NO. 48

## Election to Be Cae'd At An Early Date to Adopt Paving Plans

### Preliminary Steps Taken at Meeting of City Cads and Representatives of Engineering Firms.

At a meeting of the City officials, held Monday night of this week, the preliminary steps were taken for the paving of six blocks in the business district of Muleshoe. Messrs. Grant and Dalrymple of the Panhandle Construction Company, of Lubbock, and Mr. Upchurch, representing an engineering company of Wichita Falls, were present at the meeting and the work of making the surveys and construction work were discussed with these gentlemen.

Three classes of paving were considered. Of the three classes, asphalt, concrete and brick, the latter seemed to be preferred.

After looking into the law governing matters of this nature, it was found that an election to adopt a paving program would be necessary. This election will be called at the earliest date possible.

The paving of these six blocks will mean much to Muleshoe. There are times when the main thoroughfares of our city are almost impassable on account of mud, both for vehicles and pedestrians and the fact that those streets in the business section are the most used and are more nearly impassable during bad weather, due to the continuous traffic, makes it necessary to give them first attention in the matter of street paving.

The original idea was to pave seven blocks, but it was decided to pave only six at this time. Further information on the subject will be obtained within the next week.

### TEACHERS' INSTITUTE TO MEET WITH THE FAIRVIEW SCHOOL ON JANUARY 19

Subject: "Our Chapter's Team-Mate."  
Leader—Jewell Hanger.  
6. Address: "A Devotional Guide"—Howard Carlyle.  
7. Address: "A Representative of the Nations"—Ruth McCarty.  
8. Address: "The Play Leader"—Good Hadden.  
10. Address: "Our Attitude Toward Our Chapter's Team-Mate"—Nina F. Elrod.  
Business. Benediction.

## WTGC WILL SPONSOR SECOND AGRICULTURAL MOTORCADE TO PACIFIC

Stamford—The West Texas Chamber of Commerce will start the New Year's work by promoting another agricultural motorcade to California, to study the methods of farming, poultry raising and dairying in the Sunshine State.

The first trip of this kind sponsored by the Agricultural Department of the regional organization was held in September and was very successful. Most of the advertising of the trip has been word of mouth publicity given out by the twenty-five Texans who made the initial journey.

On this account several reservations have already been made for the next trip which is scheduled to start January 15. A new bus has been secured from the West Texas Coaches of Fort Worth, which has a capacity of twenty-nine passengers. Only twenty-five or twenty-six passengers will be taken on each trip, however, according to H. M. Whitaker, who is arranging the trip.

Special rates have been promised by the motor company and the round trip can be made for less than \$50.00 bus fare. Other necessities, such as rooms and meals for the entire trip will bring the expenses for the two weeks or longer to about \$85.00. On the first trip Scurry county sent the most representatives, there being five from Snyder. So far Haskell county leads with the largest number for this trip.

Information about this trip will be freely given from the Stamford office.

### BEAUTY SHOP TO BE OPENED SATURDAY AT GARDNER'S

A Beauty Shop will be opened for business next Saturday at Gardner Dry Goods Company. The new shop will be in charge of Mrs. Lilla Daniel and Miss Rebecca Saunders. Miss Saunders is an experienced operator and has recently returned from California.

## Winter Flannels

## Missionary In China Writes of The Orient's Interesting People

C. P. O. No. 1234, Shanghai, China, Nov. 27th, 1928

Dear Editor: Here comes another letter from the "bottom side of the world." It may be of interest to the readers of your most excellent paper.

We have recently had one of China's chief holidays. For more than a week noticed signs of its coming. Great stacks of "moon-cakes" in brightly colored packets were shown in many stores. Beautiful lanterns were seen along the streets. It was the Chinese Moon Feast and Mid Autumn Festival. In their feasting it recalled our Thanksgiving Day.

The Chinese 15th of the 8th month is called "Tuong Tsai"—Middle Autumn. On that day they have theatricals before all the gods in the temple and burn the "Shuang-to"—incense bushel. This bushel-like measure is made of incense sticks. The largest "bushel" sometimes measures as much as 20 feet in diameter. In the middle of the "bushel" is a long, large stick of incense made up of thousands of thin incense sticks the size of vermicelli. On the afternoon and night of this day each family also burns an incense bushel at home. These are smaller than the ones burned in the temple. On this day they who can so afford, eat moon-cakes and all kinds of nice things. The incense bushel is decorated with flags and many colored dragon-cakes, something like children at home put candles on their birthday cakes; but the children in China take the flags and dragon-cake decorations from the bushel before it is burnt, and have great delight in playing with these, marching up and down the streets.

I asked the Chinese why they burn the incense bushel and eat moon-cake, and worship the moon with candles, incense and food on this day. They answered that there are many reasons for it and many stories are told about it. One of the reasons is because there is a lady-god in the moon. Her name is Zaung-noo. She is said to be exceedingly beautiful. From the beginning of time to the end, there never

was nor never will be one as beautiful as she. She was once upon a time a woman in this world; but became displeased with her husband and all the world and fled to the moon. On this 15th, the real story of why she fled is acted out in the long theatrical plays attended by throngs of people. In ancient times on the 15th of the 8th month when they burned the incense bushel the sweet fragrance would go high up to the moon goddess. She took pleasure in it and manifested her approval by coming near the earth, riding on a cloud and people could see her beautiful face. But now men's hearts have become so wicked, and the world so full of sin, so the incense is not so pure as formerly and it does not rise so high as to reach the goddess in her palace and so not enjoying its fragrance, she comes no more on the clouds, but people still offer incense and hope she will appear some time.

They say that in the moon this goddess has a most beautiful castle. It is called the "Yuh-Koong"—Moon Palace. Only one human has ever seen his glory. Once, during the Dong Dynasty, a Chinese king, called Ming Wong, by the Magic of a holy monk, was enabled to mount up from the earth to the Moon Castle to hear the music and see its beauty. He was allowed to stand outside for only a few minutes. By that time the goddess knew that the king of man was there. She was very angry at the monk for leading the king to her holy land. Soon from the Castle came most unpleasant sounds. The monk understood that it was the queen giving vent to her wrath and he quickly led the king to the earth.

You can thus see how full of superstition the Chinese are and how much they need the Gospel and Jesus Christ that they may see the real King in His glory and live forever in His heavenly palace on High. It's a joy to teach Chinese children of Jesus and His salvation while young.

On last Tuesday morning Rev. and Mrs. Jones were accompanied by a Blessed New Year to you and loved ones.

Yours in Christ's glad service,  
Rev. H. G. C. Hallack.

## SEVERAL BASKET BALL GAMES ARE ANNOUNCED BY OUR SCHOOL TEAMS

With the opening of the basket ball season, the following games have been announced for the school teams:

Friday, January 11th, the Muleshoe boys and girls will play at Dimmitt.  
Wednesday, January 16th, the boys and girls will play at Dimmitt.  
Friday, January 18th, the Texico and Muleshoe boys will play in Muleshoe.  
Wednesday, January 23rd, Frons will play in Muleshoe.  
Friday, February 1st, the Dimmitt boys and girls will play in Muleshoe.  
Friday, February 22nd, Muleshoe at Texico.  
All games played here will be at the High School gym.

## Baileyboro News

Brick work on Baileyboro's new school building was finished January 2nd. A few more weeks and it will be ready to move into.

Mr. and Mrs. Clifford Wallis of Baileyboro are the proud parents of a baby girl, born January 1st. Flu is taking the south side of the county by storm. Some members of nearly every family and all members of some families have been attacked. No deaths have been reported.

## State Bond Issue For The Lee Highway Is Proposed By Officials

### FIRST DELIVERIES OF NEW CHEVROLET SIX ARE MADE TUESDAY

Valley Motor Company received the first shipment of the new Chevrolet Six cars last Tuesday. The shipment consisted of two coaches and two sedans. Immediately after being serviced, deliveries began. Rev. W. B. Hicks drove out the first of the cars, which was a coach. Mrs. Nina Elrod received the next, which was also a coach. The sedans went to L. J. Terry of Bula and Mrs. E. H. Buhman of Muleshoe.

### Would Mean Twenty-Four Miles of Paved Highway Through Bailey County, if Issue Carries.

At a meeting held recently in Ardmore, Oklahoma, of the various Chairmen from counties along the route of Lee Highway through Oklahoma, Texas and New Mexico, it was found that the different State Highway Commissions in these States have not provided sufficient funds with which to maintain the Highways of the State, that travel has increased so rapidly in the last year that funds are not sufficient to handle the situation. To meet this condition the Lee Highway officials presented the following resolution to the Convention which was unanimously passed:

WHEREAS; the highway officials of these States have striven to meet the needs of travel as fully as possible with existing funds, and WHEREAS; rapid highway development is essential to the well being of Texas and Oklahoma, and their future development,

THEREFORE, the Lee Highway Association in convention assembled, recommends to the Governor and State Legislatures of Oklahoma and Texas that adequate funds be provided for highway needs through the issuance of a state bond issue of at least \$100,000,000.00 which shall be retired by a 3 cent gasoline tax and that county bonds already voted for state highways be retired by this bond and the remainder be used for immediate highway construction.

### RECENT FARM IMPROVEMENTS WHICH STARTED THIS WEEK

Several new farm improvement programs were started this week in the Muleshoe territory. Mr. W. A. McCord, of north of town is building a five-room residence with all modern conveniences. He will also build new barns after the completion of the home.

Mr. V. H. Vinson, also living north of town, is hauling out lumber this week for a general set of improvements all over these farms, it furnished by the E. R. Hart Lumber Company.

Wiley Moore is erecting a new set of improvements on his farm south of town. Panhandle Lumber Company furnishing the material.

## TEACHERS' INSTITUTE TO MEET WITH THE FAIRVIEW SCHOOL ON JANUARY 19

Following is the program of the Sudan and Bailey county teachers at the Teachers' Institute to be held at Fairview School on Saturday, January 19th, 1929:

1. Opening Program—Fairview School.
2. Library Equipment and Use in Small Schools—D. H. Hargrove and Mrs. L. Stringer.
3. Classification and Recognition for the Small School—J. E. Adams. Noon Intermission.
4. The Rural P. T. A.—Mrs. J. R. Dean.
5. Truck Service in Rural High Schools—W. S. Wilkins.
6. The Larger School Unit a Success—J. C. Jenkins.
7. Business Session—Bailey County Teachers.

## YL News Items

Miss Susie Boles returned to her home at Breckenridge Wednesday. Mrs. Boles accompanied her to Sweetwater, on her way to visit her mother in South Texas.

Mr. Isbell is absent from school this week on account of the illness of his father. Miss Lennie Head is teaching in his place.

Mr. G. L. Hamblin, from Oregon, is visiting in this community. Mr. W. S. Beller and family moved to Mrs. Hart's place, west of the YL school, the first of the year.

On last Tuesday morning Rev. and Mrs. Jones entertained the school in chapel. Rev. Jones made an inspiring talk on "Education." They also sang a doxology.

The community regrets the loss of Mr. Willard and family, who moved to Lubbock last Friday.

Voltema, James and Floyd Hoy are three new pupils who have entered school here since Christmas.

The Methodist Board of Stewards met at Mr. W. M. Witterding's Tuesday night. After the business session oyster soup was served.

Letha Robison spent Sunday with Dorothy Pribbitt.

Miss Edwina Buhman has returned to school after a few days absence.

Mr. and Mrs. Durham and Miss Esther Fogarty of Oklahoma Lane and Mr. and Mrs. Wallace and son, of West Camp, visited Mr. and Mrs. Hargrove Sunday afternoon.

Mr. and Mrs. E. C. Pribbitt motored to Clovis Sunday to visit Mrs. G. G. Pribbitt.

Mr. Roy Isbell and Miss Jerre Beller returned home Saturday after visiting his folks the past week.

## COPIES OF THE RESOLUTION SENT TO THE GOVERNOR AND STATE LEGISLATURES OF OKLAHOMA AND TEXAS.

Meeting adjourned to meet at Vernon, Texas, January 24th, 1929.

K. K. Smith, local Director, states that the meeting to be held in Vernon on the 25th of this month, the Directories will endeavor to prepare budgets and ways and means to get immediate action of the Legislatures in the issuance of the bonds and the enactment of the new tax.

In the event that Bailey County should be granted such a gift as to have Lee Highway paved from end to end it would indeed be one of our greatest blessings. The new highway sounds good. We wonder how it would look.

## BIG RANCH DEAL AT CLARENDON INVOLVES SIXTY-FIVE SECTIONS

Clarendon, Texas, Jan. 8.—The largest land deal transacted here for several seasons was closed today by the announcement by J. R. Porter, attorney for J. W. Owens of this city of the sale by Mr. Owens of his ranch consisting of 35,997 acres, approximately 65 sections, in Bristoe and Hall counties some 20 miles south of this place.

The ranch was bought by the Slaughter company, consisting of Bob Slaughter of Dallas and R. L. Slaughter of Lubbock who have already begun the movement of cattle to this ranch. The exact figures of the sale were not announced but it was said the deal required over \$235,000 which it is understood here was a cash transaction.

Mr. Owens was an extensive land owner of the Panhandle and still owns practically 35 sections.

Miss Virginia Egbert returned Sunday from spending the holidays in Albuquerque, New Mexico.

Messrs A. V. McCarty, Jr. and Walter Black attended Lodge at Dimmitt Tuesday evening.

## Local Markets

These prices are furnished by the local buyers, and are for your convenience.

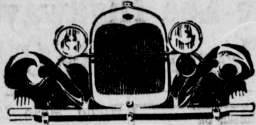

Kaffir	..... \$1.00
Maize	..... \$1.10
Corn, shelled, per bu.	..... 75c
Corn, ear, per bu.	..... 56c
Sudan	..... \$4.00
Maize heads	..... \$1.00
Kaffir heads	..... \$1.00
Cane seed, subject to change	..... \$1.

Retail Feeds

Cotton seed cake	..... 2.75
Cotton seed meal	..... 2.75
Bran	..... 2.00
Shorts	..... 2.50
Cow Chow	..... \$1.00
Milk Maker	..... \$2.75

## Simplicity of cooling system is a feature of the new Ford

A COMPLETE water plant is a part of every automobile as it is a part of every modern city.

The purpose of this water plant is to keep the engine cooled to a temperature that will make it efficient in operation. If it were not for this, the cylinder walls would become overheated and the pistons refuse to operate.

The cooling system of the new Ford is particularly interesting because it is so simple and reliable.

When the radiator is full of water, the engine of the new Ford will not overheat under the hardest driving. Yet the water is so regulated that it will not impair engine operation by running too cold in winter.

The cooling surface of the Ford radiator is large, with four rows of tubes set in staggered position so that each receives the full benefit of the incoming air. The fan is of the airplane propeller type and draws air through the radiator at the rate of 850 cubic feet per minute at 1000 revolutions per minute of the motor.

The hot water around the cylinder head is drawn to the radiator to be cooled by a centrifugal water pump of new design.

The entire cooling system of the new Ford is so simple in design and so carefully made that it requires very little attention.

The radiator should be kept full, of course, and drained once each month so that sediment will not collect and retard the free passage of water. In cold weather, a reliable anti-freeze solution should be added.

An owner and manager of this important water plant you should also see that the water pump and fan shaft are properly lubricated and the packing around the pump shaft kept in adjustment.

Hose connections may also need replacement after long service. For those little adjustments, it pays to call on the Ford dealer.

He works under close factory supervision and he has been specially trained and equipped to do a thorough competent job at a fair price.

### FORD MOTOR COMPANY

#### Beautiful Homes BABY CHICKS Thrifty Farms

15 Varieties \$11.00 to \$13.00 hundred, delivered. State accredited and Standardized Quality Chicks. All kinds of plants for West Texas; \$1.50 thousand up. 500 Varieties Garden, Field and Flower Seeds. Poultry supplies at anything you want for poultry. Order anything you want for Garden, Orchard, Lawn, Field, Poultry and Stock—we have it of quality at right prices.

G. E. WHITE SEED CO. Plainview, Texas

## What Is A Bargain?

In this community are hundreds of individuals and families on the watch for an advertisement which will offer them what they want at an advantageous price.

Call them bargain hunters if you like, but thrifty shoppers would be the better designation. Thrift is a commendable trait and merchants should enter to it.

One family wants a new carpet—the need is not urgent. Another family is looking forward to buying dining-room furniture—it may not be for a twelve month.

One man is thinking of buying himself a watch. One woman a shopping bag; another an umbrella.

All can be made to buy earlier—by advertising. Advertising can make the desire so keen that the bargain is forgotten in the fervor for immediate possession.

#### A NOTE TO MERCHANTS

Stimulate business by the offer of some slow-moving lines at special prices. Brighten up business by advertising some desirable goods at reduced prices. Make advertising your dull business. Often you can tempt the buyer who is biting his or her time, to buy from you—at a time of your naming.

### Shop Where You Are Invited to Shop

## The Muleshoe Journal

Outside of County .....\$2.00

#### MASS PRODUCTION OF MODEL A PARTS SECRET OF SUCCESS

A million axle shafts, each one exactly like the other 999,999 within one thousandth of an inch—four million pistons fitting four million cylinders with a degree of exactness that all but staggers the imagination—many more millions of drilled and threaded holes all placed with an accuracy of location that is incomprehensible to any but the mechanically or mathematically minded—and all these factors, combined with other millions of parts manufactured in widely separated units of a gigantic plant, meeting on an assembly line to fashion a million automobiles! This is the miracle that is modern mass production, the miracle that was conjured up by Mr. Henry Ford when he started his first automobile assembly line.

The story of how it is possible to make a million—or ten million, or twenty million, for that matter—of any machine part, each one identical with all its fellows, is a story of measurements.

Today, in the Detroit plants, mechanics who have never looked through the eye-piece of a microscope are measuring within limits too fine for any unaided eye to see. Model A parts machined to within one thousandth part of an inch accuracy are all in the day's work. Back of this precision are something like million gages that must be kept in correct adjustment at all times, and many thousands of these gages are in constant use throughout the Ford plants. There is no time for hand fitting of inaccurate parts on the assembly line. They must either fit the first time or they are valueless. Therefore, the parts must leave the various machines which fashion them with every specified dimension correct. The result is that when put together, the car moves off the assembly line under its own power, a completed means of transportation requiring no special adjustments.

## What's Doing In West Texas

Part of the Cap Rock Jersey Farm at Crosbyton is being cut up into blocks for rent and for sale. Each residence has five acres of fertile land surrounding it. This fills a need for new homes that has been growing in Crosbyton.

Under the joint auspices of the Brady Chamber of Commerce and the Brady Water and Light Board eleven prizes were given for the best lighting effects used on local houses during the holidays. First prize was \$40.00.

Callahan county farmers and ranchmen are making efforts to rid the county of wolves. The price paid is \$7.50 for females, \$5.00 for males and \$2.50 for pups.

Pote's new \$100,000 school will be occupied in full by the second week in January. Previously it has been occupied in part while work continued on parts of it. Two years ago Pote's scholastics could have been housed in one room, so the growth is remarkable.

Estelene High School is to have a new athletic stadium to be built of wood and will be 84 by 90 feet wide. The ceiling will be twenty feet in the clear which will give plenty of room for basket ball games.

Mr. G. T. Bowen, of Hugo, Oklahoma, was a business visitor in Muleshoe Monday of this week.

Wm. Dixon, of Roswell, N. M. was looking after business affairs here last Saturday.

A. B. McConell, of Ralls, was prospecting in Muleshoe Monday.

A. V. Chester and family, of Decatur, were visiting in Muleshoe last week-end.

C. B. Mason, of Littlefield was a business visitor here Tuesday.

Mrs. J. J. Franks, of Sudan, is spending the week here with relatives.

J. O. Jones, of Lubbock, was through here Sunday.

M. B. Copeland, of Plainview, was a business visitor here the first of the week.

FRIDAY, JANUARY 4TH, 1929

#### Town Talk

W. D. Lassiter was in town trading Wednesday.

Mrs. C. T. Smith is reported quite ill with flu this week.

Mr. and Mrs. I. W. Harden were shopping in Clovis Saturday.

Delma McCarty was attending to business in Lubbock Wednesday.

A fine boy was born to Mr. and Mrs. J. W. Needham on January 4th.

Clem Files of Plainview, was a business visitor in Muleshoe last Monday.

R. L. Brown returned home Tuesday from a business trip to Oklahoma.

J. H. Motherall and daughter, Miss Ava Neil, were visitors to Clovis yesterday afternoon.

Mmes. L. S. Barron, A. W. Coker and Ray Griffiths were Clovis visitors Tuesday afternoon.

Mr. and Mrs. Delma McCarty were visiting Mrs. McCarty's mother and other Tuesday night.

Mr. Richard Ince of Milwaukee, Wis. was in Muleshoe Tuesday, looking after business affairs.

Mrs. Luther Ragsdale assisted at Gossard Dry Goods last Saturday during the opening sale rush.

Mrs. H. C. Henington returned Friday from White Deer, where she had been at the bedside of her mother, Mrs. Skagers. Mrs. Henington stated that her mother was greatly improved.

# "First Salute To Stars and Stripes"

(Third Installment)

Capt. Jones in the Ranger went into Brest and in April, getting favorable weather, made his famous cruise of the Irish Sea, in which he burned the shipping of Whitehaven and met and captured the Drake, a British ship-of-war.

By the time Capt. Jones and the Ranger came into Brest with their prize, the Drake, war had been declared between France and England and, according to the wish of Sartine, the French Minister of Marine, the Commissioners held Jones in France for duty, sending the Ranger, with its ill-paid crew, home to America under the 1st Lieutenant, Simpson. It was evidently the intention of the Marine Ministry to employ Jones' ability in some gallant enterprise, but there were more French officers than there were ships, and it was months before the little fleet, headed by the Bon Homme Richard, was finally placed under his command. With it he splendidly made up for lost time, when he conquered the British ship-Serapis in the North Sea—August 19th, 1779.

This famous action was fought in sight of British shores. The Serapis was greatly superior to the Bon Homme Richard. Never before had a British ship been beaten by such an inferior force. American prestige was greatly enhanced in Europe by this great fight in European waters, where the Stars and Stripes were victorious.

And finally in 1783, the Treaty of Peace was signed and England, convinced her colonies had come of age, acknowledged our independence and our flag.

The Ranger had her hour of glory. But after the conquest of the Drake, we hear of her no more.

Capt. Jones had his year of triumph, but the latter years were darkened by disappointment and for nearly a century, men did not even know his grave.

The flag begins with the salute at Quiberon its undefeated history. Symbol of a united, free nation, it has won the honor and respect of the world. Proudly we remember how once more the flag returned to France ten years ago, bearing with it grateful memories from the nation France had helped to build. Around the flag has resounded the thunder of a thousand battle fields. But in these days of peace, there echoes only the voice of the first salute to the Stars and Stripes is the work of Edward Moran

who, at the time of his death, was spoken of as "the strongest marine painter of the United States."

For several years it hung in the National Museum at Washington, by courtesy of Mr. Theodore Sutor of New York. It was not until the death of Mr. Sutor recently that permission could be gained to reproduce this painting, so valuable from a patriotic and historic standpoint.

Edward Moran, who was a brother of Thomas Moran, America's foremost landscape painter, was born in 1829 in England. He came of a family of hand-loom weavers, and when a small child, was set to learn that trade. Hardship and lack of a future drove the family to America in 1844, where they settled in Maryland. Moran walked to Philadelphia without a dollar in his pocket in search of employment. Here he was again forced to work at the loom, but luckily under the eye of an employer who recognized his talent when he found him stealing time from his work to draw.

It was the turning point in Moran's career. His employer introduced him to the then famous landscape artist, Paul Webber, with whom he studied. Later he worked under James Hamilton, as well as studying for some time in England and France. His pictures were accepted by all American academies as well as the London Royal Academy and the Paris Salon, and he received many medals. He was a member of the Water Color Societies of this country and of London, of the Philadelphia Academy of Fine Arts, an associate of the National Academy of Design and was connected with many other artistic organizations.

His greatest work was a series of thirteen paintings of the marine history of the United States. "The First Salute to the Stars and Stripes" is one of that series. He died in New York in 1901.

### CONTRACT OF EARLY DAYS FOR UNIVERSITY LIBRARY

Loaned by Mrs. Jesse Carter, of Marshall, a labor contract, dated January 24, 1866, between Adam Hope of Harrison County, and nineteen freed slaves, will be reproduced by photostat and added to the University of Texas library, according to Mrs. Mattie Austin Hatcher, archivist. Each of the slaves signed the document by mark, and it was filed with Thomas Bayl's, colonel in the United States Volunteers, sub-assistant commissioner in the Bureau of Refugees Freedmen and Abandoned Lands.

Mrs. C. J. Roach and her daughter, Christine, returned home Sunday afternoon from Memphis, Texas, where Mrs. Roach had been in a sanitarium for several days.

### FORTY-TWO PER CENT OF TEXAS HOMES ARE WIRED FOR CURRENT

Forty-two percent of the homes of Texas have electricity, according to a survey by the National Electric Light Association received by the Texas Public Service Information Bureau.

Including all farms in the total number of homes, about two-thirds of all homes in the United States now have electricity, the survey shows. Excluding farms, about 82 per cent of the homes are wired.

Texas compares favorably in this respect with all other Southern States. Arkansas is at the bottom of the list with only 25 per cent of the homes wired.

New Mexico has 26 per cent; Virginia 36 per cent; Wyoming 46 per cent; Louisiana 26 per cent; Missouri 48 per cent; Arizona 31 per cent; Kansas 60 per cent; Kentucky 33 per cent; North Carolina 30 per cent; Tennessee 30 per cent.

California and New York divide first honors with over one hundred per cent of the homes receiving electric service. The excesses of one hundred per cent are due to classification of meters.

### GERMAN FATHER OF 84 LIVING CHILDREN

Berlin, Nov. 13.—The story of a man who twice married, at 76 is the father of 87 children, 84 of whom are living, is reported by a Vienna medical association journal.

Bernard Scheinberg, living near the German border, had 69 children by his first wife who died at the age of 56, the journal says. Not one was a single birth. There were four quadruplets, seven triplets and 16 twins. Sixty-seven of the children are living, but he admits having lost count of the grandchildren. Scheinberg's second marriage at the age of 57 was blessed with 18 children, including two sets of triplets. His second wife is still living.

Monahans—The Texas & Pacific Railroad is building a 30-mile branch line from here to Kermit to serve the Winkler County oil area.

San Angelo—A \$60,000 new brick building has been completed for San Angelo's central fire station.

San Angelo—The number of sheep in Tom Green County has increased from 120,300 in 1927 to 150,000 in 1928.

Marathon—Thirty miles of paving recently completed on Mexican border highway in both directions from this place.

### POULTRY PROSPECTS ARE GOOD FOR COMING YEAR

There are good times ahead in 1929 for farmers who make poultry raising a serious part of their year's work, according to U. S. Government opinions of poultry experts throughout the country. Conditions are favorable and a good market awaits the producer.

This is not mere guesswork. Here are the reasons:

Government reports show a scarcity of hens and a short crop of pullets on farms throughout the country. Chicago Produce News says "about 30,000,000 less than a year ago."

This means fewer eggs laid and satisfactory egg prices.

Reports indicate bumper crops of corn and oats. Poultry feed prices are declining as a result of these big crops.

The serious shortage at the present time of beef cattle, swine and sheep is going to make even greater demand for poultry and eggs.

Prices of meat, especially beef, are being forced to new high levels which may exceed the wartime peak.

If poultry meat is cheaper than beef, people are going to eat more chickens.

Thousands of poultry farmers everywhere are now eager to replenish their flocks to increase egg production.

Greater egg production from flocks means increased profits per pound of feed.

With a ready market promised, lower feed prices in sight, and a large demand predicted, the farmer prepared to satisfy the demand stands in a position to reap a considerable profit from farm poultry flocks.

### KNOW TEXAS

Immigration from the United States to Texas began to trickle in following the Louisiana purchase in 1803.

Stephen F. Austin started his great colony on the banks of the Brazos at old Washington in 1821.

On March 2, 1836, the Texans in convention at Washington declared an independent republic and David G. Burnett was named president.

On March 6, four days after the Texas declaration of independence, the Alamo at San Antonio fell and the new born republic lost such able leaders as Travis, Bowie and Crockett.

Rankin—115 carloads of pipe have been unloaded here by the Texas Co. which is building a pipe line from Monahans to Port Arthur at an expenditure of \$20,000.

### YOUR PRINTING NEEDS

How about your printing needs to start the New Year? Check up now and start right by having the right kind of printed forms for your business. The Journal can furnish you with letterheads, envelopes, statements, bill heads, all classes of business cards, calling cards, window cards, vouchers, special envelope forms, legal blanks, etc. Call and place that order now.

# "As Good As Goodyear"

Every once in awhile we hear this—but we don't believe it. The largest single group of car owners in the world don't believe it either, because more people ride on Goodyear Tires than any other kind. Certainly there's a reason. But how much do you think this "just as good" idea has cost the tire buying public? . . . . We say plenty. We are continually impressed with this loss, because, nearly every day one or more customers tell us of their experience with tires claimed to be as good as Goodyear.

**Uniform Value** Goodyear Tires are the standard of tire values. They are not high priced and offer a selection of types in all sizes to meet every requirement of the motorist. The lowest priced Goodyear may give mileage equal to or greater than many tires priced higher.

**New Markets for Cotton**

King Cotton has greatly extended his dominions in the industrial field in recent years and his scouts are constantly looking for new regions to conquer, says the Sears-Roebuck Agricultural Foundation. The fiber has ten thousand uses and more are being discovered every year. These new uses and the extension of old uses have maintained or increased per capita consumption of cotton in spite of the reduced dimensions of women's dresses and competition from other textiles.

Formerly, cotton was used almost entirely for clothing, but other uses are taking an increasing share of the crop. Among the many industrial outlets are automobile tires, auto bodies, cotton bagging and baling, airplane cloths, rubber goods, artificial leather, awnings, wall coverings, traffic markers, power belting, electrical linings, cleaving cloths in road construction, gears, truck wheels, and other machinery parts.

Tire production in the United States requires about 500,000 bales of cotton annually. In 1927, 219,000,000 pounds of cotton fabrics were used in tire production, according to the Rubber Association of America. Cotton is used also by the auto industry for upholstery, tops, curtains, tire covers, padding, linings, electrical insulation, rubber tubing, and brake bands. All these uses were relatively unimportant twenty years ago.

Cotton bags used in the wholesale grocery trade for sugar, flour, salt, coffee, potatoes, and similar commodities require about 200,000 bales of raw cotton and waste every year. The cement industry consumes cotton bags equivalent to about 45,000 bales, the bakery trade, 20,000 bales, and the fertilizer industry, 4,000 bales. Bags for handling coal, mail and money also take small amounts. It is estimated that if cotton bags were used for packaging all commodities to which they are adapted in the wholesale grocery trade alone, about 600,000 bales of raw cotton and waste would be required annually.

If cotton cloth were used as a bale covering on 60 per cent of the average cotton crop, about 120,000 bales would be required for bagging. It is estimated that the withdrawal of this amount, chiefly of low grades, from the supply would raise the seasonal average price of cotton by about 1/4 cent a pound, or \$1.25 a bale. This would be about enough to pay for the covering, so that producers in the aggregate would, in effect, get their bagging without cost. Tests have shown that cotton has advantages over jute bagging through making a neater package, reducing dead weight and lessening waste in removing from the bale, but jute coverings cost less except in years of extremely low cotton prices. Attempts are being made to produce a light cotton bagging that can be sold in competition with jute.

Cotton textiles are more extensively used in aviation than any other fabric and this use is growing rapidly. Its lightness, strength, durability under vibration, ease of repair and low cost make it the best textile for this purpose. The outer covering of the Graf Zeppelin contained 20,000 square yards of cotton cloth and 40,000 square yards were used in its 30 gas cells. Cotton manufacturers have found it possible to increase the popularity of cotton clothing through more attention to design, harmonizing patterns with style tendencies, faster colors and using competitive fibers with cotton. As a result of these efforts, cotton dresses are in greater vogue at present than for several years.

The use of 108-inch bedsteads rather than the 90-inch length sometimes sold is a means of extending the use of cotton in an old and standard product, and opens up an additional outlet for 20,000,000 square yards of wide sheeting annually. Awning manufacturers have launched a three-year campaign to increase the use of their product and estimate the possible gain in their market at 25,000,000 square yards annually. The use of cotton traffic markers in place of paint on city streets is estimated to require 5,000,000 square yards of cotton fabric a year. Cloth to make a cleavage plane in cement roads will take about 5,000,000 square yards each year and its use as a binder in putting an asphalt surface on ordinary roads opens up an immense market. Every mile of such road could use a minimum of 3,520 square yards of fabric.

The United States Department of Agriculture, the Department of Commerce, and the Cotton Textile Institute are co-operating in a survey of the utilization of cotton, trying to find in what industries it is used and where its use may be extended. They have found cotton being used in 150 different ways on the farm aside from the household. Household uses, aside from feeding, number over 100. Railroads use cotton in over 40 different ways. Building trades make considerable use of cotton. Modern steamboats use much more cotton goods than sailing vessels.

The development of new uses and the extension of old ones are essential to sustained progress of the cotton industry from the standpoint of cotton producers and manufacturers, the Foundation asserts. Efforts in this direction deserve warm support.

Proper feeding is half the battle when it comes to getting profits from the farm poultry flock.

**The Birth of London**

No one can say when London began; the beginning is lost in the fables of time. London is first mentioned in a passage in Tacitus, a Roman historian whose name, General Agrius, spent most of his active military career in Britain. Tacitus describes the Roman London of A. D. 61 when it was sacked by Queen Boadicea—the British warlike-queen.

It is one of the strangest things in London's history, that she should first appear at the moment when she was sacked by a British queen, and that that queen's statue should now stand in a place of honor under the palace of Westminster, looking down the Thames. It is strange, but it marks that peculiar position of London as the meeting place of the races out of which the English people were made.

**Mental Transformation**

In the course of some investigations of epilepsy, a French neurologist secured some specimens of writing before epileptic seizure and confirmed during that state. His report is that the part written in a normal and lucid state is correct as to form and content, while the part written in an epileptic state is incorrect in both content and form. But defects in the writing appear suddenly, with no transitional phase, and affect the penmanship and the composition. The letters have become curved, the outlines have been enlarged and the forms have been changed. The composition is a strange, incoherent conglomeration of words and ideas.

**Eat More Fish**

**EAT** more fish and prevent list in point of popularity. Doubtless one reason is its adaptability to different methods of serving. For instance, baked salmon with stuffing is a dish that is simple to prepare and yet is suitable for a party.

**Baked Salmon with Stuffing:** Drain a tall can of salmon and mix it with one-half cup cracker crumbs and one unbeaten egg. Place half the salmon in a greased pan, shaping like a fish; over it put the stuffing and cover with the remainder of the salmon. Strip with bacon and cook in a moderate oven until browned. Serve with tomato sauce. To make the stuffing, boil two tablespoons minced onion in one cup of water for fifteen minutes. Add the liquor from the salmon and one-half teaspoon each of salt, celery salt and paprika. Pour this over two slices of stale, white bread and two tablespoons corn meal. Cool, and beat well.

**The Ever Popular Salmon**  
To many, canned fish is confined to the three S's, sardines, salmon and sardine. But don't forget that tuna, crab, cod, lobster, herring and others belong on the list. Yet salmon continues to head the

**TEACHER TO EXECUTIVE IN TWO YEARS TIME**  
A few years ago, he was a country school teacher, drawing a meagre salary six or eight months out of the year, and discouraged with the outlook for the future.  
Two years later he was Deputy Collector of Internal Revenue for the District of Arkansas, with an all-time year-round income many times that which he had drawn as a teacher.  
"I'm just beginning my career," he says.  
One decision, a little determination, and the encouragement of a far-sighted little wife made this wonderful change in the course of his life.  
"His story may prove helpful to hundreds of others."  
Raised on a farm, and having attended a country school until he had completed a two-year High School course, Lemo A. Ross was twenty-one years of age before he "struck out for himself" as a country school teacher. For five years he followed this profession. Then, having taken unto himself a wife, he began to think a bit more about the future. He had made no progress as a teacher, although he liked the work. Encouraged by his wife, he decided to fit himself for a business position and enrolled at Tyler Commercial College, Tyler, Texas.  
His first position upon graduation paid him a yearly salary more than three times that which he had drawn as teacher. The following year he was appointed Deputy Collector of Internal Revenue—a position he could never have held but for his thorough T. C. C. training.  
"At any cost, get a T. C. C. graduate," is his advice to employers. And to teachers and other ambitious young people: "Get a T. C. C. training."  
In the big illustrated book, "Achieving Success in Business," are printed scores of stories of men and women who have reached success as a result of training. The book is free. No obligation. Won't you let us send you a copy? Just clip the coupon below and mail it today.  
(We have no branch schools. We lead; others follow.)

**Beyond all Expectations!**

—say those who have seen the Outstanding Chevrolet of Chevrolet History — a Six in the price range of the four!

The Outstanding Chevrolet of Chevrolet History has now been seen and inspected by millions of people in every section of America—and everywhere it has been enthusiastically hailed as exceeding all expectations. Everyone anticipated that Chevrolet would produce a remarkable automobile—but not one expected such a sensational six-cylinder motor... such delightful handling ease... such marvelous comfort... such luxurious Fisher bodies... and a fuel-economy of better than 20 miles to the gallon! And no one believed that it would be possible to produce such a car in the price range of the four!

If you have not already made a personal inspection of the new Chevrolet, we urge you to do so at your earliest convenience. We are now displaying these beautiful new models—and we cordially invite you to call.

Read what these leading automobile editors said after seeing and riding in the new Chevrolet Six—

"In appearance, performance and mechanical nicety the new Chevrolet Six presents actual values far beyond its price range."  
—Hazen Conklin  
New York World

"Aside from beauty in body lines and attractiveness in finish, the surrounding feature of the new Chevrolet Six is its powerful and flexible motor. One will have to go far to equal the high performance of this new Chevrolet in general road and traffic use."  
—Leon J. Pinkson  
San Francisco Chronicle

"The new Chevrolet is a triumph for volume production. The car at its price is one of the greatest achievements ever recorded in the automobile industry. Its beauty is a treat; its riding comfort a new delight and its performance a real sensation."  
—Ray Priest  
Detroit Times

"St. Louis motordom is tremendously enthused over the new Chevrolet Six. Personally I have never seen the public so interested in a new car. The factory should be congratulated on the truly monumental engineering feat it has accomplished."  
—Robert Henry Hall  
St. Louis Post-Dispatch

## Election to Be Called At An Early Date to Adopt Paving Plans

### Preliminary Steps Taken at Meeting of City Dads and Representatives of Engineering Firms.

At a meeting of the City officials, held Monday night of this week, the preliminary steps were taken for the paving of six blocks in the business district of Muleshoe. Messrs. Grant and Dalgemole of the Panhandle Construction Company, of Lubbock, and Mr. Upchurch, representing an engineering company of Wichita Falls, were present at the meeting and the work of making the surveys and construction work were discussed with these gentlemen.

Three classes of paving were considered. Of the three classes, asphalt, concrete and brick, the latter seemed to be preferred.

After looking into the law governing matters of this nature, it was found that an election to adopt a paving program would be necessary.

This election will be called at the earliest date possible.

The paving of these six blocks will mean much to Muleshoe. There are times when the main thoroughfares of our city are almost impassable on account of mud, both for vehicles and pedestrians and the fact that those streets in the business section are the most used and are more nearly impassable during bad weather, due to the continuous traffic, makes it necessary to give them first attention in the matter of street paving.

The original idea was to pave seven blocks, but it was decided to pave only six at this time. Further information on the subject will be obtained within the next week.

### EPWORTH LEAGUE PROGRAM FOR SUNDAY, JANUARY 13TH

  6. Business. Benediction.

### WTGC WILL SPONSOR SECOND AGRICULTURAL MOTORGADE TO PACIFIC

Stamford.—The West Texas Chamber of Commerce will start the New Year's work by promoting another agricultural motorgade to California, to study the methods of farming, poultry raising and dairying in the Sunshine State.

The first trip of this kind sponsored by the Agricultural Department of the regional organization was held in September and was a success.

Most of the advertising of the trip has been word of mouth publicity given out by the twenty-five Texans who made the initial journey.

On this account several reservations have already been made for the next trip which is scheduled to start January 15. A new bus has been secured from the West Texas Chamber of Commerce, which has a capacity of twenty-nine passengers. Only twenty-five or twenty-six passengers will be taken on each trip, however, according to E. M. Whitaker, who is arranging the trip.

Special rates have been promised by the motor company and the round trip can be made for less than \$50.00 bus fare. Other necessities, such as rooms and meals for the entire trip will bring the expenses for the two weeks or longer to about \$95.00.

On the first trip Scary county sent the most representatives, there being five from Snyder. So far Haskell county leads with the largest number for this trip.

Information about this trip will be freely given from the Stamford office.

### BEAUTY SHOP TO BE OPENED SATURDAY AT GARDNER'S

A Beauty Shop will be opened for business next Saturday at Gardner Dry Goods Company. The new shop will be in charge of Mrs. Lilla Daniel and Miss Rebecca Saunders. Miss Saunders is an experienced operator and has recently returned from California.

### "DOC" INDIAN, WELL KNOWN BY MANY HERE, PASSED AWAY RECENTLY

Word was received this week that "Doc" Indian, who was well known in this section, had passed on to the Happy Hunting Grounds. He died at Vinita, Oklahoma. As far as could be learned, his age was not known, but he had seen the passing of many winters.

"Doc" Indian, according to old timers, was quite a character. He made his home for over twenty years with the Halsey Cattle Co. and it is said that when "Doc" came to town, business and entertainment began to liven up. "Doc" had many good traits and was a favorite with the youngsters. He left here some three or four years ago and had lived in Oklahoma up to the time of his death.

### ELECTION OF OFFICERS FOR MULESHOE NATIONAL FARM LOAN ASSOCIATION, JAN 8

Election of officers for the ensuing year of the Muleshoe National Farm Loan Association was held on January 8.

I. W. Harden was elected President; J. J. Lawler, Vice-President; L. S. Barron, Geo. Treas. and J. A. White, R. J. Klump, and M. F. Collins, Loan Committee.

### GOOD ENROLLMENT AT THE MULESHOE SCHOOL SINGE THE HOLIDAYS

At the opening of the Muleshoe Public Schools following the Christmas vacation, there was a good enrollment and Supt. J. C. Jenkins reports that at this time there are 256 enrolled with no more than 20 pupils absent. The flu has kept some out of school, but it has not been as bad as was thought to be two weeks ago.

### Longview News Items

Rev. Moore filled his regular assignment at Longview Sunday and Sunday night. Rev. Moore's sermons were enjoyed by everyone present.

Most all of the people here have been having lots of money (the flu) but they are all feeling better and will soon be ready to go to work again.

Mr. Laurance Durham and family, who have been residing in Collinswood county, arrived in Bailey County Saturday, where they will make their future home. Mr. Durham means business. He brought nine cows with him and all of his farm equipment.

Mrs. Durham said that Bailey county was the pick of the Plains and that she had rather live here than any place she has ever lived. We are glad to have Mr. and Mrs. Durham in our community.

Mr. and Mrs. Clifford Wallace of Balleboro are the proud parents of a nine pound girl, born January 1st.

Mr. and Mrs. N. C. Moore, who left their place here last year, returned to their old home where they will live in the future. We are very glad to welcome Mr. and Mrs. Moore back in our community. They are full of life and put plenty of pep in the community and do everything to help Longview prosper.

Mr. Dick Owens was a visitor in the Old Steinhilber home Sunday. They are old sweethearts.

We are very sorry to report that Grandpa Blackshear, who has been on the sick list for some time is not improving. We hope he will soon recover for we all think lots of Grandpa.

Mr. Bill Lewis, who has been away from the bill working, has returned home.

Mr. Jim H. Dyer left for his school at Oakville Friday. Due to sickness, Mr. Dyer couldn't take his family back home with him. Mr. Dyer says he is getting along splendidly in school and likes there fine.

Mr. Clyde Watson is putting on a fiddling contest at Louvrey Friday night, Jan. 11, so all of you old fiddlers are cordially invited to come and bring your fiddles. Mr. Watson has arranged a special program and is going to show you a real time.

Mr. Mack Bell was very much surprised when he walked into his house and found his father waiting to see him. Mr. Bell will stay out here for some time, visiting his son.

### Winter Flannels

### Missionary in China Writes of The Orient's Interesting People

C. P. O. No. 1234, Shanghai, China, Nov. 27th, 1928

Dear Editor:

Here comes another letter from the "bottom side of the world." It may be of interest to the readers of your most excellent paper.

We have recently had one of China's chief holidays. For more than a week I noticed signs of its coming. Great stacks of "moon-cakes" in brightly colored packets were shown in many stores. Beautiful lanterns were seen along the streets. It was the Chinese Moon Feast and Mid Autumn Festival. In their feasting it recalled our Thanksgiving Day.

The Chinese 15th of the 8th month is called "Toong Tsui"—Middle Autumn. On that day they have theatricals before all the gods in the temple and burn the "Shung-to" incense bushel. This bushel-like measure is made of incense sticks. The largest "bushel" sometimes measures as much as 21 feet in diameter. In the middle of "bushel" is a long, large stick of incense made up of thousands of thin incense sticks the size of vermicelli. On the afternoon and night of this day each family also burns an incense bushel at home. These are smaller than the ones burned in the temple. On this day they who can so afford, eat moon-cakes and all kinds of nice things. The incense bushel is decorated with flags and many colored dragon-flags, something like children at home put candles on their birthday cakes; but the children in China take the flags and dragon-flags decorations from the bushel before it is burnt, and have great delight in playing with them, snatching up and down the streets.

I asked the Chinese why they burn the incense bushel and eat Moon-cake, and worship the moon with candles, incense and food on this day? They answered that there are many reasons for it and many stories are told about it. One of the reasons is because there is a lady-god in the moon. Her name is Zaung-moo. She is said to be exceedingly beautiful. From the beginning of time to the end, there never

was nor never will be one as beautiful as she. She was once upon a time a woman of this world; but became displeased with her husband and all the world and fled to the moon. On this 15th, the real story of why she fled is set out in the long theatrical plays attended by throngs of people. In ancient times on the 15th of the 8th month when they burned the incense bushel the sweet fragrance would go high up to the moon goddess. She took pleasure in it and manifested her approval by coming near the earth, riding on a cloud and people could see her beautiful face. But now men's hearts have become so wicked, and the world so full of sin, so the incense is not so pure as formerly and it does not rise so high as to reach the goddess in her palace and so, not enjoying its fragrance, she comes no more on the clouds, but people still offer incense and hope she will appear some time.

It is said that in the moon this goddess has a most beautiful castle. It is called the "Yash-Koon"—Moon Palace. Only one human has ever seen its splendor. Once, during the Long Dynasty, a Chinese king, called Ming Wong, by the Magic of a holy monk, was enabled to mount up from the earth to the Moon Castle to hear the music and see its beauty. He was allowed to stand outside for only a few minutes, but at that time the goddess knew that the king of man was there. She was very angry at the monk for leading the king to her holy land. Soon from the Castle came most unpleasant sounds. The monk understood that it was the queen giving vent to her wrath and he quickly led the king back to earth.

You can thus how full of superstition the Chinese are and how much they need the Gospel and Jesus Christ that they may see the real King in His beauty and live forever in His glorious palace on High. It's a joy to teach Chinese children of Jesus and His salvation while young.

Mr. Henry Ching and a Blessed New Year to you and loved ones. Yours in Christ's glad service, Rev. H. G. C. Hallcock.

Several basket ball games are announced by our school teams

With the opening of the basket ball season, the following games have been announced for the school teams:

Friday, January 11th, the Muleshoe boys and girls will play at Dimmitt.

Wednesday, January 16th, the railway and girls will play at Friona.

Friday, January 18th, the Texico and Muleshoe boys will play in Muleshoe.

Wednesday, January 23rd, Friona will play in Muleshoe.

Friday, February 1st, the Dimmitt boys and girls will play in Muleshoe.

Friday, February 22nd, Muleshoe at Texico.

All games played here will be at the High school gym.

### SEVERAL BASKET BALL GAMES ARE ANNOUNCED BY OUR SCHOOL TEAMS

With the opening of the basket ball season, the following games have been announced for the school teams:

Friday, January 11th, the Muleshoe boys and girls will play at Dimmitt.

Wednesday, January 16th, the railway and girls will play at Friona.

Friday, January 18th, the Texico and Muleshoe boys will play in Muleshoe.

Wednesday, January 23rd, Friona will play in Muleshoe.

Friday, February 1st, the Dimmitt boys and girls will play in Muleshoe.

Friday, February 22nd, Muleshoe at Texico.

All games played here will be at the High school gym.

### BAILEYBORO NEWS

Brick work on Balleboro's new school building was finished January 2nd. A few more weeks and it will be ready to move into.

Mr. and Mrs. Clifford Walls of Balleboro are the proud parents of a baby girl, born January 1st.

Flu is taking the south side of the county by storm. Some members of nearly every family and all members of some families have been attacked. No deaths have been reported.

## State Bond Issue For The Lee Highway Is Proposed By Officials

### FIRST DELIVERIES OF NEW CHEVROLET SIX ARE MADE TUESDAY

Valley Motor Company received the first shipment of the new Chevrolet Six cars last Tuesday. The shipment consisted of two coaches and two sedans. Immediately after being received, deliveries began. Rev. W. B. Hicks drove out the first of the cars, which was a coach. Mrs. Nina Elrod received the next, which was also a coach. The sedans went to L. J. Terry of Bula and Mrs. E. H. Buhman of Muleshoe.

### RECENT FARM IMPROVEMENTS WHICH STARTED THIS WEEK

Several new farm improvement programs were started this week in the Muleshoe territory. Mr. W. A. McCord, north of town is building a five-room residence with all modern conveniences. He will also build new barns after the completion of the home.

Mr. V. H. Vinson, also living north of town, is hauling out lumber this week for a general set of improvements. The bill for these farms is furnished by the E. R. Hart Lumber Company.

Willey Moore is erecting a new set of improvements on his farm south of town. Panhandle Lumber Company furnishing the material.

### TEACHERS' INSTITUTE TO MEET WITH THE FAIRVIEW SCHOOL ON JANUARY 19

Following is the program of the State and Bible county teachers at the Teachers' Institute to be held at Fairview School on Saturday, January 19th, 1929:

1. Opening Program—Fairview School.
2. Library Equipment and Use in Small Schools—D. H. Hargrove and A. L. Stringer.
3. Classification and Recognition for the Small School—J. E. Adams. Noon Intermission.
4. The Rural P. T. A.—Mrs. J. R. Dean.
5. Truck Service in Rural High Schools—W. S. Wilkins.
6. Is the Larger School Unit a Success?—J. C. Jenkins.
7. Business Session—Bailey County Teachers.

Miss Susie Boles returned to her home in Muleshoe Wednesday. Mrs. Boles accompanied her to Sweetwater, on her way to visit her mother in South Texas.

Mr. Isbell is absent from school this week on account of the illness of his father. Miss Leslie Head is teaching in his place.

Mr. G. L. Hamblin, from Oregon, is visiting in this community.

Mr. W. S. Beller and family moved to Mrs. Hart's place, west of the YL school, the first of the year.

On last Tuesday morning Rev. and Mrs. Jones entertained the school in chapel. Rev. Jones made an inspiring talk on "Education." They also sang a duet.

Our community regrets the loss of Mr. Willard and family, who moved to Lubbock last Friday.

Volena, James and Floyd Hoy are three new pupils who have entered school here since Christmas.

The Methodist Board of Stewards met at Mr. W. M. Witterling's place Tuesday night. After the business session oyster soup was served.

Letha Robison spent Sunday with Dorothy Priboth.

Miss Edwina Buhman has returned to school after two days absence.

Mr. and Mrs. Durham and Miss Esther Fogarty, of Oklahoma Lane, and Mr. and Mrs. Wallace and son, of West Camp, visited Mr. and Mrs. Haingrove Sunday afternoon.

Mr. and Mrs. E. C. Priboth motored to Clovis Sunday to visit Mrs. G. G. Priboth.

Mr. Ray Isbell and Miss Jerre Bellet returned home Saturday after visiting his folks the past week.

Reporter.

Mr. and Mrs. H. C. Edmonds, Mr. and Mrs. J. O. Jones, Jr., and Mrs. J. J. Franks of Sudan, attended the show at Clovis Monday evening.

### Would Mean Twenty-Four Miles of Paved Highway Through Bailey County, if Issue Carries.

At a meeting held recently in Ardmore, Oklahoma, of the various Chairmen from counties along the route of Lee Highway through Oklahoma, Texas and New Mexico, it was found that the different State Highway Commissions in these States have not provided sufficient funds with which to maintain the Highways of the State; that travel has increased so rapidly in the last year that funds are not sufficient to handle the situation. To meet this condition the Lee Highway officials presented the following resolution to the Convention which was unanimously passed:

WHEREAS: the highway officials of these States have striven to meet the needs of travel as fully as possible with existing funds, and

WHEREAS: rapid highway development is essential to the well being of Texas and Oklahoma, and their future development.

THEREFORE, the Lee Highway Association in convention assembled, recommends to the Governor and State Legislatures of Oklahoma and Texas that adequate funds be provided for highway needs through the issuance of a state bond issue of at least \$100,000,000.00 which shall be retired by a 5 cent gasoline tax and that county bonds already voted for state highways be retired by this bond and the remainder be used for immediate highway construction.

Copies of this resolution to be sent to the Governor and State Legislatures of Oklahoma and Texas.

Meeting adjourned to meet at Vernon, Texas, January 25th, 1929.

K. K. Smith, local Director, states that the meeting to be held in Vernon on the 25th of this month, the Director will endeavor to prepare budgets and ways and means to get immediate action of the Legislatures in the issuance of the bonds and the enactment of the new tax.

Bailey County should be graced with such a gift as to have Lee Highway paved from end to end. It would indeed be one of our greatest assets. We wonder how many highway sounds good. We wonder how it would look.

### BIG RANCH DEAL AT CLARENDON INVOLVES SIXTY-FIVE SECTIONS

Clarendon, Texas, Jan. 8.—The largest land deal transacted here for several seasons was closed today with the announcement by J. R. Porter, attorney for J. W. Owens of this city of the sale by Mr. Owens of his ranch, consisting of 35,997 acres, approximately 65 sections, in Briscoe and Hall counties some 20 miles south of this place.

The ranch was bought by the Slaughter company, consisting of Bob Slaughter of Dallas and R. L. Slaughter of Lubbock who have already begun the movement of cattle to this ranch. The exact figures of the sale were not announced but it was said the deal required over \$235,000 which it is understood here was a cash transaction.

Mr. Owens was an extensive land owner of the Panhandle and still owns practically 35 sections.

Miss Virginia Egbert returned Sunday from spending the holidays in Albuquerque, New Mexico.

## Simplicity of cooling system is a feature of the new Ford

A COMPLETE water plant is a part of every automobile as it is a part of every modern city.

The purpose of this water plant is to keep the engine cooled to a temperature that will make it efficient in operation. If it were not for this, the cylinder walls would become overheated and the pistons refuse to operate.

The cooling system of the new Ford is particularly interesting because it is so simple and reliable.

When the radiator is full of water, the engine of the new Ford will not overheat under the hardest driving. Yet the water is so regulated that it will not impair engine operation by running too cold in winter.

The cooling surface of the Ford radiator is large, with four rows of tubes set in staggered position so that each receives the full benefit of the incoming air. The fan is of the airplane propeller type and draws air through the radiator at the rapid rate of 850 cubic feet per minute at 1000 revolutions per minute of the motor.

The hot water around the cylinder head is drawn to the radiator to be cooled by a centrifugal water pump of new design.

The entire cooling system of the new Ford is so simple in design and so carefully made that it requires very little attention.

The radiator should be kept full, of course, and drained once each month so that sediment will not collect and retard the free passage of water. In cold weather, a reliable anti-freeze solution should be added.

An owner and manager of this important water plant should also see that the water pump and fan shaft are properly lubricated and the packing around the pump shaft kept in adjustment.

Hose connections may also need replacement after long service. For those little adjustments, it pays to call on the Ford dealer.

He works under close factory supervision and he has been specially trained and equipped to do a thorough competent job at a fair price.

FORD MOTOR COMPANY

### Beautiful Homes BABY CHICKS Thrifty Farms

15 Varieties \$11.00 to \$13.00 hundred, delivered. State accredited and Standardized Quality Chicks. All kinds of plants for West Texas, \$1.00 thousand up. 500 Varieties Garden, Field and Flower Seeds. Poultry supplies of anything you want for poultry. Order anything you want for Orchard, Lawn, Field, Poultry and Stock—We have it or Quality at right prices.

G. E. WHITE SEED CO. Plainview, Texas

## What Is A Bargain?

In this community are hundreds of individuals and families on the watch for an advertisement which will offer them what they want at an advantageous price.

Call them bargain hunters if you like, but thrifty shoppers would be the better designation. Thrift is a commendable trait and merchants should enter to it.

One family wants a new carpet—the need is not urgent. Another family is looking forward to buying dining-room furniture—it may not be for a twelve month.

One man is thinking of buying himself a watch. One woman a shopping bag; another an umbrella.

All can be made to buy earlier—by advertising. Advertisers can make the desire so keen that the bargain is forgotten in the fever for immediate possession.

### A NOTE TO MERCHANTS

Stimulate business by the offer of some slow-moving lines at special prices. Brighten up business by advertising some desirable goods at reduced prices. Make advertising banish dull business. Often you can tempt the buyer who is biding his or her time, to buy from you—at a time of your naming.

### MASS PRODUCTION OF MODEL A PARTS SECRET OF SUCCESS

A million axle shafts, each one exactly like the other 999,999 within one thousandth of an inch—four million pistons fitting four million cylinders with a degree of exactness that all but staggers the imagination—many more millions of drilled and threaded holes, all placed with an accuracy of location that is incomprehensible to any but the mechanically or mathematically minded—and all these factors, combined with other millions of parts manufactured in widely separated units of a gigantic plant, meeting on an assembly line to fashion a million automobiles! This is the miracle that is modern mass production, the miracle that was conjured up by Mr. Henry Ford when he started his first automobile assembly line.

The story of how it is possible to make a million—or ten million, or twenty million, for that matter—of any machine part, each one identical with all its fellows, is a story of measurements.

Today, in the Detroit plants, mechanics who have never looked through the eye-piece of a microscope are measuring within limits too fine for any unaided eye to see. Model A parts machined to within one ten-thousandth part of an inch accuracy are all in the day's work. Back of this precision are something like a million gages that must be kept in correct adjustment at all times, and many thousands of these gages are in constant use throughout the Ford plants. There is no time for hand fitting of inaccurate parts on the assembly line. They must either fit the first time or they are valueless. Therefore, the parts must leave the various machines which fashion them with every specified dimension correct. The result is that when put together, the car moves off the assembly line under its own power, a completed means of transportation requiring no special adjustments.

## Town Talk

W. D. Lassiter was in town trading Wednesday.

Mrs. C. T. Smith is reported quite ill with flu this week.

Mr. and Mrs. I. W. Harden were shopping in Clovis Saturday.

Delma McCarty was attending to business in Lubbock Wednesday.

A fine boy was born to Mr. and Mrs. J. W. Needham on January 4th.

Clem Files of Plainview, was a business visitor in Muleshoe last Monday.

R. L. Brown returned home Tuesday from a business trip to Oklahoma.

J. H. Motherall and daughter, Miss Ava Nell, were visitors to Clovis yesterday afternoon.

Mmes. L. S. Barron, A. W. Coker and Rev. Griffiths were Clovis visitors Tuesday afternoon.

Mr. and Mrs. Delma McCarty were visiting Mrs. McCarty's mother and father Tuesday night.

Mr. Richard Ince of Milwaukee, Wis., was in Muleshoe Tuesday, looking after business affairs.

Mrs. Luther Rasdale assisted at Gardner Dry Goods last Saturday during the opening sale rush.

Mrs. H. C. Henington returned Friday from White Deer, where she had been at the bedside of her mother, Mrs. Henry. Mrs. Henington stated that her mother was greatly improved.

## What's Doing In West Texas

Part of the Cap Rock Jersey Farm at Crosbyton is being cut up into blocks for rent and for sale. Each residence has five acres of fertile land surrounding it. This fills a need for new homes that has been growing in Crosbyton.

Under the joint auspices of the Brady Chamber of Commerce and the Brady Water and Light Board eleven prizes were given for the best lighting effects used on local houses during the holidays. First prize was \$40.00.

Callahan county farmers and ranchmen are making efforts to rid the county of wolves. The price paid is \$1.50 for females, \$5.00 for males and \$2.50 for pups.

Pyote's new \$100,000 school will be occupied in fall by the second week in January. Previously it has been occupied in part while work continued on parts of it. Two years ago Pyote's scholastics could have been housed in one room, so the growth is remarkable.

Estelene High School is to have a new athletic stadium to be built of wood and will be 84 by 80 feet wide. The ceiling will be twenty feet in the clear which will give plenty of room for basket ball games.

Mr. G. T. Bowen, of Hugo, Oklahoma, was a business visitor in Muleshoe Monday of this week.

Wm. Dixon, of Roswell, N. M. was looking after business affairs here last Saturday.

A. B. McConnell, of Ralls, was prospecting in Muleshoe Monday.

A. V. Chester and family, of Deatur, were visiting in Muleshoe last week-end.

C. B. Mason, of Littlefield was a business visitor here Tuesday.

Mrs. J. J. Franks, of Sudan, is spending the week here with relatives.

J. O. Jones, of Lubbock, was through here Sunday.

M. B. Copeland, of Plainview, was a business visitor here the first of the week.

# First Salute To Stars and Stripes

(Third Installment.)

Capt. Jones in the Ranger went into Brest and in April, getting favorable weather, made his famous cruise of the Irish Sea, in which he burned the shipping of Whitehaven and met and captured the Drake, a British sloop-of-war.

By the time Capt. Jones and the Ranger came into Brest with their prize, the Drake, war had been declared between France and England and according to the wish of Sartine, the French Minister of Marine, the Commissioner held Jones in France and the Ranger, with its crew, home to America under escort of the French frigate, the Intention of the Marine to employ Jones' ability in an enterprise, but there were other officers than there were in the Ranger. It was months before the Ranger was finally placed under his command. With it he splendidly won a last time, when he captured the British ship Serapis in the August 19th, 1779.

His action was fought in the English Channel. The Serapis was superior to the Bonhomme. Never before had a ship been beaten by such an American vessel. Jones' action was glorified in Europe by this European waters, where the Stars and Stripes were victorious. In 1783, the Treaty of Paris signed and England, and her colonies had come of age, acknowledged our independence and flag.

The Ranger had her hour of glory, but after the conquest of the Drake, we hear of her no more.

Capt. Jones had his year of triumph, but the latter years were darkened by disappointment and for nearly a century, men did not even know his grave.

The Flag begins with the salute at Quiberon its undefeated history. Symbol of a united, free nation, it has won the honor and respect of the world. Proudly we remember how once more the flag returned to France ten years ago, bearing with it grateful memories from the nation France had helped to build. Around the flag has resounded the thunder of a thousand battle fields. But in these days of Peace, there echoes only the music of the salute—the voice of friendship first heard at Quiberon, on February 14th, 1778.

"The First Salute to the Stars and Stripes" is the work of Edward Moran

who, at the time of his death, was spoken of as "the strongest marine painter of the United States."

For several years it hung in the National Museum at Washington, by courtesy of Mr. Theodore Sutor of New York. It was not until the death of Mr. Sutor recently that permission could be gained to reproduce this painting, so valuable from a patriotic and historic standpoint.

Edward Moran, who was a brother of Thomas Moran, America's foremost landscape painter, was born in 1829 in England. He came of a family of hand-loom weavers, and, when a small child, was set to learn that trade. Hardship and lack of a future drove the family to America, in 1844, where they settled in Maryland. Moran walked to Philadelphia without a dollar in his pocket in search of employment. Here he was again forced to work at the loom, but luckily under the eye of an employer who recognized his talent when he found him stealing time from his work to draw.

It was the turning point in Moran's career. His employer introduced him to the then famous landscape artist, Paul Webber, with whom he studied. Later he worked under James Hamilton, as well as studying for some time in England and France. His pictures were accepted by all American academies as well as the London Royal Academy and the Paris Salon, and he received many medals. He was a member of the Water Color Societies of this country and of London, of the Philadelphia Academy of Fine Arts, an associate of the National Academy of Design and was connected with many other artistic organizations.

His greatest work was a series of thirteen paintings of the marine history of the United States. "The First Salute to the Stars and Stripes" is one of that series. He died in New York in 1901.

### CONTRACT OF EARLY DAYS FOR UNIVERSITY LIBRARY

Loaned by Mrs. Jesse Carter, of Marshall, a labor contract, dated January 24, 1866, between Adam Hopf of Harrison County, and nineteen freed slaves, will be reproduced by photostatic and added to the University of Texas library, according to Mrs. Mattie Austin Hatcher, archivist. Each of the slaves signed the document by mark, and it was filed with Thomas Bayly, colonel in the United States Volunteers, sub-assistant commissioner in the Bureau of Refugees, Freedmen and Abandoned Lands.

Mrs. C. J. Roach and her daughter, Christine, returned home Sunday afternoon from Memphis, Texas, where Mrs. Roach had been in a sanitarium for several days.

### FOURTY-TWO PER CENT OF TEXAS HOMES ARE WIRED FOR CURRENT

Forty-two percent of the homes of Texas have electricity, according to a survey by the National Electric Light Association received by the Texas Public Service Information Bureau.

Including all farms in the total number of homes, about two-thirds of all homes in the United States now have electricity, the survey shows. Excluding farms about 82 per cent of the homes are wired.

Texas compares favorably in this respect with all other Southern States. Arkansas is at the bottom of the list with only 25 per cent of the homes wired. New Mexico has 26 per cent; Virginia 36 per cent; Wyoming 46 per cent; Louisiana 26 per cent; Missouri 46 per cent; Arizona 31 per cent; Kansas 40 per cent; Kentucky 33 per cent; North Carolina 30 per cent; Tennessee 30 per cent.

California and New York divide first honors with over one hundred per cent of the homes receiving electric service. The excesses of one hundred per cent is due to classification of meters.

### GERMAN FATHER OF 84 LIVING CHILDREN

Berlin, Nov. 13.—The story of a man who twice married, at 76 is the father of 87 children, 84 of whom are living, is reported by a Vienna medical association journal.

Bernard Scheinberg, living near the German border, had 69 children by his first wife who died at the age of 56, the journal says. Not one was a single birth. There were four quadruplets, seven triplets and 16 twins. Sixty-seven of the children are living, but he admits having lost count of the grandchildren. Scheinberg's second marriage at the age of 57 was blessed with 18 children, including two sets of triplets. His second wife is still living.

Monahans—The Texas & Pacific Railroad is building a 39-mile branch line from here to Kermit to serve the Winkler County oil area.

San Angelo—A \$60,000 new brick building has been completed for San Angelo's central fire station.

San Angelo—The number of sheep in Tom Green County has increased from 120,300 in 1927 to 150,000 in 1928.

Marathon—Thirty miles of paving recently completed on Mexican border highway in both directions from this place.

### POULTRY PROSPECTS ARE GOOD FOR COMING YEAR

There are good times ahead in 1929 for farmers who make poultry raising a serious part of their year's work, according to U. S. Government opinions of poultry experts throughout the country. Conditions are favorable and a good market awaits the producer.

This is not mere guesswork. Here are the reasons: Government reports show a scarcity of hens and a short crop of pullets on farms throughout the country.

Chicago Produce News says "about 30,000,000 less than a year ago." This means fewer eggs laid and satisfactory egg prices. Reports indicate bumper crops of corn and oats. Poultry feed prices are declining as a result of these big crops.

The serious shortage at the present time of beef cattle, swine and sheep is going to make even greater demand for poultry and eggs.

Prices of meat, especially beef, are being forced to new high levels which may exceed the wartime peak. If poultry meat is cheaper than beef, people are going to eat more chickens.

Thousands of poultry farmers everywhere are now eager to replenish their flocks to increase egg production. Greater egg production from flocks means increased profits per pound of feed.

With a ready market promised, lower feed prices in sight, and a large demand predicted, the farmer prepared to satisfy the demand stands in a position to reap a considerable profit from farm poultry flocks.

### KNOW TEXAS

Immigration from the United States to Texas began to trickle in following the Louisiana purchase in 1803.

Stephen F. Austin started his great colony on the banks of the Brazos at old Washington in 1821.

On March 2, 1836, the Texans in convention at Washington declared an independent republic and David G. Burnett was named president.

On March 6, four days after the Texas declaration of independence, the Alamo at San Antonio fell and the new born republic lost such able leaders as Travis, Bowie and Crockett.

Rankin—115 carloads of pipe have been unloaded here by the Texas Co. which is building a pipe line from Monahans to Fort Arthur at an expenditure of \$20,000.

### YOUR PRINTING NEEDS

How about your printing needs to start the New Year? Check up now and start right by having the right kind of printed forms for your business. The Journal can furnish you with letterheads, envelopes, statements, bill heads, all classes of business cards, calling cards, window cards, vouchers, special envelope forms, legal blanks, etc. Call and place that order now.

# "As Good As Goodyear"

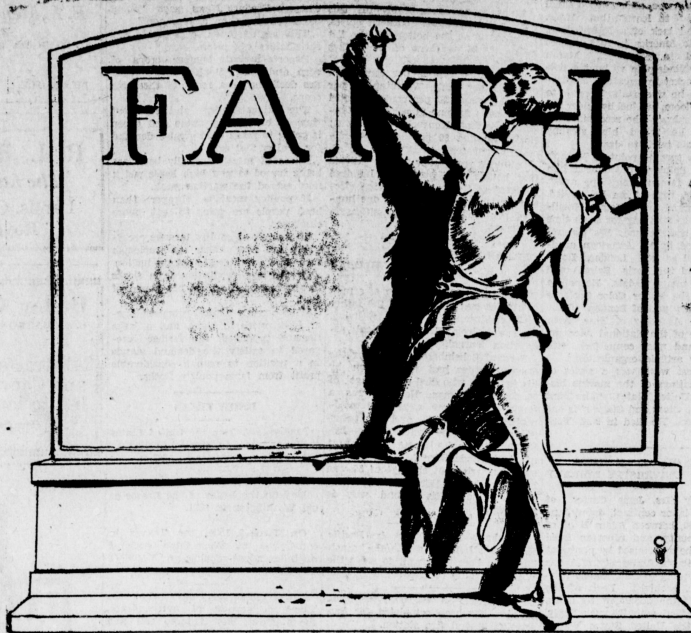

Every once in a while we hear this—but we don't believe it. The largest single group of car owners in the world don't believe it either, because more people ride on Goodyear Tires than any other kind. Certainly there's a reason. But how much do you think this "just as good" idea has cost the tire buying public? . . . . We say plenty. We are continually impressed with this loss, because, nearly every day one or more customers tell us of their experience with tires claimed to be as good as Goodyear.

**Uniform Value** Goodyear Tires are the standard of tire values. They are not high priced and offer a selection of types in all sizes to meet every requirement of the motorist. The lowest priced Goodyear may give mileage equal to or greater than many tires priced higher.

**New Markets for Cotton**

King Cotton has greatly extended his dominions in the industrial field in recent years and his scouts are constantly looking for new regions to conquer, says the Sears-Roebuck Agricultural Foundation. The fiber has ten thousand uses and more are being discovered every year. These new uses and the extension of old uses have maintained or increased per capita consumption of cotton in spite of the reduced dimensions of women's dresses and competition from other textiles.

Formerly, cotton was used almost entirely for clothing, but other uses are taking an increasing share of the crop. Among the many industrial outlets are automobile tires, auto bodies, cotton bagging and baling, airplane cloth, rubber goods, artificial leather, awnings, wall coverings, traffic markers, power belting, electrical insulators, cleavages and binder cloths in road construction, gears, truck wheels, and other machinery parts.

Tire production in the United States requires about 200,000 bales of cotton annually. In 1927, 219,900,000 pounds of cotton fabric were used in the production, according to the Rubber Association of America. Cotton is also used by the auto industry for upholstery, tops, curtains, carpets, tire covers, padding, linings, electrical insulation, rubber tubing, and brake bands. All these uses were relatively unimportant twenty years ago.

Cotton bags used in the wholesale grocery trade for sugar, flour, salt, coffee, potatoes, and similar commodities require about 200,000 bales of raw cotton and waste every year. The cement industry consumes cotton bags equivalent to about 45,000 bales, the bakery trade, 20,000 bales, and the fertilizer industry, 4,000 bales. Bags for handling coal, mail and money also take small amounts. It is estimated that if cotton bags were used for packaging all commodities to which they are adapted in the wholesale grocery trade alone, about 600,000 bales of raw cotton and waste would be required annually.

If cotton cloth were used as a bale covering on 60 per cent of the average cotton crop, about 120,000 bales would be required for bagging. It is estimated that the withdrawal of this amount, chiefly of low grades, from the supply would raise the seasonal average price of cotton by about 1/4 cent a pound, or \$1.25 a bale. This would be almost enough to pay for the covering, so that producers in the aggregate would, in effect, get their bagging without cost. Tests have shown that cotton has advantages over jute bagging through making a neater package, reducing dead weight and lessening waste in receiving from the bale, but jute coverings cost less except in years of extremely low cotton prices. Attempts are being made to produce a light cotton bagging that can be sold in competition with jute.

Cotton textiles are more extensively used in aviation than any other fabric and this use is growing rapidly. Its lightness, strength, durability, vibration, ease of repair and low cost make it the best textile for this purpose. The outer covering of the Graf Zeppelin contained 20,000 square yards of cotton cloth and 40,000 square yards were used in its 30 gas cells. Cotton manufacturers have found it possible to increase the popularity of cotton clothing through more attention to design, harmonizing patterns with style tendencies, faster colors and using competitive fibers with cotton. As a result of these efforts, cotton dresses are in greater vogue at present than for several years.

The use of 108-inch bed sheets rather than the 90-inch length sometimes sold is a means of extending the use of cotton in an old and standard product, and opens up an additional outlet for 20,000,000 square yards of wide sheeting annually. Awning manufacturers have launched a three-year campaign to increase the use of their product and estimate the possible gain in their market at 25,000,000 square yards annually. The use of cotton traffic markers in place of paint on city streets is estimated to require 5,000,000 square yards of cotton fabric a year. Cloth to make a cleavage plane in cement roads will take about 5,000,000 square yards this year and its use as a binder in putting an asphalt surface on ordinary roads opens up an immense market. Every mile of such road would use a minimum of 3,520 square yards of fabric.

The United States Department of Agriculture, the Department of Commerce, and the Cotton Textile Institute are co-operating in a survey of the utilization of cotton, trying to find in what industries it is used and where its use may be extended. They have found cotton being used in 150 different ways on the farm, aside from the household. Household uses, aside from clothing, number over 100. Railroads use cotton in over 40 different ways. Building trades make considerable use of cotton. Modern steamboats use much more cotton goods than sailing vessels.

The development of new uses and the extension of old ones are essential to sustained progress of the cotton industry from the standpoint of both cotton producers and manufacturers, the Foundation asserts. Efforts in this direction deserve warm support.

**The Birth of London**

No one can say when London began; the beginning is lost in the mists of time. London is first mentioned in a passage in Tacitus, a Roman historian whose uncle, General Agricola, spent most of his active military career in Britain. Tacitus describes the Roman London of A. D. 61 when it was sacked by Queen Boadicea—the British warrior-queen.

It is one of the strangest things in London's history, that she should first appear at the moment when she was sacked by a British queen, and that that queen's statue should now stand in a place of honor under the palace of Westminster, looking down at the Thames. It is strange, but it marks that peculiar position of London as the meeting place of the races out of which the English people were made.

**Mental Transformation**

In the course of some investigations of epilepsy, a French neurologist secured some specimens of writing begun before epileptic seizure and continued during that state. His report is that the part written in a normal and lucid state is correct as to form and content, while the part written in an epileptic state is incorrect in both content and form. The defects in the writing appear suddenly, with no transitional phase, and affect the penmanship and the composition. The letters have become curved, the outlines have been enlarged and the forms have been changed. The composition is a strange, incoherent conglomeration of words and ideas.

**Eat More Fish**

AT more fish and prevent rotter is the gist of a message recently delivered here in America by the world's greatest authority on codfish and simple goffer. Professor Gullbrand Lundie, of Oslo University, Norway. In speaking here, Professor Lundie said he found an increase in simple goffer, and that the greatest increase was inland. The reason for this middle western increase is the lack of iodides in the foods and water. So for that reason inlanders should borrow iodine from their seaboard neighbors by eating fish—either fresh or canned.

**The Ever Popular Salmon**  
To many, canned fish is confined to the three S's, sardines, salmon and sardine. But don't forget that tuna, crab, cod, lobster, herring and others belong on the list. Yet salmon continues to head the

list in point of popularity. Doubtless one reason is its adaptability to different methods of serving; for instance, baked salmon with stuffing is a dish that is simple to prepare and yet is suitable for a party. **Baked Salmon with Stuffing:** Drain a tall can of salmon and mix it with one-half cup cracker crumbs and one unbeaten egg. Place the salmon in a greased pan, shaping like a fish, over it put the stuffing and cover with the remainder of the salmon. Strip with bacon and cook in a moderate oven until browned. Serve with tomato sauce. To make the stuffing, boil two tablespoons minced onion in one cup of water for fifteen minutes. Add the liquor from the salmon and one-half teaspoon each of salt, celery salt and paprika. Pour this over two slices of stale, white bread and two tablespoons corn meal. Cool, and beat well.

**MULESHOE CAGERS WIN FROM FRIONA 39 TO 37**  
The Muleshoe basket ball (town) team won over Friona last night in a fast game at the High School gym. The score was 39 to 37.  
The Sudan School teams, boys and girls, were to have played Muleshoe last night, but due to some misunderstanding in the dates, the Sudan loopers failed to arrive.

**LAND DONATED FOR ANNUAL DAIRY SHOW AT PLAINVIEW**  
Plainview, Jan. 10.—The city council of Plainview at its regular session this week gave to the Chamber of Commerce and Agriculture a plot of ground in the city park containing approximately six acres to be used as a site for building permanent quarters to house the Texas Panhandle Plains Dairy Show which is staged annually at Plainview.  
H. S. Hilburn was chairman of the committee which has been working on the task of securing permanent quarters for the show. Other members of the committee are Maury Hopkins, C. G. Goodman, R. G. Silverthorne, and Bill Gouddy. Charles Reinken, president of the Board of City Development of Plainview, went before the council at its meeting asking for assistance for the project.  
Every effort is being made to get a permanent building in ample time for staging the Second Annual Show, April 2, 3, 4, and 5, this year.

**TEACHER TO EXECUTIVE IN TWO YEARS TIME**  
A few years ago, he was a country school teacher, drawing a meagre salary six or eight months out of the year and discouraged with the outlook for the future.  
Two years later he was Deputy Collector of Internal Revenue for the District of Arkansas with an all-the-year-round income many times that which he had drawn as a teacher.  
"I'm just beginning my career," he says.  
One decision, a little determination, and the encouragement of a far-sighted little wife made this wonderful change in the course of his life. His story may prove helpful to hundreds of others.  
Raised on a farm, and having attended a country school until he had completed a two-year High School course, Leroy A. Boss was twenty-one years of age before he "struck out for himself" as a country school teacher. For five years he followed this profession. Then, having taken unto himself a wife, he began to think a bit more about the future. He had made no progress as a teacher, although he liked the work. Encouraged by his wife, he decided to fit himself for a business position and enrolled at Tyler Commercial College, Tyler, Texas.  
His first position upon graduation paid him a yearly salary more than three times that which he had drawn as teacher. The following year he was appointed Deputy Collector of Internal Revenue—a position he could never have held but for his thorough T. C. C. training.  
"At any cost, get a T. C. C. graduate," is his advice to employers. And to teachers and other ambitious young people: "Get a T. C. C. training."  
In the big illustrated book, "Achieving Success in Business," are printed scores of stories of men and women who have reached success as a result of training. The book is free. No obligation. Won't you let us send you a copy? Just clip the coupon below and mail it today.  
(We have no branch schools. We lead; others follow.)
