BIG ARMY BALLOON PASSES OVER PECOS THURSDAY MORNING

The United States Army dirigible C-2 passed over Pecos Thursday morning at 6 o'clock and was watched by many of our citizens whose attention was attracted by the noise coming from it. It was flying low and the lettering could be seen plainly by our people. It was not expected to pass over Pecos therefore our people were not expecting it nor were they looking for it and its appearance was an agreeable surprise.

The El Paso Herald gives the following account of this wonderful ship and its landing at Fort Bliss a few hours after leaving Pecos:

United States Army dirigible C-2 landed at Fort Bliss at 9:59 o'clock Thursday morning after making a 613 mile non-stop flight from San Antonio in ten hours and 30 minutes.

When the giant ship ascended at 12:30 o'clock in San Antonio, it was reckoned that it might be forced to stop at Marfa to replenish its supply of hydrogen, but it did not. With its gas supply nearing depletion and a heavy rain adding to its difficulties, the run was considered a severe test.

For over an hour the gas bag hovered over the landing field, with its propellers turning just enough to counteract the wind, while ropes were dropped by its crew to men from the 12th observation squadron.

The dirigible is one of the largest in the army and is making a trans-continental flight to map out air routes and to collect other aerial data.

The official flying time, according to Maj. H. A. Strauss, who commands the crew of seven men, was ten hours and 30 minutes. A strong wind aided them in making an average speed of 60 miles an hour.

The dirigible will "hop off" for the next leg of its trip Friday morning, it is planned. A leaking radiator and a clogged gasoline feed pipe will be repaired in the meantime. The next stopping place is Nogales, Ariz.

No rain was encountered until the ship reached Davis Mountains, about 200 miles from El Paso. Here a heavy rain made it difficult for the gas bag to ascend sufficiently to clear the ridge.

Motor troubles were repaired while they were in the air. Marine glue patched the radiator and an extra feed pipe replaced the leaking one.

Lt. Alexander Pearson, of the 12th observation squadron, winner of the trans-continental race, who recently crashed to the ground at Fort Bliss when his propeller became defective, piloted a scout plane in meeting the C-2 about 50 miles down the valley.

The ship at that time had lowered its elevation to about 300 feet and was rolling and pitching in the irregular air currents like a large boat on ocean waves.

One hundred men in command of Lt. P. Hill aided in brining the ship to the ground at Camp Biene. With its propellers turning sufficiently to keep it from being blown off the field, the lifting force of the gas bag was lessened by releasing hydrogen through valves and the ship slowly descended.

Lines were dropped from crew's quarters and with these, the men from the local aviation squadron lowered the ship. It was then pulled into the newly constructed hangar.

ROSS OPTIMISTIC OVER THE FUTURE

C. H. Ross returned this week from Floyd county where he attended the funeral of his brother-in-law, Walter Long. Charles says he has had the finest grass he has had in full twenty years and believes the time is not far distant when the stockman will again come into his own.

While there is plenty of money to be had at a low rate of interest in the east, he says, it will take gilt edge security to get it but that it is coming this way and in a few weeks buyers will be in the market for West Texas cattle and will not care this time with a limit on the price but there will be competitive bid-on stock and the price will again be where the stockman can afford to raise them. Feeders on the small stock farm in the East have made money and will restock in order to feed their splendid crops this year, says Mr. Ross, and that will turn some money loose in this country.

Charles Ross really knocked some of the "blues" out of the Enterprise editor who can see nothing short of an oil well that will bring this part of the country back to "normalcy" within the next four or five years.

PERSONS WENT NUDE TO SAVE MAN FROM HELL

Paris, Texas, September 17.—Five members of a religious sect, who were placed in jail here Thursday, stated Friday that their reason for going without food and clothing during the time they were in the supposed trance was to keep the husband of one of their number out of hell. The man, for whom these sacrifices were being made, was not visibly impressed with the method and told the officers that he objected very strongly to his wife going nude. All five of the party, two men and three women, were nude when arrested. They were in an abandoned house out in the country, and had been there for several days when arrested. They are still in jail, where they are made to wear clothes.

WALTER LONG PASSES AWAY

Mrs. W. L. Ross and C. H. Ross were in Floydada and Lockney last week in attendance upon the funeral of Mr. Ross' brother-in-law, W. D. Long, returning this week. Of this venerable old gentleman and West Texas' Lockney Beacon says in part:

Monday morning Walter Long, one of Floyd county's most prominent citizens and ranchmen, was found dead in his bed at his ranch home east of Lockney some eighteen miles. After the coroner viewed the body the verdict was that death was the result of natural causes, possibly that of heart failure.

Mr. Long had been in failing health for some months, and recently had suffered a great deal.

Sunday he was sick the most of the day, being up and down a great deal of the time. He retired early Sunday night, and was thought to be resting well, until found the next morning as above stated. Three of the ranch hands were at the house with him. Mrs. Long was at her home in Floydada.

After the inquest the body was removed to Floydada and prepared for burial by Undertaker Frank C. Harmon. Funeral took place Wednesday afternoon at 2:30 at the Baptist church of Lockney, services being conducted by Rev. R. E. L. Muncy, interment following in Lockney cemetery. In accordance with the request of the deceased his funeral and burial were conducted by the old time cowmen and cowboys of this section of the Plains. There were gathered together for this occasion ranchmen from several counties, his old acquaintances and friends whom he had known and worked with in the pioneer days of the country.

The active pall bearers were eight prominent cattlemen and personal friends of Mr. Long. They were J. B. Russell, Jim Taylor, Warren Merrell, Will Merrell, Frank Hawkins, Henry Hughes, J. B. Jenkins and O. W. Stroup.

Walter Douglas Long was born in Dangierfield, Texas, August 21st, 1862, died September 11th, 1922, aged 60 years, and 20 days. He came to the Plains and settled in the eastern part of Floyd county in 1891, establishing the Long Ranch, which is known throughout West Texas. He was married to Miss Kittie Ross, who survives him. There came to bless this union four daughters, Misses Kittie, Alma Mabel and Walter Ross, all of whom survive him.

Besides the immediate family, Mr. Long leaves three sisters, Mrs. H. L. Moon of Hale Center, Mrs. R. I. Moon of Olden and Mrs. Fannie Harrison of Greenville, Texas.

In the death of Walter Long Floyd county has lost one of its most useful and highly respected citizens. He had been prominently identified with the development of this section for years, had numerous interests in Lockney and Floydada besides his ranch interest in the eastern part of the county. He was a lovable character, a sunny disposition, had a smile and a good word for every one. He was known as a friend to the man in need, and numerous people had been indebted to him first and last for personal or business favors. When anything of importance was undertaken in Lockney or Floyd counties, Walter Long was first solicited. He always took the lead. When his name was connected with any enterprise, it usually made good. He helped organize the Lockney State Bank at Lockney, and was active in this bank for a number of years. He later sold his interest here and moved to Floydada where he became interested in the State Bank at that place. He was a member of the Baptist Church and the Masonic fraternity. Walter Long was a good man and a friend indeed, a loving, devoted husband and an affectionate father. The esteem in which he was held was attested by the large concourse of people attending his funeral. There were forty cars that came up from Floydada with the body. Lockney's business houses were closed, and our entire citizenship attended the funeral services and paid their re-

SAVED LIFE OF Mrs. HARDING

Brig. Gen. C. E. Sawyer, personal physician to President and Mrs. Harding, and Dr. Charles Mayo, prominent Surgeon of Minnesota, photographed as they left the White House after ministering to Mrs. Harding during her serious illness.

MARRIAGE

Miss Gladys Holloway of Toyah and William G. Post of El Paso were married September 11th at the home of the bride's parents, Mr. and Mrs. A. H. Lewis in Toyah where the family now resides, having moved there from Pecos a few weeks ago. Rev. Thurston, pastor of the Methodist church in Pecos and very much beloved by the Holloway family was called over to Toyah to perform the ceremony. Mr. and Mrs. Post left the following day for El Paso where they will make their home. The Enterprise wishes for this happy young couple their due portion of success and happiness in life.

WOLF WILLIAMS

Eugene Wolf and Mrs. Thelma Grogan Williams were wed Wednesday, Sept. 20th at the Methodist parsonage. Rev. L. L. Thurston performed the ceremony. Mrs. Wolf is a daughter of Mr. and Mrs. J. F. Grogan and was reared in Pecos. Mr. Wolf is associated with Oram Green in the garage business and is said to be a splendid mechanic. They will reside in Pecos; have house keeping rooms at the home of Mr. and Mrs. Joe Anderson. The Enterprise extends congratulations and wishes for them prosperity and happiness.

Terry Downes of Toyah spent a day or so in the city this week shaking hands with friends and waiting for repairs on his car. Terry is one of Toyah's best citizens.

spects to one of God's noblemen.

The Beacon could not say more than to say that the world has been made better for the life of Walter Long. He lived his life here in Floyd County for the past thirty-one years to aid and bless mankind, and to make life one grand, sweet song. His was a happy disposition, and he made others happy. He was loyal to his friends, generous to a fault, upright in his business and private dealing, and inspired confidence in all with whom he came in contact.

To his bereaved wife and daughters the Beacon would cheer and comfort them with the thought that their loved one as gone on before to await their coming. While a chair is vacant, a still voice is heard, yet his life lived before them and others has been such as to leave with them comforting memories. May their lives be so lived that when they, too, come to the place that marks Time from Eternity, they, too, may be ready to lay down life's burdens, and pass over the River and join their husband and father in the home of the soul.

THE DEMOCRATS AT SAN ANTONIO IN FAVOR OF PARK

San Antonio, Sept. 11.—The Davis Mountain Park project was approved by the State democratic convention just held in San Antonio and will be submitted to the next session of the State legislature as a part of the platform of the Democratic party in Texas.

The resolution as prepared by D. E. Colp, manager of the western department of the Old Spanish Trail and introduced by Hon. Joe Jackson of Alpine, Representative R. M. Quaid of El Paso, and Senator T. W. Davidson democratic nominee for lieutenant governor, was presented to the sub-committee on resolutions where it was first passed before going to the general committee and then to the floor of the convention where it was finally passed and included in the platform of the party.

This marks another distinct step in the plans for a State and National Park for Texas stated two years ago by Representative W. W. Stewart of Balmorhea, who was successful in having a park committee appointed at the last session of the Legislature which spent some time in the proposed park site, traveling extensively on horseback inspecting this beautiful 250,000 acre tract for a State park site. The resolution as adopted by the Democratic convention in San Antonio Wednesday follows:

"Resolved by the Democratic Convention of the State of Texas: That we commend to our Senators and Representatives in the National Park in the Davis mountains and call attention to the splendid natural advantages and climatic conditions. Its mountains are higher than any peaks east of the Rockies or those found in the Alleghany System. Its climate is in every way the peer of that of Colorado.

"We earnestly urge that our Legislature and our National Congress take appropriate steps to organize and create a National park in this district. There is no great State or National park in this portion of the United States. Nature has so endowed at once a great health and recreation center in this particular locality that it will become so soon as it is dedicated to the public.

GETTING BOOSTING FOR DAVIS MOUNTAIN PARK

D. E. Colp, manager of the western department of the Old Spanish Trail, writing to W. W. Stewart, chairman of the West Texas State Park committee, relative to the Davis mountain park says:

"We have succeeded in getting the Texas highway commission to place our proposed park in the Davis mountains on a big map showing the road system of the State, with a statement down in the corner of the map of the probabilities of these mountains being designated as a national park. This will be exhibited at the Waco Cotton Palace and will give to us an immense amount of publicity that will be favorable to the park scheme.

"The association expects to have photographs made of the map exhibit and I expect to mail them out to all O. S. T. members in Texas.

"From all indications, we have this proposition moving along to our entire satisfaction, but we don't know what opposition the people may have locally. We hope none to amount to anything."

FORD PLANTS REOPEN; WILL EMPLOY 100,000

Detroit, Mich., Sept. 21.—The plants of the Ford Motor Company in the Detroit district, which closed last Saturday because of the coal situation, thereby throwing 100,000 Ford workers out of work in different parts of the country, will open Friday morning, it was officially announced today.

Orders for reopening were telegraphed by Edele B. Ford, president of the company, who is in Cincinnati. Mr. Ford said cancellation of the interstate commerce commission's service order No. 23 had made it possible to again obtain coal.

Mr. and Mrs. H. B. Cogdell of Graham, are the happy parents of a son christened H. B., Jr., which arrived at their home on the 4th of September, and now Rev. and Mrs. C. S. McCarver are again grandparents and would like to make another trip out in that section to visit the youngster. The Enterprise extends congratulations.

Mrs. O. E. Pace is acting as librarian at the Carnegie Library during the absence of Mrs. Rose, who is visiting in points further east.

Marion Slack and family have moved into the T. B. Prutt rent house recently vacated by I. T. Kestler and family.

HOPE, N. M., CASHIER ABSCONDS WITH \$100,000 OF FUNDS

Artesia, N. M., Sept. 20.—S. S. Ward, president of the First National Bank of Hope, N. M., returned to his home here today after investigating the affairs of the bank at Hope, which closed last Thursday following the disappearance of Hugh M. Gage, cashier, said more than \$100,000 or practically all of the bank's cash and securities are missing.

He said only \$108 has been found in the bank.

Mr. Ward said others besides the cashier might be involved in the case. Federal bank examiners are still there.

Officials have been unable to find any trace of Gage. A report that he may have left in an airplane that was seen over Hope on Wednesday is being investigated.

BOND ISSUES INDICATE PROSPERITY

(Special to the Enterprise-Times)
New York, Sept. 21.—That the country has so far returned to a prosperous condition that public bond issues proposed and sold in August, 1922, by far exceeded those proposed, voted and sold in August, 1921 is shown in statistics just compiled from reports to The Asphalt Association, this city. The reports also show conclusively that the construction of public roads, instead of having reached its peak is becoming more extensive in all sections of the country.

Bond issues for road construction reported sold in August, 1922, amounted to \$16,631,351, compared with \$15,563,413 for August, last year. Bond issues reported as proposed totalled \$59,372,973 compared to the \$56,590,700 reported in August, 1921. Proposed bond issues for August, 1922 increased \$48,159,973 over the \$12,882,000 reported in June. The reports are from states, counties, parishes, townships and road districts throughout the country and are plainly indicative of the steady growth of the good roads movement.

The Asphalt Association established its department of economics on August 1, 1921. Its reports show that from that date to August 1 this year a total of \$748,565,000 was reported in road bond issues proposed. Of this amount the sum of \$541,724,280 was actually voted and \$368,966,593 worth of road bonds were sold to finance construction. New Jersey led all the states with \$91,455,000 in bonds proposed, Georgia being second at \$77,040,000 and South Carolina third at \$72,850,000. Pennsylvania, with \$69,039,000, was fourth and Kentucky with \$52,450,000 ranked fifth.

The reports on road bond elections put Missouri first with \$77,782,000 voted. Texas, with \$57,534,500, was second and North Carolina, with \$44,308,365, was third. Next in order came Pennsylvania with \$33,964,387 and Alabama with \$38,320,250.

Reports on the sale of bonds showed North Carolina with \$50,472,850 led all states in the disposal of road bonds while Texas was second with \$30,023,000. Three states almost tied for third place Michigan selling \$19,966,125 worth of bonds Oregon \$19,917,190 worth and West Virginia \$19,741,000.

TEXAS BAPTIST IN MIDST OF GREAT CATCH-UP CAMPAIGN

Texas Baptists are in the midst of a great Catch-Up Campaign in which they hope to realize \$1,500,000 in cash for their schools, colleges, hospitals and missionary work in Texas this fall.

In order to facilitate this by giving full information to the people they are planning an All-State Motor Tour, which will begin Monday, September 25th and close Sunday, October 1st. During this week outside speakers will visit each of over 2,400 churches, speaking often three times daily.

This week of speaking will introduce the campaign for the cash collection which will start immediately thereafter and continue up to the meeting of the Baptist General Convention of Texas at Waco, November 16th.

Dr. F. S. Groner, General Secretary, announces the following itineraries for Pecos Valley Association:

Sunday October 1, Pecos, 11:00 A. M.; Saragosa, 3:30 P. M.; Balmorhea, 8:00 P. M.

Monday, October 2, Barstow, 11:00 A. M.; Odessa, 8:00 P. M.

Tuesday, October 3, Monahans, 8:00 P. M.; Grandfalls, 8:00 P. M.

Wednesday, October 4, Imperial 8:00 P. M.; Fort Stockton 8:00 P. M.

Thursday, October 5, Toyah, 8:00 P. M.

Clint Lanier was over from Toyah on business this week and looking as happy as a big sunflower. The cause of his jubilee at this time is the arrival of an eight pound son which arrived on the ninth of September at San Antonio where Mrs. Lanier has been for some time visiting her mother.

LAURA WELL MAKING PROGRESS --OTHER OIL NEWS

THE LAURA WELL

The Granger-Green Drilling Co., who have their rotary outfit on the Laura well, have been delayed badly for water until the first of this week, and since that time they have had to shut down one day on that account, getting in four days of drilling. It is now believed the water problem has been solved.

Previous to the drilling of this week they had filled up the hole for 200 feet with clay. They have now drilled back down through this clay. The clay was used in mudding off water and the quick sand which have been bothering them considerably. Their efforts in this manner have been a complete success, as they are not now bothered with either.

Mr. Green informed us that the well now stands 2408 feet, and that they had successfully passed their first obstruction.

Mr. Green, a member of the firm of Granger-Green Drilling Co., has brought his wife from Ft. Worth, and they are now making their home at the well site in order that he may give his entire and constant attention to the drilling.

If they are not delayed by an unforeseen obstacle now, it is expected they will make rapid progress.

TOYAH-BELL WELL

Word from the Toyah-Bell well at 2 o'clock this afternoon was to the effect that they had just raised the pump in order to clear it of sand. They are now using a steel pump, the one of brass being too short for service there.

It is estimated that oil stands 700 to 800 feet in the well, and in seven hours one day this week they pumped 60 barrels of oil.

They are still bothered considerably with gas, some of which they have burned under the boiler. At night it is burned in the yard and lights up the whole place.

Contract has been made with the Granger-Green Drilling Co. to begin drilling with their rotary outfit on Ramsey No. 2 as soon as that firm finishes drilling the Laura well, which, according to present outlook, will not be a great time from now.

BELL WELL

Satisfactory progress is being made at the Bell well, which is drilling in black lime at below twenty-eight hundred feet. Gas from the well is being used as fuel in firing the boiler, with enough gas to fire several more boilers being available—gas flare at this well at night can be seen for miles.

HERSHENSON WELL

Preparations are being made to start drilling again at the Hershenson well after receiving the large bit from El Paso this week. The bit is in good shape after being repaired, and drilling is expected to be resumed in a few days. Rains have caused some delay.

THE WILLOUGHBY WELL

W. M. Hopper, driller at the Willoughby well, was in town Monday to have a joint of casing re-threaded. He stated that he expected to have the casing in and the water shut off by the latter part of the week at which time he would resume drilling. Mr. Hopper says he has all kinds of faith in this well coming in a producer at an early date if the water is shut off and everything works well.

SPLENDID RAINS FALL OVER TEXAS

During the past week rain has fallen over wide portions of West Texas and although the showers were not heavy they were sufficient to do great good to the grazing interests. Reeves county came in for her portion of this wet weather yet some portions of the county is still dry.

Some of our older citizens say that early fall rains is an indication for a wet winter as it is generally believed that when we have as much rain over the county early in the fall we may reasonably expect more and a fairly good season through the winter. It is not unusual for it to rain enough after the fall rains commence to at least make plenty of grass and better fall and winter weeds upon which West Texas cattle thrive and fatten even during the winter months.

Judging from past experiences of our veteran stockmen these early fall rains portends no evil to the stockman and it is believed that cattle will do well during the fall and winter and come out in the spring in fine condition and that no feeding will be necessary.

Mrs. Cannon returned to her home Monday at Wichita Falls after a visit to her daughter, Mrs. Pat Fulgim and family.

FALSE HOPE
Sin on every side is growing bolder, and the very delusion contained in the statement, "The world is growing better," is of satanic origin, and is for the purpose of putting to sleep the forces of righteousness.
Human nature is incapable of moral improvement by any human process known to mankind. The only thing within the power of God that can change human nature is regeneration. Reformation cannot affect its character. Regeneration must precede reformation. Those who have been regenerated are of course growing better; they are improving; they are progressing; they are growing more Godlike.
The good are getting better, but the bad are getting worse. The ungenerated, the unwashed, the unaved are more skilled, subtle, and powerful in the practices of sin than ever before in the history of the world.
The corrupt are becoming more scientific in their corruption, and more determined to practice corruption.
There are three great stubborn facts confronting us.
FIRST—The fact of sin. It is the most stubborn fact, the most awful fact, and the most destructive fact in the universe.
SECOND—The fact of salva-

poem by UNCLE JOHN
My little niece has bobbed her hair—which makes her look a trifle queer about her upper story. For she was mighty well supplied with what we call the woman's pride—in fact, her crownin' glory. I couldn't say that she's improved, by whackin' off the curls I loved—it makes her look so sassy! But—when she's had 'em off a spell, she may look sweeter—who can tell?—or, mebber, twice as classy! I'm shore-an-certain now, that I could never be induced to try to wear luxuriant tresses. I wouldn't want to face a gale, with skypiece like a hoss's tale, or hooked up in long dresses. An' so, that little niece of mine can occupy the firin' line in front of my affections. A fairy-neck an' dimpled knee can shell my works, an' captur' me, in spite of all objections! But, still—there's drawbacks to the game, and little reaks about the same,—it's useless to deny it. Therefore—if I was Teeny's Ma, or other dames that I have saw—I don't believe I'd try it!

IT'S IN THE AIR
A cartoon illustration showing a man cleaning a house while others comment on the weather and the man's actions.

GREAT POSSIBILITIES
Things happen quickly in the oil industry today! Conditions change so fast and new fields are uncovered so rapidly that it almost takes the breath away.
But during the last four weeks, conditions have been brought about by the discovery of new fields that open vast possibilities.
The possibilities are great for the investor, driller, officials of the company and the public at large.
For the investor because tremendous fields have been opened and a good price for crude oil is assured, returning handsome dividends for the wise stockholder.
His possibilities are probably the greatest of all as millions may be made within the next few weeks within a twinkling of an eye.
For the driller, or roughneck, because it means steady employment and possibly increased wages for putting the drills quickly into the sand.
For the officials because it affords ample means for executive ability and the handling of vast sums for stockholders if properly managed. Also record production must be made under his management.
For the public in general because it is bound to mean an increase in production when the fields are exploited, assuring ample supply of gasoline and fuel oil and scores of other essential by-products of crude oil.

Piles Cured in 6 to 14 Days
Droglers refund money if PAZO OINTMENT fails to cure itching, Blind, Bleeding or Protruding Piles. Instantly relieves itching Piles, and you can get restful sleep after the first application. Price 60c.
A TONIC
Grove's Tasteless chill Tonic restores Energy and Vitality by Purifying and Enriching the Blood. When you feel its strengthening, invigorating effect, see how it brings color to the cheeks and how it improves the appetite, you will then appreciate its true tonic value.
Grove's Tasteless chill Tonic is simply Iron and Quinine suspended in syrup. So pleasant even children like it. The blood needs QUININE to Purify it and IRON to Enrich it. Destroys Malarial germs and Grip germs by its Strengthening, Invigorating Effect. 60c.

Dad, Mother, Ironized Yeast for Rheumatism
Do You Realize What Ironized Yeast-Vitamins Will Do for Rheumatism and Lumbago?
Do you know that vitamins and iron are part of your very life? Do you know that the tissue-and-blood factory in your body needs these two materials, and needs them badly? Do you know that if your body furnaces does not get enough of these, that

HOMEY PHILOSOPHY For 1922
WHEN you get a sliver in your finger it's likely to cause trouble if it's left there. As a matter of fact, after a time old mother nature sooner or later will force it out whether it likes it or not. It just don't belong there. One way or another it's got to get back to where it came from.
When it does then both sliver and stick are better off. They're stronger. The chances are both sliver and stick must pass through all sorts of changes before they unite again. That's the price they pay for getting away from where they fit.
It's always best to find out where we fit an' not try to break in where we don't belong.

Don't miss the joy of the new WRIGLEY'S P-K—the sugar-coated peppermint tid bit!

LET'S ALL PULL TOGETHER!

While the money is coming in to finance the Wheat Guarantee Well it is not coming in as fast as it should and I find it necessary to state that it is my opinion that all who are interested in seeing this well put down will have to come in and help raise the money. Since every cent sent in is to be used in sinking the well, it is obvious that the expenses of the promotion is heavy and since I am personally bearing all this expense I desire to raise the money quickly so that I may stop this expense. Therefore I am asking all who want to see

THE WHEAT GUARANTEE WELL!

started to send in all the money they can and at once. This cannot be a long, drawn-out affair—the money must be raised quickly and the well started. The sooner the well is started the sooner will you be able to realize on the well and on your property in the Pecos Oil Field.

I feel sure the money will be raised but to insure quick action it will be necessary for everyone interested to get busy. Owing to the fact that money is scarce and times are hard and some are holding back waiting for the other fellow it behooves us all who intend to get in on this proposition to do it now. Fill in the coupon below and send it in with your remittance today.

For the benefit of those who have hesitated to get in on this, I am again stating my proposition. Let me urge you, that if you intend taking shares, to do so now, and let's get the well under way. Read all this ad and get busy. Join me, and let's be the FIRST to bring in a paying well in Pecos.

ONLY 1,000 SHARES WILL BE SOLD

Each share will represent a one-thousandth interest in the well and lease. More than one share may be purchased but in no event will more than one thousand shares be sold.

EACH SHARE will be Forty-five Dollars, or, One Cent Per Foot, to be paid only one cent per foot as the well is drilled.

MY GUARANTEE PROPOSITION

You send to the Pecos Valley State Bank, Pecos, Texas, \$45.00 for each share you can purchase. This fund will be held in trust by the bank and paid out only as the well is drilled at the rate of one cent per foot for each share, only upon the sworn statement of the driller that he has actually drilled the number of feet for which he asks payment.

JUDGE J. E. STARLEY WILL BE ATTORNEY FOR THE WHEAT GUARANTEE WELL.

NO PROMOTION STOCK—EVERY CENT GUARANTEED TO GO INTO DRILLING

Not one cent of this money will be handled by me and I will pay out of my own pocket every cent of the promotion money. All I want is a well. I will put into the bank money for my shares just like you do. The well will be drilled under contract. The Toyah-Bell well has shown the contractor just what to expect so he knows what he can do.

Our success will mean a fortune for each share holder. One well will do that. Think of what five acres did at Mexia with a capitalization of thousands of dollars. Here you will have forty acres with only a capital investment of \$45,000.00.

Are you sure to win? I think so. WHY? Because the Toyah-Bell has proven the existence there of a great oil field. I base my opinion upon what I have seen and the opinion of geologists, drillers and practical oil men. We can't afford to stop or miss this great opportunity—what if Col. Humphreys had stopped when he drilled the discovery well at Mexia. It was his second well that made fortunes and so I am confident it will be with our second well—My Wheat Guarantee Well.

NOW IS YOUR OPPORTUNITY

Get in on this proposition at once for after the one thousand shares are sold no more subscriptions will be or can be accepted. Fill in the coupon below and mail to the Pecos Valley State Bank, Pecos, Texas, Wheat Well Trust Fund, and your certificate will be issued to you.

J. J. WHEAT, Pecos, Texas.

Pecos Valley State Bank1922.
 Pecos, Texas.
 Enclosed find for \$..... in payment for
 shares at \$45.00 per share in the Wheat Guarantee Well and
 forty acres of leases, the well to be drilled in Loving County, Texas, near
 The Toyah-Bell Well. It is understood and agreed that this money is to
 be held in trust by you and paid to the drillers of the Wheat Guarantee
 Well, at the rate of one cent per foot per share of stock purchased by me
 only upon the sworn statement of the driller that the foot for which he
 asks payment has actually been drilled. It is understood and agreed that
 in no event is this money to be paid until such affidavit is tendered in
 writing and that I am to pay only one cent per foot per share for actual
 footage drilled. You are to issue me receipt at once for all shares paid
 for herewith.
 Signed

WHEAT GUARANTEE WELL

The money for financing the Wheat Guarantee Well is coming from every point of the compass but not as rapidly as was anticipated and it now looks as if those who have been holding back and waiting for the other fellow to put up the money would have to get busy and do his part to insure this well and put it down quickly. Mr. Wheat yesterday morning stated to the Enterprise that while the money is still coming in and as yet he has not had time to hear from the 1500 letters sent out the early part of the week he feels that he will get the required amount necessary. Mr. Wheat is optimistic—even more so than the writer—and is really figuring on putting down the well. He has never yet learned the word failure. But from the editor's way of thinking if the necessary funds to put down this well is ever raised it will have to be done quickly. If allowed to drag it will soon drag itself to death.

There are at least 1000 men with holdings near the Toyah-Bell well and who will be, in case a gusher is brought in, a thousand times repaid for their little mite now but it behooves every mother's son of them to get busy and do it quick if they can hope to realize on this proposition. Every cent you put into it will be spent on the well—not one cent on promotion. Then you will own a one-thousandth interest in the well, and the forty acres given by Mr. Wheat. Just how any one who owns property in that section can persuade himself to remain out of this deal is beyond the comprehension of this editor. Get busy if you are interested and help Wheat put 'er down.

Just at this time when it appears impossible to collect money enough to pay expenses and with many this is an impossibility it looks as if a man would have to stretch his imagination considerably to be enabled to show an optimistic spirit and preach optimism. With probably three or four thousand dollars in good accounts—owing the paper by as good substantial men as there are in West Texas, the Enterprise is in a class where it appears impossible to meet expenses just at this time. Yet knowing this the editor cannot help but feel that the time is not far off when money will be easier and it will be no trouble to collect enough of these accounts to make things look much clearer at this end of the line. It looks like conditions could get no worse and since this is the case and it will be conceded that they cannot stay on a stand still and must get either better or worse, it is encouraging, although one cannot see just what is to make conditions better, that they will be at an early date.

Probably since the first issue of the old Pecos Times some eighteen or twenty years ago that paper and later its successor—the Enterprise has carried an advertisement for the Pruett Lumber Company. This week it does not appear and has been suspended indefinitely. The Pruett Lumber Company has become a household word in every family in this section of the country and has furnished lumber and materials for a good many of the homes and business places. The stringency in money matters has caused T. B. Pruett, the manager for all these years, to hedge, and one of the cuts struck the newspaper. Since it is recognized that a good newspaper is one of the greatest assets to any town and the life of every town of any consequence this editor cannot see just why it should be one of the first to be crippled when expenses are to be cut, but at that Mr. Pruett has as much right to his opinion as does the editor and he evidently saw that the cut had to be made and since he has managed his business wisely and in a satisfactory manner to those interested therein it is believed by the editor that he has some grounds for his action in this matter and that after all it maybe that the people are wrong in believing a good newspaper necessary to the welfare of a well regulated town. The Enterprise will continue to appear each week but it will depend entirely upon the support of its home people as to whether it will be an asset or a detriment to the town—for as the editor sees it a news-

paper which is poverty stricken and in a class which could hardly be called a newspaper without stretching the real meaning of the word and the truth is not an asset to any town since it is conceded that a town is judged by the newspaper representing it.

Earl Mayfield, democratic nominee for the U. S. Senate, will have as an opponent George E. B. Petty of Houston, who was nominated in Dallas Saturday by the independent anti-Klan democrats and republicans. As the Enterprise sees it Mayfield still has no opponent. An independent or bolter of the party in Texas is about the same as a republican anyway and is not died in the wool and there are not enough of this class in combination with all the Texas republicans to defeat Mayfield or any other regular nominee of the democratic party. The Enterprise is for the regular nominee of the party and will advocate their election in the general election.

It is a most criminal the way a lot of folks drive automobiles. They are either as ignorant as an ape about the road rules or care as little as a skunk-cat. Anyway, either contains a sufficient amount of criminality to put them in the penitentiary for murder, if it could only be applied. A fool driving an automobile is as bad as a mad-crazy person in a crowded street with a machine gun. Neither one should be allowed to run at large in a supposedly civilized country. We have a few of the automobile type in Lubbock, and they have smashed cars and crippled people and it is only a matter of a short time till they kill someone. Lubbock should certainly have a traffic cop, and one with a swift gliding motorcycle, so he could get in sight of some of these fellows who have nothing but speeding sense.—Lubbock Avalanche.

ABOUT THE NEWSPAPER

Speaking of what a newspaper does in a community, the late United States Senator Davis, of Illinois, made an address in which he said: "Every year each local paper gives from two hundred to one thousand dollars in free lines to the town in which it is located, in boosting, praising, and for lodges, churches, schools, societies, etc. The editor in proportion to his means, does more for the town than any other man in it; and he ought to be supported, not because you like or dislike him and his style, but because a local paper is one of the town's best features. Today the local papers are doing more for less pay than anything on earth, and it is a fact in many cases of free notices."—Ex.

HUMOROUS INCIDENTS ARISE IN EFFORTS OF PATRONS TO RECALL LETTERS FROM MAILS

Humor in a postoffice? There is much of it in spite of the Government red tape that clothes most postal transactions with a seriousness. It arises from many sources but the most prolific is perhaps the frantic efforts folks make to recall letters after they have hit the bottom of the mail box with a dull thud. And they may be recalled, but certain formalities must be followed. And folks do sometimes grow almost frantic in their efforts to have them returned. It is easy to imagine some sweet young thing, or even one neither sweet nor young, writing to her "sweetie" that he must pass out of her life forever since she saw him with the tall blonde, or some tired business man writing to his best bootlegger that all bets are off since he sold him the hair tonic and then the writers wish they had the letters back. And such events do happen and they are not occasional, they are of daily occurrence. Postmaster R. E. Speer is authority for the statement, and he remembers many incidents both serious and amusing in connection with the recall of letters. One night a Fort Worth woman called him on the telephone. That afternoon she had mailed a letter to a Fort Worth man. She wanted it back and she wanted it badly. Speer told her that it could be arranged, for her to go to the superintendent of carriers the next morning and follow the proper process and it would be returned. The following morning the postmaster found both the man to whom the letter was addressed and the writer in his office. The man had discovered in some manner that the letter was in the mails and was making an effort to obtain it before its recall. The woman was attempting to stop delivery on it and did. She had her claim in first. The postmaster recalled an attempt to stop delivery on a letter that probably cost the writer a fortune. In that instance the letter was delivered because the proper process had not been followed. He tells the story in this manner: Two Fort Worth operators were drilling a well in West Texas. The well had gone on until both had spent the majority of their available cash, and no results had been obtained. Finally one partner made the proposition to buy or sell. The other partner that same afternoon left for Oklahoma and on the following day accepted the offer to sell by telephone, but stated in the conversation that the sale would be confirmed by letter necessary to complete a contract of sale. After the letter had been dispatched word was sent to both men that the well had come in a gusher. A few minutes after it reached the local office, Speer received a telegram from the writer to hold

the letter at any cost. In some manner both the telegram and the letter came into the possession of the carrier and when he reached the addressee the man was waiting on the front steps for it.

The carrier refused to deliver it because of the telegram and when he returned to the postoffice the carrier found the addressee and a corp of attorneys waiting for him. Speer ordered the letter delivered and caused the original acceptance of the Oklahoma man to become a contract.

Under the postal regulations request for recall of letters must be made through the postmaster of the mailing office. Where the Oklahoma man failed was in sending the telegram signed by himself instead of having the postmaster from the office where the letter was mailed, sign the telegram.

The postal regulations set out that where the writer wishes to recall a letter he will apply to the postmaster at the mailing office, identify the parcel of mail, deposit a sufficient sum to cover any expense and fill out a blank form used for that purpose. When this is done the postmaster will attempt to locate the parcel before delivery and is the only necessary step to recover a letter.

Because of the case of recovery Postmaster Speer declared that no one should suffer any mental torture because they have ter Speer declared that no one should suffer any mental torture because they have mailed a letter they would like to have back.—Ft. Worth Star-Telegram.

STEWED BULL IS FEATURE ON MENU IN THE JUAREZ JAIL

"No more Juarez for me," declared Cecil F. Clampitt, 17 years old, as he took the train Thursday afternoon for his home in Shreveport, La.

Cecil had just been released from the Juarez jail after serving a 74-day sentence. His release was obtained through the efforts of the Salvation Army and \$50. Cecil's father sent the \$50 and car fare.

"I only lost 12 pounds on the bull meat and frijole diet," said Cecil. "We had frijoles and tortillas with some kind of coffee for breakfast. If it were not for the bull fights we'd have frijoles three times a day. As it is, we'd get stewed bull for dinner."

"Hopheads make jail life miserable. There is a big bunch in jail all the time, many of them Americans, and they have no trouble getting dope smuggled in."

"When a new man comes in they take off his collar, tie and shoes and anything of value. I went around barefoot for about a week, but finally got my shoes back."

"Some of those hopheads have long sentences hanging over them. Every chance they get they break away from the guards when they are at work. Then when they get caught again they get a new sentence plus the old one."

"Time hangs pretty heavy. You don't have any cards to play with. You could write home if you have the paper, but you haven't. Keeps you pretty busy scratching because the vermin are awful."

"How did I get in? I rented one of these driverless Fords. I got over in Juarez and they claimed I was trying to steal the automobile and had me thrown in jail. I've got the receipt for my deposit in my pocket now."

"Glad to get out? Oh, boy, you tell 'em! I'm going home to pa and stay. This side of the Rio Grande for me."—El Paso Herald.

FINANCIAL REVIEW

Prepared for The Enterprise By The First National Bank, St. Louis.

Steel ingot production for August totaled 2,530,950 tons, a decrease of 311,450 tons for the month. This estimate is based on the report to the American Iron and Steel Institute of 30 companies, representing 87 1/2 percent of the country's steel capacity. The industry, as a whole, operated at an average slightly in excess of 55 percent during the month.

There was a material increase in the rate of steel and iron production during the past week, and a further betterment is anticipated, in view of the coal strike settlement and signs of clearing of the transportation situation.

Pig iron production for August totaled 1,800,000 tons, a decrease of 500,000 tons from the July output, and this drop compares with an increase of 50,000 tons in July over June. The low point reached in July of last year, when only 864,500 tons were produced. The worst of the present situation was encountered during the last two weeks of the month. The number of active stacks was reduced from 172 to 144 during the month, a net loss of 28. The decrease in iron production for August was the largest for any single month since the steel strike in September, 1919, and is due solely to the lack of fuel which caused the blowing out and banking of a large number of stacks.

Advances in pig iron prices were almost universal and No. 2 foundry iron is now quoted as follows: Valley \$35, Chicago \$32, Buffalo \$34, Birmingham \$25, Philadelphia \$25.14 and New York \$36.27 a ton. The composite pig iron price advanced during the week from \$30.645 to \$31.565 a ton.

T. E. L. CLASS HOSTESS AT PARTY. The T. E. L. Class of the First Baptist Church was hostess to a number of invited guests Friday September 15th at the home of Mrs. J. C. Wilson.

A very interesting program was rendered and officers for the ensuing year were

lected as follows: President, Mrs. Kenneth Slack; 1st vice-president, Mrs. Will Classcock; 2nd vice-president, Mrs. J. C. Wilson; 3rd vice-president, Mrs. R. M. Stevenson; secretary, Mrs. C. C. Parker; treasurer, Mrs. W. E. Turner; reporter, Mrs. Archie Ross. A delicious salad course was served to the following: Mesdames, Turner, McCasland, Blount,

Rev. and Mrs. Garner, Fred Johnson, H. H. Johnson, Toliver, Brooks, Hampton, Camp, Hicks, Harrison, Parker, Norman, Maley, Miles, Wilson, Classcock, Slack, Harlin, Nola, Biggs, and Ross.

Ed Vickers and C. E. Euchholz went up to the mica mines in Culberson county on business this morning.

GATES TIRES
The Tire with the Wider and Thicker Tread
Isn't It Even More Important—
Now that you can buy cord tires at nearly the price of fabrics, you should nevertheless get every extra mile that's in the better cord material.
Isn't it even more important, then, that your cord tire should have a wider and thicker rubber tread to match the longer mileage in the cord material? Bates Super-Tread Cords have the wider and thicker tread that protects the cords to the very end and allows them to deliver you their extra miles in full.
MARSHALL H. PIOR

DENIES FACTS SET

FORTH IN EDITORIAL
Chicago, Ill., Sept. 19, 1922.
Editor The Enterprise,
Pecos, Texas.

Dear Sir:
An editorial article in the Enterprise of August 4, entitled, "Bust the Beef Trust Monopoly," has come to our attention. This article erroneously intimates that the larger meat packers, "comprising the meat monopoly," have such complete control over refrigerator cars that smaller competitors are placed at a great disadvantage.

In the first place, we emphatically deny that there is a "beef trust" or a meat monopoly in this country. This is proved by the complete absence of evidence to the contrary, and by the presence in the meat packing industry, as represented by the Institute of American Meat Packers, of more than two hundred keenly competing firms. In addition, there are several hundred other companies in many of the smaller cities and villages of this country, all of which are in direct competition with all other meat packers, including the larger ones. According to figures recently issued by the

AN APPEAL

"I was a stranger, and ye took me not in; naked, and ye clothed me not; sick, and in prison, and ye visited me not."

Some live a great distance from prisons and are necessarily detained at home. Some, as women, could not, in many places, visit prisons with decency. Others are altogether unable to do good to the souls or bodies of the sick and captives, being themselves sick, poor and confined.

Reader, if thou art in any—of these cases, canst thou not influence others to do what is out of thy power? Canst thou not send the relief thou art unable to carry, and show thou good will by cutting off thy superfluities, sparing some of thy conveniences, and at times a little of thy necessities, for thy "sick, naked, hungry, or imprisoned friend?"

If thou art so indigent and infirm that thou canst absolutely do nothing for the bodies of thy fellow-creatures, endeavor to do works of mercy for their souls; exhort, comfort, reprove, instruct as thou canst, all around thee in meekness of wisdom.

If thou canst do works of mercy neither with thou tongue, hands, nor feet, then be the more diligent to do them with thy heart. In spirit visit prisons and sick beds. If thou hast no house to take in strangers, open to them thy heart; earnestly recommend them to God, who can supply all their wants, and open to them the gate of heaven, when they lie under a hedge, as He once did to Jacob in the fields of Bethel.

Give thy heart continually to the Lord, and thou givest more than a mountain of gold; and the moment thou canst "give a cup of water in His name" bestow it as freely as He did His blood; remembering "God loves a cheerful giver, and it is accepted according to what a man hath, and not according to what he hath not."

J. C. HUNTER.

United States Bureau of the Census—those covering the year 1919—the number of the establishments in this country engaged in slaughtering and meat packing exceeds 1300.

As for refrigerator cars, many of the so-called smaller members of the Institute themselves own and operate these cars in relatively large numbers.

Your editorial article also infers that the privately-owned refrigerator cars are handled more efficiently by the railroads. This is not true. The Interstate Commerce Commission investigated fully over a period of years, and reported that there were no arrangements which gave the owners of private cars any advantages. As a matter of fact, the packers' cars often are seriously delayed and are subject to the same embargoes and tariff rules and regulations as are shippers of other perishable freight.

Only one motive prompted the packers to invest in refrigerator cars—a desire to obtain efficient service for fresh meat. The railroads did not construct enough cars and the packing firms actually were forced to provide their own facilities. These cars often have been operated at a loss and they have never been an attractive investment.

Every transportation service, however, which the packers have is open to everybody else. Packer-owned cars move on the same trains and are treated in the same ways as cars of competitors.

If Mr. Record has any evidence or information with which to prove the existence of the abuses which he mentions, he should bring it to the attention of the Interstate Commerce Commission, and is remiss in his duty if he does not do so.

Since this letter is in the nature of a correction, we request that you bring it to the attention of your readers.

Will you please let us know in what issue of your paper this letter will appear, so that we may obtain a copy?

Yours very truly,
BUREAU OF PUBLIC RELATIONS,
W. W. Woods, Director.

FIRE FIRE FIRE

THE STATE OF TEXAS

To the Sheriff or any Constable of Reeves County Greeting:

You are Herby Commanded to cause to be published once each week for a period of ten days before the return day hereof, in a newspaper of general circulation, which has been continuously and regularly published for a period of not less than one year in said Reeves County, a copy of the following notice:

THE STATE OF TEXAS

To all persons interested in the Estate of Sid Kyle, Deceased.

Mrs. Minnie Kyle has filed in the County Court of Reeves County, an application for the Probate of the last Will and Testament of said Sid Kyle, Deceased, filed with said application, and for Letters Testamentary which will be heard at the next term of said Court, commencing on the second Monday in October, A. D. 1922, the same being the 9th day of October, A. D. 1922, at the Court House thereof, in Pecos, Reeves County, Texas, at which times all persons interested in said Estate may appear and contest said application, should they desire to do so.

Herein Fail Not, but have you before said Court on the said first day of the next term thereof this Writ, with your return thereon, showing how you have executed the same.

Given under my hand and the seal of said Court, at office in Pecos, Texas, this 29th day of August, 1922.

S. C. VAUGHAN, Clerk County Court, Reeves County, Texas.
By H. P. Kerr, Deputy.

EFFICIENCY

The word efficiency is yet in its infancy. Only within the last few years has it been used to any extent. It was first applied when it was discovered that a particular workman could do a job, not only better than the average man, but could do it in less time with a greater degree of accuracy.

Skill, speed and accuracy are responsible for the coining of this word efficiency, and they are made possible through the employment of the latest types of machinery.

TWO WAYS OF DOING A THING

THE NEW WAY

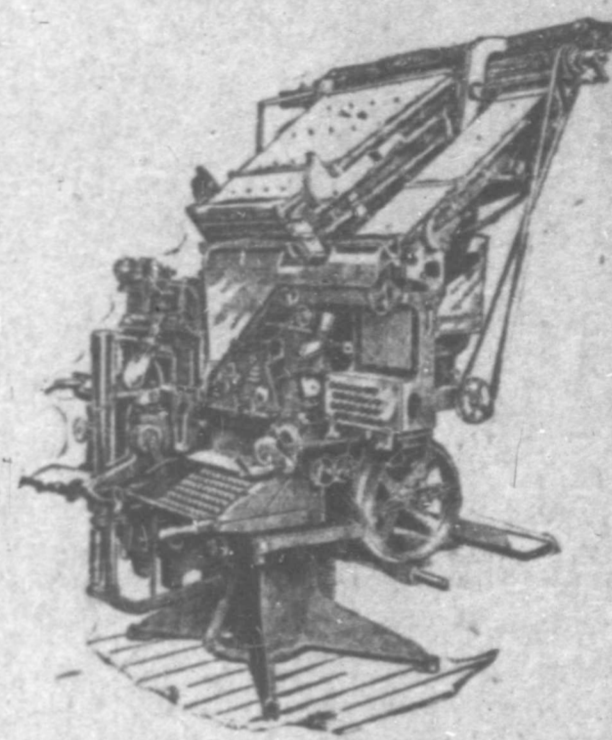

A \$6,000 Linotype machine that casts new type for every job and advertisement.

Does the work of four men.

Equipped with 32 different faces of type that can be changed on a minute's notice.

Also casts ornamental printing material, rule, border, etc.

Metal saw that cuts machine products into any design and measure.

LATEST MODEL MACHINE MADE

THE OLD WAY

When printing was done by hand it required six times as much time as by machinery.

Type was laid in cases, became worn, the printing surface scratched; rules were bent, nicked and battered and in a few months the office could not possibly do first-class work. Neither could they afford to buy new.

The Linotype has done away with this method.

REASONS FOR QUALITY PRINTING

THE two Linotype machines in THE ENTERPRISE office are capable of handling any work that falls to them in the shortest possible time—with no exceptions. The new Model 14 is one of the best equipped machines in the State—this is fact.

Without the machines we would have to employ four times as much labor, our floor space increased and additional rent; we could not give you new material with every job; our methods of production much slower, but everyone knows the difference between machine and hand work—it is a short story: Either the hand work costs you much more or the job is done in a haphazard way to meet the low price of the machine work.

THE ENTERPRISE has the only machines in the county and the best skilled workmen on the market.

"Gold! Gold!"

Back in the '40's it took months for the thrilling news of California's gold strike to cross the continent. Today, a few hours after so important a discovery, the entire story would be known to newspaper readers through the country.

In the early days, news spread by word of mouth. Today, the telegraph and telephone speed the message in to the newspaper office, it is rushed into type, the paper is printed and shortly the news becomes public property.

There are two kinds of news in the paper. One consists of the affairs of other people; their saving, doing and what they're going to do; things that have happened, may happen and didn't happen.

The other kind of news is about your affairs. That's the part you'll find in the advertisements. There's a lot of valuable news there about things you want or will want; things that have to do with your own personal comfort, convenience and every-day efficiency.

Every advertisement carries a personal message to some one. Many advertisements carry messages of vital interest or value to you.

That's why you can't afford to miss the advertisements.

Read them. The advertisements are decidedly valuable to you.

School Days

We have everything needed in the way of school supplies: Pencils, Tablets, Crayolas, Inks, Papers, etc. Get your supply at the

Did you ever hear of Doolittle?

If some fellow had told your grandfather when he was a boy that in the time of his grandchildren a man would take dinner one evening on the cool summer veranda overlooking the broad Atlantic and at ten o'clock bid his friends good night saying, "I am dining with friends on the Pacific

Atlantic To Pacific Coast tomorrow evening. I must be on my way," your grandfather would have looked upon the predictor as either a laughable romancer or a pitiable fool.

Well—Doolittle did it. And not many people noticed it. The whole world accepted it as a little news item of passing interest. Few even noted the item and most of those who did as quickly forgot it.

Lieutenant James H. Doolittle, U. S. Army aviator, hopped off in his aeroplane from the broad Atlantic at Pablo Beach at three minutes past ten o'clock Labor Day. At 5:34 the next afternoon (Pacific time), he stepped out of his sky boat at San Diego, Calif., on the Pacific.

Doolittle stopped an hour and seven minutes at San Antonio, Texas, to take breakfast with his wife and mother. In actual flying time, he flew from sea to sea in twenty-one hours and eighteen minutes.

What would grandfather, as a boy, have thought of that? Nothing more than a passing news item of the hour now. We have grown accustomed to startling events.

Some day some fellow will rise up in the heavens and sail all the way around the world. And when that day comes, even that will not amaze us.

We once thought it a wonderful thing to talk by wire across town. Now we talk by wireless across the continent.

We once thought it was a great thing to go from New York to Buffalo in one day. Now we go from sea to sea in a day.

You have seen in your school histories pictures of the little Columbus fleet, the Nina, the Pinta and the Santa Maria, compared to the modern ocean liner, nearly one-fifth of a mile long; accommodating thousands of passengers in the luxury of palatial grandeur.

You have seen pictures of the little kettle-like locomotive, the De Witt Clinton, which was the marvel of 1831 because it acquired the amazing speed of 15 miles an hour. You have seen the modern engine which pulls a palatial pullman faster than a mile a minute. Wonderful changes, aren't they? Well—

The little airship that Doolittle lifted above the storm clouds and sailed by compass was but the Santa Maria sailing an uncharted sky. A sky where great ships will follow. It was the De Witt Clinton piloting the path for the up-in-the-air passenger coach that our children will some day use to meet a business engagement or to greet a friend at dinner a few thousand miles away.

PRETTIEST GIRL IN UNITED STATES

Mary Katherine Campbell, of Columbus, Ohio, was crowned National Beauty Queen for 1922 in the Annual Pageant at Atlantic City. She is 16 years old, 5 feet 5 inches in height, and weighs 133 pounds. She swims, rides, dances—and goes to school. She triumphed over 170 other American beauty winners from as many different towns and cities in the U. S.

She Can Cook Ham and Cabbage

Special to The Enterprise
By Robert Fuller

Atlantic City, N. J.—Being beautiful does not take all of one's time. One can still be quite intimate with kitchen utensils. Mary Katherine Campbell of Columbus, Ohio, says so—and Mary ought to know.

Miss Campbell is a 16-year-old school girl and daughter of Mr. and Mrs. Herman R. Campbell. She has just been crowned Queen of American Beauty for 1922. She prides herself that she can cook a well-seasoned dish of ham and cabbage.

Miss Campbell was picked as America's most beautiful girl from a group of 170 prize winners representing as many different towns and cities in the United States.

The competition was the annual Beauty Pageant at Atlantic City. She was entered as Miss Columbus.

Miss Campbell is a wholesome, mid-Western miss just out of high school. She swims, rides, dances and helps mother cook. She is 5 ft. 5 in. in height and weighs 133 pounds.

Marriage, she blushing admits, is at

least four years away—although she confessed seven proposals already.

The man of her dreams—well, he should be tall, slightly interested in athletics, good-humored, and not too handsome. He can be either rich or poor—if she loves him.

Coles Phillips, famous American illustrator and artist, and one of the judges in the contest, said of Miss Campbell:

"Years ago the nation was thrilled by the so-called Gibson Girl. In the last few years two types of beauty have usurped her place. These are the types that Flo Ziegfeld has exploited, and the Mary Pickford type.

"Neither of these girls in my opinion really typifies the American girl. Instead I should say she more nearly approximates Miss Campbell's appearance. The type I mean is rather tall, with straight lines, broad shoulders, a free swing to her body, and a clear intelligent face.

"As a matter of fact, measurements mean really nothing. Proportion is much more important. At any rate, the type I have described is seen to the highest degree in Miss Campbell. Artists, by the way, say that the type is produced most

SUPREME BENCH

Former Senator George Sunderland, of Utah, is the new associate Justice of the U. S. Supreme Court to succeed Justice J. H. Clarke.

ALL IN A DAY

"It's all in a day," we hear men say. But what is a day—for the man and for the woman?

Custom says that eight hours is the proper amount of time that should be consumed in the work in any day. The remaining sixteen hours are for rest and recreation and sleep.

The husband works his eight hours and then goes home to his supper. His day's labor is at an end. After supper lights his pipe and picks up his paper and proceeds to post himself on the affairs of the day. Or perhaps he goes to his lodge, or "out with the boys."

But what of the wife?

Does she hunt a comfortable chair and immerse herself in her favorite book, or spend the evening with her neighbor, or in a hundred other different ways that are possible?

Occasionally, but not often.

The dishes must be washed and put away after the evening meal, and the kitchen and dining room must be cleaned.

Then the husband has a pair of socks that need mending and some buttons to be sewed on and possibly there is some ironing to be done, and some clothing to be made or mended for the children. The kiddies, too, need some assistance in their lessons, and the baby has to be rocked to sleep in his cradle. And many other things must be done of which a mere man cannot think.

"Yes, it's all in a day," both for the man and the woman, but the woman seldom gets the best of it.—Bonham Favorite.

MARRIED

Word came to relatives in this city of the marriage of Beryl Burdick of El Paso and Miss Laura Breeding, Carlsbad, September 2nd.

Mrs. Burdick is the youngest daughter of Mr. and Mrs. Robert Breeding, of this city and a sister of Mrs. Holley Benson, of Carlsbad, and Mrs. W. W. Dean of Pecos. Although quite young, Mrs. Burdick is one of our best and most promising teachers, having taught successfully in Eddy county schools since leaving school herself two years ago. A young lady of beauty and a charming personality, she radiates happiness wherever she goes and the man of her choice is fortunate in securing such a girl for his life partner.

The happy man is of a fine family, whose relatives reside in El Paso and are favorably known there, and that he is a man of good judgment he has shown in selecting a wife. They will reside in Rincon, where he is in business, and where the bride has accepted a school for the winter. The marriage occurred in Hillsboro, this State.

The Current expresses the wish of all who have known Miss Laura all her life, that she and her husband may have smooth sailing over the Sea of Life, and a safe harbor at its end.—Carlsbad Current.

GALOMEL SALIVATES EVEN WHEN CAREFUL

Treachorous Drug Can Not Be
Trusted And Next Dose May
Start Trouble.

Calomel is dangerous. It may salivate you and make you suffer fearfully from soreness of gums, tenderness of jaws and teeth, swollen tongue, and excessive salivary dribbling from the mouth. Don't trust calomel. It is mercury; quicksilver.

If you feel bilious, headachy, constipated and all knocked out, just go to your druggist and get a bottle of Dodson's Liver Tonic for a few cents which is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start your liver and straighten you up better and quicker than nasty calomel and without making you sick, you just go back and get your money.

If you take calomel today you'll be sick and nauseated tomorrow; besides, it may salivate you, while if you take Dodson's Liver Tonic you will wake up feeling great. No salts necessary. Give it to the children because it is perfectly harmless and can not salivate.

The Quinine That Does Not Affect the Head

Because of its tonic and laxative effect, LAXATIVE BROMO QUININE is better than ordinary Quinine and does not cause nervousness nor ringing in head. Remember the full name and look for the signature of E. W. GROVE, 30c.

\$2.50 PER YEAR.

The Sunday edition of the El Paso Herald which contains 8 full pages of comics, 6 of which are in 4 colors; 2 pages of "Herald Junior" for boys and girls, and 2 pages of magazine features, together with 24 pages of news and other good reading matter, is now sold to mail subscribers at \$2.50 per year.

Every ranchman and every household in the Pecos Valley ought to have the big Sunday El Paso Herald, the greatest newspaper value for the money in the southwest.

No Worms in a Healthy Child

All children troubled with worms have an unhealthy color, which indicates poor blood, and as a rule, there is more or less stomach disturbance. GROVE'S CASTLESS CHILL TONIC given regularly for two or three weeks will enrich the blood, improve the digestion, and act as a General Strengthening Tonic to the whole system. Nature will then throw off or digest the worms, and the child will be in perfect health. Prescribed to take 30c per bottle.

OUR COLLEGIATE ICEMEN

American colleges prepared for the greatest year in their history. In almost every State of the Union the enrollment figures show marked advances and records broken.

Yale, Princeton, Wellesley, Union, Pennsylvania, Vassar and Dartmouth, reached the pinnacle of their prosperity. It is also true of many western colleges.

Fact is that this prosperity for colleges is due largely to the change in the viewpoint of our educational institutions. Many cobwebs have been swept away.

Today the college means more than the accepted understanding of academic teaching. It means a broader vision of life and a greater understanding of the necessity for the thing worth while.

The college man today is to be found everywhere. He is at the head of a great banking institution, he is a chauffeur, he drives an ice wagon, he tills the soil, he appears in literature and ornaments the plumbing establishment.

Sometimes the unthinking criticize the college because its graduates may be found driving a milk wagon and the like. The answer, of course, is that if all milk wagon drivers were college men milk would be delivered more orderly and ven our babyhood would be helped.

The greatness of the college does not lie in its being the gangway down which one may walk to the professions. Its worth is in giving to the country men who can thoroughly perform the duty of the hour.

The college is not the panacea for empty skulls. The best it can do is equip the man who has something under his hat.

COLORADO FARMERS—HARD LUCK ARTISTS

For many years those who have studied the tariff question closely, have maintained that it is largely a local issue. The Echo editor after studying the farmer and the farming conditions, for several years, has arrived at the conclusion that farming is a local issue. The farmer in the Richardson section last year and the year before, though he was harder hit and in worse shape than farmers could possibly be in any other section. They pulled through and are now reaping their reward for their work and persistence and faith in the soil. This year's visit through the farming section of Colorado has shown us that farmers, fruit growers, truckers and stockmen of that country, feel that they are imposed upon and harder hit than farmers, etc., could possibly be in any other part of the world.

Going west from Colorado Springs, one crosses the Continental Divide near Leadville and drops into the valleys on the other side. Here this year, along the rivers, is found some of the finest ranches of hay, some of the most fertile fields covered with lettuce and Irish potatoes. This was the first year the farmers have tried head lettuce and they have raised an enormous crop. Speculators and commission men promised them at least 5c per head lettuce yielding sufficient to give them a return from the land of \$1000 to \$2000 per acre, but they cannot sell the lettuce. The first harvest went fine, others found a glutted market, a scarcity of railroad cars and no trains to move the few cars they could get. The strike hit them hard and their patches are cluttered with crates, bought to pack their lettuce in. They are grumbling and why not.

The potato raisers suffered a like fate. Irish potatoes have been a money making crop for Colorado farmers for several years. This year the acreage was doubled and the yield the best in many seasons. Result, no market for their product. Farmers in this section were trying to sell their potatoes for 45c per 100 pounds when we passed through that section between Greenwood and Eagle, when we reached Colorado Springs, 20 miles from there, we dropped into a grocery store and inquired the price for no potatoes and were told they were worth 4c per pound. More than seven times as much as the farmer, who was producing, was offered. A screw loose somewhere. These folks think they have a marketing organization, similar to the Texas Farm Bureau. Evidently it is not functioning.

This year's hay crop was fine and cattle, running through the mountains, in the summer time, on leased government land, were never in better shape. The valley farmer runs his cows on the free range through the summer, cuts all the valley grass and alfalfa he can secure and stacks it. When snow begins to fall and the mountain grazing is dangerous and too cold, the stock are brought down into the valley and wintered on the hay. The farmer-ranchman who handles his affairs in this manner, is in a much better financial condition than his neighbor, the farmer or fruit grower.

The mountain slopes and the irrigated desert land around the Grand Junction country and for a hundred miles before reaching that oasis, are a paradise of fruit orchards. Apples, peaches, apricots, plums and all of the finest varieties for that section. Peaches were selling in the shops in Manitou, when we left there, for 75c a basket weighing about eight pounds. In the fruit section the fruit was rotting on the ground because the growers could not get enough to pay them for buying crates and loading them on the cars. These folks have a marketing bureau, but it is not working. We bought apricots, all we could pour into the car, for 50 cents, at the orchard. Peaches were begging some one to care for them and apples, when an offer came, brought less than \$1.00 per box. See what you pay for them when you buy.

Farming lands in Colorado are worth from \$1.00 per acre to \$500 per acre and seeing the difference between results, we believe the latter is the cheapest in the final summing up. Many valley farms, 50 miles off the railroad, have been selling for \$200 per acre and when set in alfalfa, bring \$500 right along, distance from market, seeming to make very little difference.

We merely give some of our observations, as to how the "other fellow" is doing, feeling that some of our farmers would be interested to know that, no matter how green the grass looks in our neighbor's pasture, home is best after all.—Sam P. Harben in Richardson Echo.

ARE YOU READY FOR A BUSINESS PROPOSITION?

DEMAND FOR HELP: A recent country wide investigation of employment conditions to get information as to the type of help in greatest demand showed the following results:

Out of 2445 advertisements for help 1338 specified a business training and 524 of the remaining 1107 were for positions that office assistants grow into. No other profession can claim one-fifth as great a demand. In fact, this proves that there is a greater demand for business trained men and women than all other trades and professions combined. Are you passing up a Business Training and its wonderful opportunities to become a day laborer, housemaid, department store clerk, telephone operator, factory hand, etc.?

There is a business position awaiting you. Are you ready for it? Can you enter a business office knowing that you can handle a bookkeeper's desk, do the work of a stenographer or private secretary or hold any of the specialized places open in the modern business office. The big salaries come to man or woman who can Do One Thing Well. Training is necessary. Have you been drilled in the basic principles of business that will enable you to hold higher salaried and more responsible positions as the opportunities arise? Unless you know these things, the chances of your success are small.

Make up your mind to train, to start your business education NOW. Every day that slips by is a loss to you—it puts a good position and a good salary further away from you.

A few months in our institution, the largest business university in America, will give you the training you need. You can never make a better investment than in a business education. You can get here through most thorough, complete and practical courses to be had, in the least time and at the least cost, and our Employment Department will place you free of charge. Fill in and mail coupon for catalogue with full information as to our courses.

ALAS THE ANGLE WORM

And now we have a device by which the angle worm is hunted in his lair, brought to the surface to be devoured for the sustenance of the great American hen. Peter J. O'Keefe, of Greenwich, Connecticut, is the inventor.

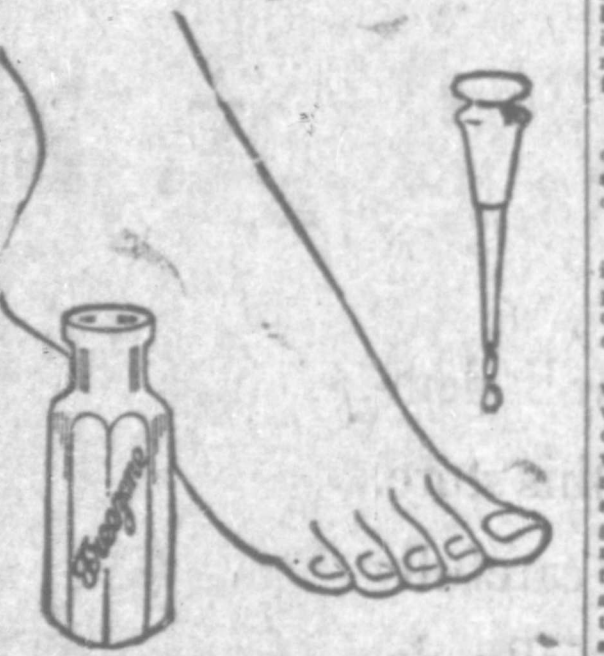

The device is an electrical one and literally shocks the worms out of the ground.

It consists of two brass rods that are pushed into the earth several feet apart. A wire is attached to each rod and each wire connects with an ordinary telephone magneto.

By twisting the handle of the magneto the angle worm feels it in time to take the air. Rapidly he moves to escape, but, alas! the chicken is waiting, and as soon as the worm imagines he is safe from dan-

LIFT OFF CORNS!

Apply few drops then lift sore, touchy corns off with fingers

Doesn't hurt a bit! Drop a little Freecorne on an aching corn, instantly that corn stops hurting, then you lift it right out. Yes, magic!

A tiny bottle of Freecorne costs but a few cents at any drug store, but is sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

Freecorne is the sensational discovery of a Cincinnati genius. It is wonderful.

Habitual Constipation Cared in 14 to 21 Days

"LAX-FOS WITH PEPSIN" is a specially-prepared Syrup Tonic-Laxative for Habitual Constipation. It relieves promptly but should be taken regularly for 14 to 21 days to induce regular action. It stimulates and regulates. Very Pleasant to Take. 50c per bottle.

H. & G. N. RY. LANDS FOR SALE IN REEVES COUNTY

Surveys Nos. 45, 47, 51, 55, E. half of 61, and 63, in Block 4; and Nos. 65; 67 and W. half of 6 in Block 5.
The surveys in these blocks are situated from 5 to 8 miles from Pecos City, in the arid belt of the Pecos River country and will be sold only in whole sections.
Also, surveys No. 69 in block 6 and Nos. 9, 13 and 15 in block 7.
Also, surveys Nos. 1, 5, and 1, situated on the Pecos River, in Reeves county, and Nos. 19 (a dry survey) Pecos county.
Also 12 surveys in block 11 and 3 surveys in block 12. None of these are clear lands. All are in Pecos county.
All these lands are under lease for oil, gas and mineral purposes and any sale of same will be subject to conditions.
J. G. LOVE of Pecos is agent for the sale of all these lands situated in Reeves County and applies the same to be made to him for the purpose.
There is no local agent for the sale of the lands in Pecos County, and parties desiring to purchase any of same should apply to the undersigned.
EUGENE CARTLEDGE, Agent and Attorney in Fact.
AUSTIN, TEXAS

ger his troubles come to an end.

Thus does the world move on. If the mentality of the angle worm were properly developed, he would sense the greater danger of leaving his natural environment.

As time goes on and the standard of angle worm intelligence advances, things may improve for him; but in the meantime, he will have to look for temporary protection to the American Society for the prevention of Cruelty to Angle Worms, an organization which undoubtedly will come into being as soon as the cruelty of the O'Keefe device is conceived.

Surely such an opportunity for a new protective and paternalistic society cannot be missed.

CITATION BY PUBLICATION.

The State of Texas,
To the Sheriff or any Constable of Reeves County—Greeting.
You are hereby commanded to summon Alfred Tinsley, E. F. Ducommun, L. G. Ducommun, Alfred Ducommun, Florence Livingston, C. G. Benson, Roy D. Barham, E. H. Archer, W. S. Yates, E. Berry, J. S. Harvey, O. J. Rankin, M. C. Cowart, O. O. Ringold, J. G. Nesbit, L. H. Johnson, J. Russell Terhune, A. B. Clair, D. J. Brady, I. N. Glover by making publication of this Citation once in each week for four successive weeks previous to the return day hereof, in some newspaper published in your County, to appear at the next regular term of the District Court of Reeves County, to be held at the Court House thereof, in Pecos, Texas, on the third Monday in November, 1922, the same being the 20th day of November, 1922, then and there to answer a petition filed in said Court on the 29th day of June, 1922, in a suit, numbered on the Docket of said Court No. 2348 wherein A. S. Chapman, P. C. Chapman, A. B. Reese, D. S. Jones, Ed Jones, S. T. Jones, My Frasier, S. A. Mahoney, E. M. Purcell, Mrs. Daisy P. Wright a feme sole, and Mrs. C. E. New a feme sole, are plaintiffs, and The Sunshine Oil Corporation, Alfred Tinsley, Jno. B. Howard, E. F. Ducommun, L. G. Ducommun, Alfred Ducommun, Florence Livingston, a feme sole, C. E. Benson, Roy D. Barham, E. H. Archer, W. G. Yates, E. Berry, J. S. Harvey, D. J. Rankin, M. C. Cowart, O. O. Ringold, J. S. Nesbit, L. H. Johnson, J. Russell Terhune, A. B. Clair, D. J. Brady, I. N. Glover and S. H. Johnson are defendants, and said petition alleges that on the 29th day of May, 1918, the defendants, John B. Howard and Alfred Tinsley entered into a written agreement with W. M. Johnson of Harrison, New Jersey, by the terms of which the said W. M. Johnson, the owner of Section 17, Block 2, H. & G. N. R. Co. Survey, Reeves County, Texas, conveyed to said defendants, Tinsley and Howard, all the oil, gas, coal and other minerals in and under the land therein described, including said section 17, subject however to the drilling of an oil or gas well by the lease or other means, or assigns shall pay in the lease on or before each of the anniversaries of said lease according to the rate shown; the per acre for the period operations are delayed, but such a royalty cannot be maintained by such payments for a greater delay than three years without the written consent of the lessee, payments as provided in said lease shall be deemed complete, when made or tendered by a deposit of the amount in the credit of the lessee in the American National Bank, Austin, Texas, and further providing that if said lessee shall sink a well and discover oil, gas or other minerals within the limits of time provided in paragraph 1 of this agreement shall be in full force and effect as long as minerals are found and produced in paying quantities.

SECOND.
That in said instrument the said W. M. Johnson was designated as lessee and the defendants, Howard and Tinsley as lessees. That said instrument and conveyance include the following lands:

Sections 31, 33, 35, 37, 39, all in Block 1; Sections 11, 15, 17, in Block 2; Sections 45, 47, 49, 51, 53, and 55 of Section 41, all in Block 4; the W. 1/2 of Section 27, 45, and 47, all in Block 5, all in the H. & G. N. R. Co. Survey, Reeves County, Texas.

THIRD.
That plaintiffs are the owners by mesne conveyance of the right title and interest of the said W. M. Johnson in and to said section 17, Block 2, and in and to said agreement in so far as it covers said section.

FOURTH.
That after the execution of said agreement the defendants Howard and Tinsley constructed the well in said section 17, Block 2, and the other defendants are claiming some right, title and interest in and to said lease agreement.

FIFTH.
That the defendants, Alfred Tinsley, John B. Howard, or said Sunshine Oil Corporation or the other defendants, did not comply with the terms of said agreement heretofore set out but made default thereunder. That they did not on or before the anniversary of said lease pay to plaintiff or their predecessors the sum of one dollar as an extension of the time of drilling on said land and have not paid said sum on or before the subsequent anniversaries thereof and did not on or before the anniversary of said lease, begin the drilling of a well on any of the land described therein nor have they begun such well at the time of the filing of this suit or paid or tendered any rentals.

SIXTH.
That three years has expired since the execution of said lease and plaintiffs and their predecessors have not agreed in writing for an extension of the time for drilling on said land.

SEVENTH.
That during the year 1920, the exact date of which is unknown to plaintiffs, the Sunshine Oil Corporation constructed a prospected rig and derrick on Section 15, described in said lease and proposed to drill what is known as the Grogan Well.

The same was not a bonafide effort to comply with said agreement, and said rig and machinery was neither designated nor constructed nor in condition to drill an oil or gas well on said land but was wholly unfit for such purposes; that after moving said derrick and rig on said Section 15, the said defendants did not drill said well with all haste to completion, but after a few months of inefficient and inefficient efforts they abandoned the work thereon at a depth of less than 900 feet and since said time have not proceeded further therewith, and no other well has been begun on said land by anyone at any time.

EIGHTH.
That defendants are claiming rights under said lease agreement to said Section 17, thereby clouding plaintiffs' title and destroying the market value of their said land.

Plaintiffs considered, plaintiff prays that the defendants and each of them be cited to appear and answer herein upon final trial, they are judgment cancelling said lease declaring same to be void and forfeited and removing the cloud created thereby from the plaintiff's title, for costs of suit and such other and further relief to which in law or equity, they be justly entitled.

Hence I do just, but leave to said Court, on the said first day of the next term, thereof, the writ, with your return thereon, showing how you have executed the same.

Witness my hand and the seal of said Court, at Pecos, Texas, this 18th day of August, 1922.

(SEAL) S. C. VAUGHAN,
Clerk District Court of Reeves County.
By H. P. KERR, Deputy.
No. 2348, in District Court, P. C. Chapman, et al., vs. Sunshine Oil Corporation, et al., Citation by Publication.
Issued this 18th day of August, 1922.
S. C. VAUGHAN, Clerk.
H. P. KERR, Deputy.

THE PECOS ENTERPRISE

PERSONAL

A. Holloway and family have moved to Toyah where Mr. Holloway has employment.

A. J. Curtis returned last week from Roswell, leaving Mrs. Curtis up there who writes that she is improving in health.

Miss Louise Wedley, who was one of the graduates of the Pecos High School last year, is in El Paso where she is taking a business course.

Mr. and Mrs. John Z. Means and Sam Means and Joe Evans of El Paso were Pecos visitors the early part of the week transacting business.

E. F. Fuqua has purchased the E. E. Dooley residence near the public school building. The deal was consummated through H. F. Anthony.

W. G. Smith arrived Monday from Shreveport, La., to be with his mother, Mrs. I. E. Smith, who is seriously ill, but reports today indicate she is improving.

Mrs. M. Rose, the accommodating and efficient librarian at the Carnegie Library rooms, left Saturday for a visit of two weeks to relatives at Bronsfield and Lubbock.

W. D. Johnson of Kansas City is here looking after business matters. Mr. Johnson is a capitalist and is well known over this section of the country where he has large interests.

The nurse's life is a strenuous one and the physical examination she must stand the Missions Hospital. She could not where she went to study nursing in early part of the week from El Paso.

B. A. Barrager moved his family over to Toyah this week. Mr. Barrager has for sometime been on guard duty for the T. & P. at Toyah as one of the Texas Ranger force. Mr. Barrager left four big dollars with the Enterprise so that he might keep posted on Reeves county affairs. The Enterprise commends these good people to the best people of Toyah.

Mr. and Mrs. R. T. Jones left last week for Pecos to make their home. Mr. Jones has accepted a position with the Pecos Mercantile Co. Their many friends in this city wish them much success in their new home.—Big Spring Herald.

The Enterprise joins in with the entire citizenship of Pecos in extending to them a cordial welcome to our little city.

S. D. Shipman, J. M. and W. J. Newton, all of San Angelo, were in Pecos Wednesday coming through the country in their car. They report fine rains as far as twenty-five miles east of Pecos. Mr. Shipman states that recently he has traveled over a good portion of Texas and much of the state of Arkansas and that Pecos and her people are in as good condition financially as they are anywhere. They are busted, he says, everywhere he has been.

Miss Olive Rhodes is home from a visit to relatives at Shasta Lake in Andrews county.

Mr. and Mrs. Amiel Otto have returned from a pleasant visit to Mrs. Otto's home folk at Roswell, N. M.

John A. Palmer returned the middle part of the week from a business trip in El Paso. Mr. Palmer is having his place of business repaired and shelving put in and will put in a store of groceries in addition to his restaurant. He will carry canned goods, coffee, tobacco, sugar, etc., and will open to the public again by tomorrow and will enable travelers to secure these goods at hours when the stores are closed in the evenings. Recently many travelers have been seen by the editor unting for places where they could buy provisions after the stores were closed. This place of business will enable such to secure what they need and will be a great convenience to them. John is a good hustler and sees the opportunity to make some money out of this trade and the Enterprise hopes he will realize his fondest hopes.

DINNER PARTY.

The Euzelian and the Y. W. A. Class of the Pecos Baptist Church was at home to the Fidelis Class of that church to a four course Dinner Party at the home of Mrs. E. L. Collings on Wednesday evening, September 20th.

The young ladies of the Fidelis Class were properly escorted to the party by the genteel young men of the Euzelian class. On arriving at the home of the hostess we were met at the door by the auspicious butler, Mr. Warren Collings.

After all the guests had arrived the butler announced that dinner was served. Then she ushered us into the dining room where we found everything ready. Our places were marked by very beautiful hand painted place cards which had been painted by one of our most efficient members, Mr. Amanda Bean.

The dinner was served by Mrs. Vernon Hicks and Mrs. E. L. Collings. The courses and toasts were as follows: Fruit cocktail which was followed with a toast of welcome from our most capable toastmaster, Mr. Sybil Bowie. The response was given by the president of the Fidelis class, Miss Callie De Racy. Mr. Gus Richburg then presented us with the Class Aim, which was followed by the Class Penalty given by Mr. Amanda Bean.

The dinner course as served of fried chicken, cream potatoes, French peas, hot Parker House rolls, sliced tomatoes, olives, celery, and ice tea. After the dinner course conundrums were cracked and there was much merry making over the answers given.

The Salad was followed with a "Story of Irish Song," by Mr. Warren Collings. This was indeed a very interesting part of the evening. Lastly the desert was served which consisted of breuleigh and caramel cake. After the dessert there were toasts given to the young men who were going off to school. These were given by Mr. Viola Ward, Mr. Velma Buchanan, Mr. Ana Fuqua and Mr. Beatrice Bowie. A short business meeting was held and

officers were elected for the ensuing quarter as follows: Mr. Bowie, president; Mr. Ward, vice-president; Mr. Alexander, secretary; Miss Ward, reporter and Mrs. Collings, teacher.

This closed the dinner session and the young ladies went to the parlor while the young men lingered over their oriental fireworks.

This closed Those who participated in this very formal affair were these couples:

Miss Eva Richburg, and Mr. Amanda Bean; Miss Julia Ward and Mr. Gussie Richburg; Miss Tommie Ross and Mr. Viola Ward; Miss Callie DeRacy and Mr. Sybil Bowie; Mrs. J. M. Garner and Butler Collings; Miss Bobbie Bowie and Mr. Delma Alexander; Miss Etelle Hicks and Mr. Beatrice Bowie; Miss Betha Wilkins and Mr. Velma Buchanan; Miss Effie Fuqua and Mr. Ana Fuqua.

Then at the wee hours of the night we departed for our respective homes each one wishing that this occurrence could be repeated.

CLASS REPORTER.

THE CHURCHES

REVIVAL MEETING

The Revival meeting at the Presbyterian church is under full swing and is growing in interest and power every day. Dr. A. F. Cunningham, the evangelist, is delivering some strong messages on the great fundamentals of the Christian religion. Every citizen of Pecos ought to hear these sermons.

Mr. L. C. Cunningham, the singer, is proving himself a good song leader and soloist, and it will do your soul good to attend these services.

The meeting will continue on into next week, and a very cordial invitation is extended to the public.

AT THE METHODIST CHURCH

Rev. J. C. Jones, presiding elder of the Roswell District of the Methodist church, will preach at the morning hour for us.

Preparations for promotion day in Sunday School are going forward and we look for good attendance due to that and the cooler weather. Already there has been a perceptible increase in attendance. Leagues meet at 7:00 p. m. that they may get through in time for services at the revival.

The annual conference entertainment preparations are progressing most satisfactorily, and we expect to be ready Oct. 3 for a full attendance of delegates.

L. L. THURSTON, Pastor.

Ladies calling cards neatly printed at this office.
