplied by private parties owning their own wells, and supplying three or four of their neighbors. These wells supply a little water most of the time usually failing just at the time to cause people to lose their gardens, grass and flowers.

They provide scarcely no fire protection, so insurance rates are very high.

After some very serious epidemics which were traced directly to infection resulting from the lack of a water-works system the city council bestirred themselves and called for an election to vote sewer bonds.

Yes, sewer bonds first. Why no one protested and why they voted sewer bonds first is a profound mystery. After the sewers were constructed the people were asked to vote the water-works bonds. This they did, when it was discovered that they had voted more bonds than was lawful on the taxable valuations. Only ten thousand dollars worth of bonds were approved. That was ten years ago. Compute the compound interest on forty-five thousand dollars. This is absolutely wasted. Has to be paid—also the principal. The amount is already staggering. Thirty more years yet to run. Count it if you can, if you can't get someone to count it for you.

Valuations now are simply sufficient to cover the issuance of water-works bonds, but the people have been so heavily taxed carrying this burden that they will not vote the bonds. So on we go trudging with the heavy load, a millstone about our necks. It grows heavier and heavier but there is no surcease.

With the approved bonds the city was enabled to supply the business district with water. Pumping water, paying for sewers and up keep, with no revenue therefrom costs heavily. With a thousand or two connections the system would be an asset, whereas it is only a liability. Oh when will the people see their folly.

A QUESTION ANSWERED.

We have talked with a good many merchants in the past and among them we have struck several who frankly stated that they started to advertise once, but it didn't pay as they figured it would, so they became discouraged and quit. Always they've asked the reason, and always it was hard to make them understand, to convince them exactly why their advertising failed. But now comes Herbert Casson, well known writer and publicity expert, with an article in an eastern magazine which seems to answer the question. He says:

"The man who runs an ad, no matter how convincing it is, and then stops at salesmanship in the store, isn't going to get his money's worth from the advertisement. Neither is the man who runs an ad, who makes a sudden loud noise and then drops into dead silence. That kind of man sends his advertising up like a skyrocket, it is seen for a moment and forgotten. The wise advertiser follows up the first ad with another, and then still more, and like a lighthouse his ad stands there to guide the public, and their light can be seen all the time. You have to tell some people a fact two or three times before they will believe it.

"After all, advertising is only sowing seed. After the soil and the sun and the rain have done their best, then comes the harvesting. You must reap and stack, and thresh, and bag and sell. And also you must remember that the other man will get the business if you don't ask for it." Exchange.

YOUNG CARIBOU BULLS MAY IMPROVE REINDEER HERDS

The possibility of improving the grade and weight of the reindeer in Alaskan herds by crossing them with caribou is being considered by the Biological Survey, United States Department of Agriculture. A reconnaissance has been made in Mount McKinley National Park to determine the best locality for capturing later in the season a supply of young caribou bulls to be used in the breeding experiments.

The average dressed weight of several thousand reindeer carcasses shipped from Alaska was about 150 pounds each. In certain parts of Alaska, including Mount McKinley National Park, there is a form of native caribou the bulls of which are reported to attain maximum dressed weights approximating 400 pounds, and it is claimed that some are even heavier.

Relationship is very close between our native caribou and the Alaskan reindeer, which are descended from stock imported from Siberia. It is believed, therefore, that crossing the two will result in greatly improving the grade of the reindeer, perhaps doubling their weight.

A STUPENDOUS PROJECT

The importance of the conference of the engineers held at Austin to consider the problem of reclamation and flood control could not be exaggerated. And the manner in which they have tackled the problem set before them means that at last there is to be a genuine effort to arouse the people of Texas to the overshadowing importance of this stupendous problem and to recognition of the great forward movement which would result in Texas from its solution along adequate lines.

The resolutions adopted by the engineers all tend toward the same goal—the laying the foundations of a movement which will ultimately mean the establishment in Texas of a reclamation and flood control system that will include all its principle streams that will prevent the recurring of devastating floods, reclaim millions of acres of overflow, swamp and over-wet lands, place millions of acres of arid lands under irrigation and thus add untold wealth to the State during generations to come.

The engineers indorse the reclamation and flood control meeting which will be held at Waco on August 16, under the auspices of the West Texas Chamber of Commerce and pledge their hearty cooperation. That was to have been expected. All the forces interested in this great proposal are getting together and all forward-looking citizens should get in line with the movement from the start. Every citizen who can do so, and who would see the greatest forward movement of this generation in Texas given a good start, should attend the Waco meeting—Fort Worth Star Telegram.

NOTICE The Board of Trustees of the Pecos Independent School District will meet for the purpose of awarding the depository for the following year on Friday, September 1, 1922. Sealed bids should be in the hands of the secretary of the school board by 5 p. m. of the above mentioned date.

Usual rights reserved. C. B. JORDAN, Secretary of Board 1-2t

For the satisfied feeling of a good job—well done—have your car overhauled by Green's Motor Service Co. Phone 247. 1-1f

EFFICIENCY The word efficiency is yet in its infancy. Only within the last few years has it been used to any extent. It was first applied when it was discovered that a particular workman could do a job, not only better than the average man, but could do it in less time with a greater degree of accuracy. Skill, speed and accuracy are responsible for the coining of this word efficiency, and they are made possible through the employment of the latest types of machinery. TWO WAYS OF DOING A THING THE NEW WAY THE OLD WAY REASONS FOR QUALITY PRINTING THE two Linotype machines in THE ENTERPRISE office are capable of handling any work that falls to them in the shortest possible time—with no exceptions. The new Model 14 is one of the best equipped machines in the State—this is fact. Without the machines we would have to employ four times as much labor, our floor space increased and additional rent; we could not give you new material with every job; our methods of production much slower, but everyone knows the difference between machine and hand work—it is a short story: Either the hand work costs you much more or the job is done in a haphazard way to meet the low price of the machine work. THE ENTERPRISE has the only machines in the county and the best skilled workmen on the market.

Punchettes

Perhaps the most important problem before the public today is the marriage problem.

THE MARRIAGE PROBLEM

There are more thunderings at the foundation of the home than ever before. The world seems determined to destroy the home. It is using the automobile, the motion picture house, the dance hall, the pool room, the summer resorts, the Sabbath picnic, games, and amusements, and every other conceivable method to scatter the family, detract from the sobriety of the home and wreck the domestic foundation.

Many a girl marries for a social ticket, including a theatre coupon.

When the day of scarcity of food comes and no amusement is furnished, she enters the divorce court, and there commits a crime against society and places a blot upon the name of womankind.

fails to support his family, and finally deserts his wife and children ought to be arrested, tried and convicted and whipped in the public square for six months.

No couple should be allowed to marry unless each party to the contract could produce a certificate showing a sound, clean body and a sane mind for three preceding generations, and a spotless moral character.

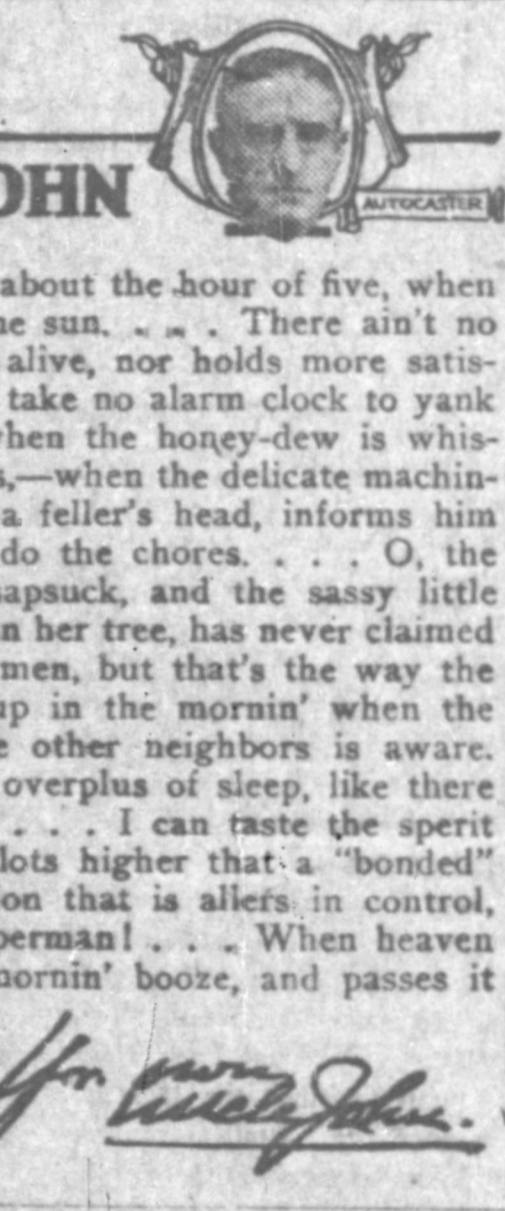

No couple should be allowed to marry unless they could also show that they understand and are willing to assume and discharge the obligations that matrimony and a well-ordered home imposes upon a couple.

Parents are to blame for much of the present-day matrimonial looseness. They are too anxious to marry their daughters.

Awake, parents, and help us solve this all-important problem and thus save society from its present rotting tendency.

poem
by UNCLE JOHN

I love the crispy mornin' air, about the hour of five, when the other birds is up to greet the sun. . . . There ain't no safer-by-law for to keep a man alive, nor holds more satisfaction, when it's done. It don't take no alarm clock to yank me out of bed, when the honey-dew is whisperin' out of doors,—when the delicate machinery that's inside a feller's head, informs him that it's time to do the chores. . . . O, the meddlerlark, an' sapsuck, and the sassy little wren—and the oriole, a-swingin' in her tree, has never claimed the credit of knowin' more than men, but that's the way the fact appears to be! So, I get up in the mornin' when the dawn begins to peep,—afore the other neighbors is aware. There ain't no insperation in an overplus of sleep, like there is in breathin' early mornin' air. . . . I can taste the spirit in it, that invigorates the soul, lots higher than a "bonded" liquor can. It produces exultation that is allers in control, yet, makes a common plug a superman! . . . When heaven uncorks her demijohn of early-mornin' booze, and passes it around afore it's light, a feller's conscience tells him it's the only sort to use, and his appetite confirms it that he's right!

HOMIEY PHILOSOPHY
for 1922
AUTOCASTER

REMEMBER those hoop skirts—how quaint and winsome the girls looked, and then the skirts so tight they had to trip instead of walk? How fascinating they were as they pit-a-patted along. Soon came those long and sweeping lines, that all concealed yet half revealed the grace and beauty of the pretty miss, and then of evenings those majestic trains and that bewitching Princess gown, displaying every curve and undulation of the form divine—all so wonderful. Now, oh boy! they're prettier still, and tomorrow they'll be longer and still prettier. Styles change, but the ability to make styles always the best ever is the thing that counts.

ON COUNTRY AMERICA'S DOLLARS

It is estimated Harold McCormick of Harvester Company, sliced fifteen million off fortune to wed opera singer.

FORMER MRS. MCCORMICK
Harold F. McCormick, until recently chairman of the Board of Directors of the International Harvester Company, is reported to have sacrificed fifteen million dollars of the fortune made off farm machinery to wed the woman of

GANNA WASKA MCCORMICK
wife, Mrs. Edith Rockefeller McCormick; prenuptial settlement upon his present bride and the cost of two divorces, his own, and also his bride's from Alexander Smith Cochran.

Special to The Enterprise
By **ROBERT FULLER**
Autocaster Service

Chicago, August 17.—When Harold F. McCormick, son of old Cyrus McCormick, the inventor of the wheat binder, was married to Mme. Ganna Waska the other day, there echoed the clank of some fifteen million American farm dollars.

Country America is not much interested in the doings of millionaires, but the name McCormick is different because it is known in every farm yard in the United States. The McCormick millions are made up of dollars paid in for farm machinery during the last half century.

What Man Will Do For Love

The marriage of Harold McCormick to the thrice married Polish opera singer, Ganna Waska is the story of a man of great wealth, swayed by love, who gave up one of America's greatest industrial positions, the presidency of the International Harvester Co., stripped himself of a large part of his huge fortune and unmade two marriages (his own and that of Mme. Waska), in order to wed the woman of his choice.

It is estimated that it cost him \$15,000,000. These figures include the settlement with his former wife; a settlement of \$5,000,000 on his new wife and the cost of the two divorces.

Harold McCormick's first wife was Edith Rockefeller, daughter of John D. Rockefeller, the world's richest man.

McCormick finally Gets a Divorce

The Rockefeller family is much opposed to divorces—still it was John D. Rockefeller, Jr., who finally went to Chicago

and after a brief and vigorous conference with his sister, persuaded her to start action for divorce, which was granted just three days before last New Year. An outside property settlement was then made which was reported to be almost half the McCormick fortune.

McCormick still holds his former father-in-law, John D. Sr., in high regard and only recently said he was sure the former Oil King sympathized with him.

Harold McCormick met Ganna Waska in 1920. She called him on the phone and asked him to help her realize the ambition of her life to score a success on the operatic stage.

"From that meeting began my acquaintance with the woman I determined to make my wife. I found that she was not only beautiful and talented, but possessed spiritual qualities such as I had never before recognized in any human being," McCormick is reported as having said.

Mme. Ganna Waska was first married to a Russian General who was killed in action. Next she married Dr. Franckel who died in 1920. Later she married Alexander Smith Cochran, millionaire bachelor, from whom she recently was divorced by a French Court.

Ambition to Make Her Greatest Singer

There is an old saying that the third generation of the rich are usually back in overalls.

Will this prove true with the McCormicks?

Harold McCormick has sliced the Harvester King's fortune in half to wed the woman of his choice.

And he now says: "the ambition of my life is to see her recognized as the greatest woman singer in the world."

That means he will spend the rest of the McCormick millions if necessary for her success or failure.

And there is the rub.

Edith Rockefeller McCormick, the spurned wife, from her high social throne can have a finger in the success or failure of her former husband's love bride when the latter is ready for her Grand Opera test.

But will she? Maybe it will not be necessary.

Maybe Harold McCormick, blinded and swayed by love, is following a will of the wispid idea—imagining qualities in a voice which do not exist.

What do you think?

Farmer Brown and his family had become motorized to the exclusion of all livestock except one decrepit old nag which stood in a ramshackled old shed for many months.

One day Doc Blakely asked "What use have you for that horse?"

"Oh we use him to haul hay for himself from that lower patch" was the reply.

Uncle Alee—"Gosh! You must have bought a lot. You were in that store three hours."

Uncle George—"Nope. That's one of them department stores and I was just looking around to find out where to buy a collar."

Try one of those 25c want ads and make some money. Others do it; why not you?

COTTON FARMERS ORGANIZE RAPIDLY

By L. F. McKay.

More than two and one-half million bales of cotton have been signed into state marketing associations by 150,000 farmers in the South within the last two years. These growers plan changes in the marketing system which they say will eliminate many of the evils in the present system of selling. Four of the states, Oklahoma, Texas, Arizona, Mississippi, last year marketed their cotton successfully under the new plan. This year eight states have formed themselves into the American Cotton Growers' Exchange and have employed a Sales-Manager. States in this gigantic cotton pool which almost equals the United States Steel Corporation in magnitude and which surpasses Standard Oil, are Oklahoma, Texas, Arizona, Arkansas, Georgia, and Alabama. Mississippi, Tennessee and Louisiana short staple growers are now planning selling associations. Mississippi long staple growers have not yet entered the Exchange.

What forces are behind this silent revolution in marketing which is sweeping the South? Who is it that is making it possible for the farmers to form co-operative marketing associations which will control and sell hundreds of million dollars worth of cotton this year?

Who is for it?

The Banker Is For It

The banker is for the co-operative marketing of cotton. It swells his deposits because the farmer gets more money for his cotton whether he is a member of the association or not. Orderly marketing keeps his money busy the year round. It makes it unnecessary to use selling pressure on the farmer in the fall. Orderly marketing means orderly financing and avoids peaks and dips in the credit situation. The operation of the co-operative removes the embarrassing obligation of the banker to be a sort of advisor on marketing, a necessity in the past that has caused frequent hard feeling between the banker and his client.

The banker no longer has to finance the operations of the stem-winder who talks the farmer out of his cotton for less than its worth, which is a bad thing for the community, therefore bad for the community bank.

Prevention of country damage means more money for the cotton and this means more money in the bank.

The Business Man is For It

The business man is for the co-operative marketing of cotton because the volume of his business will be constant. He will avoid the necessity of having a large number of clerks for part of the time who will not all be needed the rest of the year. This reduces his overhead and makes it possible for him to sell for less money.

He is for it because it means that the distribution of the cotton crop money will be more complete, that is, more of it will go down to his farmer customer instead of stopping with the cotton speculator. It means more cash business and less long time credits. It means fewer bad accounts which have to be absorbed in a higher price for what the merchant has to sell. For this reason, the business man can sell his goods for less. The business man is for it because it means greater buying power on the part of the farmer, which means greater prosperity for the community and more business.

The Exporter is For It

The exporter is for the co-operative marketing of cotton because the Associations assemble the cotton in large lots of even running grade and staple. It is no longer necessary for him to buy two thousand bales of cotton in order to get one thousand bales of a certain grade and staple. For this reason he can pay a better price for the cotton that he buys. The association also assembles his cotton at a convenient shipping point for the exporter. The Association sample room is a place where the exporter can actually see samples of large lots of cotton of even running grade and staple before buying.

The Spinner is For It

The spinner is for the co-operative marketing of cotton because he can obtain cotton as he needs it. Under the orderly marketing plan there are no violent fluctuations in price and the spinner is not forced to guess as to when to buy cotton to reach the lowest price, he knows that it is going to be very much the same throughout the season.

He is for it also because it means that there will be more money in the hands of the farmer and this means that the farmer will be able to buy more clothes, which means an increase in the demand for spinner's finished product.

The Farmer is For It

The farmer is for the co-operative marketing of cotton because it eliminates competition between farmers to get the maximum for cotton. It enables the farmer to get the advantage of better prices for cotton, that is, he gets the actual value of grade and staple. It is a notorious fact

Habitual Constipation Cured
in 14 to 21 Days

"LAX-FOS WITH PEPSIN" is a specially-prepared Symp Tonic-Laxative for Habitual Constipation. It relieves promptly but should be taken regularly for 14 to 21 days to induce regular action. It Stimulates and Regulates. Very Pleasant to Take. 60c per bottle.

that under the old system, little attention was given to grade or staple.

The farmer is for it because cotton marketing associations have become a factor in the market and have made it profitable to raise cotton. The farmer now has something to say about the price received for his cotton, something which he has never had before. The Associations are taking the gamble out of the cotton business and are gradually approaching a position where they can get the true demand for cotton, that is, the true value based upon the law of supply and demand—at the point of consumption.

The farmer is for it because he will have a steady income the year round, in addition to getting more money for his crop, which means he has had to do without under the old system. He is getting to the point where he is not forced to pay high interest rates. Soon he will be master of his own business. He is for it because he sees a chance to actually control the price of cotton since nearly two hundred thousand farmers have signed up more than two and one-half million bales in marketing associations in the South.

Farm Women and Children For It.

Farm women and children are for the co-operative marketing of cotton because it means their emancipation from cotton field slavery. Of the two and one-half million women and children who work in the fields on farms in the United States, two million of them toil under the hot sun of the cotton states. This alone is the worst indictment which can be brought against the marketing system under which our cotton has been sold.

Women and children are for it because it means better homes, attractive furniture, decent clothes, flowers, magazines. It means conveniences in the kitchen, running water, sinks; it means the bath tub; it means labor-saving devices; a car to ride in and the opportunity to visit with their neighbors and enjoy social activities in the community. It means better churches, Sunday schools and preaching every Sunday consequently a better community. It means church services the year round instead of just part of the time. It means contact with men of God, who are really able to lift a community, because when the country is prosperous, farmers can afford a better preacher.

It means better schools and longer school terms. The terrible curse of ignorance which has blighted the South will be removed. Better school houses will be built; better teachers will be employed; and the handicap in education which the country child suffers will be overcome. It not only opens the High schools to the country boy and girl, but makes it possible for a university training if desired.

The Whole South Wants It.

The whole South is for the co-operative marketing of cotton because it means that we will quit living fifty years behind the times. It means that we will raise our standards of living to where they will be on par with those enjoyed by farmers in California. Southern farmers

are entitled to just as good homes, just as good social, religious and educational advantages as enjoyed by any other farmer in the world. We are going after these things. We are getting them for ourselves. The co-operative movement of the South is one of the evidences that the farmer is awake to his opportunities. He intends to make his life just as pleasant and just as happy as that of anybody else.

The whole South is for it because it means peace, plenty and freedom for its people. It means the building of a great civilization. We have joined together and are going forward toward prosperity. This is the greatest movement that ever struck the United States. It is here to stay.

RAPID RECONCILIATION

From the Washington Star.

"You won out in the primaries, anyhow," "Yes," replied Senator Sorghum. "But what I'm in doubt about is whether there's time enough before the regular election to square myself with the people that I defeated in my party."

If you want to sell your chickens and eggs for cash see L. W. Moore, Pec's Texas. 44-47.

IT PAYS TO ADVERTISE

In The Pecos Enterprise. Rates 40 cents an inch or 10 cents a line for readers.

\$2.50 PER YEAR.

PERSONAL

Mrs. Donald Bell left last week for a visit to home folk in St. Louis, Mo.

Mrs. Jack Hubbs and children returned home last week from a visit to relatives in Kansas City.

Misses Maggie and Carrie Glover have returned from a very pleasant two weeks trip to California.

Mr. and Mrs. Floyd Brownlee and children returned home last week from a visit to relatives at Las Cruces, N. M.

Dr. and Mrs. H. N. Lusk reached home Sunday from a two weeks visit to relatives in East Texas and Oklahoma City.

Miss Hazel Berry has returned from a delightful visit of a month spent in Ashville, N. C., visiting relatives. She will teach again this year in the schools in El Paso.

Luther Murray, cowpuncher on the X ranch, was a Pecos visitor this week. Luther has many friends all over West Texas who will be glad to know that he is looking as handsome as ever.

Mrs. Roy Knowles and baby of Sulphur Springs, Hopkins county, came in Friday of last week for a visit to the families of J. G. Murray and Archie Ross. They are old friends of the Murrays and will remain here about a month.

Miss Annie Belle Watson has returned home from a pleasant two weeks visit to relatives and friends at Abilene and is back at her place as one of the efficient and accommodating operators at the Central telephone office.

Mrs. I. J. Sims and children returned last week from Mineral Wells where they spent the summer. Monday she and her two daughters, Misses Zara and Beatrice went to El Paso where they will spend the winter. Her sons, Cliff and Harold will join them in a few days.

Miss Truman Stephens who has been the guest for the past few weeks at the home of Rev. and Mrs. L. L. Thurston left Saturday for her home at Tucumcari, N. M. She was accompanied home by Miss Glady's Thurston who will be her guest for a few days before the opening of the schools at Tucumcari, where Miss Thurston will teach this year.

A. B. Burchard of Toyah, was a business visitor in Pecos Monday and says that it is getting mighty dry in his pastures. They have had some rain, just enough to green up the grass once or twice, but not enough to make grass grow. Without more rain and that at an early date, says Mr. Burchard, it looks mighty bad for the stockmen in this part of the county.

Mrs. I. Hershenson, of Chicago, who has been in Pecos for a week or ten days looking over her holdings to the south of Pecos where she is drilling for oil, left Tuesday for El Paso and points in California where they will spend the next two months touring. They went through the country. The party consisted of Mrs. Hershenson, two sons, Maurice and Eddie, and two daughters, Mrs. Robt. R. Landrum and Miss Annabelle. They will return to Pecos from California.

Mrs. Chas. W. Watts came in this week for a visit to Pecos friends from her home in El Paso. Mrs. Watts was formerly Miss Florence Deck and was chief operator at the Western Union Telegraph Company office. Mrs. Watts was liked by all who came in contact with her here and was deserving of the friendship she received in return for her very courteous attention to every matter with which she had anything to do. Obliging and courteous to all alike and always ready and willing to accommodate—is it any wonder that few people have lived in Pecos for so short a time and who made more warm friends?

Harry Hinkle is home from the eastern markets where he purchased the fall and winter stocks for the dry goods and furnishings department of the Pecos Mercantile Company. Mr. Hinkle says he expects a very good trade this fall and winter and has prepared for it with a bountiful supply of the very best and most attractive goods to be found in the markets. He says it was hot in the east and that everything appeared to be going as if money matters were not so bad after all. There seems to be a general feeling that a heavy buying will take place all over the country this fall and winter and the purchases are heavy.

J. G. Love and daughter, Miss Aileen, have returned from a two weeks' visit to Santa Fe, N. M., where they enjoyed the high altitude and cool weather. Jack says that Santa Fe is a curious sort of town, with narrow streets which end abruptly against some building, and that many of the buildings are of adobe. He also states that the town is full of health seekers all the time and people of wealth who go there to get away from the oppressive heat of other lower altitudes. Money is apparently plentiful in that city due to the fact that the traveling public spend lots of money there. Mr. Love also states that that country is in a very bad way as regards the stock business. The scarcity of rains in that section has put the stock business on the bum as well as it has in this country, and much of that part of New Mexico is really in a worse condition in this matter than are the stockmen of this section.

D. Wood Bozeman, Jr., spent last week in Balmorhea, principally in the swimming hole there.

Mrs. Louise Buckles left Tuesday of last week for a visit with her aunt, Mrs. Tom Brigrance, in Fort Worth.

Miss Leona Delany of Balmorhea, spent last week in Pecos the guest of her friend, Miss Virginia Bozeman.

Mrs. T. F. Slack and daughter of Mesa, Arizona, are in the city guests of Mr. T. F. Slack who has offices and a law practice in Pecos.

Miss Hattie Durdin has resumed her duties in the office of County Clerk S. C. Vaughn after a two weeks' vacation which she spent in resting.

C. M. Alexander of Dublin was here the early part of the week on a visit to relatives. He is a nephew of the late Miss Anderson and was present at her funeral Monday.

Mrs. J. W. Goode, who has been in the valley for the past two or three weeks, left on Tuesday of last week for her home in Fort Worth, accompanied by Miss Hettie Lois Randals who will visit here for a week or so.

Mr. and Mrs. Ralph Jones of Big Spring are the guests of Mr. and Mrs. A. E. Wilcox this week. They have been the guests for the past few weeks of Mr. and Mrs. Roger White. Mrs. Jones is a sister of Mrs. White.

C. H. Hamilton, the shoe repair man, went to Spurr Saturday and returned Tuesday with his family who had been visiting in that city. The trip was made in a car. Mr. Hamilton says the crops in that part of the country need rain badly.

The City Pharmacy, for years located on Second street, will move to the Zimmer building, on the corner of the square, as soon as that place can be put into shape. Work is now in progress there, and it is thought the transfer of the stock of goods to the new location will be accomplished by Sept. 1.

Mr. and Mrs. S. A. Fouche and two children have moved to Tohoka, where the former has accepted a position with a drug firm of that place. Mr. Fouche was formerly employed at the City Pharmacy. The Fouche family has lived in Pecos for probably a year and have many friends who will regret losing them as citizens.

J. E. Eisenwine, one of our County Commissioners, was in town Wednesday enroute for an inspection of some road work being done on the Panama road, about 12 miles southeast of Pecos. The gang doing the highway work consists of about 8 men, four teams, and a grader, and their work is in filling, grading and draining. They are making satisfactory progress.

The visit of Willis Wright to Pecos the early part of this week was a pleasure to our people since he brought good news regarding the oil development in this section of the country. Mr. Wright has been in Indiana for the past year working up his company and believes he has one of the strongest companies which could be organized anywhere, both from a standpoint of real men who do things and in a financial way. Mr. Wright is very enthusiastic over his work and the prospects of getting results when the bits have been put down to the proper depths. Mr. Wright was here during the boom days and then secured acreage on what he is lead to believe is the very best structure in this or any other country. He was on his way to his home in Los Angeles.

E. L. Stratton, oil operator, left Tuesday of this week for the Montana oil fields where he hopes to make a stake while the boom is on in that section of the country. Mr. Stratton is one of the best hustlers who ever hit Pecos and has as much or more stick-to-itiveness than many others who have been here. He will maintain his office here and as soon as the first well hits "pay" will be back on the spot as soon as he can get here. He says he will go there and try to make a stake while there is practically nothing for him to do in this field and while the money market here is so dull. Stratton is too much of a booster and too good a business man to be left out in the cold and will some day be in the making of a real oil field and get his part of the gold resulting therefrom, and that will be a good and plenty.

THE CHURCHES

BAPTIST CHURCH NOTES

Interest and attendance is growing in all departments of our work. This is especially gratifying to the pastor. There were fifty-three in the mid-week prayer service Wednesday night. Good interest in the prayer service means growth elsewhere. May others become interested and join us in the devotional hour.

We will have all regular services Sunday. Remember outdoor meetings at night. The public is invited to all of our services.

J. M. GARNER, Pastor.

THE METHODIST CHURCH

After a week in a revival at Odessa the pastor is back at home. He received royal entertainment down there and all that but still feels that "there is no place like home."

There is a rally spirit on for Sunday School next Sunday morning. The goal is beyond the 200 mark and every one is called to step in line and make it a great occasion.

The League have a special program for the 7:45 hour and extend a hearty welcome to all comers.

On Sunday morning at eleven o'clock the title of the sermon is "Go or Die," a great theme on Christian conquest.

The evening preaching service will be held on the well lighted play ground back of the church which will be seated, etc. for that purpose.

All are cordially invited to attend all the services.

L. L. THURSTON, Pastor.

THE FIRST PRESBYTERIAN CHURCH

Here is an appeal which you must not overlook. If you have not been going to church regularly, now is the time to begin. Don't wait till "some more convenient time." It will never come. Begin right now. Get the church-going habit.

The subject for the morning service is: "The Care of Souls." For the evening service the pastor will speak on the subject, "A Monopoly in Evangelism." A special invitation is extended to all those who are not regular attendants upon Divine service. Come and worship with us. We will make you feel at home.

If you like good music, you must not fail to be present at these services. We arranged for some special music which you will enjoy. Leave all your troubles at home, and come to these services prepared to receive a spiritual blessing, and you shall not be disappointed. Always remember the story of the three "bees." Be on time. Be pleasant. Be cheerful.

JUNIOR MISSIONARY SOCIETY

Junior Missionary society held its social meeting at the home of the superintendent Mrs. Ben Randals on last Friday afternoon from four to six o'clock. The following officers were elected at this time: president, Helen Thurston; vice-president, Ruby Stephen; treasurer, Virginia Kessler; secretary, Mildred Ruhlen. After this an interesting story entitled "Gifts For the Master" was very interestingly told by Mildred Ruhlen.

We divided our membership into two parts and chose Helen Thurston and Elizabeth Ruhlen as captains of the divisions. They are to see that their members attend regularly, pay dues, take part in the meetings cheerfully. At the end of two months the winning side is to be entertained by those defeated.

We were then served with ice cream and cake. We played games about an hour. After thanking our hostess, Mrs. Randals for a pleasant afternoon we adjourned.

We will begin our Mission Study Book on next Sunday afternoon.

MILDRED RUHLEN, Corresponding Secretary.

Mr. and Mrs. Evy Boles and son were in from the ranch Thursday and Evy reports fine rain all the way from his place to Marfa, but "nary a drop on his land." Evy says he will be out as soon as he returns home looking for grass onto which to move his cattle.

Judge Charles Gibbs came in this morning and is talking to the voters for the last round before the election which will settle the matter of who is to be our next district judge tomorrow.

Mrs. Tom Harrison and children have moved back to their home from the Pecos Hotel where they spent the summer.

We give National Certificates. Ask for them. Pecos Mercantile Co. 52-5f

(Advertisement)

TO MEMBERS OF THE SEWING CIRCLE.

Do you wear corsets? If so, you are one of the women that the Fordney-McCumber Republican tariff bill will compel to pay \$58,000,000 in taxes a year. The proposed duty under the Fordney-McCumber bill is 64 per cent or 3.7 times the wage cost. The present duty is 30 per cent on plain cotton corsets or nearly twice the present wage cost of 17.3 per cent. The fair Tariff League to whom you are indebted for the statistics herein estimates that the proposed duty would be a possible tax of \$29,000,000 for the manufacturers, and cost women at retail price twice this, or \$58,000,000. This tax is for manufacturers, not for revenue. In 1919 the government collected only \$10,000 on corsets; only \$4,000 in 1920, and in 1921 only \$10,000.

The Fair Tariff League, which has made a special study of this bill, says that the proposed duty will shut out imports and compel women to buy from domestic manufacturers at any prices they dare charge. A domestic manufacturer who is prosperous says "It's an outrage." However, some corset factories are hard up, but so are some women.

We make corsets cheaper and better than anywhere in the world. In 1920 the exports on corsets were 380 times the imports.

The 64 per cent tax on these corsets is shown to be wholly unjust by the fact that wages in the corset industry are only 17.3 per cent.

The Fair Tariff League says that this corset tax is because women have not known and have not voted.

IT PAYS TO ADVERTISE

To Cure a Cold in One Day Take LAXATIVE BROMO QUININE (Tablets). It stops the Cough and Headache and works off the Cold. E. W. GROVE'S signature on each box. 30c.

BROCAT'S BARBER SHOP

For Anything In the BARBER LINE By First-Class Workmen HOT AND COLD BATHS JOHN BROCAT, Proprietor.

You get a whole year's reading of the Pecos oil field through the Enterprise for \$2. Send it to a friend.

To Stop a Cough Quick take HAYES' HEALING HONEY, a cough medicine which stops the cough by healing the inflamed and irritated tissues. A box of GROVE'S O-PEN-TRATE SALVE for Chest Colds, Head Colds and Croup is enclosed with every bottle of HAYES' HEALING HONEY. The salve should be rubbed on the chest and throat of children suffering from a Cold or Croup. The healing effect of Hayes' Healing Honey inside the throat combined with the healing effect of Grove's O-Pen-Trade Salve through the pores of the skin soon stops a cough. Both remedies are packed in one carton and the cost of the combined treatment is 35c. Just ask your druggist for HAYES' HEALING HONEY.
