DEVOTED TO THE INTEREST OF FRIONA AND PARMER COUNTY

Vol. 12

FRIONA, PARMER COUNTY, TEXAS, FRIDAY, APRIL 8, 1938.

No. 36

COGITATIONS and APHORISMS of JODOK

From what I have been able to pick up on the street corners, it appears that the American Legion boys, in their efforts to raise funds for the building of their proposed new home, are meeting with considerable by the suggestions from some people that they are just wanting to build another dance hall in Friona.

Well, if I get it straight, the boys have no intention of doing anything of the sort, and do not propose to establish any dance hall in connection with their new home—that is, what is considered a public dance hall; and they further state that the dances that are given here from time to time, are not under the auspices of the Legion, but are given by the owner of the building, who has a perfect right to do so.

I am not opposed to dancing, and from my view point, the only harm that comes as a result of dancing is that which some of those who attend them make of them, and people can make harm of any kind of an institution if they so desire and try. And when the Legion boys get their new home completed and wish to enjoy a social hour at dancing therein with their wives, sisters and sweethearts, I can see no reason why they should not do so. Surely these boys have gone through enough while in the service of their country, that they should not be denied a few hours of occasional pleasure if they do not beset any harm to themselves or their community.

The American Legion, as an organization, has some of the noblest ends in view for the good and happiness of the world, of any organization I have heard of. For instance, their proposed May Day drive for the benefit of all sick and crippled children, and for social work has under consideration a plan for a local "clinic." I believe that is what is called, for the benefit of such unfortunate little ones right here in our own community. If I have got this wrong, I will try to get it straight and make any necessary corrections in my next week's column.

The cold snap we had the latter part of last week, has just about ended our prospect for a peach crop here this year. It just got cold and kept on getting cold until it got too cold for the peaches to stand it any longer, so they are "blown up" here for this season; although some of our people say they still have some live peaches on their trees, but the way it feels as I am writing this, it stands a good chance of getting the rest of them tonight, for the wind is whistling from the north at a pretty fair clip.

I noted as I stand on the street corner or saunter along from one side of the block to the other, about Hitler's dictators up over in Germany, and I do not hear anything very nice said about the "Führer" either.

Well, I do not have any love nor longing for any such kind of government, and I will oppose it with all my might, ever being adopted in our good old "United States" at any time either now or in the future, no matter how distant. But—

If the people over in Europe like it and want it, so far as I am concerned—let 'em have it. And that seems, so far as I can understand the situation, is just what they are wanting, judging from the alacrity with which they submit to it, and the cheerfulness with which they accept it, and apparently welcome it.

And, so long as they keep their hands off our great and free country, I say, let them alone and let them fight it out to their own satisfaction.

And that is just why I am opposed to any radical changes in our present form of government or its methods of administration. It just occurs to me, that every change that is made in that direction, just makes it a little easier for these European forms of government to slip into the United States and undermine and supplant our form of government, and while I do not accuse any of our present political leaders of any such designs, there are plenty of men in these United States, who would be ready to jump at any feasible or probable opportunity of seizing the reins of government and turning everything to suit their own ideas, and they would easily gather a mighty strong following by the mere promise of political or monetary gains.

Now, I am not "belly-aching" nor

A Cold, Dry Norther Worst Of Season Hits Here. Fruit Perhaps Lost. Wheat Considered Safe

RESULTS OF CITY ELECTION

While the city election held here Tuesday for the purpose of choosing a set of city officials for the coming two years, was not of a nature to cause any undue excitement, there was, nevertheless, a condition of mild and good-natured opposition due to the fact there were practically two tickets presented on the ballot. In other words, the voters had the privilege of one of two choices for each office, with the exception of the office of Corporation Judge, for which office D. H. Meade had no opposition.

There were 83 votes cast with the following results:
For Mayor:
P. W. Reeve, 42.
J. A. Blackwell, 34.
G. B. Buske, 1.
H. G. Morris, 5.
For Commissioner:
P. L. Spring, 60.
Carl C. Maurer, 45.
T. J. Crawford, 25.
O. P. Lange, 20.
For Corporation Judge:
D. H. Meade, 83.
For City Marshal:
C. M. Jones, 61.
Carl E. Hall, 30.

The above figures or results were taken from the official statement as taken from the election tally sheets, and shows a safe majority of the votes in favor of the present city officials, and since there was a fairly representative vote cast, it shows conclusive evidence that the people are satisfied with the services these officials have rendered them during the past two or four years, as Mayor Reeve and Commissioner Spring have just completed two terms of service as members of the City Commission. But it is just to say that regardless of who might have been elected from the ballot, the city's affairs would still have been in charge of some of its most faithful and interested citizens.

WILL SEEK SHERIFF'S OFFICE

In this issue of the Star will be found the announcement of Chas. Lunsford, of Friona, who thereby becomes a candidate for the office of Sheriff and Collector of Parmer County, subject to the Democratic Primary Election.

Mr. Lunsford is well known in all parts of Parmer County, he having lived in the county for the past twenty-one years, and having been in the automobile business as salesman during the greater part of that time, has come in contact and made the acquaintance of people all over the county, and has the distinction of enjoying the friendship of all with whom he has done business. He is a consistent member and supporter of the Church of Christ, and has an active interest in all public matters pertaining to the welfare and progress of our people.

If elected to the office to which he aspires, Mr. Lunsford will give his faithful attention to the performance of all the duties incumbent upon that office and render an impartial service to all the people of the county.

FRIONA HAD SMALL FIRE

The usual peace and quiet of our little city was somewhat disturbed Monday when the fire alarm was given and most of our people downtown, who had cars, started driving to the scene of the fire which was found to be at the home of Mrs. O. Sheets.

Sheets Brothers, Obie, and Chester, had a small bin filled with grain, which had become ignited, supposedly from a kerosene burning brooder stove, and was blazing ravenously when discovered.

NEW IRRIGATION WELL BEGUN

Word has reached the Star office to the effect that Mr. McGree, who owns a half section of land about three miles northeast of Friona, has begun the work of sinking a water well for irrigation purposes.

The work was supposed to have begun on Monday, and we have heard no reports to the contrary, and it is, therefore, presumed that the work of drilling is now well underway.

THE SCHOOL ELECTION

The annual school election held here last Saturday for the purpose of choosing three members of the board of trustees, while not really hotly contested, was nevertheless the cause of a little more than ordinary interest among the voters of the district.

There were six candidates for the three positions, three of whose names were printed on the official ballot, they being T. J. Crawford, J. D. Buchanan and Lonnie McFarland. The names of the other three candidates had to be written on the ballots, they being G. B. Buske, Charlie Turner and O. C. Jones.

There were in the neighborhood of 150 votes cast, with the following results: Crawford, 81; Buchanan, 78; McFarland, 65; Buske, 55; Turner, 40 and Jones, 40; and Crawford, Buchanan and McFarland were declared elected.

VISITED HOME FOLK

Misses Reba and Roberta Hill were the weekend guests of their parents, Mr. and Mrs. S. Michell and their small brother, Carl Michell, they having come in at this particular time to see Carl, who is just recovering from a severe case of the measles.

Miss Reba is one of the teachers in the public school at Hale Center, and Miss Roberta is employed with one of the telephone companies at Dallas, and this was her first visit home for nearly a year. Both of the girls are graduates of the Friona High School, and are doing well in their respective positions, and their Friona friends, who had the opportunity of meeting them during their brief stay, were glad to see them.

BABY HAS PNEUMONIA

Mrs. Verbin Isham, of near Beeson, took their baby to Amarillo for medical treatment, on Friday of last week, and on arriving there it was found that the little one was suffering from a severe attack of pneumonia, according to word received Saturday by the child's grandmother, Mrs. C. C. Boren.

HAVE EMPLOYED STENO- GRAPHER

H. G. Morris, of the Buchanan Implement Company, announces that his company has secured the services of Miss Pearl Houlette as stenographer.

Miss Houlette took charge of her duties in the company's office last week, and will continue there permanently, but still devoting a part of each day to her school work. She is a daughter of Rev. and Mrs. E. E. Houlette of this city, and on of Friona's most highly esteemed and capable young ladies, and her friends extend their congratulations.

Miss Bertha Price, of Spur, is here visiting friends.

LUNS福德 FOR SHERIFF

I hereby make my announcement to the voters of Parmer County, Texas, as a candidate for the office of Sheriff and ex officio Assessor and Collector of Taxes, subject to the decision of the Democratic Primary Election to be held on the 23rd day of July, 1938.

In presenting my announcement and my plea for your support at the election, I will state that I have been a resident of Parmer County for the past twenty-one years, practically all of which time has been spent in the automobile business.

JACOBS-GIBSON WEDDING

The marriage of Miss Ghita Jacobs to Bill Gibson was solemnized at the home of Mrs. V. E. Adams, Sunday, April 3rd, 1938; Rev. R. E. Jones officiating.

MADE SEMESTER HONOR ROLL

Miss Geraldine McFarland, daughter of Mr. and Mrs. J. B. McFarland of this community, who is attending the Texas Tech College at Lubbock has made the fall semester honor roll with an average grade of "B."

JUNIOR WOMAN'S CLUB

On Tuesday night, April 6, members of the Junior Woman's Club were hostesses to former members of the club and to the Friona Woman's Club, at the Congregational Church basement.

At 7:00 o'clock a luncheon was served to twenty-three members of the Junior Club and Friona Woman's Club and to the guest speaker, Mrs. J. W. Walker of Plainview, who is the District president. The welcome address was given by Mrs. W. H. Ford, and this was followed by a round-table discussion led by Mrs. James Bragg. The main subject of the discussion was the Permanent Headquarters at Austin, and Mrs. Walker gave a very interesting description of the building and its uses.

MRS. J. H. BLEWETT

The sad information was received here early in the week of the death of Mrs. J. H. Blewett, which occurred quite early Monday morning at a hospital at Fort Worth.

The Star hopes to be able to give a more complete obituary in next week's issue.

COUNTY FORENSIC REPORT

AMERICAN LEGION NEWS

By ROY PRICE

The American Legion's greatest days are ahead. Its principals calling for vigorous peace time service command it all. It is far better to explain why you are a Legion member than to attempt to tell the reason for not being. The Legion invites you to join now and be one of the active legionnaires of your community. Without the Legion emblem your neighbor has no way to tell and command you for the great service rendered in the past, for which every veteran should feel proud of and people are prone to forget.

Some say well the method of entertainment and the dance does not suit. It is true the Legion post at various times in 1934 and 1935 did carry this on a few times. Which we regret very much but you know the human nature of people is sometimes very weak and does things that are regrettable; but in the end they are willing to be corrected. I will say here and speak the sentiment of 95% of the members of the Friona Post we do not and have not sponsored any dances or received any money from that source in the past several years and you that are under that impression are just a bit wrong in the interpretation of this unjust claim and when we launched our building program here to make this as clear as possible we are not building a public dance hall, and at the present do not have any idea of ever building a dance hall. The thing we want is to build a Legion Home where we can take our children and wives and have a good social gathering, prepare to carry out the various programs for the betterment of our home and community and where we may have a place to keep our records and everybody in the community should be proud of this kind of a home.

I might make mention of some of the things here that the American Legion has and is now working day and night to do, Child Health Day, Boy Scouts, Girl Scouts, educational welfare, widows and orphans, disabled veterans, safety driving, school for all children, clean up campaigns, public health programs, Red Cross aid to all sufferers of any disaster, and too, we have played a very active part in keeping the country out of war, and too, we might add without any doubt at the present time, if the American Legion had not taken the lead we would now be in a great war. However, the Legion is not going to keep us out of war and does not claim to, but it is doing everything in its power to remove the causes, and has succeeded in a great measure, to the sorrow of the financial world, and we have been accused by this type of people of being treasury raiders and everything imaginable. It is true we have demanded aid for those that were crippled for life and it has cost the average tax payer possibly \$1.00 per year. I mean those who actually pay taxes of fifty to one hundred dollars a year. The man who does not pay taxes does not pay anything, and is sometimes the hardest knocker, but say it actually does cost. We are in this time in a mad rush for money and are, through the present farm programs, doing a tax on our people more than the 20 years active service of the American Legion and has not accomplished one thing for the betterment of humanity. We are now below the 1933 parity prices in values and seem to still be going. Yes, it has kept us alive, but since the Birth of Christ there has been famines and disasters and the like and people that kept their head and endured, lived their time and came out all in fine shape. History repeats and so do depressions, so do not get alarmed one of these days to wake up and find that all the things the American people have died and fought for in the last 19 hundred years, truly gone, and we, the American people, have let a few dollars and cents do this, and without some one to take the lead in this great America to defeat the movements and have this thing revised we are a failure, and it is these great principals of justice we are now being denied the people that the Legion is now making and demanding every able bodied American to wake up and take action. And the best way in which to

SYNOPSIS

In Spanish-governed California of 1783 a conflict between Church and State is represented by two friendly enemies, trail old Fray Junipero Serra, Franciscan missionary, and Don Pedro Fages, civil governor. After telling Serra he is sending to Mexico for his wife and son, whom he has not seen for eight years, he refuses his aid toward founding the Santa Barbara Mission. Dona Eulalia agrees to go to California, accompanied by her duenna, Angustias. Don Pedro sends for Serra, telling him that two priests are on their way from Mexico with Eulalia and young Pedro and that he is leaving to meet them. Fages engages a young Indian girl, Indizuela, as maid for Eulalia. Eulalia sails from San Blas. It is a desolate trip. From the port of Loreto, a large cavalcade loaded with Eulalia's party starts out for the long overland trip. Eulalia, accustomed to luxury and comfort, bitterly regrets having been persuaded to come. The two priests, Fray Mariano and Fray Bartolomeo, call on her and arouse her suspicions as to their genuineness. As the cavalcade stops at various missions, Eulalia hears rumors of the approach of her husband. While Don Pedro plans a great festa to welcome his wife, Eulalia plans her costume. Don Pedro welcomes his beautiful wife and young son. Eulalia is teased as the Queen of the Californias. On the long journey to Monterey, the reunited couple are royally entertained at the Presidio at San Diego. Eulalia disapproves of the democratic relations of Don Pedro and his people. Pleading weariness in the midst of the feast she goes to bed where Angustias tells her she knows Eulalia is again to become a mother. Don Pedro is disturbed by the developments in the character of the priests and dreads Serra's disappointment in them. Limping from mission to mission, Father Serra has a vision of St. Francis and tells his saintly master that he will be ready to join him when Santa Barbara Mission is founded. Meanwhile Eulalia finds there is a conflict between Serra and Don Pedro and plans to use the priest as an ally.

Indizuela. Um-m. Rather pretty. Some Spanish blood in her background undoubtedly. She would have to inquire, very carefully, about Indizuela. At least she was adequately clothed. La Gobernadora sighed and stared out at the presidio basking in the spring sun.

"So this is the place," she reflected. "This is the Royal Presidio of San Carlos de Monterey. That hut in the center of the enclosure is no doubt the royal chapel. I can hardly believe there were manifestations of joy and thanksgiving when this place was founded or that bells rang, masses were celebrated and congratulations published all over Spain and Mexico."

As Eulalia gazed broodingly across the bay, she knew, suddenly, that this was the first of many hours she would pass so. Hours when she would strain her eyes futilely, watching the bay of Monterey, hoping for a ship to arrive with news from the world, and fresh faces, longing for a break in the deadly monotony of life in the Royal Presidio of Monterey.

"No!" she exclaimed so suddenly that Escabellito jumped. She pushed him aside with her foot, and stood, hands clenched at her sides. "No! I will not live the rest of my life like a captive in chains, or a wild bird caged! I will escape."

She went into the house. After the blaze of sun shining on the sandy parade-ground before her house, and on the gleaming white-wash of the walls and houses she was blinded for a moment. When vision returned she paced slowly through the six rooms of the Governor's palace.

CHAPTER XI—Continued

"Ah, La Gobernadora," said the priest. "Your prayers are answered too, Don Pedro." His words to her were simple, a welcome, a blessing. Then she was on her mount again. Dimly she heard Pedro presented to the padre, and others talking. But she was silent, as though under a spell.

"Good Father," the Governor was saying, "you must mount my horse and we will all ride into Monterey together. Come, up with you."

Fray Junipero drew back. "Ah, my son, you know I never ride. I still have the legs God gave me, though one of them is not very good."

The Governor threw his reins to a body-servant. "Then with your permission, Padre, I will walk with you."

"Yes, yes. And my two Brothers-in-God! Where are you, my Brothers?" He looked around him. The two friars who were muttering to each other joined him with sanctimonious smiles. Again Serra put his arms about them. "We will walk together, this way, Brothers, I the older in the center, with two strong good young trees like yourselves to lean against, eh?" he asked delightedly. The others acquiesced in embarrassment.

Young Pedro slipped his hand into his father's and walked beside him. The Governor looked at his lady, so still and white on her white horse.

"My dear," he began. She smiled at him, but addressed the priest.

"I too, would walk with your Reverence, but," laying a hand on her heart with a dignified, significant gesture, "you see how it is with me."

The priest returned her smile and raised a hand to her.

"But I will follow slowly behind you, if I may."

CHAPTER XII

The Governor's lady sat in a great hand-made chair of native sycamore wood on the porch of her new home, basking in the warm sunshine. Her feet rested on Escabellito, who lay eying Chichi, tethered to one of the upright logs that supported the thatched roof of the porch.

From within the house came sounds of bustle and fuss, and Angustias' exasperated voice as she and the maids, with the help of a couple of Indian girls, strove to dispose of the contents of Eulalia's trunks and chests which crowded the small house.

The arrival had been exciting. For some time before they, Padre Serra, the Governor, young Pedro and herself, had reached the presidio, they could hear bells ringing, volleys of shots, singing. As they drew nearer they could see moving figures, black in the glow from great bonfires built in the center and four corners of the walled presidio. It was all too confusing for her to get any definite impressions of the place or of the people that crowded about her. Only two personalities remained with her. One was a round, dark, officious little man, presented by her husband as Captain Nicolas Soler. The other was an Indian girl, about fifteen, who was awaiting them in the house. The girl had glanced casually at La Gobernadora, then kept her eyes on the Governor. He had patted her head and called her Indizuela.

Eulalia frowned and kicked Escabellito slightly as he slapped Chichi, who was reaching tentative exploratory fingers toward the small Indian's thatch of long hair.

Fray Junipero Drew Back.

sideboard, table, benches, and one window looking out into the kitchen garden. Next the dining-room, a bedroom, Angustias'; across the hall a chamber for young Pedro, and another for the Governor and his lady.

She went into her bedchamber and found Angustias, her maids and the Indian girls in a state of confusion.

"Ah, my lady!" exclaimed the duenna, "if you could only give me some word of advice! Where shall I put this stuff? There isn't room in the house for it all."

"Angustias," said Eulalia, her voice trembling, "I can't tell you what to do. It seems to me we shall have to live here like a soldier's family. Do our cooking in the middle of the floor, eat with our hands, and throw scraps to the dogs. The Governor's palace, indeed! It is only fit for a soldier's woman, and her brood of dirty brats."

Angustias saw the need for firm action.

"I admit it isn't much of a place," she said, beginning to stir about briskly. "But we will do the best we can. Your clothes of course, can remain in the chests, and they can be pushed back against the walls." She began pulling things about. "And these can go in the sala, and these in the dining-room, and—"

"Al, al, Angustias! Stop it! Listen. Unpack only the clothes that I need for the present. As for the other things, leave them alone. What is the use of unpacking them? I will not be here long."

Angustias stopped. "What do you mean, m'na? Not be here long?" She stepped over and looked anxiously into her mistress' face. "Do you feel ill? Do you feel that you are going to—die? When your time comes?" Eulalia laughed nervously.

woman on the shoulder and walked out into the sunshine again.

She became aware of a little flurry among the soldiers at the gate. A man was riding into the enclosure, his clothes and horse a bright spot of moving color. Across the parade-ground he moved toward the palace, his mount curvetting and caracoling spiritedly. He pulled up before the lady in the big chair and, swinging off his hat, bowed low, much to her surprise. Then she recognized him.

It was Capitan Nicolas Soler, whose face she remembered from the evening before. He was all smiles and bows, and made not an unhandsome figure in his gay clothes, raiment which looked rather strange to Eulalia as she had not been in California long enough to become acquainted with the singular and characteristic style the Californian gentlemen had adopted.

"Greetings to you, Senora la Gobernadora!" he cried. "I know your Excellency is not receiving visitors as yet, but I have made so bold as to come and call nevertheless. You will not be so unkind as to send me away?"

Eulalia smiled. "If it is the custom of ladies in California to receive early visits from gentlemen while their husbands are busy, I suppose you may, Capitan Soler."

He dismounted and walked toward her. He was short and broad for his height, and Eulalia had a rapid impression that he looked like a fighting rooster, with enormous silver spurs springing from his heels like a game-cock's.

Again he bowed ceremoniously and kissed her hand. Then, when the lady gave him permission, he sat near her feet and leaned against a post.

"I do not know what the customs of the ladies are in California," he said chattily. "Anything that you may do, any precedent you may establish, will be followed by all the women in the province. For you are the First Lady, and the officers' wives will follow you. Oh, of course, they are ladies, too. Little ladies. You are a grand lady. And now California society will be changed. And if I have helped you make it a social rule that poor bachelor officers may call on the ladies while their husbands are away, I think that is very nice."

Eulalia was pleased. "I think you put a great responsibility upon me," she said charmingly. "But I must admit I have no social aspirations toward California. It would be an empty honor to be social leader over some Indian girls—and some soldiers' women."

"Ah, Senora la Gobernadora, out you will be surprised at the social life that goes on here!"

Eulalia raised her brows.

"I will indeed. Is it possible? What is there to do?"

"Well, we have picnics and barbecues in the woods around us here; or on the beach, close by, is a place where there are mussels and clams to be gathered. We go there, the Indians gather the shellfish, and we cook and eat them. Then we have parties in the different little houses—dancing, music. Or we visit the Presidio of Santa Barbara or of San Francisco, and have fiestas. Ah, indeed," he concluded with a shade of sarcasm, "we are quite gay."

Eulalia looked at him in surprise. Was it possible that he was actually pleased with such bucolic pleasures?

"But no receptions, no theaters, no opera—no music?" she asked.

"Certainly not, Senora la Gobernadora! Why, Senora, I do not believe you realize that this—and he waved his hand about the presidio —is all there is to the capital of California."

"I don't believe I do, Capitan

Soler. No, I'm very sure I do not. I am still expecting to see something that looks like a capital city."

Soler leaned closer to her and lowered his voice.

"You do not like California?"

Eulalia started, but he went on rapidly.

"No, you do not like California, I can see that. And I do not blame you. It is no place for a lady of your culture or your beauty, one used to the life you have had. It is cruel for the King to insist that the Governor should be a family man, and bring his wife to this country."

A trumpet called across the presidio. The great gates swung open and the Governor of the Californias rode in with a party of horsemen. He dismissed them and entered across to the palace. Soler rose to his feet and saluted his Excellency.

"Well," said Don Pedro, "calling on La Gobernadora early. I see."

Soler cast a quick glance at the lady.

"Yes," he replied shortly. "I saw her Excellency sitting alone here and came to pay my respects. I must be going now. I trust I have not bored her."

"Not at all!" chimed Eulalia. "I have enjoyed your conversation. You must call again."

The Capitan bowed again, and swung on to his horse.

Don Pedro called in at the door, "Indizuela!" When she answered he spoke in the Indian dialect, and they laughed. She brought him a chair, and wine in a cup. He threw himself into the chair, stretching out his legs with a sigh, and drank his wine in thirsty gulps. Eulalia fidgeted.

"Why were you so rude to Capitan Soler?"

"I do not like him."

"Why?"

"I never dislike anyone without reason. He is an officious, meddling, ambitious upstart."

"Is that all?"

"No. But why talk about him? I am at home now, would rather talk with my beautiful wife. Look here!" He pulled a sheaf of papers from his wallet. "These papers arrived for me on the San Carlos."

Eulalia started. "The San Carlos! Where is she?"

"Oh, she has come and gone again, back to Mexico."

"Ah—she has," Eulalia sighed. "She has gone."

"Yes, but there are plenty of documents for me to look to now." He opened a rattling paper and read it while Eulalia stared across the lonely bay.

A soldier, riding up to the palace, looked at the Governor in amazement, and saluted.

"Your Excellency, here are the letters that you left behind you in your office."

"What are they?" demanded Eulalia as soon as the soldier was out of sight.

"Letters from home, for you," answered Fages, putting them in her lap. "The San Carlos left them."

"And you had them in your office—wherever that is—all this time and forgot to bring them to me? How could you? How could you when you know how hungry I am for news from home, and how long it has been since I have had any? Oh, I do not see how you—"

But the Governor with a muttered excuse jumped on his horse and rode across the presidio to his little office by the great gate.

For hours La Gobernadora sat reading avidly. Letters from her mother, and from friends; accounts of dancing parties, theater, opera, moonlight horseback picnics, new clothes, gossip of this one and that; all the gay life of the gay capital of Mexico. And she, isolated in this California, read and reread every word.

Intelligence of Twins Compared by Science; Physical Traits Studied

The most fascinating phases of twin comparisons are, to the majority of us, those having to do with intellectual traits, writes D. Cecil Rife in the Scientific American. The relative importance of heredity and environment in mental make-up has been for centuries, and still is, a topic sure to arouse a lively discussion in most groups of civilized mankind. Have twin studies shed any light on this question?

Considerable research has been done in this field, by numerous investigators. There are certain difficulties, however, which are not often encountered in the study of physical traits. We cannot be sure whether a given mental test measures only innate learning capacity or whether part of the responses are the result of education and training. Then, too, the person tested may or may not respond to the best of his ability.

There are certain tests, such as the Simon-Binet and its revisions, which have been thoroughly studied by psychologists over a period of years, and have been shown to be

fairly valid measures of general learning capacity.

Hundreds of twins reared together have been given general intelligence tests, by various investigators. The average inter-pair difference obtained for identical twins is approximately five points in I.Q., an insignificant figure. On the other hand, fraternal twins show, on an average, intra-pair differences of from ten to twelve points, which is a significant difference. The obvious conclusion from such results is that intelligence is, to some degree at least, dependent upon genetic make-up.

Offerings to Moon

The day of the full moon in Japan is a great day for the poets, real or fancied, as well as for those at all mindful of ancient usage. A temporary altar is placed on the veranda or where the moon is likely to shine, laden with offerings to the moon, beans, cucumbers, chestnuts, persimmons, as well as 15 white dumplings, made of rice, symbolic of the fifteen-night moon.

Just a Little Smile

ENTERPRISE

"Almost every man can find work if he uses his brains," asserted the man who had traveled a good deal. "That is, if he has the ability to adapt himself like the piano-tuner I once met in the Far West."

"We were in a wild, unsettled country, and I said to him, 'Surely piano-tuning can't be very lucrative here. I should not imagine that pianos were very plentiful in this region.'"

"No, they're not," said the piano-tuner, "but I make a pretty fair income by tightening up barbed-wire fences."—The Kablegram

Presence of Mind

Railroad Detective—Now then, brother, what are you doing with all these towels in your grip?

Passenger—Why, officer, if you'll call the Pullman conductor, I was about to give them to him. They are some I used the last time I was on this train. I had them washed and brought them back.

Strangling Trade

Prisoner—Yes, sir, competition brought me here. The government came into my field and ruined me.

Visitor—Poor man! How was that?

Prisoner—I was a manufacturer of half-dollars.

ON A BUDGET

Mr. B.—Here's a story about Circe, the woman who changed a lot of men into hogs. Wonder why she did that.

Mrs. B.—I reckon pork was bringing a good price and she couldn't afford to have a lot of good-for-nothing men hanging around.

Miss, Misses, Mrs.

The sweet young thing happened to meet the young fellow with whom she had romanced the year before.

"Sorry," murmured the gal, bitterly-sweetly, "I didn't quite get the name?"

"It wasn't your fault, sister," retorted the young fellow. "You tried hard enough!"

Dizzy Dialogues

"What's that, waiter? Steak all gone? Bring me some chops."

"Sorry, sir. Chops all gone, too."

"Then I'll have stew."

"Stew's all gone, too, sir."

"What a restaurant! Gimme my hat!"

"Heh, neh. That's gone, too!"

Asking Too Much

Salesman—Here's a radio guaranteed to bring in anything any time of the night.

Mrs. Nitout—I'll take it if it will bring in my husband before midnight.—Stray Stories Magazine.

Nero May Be Vindicated

"An experimenter extinguished a candle flame by playing a high note on the violin."

"Hum! Then it may develop that Nero has been unjustly censured!"

Night Rate

Tourist—How much are your rooms?

Night Clerk—From \$6 up to 12.

Tourist—How much for all night?

AN OIL BURNER

"Tom thinks he's a particularly bright social light."

"Not any longer—he's been turned down."

Clean Hands

Teacher—Now, I want you to notice how clean James' hands always are. James, tell the class how it is that you keep your hands so nice.

James—Ma makes me wash the dishes every morning.

Wistful

"Your temperature seems to have taken a drop," remarked the doctor, visiting his patient.

"Can't you fix it so I can do the same, doctor?" pleaded the patient.

CLASSIFIED DEPARTMENT

RECLEANED KOREAN LESPEDeza \$1.50 per bushel. Literature and samples free. R. V. HORNBY, Neodesha, Kans.

HOMEWORK

WOMEN—Address and mail advertising material for us at home. We supply everything. Good rate of pay. No selling. No experience necessary. MERCHANDISE MART, Box 222, MILWAUKEE, WIS.

REMEDY

ASTHMA If suffering with Asthma or Bronchitis use FELASCU—contains no narcotics or opiates. Many satisfied users—what FELASCU has done for others—it should do for you. Send \$1.00 for regular size bottle of FELASCU—we will mail it post paid. Satisfaction guaranteed or your money returned. Use FELASCU. Learn why it satisfies. FELASCU LABORATORIES, INC. Box 303 Dept. W, La Crosse, Wis.

Filet Crochet for All to Admire

"Such lovely lace!" your friends will exclaim and they'll never guess how little it cost! You'll want to gather up crochet hook and some string and begin at once on this charming chair or buffet set and pillow to match. Quickly and easily done in filet crochet, the peacocks and roses

are prettily "set off" by an open mesh. Practical—lasting—exquisite, the chairback may be repeated and used as scarf ends. They all make splendid gifts. In pattern 5975 you will find complete instructions and charts for making the set and pillow top shown; illustrations of all stitches used; material requirements.

To obtain this pattern send 15 cents in stamps or coins (coins preferred) To The Sewing Circle, 250 W. 14th St., New York City.

ARE YOU ONLY A 3/4 WIFE?

Men can never understand a three-quarter wife—a wife who is lovable for three weeks of the month—but a full wife is lovable all year. No matter how your back aches—no matter how loudly your nerves scream—don't take it out on your husband. For three generations one woman has told another how to get "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure. Make a note NOW to get a bottle of Pinkham's today WITHOUT FAIL from your druggist—more than a million women have written in letters reporting benefit. Why not try VITALITY PINKHAM'S VEGETABLE COMPOUND?

WNU—H 14—38

GET RID OF PIMPLES

New Remedy Uses Magnesia to Clear Skin. Firms and Smooths Complexion —Makes Skin Look Years Younger.

Get rid of ugly, pimply skin with this extraordinary new remedy. Denton's Facial Magnesia works miracles in clearing up a spotted, roughened complexion. Even the first few treatments make a noticeable difference. The ugly spots gradually wipe away, big pores grow smaller, the texture of the skin itself becomes firmer. Before you know it friends are complimenting you on your complexion.

SPECIAL OFFER —for a few weeks only

Here is your chance to try out Denton's Facial Magnesia at a liberal saving. We will send you a full 6 oz. bottle of Denton's, plus a regular size box of famous Mulsea Wafers (the original Milk of Magnesia tablets)... both for only 60c Cash in on this remarkable offer. Send 60c in cash or stamps today.

DENTON'S Facial Magnesia

FOTO-FEATURE

The city milkman leaves home at midnight and starts delivering about 2:30 a. m. He finishes work at dawn. Note the rubber tires, a noise-abating device.

'Any Milk Today, Lady?'

IN EVERY city, village and hamlet lives the milkman, an unsung hero of sleepy streets and the cold, gray dawn. He works at night when the world is off guard and danger most imminent. He is a magician who transforms the empty bottle on your stoop into a quart of rich, health-building milk. But he is also human.

In metropolitan centers young sophisticates are old friends of the milkman, who meets them returning from their gay rounds of pleasure. Not all encounters are so pleasant, however. He often chases burglars, calls the fire department and saves lives. Annually the Milk Industry Foundation awards Pasteur medals to milk workers for distinguished service. Example: E. R. Johnson, Chicago milkman, who rescued a 10-year-old child from a sewer manhole.

Milk goes everywhere, by every conveyance. This man delivers on an underground route to his customers in the Lincoln tunnel between New York and Weehawken, N. J. Workers everywhere await the milkman each day.

His only companion of the dawn is the policeman on his lonely beat. Each of these men has his duty to perform and often they co-operate. Many a milkman has tipped off many a policeman to some suspicious situation a few blocks back. The law and the sleeping public have grown to depend on the milkman as a sort of nocturnal guardian whose side-job is delivering dairy products.

Every community in northern United States has seen the above picture's counterpart . . . the milkman making his rounds through deep snow. And every city "cliff-dweller" can appreciate the situation at the left . . . a milkman contemplating the immense job of making deliveries in a modern metropolitan apartment building. Milk goes by skis, too (right), as the resourceful delivery man employs the most convenient means of distribution. Below: Even canoes are used.

When floods raged through Ohio during the spring of 1937 make their deliveries, illustrating their important regard for their jobs. Right: Delivery to a gang of bridge builders.

MILK DISTRIBUTION THROUGH THE YEARS: First, from a tin can to customer's pitcher; next, to glass bottles with corks; and today, bottled and sealed, scientifically, sanitarly.

STAR DUST
Movie • Radio
By VIRGINIA VALE

SYLVIA SIDNEY has just finished a picture called "You and Me," with George Raft, for Paramount, but she's not much interested in it—that is, not so much as she is in several other things.

The house she has just bought in New Jersey, near Flemington, for instance. It's very old, and she is having the usual trouble with remodeling, which never goes fast enough. But she's also having adventures with it.

For instance, some 12 coats of paint had been put on the dining room, during all the years—and when they were removed beautiful old pine paneling was discovered beneath.

Furthermore, the land is good farming land, one hundred and sixteen acres of it; grows good crops of wheat, oats and alfalfa.

Irene Dunne has formally adopted the little four-year-old girl who has been living with her for the last year; she took the child from the

Irene Dunne

New York Foundling hospital, not from the Cradle, in Chicago, which is the fashionable place to get babies.

Jean Arthur is coming back to the screen, after a year's absence due to her private battle with Columbia. She's been vacationing in Yosemite, but will go to work soon in the screen version of "You Can't Take It With You," the delightful play which has been having such a long run on the New York stage.

Gene Autrey is another star who has been having difficulties with his studio. In his case it was just a little matter of money.

Remember the fuss when John Charles Thomas refused to broadcast if he couldn't finish with "Good night, Mother"? Well, that same kind of trouble bobbed up on the Fibber McGee and Molly program, and the rules of the broadcasting company were broken.

Fibber was ending with "Good night, Molly," and was told he couldn't do it any more. But—"Molly" is the name of a character in the show, explained the sponsors, so it might logically belong there. In real life, "Molly" is the wife of Jim Jordan, the man who plays "Fibber McGee," and is just recovering from a long illness.

When the Radio City Music hall in New York holds a picture for a second week you may be pretty certain that the picture's a success, and one that you'll want to see. "Jezebel" made the grade recently.

Dolores Del Rio returned home with glowing tales of her vacation trip to Morocco, and a lot of souvenirs—perfume, jewelry, necklaces. Leaving Africa, she flew across Spain, and on to Paris, where she saw a lot of old friends and acquired a lot of new clothes. Dolores reported thankfully that she did not bring back any souvenirs of the civil war in Spain, nor of the threatening international situation in Europe, generally.

Dolores Del Rio

ODDS AND ENDS . . . Cary Grant had a novel present the other day—a bottle of old-fashioned cough medicine, which he really needed; from Katharine Hepburn . . . Renee Davis entertained Mrs. Roosevelt at Clark Row's "Tea, etc." . . . The Honors led in the 400, popularity poll conducted by the Motion Picture Herald, a trade paper for Hollywood . . . Rosemary Russell sets Joan Crawford's role in "Shop 'Til You Drop" because Joan didn't like it . . . George Brent has bought a kind of "New York Times" . . . Suzanne Ettinger's popularity rating is now on a par with Clark Gable's and Robert Taylor's . . . And Frank Taylor, Pauline Lord and possibly Franchot Tone will work together in "Northwest Passage" . . . Allen Jenkins and his wife picked Mexico City for their vacation . . . "Scaramouche" will be screened again . . . So will "The Sea Wolf," for the third time!

POLITICAL ANNOUNCEMENTS

The Friona Star is authorized to announce the following list of persons as candidates for the offices shown above their respective names, subject to the decision of the Democratic Primary Election, to be held on Saturday, July 23, 1938.

FOR SHERIFF

A. D. Hinson.
 EARL BOOTH (Re-election)
 CHAS. LUNSFORD.

FOR COUNTY JUDGE

Walter Lander (Re-election).
 LEE THOMPSON
 D. K. ROBERTS.

FOR COUNTY AND DISTRICT CLERK

E. V. Rushing (Re-election).
 A. M. EZZELL
 LEO McLELLAN.

For County Treasurer

ROY B. EZZELL (Re-election)
 E. G. (BLACKIE) WILLIAMS.

For County Attorney

A. D. SMITH.

For County Commissioner, Precinct No. 1:

J. M. W. ALEXANDER (Re-election).
 L. P. LILLARD.
 A. B. (BEE) SHORT.
 W. E. (TOM) PROST.
 I. L. (JIM) SHAPPER.

For District Attorney:

JAMES W. WITHERSPOON.

JODOK

any such motive, but I can see so much, even right here in this little city and community, that it makes me wonder sometimes as to just how far such a sentiment has permeated our social and political governmental structure.

I can remember, when during the World War, the saying or expression—"A War to End Wars," was heard on every side until it became a universal "hoo and cry" and to the extent that lots of good people believed and smothered their contempt for war with this idea that there was to be no more wars, and were thus led to lend their most powerful influence toward carrying out the war to its bitterest end. I was then as now, too dumb to understand how such a thing could be, but I had heard the expression—"Fight Fire With Fire," and I knew this could often be done with good effect, and I just thought this new idea was along the same line, and so I fell for it like the rest of the people did at that time; but now we see just how futile was the argument, and that the other old saying—"Like Produces Like," would have been more applicable in its sentiment, and we should have been saying—"A war to produce wars," instead.

Well! It just occurs to me that, in spite of all this uproar about unsettled world conditions, our scientists are still making some headway in many respects, and it just looks like one of my pet ideas may yet be realized, for I have long contended that "whatever man has brought upon himself, he should be also able to free himself from," and it seems that each new discovery of science is making the idea more feasible than ever before; and the latest and newest step I have read or heard about is the proposed Pasteurization of milk used for human consumption, which is now recommended by a group of scientists, representing what is known as "The Health Organization of the League of Nations."

It appears that they have found out that many of the ills to which humanity is heir to, are originated by germs that are found in much of the milk that is placed upon the market as "human food," and that when these germs are killed by Pasteurization, these diseases quickly disappear, and they say further that "raw" milk can never be regarded as perfectly safe for human consumption, for when produced

from perfectly healthy animals, milk is so subject to contamination from human and other sources that it must always be regarded in the raw state as a potentially dangerous article of food.

One of the worst objections to this process of Pasteurization is the fact that the expense of having this done will lessen the amount of profit to be received from it by farmer-distributors, or, in other words, the farmer or dairyman who places his own milk directly upon the market, since compulsory Pasteurization, which is recommended by the Organization, will create an added cost to the business.

Well! while all this is true that the farmer-distributor will have his net income somewhat reduced, I can see no reason why the American farmer should object to losing a very small portion of his profits, when by so doing he would help to preserve the health of the entire nation, and thus hasten the day when there will be no such thing as disease.

And, I also read about the many things that science is doing in the way of preventing accidents, and each successful step in this direction, just brings us a little nearer the goal of perfect freedom from accidental death. Then, with no disease and no accident, why any more death, for if a man just naturally dies from "old age" it is just naturally his own fault.

I have just received a letter from Ernest O. Thompson or some of his political advisers and helpers, which he is called the former red-headed "fighting Mayor" of Amarillo, and further states that he is in the race to become governor of our great State of Texas.

I do not know Mr. Thompson personally, but I have read lots about him and it all has been to the effect that he has a wonderful ability for getting any job done that he ever tackles, and that is a mighty good qualification for any man that aspires to become governor of Texas, for there is lots that needs to be done in our State for the good of the common people—for instance, a little less legislation and more enforcement. A whole lot less taxation and a whole lot more economy in government. These jobs, if accomplished, will do more good for the rank and file of the people than any other act of government that I can think of, and if Mr. Thompson is in favor of getting these and other similar jobs done, I am for him.

Just remember in life's game, If you would avoid disgrace; And would win an honest name— Never trump your partner's ace.

Also bear in mind if you Would avoid the name of "Chump" When in doubt what's best to do— Lead a TRUMP.

AMERICAN LEGION NEWS

do this is through the various associations and civic clubs of our land, the schools and all the other child welfare program previously mentioned. And to those that have not yet joined the Legion, you are not doing your just duty to the great cause you meant to do in the World War, for which over 250,000 died and twice as many are crippled for life. So wake up, buddies, and come in as soon as possible. Show your colors.

We meet every second and fourth Tuesday nights. A welcome is always waiting and your service officer is at all times willing to help you with your problems regardless of where you live, and do not feel like your case will not be considered. It is rather difficult at this time to contact some, but in the majority of cases this can be done. And I want to urge those of the World War, Spanish War, and all other wars to call on the service any time they need any help on claims, burial expense, tomb stones, lost discharges, Gold Star medals, widows, and the orphan children that are in need of college training, insurance, and to those that have not filed for their adjusted compensation, should do this at once. There are hundreds of things you should be on the job to help carry out, and if you know of a Veteran who has died and has not yet received his grave marker, be sure and report this to me, or some other service officer. All veterans are entitled to this, regardless of what war.

We are looking for you at the next meeting. Some very urgent things are coming up, so be there to help the community and post to put these jobs over, and if you cannot sponsor our program, you should not knock until you are positive we are wrong. Do not assume anything until you have investigated, and then if you are convinced, we bid your criticism. Our slogan today is to assist all. It is in our power to advance the up-building of our home and community.

Mrs. J. C. Wilkison and Mrs. Minnie Goodwine, who have been quite ill during the past two weeks, are reported as gradually improving.

Miss Ruth Reeve, who is attending college at Canyon, came over to spend the weekend here with her parents, Mayor and Mrs. F. W. Reeve.

COUNTY AGENT'S NOTES

Weekly Schedule:

Wednesday 6: Lubbock, club show
 Thursday 7: Midway, 4-H club boys.
 Friday 8: Lubbock, Judging vocational agriculture boys' contests.
 Saturday 9: Farwell office.
 Monday 11: Farwell office.
 Tuesday 12: Rhea, 4-H club.
 Wednesday 13: Friona, miscellaneous.

FARM SECURITY

As farm and home plans for approximately 20 new borrowers in this county were completed, Thomas G. Moore, county supervisor for the Farm Security Administration, said that many of these farmers are being enabled to rent better land than before.

In spite of the fact that most of them were on relief a few years ago, FSA borrowers are now being sought by land owners, the supervisor said. In one county, the owner of 40 farms requested FSA's supervisor to provide him with rural rehabilitation clients to operate all of them. He gave as his reason that he had observed progress made by clients under the guidance of the county supervisors. He had seen that all were required to follow soil conservation practices recommended by the Extension Service to the fullest possible extent which was practical on their farms.

The FSA supervisor said that progress has also been made in bringing about a closer partnership between clients and landlords, under which longer leases are being obtained and improvements made on the farms which are bringing about increased profit for both the landlord and the tenant. More than 95 per cent of FSA clients have written leases, whereas less than 25 per cent had written leases on farms which they were operating three years ago. A new FSA lease form is soon to be distributed to tenants and owners, for their study. It provides compensation to tenants and owners, for certain improvements which they make on lands and buildings, similar to provisions of English leases which have brought increased profit to all concerned.

The 20 new farmers in this county for whom plans have been made to date represent about 10 per cent of the total number who will be financed this year. Last year 100 clients in this county received loans totaling \$31,570.00, while approximately 60 other clients who had borrowed in 1936 were able to continue their farming operations without financial assistance from this office.

CIVIL SERVICE EXAMINATIONS

The United States Civil Service Commission has announced open competitive examinations for the following positions in the Department of Agriculture:

Junior agronomist, junior animal fiber technologist, junior in animal nutrition, junior biologist (wildlife research), junior entomologist, junior entomological inspector, junior plant pathological inspector, junior poultry physiologist, and junior soil surveyor. The entrance salary is \$2,000 a year, less a retirement deduction of 3 1/2 percent. Applicants must have completed a 4-year college course with studies in the field in which they apply, except that under certain specified conditions, applications will be accepted from senior students.

Full information may be obtained from the Secretary of the United States Civil Service Board of Examiners, at the post office or customhouse in any city which has a post office of the first or second class, or from the United States Civil Service Commission, Washington, D. C.

Elvin J. Riddling, of the Black community, is disposing of his last year's row crop grains by trucking them to the Oklahoma markets.

FARM SECURITY ADMINISTRATION HERE

Thomas G. Moore, head of the Farm Security Administration for Farmer County, was a business visitor in Friona, Tuesday afternoon, and while here favored the Star office with a highly appreciated visit.

Mr. Moore is a talented and genial young man, and is holding an important official position as regards Farmer County and its people, but he is not one of those who is in it simply for the sake of holding a government job, but is putting forth every honest effort he can to sell the importance of his department to the people of our county, and in a way that will bring the greatest good to the greatest number of our people.

Mr. Moore has absolute faith in the service his department can render for the farmers of Farmer County, and in sincere in his efforts to sell his program to them, and by his earnestness of purpose has, in proportion to the size and population of the county, succeeded in putting into operation as large a volume of business as any county in the state; although he gives his patron to understand that this is not a gift, but a bonafide loan that must be repaid just the same as though the loan had been secured from a local bank or an individual.

FAVORS PROCESSING TAX

Senator Tom Connally today announced that he will support an amendment to the pending tax bill to provide processing taxes or tariff equalization taxes on cotton to provide additional funds looking to parity payments for cotton farmers.

"The amount available," Senator Tom Connally said, "under the recently enacted farm bill for cotton payments and soil conservation payments to cotton farmers is just a little over one hundred million dollars. This sum is wholly insufficient to offset the loss of income to cotton farmers by reason of drastic reduction of acreage. A tariff equalization or processing tax on cotton goods is justified on the ground that the consumer of cotton goods would pay a small increase in price which would go directly to the cotton producer. If additional funds are to be obtained they must be secured by such a processing tax since the amount available from the general revenue has been limited, as above indicated. The processing tax would also include rayon, a competitor of or substitute for cotton."

SPRING TIME SUGGESTS GARDENS FOR FARMS

"Spring time," Miss Eunice Florence says, "suggests gardens, and all farm families should consider the food needs for each member of the family and then take steps to produce as many of these foods as possible. The kind of meals served by a housewife have a great effect upon the health of their families, and a great many vegetables are necessary to prepare adequately balanced diets."

Miss Florence reports she is assisting the 200 families in this county who are cooperating with the Farm Security Administration's rehabilitation program to plant and grow gardens designed for an ample supply during the spring, summer and fall and also for canning and storing to use next winter.

PSA cooperators who made the greatest strides in their rehabilitation program this past year, Miss Florence says, were, with few exceptions, those who had grown good gardens and had saved on their food bills by filling their pantries with many staple and delectable garden products.

Many home gardeners working with Miss Florence in Farmer county have painted tomato, cabbage and pepper seeds in cold frames so they will have plants ready to transplant to the gardens as soon as the danger of frost has passed. Because from 75 to 90 percent of the family's food supply can be provided directly from the farm, because the production of these foods cut family living costs; and because farm goods, including fruits and vegetables, are so necessary to health, the Farm Security Administration encourages its borrowers to do all within their power to grow adequate home gardens.

The farm and home plans for each family place emphasis on this phase of the year's work, and while Miss Florence says it's well and good for a young man's fancy to lightly turn to thoughts of love, she is particularly anxious that her cooperators' minds turn toward the garden plot this spring.

A BAD NORTHER

The Norther that started here just about noon Wednesday, continued to grow worse as it grew older until it reached what is probably the worst blizzard of the winter.

The wind blew fiercely all night and far into the day Thursday, and brought with it fast clouds of dirt from somewhere north of us, and the temperature dropped from about 60 at noon Wednesday to below 20 by midnight. Fruit is considered lost and some feet are entertained for the winter crop.

WITH THE CHURCHES

Young People's meeting each Tuesday night, 8:00.

DELIVERED INTERESTING TALK

Brother Worsham, who is now holding a series of revival services at the Euclid Avenue Church of Christ, gave an interesting talk on "Youth at the Crossroads," at the high school Monday morning.

Evangelist Worsham is an interesting speaker and a proficient expositor of the scriptures.

NEW PASTOR AT HUB CHURCH

Rev. Delmar Justice and family are residing temporarily at the home of Rev. E. E. Houlette.

Rev. Justice is the new pastor of the Nazarine church, at Hub, or Homeland, who has come in to take charge of the pastorate there, and as soon as the parsonage is vacated they will move to Hub.

SUNDAY SCHOOL SOCIAL

The Baptist young people were honored by a dinner which was given by Miss Elmira Crow in her home last Sunday. The bountiful dinner was served cafeteria style to approximately thirty guests.

Among those present were: the hostess' parents, Mr. and Mrs. L. M. Crow and daughter, Annie Sue; Rev. and Mrs. Joe Wilson and daughter, Billie Jean; Mrs. William Cleaveland and sons, W. L. and D. Wayne; Mr. and Mrs. Dennis White, Joe Earl Wilson, of Plainview; Lee Euler, J. F. Buske, Wilmot Crow, Raymond Baker, Elaine Culpepper, of Plainview; Geneva Deaton, Louise Euler, Edith Frost, Glenda Carter, Polly Parsons, Daphne Crow, Martha Belle Price, Waneta Lewis, Margie Lewis, Florence Parker, Mattie Faye Clordon, Virginia Turner, Othella Hart, J. White and the hostess.

HONORED WITH LINEN SHOWER

The ladies of the Lazbuddy Baptist Church last week honored the wife of their pastor, Mrs. H. B. Naylor, with a "linen shower."

Mrs. Naylor is highly appreciative of this honor and expressed her deepest gratitude to the ladies for their kindness.

CIVIL SERVICE EXAMINATIONS

The United States Civil Service Commission has announced open competitive examinations for the following positions:
 Junior associate warden, \$3,200 a year, U. S. Bureau of Prisons, Department of Justice.
 Scientific aid (birds) \$1,800 a year, U. S. National Museum, Smithsonian Institution.

Scientific aid (parasitology) \$1,800 a year, Bureau of Animal Industry.
 Full information may be obtained from the Secretary of the United States Civil Service Board of Examiners, at the post office or customhouse in any city which has a post office of the first or second class, or from the United States Civil Service Commission, Washington, D. C.

COUNTRY CORRESPONDENCE

LAKEVIEW NEWS

About fifty people gathered at the school building and reorganized the Sunday School, Sunday morning. Mr. O'Brian was chosen superintendent and Mr. Sparkman, assistant superintendent. Everyone in the community who does not attend Sunday School elsewhere, is cordially invited to come and be with us. We need your help.

Mr. and Mrs. Ennis Cummings and children went to Lubbock, Sunday, Doyle took his calf down for the show.

Mr. and Mrs. J. M. W. Alexander and Mr. and Mrs. C. A. Gunn and Jim and John Charles, spent Sunday with Mr. and Mrs. Van Boston.

Miss Ruth Melton spent a few days last week in the Gunn home.

Mr. and Mrs. C. P. Harper spent Sunday with Mr. and Mrs. A. D. Hinson.

Jack Kuykendell has been absent from school for several days, ill with the measles.

Mr. and Mrs. Bev Buchanan and son, Bill, and Mrs. E. B. Whitefield spent Tuesday in Lubbock.

Mrs. A. O. Ford's sister and family, from Farwell, visited them Sunday.

Mr. and Mrs. Roy Johnson went to Lubbock, Sunday, to visit his brother, Homer Johnson, who is in a hospital here.

FRIONA WEATHER

The weather since Wednesday last week has been varied; but beneficial, so far as the growing wheat crop is concerned.

Most of the days have been mild and fair; but Friday of last week was neither, as it was uncomfortably cold and snowed a good portion of the day, the snow melting most as it fell, and making the roads slippery and the streets sloppy, but the amount of moisture that fell was of great benefit to the wheat, as it went directly into the ground as it fell and melted. It is estimated that at least a quarter of an inch of moisture was received.

This falling weather, however, was considerable of a hindrance to the road builders on highway 33-66, who had reached a point about even or a little west of the northwest corner of the town site, and their work was delayed until Tuesday morning.

A part of the day Saturday was cloudy but the clouds cleared away about the middle of the forenoon and the remainder of the day was bright and much warmer. Considerable ice was formed Saturday night and it is thought our peas may have been killed. A little before noon Wednesday, heavy clouds of dust rolled in from the north and the wind changed and became much colder.

America's Greatest Food Authority Now Writes for This Paper

C. Houston Goudiss

We announce with pride a new feature in this issue, "What You Eat and Why," by C. Houston Goudiss, noted food authority, radio speaker, author and lecturer, famous as the man who knows food "from soil to serving, from table to tissue."

One of these articles will appear each week, and we know housewives and mothers will look forward to them for the accurate, worthwhile information they contain on foods and their relation to health. This is not a recipe column. Mr. Goudiss has designed it to serve as a link between laboratory and layman in the food field, interpreting modern scientific knowledge in the language of the home maker, giving her the elemental facts regarding new discoveries and the part played by food in building and maintaining health.

Every woman wants to know what foods will benefit her family and why, and that is just the information that Mr. Goudiss will give. Watch for the articles each week, make a scrap book of them for ready reference. They contain valuable information every home mother should have.

LAND FOR SALE—880 acres of land, 70 acres in grass. Has house and well. 810 acres of good early wheat on land and all goes at \$16.00 per acre. Also 80 acres in 3 miles of Friona. Nice land at \$11.50 per acre. See W. M. White.

HAS MASTOID OPERATION

Mrs. C. E. McLean, who was taken to a hospital at Amarillo last Saturday suffering from an ailment of her ear, was reported to have undergone a surgical mastoid operation, Wednesday.

She stood the operation well and her early recovery is hoped for.

Mr. and Mrs. O. H. Curtiss and Miss Melzia Chronister spent the weekend with friends in Amarillo.

Neva Raybon, Edith Crabtree and Jim Griffith were Hereford visitors, Saturday.

Miss Beatrice Buchanan, daughter of Mr. and Mrs. J. D. Buchanan, and who is attending college at Lubbock, spent the weekend here visiting relatives and friends.

Miss Mollie Ward, formerly of Friona, but now of Albuquerque, New Mexico, is here visiting friends for a few days.

LOYD POPE SERIOUSLY ILL

Lloyd Pope, who was taken to a sanitarium at Marlin, last week, is reported in a serious, though not necessarily hopeless condition.

He is suffering from a weak heart and other complications, which will require a long period of absolute rest and careful treatment and nursing. His mother, Mrs. Oscar Pope, was still with him at last report.

The Child Study Group held its regular meeting in room No. 3, at the grade school building, Thursday night.

Mr. Thomson, director for the State Social Security Administration, was a business visitor here, on Tuesday.

Bert Chitwood was a Muleshoe visitor, Sunday.

HOME DEMONSTRATION CLUBS

Oklahoma Lane Club
"The background of our rooms, walls and ceilings should invite us in, and be restful," says Miss St. Clair, Farmer county demonstrator, at the Oklahoma Lane club meeting April 4, at the clubroom.

Our wall covering though a shade darker than the ceiling, should be light in color, cool color for South and West and warm color for North bedrooms. Trying out color before selecting it helps.

In the near future rug making, coloring and window treatment will be discussed. Committees were appointed for preparing the Junior-Senior banquet.

Present were: Mesdames Dicky Magness, Irene Watkins, Dexter Watkins, F. E. Kopley, Clyde Perkins, Tom Foster, Lee Thompson, A. B. Wilkinson, J. B. Jennings, Jack Roach, E. A. Hromas, Ed McGuire, George Lindop and R. L. Henson.

Club Has Party
The Homeland demonstration club held a social in the home of Mrs. Leonard Hall, on Thursday night of last week, in the form of a community supper. The women prepared a supper featuring the various types of cheese dishes they had studied during the past weeks. Miss Margaret St. Clair, demonstrator, directed the social hour.

WHAT to EAT and WHY

C. Houston Goudiss Noted Food Authority Relates the Miracle of VITAMINS and Explains Why YOU MUST EAT THEM or DIE

By C. HOUSTON GOUDISS
8 East 39th St., New York

WE LIVE in the most inspiring age the world has ever known. Chemists grow plants without soil. Doctors snatch men from death with insulin. Surgeons perform incredibly delicate brain operations. And thanks to the amazing discoveries of nutritional scientists, children enter the world with far better chances for long and happy lives, while men and women of seventy are more active and useful than their grand-

parents were at fifty. Much of the hard-won knowledge of how to eat so as to increase efficiency, curb disease, and improve the chances for longevity is due to the discovery of vitamins.

VITAMINS DISCOVERED

Twenty-six years ago, a now-famous scientist walked nervously around his laboratory, back and forth — back and forth. He was conducting a nutrition experiment of vital importance. He didn't quite know what he was going to find, but he believed that he was on the verge of a revolutionary food discovery.

The scientist was my friend, Casimir Funk, a brilliant Polish bio-chemist. He had been working on the problem for many years. At last, in the year 1912, his experiments were positive and conclusive. Then, he announced to the scientific world that he had discovered a vital force. "This force," said Funk, "I have called vitamin, because it is necessary to life."

SPARK PLUGS OF NUTRITION

Other bio-chemists throughout the world—including Sir Frederick Gowland Hopkins in England, and Hart, Humphrey, Babcock, Steenbock and McCollum in the United States—had been working on the same problem that Funk had partially solved. They knew that the first step was to find out how vitamins affected the human body, and that the second step was to discover what foods contained these vital substances.

And so there began a long series of experiments in the laboratories of great universities all over the world, which demonstrated what happens when a diet is deficient in any of the vitamins, and proved that if laboratory animals are wholly deprived of vitamins for a short time they will die.

These experiments are of the utmost significance to every homemaker, because the same thing happens to human beings as to experimental animals. Today our knowledge of vitamins has progressed to such a degree that it is possible to state the exact requirement for most of the vitamins and to designate the foods from which adequate quantities can be obtained.

RESISTANCE AND VITAMIN A

To date, six vitamins have been identified. Vitamin A promotes growth and builds resistance to disease. It is necessary for the health of the mucous membranes of the body and helps to guard against infections of the respiratory and alimentary tracts. It influences the health of the hair and skin, is necessary to prevent a serious eye disorder known as night blindness, and is essential for the formation of healthy teeth.

Vitamin A is found in milk, butter, margarine that has been reinforced with vitamin A concentrate, egg yolk, cod-liver oil, thin

green leaves and yellow fruits and vegetables such as carrots, sweet potatoes, apricots and bananas.

APPETITE AND VITAMIN B

Vitamin B promotes appetite, aids digestion, prevents a serious nerve disorder. It is essential to the maintenance of a good digestion, which is vitally important if the body is to obtain full benefit from the food consumed. This vitamin is closely related to the energy metabolism, and the requirement increases with the rate of growth and with increased energy expenditure, so that growing children and working men and women should receive very generous amounts.

Vitamin B is found in yeast, whole wheat cereals, oatmeal, milk, fresh and dried peas and beans, spinach, cabbage and other greens, egg yolk and liver.

VITAMIN C FOR TEETH, GUMS

Vitamin C plays an important part in regulating body processes, and prevents the dread disease of scurvy. A lack of this essential vitamin results in profound changes in the structure of the teeth and gums, may be responsible for hemorrhages occurring anywhere in the body, and for the degeneration of muscle fibers generally.

Vitamin C is most abundant in succulent fresh green leaves, such as green cabbage. It is also found in onions, potatoes, oranges, tomatoes, green peppers, bananas and strawberries. In most foods, it is easily destroyed by heat—that is why it is so important to include some fresh raw foods in the diet daily.

VITAMIN D AND RICKETS

Vitamin D is sometimes called the sunshine vitamin because it can be manufactured in the body through the action of direct sunlight on the skin. This is the vitamin that is necessary for the proper utilization of calcium and phosphorus in building bones and teeth. When it is lacking in the diet of infants, there develops that horrible disease known as rickets, in which the bones become soft and twisted, resulting in pitiful deformities—knock knees, bow legs, pigeon breast.

In foods, vitamin D is only found in appreciable amounts in fish-liver oils and egg yolk. That is why every homemaker should be so grateful to the scientists who labored to discover how to concentrate this precious vitamin from fish-liver oils and add it to foods, or to increase the vitamin D content of foods through irradiation.

ANTI-STERILITY VITAMIN E

Vitamin E comes in for less discussion than the others, because its significance to nutrition has not

TIPS to Gardeners

Combinations

TO INCREASE yield from the vegetable plot, the home gardener should grow "combined cultures."

The theory is to plant in closely spaced adjacent rows vegetables harvested at widely different times, using one before the other begins to mature.

Combine cauliflower, lettuce and radish, for instance. Plant cauliflower early in rows three feet apart. Between the rows plant lettuce, and between lettuce and cauliflower rows plant radish. Radishes are harvested early, then the lettuce, and later the cauliflower.

Following are several other combinations recommended by Harold Coulter, Ferry Seed Institute vegetable expert: Carrots and parsnips in alternate rows two feet apart; radishes between first two rows; lettuce between second and third row, and spinach between third and fourth rows.

Spinach rows two and one-half feet apart; radishes between spinach; pepper plants set between spinach when radishes are pulled.

Have You a Question? Ask C. Houston Goudiss

C. HOUSTON GOUDISS has placed at the disposal of readers of this newspaper all the facilities of his famous Experimental Kitchen-Laboratory in New York City. He will gladly answer questions concerning foods, diet, nutrition, and their relation to health. You are also invited to consult him in matters of personal hygiene. If you desire, you may write a letter, or you may desire, for postal inquiries, will receive the same careful attention. Address: C. Houston Goudiss, 8 East 39th Street, New York City.

Building, Maintaining Family Health

IN THE C. Houston Goudiss articles that have appeared previously in this newspaper, the nationally known food authority has described FOOD, as it provides the key to mental and physical power; PROTEINS, the foods you cannot live without; CARBOHYDRATES and FATS, foods that provide motive power for the body machinery; and MINERAL SALTS, that you must have in order to build strong bones, healthy nerves and rich, red blood.

These subjects have been treated in an interesting and understandable manner, free of scientific terms, principally offering advice to the housewife that will aid her in the problem of feeding the members of her family such foods as will build and maintain their health.

Every one of these articles has a definite place in your scrapbook for future reference. If you have missed any of these discussions, the publisher of this newspaper will supply them upon your request. If you have not already done so, start a department of these informative articles in your scrapbook at once!

been fully determined. It does, however, appear to be necessary for successful reproduction and is found especially in wheat germ and lettuce.

VITAMIN G PROLONGS YOUTH

Vitamin G is necessary for growth and for the maintenance of health and vigor at all ages. It helps to ward off old age by prolonging the vigorous middle years. It is essential to the health of the skin, and recent experiments demonstrate that cataracts in the eyes may be due to a deficiency of this vitamin, which is found in yeast, and in liver, kidneys, egg yolk, milk, cheese and green leafy vegetables.

One authority claims that chronic disorders of the throat, stomach, lungs, colon, heart and kidneys may be traced to vitamin and mineral deficiencies.

Certainly enough has been learned of vitamin chemistry to make clear that the homemaker fails in her duty who does not provide vitamins in abundance for every member of her family. Both children and adults depend upon you for their food supply. It lies within your power to help them to health and happiness or condemn them to weakness, illness and sorrow. Do not fail them. See to it that every member of your household—your children, the wage earners, the middle aged and the elderly—get enough vitamins to afford them the health that science has placed within their grasp.
© WNU—C. Houston Goudiss—1928.

What Is the Cause of "Spider-Web Check"?

If not properly "fed" with a good oil polish, furniture in time develops what is known as "spider-web check!" This appears on the finish, like wrinkles on the human face—fine lines, spreading here and there in a spider-web pattern. This crazing, this light cracking, is known in furniture language as "checking" and "spider-web checking" better describes the condition. This is the danger-sign, on finish! It's the indication of "starving" wood!

A warning to the housewife, that if the finish is not cared for immediately and properly, the furniture will develop cracks, ridges and splits. "Spider-web check" is generally the result of either one of these two causes: Polish-neglect—or the use of a poor, cheap polish—without the essential fine, light-oil base. When the furniture is periodically "massaged" with a reputable oil polish (the best is non-greasy), the pores of the wood are "fed" and the piece is preserved. Then "spider-web check" will not appear! The use of a quality oil polish is the best preventive formula for this ugly, detrimental check!

MORE WOMEN USE O-CEDAR POLISH THAN ANY OTHER KIND!

...because O-Cedar not only cleans as it polishes, but preserves your furniture—"feeds" the finish, prevents drying-out, cracking, insists upon O-Cedar Polish, for furniture, woodwork and floors (with the famous O-Cedar Mop).

O-Cedar POLISH
MOPS - WAX

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON

NEW YORK. — Leslie Hore-Belisha, British secretary of war, made himself somewhat of a national hero several months ago when he shook up the army command, upped the youngsters and sent the oldest back to their club chairs. The report of his ultimatum demanding a change of foreign policy is a stand-out in the current news.

There was something like consternation among British conservatives early in 1937, when Prime Minister Chamberlain named the incidentally Jewish Mr. Hore-Belisha for the war post. There was no hint of anti-Semitism in their attitude, but just the certain optimism among them were trying to fool Britain into the German orbit, and there were alarmed predictions that Hitler would be enraged and seek quick vengeance.

That didn't come off, and the new war secretary started a whirlwind army clean-up and all-around reconditioning campaign, to the satisfaction of all hands. Seventy-nine-year-old Sir Ian Hamilton, who had been in command at the Dardanelles, said, "Thank God we are under a proper soldier and will not be shot sitting down."

He has spent a lot of time badgering his elders, and still has many of them to work on, as he is only forty-three. When, a bash young Okonion, he ran for parliament, his opponent tagged him as "the nonentity of the college bench." He nailed this on his mast-head, spoiled the opposition cleverly, and romped in.

He was a dispatch carrier in the war, then a major, a reporter on a London newspaper, with convenient underground pipelines to the front page and the headlines.

He became financial secretary of the treasury in 1932 and later minister of transportation. He is a demon for detail and has swarmed all over England, inspecting equipment, barracks and army kitchens.

He is of medium stature, round-headed, with reached, graying hair, unmarried and given to night forays, checking this or that detail of the military establishment.

AT LEAST six times in the past 150 years, the Rothschilds have been counted out, and they have always come back—like John Barleycorn and Old King Cotton. Now the arrest of Baron Louis von Rothschild is reported from Vienna.

The era which founded their dynasty was disquieting like this one. The Romanoffs, and the Hapsburgs, Matternich and Disraeli and all the other kings, conquerors and statesmen came to terms with them.

Baron Louis is the head of the house. The catastrophic fall of the Creditanstalt bank of Vienna in 1931 was supposed to have wrecked them.

A few weeks later, they were shoveling money into American securities, and it was reported, snatching a stray million here and there by a fast overseas play on francs, an old family custom.

Louis and his brother, Alphonse, were living in regal splendor when the Creditanstalt failed. They had great estates and magnificent art galleries, shooting lodges, a huge Franz Lehár chorus of retainers, deer parks and a brace of medieval castles. Much of these holdings slipped away, as Louis, with somewhat less than the usual family zest and acumen in financial affairs, turned to a study of philosophy and the arts.

It is 132 years since Napoleon, after Austerlitz, made mince-meat of the Holy Roman empire and even more ruthlessly dismembered Austria. Nathan, James and Solomon von Rothschild, sons of Mayer Anselm, founder of the line, not only saved their holdings, but extended their dominions to the remotest corner of Europe.

These vast ramifications of their fortune, one of the largest in the history of the world, were in land, steel, coal, manufactures and munitions, and, in later decades, in oil and hydroelectric power.

Libraries have been written about them, one notable record being Zola's "L'Argent." Their continental money matrix has been a stabilizer at times. It is possible that the Rothschild clan changed the end of a dynasty and an epoch—but not quite certain. History will tell.

Smart Daytime Fashions

full skirt, square neckline and puff sleeves are so becoming. Make this dress up for your daughter in taffeta or silk crepe in time for Easter, and later on in printed percale or dimity.

Large Women's Dress.
The diagram shows you how easy this dress is to make, and it fits to perfection. Notice the raglan shoulder line, the waistline snugged in by darts. The roll collar, with the smart little tab in front, is very soft and becoming. Very comfortable to work round the house in, this dress is sufficiently tailored so that you can go shopping in it, too. Make it up in percale, gingham, broadcloth or tub silk.

The Patterns.
1491 is designed for sizes 8, 8, 10, 12 and 14 years. Size 8 requires 2 1/2 yards of 39-inch material, plus 1 1/4 yards of bias fold to finish the neckline and sleeves.
1395 is designed for sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38 requires 3 3/4 yards of 39-inch material. For contrasting collar, 1/2 yard, cut bias.

Spring-Summer Pattern Book.
Send 15 cents for the Barbara Bell Spring and Summer Pattern Book which is now ready. It contains 109 attractive, practical and becoming designs. The Barbara Bell patterns are well planned, accurately cut, and easy to follow. Each pattern includes a sew-chart which enables even a beginner to cut and make her own clothes. Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.
© Bell Syndicate.—WNU Service.

A CHARMING basque frock for growing girls, and a housedress for large figures, both smart and becoming, both easy to make. Even if you've done very little sewing, these patterns are easy to follow. Each one is accompanied by a complete and detailed sew chart. And a tour through the shops will show you irresistible new fabrics to make them up in.

Basque Dress for Girls.
No wonder girls love a basque dress like this! The fitted waist with its basque point in front gives them such a grown-up feeling. The

Watch Your Kidneys!
Help Them Cleanse the Blood of Harmful Body Waste
Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.
Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.
Other signs of kidney or bladder disorder may be burning, scanty or too frequent urination.
There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. Ask your neighbor!

HOW TO SEW

by Ruth Wyeth Spears

Slide Fasteners for Slip Covers

IF YOU have slip covers made by an interior decorator and you go in for such niceties as slide fasteners or welted or piped seams the bill goes up and up. If you make the covers yourself all these "extras" amount to very little either in time or money. In fact slide fasteners require less time than a closing with snaps.

Plan the closings for a slip cover during the final fitting when the seams have been basted but not stitched. Sometimes one short placket is all that is needed. Again openings must be left at several points so that the cover will slip on easily.

To apply a slide fastener to a seam placket, turn the slip cover inside out and crease the seam open. Cut a facing strip 1 1/4 inches wide and 1 inch longer than the opening. Join the facing strip to the back edge of the opening as shown at A. Slash the front of the seam edge 3/4 inch above the top of the opening and crease it over the back facing as shown at B. When the edges of the opening have been prepared in this way, press the edge creases with a hot iron. Next, baste and stitch the fastener in place as at C sewing close to the metal. The machine cording foot is useful for this purpose. Do not trim away the tape at the ends of the fastener. Whip the upper ends down as at D, and cover the lower ones with the hem as at E.

NOTE: If you are making new slip covers or curtains or doing other Spring sewing you will want

a copy of Mrs. Spears' book SEWING for the Home Decorator. Forty-eight pages of illustrated directions for making curtains for every type of room; dressing tables; lampshades, and numerous other articles used daily in the home. Send name and address, enclosing 25 cents (coin preferred) to Mrs. Spears, 210 So. Desplaines St., Chicago, Ill.

Strange Facts

Cat-Tails Served as Asparagus

YOU can eat the fuzzy cat-tail you have seen so often in marshy places. The Iroquois Indians used the root of the cat-tail plant to make flour. The root is starchy and the Indians dried it and made a flour that is similar to flour made from corn or rice. Cat-tail flour was one of the substitutes the Germans learned to use during the World war. The American Indians also used the root to make syrup. It is the tender shoots of the plant that Cossacks enjoy and it is this part of the plant that is sometimes served in England under the name Cossack asparagus.

The fibrous leaves of the cat-tail plant have often been used to make mats and chair seats. The flower is converted into a substitute for cotton or silk and is made into a filling for upholstery. In this form the flower was used as a dressing for wounds in the World war. The ancient people of India dried the cat-tails and used them as torches. In some places where palm leaves are not easily obtained the cat-tail leaves are used on Palm Sunday instead of palms.

The leaves of the cat-tail are grasslike, growing in double rows on the reed stalk and the flower of the plant is the tall which grows at the top of the stalk. The tail is not a single flower but is made up of thousands of little flowers. The familiar fuzzy surface is due to fine down which grows on each flower.

AROUND the HOUSE

Items of Interest to the Housewife

Preparing Cauliflower.—Always soak cauliflower head down for an hour in a quart of cold water to which a teaspoon of salt and one of vinegar has been added.

Variety in Sauces.—Don't get into the habit of using too many cream sauces. They are apt to make vegetables taste more or less alike and thus price monotonous.

Freshening Raisins.—Raisins used in cakes, cookies and puddings should first be placed in hot water and simmered for five minutes to enlarge and soften them.

Window Solves Problem.—If a room is dark and dreary, a new window will often do wonders for it. A room that looks out on a covered porch frequently needs additional lighting. This may be

accomplished by cutting a window in the side wall which is not surrounded by a porch. White woodwork and a light paper adds to the brightness of the room.

Mistake-O-Graph Answers

1. Question mark on banner.
2. Telephone has no receiver.
3. Lower section of bay window is right, upper is daylight.
4. Flower appears in golf bag.
5. Picture of Rover just shows leg and tail.
6. Nail in wall does not support picture.
7. Singer's head appears from speaker of radio.
8. Chair is floating in the air.
9. Mirror on bureau is not attached to supports.
10. Lamp plug is not connected, yet lamp is lit.
11. Cane in bouquet of flowers.
12. Bear rug is growing.
13. Gentleman has evidently forgotten to shave.
14. Bear skin is spotted.
15. Gentleman is wearing odd socks.

"It's Better!"—say Millions about Pepsodent with IRIUM

BOTH Pepsodent Tooth Paste and Powder contain marvelous Irium

Millions everywhere are singing the praises of Pepsodent containing Irium to get teeth far brighter! It is wonderful Irium that helps Pepsodent gently brush away stubborn, clinging surface-stains that hide the natural brilliance of your teeth...just as

a cloud will hide the light of the sun. With these ugly surface-stains gone, your teeth reveal the lovely, gleaming radiance they naturally should have! And Pepsodent with Irium works SAFELY—because it contains NO BLEACH, NO GRIT, NO PUMICE. Try it!

Mistake-O-Graph

All dressed up and no place to go might well be the title of this inspiring scene. The importance of the occasion, we fear, must have warped our artist's mind, for the drawing is full of mistakes. Can you find fifteen? The answers will be found above.

 Cecil Malone—Proprietor

Mission San Carlos Borromeo
 Here, at Carmel, California, lived many of the characters portrayed in "Mistress of Monterey," Virginia Stivers Bartlett's new serial of early Spanish settlement. This great story is now brought to you in these columns, unfolding the dramatic saga of Don Pedro Fages and his headstrong wife, Dona Eulalia. Historically accurate, "Mistress of Monterey" recounts the hectic struggle between church and state... a momentous affair in which Fray Junipero Serra, a Catholic priest, fought the honest opposition of Don Pedro. But he had not counted on the cunning La Gobernadora—the woman who thought her beauty was greater than her beauty was... California. You'll enjoy this unusual serial!

HEALTH NOTES
 Austin, Texas—"Hard to diagnose but easy to cure" is the Texas Tuberculosis Association's tag line for the white plague among children. But, according to Dr. Geo. W. Cox State Health Officer, this organization has made long strides toward combating the dread disease in both children and adults. He lists the Tuberculosis Association as among the foremost of those groups concerned with child health. It will cooperate with other agencies on May Day-Child Health Day to make the entire nation child-health conscious.
 Discussing the work of the association, Doctor Cox said, "Familiarity breeds contempt" is an aphorism which has been spoken for years; in the case of tuberculosis the opposite is true. Intimate association between tuberculosis and the human race for five thousand years has bred in the human race a most wholesome respect for this intruder in the family circle. Tuberculosis, known as phthisis 3000 years B. C., for almost 4900 years was known as a hereditary disease which was a doubtful birth-right of the child; only during the past few years has the true infectious nature of the disease been known. Now it is known that it is spread by contact with the germ which causes the disease.
 "Since early in the twentieth century the National Tuberculosis Association and its component parts which include the Texas Tuberculosis Association, has been waging relentless warfare against this one disease. With great breadth of view in its high purpose, this association has cooperated with all health agencies today in Texas the State May Day Committee is proud to include the Texas Tuberculosis Association in its membership.
 "The activity of this association is truly in the interest of the child. Despite the decrease of the annual death rate from 200 per 100,000 in 1900 to 56 per 100,000 at the present time, this State still saw the death of 4000 Texans, approximately six hundred of these being children. Tuberculosis still maintains its position as the leading cause of death between the ages of 15 and 45.
 "The Texas Tuberculosis Association is stressing the fact that early tuberculosis is hard to diagnose; but easy to cure; advanced tuberculosis is easy to diagnose but hard to cure". This leads to the conclusion that advantage should be taken of every possible means to obtain early recognition. The most effective methods of diagnosis are the tuberculin test and the X-ray in the hands of competent physicians.
 "Tuberculosis is being cured in all climates. The great need of Texas is provision for treatment, as there are only one-half enough beds in the State to meet the minimum requirements for cure.
 "In fifty-five counties volunteer Tuberculosis Associations affiliated with the State and National Associations are now active. Your county may have such an organization upon application to the Texas Tuberculosis Association. Such an organization will be definitely of benefit to the children of your community."
 Austin, Texas—The definite increase in the number of persons dying from cancer makes the subject of tumors a timely one. A tumor is a mass of new tissue which is of no use whatever to the body. If tumors or their manifestations were more generally appreciated, much of the misery and many deaths could be eliminated, stated Dr. Geo. W. Cox, State Health Officer.
 The malignant tumor known as cancer may consist, as in the case of benign tumors, of any bodily structure, superficial layer of the skin, mucous membrane and bodily organs. They grow rapidly and may establish secondary growths far from the site of the parent tumor by means of detached cells traveling in the blood or invading the lymphatics.
 Where benign tumors are concerned, surgical removal usually results in permanent cure. However, in cancerous tumors surgery or irradiation (X-ray and radium) or a combination of the two, to be effective depends upon early diagnosis and prompt professional action.
 While a number of cancerous growths unfortunately do not present early symptoms, many of the more common ones do. It is the deliberate or ignorant disregard of such early symptoms that has so decidedly occasioned the increase in cancer deaths.
 The outstanding signals which justify a suspicion that cancer may be present, though not necessarily so, are: any lump; any unusual bleeding from any bodily opening; a persistent sore; and chronic indigestion.
 To disregard these signs, which may mean cancer in an early and therefore curable stage, is to flirt with death. Most certainly it does not pay to take any chance with any kind of a tumor or manifestation that indicates the possibility of its existence.

FARMALL Leads the Field with New Row-Crop Tool Combination
 McCormick-Deering Farmall 20 or Farmall 30
 (with power-lift attachment)—
 No. 10 Tool Bar Middle Buster—Tool Bar Sweep Equipment—
 No. 10-30 Tool Bar Planter—and Farmall Cultivators.
 With a McCormick-Deering Farmall 20 or Farmall 30 and this new combination of equipment you can handle every field operation except picking and haying. You can quickly rig the Farmall for middle busting (2 furrows), running three middles, planting (2 or 4 rows), loose ground list (2 or 4 rows), resting or basin listing.
 The basic implements carry a heavy square steel tool bar on which buster bottoms, sweeps, and planting units may be arranged for working in rows 36, 38, or 40 inches apart. It is a simple matter to make equipment changes or adjustments to meet seasonal requirements.
 These new implements can be used with any Farmall 20 or Farmall 30 which is equipped with power lift. Similar tool bar implements are available for use with the Farmall 12.
 We can't tell you all about this system of row-crop farming in our limited space here, but we'll go into every detail with you if you drop in at the store or give us a call on the phone.
