

# 4 DAY POULTRY SHOW OPENS HERE WED. FROM ALL OVER

America's 7 leading killers are: AP Newsfeature pictograph: Heart disease, 253.7 per 100,000; Cancer, 98.9; Cerebral Hemorrhage, 56.0; Nephritis, 24.5; Pneumonia and Influenza, 17.8; Motor Vehicle Accidents, 17.7; Tuberculosis, 13.3. These figures from the Institute of Life Insurance.

And, to some other figures: Dude Ranchers in the state of Colorado only took in FOUR AND ONE HALF MILLION BUCKS last year and there were only about 45 leading ones. Watch these Coryell County Hills go to waste, and maybe, a million bucks, too.

"And, listen. Illinois and Texas Led all other states in the address of the 32,000 dude-ranch guests who vacationed in Colorado mountainous country."

Of course, Coryell ain't Colorado, but it at least begins with the same letter—"C". And, why should Texans go to Colorado way? And, too, just think of how many that'd dude-ranch in Texas because they couldn't afford to go to Colorado.

And, what a something for the Industrial Organization to work on! Or, anybody else, that don't belong to it. Just think, how much "dude-ranch" merchandise could be sold, how many people could be employed, —aw you just keep on figgerin'! We might even need more banks to put the money in, and more newspapers to tell about it, and more, and more, and more, and more!

Pal, we think it's a natural for Coryell County, just as well as for Colorado. At least, we might get those that couldn't afford to go to Colorado.

Then, when they cover up enough acres in the SE part of "Ex-Coryell" with water, we could induce 'em better. We could get 'em sea sick, anyway, and fishin' and huntin' and ridin, and every thing.

Think we still have the cap off that green cake coloring somebody left us. If they'll call in person, we'll try to find it!

**Labor Needs Profits**

Have you ever heard talk about "fair" and "reasonable" profits? The suggestion is that any amount of profit higher than "reasonable," whatever it is, would be unwholesome and bad for everybody. If you have ever fallen for that old line, repent at once. This may shock you back to reality, but I say it sincerely: What America needs is big profits, the largest profits that can be earned honestly! I say this with the welfare of the worker clearly in mind.

**The Worst Crime**

Once a great labor leader wisely said: "The worst crime against working people is a company which fails to operate at a profit." A survey has shown that people agree with this, in principle. Yet, they think profits much higher than they are today. The survey showed that most people thought profits to be more than four times what they actually are. Most people said that 10 per cent of the sales dollar would be about right. The fact is that last year corporate earnings averaged less than 6 per cent of sales.

Then there are those who are always trying to kill the goose that lays golden eggs, by calling for more wages to be paid out of "increased" profits. Except for taxes, the biggest portion of last year's profits went for better plants and tools. If every dollar of the profit which went to stockholders last year had been turned over to workers, it would have brought a wage increase of only 6.8 per cent.

**Cut Down Profits**

It is false to assume that industry could make wages higher and prices lower by cutting down on profits. That way, profits would no longer be the incentive for healthy competition. Government would have to step in and control the whole economy. This would mean the end of free enterprise and the high standard of living we enjoy.

To some people, it may seem like a good thing to soak the "rich" or lambast capital at every opportunity. But they will stop doing that when they begin to realize how much it hurts the worker. Our workers are depending upon the profits of capital to supply the tools that mean so much to them and to every consumer. How can we have tools and plants, unless we encourage profits? How can we have jobs and prosperity, then, unless we encourage profits?

**Dangers to Workers**

We have gone through a long period of danger, but we're not out of it completely. The period 1930 to 1940 was the first decade in our history during which our stock of tools did not increase. We allowed 25 per cent of them to wear out and didn't replace them. In 1930, America's stock of tools amounted to \$1,646 per person. By 1940, this was down to \$1,302. To get back to the 1930 level at once, we would have to spend perhaps 75 billion dollars.

Do you see our danger? Modern man is completely dependent upon good tools. We cannot afford to eliminate profits, and do away with the rewards that come from taking risks. If we do, the American workers will have to bear the brunt of a dangerous mistake. We need more Henry Fords and Thomas Edisons. Did they make profits? Yes, and they built America. With profits, they made it possible for millions to enjoy a more productive America.

**Swap Talk**

Other day two of your friends were swapping talk. One was Mr. Ernest N. Welloff. He claims no great genius, but does know something of what America has meant to him. Born of immigrant parents, he learned as a boy to work hard. Saved his money, later put it to work for other people. His business is manufacturing. He boosts the American Way, not so much for what it has done for him as for what it has enabled him to do for himself.

His employee, Willie B. Secure, is not so sure. He always thought "security" was simply saving up for the "rainy day." That is, until certain persons got hold of him. They just about convinced him that capitalists are his enemies. Willie's no Communist. He is just one of the 29 per cent of our population that believes company profits are 30 cents and more per dollar of sales. (Actually, they're less than 10 cents!)

**Squeeze Play**

This scene began as Willie met up with his idea of capitalism, Mr. Welloff. Neither of them are stuffed-shirts. They are quite on speaking terms.

Welloff: How're you getting along, Willie?

Willie: Pretty good, but not making as much as I'd like to.

Welloff: Neither is the company. We've got caught between prices and costs. Equipment is sky-high. Materials are sky-high. We can't increase prices much more. What's your trouble?

Willie: Same thing. Can't make ends meet.

Welloff: If only we could get more production, Willie, we might raise wages. Without more production, it would be tough on us. A tax cut would help, too.

Willie: You mean the company couldn't pay an increase? I thought it was plenty able to pay.

Welloff: What we get comes from customers, Willie. We'd have to pass it on to the public. Your wages are part of our production costs. We collect your wages from our customers. Our workers got 90 per cent of our sales dollar last year.

Willie: You mean that the union is asking for wage increases from the people?

Welloff: You know those new automatic machines we've been planning on? They cost plenty. Should we pay raises out of money we put aside last year for those?

Willie: Well, no, Mr. Welloff. Just let me get my hands on one of those beauties. Betcha I can impress the foreman plenty!

Welloff: Sure. And your production will go up. Your higher production will help us get more income out of which we can gladly pay increases.

Willie: But, Eddie over there says the stockholders are taking us for a ride. They're rolling in dough, you know.

Welloff: Well, we paid them a dividend last year, but it didn't make them rich.

**Good Security**

Willie: What did they do to deserve it?

Welloff: This big building we're in, and that annex we're putting up—our stockholders let us have money they'd saved. Their money has created jobs in this town.

Willie: They're Wall Street bankers and wealthy big-wigs, aren't they, Mr. Welloff?

Welloff: No. Most of our stock is owned by people like yourself, professional men and women, and small businessmen. People who have saved up a nest-egg.

Willie: You make it sound pretty good, here in America, Mr. Welloff. Guess I ought to be happy to have the kind of chance you had. That's pretty good security!

**This Week in History**

NOVEMBER 28 TO DECEMBER 4

125 years ago this week, on December 2, 1823, President James Monroe set his hand to the celebrated document whose policy bears his name... The Monroe Doctrine. The Monroe Doctrine grew out of the rebellion against Spain of some of her possessions in the New World. It is not, as is often believed, a principle of international law. The doctrine was not new with Monroe but it was the first formal statement of determination to oppose all European interference with matters wholly American.

### STOP TB

Tuberculosis, which causes the deaths of more people between 15 and 44 than any other disease, can be prevented. A communicable disease, it is spread by persons with "open" TB. Unfortunately, tuberculosis has no symptoms in its early stage, when it is easiest to cure. But, fortunately, it can be detected early by means of a chest X-ray.

The 3,000 associations affiliated with the National Tuberculosis Association, which are engaged in a year-round campaign against tuberculosis, urge every adult to have a chest X-ray at least once a year. If this were done, the estimated 250,000 cases of tuberculosis unknown to health authorities could be found. When all cases are found and treatment provided for the individuals, the danger of the spread of this disease will be prevented.

Christmas Seal funds help support X-ray services to find unknown cases of tuberculosis. Buy and Use Christmas Seals

## The Texas Poll

### The Statewide Survey of Public Opinion

By JOE BELDEN,  
Director, The Texas Poll

AUSTIN, Texas, Nov. 27.—The investigation of communists by the House Un-American Activities Committee has apparently had a telling effect on Texas public opinion.

Seventeen per cent of Texas voters believe there are "many communists" among federal workers in Washington, according to the latest statewide survey by The Texas Poll. An additional 64 per cent believe there are "some communists" among federal employees.

By way of comparison, only 4 per cent of the voters think that our state government and Texas colleges and universities are infested with "many communists". But another 63 per cent believe there are "some communists" among the professors and instructors in Texas colleges.

The poll asked a representative cross section of qualified voters the following questions:

1. "Among the people who have jobs in the federal government in Washington, do you think there are many communists, some, or no communists at all?"

Many .....17%  
Some .....64%  
None at all.....2

Study of the results shows that persons who have been to college are more likely to believe that communists have infiltrated the government and schools than persons with less education.

For instance, the table below shows that 94 per cent of college-educated voters think that there are at least some communists among federal employees, while only 63 per cent of those whose education ended in grade school think so.

**Federal Employees:**  
(A) Grade School.....63%  
(B) High School.....84%  
(C) College.....94%  
**State Government Employees:**  
(A) Grade School.....39%  
(B) High School.....54%  
(C) College.....56%  
**College Professors:**  
(A) Grade School.....49%  
(B) High School.....67%  
(C) College.....86%  
**School Teachers:**  
(A) Grade School.....25%  
(B) High School.....38%  
(C) College.....54%

**Key to Above Table**  
The table reports the opinions of three groups: (A) persons who went no further than grade school, (B) persons who went to high school, and (C) persons who have had some college training. It gives the percentage of each of these groups who believe that there are at least some communists among (1) federal employees, (2) state government employees, (3) college professors or instructors, and (4) public school teachers.

### BONES

Crowded out last Friday

The boys will start basketball Monday. Coach Mitchell told them last Monday that they had already had invitations to three different tournaments.

They can only enter into two out of town tournaments and the home town tournament. Davidson is the only starter that Gatesville has back, although Bill Bradley and Bruce Baize, two of the traveling squad are back.

Roberts and Daniels also will be playing good ball. Roberts and Daniels couldn't play last year, due to their class work.

The starters have not been determined as of yet, although there are many hopefuls.

The A and B girls both had a game last Monday night. The A girls lost by a close margin to the Oglesby girls, but they played a splendid ball game, especially in the last half, when they were ahead many times. The B girls won their game with the Oglesby B girls. It was lopsided all the way through, but the locals played a good game.

**R. G. Tourneau to Speak At First Baptist Church In Oglesby Saturday Night**

Carl Scott, pastor of the First Baptist Church of Oglesby, announces that the multi-millionaire R. G. LeTourneau will speak at the First Baptist Church of Oglesby on December 4th at 7:30 p. m. Mr. LeTourneau is not a preacher. In 11 years a small garage operated by this one-tool mechanic has grown into a large corporation doing a yearly business of over twenty million dollars and employing about eight thousand people.

Today Mr. LeTourneau is one of America's leading industrialists and manufacturers, a designer of heavy machinery with more than 50 basic patents to his credit.

According to pamphlet issued at his evangelistic headquarters in Rockefeller Center, New York, he flies over 200,000 miles a year for his speaking engagements.

Over 700 invitations are on file and some dates are booked two years in advance.

Those interested in business will hear the reasons and details behind this phenomenal story when "Bob" LeTourneau, president of R. G. LeTourneau, Inc., speaks at Oglesby. Oglesby extends an invitation to Coryell County to hear this man whose senior partner is God.
