

The total farm CASH income for milk from the year 1937 was \$1,475,000,000.

The Friona Star

DEVOTED TO THE INTEREST OF FRIONA AND PARMER COUNTY

Vol. 12

FRIONA, PARMER COUNTY, TEXAS, FRIDAY, APRIL 29, 1938.

No. 39

Every precaution should be taken to prevent contamination of milk used for human consumption.

COGITATIONS and APHORISMS of JODOK

Well, Well, Well! There are just two more weeks of this term of school, and, of course, the last week will not be so much school as compared with the other part of the term—just mostly the finishing frills, such as getting grades, promotions and the like, and also including the baccalaureate sermon and commencement address, with the Seniors and Juniors marching into the auditorium and taking their assigned places.

But we will all be there to see them and have our hearts thrilled again as we see another group of our splendid young people ushered out of our local halls of learning, with their diplomas, as passports or admission tickets, as it were, into still greater institutions for the dispensing of knowledge, and while this experience will have a jubilating effect upon some of these young people, it will also carry with it a degree of sadness for some and, perhaps, all of them—

“A feeling akin to pain, and resembles sorrow only as the mist resembles rain.”

Well, I guess it is just too bad for me, that I have never enjoyed the experience of being a high school graduate, never having graduated from any kind of a school, but I am still in school—the “School of Experience”—but I shall never graduate from it, until I am summoned to the portals of “Immortality,” which summons may come at any time; but even then, I shall not be a graduate—just promoted.

But, nevertheless, I enjoy going to baccalaureate and commencement services, and seeing these young people as they come out from our local schools and ready to enter the school which I have been attending all my life; and I enjoy with them the admonitions, cautions, advice and perspectives of the minister or orator, who speaks for them and to them on these two important occasions.

I get lots of “kick” as the boys say, from hearing a number of my more intimate friends talk of their experiences along various lines, such as hunting and fishing. And among these experiences was one told by George McLean about a place over in New Mexico, where one can go and easily catch 50 pounds of cat fish in one hour. Of course, one must have a New Mexico Fishing License, in order to get by the “game wardens,” but that only costs a dollar.

Then Harve Meade told one about some place here in Texas, where you can catch more fish by a dam site and the State Fishing License will allow one to catch fifty pounds of fish without paying a Fishing License. And it just occurs to me that the place Harve mentioned here in Texas must be the best place to go—by a dam site.

Harve, however, did not say on what river or stream the dam site is located, and one would need to learn the particular location before starting out there. It may be a mill dam and it may be an irrigation dam, but regardless of the purpose of the dam, they say the fish are there in great abundance, and eager to be caught.

I sometimes attend church services, I attended last Sunday and I heard something more about business, in fact, it was about big business. I had something to say last week about business and I suppose that subject has sort of struck on me, and what I heard last Sunday seemed to sort of coincide with my ideas about the Christ method of doing business. The minister made a number of quotations from unusually earned and prominent men, and one was to the effect that being a Christian was the biggest business there is.

A quotation from another man was to the effect that the reason people say that one cannot be a Christian and be successful in business, is because no one has ever tried yet. And still another—when we do learn to live the Christ way, there will be no trouble about doing business that way.

Another man who was quoted, said that Christianity is more a manner of living than it is a religion to be obeyed—and I believe it—practiced by many who have never heard it by that name.

This is a mighty complex world for all some times it seems like a mighty small for in traveling.

Six-Man Football At Friona Three Free Games Next Thur. Night.

FRIONA MAY HAVE 6-MAN FOOTBALL

For a year or so, the small schools in other sections of the country have been trying out six-man football and each school that has tried it reports better crowds, more boys coming out, and more interest, due to the fact that the game provides on a smaller scale all the thrills, fun and entertainment of the regular game.

Six-man football is played just like regular eleven-man football with the following exceptions: Each team composed of six players; playing field 80x40; all men but center eligible for pass; offensive team must have three or more men on the line of scrimmage; a two-yard pass must be made behind the line before a player can run the ball across the line of scrimmage; playing time 8 minute quarters; and a forward pass may be made anywhere behind the line of scrimmage.

A plan is under way to organize a six-man football league in this section. The following schools have shown an interest: Bovina, Lazbudd, Oklahoma Lane, Spring Lake, Vega, Adrian, Sudan, Olton, Amherst, Texico, and Friona.

The Chiefs have been experimenting with six-man football in spring training the past week and all the boys seem to get a big kick out of playing it. At the present time, the Chiefs are trying to get a six-man game with some team for Thursday night (May 5). The game will be free to the public and everyone is urged to come out to see a game of six-man football. If no team can be secured, the Chiefs will play a regulation six-man game among themselves with two squads equally divided.

FORMER UTILITY MAN HERE SATURDAY

R. A. Oliver, former local manager here for the Texas-New Mexico Utility Company, but recently transferred to the same position at Dimmitt, was a visitor here, Saturday.

Rubie won a host of friends here at Friona during the two or three years he was located here, all of whom were pleased to meet him again while he was here Saturday.

HIGHWAY 33-60

Work on construction on the east part of Highway 33-60, from the Deaf Smith county line westward to the section line just west of the Friona Draw, was completed last Friday afternoon, and this part of the highway has been opened permanently to traffic.

Coke & Braden, of Amarillo, who were the constructors for this strip of the road, have been constantly on the job since the work of paving was begun in the early part of the winter, with the exception of that part of the time in which they were hindered from operations by unsuitable weather conditions, and have one of the best appearing roads to be found within the State. Work on the west part of the road is progressing rapidly.

Leo McLellan, who is a candidate for the office of County and District clerk, was a business visitor at Parwell, Tuesday, doing a little campaign work. He was greatly encouraged by his visit.

Miss Lucille Curry was seen in Hereford, Friday.

Mr. Lee of Muleshoe, was a business caller here Monday.

CARD OF THANKS

We wish to extend our thanks to all our friends and all those who were so kind and thoughtful to us by their many acts of kindness and expressions of sympathy shown us in our hour of great sorrow in the death of our husband, son and brother.

Mrs. Mittie Sylvester, Mrs. E. V. Sylvester, Mrs. Alice Laven, Mrs. Willie Mae Beardmore, Mrs. Clara Hart, Mrs. C. A. Kitch, H. E. Sylvester, M. H. Sylvester

FRIONA FARM CLUB TO MEET

The next regular meeting of the Friona Farm Club will be held in the school auditorium on Tuesday night of next week, according to the statement of Leo McLellan, president of the club.

County Agent Jason O. Gordon, of Farwell, has consented to be present and explain the working of the 1938 wheat allotment for this county, as it seems that we are in danger of losing our correct allotment if we do not get busy and do something about it.

While this is, strictly speaking, a meeting of the Friona Farm Club the subject to be discussed is of county-wide interest and Messrs. McLellan and Gordon extend the invitation to farmers in all parts of the county to be present and hear the discussion and explanation of this subject so vital to the interest of all the farmers of the county, and it is their hope that this meeting will be attended by the largest number of Parmer county farmers in the history of the club, and if farmers want to know the best there is in store for them in regard to this Farm Allotment, they will make it a point to attend this meeting.

ATTENDED DISTRICT CONFERENCE

The meeting of the District Conference of the Methodist church, Amarillo Dist., which was held at Dimmitt, Thursday and Friday, last week, was attended by a goodly number of delegates from Friona.

Those who attended from here were: Mmes. Belew and Stowers, and Miss Lillian Rainey; and Rev. C. R. Hardy, and Messrs. A. M. Ezell, and E. T. Galloway for the first day; and these were joined on the second day by Mmes. Hardy, Ed White and Parr, and Mr. E. R. New.

The leading speaker of the conference was Dr. Selemann, of Dallas, President of the Southern Methodist University at that place.

All who attended the Conference from Friona report an interesting and instructive session.

NEW IRRIGATION WELL IS BROUGHT IN

Reports have come to the Star office to the effect that the new irrigation well that was started about two weeks ago northwest of Friona, was brought in Monday, and that it was to be pumped out and thoroughly tested as to capacity, on Wednesday.

The Star office, however, failed to receive any definite report as to the flow of the well per minute, but it was anticipated by those having the work in charge, that the flow would equal, if not exceed, any well that has been put down thus far in Parmer County. The Star hopes to have a complete account of the well and its possibilities for next week's issue.

SINGING HERE SUNDAY

The Star is authorized to announce a Community Singing to be held in the school auditorium here the coming Sunday, beginning at 11 o'clock a. m. and continuing throughout the day.

There will be a basket dinner served on the ground at the noon hour and everybody is asked to bring well filled lunch baskets for this purpose.

There will be quartettes and duets and choruses from the various parts of the county and some from adjoining counties are expected; also the Stamps Brothers Quartette will be represented.

A cordial invitation is extended to everybody to attend this singing who enjoy good singing and a good social time.

WILL PRESENT HOME TALENT PLAY

The members of the Junior Women's Club will present a home talent play here at the school auditorium on Tuesday night of next week, beginning at 8:30 o'clock p. m.

This is a play of unusually high merit and will afford entertainment for any and all who may attend, and the public is cordially invited to attend.

Mr. E. R. Day was an Amarillo visitor last Saturday.

The territory immediately surrounding Friona, and on toward the east as far as Amarillo, received at least seven-eighths of an inch of moisture in the form of rain and hail.

The rain and hail here at Friona was accompanied by one of the strongest winds that has ever been seen here, and some damage to buildings has been reported. A part of the roof on F. W. Reeve's new barn a half mile west of town was torn away, and the poultry house at the home of John White was twisted from its foundation. Other damage to the north of town, some of it being at the home of Mrs. Rosa Terry, has been reported, where some out-buildings and sheds were damaged, and at one place a two-row go-devil was turned over.

The rain and hail, however, did not reach but a few miles to the west of Friona, probably as far west as Parmerton Switch, but seems to have covered all the remainder of the county, as Homeland, Lazbudd and Lakeview communities are reported to have received about the same amount of rain and hail as was received here at Friona, where the above stated seven-eighths of an inch was received.

Seven miles northeast of town, however at the home of F. N. Welch, who has a government rain gauge at his home, the report comes that only .31 of an inch of moisture was received.

At the home of Post Master Sloan Osborn, six miles west of town, there was neither wind, hail nor rain received, and while the rain and hail were coming down accompanied by a strong wind storm here at Friona, the worst dust storm of the season was in progress at Clovis and Farwell, with no rain or hail accompanying it.

Even while the rain and hail was falling the thickest here at Friona the air was so filled with dust that visibility became so bad that one could see but about a block ahead, and the dust condition continued for two hours or more after the rain ceased, but not so dense.

Although the ground was practically covered with hail, it was fine and no damage from it has been reported. In fact, some farmers are of the opinion that the hail was beneficial to the wheat crop from the fact that it has probably beaten down the old and more advanced stalks that were ruined by the recent freeze so that the young shoots will appear quicker and grow more rapidly than if the old stalks had been allowed to stand. The only regret seems to be that the west half of the county did not receive as much of the moisture as was received here and farther east, in which case the farming conditions all over the county would have been greatly benefited.

AMERICAN LEGION AUXILIARY NEWS

The American Legion Auxiliary and Legion Post held a social meeting Tuesday night, when the Auxiliary served a “Pot Luck” supper.

Two new members were received into the Auxiliary and seven new members were initiated.

The members present were: Mmes. S. Abdullah, F. O. Griffith, Roy Price, S. P. Warren, M. S. Weir, J. D. Thomas, D. K. Roberts, E. G. Williams, Arthur Appel, A. H. Hill and Polster Rector, and one visitor, Mrs. Lovelace, of Farwell.

VISITORS TO FRIONA SCHOOL

Students from the music department of McMurry college, Abilene, Texas, presented a notable program in the school auditorium during the chapel period last Thursday afternoon. Quartets and solos were rendered by various members of the seven who visited our school.

Wednesday the music department of Dimmitt school presented a musical program during a special intermission. They brought a rhythm band, two choruses and brass band. Their numbers were enjoyed by all.

Mr. E. R. Day was an Amarillo visitor last Saturday.

BREEDERS ASSOCIATION FIELD MAN HERE

W. J. Hardy, of Mentor, Ohio, field man for the American Shorthorn Breeders Association, was a visitor to Friona and Parmer county, Sunday.

The purpose of Mr. Hardy's visit was to visit and inspect the herds of the various shorthorn breeders of Parmer County, and report as to their quality and breeding.

He was accompanied on his round of visits by J. O. Gordon, County Farm Agent; John Armstrong and W. H. Frazier, all of Farwell; and L. F. Lillard, H. G. Morris and J. A. Blackwell, all of Friona.

Among the herds visited were those of L. F. Lillard and F. N. Welch, of the Friona community; and John Armstrong, R. G. Hammond and G. T. Watkins, of the Farwell community; George Tempair, O. G. York and Wm. Wilterding, of the Muleshoe locality.

The type of stock in which Mr. Hardy was particularly interested was what is known as the “milking strain of shorthorns,” which type he found on each of the above named farms, and during his visit of inspection he was able to see some of the “tops” of the breeds for size and production.

A NEW MEXICO READER WRITES STAR

The Star is in receipt of a very nice letter from one of our subscribers, and a former resident of Friona, but now living at Hot Springs, New Mexico, Mrs. E. B. McLellan, in which she tells of her new apartment house that she is now operating in that city; also many interesting things about the city and the country there.

Realizing that Mrs. McLellan's many Friona friends and neighbors will be interested in what she has to say about her present location and surroundings, we are giving her letter in this issue of the Star for their benefit. The letter follows in part:

Hot Springs, New Mexico April 22, 1938.

Mr. John White: I am writing to tell you about my apartment, which will open on May 1st, and I am inviting all Frionians coming to Hot Springs to stop at the Amarillo Apartments, a lovely brick apartment 120 feet long, located in the north part of town, where it's cool, high and dry, and only two blocks from the hot mineral baths. It is located two blocks south of the Catholic church and one block north of the grade school and just across the street south of the Hot Springs Hospital. Look for the sign, “Amarillo Apartments,” by the corner of the courthouse square, pointing west to the apartments. The court house was awarded here from Hillsboro—will start building it soon. Also money has been set aside by Congress for a new Federal post office. We need it badly—people lined up every day out in the street waiting their turn for their mail; also the million-dollar Carrie Tingley Hospital, it's worth coming to see. Acres set out in trees and flowers. It's full, too, of crippled children. When any of my friends from Friona come to Hot Springs, come to the Amarillo Apt., where you will be welcomed with a nice apartment, garage, private bath, good bed, inner spring mattress, and gas to cook with; the only apartment in town with a private bath. I will be looking for your Panhandle people. The fishing is good. Come down soon and look for the Amarillo Apt. Mrs. E. B. McLellan

BOY SCOUTS HAVE OUTING

Scoutmaster C. R. Hardy took a carload of the local Boy Scouts to Ceta Canyon last Saturday, where they spent the day. Some of the boys passed tests in cooking and firebuilding and studies were made of trees and birds. Those going beside the scoutmaster were Jim Roy Reden, Elden, Slagle, Bob Conaway, Charles Jones, and Bobby Blackwell.

Four of the Boy Scouts now have their complete scout uniforms and others plan to get theirs soon.

RHEA RALLY AND PIE SALE SUCCESS

According to the report of our special reporter, there was a very satisfactory attendance at the Political Rally and Pie Supper, that was held at the Rhea school house last Saturday night.

All the county candidates except Sheriff Earl Both, and all the precinct candidates except J. H. Steelman were reported present, and as this was also a meeting of the Rhea Farm Club, there was a good attendance of the farmers of the community and their wives, who furnished the pies that were for sale.

C. W. Dixon, president of the Farm Club, was master of ceremonies and auctioned the pies and introduced the candidates, who were the speaker. The sale of the pies netted a sum of a little more than eighty dollars, and the ladies of the community thus felt well repaid for their part in the affair.

Mr. Dixon acquitted himself nobly as Master of Ceremonies, especially in the part of introducing the speaker, he having some appropriate and witty remark to offer each in his ceremony of introduction, and his manner of choosing places on the program for the individual speakers was unique; so the least he simply secure a card from each of the candidates present and dropped them promiscuously into the pocket of his coat, and when another speaker was needed he simply drew a card from his pocket and called the name that was printed thereon.

Our good friend Mulkey Ezell, as usual, carried off the honors for oratory and repartee, by telling good natured stories on himself. In this instance Mulkey thanked all present for the opportunity of meeting them and speaking to them in behalf of his candidacy. He stated that it was not possible for him to get out and meet all of them personally at their homes, and he thus welcomed such opportunities of meeting them. He stated that he does, however, get out and visit the homes of his prospective supporters as often as he can, and on one such occasion he was walking up to the front door of a farm house and just as he rapped at the door a serious looking bull dog came around the corner of the house and showed every evidence that he would enjoy a taste of him, but being of a different opinion himself he at once began making tracks around the house with the dog in close pursuit. The lady of the house, seeing him pass the window in such haste, but failing to see the dog in pursuit, came to the door just as he arrived from his first circuit of the house, exclaimed—“Why, Mr. Ezell! What in the world are you running for?” And Mulkey, gasping for breath, hastened to explain—“My dear lady, I am running for County and District Clerk.”

Each of the other candidates present made short and appropriate speeches regarding their candidacy and placed a claim for the suffrage of all present.

ATTENDED SUNDAY SCHOOL CONVENTION

Rev. Joe Wilson, G. M. Baker and J. A. Wimberly spent a part of last week in San Antonio, in attendance at the State Baptist Sunday School Convention that was being held there at that time.

They report one of the most interesting, instructive and enthusiastic conventions that has ever been held in this state, with an attendance of more than 5,000 delegates enrolled from all parts of the state.

FIRST BALL GAME OF SEASON Hotel vs. Plainview

The first base ball game of the season for this part of the country was played last Sunday afternoon at the old Plainview school ground between the Hotel boys and the Plainview team, and resulted in a score of 4 to 3 in favor of Plainview.

Buddy Howard made the winning score for Plainview and Russell Massey knocked a home-run in the fourth inning with one on base, thus bringing in two runs for Hotel.

Jodie Wilks, Elison Dodson and Ray Wincert twirled the ball for the hotel boys. The same teams will play at Hotel, Sunday p. m.

Garvin Thorn of the Lazbudd community, was a business visitor here Monday afternoon. He reports rain badly needed in his locality, as the wheat will be suffering if moisture is not received soon.

Mr. and Mrs. C. J. Price, of Vernon, were weekend guests here of Mrs. Price's mother, Mrs. Minnie Goodwine. Mrs. Price is one of the teachers in the Vernon schools.

Mistress of Monterey

CHAPTER XV—Continued

"Then what happened?"
"Well, in the meantime I had quietly moved to the table, picked up this letter, and slipped it into the sleeve of my habit. But the father did not notice. He seemed quite distressed, and dismissed me, saying he would call for me again. And here is the letter."

"Read it."
"There is the usual preamble. Then it goes on thus: 'Upon reaching here these padres withdrew themselves. They passed the day in sleep and idleness and the night in outrages, disturbing the repose of those who, having spent the day in work, must needs sleep at night. They behaved, indeed, like sons of darkness; breaking the jars where the chocolate of the community is kept, stealing the chocolate-pots to beat them for drums, and appropriating the balls which were kept by the community for the recreation of the religious, bowled them through the dormitories at unseasonable hours of the night, with result to the religious of terror and confusion. And they scaled the walls of the mission establishment by night, scarcely on deeds of virtue bent . . .'"

"Scarcely!" crowed Fray Mariano, sitting up on the edge of his cot and rocking back and forth. "Scarcely! Ai, por Dios, that is fine! Brother, you did a noble deed to get that letter!"

The other rose and walked over to the table, and poured wine for both of them.

"Now I want to speak of something else seriously to you. The other day when the Governor and his party were here at the mission for the confirmation of his spoiled little Excellency, young Pedro, I overheard many things. One of them was that, because you and I had not turned out to be the shining lights Junipero Serra had hoped us to be, the founding of the Mission Santa Barbara could not take place." He gazed sternly at the other.

"Oh, tut, tut, tut. Aren't you ashamed, Brother?"

"Stop it, hypocritical wretch! So I have been thinking that if we mended our ways, things might turn out so that we could be, if not actually the founders of that mission, at least those in charge of it. Is that not worth thinking about?"

Fray Rubi gazed open-mouthed in admiration.

"Splendid! Oh, what a brother have I! What a mind, what a soul! Yes, let us do that. I shall be Father Superior, and you shall be my subordinate."

"Oh, no! I shall be Father Superior, and you the subordinate . . . I am . . ."

"No, I shall be superior, you misbegotten dog!"

Fray Rubi dashed his wine-cup at Gili's face.

The other screamed, and reached blindly before him, but Rubi had retreated to a corner, for in the doorway stood the Father President, looking in at them, shielding with a protective gesture, the Indian youth, Pio.

For a moment the padre stared at the two, then covering his eyes with his hands, stumbled away, limping painfully to his own cell. As though his legs could not support him, he sank on his knees beside his bed, and resting his head on the rough uncovered planks, wept. Pio stood awkwardly beside him, watching compassionately the thin heaving shoulders.

"Padre mio," he said at last very softly. "Padre mio, come, Pio is here beside you. Do not grieve, Father." He laid a timid brown hand on the priest.

Junipero Serra raised his ravaged face to the Indian.

"Yes, Pio, you are beside me. Thank God for that. Thank God for you, my own, my true little son." He allowed Pio to lift him to the cot.

"Pio," he groaned, "I have been a sinner. I have failed, somewhere, somehow, or else I would not be now forsaken. I had gone to those two with love and forgiveness in my heart, to beg them to help me, to be my eyes, since my spectacles are gone. And you saw them, Pio. Your innocent eyes saw them. Ah, why have they been sent to me, for I do not remember any sin I have committed black enough to deserve them as a punishment."

"No, Father! Say it not! You are no sinner."

"Dear son." The father smiled faintly. "Little loyal one. You are all I have. Pio, it seems. Everything else is falling away from me; my right of confirmation, my beloved mission to Santa Barbara, my friendship with Don Pedro and now these messages that have come to-day, denying me even hope for the future. Pio," he said suddenly, "you can read?"

"A little, Father."

"Good. You shall read to me the dispatches that arrived on the San Antonio. You who have been my eyes, must now be my eyes. I have

looked at these letters once, but I can scarcely see . . . so read, my son, and carefully. I may have been mistaken when I read them."

The boy read, slowly, painfully, stumbling over the stilted official phraseology of the letters from the Viceroy, and the Father Guardian in Mexico.

There was no hope for the Mission Santa Barbara. The Governor, Don Pedro Fages, had not recommended the idea. It was regrettable the two Franciscans, Fray Mariano Rubi and Fray Bartolome Gili, were unsuitable, but it was hard to get decent men to leave Mexico, and go to the distant province of California.

There was a friendly personal letter from the Father Guardian, but that gave Junipero Serra no comfort. Serra was warned against using his temporal influence, as there were rumors abroad that the missions in California were to be turned over to the Order of Dominicans, and the Franciscans returned to Mexico.

"No, no," faltered the Franciscan. "No, Pio, you do not read that truly! California to be delivered to the Dominicans? But California is San Francisco's own country . . . chosen by his own wish . . . never should it be in other hands than

"Slipped It Into the Sleeve of My Habit."

those of the Brothers of San Francisco! Ah, it is just a rumor . . . it could be nothing else, God forbid that it should!"

Serra clasped his hands and was still. "Are there no more letters?" he asked calmly.

"Here is one, but it is not from Mexico, Padre. It is from his Excellency."

"Don Pedro! Read it."

The note was curt, brief. The Governor had received dispatches from Mexico, regarding the founding of the Mission Santa Barbara, and he presumed the holy father had received the same intelligence. It was unfortunate the holy father had not seen fit to communicate with him, or shown any disposition to enter again upon friendly relations. He himself and La Gobernadora, with an escort, were leaving on the San Antonio when she sailed for the Presidio and Mission of San Francisco, where La Gobernadora would be confined by the eminent doctor who was stationed there. And that was all.

The father rose painfully from his cot, and stood in the center of the little cell, his hands outflung to Heaven.

"Deserted! Betrayed! The face of all mankind is turned against me, but Thou, O Father, art with me! Thy rod and thy staff they comfort me! Thou art with me always . . ."

"And I, Padre," whispered Pio, kneeling at the father's feet. "I am with you, always."

The Missionary put one hand on the Indian's bowed head, and with the other still upraised, stood, with rapt face, his lips murmuring prayers. Pio could feel the heat of the trembling hand even through the thick thatch of his hair, and close to the father as he was, could feel his limbs trembling. At last Serra spoke to him.

"It is finished, Pio. And if all the years that I have toiled have brought me nothing else, it is enough that you are here, simple, loving, righteous. Pio mio." He smiled at the boy, and turned again to his cot. He knelt beside it.

"But, Padre, will you not lie down?" questioned the anxious boy.

"This attitude is more comfortable, son, for it is one to which my body is more familiar than any other. Pio, will you try to find Estevanico, and bring back my spectacles to me? For now I have many, many letters to write, and the time is getting short, ay, short."

Pio tightened the red sash around his waist and straightened proudly. "Father, it shall be done. At once." He dashed out of the cell, through the mission grounds, and in the direction of the village of the gentle Indians.

Junipero Serra did not feel the hard floor beneath his knees, nor the hard boards on which his head rested. He was pondering deeply, sadly, praying to keep the bitterness from his thoughts.

He began dreaming of the past, of his earlier days in California.

Episodes which he had forgotten long since came into his mind. His first baptism of an Indian child, the sweetness of a hedge of wild roses along a newly broken trail, a sunset glow on the white peaks of the lofty sierras. With each of these impressions came the figure of Pedro Fages, whose eyes saw the same beauty, and whose heart loved it as he did.

"Ai, mi companero," he sighed, "you have deserted me. Friend, brother."

The room grew dark. A swallow darted in the low doorway, circled the cell and flew out with a silky rustle of swift wings. Junipero Serra smiled.

"Father Francis . . ." he whispered, "Father Francis . . . I recognize thy messenger . . ."

Then he lay very still.

Into the room, after a long while, darted Pio, as swiftly and noiselessly as the swallow.

"Padre mio!" he crowed, "Padre mio! Look, your spectacles! There was no answer from the priest. Pio leaned over him breathlessly. "Look," he said, "I have them, your spectacles, Father." At last Serra stirred.

"Ah, bless you, my child?" he said in a faint voice. "Now light the candles for there is work to be done."

Pio lit the candles. If the father had not been so engrossed in his own thoughts he would have seen the youth's face was bleeding, that one eye was closed, and that his hair was standing wildly on his usually sleek head.

The father fitted his spectacles over his ears, took them off, and adjusted the steel bows a bit, wiped the square lenses with the corner of his brown robe and picked up his quill.

He must summon his brethren to him. First there were those staunch countrymen of his, Fermin Lasuen, Francisco Palou, islanders like himself. Ah, but Crespi . . . and lately he had been laid to rest beneath the altar of the church here at Carmel. And Jose Antonio Murguia, the Builder . . . but he too now slept in the beautiful church at Santa Clara, which he had builded, and whose dedication he had not lived to see.

So many of the pioneer Franciscans were dead, Garces, El Pedriano, killed by the very Indians whose souls he was bent on saving; and that other martyr of the early days of the Mission San Diego, Fray Luis Jaime, whose body, stripped, bruised, bloody, and pierced with arrows, had been found after an Indian raid, with only the consecrated hands left unscathed.

Junipero Serra sighed deeply, and breathed a prayer for those sainted souls. California had exacted her toll from the Franciscans . . . but there were many left, praise God.

(TO BE CONTINUED)

Puzzle of Folding Paper Maps Can Be Solved by Just Doing the Best You Can

Pick up the map by the upper corners and let it hang down in front of you.

Study the creases carefully to determine where it was first folded. The horizontal line through the middle looks promising, so use that and fold the map once on itself.

You will now find that some of the convex creases are facing some of the concave creases. So evidently it can't go that way. Open the map and start all over again.

Try the line running perpendicularly through the middle. There now, that's better. The concave creases lie on the concave creases and the convex creases on the convex creases.

Now fold the map a second time on itself. If it doesn't seem to fit, it's because you have folded along the wrong crease, in which case unfold the map and start all over again.

Perhaps you are trying too hard. Hold the map as lightly as you can and see if it will not help itself to fold up the way it should go.

Since you have now folded the map several times the wrong way, concave creases will begin to look like convex creases and convex creases like concave creases.

Just do the best you can, says a writer in the Baltimore Sun, folding the map until it lies before you in a long narrow strip.

Try folding the strip from left to right. If that doesn't seem correct, fold it from right to left. Or maybe

And to them he must write; to Mission San Buenaventura, San Gabriel Arcangel, San Juan Capistrano, San Diego de Alcalá, Santa Clara, San Luis Obispo de Tolosa, San Antonio de Padua, and San Francisco de Asis.

As he leaned over the table his head was light with fever, and the quill in his hand shook. For a moment he needs must lay his head down on the clean page before him, and close his eyes. Yet he must write . . . though well he knew those brothers of the farther missions would never reach him in time. But Palou, his closest brother, his Mallorcan countryman . . . he must come. He roused himself and started writing, ending the letter, "Good Brother Palou, come and assist me to die!"

For hours into the night, the little cell was quiet except for the scratching of the pen, and the gentle clicking of his rosary when he rested from his writing. Once Pio slipped in, and put fresh candles in the candle-sockets. He curled up at the father's feet, and was soon asleep.

As he wrote a white fog moved inland to the great valleys of the Salinas, the San Joaquin, the Sacramento, drowning all things in thick white vapor. Along the far-flung coast, golden beaches, shingly strands, jutting promontories and forbidding rocks the tides of morning raced.

The letters were finished, all but one. Junipero Serra walked to a wooden shutter, opened it to the cold dawn. A breath of fog drifted into the cell like a wraith, and warmed itself at the candles.

He seated himself again. With a prayer he pulled a clean page toward him, and wrote slowly:

"To Be Delivered After My Death. To His Esteemed Excellency, Don Pedro Fages, Gobernador-General of the Californias, Baja and Alta."

Lifting his spectacles, he wiped away some tears that had gathered beneath the thick lenses, then wrote, "My beloved son . . ."

Just as he finished, Pio awoke, and the swallows were aware that it was dawn. Junipero Serra read the letter, sighed, and signed it with his rubric:

"Fr. Junipero Serra."

CHAPTER XVI

Don Pedro Fages agreed with Anagustias that it was indecible for La Gobernadora to be confined by a physician, a man. But the lady herself, when she learned that a very learned man of medicine was stationed at the Presidio of San Francisco, made up her mind that she would not remain in Monterey, to be delivered by the midwife from the Mission Carmelo, who also delivered the Indian women.

The Governor himself, greatly worried by the news he had received from Mexico concerning the possibility of the missions of California being put under the guardianship of the Dominican Order, felt the need of discussing the situation with Junipero Serra's countryman, Francisco Palou, the Mallorcan, at San Francisco. Fray Palou was wise, liberal, friendly, and with him Don Pedro felt he could discuss his impasse with Serra, and other matters.

Star Dust

- ★ The Practical Pig
- ★ She'd Fly to Mars
- ★ Back to the Land

By Virginia Vale

WALT DISNEY has learned that "The Three Little Pigs" have never lost their popularity; that picture is the most popular short that he's ever made. So he very sensibly has decided to make a sequel. It will be "The Practical Pig" and not only will the three original pigs appear in it, but there will be three new characters, the three little wolves.

The success of "Snow White and the Seven Dwarfs" has encouraged him in his plan to continue with a fairy tale series; before long we'll be seeing "The Brave Little Tailor, or Seven at One Blow," in which he will star Mickey and Minnie Mouse. It begins to look as if Disney is superstitious about the numbers three and seven, doesn't it?

Merle Oberon was awfully glad to get home—and home, to her, means the United States. After spending more than a year in England, mak-

Merle Oberon

ing pictures, she went to the Riviera for a vacation, and the sunshine and swimming made her homesick for Malibu beach; that's how she found out that neither Tasmania, where she was born, nor England, where she grew up, any longer mean home to her. You'll see her next in "Graustark," with Gary Cooper and Sigurd Gurie.

She's awfully glad that Samuel Goldwyn did something about changing her from an exotic looking siren to a normal girl; seems she didn't care for the type of beauty that was wished on her when she first came to this country to make pictures, any more than Myrna Loy cared about playing Oriental vamps just because her eyes were set on the bias.

If Joan Crawford decided that she wanted to fly to Mars she'd probably succeed. Time after time she has set her heart on doing a thing, and then worked determinedly until she accomplished it. Now it's singing that keeps her busy when she is not acting before the screen; she wants to sing in opera, so probably she will. Never has anyone had more determination than that girl possesses! She went to New York recently, and her admirers promptly gathered about the carriage entrance of her hotel. They proved, when she last visited New York, that they were as determined as she. Morning, noon and night some of them were there, and she, unlike some movie stars, admitted that she was delighted. Furthermore, she let them know it.

Columbia university undergraduates have acquired the habit of voting for Madeleine Carroll in a poll that is held each spring. The students vote for the girl who would be "the most desirable companion on a desert island," and she is the winner for 1937 and 1938. Their reasons — her ability to speak French, her blue eyes, blonde hair, classic profile and attractive figure.

Paul Whiteman and his wife, Margaret Livingston, have been looking for a country home for what seems to them an endless time. They finally found what they wanted—147 acres in New Jersey, on the Delaware river, not far from the farm that Sylvia Sidney recently bought. Somehow they escaped the screen and radio stars' invasion of Bucks County, Pa., which has reached such proportions that most people think Bucks is the only county in Pennsylvania.

ODDS and ENDS . . . At last "Ivanhoe" is about to reach the stage where the cameras will begin to turn—with Clark Gable, Robert Taylor, Myrna Loy and Luise Rainer scheduled for the leading roles . . . Got a good idea for a story for Joe E. Brown? . . . He's looking for one . . . Paramount has taken Little Orphan Annie out of the comic strip and will screen "Little Orphan Annie, Detective" . . . The Revelers, the most famous of radio quartettes, now takes to the air regularly on Mondays, Wednesdays and Fridays at 6:15 . . . James Melton, once the Revelers' tenor, then a movie actor, now a concert singer, years to sing in opera. © Western Newspaper Union.

CLASSIFIED DEPARTMENT

PLANTS

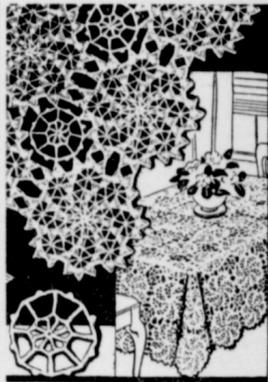

For Sale: White Jerusalem artichoke, 5¢ per pound, \$4.00 pounds, Sure crop in dry year. J. W. Clinkscale, Springdale, Ark.

SCHOOL

SCHOOL OF AERONAUTICS—Welding, Drafting, Day and Night classes. Low tuition. Swallow Airplane Co., Wichita, Kans.

Medallions Easily and Quickly Made

These two medallions . . . the small one very open to set off the spirals of the larger one . . . can be used to form any number of lovely household treats . . . dinner cloths, bedspreads, scarfs, or

doilies. Delightful pick-up work . . . so easy to do, your crochet hook will just fly from one to another. Pattern 1651 contains directions for making a 6½ inch and a 2 inch medallion (size in string) and joining them to make a variety of articles; illustrations of the medallions and of all stitches used; material requirements; a photograph of medallions.

Send 15 cents in stamps or coins (coins preferred) for this pattern to The Sewing Circle, Needlecraft Dept., 82 Eighth Ave., New York, N. Y.

Hard Nut to Crack

Despite the vast literature on seeds and seed dispersal, the botanical world does not yet know how Brazil nuts propagate naturally, because they grow—in groups of about a dozen—in a hard, thick, woody case which, so far as is known, can only be opened by the hand of man.—Collier's Weekly.

ARE YOU ONLY A 3/4 WIFE?

Men can never understand a three-quarter wife—a wife who is lovable for three weeks of the month—but a full-time fourth. No matter how your back aches—no matter how loudly your nerves scream—don't take it out on your husband. For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure. Make a note NOW to get a bottle of Pinkham's today WITHOUT delay. It's the drugist—more than a million women have written in letters reporting benefit. Why not try LYDIA E. PINKHAM'S VEGETABLE COMPOUND?

'... BUT YOU OUGHT'A SEE THE ONE THAT GOT AWAY!'

Of all the fish that American anglers seek each summer, none gives a more thrilling fight than the speckled, fresh-water trout who lives in woodland streams. The current observance of National Fisherman's week makes many a tired business man turn his thoughts to those favorite spots where trout are usually waiting to grab at a lure.

Unseen, unremembered by many anglers, is Uncle Sam's part in protecting trout streams and encouraging the growth of these game fish. So that everyone may have enough fish, the United States bureau of fisheries and various states worked overtime last year to plant 6,450,000,000 young fish. Not included in this FOTO-FEATURE presentation, but equally important, is the work done by state game and fish authorities.

Almost every state has its commission which maintains fish hatcheries, stocks rivers and lakes, and determines dates for open season.

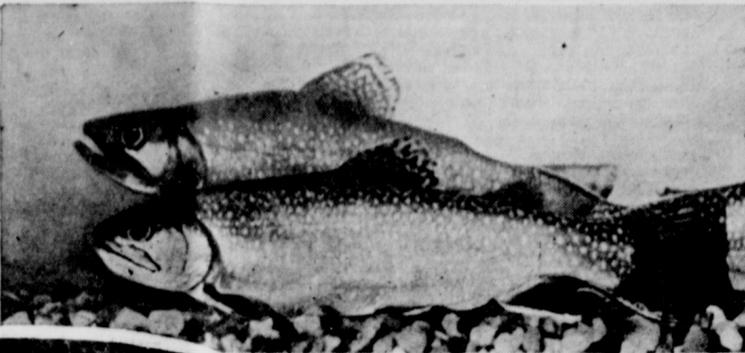

FOTO-FEATURE

Water temperature and oxygen content are measured before the bureau will plant trout in any stream.

Food content of the stream is measured with a net (above). Other means (right) are used to determine quantity of bugs.

At its experimental hatchery in Leesport, W. Va., the federal bureau develops methods of trout culture. Above, a culturist feeds the fishes. Below, the hatchery trout are tagged and measured at intervals.

Into every state the United States fisheries bureau sends crews which check stream pollution, one of the chief enemies of the angler. They have motorized laboratories.

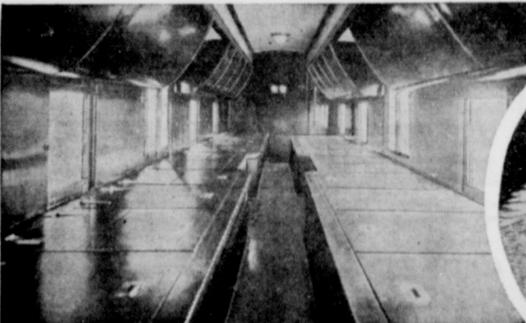

Properly fed hatchery trout grow faster than wild trout, so diets for fish are chosen with the same care as diets for humans. Careful growth records are kept, and the bureau seeks to find more efficient methods of trout culture. Fish research is an exacting work that requires constant attention by some of the nation's most accomplished scientists. Plant life, animal life, geography and weather are but a few of the subjects they must study ceaselessly.

Young trout in the hatcheries are dipped in disinfecting solutions to combat disease.

From 16,000 to 20,000 sportsmen's groups or other private organizations apply to the bureau each year for fish. Most of them are supplied. To fill such requests the bureau must seine trout from its pools (above).

On the way to the stream fish travel in an elaborately outfitted car that carries its finny passengers safely and comfortably. Water temperature must be kept correct.

Fish are planted carefully, scattered along the stream so that competition for food will be at a minimum. Thus does scientific stream management provide sport for the angler.

New, Pretty Fashions Bloom in the Spring

AND you can make them for yourself with the greatest of ease! Send for the patterns right off—even if you haven't done much sewing, they're quick and easy to follow. Each is accompanied by a complete and detailed sew chart that answers your every question.

Gay and Perky Apron.
It's exactly right to call this pretty apron a "fashion," because it fits as well as a dress and has

an animated charm. Completely protects your dresses from splatters and spots. Make it of linen, gingham or percale and trim it with bright braid.

Dress With Bolero.
This charming dress has details that belong in the very forefront of fashion—you see them in the most expensive models. The shirring at the waistline, the flare of the skirt, the wide shoulders, with puff sleeves, the whole effect of swing and gaiety, make it smartest of the smart! In silk print, flat crepe, taffeta or (for summer wear) linen or sheer silk, this dress will be lovely. Be sure to wear a flower at the neckline, too.

The Patterns.
1479 is designed for sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 requires 1 1/2 yards of 35-inch material, with 5 yards of bias banding or braid to trim.

1478 is designed for sizes 14, 16, 18, 20, 40 and 42. Size 16 requires 4 1/2 yards of 39-inch material for the dress and 1 1/2 yards of 39-inch material for the jacket.

Spring-Summer Pattern Book.
Send 15 cents for the Barbara Bell Spring and Summer Pattern Book which is now ready. It contains 109 attractive, practical and becoming designs. The Barbara Bell patterns are well planned, accurately cut and easy to follow. Each pattern includes a sew-chart which enables even a beginner to cut and make her own clothes.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

BEAUTY CONTEST for PLANTS!

HAVE you ever wondered why most of the finest gardens in your locality are grown from Ferry's Seeds? Here's why:

All Ferry's Seeds are the result of many years of careful breeding, selecting and improving. In developing a new strain, the seed experts of the Ferry-Morse Seed-Breeding Institute hold "plant beauty contests" to select the finest plants. Their seeds are planted for the next crop. Thus, year after year, weaknesses are eliminated and desirable qualities encouraged.

Select your flower and vegetable seeds from the Ferry's Seeds store display. All have been tested this year for germination and tested for true-ness to type. Pick a packet and up—Ferry-Morse Seed Co., Detroit, San Francisco.

ROY B. EZELL (Re-election).
E. G. (BLACKIE) WILLIAMS.
- For County Attorney**
A. D. SMITH.
- For County Commissioner, Precinct No. 1:**
J. M. W. ALEXANDER (Re-election).
L. P. LILLARD.
A. B. (BEE) SHORT.
W. E. (TOM) FROST.
I. L. (JIM) SHAPPER.

For District Attorney:
JAMES W. WITHERSPOON

JODOK
from one place to another, we are constantly running on to people whom we have known in some other part of the land, or else it is someone whom we have never met, but who knows someone we have known before.

Dr. McElroy told me the other day about something that happened while he was in California last winter. One of his nieces is teaching in one of the schools there, and in talking to the pupils in her class one day she mentioned his name, whereupon one of the girls said: "Dr. McElroy used to be our family doctor when we lived in Texas."

On the other hand, the world sometimes seems so large that we can get lost in it or lose some of our friends completely and not get but a very short distance away from our home. This usually happens in the case of kidnapping—the kidnapped person frequently being concealed not far from his home, but so completely lost that his friends and loved ones can never find him.

I recently received a small book or rather a pamphlet, entitled "Caps," and in the book the author calls himself "Caps." I feel sure the author is a man, for he speaks of "Mrs. Caps." He said that he had somewhere read "that a practical joke is one that an editor will pay money for." The same writer, he said, said that the world's greatest humorist was the man who named them "Easy Payments."

Well, I had never thought of it in that light, but, did he not "hit the nail on the head" in that expression? I will wager that a mighty lot of people have found these "easy payments" the hardest payments to meet that they have ever met.

I saw a man feeding a printing press one time and another man who was watching him, seeing how easy it was to do, asked that he might try it, which the printer kindly allowed him to do. But it was only a few minutes until the man was sweating furiously and spilling a lot of good print stock, printing it crooked and getting it smeared with ink and smudges from his fingers; and a few times narrowly missed getting his hand pinched badly in the press.

So, after all, I suppose we should not envy the other fellow too much

for the ease with which he does his work for which he receives his pitance, may have been won by so much hard work and persevering toil, that the competence and glory which he seems to be enjoying, may have come to him too late to give him the satisfaction and pleasure it should have given him.

No matter how well one love his home town and its people, nor how much it may pain him to feel like he is doing them a kindness to call attention to some matters when he sees that need some special attention I believe he should do so, when by not doing so, may cause someone to get seriously hurt or perhaps killed.

And that is just the way I feel about some things that I see while strolling about town, when not in my place on the street corner. And one of these things is an open cess pool that may be found near the alley that crosses Block No. 76 here in Friona.

I do not know who this cess pool belongs to, nor whose duty it is to see that it is closed or covered, but I do know that it is a threat to the life of someone, while it remains open as it was one day recently when I chanced to pass by it. It is nearly full of water, and, from all appearances is plenty deep to drown a child should one chance to fall into it, which some of them are likely to do when running and playing in that part of town.

It may also be deep enough to drown a grown person should some one chance to stumble into it. And I sometime see grown people who could not help themselves out of such a place should they fall into one. It just occurred to me that someone should do something about this matter, and that is why I am calling attention to it.

But I am just turning this copy over to the Star as my way of getting it before the people, and since some people say that no one reads that little "papah" it may be that the party or parties who should be interested in this matter will not read this; but if they do not read it, if they will come and ask me about it some time I will be pleased to tell them about it, and do it in just a kind neighborly way.

I would hate it very badly to learn that some of these little ones that I see playing about the streets every day had fallen into such a place, for if they should they would be quite likely to drown before anyone could see them and get them out. And, personally, I should hate to fall into this place myself, although, so far as the rest of the world is concerned, it would make no difference if I should fall in.

I was reading the column in The Amarillo Daily News, that is written by "The Tactless Texan," commonly known as "Old Tack," and I noticed one paragraph in particular that I think everybody in the United States should read and then stop and consider well.

It was about a man who is over here from Germany, but is an alien, and apparently has no intention of ever becoming a citizen of this country. This man seems to have a contemptible habit or desire for annoying small girls and sometime adult women, and on one occasion he was once run down and arrested by the police and he remarked that the American people have too much freedom and that they need a Hitler, and shouted "Heil Hitler."

"Old Tack" stated in his paragraph that such a man should be deported at once. I heartily agree with him on such a point, only deportation might be too slow a process for getting rid of him; and even then some other country would have to put up with the vermin. Mr. Tack, can't you think of some speedier, and just a effective way of ridding our land of such a stench?

"To know what you prefer, instead of humbly saying "amen" to what the world tells you you ought to prefer, is to have kept your soul alive."

Robert Louis Stevenson.

WHAT THE KIDS SEE

Teacher—Children, it is easy to tell what service a soldier has seen. What do you usually see on his arm when you meet him in the street?
Bright Pupil—A girl!

No Alternative
"What do you want?" demanded Mr. Newlywed. "Breakfast or work?"
"Both," replied the tramp.
Mr. Newlywed produced a large pile of his wife's home-made bread. "Eat that!" he exclaimed, "and you'll have both."

WITH THE CHURCHES

BAPTIST CHURCH ANNOUNCEMENTS

Sunday Services:
Bible School 10:00 a. m.
Preaching Services 11:00 a. m.
B. T. U., 6:45, Evening.
Preaching Services 7:45, Evening.
Prayer Meeting, Wednesday Evening, 7:30.
W. M. S., Tuesday, 2:30 p. m.
Joe Wilson, Pastor.

Notice of Services Summerfield Baptist Church

Sunday school each Sunday at 10:00 a. m.
Preaching each second and fourth Sunday at 11:00 a. m. and 7:30 p. m.
W. T. Legg, Sunday school director.
Thurman Atchley, B. T. U. director.
Rev. H. B. Naylor, Pastor, Evangelist.

Lazbuddy Baptist Church
Sunday school each Sunday at 10:00 a. m.
Preaching services each first and third Sunday at 11:00 a. m. and 7:30 p. m.
G. C. Tiner, Sunday school supervisor.

UNION CONGREGATIONAL CHURCH

"In essentials, unity; in non-essentials, liberty; in all things, charity."
Each Sunday:
Church School at 10:00 a. m. Otha Whitefield, superintendent.
Worship Service and preaching at 11:00 a. m. Carl C. Dollar, minister.
Choir practice each Friday night, Milford Alexander, choirister; Mrs. Floyd Reeve, pianist.
Business meeting on Monday night after the third Sunday of each month.
Young People's meeting each Tuesday night, 8:00.

METHODIST CHURCH

Church school will begin Sunday at 10 a. m. and services will be at 11 a. m. and 8:15 p. m. Sacrament of the Lord's Supper will be administered at the morning service. The pastor will preach at both hours.
The pastor baptized seven infants and small children and took three adults into the membership of the church last Sunday morning. The church continues to grow.
Eleven of our folks attended our District Conference at Dimmitt last Thursday and Friday. Our church made a report for the first half

the conference year which compared very favorably with the reports of other churches of the Amarillo District on nearly all items.
You will find a cordial welcome in any and all of our services. We have new folks in our congregations every Sunday.
C. R. Hardy, Pastor.

STRAYED—One buckskin saddle horse, smooth mouth, weight about 900 pounds, branded on right hip. Please leave information at Buchanan Implement Co.

Collection of Powder Horns
One collection of powder horns is in the Recent Accessions gallery at the Metropolitan museum, New York city. It includes horns used in the French and Indian war, the Revolution, and the War of 1812.

Launching of Dixie Highway
The Dixie highway was officially launched at the conference of the governors of the states interested called to meet at Chattanooga, Tenn., April 3, 1915, by Gov. Samuel Ralston of Indiana.

Pea-Soup Fog
A pea-soup fog is the term applied to very dense fogs which occur from time to time in London. The term is used in reference to their usual dull, yellow color and thick consistency.

Rain Keeps Streets Clean
Six feet of rain every year falls in Bergen, Norway, which means rain every day that washes the streets and keeps them immaculately clean.

Built Earliest Warships
From what is known of the ancient history of ships, the Phoenicians and Greeks were first to build ships of special type for war.

Fourth Largest Zoo
The Zoological gardens of San Francisco, Calif., are fourth largest in America and second in variety of specimens.

John Paul Jones an Admiral
John Paul Jones, the American naval hero, became an admiral in the Russian navy after the Revolutionary war.

COUNTRY CORRESPONDENCE

THE FRIONA HOME DEMONSTRATION CLUB

The Friona Home Demonstration club met Thursday afternoon, April 21, at the school cafeteria, with five present.

Miss St. Clair was with us and gave a very interesting demonstration of room background, showing the right and the wrong wall finishes and wall paper for different rooms also floor finishes and rugs. If you did not see this demonstration you missed something good.

Our next meeting will be May 3rd and all members are requested to bring two 1-qt. jars of canned goods; that you have canned yourself; one of fruit and one of vegetables. Each jar must have the jar-maker's brand on it. This is for the Ball Fruit Jar contest. You can take your jars of fruit and vegetables back home with you after they have been checked and counted, so let us make our club 100 per cent on this report, to be turned in at next council meeting. Don't forget the date, and come.
Reporter.

THE LIVE AT HOME CLUB

The Live At Home Club met at the home of Miss Elvira Talbott, April 20th.

As it was a day of "choose your own program," it was decided to study parliamentary laws, and Mrs. O. B. Moyer read bulletins on same.

Refreshments were served to the following: Mmes. Barnett, Miller, Davis, Lillard, Moyer, Schmitz, Taylor, Lewis, Terry, Wimberly, all members, and the following guests: Mmes. Frost and Pope, and Miss Vivian Talbott and Mrs. Miller's mother.

The next regular meeting will be at the home of Mrs. Rosa Terry on May 4th.

Weekly Schedule:
Wednesday 27: Farwell office.
Thursday 28: Lubbock, bedroom work.

Friday 29: Home visits.
Saturday 30: Farwell office.
Monday 2: Bovina, training school for bedroom demonstrators and sponsors, beginning at 10 o'clock.
Tuesday 3: a. m., Rhea girls club, picture hanging; p. m., Rhea, woman's club, bathing center study.
Wednesday 4: a. m., Farwell office; p. m., Live-at-Home club, bathing center study.

Lakeview 4-H Club News
The Lakeview 4-H club had a regular meeting on April 22. We had 15 present and studied how to change "rags to rugs."

We had a called meeting on April 26. Elected as sponsor was Mrs. Buchanan, helper, Mrs. Joe Pittman. We had a business session and the secretary read the minutes, which were approved. Katherine Gatlin was elected as bedroom demonstrator and Mary Lou Barker as garden demonstrator. We learned what kind of paper to use in a bedroom, and what to use for varnishing bedroom floors. Vegetables for 1938 were studied. Fifteen members attended.

Cecil Malone was a business visitor in Amarillo, Tuesday.

HUB NEWS

The newlyweds, Mr. and Mrs. Bill Gibson, were taken by surprise last Sunday night when a group gathered to charivari them. After the treats were passed out, outdoor games were played.

Ruby Ezell, of Friona, spent the weekend with Billie LaRue Jones. Quite a number from this community attended the singing at Farwell last Sunday.

Mrs. Harry Green, Mrs. Joe Johnson and Miss Lucille Bengner were Clovis shoppers, Monday.

Mrs. Will W. Jones went with the Senior Class to the Carlsbad Caverns. She came back reporting a wonderful trip.

Among those attending the show at Clovis Saturday night were: Mr. and Mrs. Ernest Gatlin and daughter, Mrs. J. W. Smith, Mrs. Will W. Jones, Mr. and Mrs. Clarence Day, Mr. and Mrs. Cayson Jones and children and Bob Jones and Ruby Ezell.

Mrs. J. A. Loflin was shopping in Clovis last Friday.

MESSANGER NEWS

Geo. C. Messenger and his mother drove to Friona Monday forenoon and was very much surprised to see so many cars and men on streets and in stores trading looked like good old time was coming back again.

Prof. Loren Wells of Messenger school built him a brooder house and ordered 500 baby chicks. White Leghorn strain, they are doing fine, and will soon be three weeks old.

We had around 3-4 inch rain and hail Tuesday evening that came with such a dash that it ran off the high ground but will help the soil which was badly in need of rain. The hail didn't do much damage, broke some limbs from trees and destroyed some early flowers.

Messenger school had two new pupils last week, Wanda Fay Todd, Alva Lee Hoffman, both in 1st grade. We are so glad to have these new pupils.

Founded Albuquerque, N. M.
Albuquerque, N. M., was founded in 1706 by Francisco Cuervo de Valdez, temporary governor of New Spain.

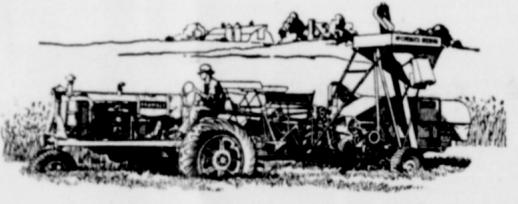

Race "Just for a Breeze"
When horses have not been running for some time they are frequently entered in races to condition them.

Products From Pine Trees
Pine trees 50 years old produce pulp wood, cabin logs, railway ties and mine timbers.

Belong to Intelligentsia
There is no better position in human society than to belong to the intelligentsia.

Coffee Sent to Europe in 1615
Coffee was introduced into Europe by Venetian traders in 1615.

Need Water to Grow Sugar
About 5,000 tons of water is needed to grow one ton of sugar.

This 6-foot McCORMICK-DEERING Combine Saves Money and Grain at Harvest Time

The McCormick-Deering No. 60 looks like a harvester-thresher, and it lives up to every expectation when it goes into your fields of ripened grain. We are proud to offer it to our customers as the one best answer to the demand for a small combine that does a real job of threshing.

The McCormick-Deering 6-foot combine is an International Harvester Quality Product. Priced low, for any farmer having several days of combine harvesting. Design follows time-proved principle... for perfect performance in all crops. Grain travels straight back from the conveyor; there are no right-angle turns or dead spaces to cut down capacity. Angle-steel main frame and body frame—combined with extensive use of electric welding—give you real harvester-thresher strength without needless weight. High-grade ball and roller bearings reduce friction at 44 points. Grain is fed in steady flow to a 28-inch cylinder carried on dustproof, oiltight, self-aligning ball bearings. Combination concave and grate encircles more than a quarter of the circumference of the rub-bar cylinder, providing large capacity and unusual threshing efficiency. Nearly 90% of the grain is threshed at the cylinder and never again mixed with the straw. This leaves the full capacity of the straw racks available to get all the grain out of the straw. Rotary, non-choke, all-metal straw racks save more grain on hillside, up and down hill, and in heavy straw than is possible with any other type. Heavy galvanized steel grain tank, located for gravity unloading. Not necessary to run engine and combine to empty tank.

BUCHANAN Implement Company

"Where Service Is Actual And Permanent"

REAL PROGRESS ON THE FARM
In this day and age, depends largely on the quality of Your FUELS, OILS, GREASES AND THE DEPENDABLE MAKE AND FIT OF YOUR REPAIR PARTS.
We are Here To Serve You With A Complete Line and Large Stock Of Each, Including Kelly Tires. Prompt and Courteous Service. WE WANT YOUR SERVICE.

Friona Independent Oil Co.
Sheets Brothers, Proprietors.

Isn't this the real problem of Beer —and almost its only problem?

THERE ARE people, of course, who steadfastly and sincerely believe beer to be intoxicating, or its use sinful, harmful, or a first step toward use of "hard liquor."

Just as sincerely we hold that the weight of the evidence is overwhelmingly against them...that beer is a mild, wholesome food beverage...and that "there is nothing more promising to combat the evil of too much alcohol than the opportunity of drinking good beer."

No...it is not in beer itself, we believe, that its gravest problem lies, but in those conditions, undesirable to us all, which sometimes surround its sale.

How should that problem be handled... by brewers, by retailers, by consumers, and by the public authorities? On its handling, we believe, depends the ultimate success or failure of the art and science of brewing, with all its manifold contributions to human pleasure and happiness and to the farm and industrial welfare of this country.

In that belief, a short time ago the Brewers Foundation was organized... to align the brewing industry with forces working for the public good in this country.

Our underlying motive... to perpetuate and promote our industry... is of course obvious. But equally obvious, we hope, is the fact that our interests coincide with the public interest.

Important progress has been made. Brewer-members of the Foundation already represent nearly half the production of beer and ale in the United States; and these members are

pledged, individually and collectively, to the Brewers Code, one significant clause of which is as follows:

"We pledge our support to the duly constituted authorities for the elimination of anti-social conditions wherever they may surround the sale of beer to the consumer."

Being practical men, we promise no miracles. We cannot immediately or effectively "police" the quarter-million points where beer is sold (nor, to be fair, have we legal authority in many cases to do so). Nor can we, immediately, bring about full compliance with the law among all retailers, nor honest enforcement by all authorities.

But a beginning has been made...and we do promise that you will see results from it.

How far we can go, and how soon, depends very much on ourselves...but partly also on you.

Public opinion, once aroused, can operate to bring about honest enforcement of existing laws. Restriction of your patronage only to legal, respectable retail outlets can and will operate to raise retailing standards. Public preference for the products of Foundation members* will bear witness of your approval both to members and to cooperating retailers, and will encourage them to renewed efforts.

This is, therefore, at once a statement of our objectives and an appeal for your support, without which we must fall short of our high hopes. We urgently invite your full and sympathetic cooperation.

UNITED BREWERS INDUSTRIAL FOUNDATION
21 East 40th Street, New York, N. Y.

Correspondence is invited from groups and individuals everywhere who are interested in the brewing industry and its social responsibilities.

M. L. Flippen was seen in Clovis, Saturday.

Charlie Lovelace, of Farwell, was in Friona, Wednesday evening.

Mr. and Mrs. R. H. Kinsley were shopping in Amarillo, Monday.

L. L. Massey of Austin, arrived here Sunday, and will transact business this week.

Mr. Alexander, of Clovis, New Mexico, was a business caller here, Tuesday.

Miss Melzia Chronister spent the past weekend in Hereford with her sister, Miss Thelma Chronister.

The Messers and Mesdames: Irwin Johnson, V. E. Weir and H. C. Wells and Miss Freda Johnson were Clovis visitors, Saturday.

It is rumored that there will be a meeting of the various committees of the Farmer County Fair Association held here tonight (Friday).

Miss Pauline Clark left Saturday for Cumby, Texas, where she was called to the bedside of her mother, who was very low.

About twenty-five couples from Friona drove over to Hereford, Tuesday night and attended "Friona Night" at the skating rink there.

D. K. Roberts, of Farwell community, candidate for County Judge, was a visitor here Wednesday afternoon. Judge Roberts is making a most favorable impression on our people with whom he comes in contact.

TEXAS PLANNING BOARD

Texas Planning Board figures show that Texas' agricultural crops last year included more than 72,000,000 bushels of corn, 41,000,000 bushels of wheat, 30,000,000 bushels of oats, 12,000,000 bushels of rice, 52,000,000 bushels of sorghum grains, nearly 2,000,000 tons of hay, more than 1,000,000 bushels of cow peas, nearly 7,000,000 bushels of sweet and white potatoes, 5,230,000 bales of cotton and 2,329,000 tons of cotton seed.

Texas has more than 7,000,000 head of cattle, 1,444,000 head of milk cows and more than 1,500,000 hogs, according to the Texas Planning Board. On Texas farms and ranches and in feed pens on the first of the year, there were 9,100,000 sheep and lambs and 3,050,000 Angora goats.

The number of cattle of all kinds shipped out of Texas during 1937 was 778,000 greater than the preceding year, according to the Texas Planning Board.

Further proof that Texas is becoming one of the great dairy states of the nation is contained in a report by the Texas Planning Board which points out that there are 42,000 more milk cows in Texas this year than in 1937.

The total value of all crops, livestock products, minerals, and values added in processing the crops and minerals in Texas last year was more than \$1,500,000,000, according to the Texas Planning Board.

Meaning of Democracy
Democracy is a government in which the people are enabled to exercise an influence over the conduct of public affairs under constitutional forms. The word is derived from the Greek "demos," the people, and "kratein," to rule.

Half of Head Shaved
All male prisoners of the Ohio penitentiary in its early days were required to have the right side of their heads shaved close once a month. This was so that escaped prisoners could be more easily detected.

Meteorites Heavy
Meteorites are about the heaviest of rocks. Some of them are pure iron and nickel. Even the so-called "stony meteorites" contain a good deal of iron and are heavy, compared with ordinary stones.

First Egyptian Pharaoh
From translations of inscriptions, authorities are convinced that King Menes was not only first of Egyptian pharaohs but that he was the King Minos who built the great palace at Knossos in Crete.

Walled City Has Magic Well
The walled city of Carcassonne in southern France, built over 2,000 years ago, has a so-called magic well. Legend says that "at the bottom is the gate to Fairyland."

Invented the Wheelbarrow
Leonardo da Vinci invented the wheelbarrow, adding the wheel to the old handbarrow, which was a box with handles carried by two men.

Latitude Lane
Latitude Lane is another name for Catfish row, famous negro section of Charleston, S. C., and the locale of "Porgy and Bess."

The Hohenzollern Family
The name of the Hohenzollern family, which ruled Germany from 1871-1918, was taken from a hill called Zollern near Stuttgart.

Defeat of Italians in World War
The most disastrous defeat suffered by the Italians in the World War was inflicted by the Austrians at Caporetto.

London's Old Globe Theater
London's Globe theater, where many of Shakespeare's first plays were produced, seated 1,200 persons.

No Longer Great
The great man's great works are done when he begins using his power to get even with somebody.

Men and Temptation
Jud Tunkins says some men are led into temptation; others spend their lives hunting it up.

Norfolk Oldest Dukedom
The duke of Norfolk holds the oldest dukedom in England. It was created in 1483.

"Soldier Out of Luck"
S. O. L. is American soldier slang meaning "Soldier out of luck" or "Short of luck."

Roquefort Cheese From Cow's Milk
American Roquefort cheese is made of cow's milk.

Fourth Largest Island
Borneo is the fourth largest island in the world.

Cats at Sea

In the old days of sailing vessels, it was considered very unlucky for the ship and all aboard her if the ship's cat left the vessel while in port and did not return. Many were the gloomy predictions of storms and ill-fortune among the seamen, if their ship set sail without the cat, and even if another cat could be brought on board at the next port, it was doubtful whether the ill-luck could thus be turned. Even now sailors take very great care of the ship's cat, whose duty it is to keep the mice and rats in check. She is the pet of all the crew, even if she is no longer the object of the old-time superstitious beliefs.

Wood Used for the Cross

Most of the alleged fragments of the cross preserved as sacred relics are pine. There are many legends on the subject. According to one, the original Christian cross was made of four kinds of wood—palm, cedar, olive and cypress—representing the four quarters of the earth. A poetic legend has it that the true cross was made of aspen, which accounts for the almost constant quivering of the leaves of that species of tree.

Columbus and the Bahamas

Columbus is believed to have discovered the Bahamas on his first voyage to the New World, Spain and England fought over them for more than 300 years and pirates time and again plundered them. Three forts, Charlotte, Montagu and Fincastle, were built by England to protect Nassau. A tower, romantically known as Blackbeard's tower, was reared there by pirates.

Growth Goes On in Adults

Scientists have found that the growth of the human body does not stop at 24 years, nor even at 40. A person may increase in height more than half an inch after he is an adult, and legs and trunk keep growing slightly until late in life, and arm length seems to increase slightly.

NO WARNING

Jones was sitting with his wife behind a palm on a hotel veranda late one night when a young man and a girl came and sat down on a bench near them. The young man began to tell the girl how pretty and good and lovable he thought she was.

Hidden behind the palm, Mrs. Jones whispered to her husband: "Oh, John, he doesn't know we're here, and he's going to propose. Whistle to warn him."

"What for?" said Jones. "Nobody whistled to warn me."—Indiana Farmer's Guide.

Breaking the News

Murphy had been careless in handling the blasting powder in the quarry and Duffy had been deputed to break the news gently to the widow.

"Mrs. Murphy," said he, "isn't it today the fellow calls for the weekly payment of Murphy's life insurance?"

"It is," answered Mrs. Murphy. "Well, now a word in your ear," said Duffy. "Sure ye can snap your fingers at the fellow today."

Complimentary

"Did you notice," said the agrieved playwright, "how the Daily Blank slammed my latest play?" "Don't you worry about that," said his friend cheerfully. "The critic of that paper's just like a parrot—only repeats what everyone else is saying."

TEST, TEST AND TEST.

AMERICAN industry, according to Consumers Information, surpasses that of any other country in its exact methods of testing products and so assuring maximum performance before passing them on to the user. One company reports, for instance, that 25% of its labor and cost of production goes into testing. Above are shown tests of two of the 600 different operations which go into the manufacture of their vacuum cleaners. The young lady is balancing the fan, an intricate job in which she puts tiny drops of solder on the light side until the balance is perfect. Inset operator testing air passage, suction power and wattage, on a government test-block.

Speaking of Sports

Baseball and Hockey Keep Stewart Busy

By GEORGE A. BARCLAY

Bill Stewart, manager of the Chicago Blackhawks, could give you a personal testimonial concerning the veracity of the old saw that "all work and no play makes Jack a dull boy." Compared to Bill the one-armed paper hanger, the Swiss bell ringer, and the perpetual motion man are pikers.

You'd think a man would be entitled to a rest after accomplishing the miracle of winning the world's hockey championship with a team that people tittered at when the play-offs began. But not Bill. No sooner was the Stanley Cup series over than he donned his spikes, mask and chest protector and began calling balls and strikes as a National league umpire.

When the world's series was finished on October 11, last year Stewart grabbed a plane in New York and flew to Muskegon, Mich., to take charge of the Blackhawks in his first year as their manager. Bill had been a referee in the National Hockey league in between baseball seasons for several years. He developed ideas on how hockey should be played as a result of his observations of the various teams. How successful those ideas were was demonstrated when the underdog Hawks bagged the cherished Stanley Cup by routing the favorite Toronto Maple Leafs.

Hockey Student

The Hawks had finished sixth in a league of eight teams and barely edged into the Stanley Cup finals. First they took on the Montreal Canadiens. Everybody said they'd be a pushover. In the first game it looked as if the prediction would come true. The Canadiens won. Then the teams moved to Chicago and the Hawks captured two games, winning the right to meet the New York Americans, winners of the series between the second-place teams of the league's two divisions.

In the series with the Americans the Hawks repeated their winning performance. That put them in the finals for the Stanley Cup which never before had been won by an American team managed by an American. Their opponents were the admittedly superior Toronto Maple Leafs. The Hawks were on the spot.

The first game was at Toronto. Late in the day of this contest, Stewart regretfully decided that Mike Karakas, his star goalie, would have to be left out of the line-up because of a broken toe.

Bill Stewart

Confident that they would have an adequate defense man in Andy Kerr, a reserve goalie of the New York Americans, the Hawks were dumbfounded just before game time by a maneuver of the crafty Connie Smythe, the Leafs' manager. With the connivance of league officials "English Alfie" Moore, a castoff veteran, was foisted on the Hawks although his afternoon had been spent in a tavern and his orders for more ale had been frequent. But by some magic, Alfie played a whale of a game, made himself a hockey hero and held the Leafs to one goal while the Hawks were scoring three.

League politics again intervened and Moore was declared ineligible for the second game. Paul Goodman, an inexperienced recruit who had never seen a major league hockey game, was substituted. Goodman was easy for the Leaf marksmen. Red Horner, the Leafs' bad man, contributed to the rout by breaking the nose of Doc Romnes and cutting Hawks Roger Jenkins and Louis Trudell to the skull with his stick. The Leafs won 5 to 1.

Back they came to Chicago for the third and fourth games. Mike Karakas was back in the nets, his broken toe protected by a special steel guard. With the score tied at a goal apiece late in the game, Doc Romnes, who earlier got retaliation from Horner with his stick, gave the Hawks the win with a long hard shot.

In the final game the Blackhawks who couldn't possibly do it, won easily, taking the now demoralized Maple Leafs by a score of 4 to 1.

So Bill Stewart is a happy although tired man. And if he misses a few close decisions in the early days of the National league season, maybe it will be because he's thinking of hockey instead of baseball.

Another Ruth?

Rudolph Preston York, Detroit Tiger catcher who hails from Atco, Ga., has two ambitions this season. One is to break Babe Ruth's record for home runs. The other is to help bat the Tigers to the American league pennant. If Rudy accomplishes the first ambition, the second may automatically take care of itself.

York is hoping for the greatest season a ball player has ever had. Fans who saw him in the South this spring marveled at the way he bashed balls out of the parks. He wasn't establishing any new marks as far as his average was concerned, but whenever his bat met the ball, it was good for a non-stop trip.

Rudy has no illusions about being a great catcher although Cochrane says he is a very much improved receiver. But he does know he can hit the ball. He also knows it is possible to break Babe Ruth's record.

Rudy York

ords, because he has crashed one down already. He drove out 18 home runs in a single month—August, 1937—which was one more than Ruth ever recorded for a similar period.

His total home run production in 1937 was 35. York had been tried out around the infield and found wanting. Detroit was desperate for catchers after the accident to Mickey Cochrane, so they put Rudy behind the plate. When Cochrane told him he was to be the club's regular catcher, he began a batting stampee that made history.

The season was then about two-thirds over, but he socked the ball at a clip that sent his average up 60 points. When the season closed he was the only batter in the league to average better than two bases every time he connected for a hit.

Polish Behemoth

Stanislaus Zbyszko, ancient Pole who was formerly king of the heavyweight wrestlers, is back in the United States, not as a wrestler, but as an impresario. Somewhere in the hinterlands of Poland he caught up with a giant named Wladyslaw Talun, who is first cousin to the "missing link" and who, Zbyszko believes, will be the next heavyweight wrestling champion.

Talun, towering six feet, eight inches in height and weighing 278 pounds was a lumberjack in one of Poland's vast forests. Zbyszko took the youngster to South America with him several years ago. This modern Gargantua didn't wrestle with any of the Gauchos, but spent hours each day learning the fundamentals of catch-as-catch-can from the old master.

Two months ago Zbyszko brought Talun to the United States. The pupil had apparently learned his lessons well, for he has had 20 matches and has yet to lose. None of his matches have gone beyond 12 minutes.

The bald-pated Zbyszko is enthusiastic about his young charge. For sentimental reasons he would like to see another Pole grab the championship, for Zbyszko is a great patriot. During the war when Poland was making a bid for independence Zbyszko, who had gathered a large fortune through his mat career, tossed practically everything into the treasury. Like his famous compatriot, Paderewski, the elder Zbyszko is a brilliant pianist.

Here and There

For the fifth time in the 38-year history of the American Bowling Congress a perfect 300 game was bowled during the meet in Chicago. Mike Blazak of Conneaut, Ohio, was the bowler who entered the hall of fame along with Billy Knox of Philadelphia; Charlie Reinlie, Kenosha, Wis.; Jack Karstens, Fort Sheridan, Ill., and Carl Mesenberg, Scranton, Ill. Approximately 1,800,000 games have been bowled in the tourney since 1900, so the chances of getting a perfect score are one in 360,000. . . . Ray Schaik, Jr., son of the greatest of White Sox catchers, is a starting pitcher for Hyde Park high school, Chicago. Young Schaik, although weighing only 140 pounds, is still growing and by graduation time two years hence may get a nod from organized baseball.

Rogers Hornsby has finally landed another baseball job, this time as coach of the Baltimore Orioles in the International league. The Rajah is also to be a pinch hitter. The club management emphasized the fact that he had been signed solely in a coaching capacity and not with any idea that he would succeed Bucky Crouse as manager. © Western Newspaper Union.

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON

NEW YORK.—Gen. Saturnio Cedillo, the feudal chieftain of the province of San Luis Potosi, is moving out of the ruck as the No. 1 menace to the Cardenas administration, according to all one can glean at this crossroads.

A friend of this writer, an oil operator who has reasons for remaining anonymous, brings news from Mexico that the big, swarthy Mestizo, the most conspicuous hold-out on the state agrarian program, is gaining a following in a long sweep of Mexican provinces, and, in this view, dissident factions will swarm in behind him, if there is a further drift toward civil war.

He has the friendship and backing of various foreign interests, according to my informant, and around his huge, stolid, grim person there is gathering powerful opposition to the government.

He is a self-made fighting man who served his apprenticeship in various minor work-outs, before the big upheaval of 1910, when old Porfirio Diaz was overthrown. He joined this revolt, but called himself a "conservative revolutionist."

He never liquidated his personal army, now numbering about 10,000, and his autocratic state is firmly encysted in the constitutional commonwealth. When he resigned as secretary of agriculture on August 16, of last year, it was reported that he had made a truce with President Cardenas, but that talk seems to have been premature.

He was a member of the National Revolutionary party committee of 1934, which drafted Mexico's six-year agrarian and economic plan, but has been a determined and effective opponent of such fixings, particularly the Cardenas agrarian plan.

My friend picks Senors Cardenas and Cedillo as the two strong men of Mexico, one being driven left and the other right by the present social tension.

THE Swiss bell-ringers, the one-armed trap-drummer, the circus ring-master and all such supposedly busy and preoccupied people are just snoozing along compared to Dr. Morris Fishbein, goal-keeper against medical quacks, heresies, panaceas, innovations, utopias and unsanctioned experiments.

When Dr. James H. Means, retiring president of the American College of Physicians, drops a few provocative words about self-imposed medical reform, they scarcely hit a press wire before Dr. Fishbein swings a devastating counter-assertion.

Dr. Fishbein is elaborately equipped and organized for timely blasts against any encroachment of subsidized or socialized medicine. As editor of the Journal of the American Medical Association, with headquarters in Chicago, he commands a large staff of secretaries and assistant secretaries, trained like a fast ball club to field any challenge or dissent.

He is undoubtedly the most highly publicized medical man in America. Through the journal, he reaches the nation's 125,000 doctors; through Hygeia, the more popularized medical publication, he carries his message to many more thousands and is a prolific writer for national magazines.

He wolds hundreds of exchanges and eight or ten medical books every week, lectures, speaks on the radio, reviews books, writes books and, always enjoying a fight, keeps up a fast running fight against the quacks.

When he finished Rush Medical school, at the age of twenty-three, he had the choice of becoming a pathologist for the state of Indiana, or an assistant editor of the Journal of Medicine.

He chose the latter. Mrs. Fishbein, who was Anna Mantel, serves through the war with him, traveling with him and assisting him in the biggest and busiest job of medical journalism ever attempted. They have three children.

Dr. Fishbein, plump, affable, bald, and forty-eight years old, also is deep in art, music, literature, the drama, bridge, golf and public affairs, exercising a sharp critical judgment in all these fields. He is a magnificent demonstration of how a knowing doctor can build up his basal metabolism. © Consolidated News Features.

What to Eat and Why

C. Houston Goudiss Discusses LAXATIVE FOODS ★

Nationally Known Authority on Food Shows How Right Diet Can Help You to Avoid Health Hazards of Faulty Elimination

By C. HOUSTON GOUDISS

6 East 39th Street, New York.

THOUSANDS of men, women and children are alive today because we have learned how to prevent many types of infections and how to cure diseases which once caused untimely deaths.

We have reason to be proud of the achievements of science in fighting disease and lengthening the span of life. But we should be ashamed of the fact that hundreds of thousands of individuals are not getting the most out of life—indeed they are not realizing half their potentialities—because improper eating and faulty habits of hygiene cause them to suffer from that great evil of civilization—constipation.

EVILS OF CONSTIPATION

Someone has called constipation the most deadly disease, and while this may seem like an extreme statement, it becomes justifiable when one realizes the untold misery and wretchedness that may result when food residues remain to stagnate and putrefy in the body.

Constipation muddies the complexion, dulls the eye and befogs the brain. It causes a general feeling of discomfort and fullness in the abdomen, lack of appetite, bad breath, coated tongue, a feeling of lassitude and a tendency to become easily fatigued.

By weakening resistance, it opens the way to numberless diseases. Serious complications, such as irritation of the appendix, may occur as a result of the friction of hard masses of waste against the delicate walls of the intestine. Piles have frequently been laid at the door of faulty elimination.

Do you wonder that I consider prompt, regular elimination the keystone of good health. Its importance is readily understood when you consider the processes by which food is digested and absorbed.

FATE OF FOOD IN THE BODY

From the mouth, food passes down the esophagus into the stomach, where it is penetrated by the gastric juice. It then passes into the small intestine where it is mixed with the secretions of the liver and the pancreas. Here the nutritive elements are absorbed by minute, hair-like tubes which line the intestinal walls. These tubes converge into the blood vessels and lymphatics which transport nourishment to all parts of the body.

Undigested residues pass into the large intestine or colon, where they are normally moved along by a series of muscular contractions known as peristalsis, and finally evacuated.

The amount of the evacuation varies in bulk with the amount of indigestible roughage contained in the food. When there is insufficient bulk to promote normal peristalsis, waste accumulates and we have the condition known as constipation with all its resulting evils. Bacteria prey upon the stagnating material, producing poisons which may be absorbed by the body.

There is not the slightest excuse for allowing this condition to develop. For the misery and wretchedness of constipation may easily be avoided by including in the

daily diet sufficient laxative foods, that is, those rich in fiber or cellulose.

BULK OR FIBER ESSENTIAL

Because of their fibrous framework, plant foods are our chief source of cellulose or bulk, and therefore, our greatest aid in promoting normal elimination. Vegetables and fruits are sworn foes of constipation, and unrefined cereals are also extremely valuable.

SOME LAXATIVE FOODS

Foods with an exceptionally high residue include raw fruits, especially those with skins and seeds; dried fruits, such as apricots, prunes, figs and raisins; raw vegetables; such cooked vegetables as onions and leafy greens; the legumes, that is, dried peas and beans; whole grain cereals and bran.

Among the vegetables, don't overlook cabbage, lettuce, celery, spinach, brussels sprouts, string beans and green peas.

Foods which tend to form a little gas in the intestines, including spinach, onions and cauliflower, are also useful stimulants to intestinal movement.

In addition to providing cellulose, the acid fruits, such as oranges, lemons and grapefruit, act as a mild stimulus to increased peristaltic motions.

NEED FOR VITAMIN B

Another important factor in promoting normal elimination is vitamin B, which has been shown to be essential for good muscular tone and activity of the digestive tract. Investigations with experimental animals have demonstrated that it requires twice as long to empty the large intestine when the diet is deficient in vitamin B. Yeast, egg yolk, milk, whole grain cereals, liver and green leafy vegetables are good sources of this vitamin.

LIQUIDS ESSENTIAL

A sufficient quantity of liquids is likewise necessary to prevent the contents of the lower intestine from becoming too hard for easy evacuation. In addition to water, the diet should therefore contain an abundance of milk, fruit juices and other beverages. Acidophilus milk and buttermilk are especially beneficial.

Fats and oils, used in moderation, act as gentle lubricants.

REGULAR HABITS

It is most important to eat at regular hours and to establish regular times for evacuation, as this is a great aid to body rhythm. Guard carefully against overeating, for this practice is a frequent cause of constipation. When

Have You a Question?

Ask C. Houston Goudiss
C. Houston Goudiss has put at the disposal of readers of this newspaper all the facilities of his famous Experimental Kitchen Laboratory in New York city. He will gladly answer questions concerning foods, diet, nutrition, and their relation to health. You are also invited to consult him in matters of personal hygiene. It's not necessary to write a letter unless you desire, for postcard inquiries will receive the same careful attention. Address him at 6 East 39th Street, New York City.

the digestive system is overworked, none of its functions can be efficiently performed.

The homemaker is largely responsible for safeguarding her family against the dangers of faulty elimination. For she has it in her power to plan meals that will help normal individuals to avoid the curse of constipation.

Questions Answered

Mrs. B. T. M.—Do not worry if your child prefers the egg yolk to the white. The white is chiefly protein, and he can easily obtain protein from other foods, especially milk. But the yolk contains an abundance of minerals and vitamins in addition to protein and fat. Nutritionists have determined that the inclusion of one egg yolk daily in an otherwise adequate diet is an effective method of balancing the intake and output of iron in a child's diet.

Miss S. B.—No, the generous use of cream cannot be considered as a substitute for taking milk as a beverage or in cooked dishes. Cream is much higher in fat and contains less protein, minerals and vitamins, with the exception of vitamin A. Cream deserves to be included in the dietary for its vitamin A content, but it should not replace milk.

Mrs. A. McK.—Strawberries contain vitamins A, B and C. Recent experiments indicate that they rank with citrus fruits and tomatoes as a source of vitamin C. © WNU—C. Houston Goudiss—1938.

Hidden Benefits

Few housewives realize the underlying advantage of the use of a good light-oil furniture polish! Most polish is used only for the luster it bestows on the chairs, tables, piano, woodwork in the home. Rubbing the polish on cleans the furniture—works up a glow—and the outward effect is fresh and sparkling! But that is only part of the housewife's reward. For out of this domestic routine comes definite benefit to the furniture! A reputable polish, with a light oil base, does what is known as "feeding" the finish. The "massage" causes the oil to penetrate, seep into the pores of the wood—just enough to lubricate—and keep it healthy! Here, it is important to note that cheap polishes are made with a heavy oil base—and are "greasy" and unpleasant to use. The best polish—made with a fine light-oil base—is never greasy. Applied on a damp cloth (according to directions), it is neat to use and proves a boon to the furniture! Lack of polishing—or the use of a poor polish—will cause the finest wood to dry out, crack, split—for wood is a product of Nature and needs a certain amount of oily moisture. So polish the furniture regularly! Use a quality oil polish—it pays! For not only does the furniture look better—it is better! Its life is preserved!

HOUSEHOLD QUESTIONS

Preserving the Oilcloth.—Bind the edges of oilcloth used for table coverings with bias tape. This will keep the edges from tearing or becoming ragged.

Attractive Garnish.—As a garnish, lemon slices may be sprinkled with paprika, rolled in chopped parsley, or mint or striped with pimiento.

Rinse Silks Well.—Silk underthings should be washed in water that is barely warm, and should be rinsed in at least three fresh rinsing waters.

When Painting Molding.—A piece of heavy cardboard is handy for the amateur painter to hold under the molding to protect the wall paper.

When Someone Is Ill.—Always wrap a rubber hotwater bottle in soft cloth before placing in a patient's bed. Place the bottle near but not against the patient's flesh. If placed too close the patient may be burned before realizing it.

Hemming Sash Curtains.—Make the hems of sash curtains the same at the top and bottom. You can then use them either end up.

WHEN YOU CLEAN HOUSE USE O-CEDAR—THE POLISH THAT CLEANS AND PRESERVES YOUR FURNITURE

More women use O-Cedar Polish than any other kind—for furniture, woodwork and floors. It CLEANS as it POLISHES.

O-Cedar POLISH MOPS · WAX

Bargains YES!

The FEATHERHEADS

By Osborne

FINNEY OF THE FORCE

By Ted O'Loughlin

GAVE HIM AWAY

"Your wife told me she was dumbstruck when you came home tipsy last night."
"Merely a figure of speech, old man, merely a figure of speech."

Sure to Come

"Step up here, O'Brien, and let me have a good look at ye!"
"What's the idea?"
"I've got some insultin' things to say to ye an' I want to be able later on to identify ye positively as the man who shtruck me."

Got His Job

"There goes a fellow who chased around for years trying to land a political job."
"Well, what does he do now?"
"Nothing, he got the job."

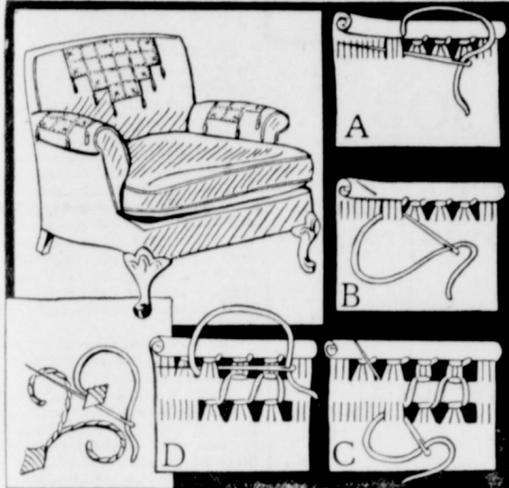

POTATO GUSH

White Potato—Oh, Miss Sweet Potato, you are so sweet.

HOW TO SEW

by Ruth Wyeth Spears

Italian Hemstitching for a Chair Set

THE chair set shown here is made of an even meshed cream linen, marked off in squares of Italian hemstitching. Tiny scrolls in outline stitch with two diamonds in satin stitch are embroidered in all the outside corners. The scroll motif is shown at lower left. The tassels are made by raveling strips of the material and then rolling them.

The chair back piece measures 15 by 10 inches finished, and the chair arm pieces 7½ by 7½ inches. Allow ¼-inch at all edges for the rolled hems. The hemstitched squares measure 2½ inches. Mark them in pencil. The method of hemstitching the rolled edges is shown here at A and B. Remember that a moist thumb always helps in rolling an edge evenly. Italian hemstitching is really just two rows worked together as shown at C and D. To prepare the rows, draw two threads, skip four and then draw two more.

Readers who have received their copy of Mrs. Spears' book on Sewing, for the Home Decora-

tor, will be pleased to know that Book No. 2 is now ready. Ninety embroidery stitches; fabric repairing; also table settings; gifts; and many things to make for yourself and the children. If you like hand work you will be pleased with this unique book of complete directions for every article illustrated. Postpaid upon receipt of 25 cents (coin preferred). Just ask for Book No. 2 and address Mrs. Spears, 210 South Desplaines St., Chicago, Ill.

Ask Me Another

A General Quiz

The Questions

1. How is the date of Easter determined?
2. By what name is the Chinese philosopher K'ung Fu Tze usually known to the Western world?
3. What were the "Three Estates" in France prior to the Revolution?
4. Who makes the laws for the District of Columbia?
5. How many lawyers are there in the United States congress?
6. How much raw silk does the United States import?

The Answers

1. It is the first Sunday after the full moon on or next after March 21.
2. Confucius.
3. Nobles, clergy and common people.
4. Congress.
5. Seventy-one out of the ninety-six senators and 249 out of 435 representatives are lawyers.
6. During the calendar year 1937, 57,815,573 pounds of raw silk was imported, with an import value of \$106,594,358.

Pure as Sunlight

Motor oil free of every impurity... acid-free... that is the scientific achievement of Quaker State's four great, modern refineries. The finest Pennsylvania crude oil is transformed into a perfected lubricant, so pure that motor troubles due to sludge, carbon and corrosion are wholly overcome. Your car will run better, last longer with Acid-Free Quaker State. Retail price, 35¢ a quart. Quaker State Oil Refining Corporation, Oil City, Pennsylvania.

Uncle Phil Says:

A Time for Anger

"Always a soft answer" is poor philosophy. Anger, righteous anger, is as important and necessary as lightning is to cleanse the atmosphere.

"Reading makes a full man," as Bacon said, and observation makes an original one.

When a young man sows his wild oats he often mixes too much old rye with them.

All That's Left Untaxed

If people will morbidly attend murder trials, why not charge them \$1 admission?

Utopia is impossible because we are not Utopians. We ought to know that.

Can one be aggressive and well-bred at the same time? Well, why not?

Sentiment Is Their Ticket

People "let themselves in" for a good part of their troubles.

A man may be proud of his "superiorities," but it may be only his glands.

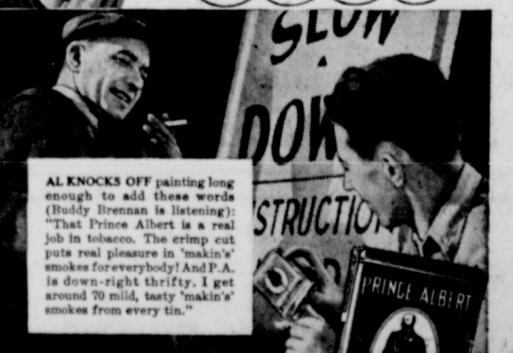

A grouch salvages only one privilege: He doesn't get picked on.

Bear in mind that privileges generally involve taking on responsibilities.

"I CAN ROLL 'EM NOW TO BEAT ALL— AND EVERY CIGARETTE SMOKES EXTRA MILD," SAYS AL HAZARD

AL HAZARD is painting some good advice to motorists, while he gives some good tips to "makin'" smokers. Al speaking: "Gettin' a quick, neat 'makin'" smoke is no trick at all with Prince Albert. That crimp cut sets right—doesn't bunch up or spill out. And that's why P.A. draws good, and smokes slow and cool. Plenty mild, too, for such rich-tastin' smokes. I say, if you smoke for pleasure, smoke Prince Albert." (Good advice for pipe-smokers too!)

ON THE JOB OR SITTING HOME WITH THE MISSUS, PRINCE ALBERT GIVES ME A GOOD, RICH-TASTIN' SMOKE EVERY TIME

AL KNOCKS OFF painting long enough to add these words (Buddy Brennan is listening): "That Prince Albert is a real job in tobacco. The crimp cut puts real pleasure in 'makin' smokes for everybody! And P.A. is down-right thrifty. I get around 70 mild, tasty 'makin' smokes from every tin."

70

finest roll-your-own cigarettes in every 2-ounce tin of Prince Albert

HEALTH NOTES

Austin—"Texas, this May 1, has cause to celebrate its annual May Day-Child Health Day as an expression of better child health this past year over the state," Dr. Geo. W. Cox, State Health Officer, said. Throughout the length and the breadth of this state on May 1, children will gather in celebrations, celebrations which include play, games, and exhibitions of special ability which has been developed. The children themselves are celebrating another year of life, in most cases, with hope, a year in which there has been increased health and enjoyment.

The State Department of Health joins with the individual child in the celebration of these gains.

"Today we celebrate the fact that the maternal mortality rate during the past year was lower than any previous year in the history of the State of Texas. This means more mothers living to care for the children of Texas, to encourage them and assist in providing them happiness. The fact that diphtheria has continued its retreat and that the death rate from this disease is the lowest in the state, together with the lowest death rate from typhoid, in history is to be celebrated," Doctor Cox added.

"These facts we accept with true pleasure and joy in that we may have had some share in the reduction of those rates. A great deal remains to be done and the battle is only begun. It is my desire that the State Department of Health all agencies interested in the child, every county and every community within this state may work unceasingly during the ensuing year by doing that May Day-Child Health Day, 1939 will afford us many more things which we may celebrate," Dr. Cox concluded.

Mr. and Mrs. Wm. Alderson, of the Rhea community, were shopping here Monday afternoon. Mr. Alderson stated that one of the irrigation wells in his locality was brought in last week, but has not yet given satisfactory results.

Miss Edith Crabtree of Floydada, Texas, who spent the past month with relatives and friends here returned to her home Thursday.

Miss Alice Guyer, who spent last week at Waco in attendance at a Relief Convention, returned home Sunday evening. She was met at Littlefield by a group of her Friona friends, with whom she drove home from there.

Black Ducks Are Wise
 Black ducks know how to avoid enemies. Their nests, well camouflaged with weeds and hidden in swamps or brush, can be found only by accident. Parent ducks keep their young huddled close on reedy swamps, rarely venture on open water. They fly at night, feed generally at dawn and dusk. When danger nears, they fly to the middle of a river or lake, or leave the vicinity entirely.

An Institute
 An institute in general is a trade association founded to promote the interests of all branches of the industry which it represents. It is designed to foster trade in the products of the industry, to afford a means of co-operation with the government and to promote the study of the allied arts and sciences.

Mr. and Mrs. E. R. Day were shopping in Amarillo, Texas, Tuesday.

The Great Pyramid of Egypt
 It is believed that the Great Pyramid of Egypt was built by King Cheops in 4700 B. C., and that 100,000 men were employed for ten years in making a causeway 3,000 feet long to facilitate the transportation of stone from adjacent quarries and the same number of men worked 20 years more to complete the pyramid.

Ha-Ha Wall—Sunken Fence
 A ha-ha wall is a sunken fence which is not noticeable until it is reached. In the early Nineteenth century Humphrey Repton, the English landscape designer, urged against anything which might suggest man's interference with the scene. As a result the ha-ha was introduced to keep sheep and cattle within limits.

Acrobatics
 Acrobatics first meant "rope-dancing," now refers to contortions, balancing, tumbling and trapeze work. One famous acrobat, Blondin, crossed the chasm of Niagara falls on a tight rope, later repeated carrying a man on his shoulders one trip and rolling another man in a wheelbarrow on a third crossing.

New Labels on Old Statues
 "In some remote regions," said Hi Ho, the sage of Chinatown, "our ancestors made statues to heroes look all pretty much alike, so that when a new set of heroes came into fashion they could simply apply new labels and so save much expense."

Bach's Work in Music
 Bach was the greatest master of counterpoint in musical history. He disregarded the prevailing custom of writing in a few keys only and tuned keyed instruments so as to render them nearly perfect for all keys.

Little Life in Salt Lake
 According to the United States bureau of fisheries, no fish can live in Great Salt Lake in Utah. With the exception of the larvae of certain flies, the only living animal found in the lake is a small brine shrimp.
