Mr. Stapley seems determined to step into the shoes of the man he wont to die cover, and he is doing his best to complete the work which Dr. Livingstone left aufluished on big death. The fluideout that attaches to equatorial exploration is somewhat remote, still its possibilities appear to be greater and mere in-mediate than anything which has been anggested by sawing through the ice around the North Pole, and Mr. Stanley has wudoubmilly shown good sense in purening the bubble reputation in warm latitudes. A different policy, entered into at the close of the war would have filled the Southern States with an intelligent body of men, whose influence by this time would have permeated every branch of society and produced astonishing results. In the decade which has passed since the war terminated, under an enlightened policy which welcomed the honest and industrious of all classes and climes, the South would by this time have gained a new population of a mil ion of men, who, seeking new homes in that sunny region, would have infused new life into the body polite, and dispensed blessings upon every side. A Duel Anticipated by a Street Collision.

NEW ORLHANS, December 26, 1874. This morning, at half-past cleven o'clock, while the north side of Canal street, beween Royal and Dauphlin, was crowded with passers-by of both sexes, a large, well dressed and fine looking man was seen to auddenly assault another of commanding presence with a heavy stick o caue. After delivering two or three vigproug blows the two closed in deadly am brace and fell to the ground, with the acsailant uppermost, A growd of people immediately surged around the combatants during the struggle on the pavement, which was brief, but long enough for the spectators to see the undermost plungs a alime of the gutter. This unfortunate affair had its origin to the mind and temper of an actual the intense political excitement which new pervades all classes of the community. It was precipitated by a published letter from Governor Warmoth, in which be severely critized an editorial paragraph in the Belletin advocating the re-establishment of the Star care for negroes upon NEW ORLEANS, Jan. 4 That Son. Major vigorous editorial in the Bulletis, reviving charges sgainst the ex-Governor, who an swered the same in a personal card, published in the Picayune.

No doubt the public would like to obtain what it requires at as cheap a rate as possible, and many times are induced to purchase the cheapent articles they can procure, everlooking the fact that although professedly the cheapent they are in reality the dearest in the end. Take Dr. Priers Gream Baking Powder and his True, Flavoring Extracts, and they may cost a few cents more than the common kinds yet they are the cheapest, for they require one-third less in quantity, and when used in cakes, pies, puddings, &c., make them splendid and also wholesome. "What & Knew," said the the great aurgeon Magendie. "Give me stubborn facts it cape not for theories." This is sound doctrine. Possibly a medical martinet might be able, in a plausible way, to show why Dn. Walker's Vinegar Bitters ought not to cure Indigestion, Headache, Nervousness, Liver Complaint, Muscular Diseases, and Missmatic Fevers; but as they do in every instance effect that object, his fine theory would be a waste of words. As Magendie said, the world demands facts, not speculative opinions. YOUNG LADIES & CHILDREN. TITHE MISSES WESCOTT of Charles-1 ton, S. The Austin State nce from Luling gives the following description of that thriving young town : Luling is so situated as to command the trade of three counties, Caldwell, Gonzales and Gusdalups. It is in Caldwell county, the south-western portion, about eighteen miles from Lockhart, the county seat, and and "My Uncle's Will" to-morrow night at about twenty-two miles from Seguin, the county seat of Guadalapa county, and eighteen miles from Gonzales, the county seat of Gouzales county. These three counties corner in about for miles of the place. It is situated about two miles of the place. It is aituated about two miles from the San Marcos river, a clear, running stream, but subject to overflow. Thus it is near enough to the river for water facilities; at the same time, it is not so near as to be unhealthy from malaria after overflows. It is situated on a beautiful prairie country; the climate is salub-rious and healthy, and the soil very fortile. The city is but six months old and now numbers about eight hundred inha-bitants. Last July there was but one honse, where now stands a city. How-ever, this rapid growth contains many

trancient adventurers who will mave or with the railroad, but they will only give place to others who will remain and buid up a dity of solidity. Like the terminus of all railroads, Luling now has its dividvantages. All classes, grades and nations of people have gathered here from all parts of thir State, and from Missouri and Kaneas, Of course some desperate char acters have floated over in this tile of immigration, but notwithstanding this, the catalogue of crime in Luling is not as black as that of many other terminus of railroads in this State. There has been but one murder committed in the city since its birth, and that victim was a Mexican. The famous Burdist's wells are

A Triumph of Chemistry.

A Triumph of Chemistry.

Among the numerous health giving discoveries of harmaceutical chemistry, none has achieved a more transcendent and lasting success than Hostotter's Stomach Bitters. Of course there is a reason for this. It would have been impossible to palm of, for nearly a quarter of a century, upon so shrewd a people as the Americans, a meritiess article, or have established by mers advertising such a reputation as the Bitters enjoy, if they did not possess a substantial title to public confidence. The truth of this statement is proved by the fact that bogus meetrums, so matter how extensively puffed, usually enjoy but a transient existence, are then discovered to be worthless, and discarded Hostetter's Bitters, on the contrary, after a career of twenty years, were never so popular as they are to-day. Foon after their appearance it become manifest that they possessed in a remarkable degree the power of tening and regulating the human system, and its day they rank as the standard restorative of the age.
