ARCHER CITY EDITOR GOES "HAY-WIRE" OVER FINANCIAL AFFAIRS IN ALLEGED INTERVIEW WITH A BAILEY CO. MEDICO

There are times when no indignation can body forth one's knowledge nor express a tithe of their contempt—when one gropes in vain for invectives that bear upon their scurrilous wings an adumbration of their anger. One is compelled to stand speechless before a subject, else burn their lips with blasphemy or before their own billingsgate. Such was the case of Dr. A. R. Matthews, this city when, last week he handed the Journal editor a copy of "The Archer County News," containing the following mis-interview:

"Dr. A. R. Matthews, Muleshoe, Texas, medico, was in Archer City over Tuesday visiting his daughters, Medames W. C. Thomas and Virgil Seay.

"The doctor's mission in this section was to assist the Bailey county sheriff in bringing an insane person to the state hospital at Lake Wichita.

"According to Dr. Matthews, after losing nearly everything else, a lot of the Plains people may lose their minds and be brought to this Lake Wichita resort—from which institution neither sheriffs nor doctors are exempt.

"He said this jokingly, yet there is at least a grain of truth in it.

"But the darkest is just before dawn. Perhaps things will soon change, and the citizens of that section of the state will again become prosperous—forget hard times—and perchance vote for Hoover for President.

"According to Dr. Matthews, financial conditions at Muleshoe are pitiful. One man sent his children to the orphan's home. And finally he had to send his wife back home to her people in Georgia. And this month, it looks like he isn't going to be able to rake up enough money to make the payment on his car."

The above abortive statement is within itself conclusive proof that the mental machinery of the principal pen-pusher of the News is inextricably out of gear and the wonder is that long ago the chief officiating functionaries of that county have not taken notice of the non-erotic clash of his cerebral cogs and confined him within that palace of padded cells from which sheriffs and doctors are not exempt; but which would have to add an annex of considerable dimensions if it housed all the nut-wit editors of East Texas whose jealousy and animosity is constantly being aroused by the thousands from that section who are continually showing their exceedingly good sense and perfect balance of mind by moving out to West Texas where insane asylums are unknown and unneeded, though occasionally some newly acquired citizen puts off the moving so late that the state of non compes mentis already begun in his former location has progressed entirely too far for a complete reestablishing of his mental equilibrium, and he has to be officially conducted back to the asylum near Archer City. However, it is only a matter of time, when greater publicity and wider dissemination of true information has permeated the atmosphere of the eastern part of the state and percolated the mind of the distressed citizens of Archer and neighboring counties, that the major portion of its citizens will be hieing to the Plains country, and honest doctors of that unfortunate area will be recommending its curative conditions as excellent for warding off cerebral hemorrhages as they now extol them for the relief of all pulmonary troubles.

The State is to be commended for its show of wisdom, in that it generally follows the policy of wise business concerns in locating its various institutions at the center of its largest patronage, which doubtless explains why the asylum for insane people was located so near Archer City, though it is somewhat of an inconvenience for West Texans who, on very rare occasions, must take one of their mentally bewildered citizens to that neurotic institution for safe keeping.

There is no controversy regarding the News's statement that "financial conditions in many sections of the Union are pitiful," and Bailey county does not claim total exemption. It would be almost miraculous for any given section, otherwise happy and prosperous, to escape the sapping and devastating influence of less prosperous counties of the state, some of which extend as far as Archer. Attention, however, is called to the fact that in the monthly map of

Choose Chevrolet
six-cylinder trucks for low first-cost and unsurpassed economy

The economy of using Chevrolet six-cylinder trucks is an actual dollars-and-cents economy that shows up, month after month, on the balance sheet. It starts with a purchase price that is one of the lowest in the market for a complete unit. It continues throughout Chevrolet's long life with an operating cost that is unsurpassed!

(1) That no other trucks of equal capacity give any better gasoline, oil or tire mileage than Chevrolet. (2) That the cost of keeping a Chevrolet in satisfactory running order is unusually low. (3) That Chevrolet trucks are exceptionally reliable and long-lived.

Today, Chevrolet's proved economy is available to buyers in every truck-using field. For Chevrolet offers a new line of quality bodies that includes a type for every hauling requirement.

Consider, for example, the cost-records of leading national organizations who use large fleets of Chevrolets. They prove

Chevrolet 1 1/2-ton chassis with 131" wheelbase \$520
(Dual wheel option, \$25 extra)
1 1/2-ton chassis with 137" wheelbase, \$590
(Dual wheels standard) Commercial chassis, \$335

All chassis prices f. o. b. Flint, Michigan. All body prices f. o. b. Indianapolis, Indiana. Special equipment extra. Low delivered prices and easy terms.

SOYBEAN PRODUCTION GROWING IN FAVOR IN WEST TEXAS AND BEING RAISED IN COMMERCIAL QUANTITIES

By FRED S. REYNOLDS, Farm Agent for industrial purposes. "And right here is where the minds of industry are working to give a permanent market for this crop. Most of the soybeans produced in the United States above those required for planting purposes have been crushed for oil and meal for several years. But almost overnight this industry has reached proportions that warrant its support by growers of soybeans and users of soybean products. Soybeans yield per ton when crushed about 250 to 300 pounds of oil 1600 to 1650 pounds of meal, with about 100 to 150 pounds milling loss." Soybean meal has about the same feeding value as cotton seed meal and is being used by the thousands of tons in mixed feeds for dairy cows and chickens. The meal is also being used for replacing tankage in feeding hogs. There are many varieties of soybeans, Lorenda and Manchou, from what we know at the present time, appear to be the varieties best suited to West Texas. Of these, Lorenda is more widely used at this time. The next and last article of this series will go into details as to varieties, date an acre of seedling, cultivating and feeding value.
