TO YOUTH.
BY WALTER SAVAGE LANDOR.

What art thou gone, light-ankled youth?
With wing at either shoulder,
And smile that never left thy mouth
Until the hours grew colder.

There's what seemed to whisper near
The trees and frosty part;
I don't feel it; I feel no fear,
Nor weight upon the heart.

If my soul left it, Love was by
And rolled it up again;
So there was a sigh,
There was a sigh of pain.

I may not call thee back; but thou
Brought me, when the hand
Of death silent waves o'er my brow
The poppy-crowned strand.

The smiling eyes look over mine,
They like our past invite;
But keep back every silent sign
And bid us, like, take flight.

TO AGE.

Welcome, friend! There many years
How we lived door by door;
The arts have hand in all we do,
Perhaps for some few more.

I was indeed at age
When better boys were born,
But now understand how manly the sage,
If I am seen in sight.

Little know they from me,
The honest planter will see
That writes these lines to thee.

Thanks for Expelling Fear and Hope,
One vice, the other vain;
Our world, the world's telescope,
Shall not see again.

Rather what lies before the feet
My motto shall suffice;
How like a lion's dizzy look
Deceives not the front of Aga.

RAILROADS vs. PLANK-ROADS.

We copy the following article from the Washington (Texas) Lone Star, in which paper it appears as a communication. At this time, in the incipiency of an internal improvement system for this State, it is well that the people should carefully examine into the different and most practicable means of making transportation, easy, cheap and quick:

Mr. Bonar—Being an early advocate of the contemplated railway from Buffalo Bayou to our county, and having noticed all that has been advanced, pro and con, in the premises, and especially the recent movements of some of the Galveston citizens in convention, as well as the course of the energetic Dr. Moore, of the Telegraph, I wish to make a few remarks in relation to the ultra notions of these parties. The ideas I will suggest, however, are not exclusively my own, but are suggestions of a few practical farmers, and though they may not possess the financial abilities of a De Witt Clinton, nor know much about commercial transactions or the current of trade, yet they have enough of common hard sense to make some estimate of the cost of a road some sixty miles long, through a country which Nature has almost herself made ready for the superstructure. In reference to the views of the late Galveston convention, I would remark, that if there is not enough of public spirit in the counties of Harris, Austin, Washington and Grimes, to build a railroad sixty miles long, at this time, I would ask, how great a while would it take the whole State of Texas (a great majority of whose citizens know about as much and care about as little of and for internal improvement as a wise does about a holiday) to enter into the spirit and knowledge of their great project of building thousands of miles through a vast wilderness—a project about as feasible and difficult as the fable of the ancient Don Quixote. It appears to me that the people of the Island City did not like to follow in the wake of those in our interior, and hence their great plan to throw us far into the shade—De Witt Clinton is quite a baby to some of those great spirits in that convention.

Now, in conclusion with the foregoing, we wish to review a few of Dr. Moore's comments which he has made in the last Telegraph, on the communication signed "Railway." If the "cost of the grading" and the "price of lumber" is so cheap, is not that the same advantage in making a railroad as a plank road? I think the more so in favor of the railroad, because, as to the article of saw mills, the railway can be made without a saw mill at all—for every particle of wood-necessary can soon be made ready to lay down from the broad-axe alone, and that, too, by negro labor, not exceeding 50 cents per day, for good horses—thousands of miles of road have been made without the aid of a saw-mill.

With regard to the "Utica" plank roads, I presume they are traveled exclusively by high-bred horses at the rate of seven or eight miles per hour. Now let us call to our minds eyes, and imagine the "homely wagons" (ox teams of course) of the planters on the Dr. Moore's plank road—away in the front of the long train is an odd wagon, with his old team of oxen, plodding along, at the rate of half a mile an hour—he has got on the track first, and Old Nick him self cannot get him off; and it is quite a predicament to him when he stops to feed and turn out his ten yoke of oxen to graze on the grass for at least half a day, to look back on the train behind him composed of large teams, mule teams, carriages and stage coaches, interspersed with his own kind of cattle all standing still, (for if they are loaded it is impossible for them to get off on the "earthen road") and waiting his motion to start again. Now, in this beautiful solitude, Doctor, the man driving the

RAILROAD FACTS.

The following facts in regard to the Railroad system, apply with great force to this State. With two main trunks terminating at Galveston and Indianola, and penetrating the interior in such course as to induce branch roads, there can be no doubt of their success. The natural formation of the country invites this course, and it is hoped that enterprise and capital will be so directed:

Buckner H. Payne, the indefatigable Railroad agent, during a labored and interesting effort before the Railroad Convention lately held at Little Rock, Arkansas, gave the following conclusions, to which his arduous labors and investigations had conducted. He proceeds to say that Railroad history teaches—

First.—That all railroads beginning at great commercial cities on the seaboard never fail, if persevered in, to be good paying stock.

2. That they never fail to advance the commercial prosperity of the city.

3. That they advance the value of the landed estate or property of the city and country through which they pass, from 100 to as high, in some instances, as 5000 per cent.

4. That no matter how far the road is extended, how many branches it may have, the extension, and the branches, equally impair such value to the country developed by them.

5. That the company building such road, properly managed, never break, nor the stock become valueless.

Witness: The railroads from Boston, New York, Charleston and Savannah, and the same in Europe.

Second.—That the railroads of States distant from the great commercial seaboard market, but connecting with the main trunk leading to that market, are also good paying roads, and possess the power of enhancing the value of the country developed by them.

Witness: The New England roads since the connection with Boston, the Michigan, Northern Ohio, Indiana and Illinois railroads connecting with New York, &c.

Third.—That where railroads have been constructed in violation of these principles, the companies have failed, and consequently, if disregarded in future, they will continue to fail.

Fourth.—That this is so well understood by all bankers of any note, that roads starting from or directly connecting with such great commercial seaboard market, received moneyed facilities which are invariably denied now to roads where no such connection exists.

Fifth.—That all transhipments, reshipments and delays from physical causes must be avoided, and the road made as direct as possible.

Sixth.—That geographical and local causes, such as a wide extent of country aggregating from natural facilities the produce and merchandise upon a particular point in the interior, serve to make that point or city one from which railroads may radiate, and produce good effects upon the value of its property and that of the country through which the mass of the people in consequence.

Seventh.—That where the principles here set forth have been disregarded, the country has been retarded in its growth and prosperity, and a distaste and aversion to railroad improvements engendered in the minds of the people in consequence.

Eighth.—That, as a general rule, it may be affirmed that all railroads not connecting directly with the great seaboard market of the country, fail, and the company break.

Ninth.—That at the first all railroads must necessarily be local and sectional, but although local and sectional.

Tenth.—That prudence demands and success requires, that, in order to obtain the greatest amount of benefit from railroads, they should be so located that their extension may bring about such connections with other roads, and other sections, as will convert local roads into State roads, and State roads into international and national roads.

Eleventh.—That railroads, when so constructed, starting from the great city and market where the produce seeks its sale, and the country its supplies, never fail to add to the value of the real estate of both city and country.

The following "hoggish" story shall do for Mr. M. D.'s debate on for a week to come:

A few weeks ago, says a correspondent of the Locomotive, I was standing on the pavement, with several others, in the town of _____, and some of the crowd had been spinning some yarns, and one kind of easy fellow spoke up, and said he could tell a truth that would get all their yarns down. Said he, I once knew a man who got kicked on the head by a horse, and was badly wounded. A man was immediately sent for a physician, who found the poor fellow's skull broken and a considerable amount of brains gone. He ordered a hog to be killed and took a ten-cupful of its brains, filled up the cavity in his patient's head therewith, packed it with silver, dressed the wound, and in a short time he was well as ever, except that he showed a slight inclination to rot!

FRESH BUTTER.—The Washington Telegraph says a patent right has been recently granted to a citizen of Ohio for the preservation of fresh butter, by a chemical process, to stand any climate for any time.

horse and mule teams would rejoice to see the "purs-proud duns and others" of the "pulling cars," to take their cotton off their wagons, and let them return home to their farms by way of the mud road. But the Doctor says that the "earthen road" elevated several inches, and becomes so firm and compact that wagons can make but little impression upon it when they turn out. This may be the fact in regard to high rolling land, and that of a gravelly nature. Such, perhaps, is the case with the Utica roads; but if this flat prairie, through which the Doctor's road runs, is thrown up there must be a continued ditch. And when it is, at all practicable that "earthen road" will be more traveled than the plank way, and consequently this "earthen road" will soon have those "deep ruts," yes, just like it always has—the stage coaches will have to carry their fenders, and so forth, to prize out of the mud holes.

Dear Doctor, you must be an old Texan, heart and soul; you think we will never have anything but ox teams—nothing but Ball & Brandy. The writer has seen plank roads, and Macadamized roads, but has never seen an ox team on them. A good horse-team will travel 20 miles on an average, while the ox is resting and feeding; and will those fast wagons turn out on the earthen road to pass every ox-team they come up with?

The Doctor says: "It is only when 40 or 50 teams follow in the same track that deep ruts are formed," but again he says that the "homely wagons of the planter will be seen extended in long lines, upon them." Well, then, to make these "extended lines," it will take some 40 or 50 wagons, consequently the "purs-proud" ruts will be formed and no mistake.

2. That they never fail to advance the commercial prosperity of the city.

3. That they advance the value of the landed estate or property of the city and country through which they pass, from 100 to as high, in some instances, as 5000 per cent.

4. That no matter how far the road is extended, how many branches it may have, the extension, and the branches, equally impair such value to the country developed by them.

5. That the company building such road, properly managed, never break, nor the stock become valueless.

Witness: The railroads from Boston, New York, Charleston and Savannah, and the same in Europe.

Second.—That the railroads of States distant from the great commercial seaboard market, but connecting with the main trunk leading to that market, are also good paying roads, and possess the power of enhancing the value of the country developed by them.

Witness: The New England roads since the connection with Boston, the Michigan, Northern Ohio, Indiana and Illinois railroads connecting with New York, &c.

Third.—That where railroads have been constructed in violation of these principles, the companies have failed, and consequently, if disregarded in future, they will continue to fail.

Fourth.—That this is so well understood by all bankers of any note, that roads starting from or directly connecting with such great commercial seaboard market, received moneyed facilities which are invariably denied now to roads where no such connection exists.

Fifth.—That all transhipments, reshipments and delays from physical causes must be avoided, and the road made as direct as possible.

Sixth.—That geographical and local causes, such as a wide extent of country aggregating from natural facilities the produce and merchandise upon a particular point in the interior, serve to make that point or city one from which railroads may radiate, and produce good effects upon the value of its property and that of the country through which the mass of the people in consequence.

Seventh.—That where the principles here set forth have been disregarded, the country has been retarded in its growth and prosperity, and a distaste and aversion to railroad improvements engendered in the minds of the people in consequence.

Eighth.—That, as a general rule, it may be affirmed that all railroads not connecting directly with the great seaboard market of the country, fail, and the company break.

Ninth.—That at the first all railroads must necessarily be local and sectional, but although local and sectional.

Tenth.—That prudence demands and success requires, that, in order to obtain the greatest amount of benefit from railroads, they should be so located that their extension may bring about such connections with other roads, and other sections, as will convert local roads into State roads, and State roads into international and national roads.

Eleventh.—That railroads, when so constructed, starting from the great city and market where the produce seeks its sale, and the country its supplies, never fail to add to the value of the real estate of both city and country.

The following "hoggish" story shall do for Mr. M. D.'s debate on for a week to come:

Said he, I once knew a man who got kicked on the head by a horse, and was badly wounded. A man was immediately sent for a physician, who found the poor fellow's skull broken and a considerable amount of brains gone. He ordered a hog to be killed and took a ten-cupful of its brains, filled up the cavity in his patient's head therewith, packed it with silver, dressed the wound, and in a short time he was well as ever, except that he showed a slight inclination to rot!

FRESH BUTTER.—The Washington Telegraph says a patent right has been recently granted to a citizen of Ohio for the preservation of fresh butter, by a chemical process, to stand any climate for any time.

INCIDENTS OF THE BATTLE OF THE THAMES—WHO KILLED TECUMSEH?

Gen. Cass, during a discussion in the Senate, on the 5th ult., on the Indian appropriation bill, in advocating the payment of a certain amount of money due the Shawnees, a tribe with whom he had had much official intercourse, and of which the celebrated warrior, Tecumseh, was the chief, took occasion to vindicate the truth of history, as follows:

There are two historical points which have been much debated, about which I wish to say a few words: both are connected with Col. Johnson and those Shawnees. The question has been often mooted by who was the author of the movement by which the mounted regiment commanded the attack upon the British at the battle of the Thames.

Probably I know as much upon that subject as any other man now living, and the facts are these: General Harrison had prescribed the order of battle, and announced it in the usual manner. That order directed that the army should move, infantry in front, with a portion of the force placed at right angles to the main body, to prevent the enemy from turning the flank. The cavalry were to remain in the rear, to follow up all the movements of the infantry. They were posted with the Thames on one flank and an almost impassable marsh on the other. Just as the arrangement was completed, and the British forces were almost in sight, I was sitting on my horse, when General Harrison rode up, and said to me, "I have a great mind to change my order of battle. I feel very strongly inclined to let Colonel Johnson's regiment attack the British line first." I replied, "You have undoubtedly considered the difficulty attending the charge; the mounted men are brave, but undisciplined, and their horses unused to service. If defeated, they may be upon our line, and do us irreparable injury." His answer was, "Col. Johnson says he can break the British line, and I will let him try." Well, the movement was made and was successful; and never, from that day to this, have I had any doubt that Col. Johnson proposed the movement to Gen. Harrison.

Mr. Butler—Did Col. Johnson's regiment charge the enemy with swords or rifles?

Mr. Cass—The men were all on horseback, armed with rifles; few of them had swords; they rode down the British forces; broke their line almost without impediment. I saw the whole operation myself, being there rather as a spectator, for I was not in command. I talked about it afterwards with some of the British captured officers, and having expressed my surprise at the little opposition the men met with, asked why they allowed their lines to be broken, and their men run down? They replied that "their men had become alarmed, for they had heard our bugles in the swamp on the left," where they supposed that we had a heavy force of regular cavalry. The bugles, Mr. President, were some old tin horns, and we had no force there at all.

I had some conversation on the subject, the other day, at Lexington, with a very intelligent gentleman—Captain Johnson—young brother of Colonel Johnson, who was there, and we compared notes, and agreed in our recollections. Now, as to the other historic but disputed point: That who killed Tecumseh? I will tell you what I know. Tecumseh fell in the battle, as we are all aware; but in the following year the Prophet, Tecumseh's brother, and his son, a young Tecumseh, a very intelligent young man, often came to see me, and we had several conversations respecting the series of events in which his father was engaged. The young man was near his father's side during the battle, but his uncle, the Prophet, was in the Creek country. The young man described the battle very graphically—the persons, the parties present, and the incidents, without hesitation from the beginning to the end, and I have no more doubt from his narration than that I am here, that Colonel Johnson was the person who killed his father. There were three of the Johnsons in the battle, and they were as brave men as ever followed the standard of their country to war.

General Cass continued his remarks, and referred to many incidents to show the services rendered the United States during the war, by the Shawnees. Gen. Harrison and himself, in 1814, at the direction of the President, held an interview with a large number of them at Greenville, Ohio, when they agreed to join our standard, and subsequently did render to us efficient service. A party of them accompanied Gen. Cass to the northwest frontier, and had an engagement with hostile Indians, who were urged on by the British within two miles of Detroit; and, in this connection, Gen. Cass referred to the fact that a white man, named Parks, was sitting in the gallery of the Senate, whom he had known since 1814, and who, when a boy, was taken prisoner and brought up among the Wyandots and Shawnees. Parks, at the time of the engagement, although but a boy, and Blackfoot, the principal chief of the tribe, whose son was also in the gallery, filled up the cavity in his patient's head therewith, packed it with silver, dressed the wound, and in a short time he was well as ever, except that he showed a slight inclination to rot!

Books not weighing over half pounds shall be charged one cent an ounce for all distances under three thousand miles.

The Head Crop.—The Western (Mo.) Courier says that the new tooth brush has been supplied for the wash room attached to a strong iron chain, so that the public will always be accommodated in that respect.

Irving to the patient: For a wooden-legged man to have a wife given to him.

they occupied that country, I had relations, political and personal, with the Shawnees, which left a deep impression upon my mind; and whenever they are in any difficulty, I will remember them and their bravery and fidelity, and endeavor to be useful to them."

WORLD'S FAIR AT NEW YORK.—The New York Evening Post says, the following is a memorandum of objects lately received from Europe, as promised for the exhibition in the new Crystal Palace:

"About eighty packages, which arrived by the Hendrik Hudson, Ocean Queen, and Sir Robert Peel, from London, are warehoused in the United States government bonded store. They contain sundry goods that were in the London exhibition, including statuary, porcelain, paintings on porcelain, candelabra, musical instruments, etc. etc. From the Danish department,

statuary, porcelain, porcelain, paintings, etc. etc.

The celebrated colossal statue of the "Amazon" by Professor Kiss, of Berlin, has arrived in this city. The Turkish Ambassador has written to the agent, Mr. C. Buschek, of London, that the Sultan views this enterprise with much approbation;

"About eighty packages, which arrived by the American steamship, the 'Richard Cour de Lion,' is completed, and represented to be a most magnificent work of art. The French Government have promised to exhibit the collection of Gobelin Tapestry and Sevres Porcelain, even more complete than that shown in London. The Town Council of Liverpool, by Baron Morettoff, who took a council medal for his 'Richard Cour de Lion,' is completed, and

THE BULLETIN.

JOHN HENRY BROWN, EDITOR.

INDIANOLA, TEXAS.

THURSDAY, SEPTEMBER 23, 1852.

"Our journies along a tour of nearly four weeks through the upper country, including a visit to Victoria, Gonzales, Goliad, Lockhart, Bastrop, Webberville, Austin, San Marcos, Seguin, New Braunfels, San Antonio and Halleberry, arrived at home on Sunday, well satisfied with this first trip through our interior region."

SAN ANTONIO.—We invite especial attention to the advertisement in to-day's paper for the sale of corporation lands at the city of San Antonio. This is one of the most important and safe ever proposed in Texas, and we hope will invite many persons to that place. San Antonio looks farms around her, and no place in the State affords so good a market for local-stuffs and produce. The lands are immensely rich, and laid off into small tracts to accommodate purchasers.

New Book.—*Voyages to Various Ports of the World, from 1802 to 1811*, by George Croghan; New York; D. Appleton & Co. For a handsome copy of this truly interesting volume, we are under obligation to Mr. J. B. Stone, New Orleans, of whom it may be had. A series of sea voyages in the beginning of this century to the ports of Mexico, Central America, West Indies, and during the convulsions in Europe, to that country, embraces a period of peculiar interest in American history. The style of the author is plain, concise and candid, and the whole work abounds in a succession of interesting events, well told—the spirit of the noble, true-hearted sailor pervades every page. We have read it with pleasure, and derived much valuable information from it.

ARRIVAL OF THE JAMES L. DAY.—The steamship James L. Day, Capt. Wm. H. Talbot, arrived at our wharf, from New Orleans, on Monday morning, having left on the 16th, to which day her attentive clerk, Mr. W. W. Wakefield, brings us full file, for which we will receive our thanks.

The Day brought the following passengers our tormented, Dr. Joseph H. Baldwin, of the firm of Baldwin, Sparks & Co., and Mr. W. G. Randall, of Lavaca, returning from the North.

BUSINESS OF INDIANOLA.—We stated last week that the receipts of lumber at Indianola for the period of 28 days amounted to \$20,000,000, 200,000 shingles, and 573 piano logs. We have to add that the arrival of the schooner Medina on the day of our last publication, with 2000 feet, made a total receipt from August 1st to September 16th of six hundred and fifty thousand feet of lumber, making an aggregate in port for the month equal to more than eight hundred thousand feet. This we presume, is more than has been introduced into the entire bay in any previous month, and this alone should be considered at Indianola.

In reference to the amount of goods received and forwarded through Indianola's facilities, we have no accurate information, but feel confident that for the year previous to 1st September the amount sent here has been equivalent to 200,000 barrels, certainly not less than 175,000, exclusive of the heavy receipts on account of Government. The houses of S. A. White & Co., (as we are informed by Mr. Atwood, who conducted the business during his time,) received and forwarded between 62 and 70,000 barrels, estimating by the freight bill, an average of 68 cents per barrel. That household of receiving business, surely, and the factors engaged intend for our mercantile agents, Ringer & Cade, to whom we have received word for several large sums during the year, and save other houses did to some extent, and we are confident the great amount could not have been less than 200,000 barrels. He as it may, the increase in the business of the place, for the time since, is unparalleled within our knowledge in this country.

But when we look upon the noble crops of cotton, corn, etc., of 1852, and the enormous emigration, confidently expected during the next eight months, we may well expect our business to advance in a greatly increased ratio. Notwithstanding the astonishing growths of this town during the year, we have reason to believe that a large number of emigrants of the poorer classes will have many accommodations, as they are unable to go to the hotels, and the number of cheap respectable eating-houses is not sufficient. Still, the arrangements are much better than they have ever been before.

THE STORMS.—We are informed that our energetic steamer, Allen, has been re-stocking his line of tri-weekly stages from Indianola to San Antonio, building additional stages, etc., and has but prepared himself to render every possible accommodation to travellers during the season. We trust he may be well enabled, as no man in Western Texas has done so much to facilitate comfortable, easy and quick travelling as him. In this we wish not to detract from the claims or merit of Calmar's or any other line; but simply to award Allen a just and well deserved praise for enabling us and successfully keeping up a tri-weekly line of superior nine-passenger coaches.

Salisbury's line continues as usual a regular weekly line, and is, as well known, the best coaches.

THE DISTRICT COURT.

The District Court, of Calhoun County met in Indianola on last Monday, and will sit this week and next. Present: Hon. Fielding Jones, Judge; J. H. Davis, Clerk; Willis Chamberlain, Sheriff; E. D. Martin, Bailiff. Attorneys present: Col. A. S. Cunningham, A. H. Phillips, Wm. S. Glass, Isaac N. de Chas, J. Mitchell, James W. Allen, George W. Palmer, John H. Stewart, of Victoria; J. J. Holt, Thomas N. Haynes, of Texana; Wm. P. de Norman, of Austin; John W. Harris, of Brazos; F. W. Chandler, of La Grange; Wm. Irvin, Chas. A. Harper, James T. Lytle, of Stockdale; John Henry Brown, Wm. H. Woodward, W. J. Howerton, Wesley Odgen, J. C. Cleland, S. A. White, and John F. Wener, of this county; Gen. Thomas J. Chambers, of Liberty, expected. Several of these are not regular members of this Bar.

The Grand Jury were engrossed as follows:

William B. Miller, Foreman; Chambers, Etter, John F. Segni, Jonas Randall, James Howerton, J. J. Ryan, J. T. Yarington, Beau. Hoyt, F. M. Rose, Geo. W. Murphy, Louis Ziegler, Henry Tudor, Wm. M. Cook, Jerry Smith, Jim, Daniel Elam, C. G. W. Underwood, Geo. W. Parks.

We meet below the Docket for the term:

DISTRICT COURT CALHOUN CO.

SEPTEMBER TERM, 1852.

DOCKET.

1. D. F. King et al. vs. S. A. White; McKinney for plf. White for dfl.

2. W. W. Pope et al. vs. John S. Harrison; McCulloch & Clemons for plf. Irvin for dfl.

3. W. W. Robinson et al. vs. Wm. B. McKinley; Phillips for dfl.

4. A. C. Hyde et al. Wm. Cook, et al.; Cummings for plf. Lytle & Howerton for dfls.

5. Thomas Hayes, et al. Hanlis Ferguson; Hayes for plf. Phillips for dfl.

6. T. J. Chambers, et al. Somerville, et al.; Littleton for plf. Denison, Rose & Phillips for dfls.

7. James T. Lytle, et al. Palmer & Glass; Denison, Glass & Irvin for plf. Hayes, Hilt & Howerton for dfls.

8. The State of Texas, et al. Dan. Elam; Glass for plf.

9. The State of Texas, et al. J. W. Rose; Glass for plf.

10. James Donson, executor of W. G. Ewing deceased, et al. T. R. Threlkeld, admr. of W. H. Wills, deceased; Donson & Lytle for dfls.

11. Francis Denison, et al. Jas. A. Prati and Geo. M. Forbes; Irvin for plf. Lester for dfls.

12. A. B. Moore, et al. R. B. Moore; Lytle for plf. Phillips for dfls.

13. F. W. Chandler, et al. Fulton & Hemley; Irvin for plf. Phillips for dfls.

14. The State of Texas, et al. Dan. Elam; Glass for plf.

15. N. S. Hill, et al. Wm. H. Kent; Lytle for plf. Irvin for dfls.

16. John W. Rose, et al. J. A. Pratt & wife; Lytle for plf. Irvin for dfls.

17. James Denison, executor of W. G. Ewing deceased, et al. John Bowen, admr. of S. G. Pease, co-dec'd; Lytle & Denison for plf.

18. Matthew Woods, et al. Julius A. Pratt and Geo. M. Forbes; Irvin for plf. Lester for dfls.

19. The State of Texas, et al. Dan. Elam; Glass for plf.

20. N. S. Hill, et al. Wm. H. Kent; Lytle for plf. Irvin for dfls.

21. John W. Rose, et al. J. A. Pratt & wife; Lytle for plf. Irvin for dfls.

22. James Denison, executor of W. G. Ewing deceased, et al. John Bowen, admr. of S. G. Pease, co-dec'd; Lytle & Denison for plf.

23. Matthew Woods, et al. Julius A. Pratt and Geo. M. Forbes; Irvin for plf. Lester for dfls.

24. Thomas Harrison, et al. Henry Place; Irvin for plf.

25. Alonso Denlow, et al. Heines; Irvin for plf.

26. J. H. Brown, et al. A. Keller.

27. John Ayres, et al. Alonso Denlow & R. M. Forbes; Irvin & Lytle for plf.

28. W. L. Sawyer, et al. Fulton & Hemley; Irvin for plf. Hayes for dfls.

29. W. M. Varnie, et al. Jacob Robertson & Geo. W. Adams; Irvin for plf.

30. Fulton & Hemley, et al. S. T. Lyons; Ogden for plf.

31. W. M. Crammer, et al. James H. Brown; Brown & Harper for plf.

32. Geo. Park, et al. Thomas Harrison; Brown & Harper for plf.

33. W. M. Varnie, et al. Jacob Robertson & Geo. W. Adams; Irvin for plf.

34. Fulton & Hemley, et al. S. T. Lyons; Ogden for plf.

35. W. M. Crammer, et al. James H. Brown; Brown & Harper for plf.

36. W. M. Crammer, et al. James H. Brown; Brown & Harper for plf.

37. W. M. Crammer, et al. James H. Brown; Brown & Harper for plf.

38. W. M. Crammer, et al. James H. Brown; Brown & Harper for plf.

39. W. M. Crammer, et al. James H. Brown; Brown & Harper for plf.

40. W. M. Crammer, et al. James H. Brown; Brown & Harper for plf.

41. James W. Jenkins, et al. Wm. B. Harman; Glass & Irvin for plf.

42. Fulton & Stanley, et al. W. B. Harman; Phillips & Stockdale for plf.

43. The State of Texas, et al. A. B. Shellenbacker; Phillips & Stockdale for dfls.

FATE OF COL. JAMES FREANER.—A letter from Shreve, dated the 6th ult., to a San Francisco paper, has the following information in relation to Col. Freaner, formerly connected with the New Orleans press, whose death was rumored by the previous California mail:

News has just been brought from Yreka, which confirms almost to a certainty the report of the death of Col. J. L. Freaner. The last account is this: A man brought a mule into the town of Yreka, and many of the citizens of the place recognized the animal as one of the number that belonged to the Colonel when he started on his route to this place. The man who had the mule reported that he got it from an Indian whilst he was in the mountains near Yreka. An Indian woman who came into the town about the same time, reported that she had just escaped from some wild Indians, who took her prisoner a short time before. She further stated that the Indians from whom she fled had killed four white men lately, and that she saw their guns in the Indian camp.

The few additional election returns given by our exchanges scarcely vary the figures given in the table last published.—The Austin Gazette of the 4th inst., gives only the results from 54 counties, and we believe there are some 40 or 50 more counties to come in. The vote from these 54 counties the Attorney General is as follows: Jennings, 1,557; Sayle, 6,521; Hamilton, 4,574.

ARRIVAL AT THE HOTELS.
Freeman's Hotel, Wm. V. Vassell, Proprietor.
F. & R. Rockwell, C. A. Porter, H. M. Hom,
J. W. Allard, J. Mitchell, G. W. Palmer, J. D. Logan,

L. O. O. F.
WESTERN TEXAS LODGE NO. 28, L.O.O.F.
meets at their Hall over Jacob Mass' store,
Indiana, every Thursday evening.

MUSICAL ENTERTAINMENT.
Mr. & Mrs. CHURCHILL will give their
first Musical Entertainment, assisted by
Mr. Schuster, on Monday night next, Sept. 27.

CLOSER HOUSE,
VICTORIA, TEXAS.

THE public are respectfully informed that the well known and long established House is again open for the accommodation of Travellers and Browsers. The Proprietor has thoroughly repaired and renovated the house, and added additional rooms for the use of Friends and Ladies. His

TABLE.—will be supplied with all the necessities of life, and many of the luxuries as can be procured in the Victoria.

This house is conveniently attached to the House a good
SHALF AND HORSE LOT.—of suitable size, with a well of excellent water for the use of the stable. His stable is well stored with corn, fodder and hay, and will be faithfully attended by a good servant.

The proprietress feels thankful to the public for past favors, and trusts to strict attention and industry in his business to merit and receive a liberal share of public patronage.

He distinctly knows that his services are extremely
valuable.

STRAYED ON STOLEN.
J. F. Ferguson, a small, bay American
Horse, branded "J. F." on the left hip, has three
white feet and a star on the forehead. It is
so poorly fed that he goes towards San Antonio. A
liberal reward will be given for the delivery of this
horse, or any information of his whereabouts
thankfully received.

Wanted.
A JOURNEYMAN SADDLER, for whom
good wages will be given. Apply soon if
you want work.

JOHN WHITE.

Hallsville, Texas, Sept. 23, 1852.

[181:3]

Dr. J. C. Lawrence,
(NATIVE OF NEW ORLEANS).

HAVING located in Indiana offers his professional services to the citizens of this state. He has practiced for several years in the South, during which time he has had ample opportunities of becoming familiar with the diseases of the Southern states.

Office over T. D. Woodward's store.

AUCTIONEER

AND COLLECTOR OF ACCOUNTS.

W. H. CHAMBERLIN, (Sister of Calumon com-
mrs.) offers his services to the public as
Collector of accounts. All notes, bills, ac-
counts, etc., held by him for collection will be attended
to with care and energy, and returned made.

He solicits the patronage of the public as a
Broker of Auctioneers, and will give particular at-
tention to the sale of any consignments of goods
as other property with which he may be favored.

**Extensive Sale of
VALUABLE LANDS,
Belonging to the City of San Antonio.**

I X pursuant to a resolution of the City Council
passed on the 2d day of August, A. D. 1852,
will be offered for sale on the

Second Monday of November next.

A. D. 1852, it being the eighth day thereof, in
front of the City Hall, down in the city of San
Antonio.

15,000 FEET

of very superior and desirable land, situated on
both sides of the San Antonio river, running East
to the Salado, and West to the "Llano creek"—

the same lands recently recovered by the city of

San Antonio in the Supreme Court, and carefully

surveyed by a practical and experienced surveyor,

and laid off into varying from one to two
acres each, according to location and plans.

These lands enclose the springs, which are the
sources of the San Antonio and San Pedro creeks,

bordering the Rio Grande, San Antonio and San

Pedro rivers, and are not surpassed for desirable small

farms and residences in the Western country.

The liberal conditions upon which these farms are

offered will enable those of small means to

purchase homes, and to men of capital a good

investment.

The man who had the mule reported that he got it from an Indian whilst he was in the mountains near Yreka.

An Indian woman who came into the town about the same time, reported that she had just escaped from some wild Indians, who took her prisoner a short time before.

She further stated that the Indians from whom she fled had killed four white men lately,

and that she saw their guns in the Indian camp.

The few additional election returns given by our exchanges scarcely vary the figures given in the table last published.—The Austin Gazette of the 4th inst., gives only the results from 54 counties, and we believe there are some 40 or 50 more counties to come in. The vote from these 54 counties the Attorney General is as follows: Jennings, 1,557; Sayle, 6,521; Hamilton, 4,574.
