SUMMER!

**U. S. HIGHWAY 366 IS
ORDERED OILED NOW**

Authorization to oil highway 366 for five miles north from Roswell toward Clovis has been issued by the state highway commission, it was announced Friday by B. F. Kelly, of Roswell, district highway engineer.

Though the present plans call for oil from the end of the pavement on north Main street at Roswell to a point five and a half miles toward Clovis, it was intimated that the road would ultimately be oiled thru Clovis to the state line.

Highway 366 is considered one of the main thoroughfares between El Paso and the state line at Farwell, Texas. It passes through Alamogordo, Tularosa, Ruidoso, Picacho, Roswell, Elida, Portales and Clovis.

Rev. Emerson, of Kansas City, has received a call to the pastorate of the Christian church and with his wife who accompanied him here, has moved into one of the Ragsdale apartments on Main street.

**Getting Ready for
Another Crop**

Many farmers have started preparing their land for another crop. In making your plans for another year, don't overlook the fact that we have many items in Hardware that will save you money. We have an assortment of new Harness and a full line of Irrigating Implements. SEE US FIRST.

LOCALS

John Day of Queen, was an Artesia visitor Monday.

Mrs. Ben Wilson has been on the sick list the past week.

C. J. Buck and B. A. Anglin, of Avis were trading in town Monday.

Lewis Angel of Lakewood was transacting business in Artesia Saturday.

Superintendent and Mrs. C. R. Bernard of Lake Arthur were shopping in town Saturday.

Senator Julian of Tucumcari is spending several days in Artesia, attending to business matters.

Boyd Williams of Elk, stopped off for an over night visit in Artesia, Friday, while en route home from Roswell.

Wallace Merchant was in from his ranch near Capitan the first of the week, and spent some time attending to business matters.

Messrs. Tex Polk, Dave Runyan and Will Ballard were among the Artesia people attending the funeral of Nat Hines in Roswell Friday.

C. C. Stevens, district manger of the Phillips Petroleum Co., refined products, was here the first of the week looking after the interests of his company.

Mrs. J. M. Story and Mrs. Joe Hamann motored over to El Paso Saturday to see Mrs. Lewis Story, who is a patient at the Masonic hospital. They returned Sunday evening.

Herman Cole returned last Thursday to Montezuma College at Las Vegas after being at home a few days on account of illness. He returned to school with Rev. Fred Cole, pastor at Montezuma, who had been making a tour of the valley in a campaign in the interests of the college.

**FORMER PEGOS VALLEY
RESIDENT DIES AT
MONROVIA, CALIFORNIA**

Louis Ramuz, of Monrovia, California, a former resident of Carlsbad, died Sunday afternoon at five o'clock, according to a message received this morning by his son, Albert Ramuz, of this city. Mr. Ramuz lived in Carlsbad and operated a shoe shop here about fifteen years ago. He had been ill for only a few days, complications followed a severe cold. He was about 82 years of age. His wife died about six years ago.

Surviving him are the following sons: Albert, of Carlsbad; Phillip, of Dayton; William, of Arcadia, California; Paul, of Los Angeles, California; Vernie, of Prescott, Arizona; and daughters are: Mrs. Paul DeWitz, of Loving; Mrs. A. G. Fleming, of Monrovia, California and Mrs. H. A. Sanders, of Thermal, California. — Current Argus.

Loose-leaf Binders, Special Ruling and Stock Forms.—The Advocate.

AUTOS OF THE NATION TO TRAVEL ABOUT 156 BILLION MILES IN 1930

SANTA FE—The automobiles of America will travel approximately 156 billion miles during the coming year," according to an editorial in the February issue of the New Mexico Highway Journal. "This is an average of 6,000 miles per car. The total mileage Americans will travel in their motor cars in 1930 is equivalent to 2,000 trips to the planet Mars and back again.

The American people have greater freedom of movement than any other people on earth. The Chinese have least, as their transportation facilities are poorest. In all the countries of Europe, miles of travel per person are increasing rapidly, but the United States easily leads them all, in rate of increase.

The benefits of this freedom of movement are great, commercially and culturally. Being shackled to a narrow area has a tendency to de- velop narrowness of experience and outlook, or provincialism, as travel tends to develop broader experience and hence to break down a narrow provincial outlook on life. There is a tremendous social significance in the rapidly increasing number of car owners and the area traveled by the average motorist.

To states like New Mexico, offering the tourist a wealth of attractions, the opportunity to come into contact with different races and cultures, this increase in the use of automo- biles is of particular importance. Both the tourist and the resident are ben- efitting thereby."

INSIDE INFORMATION

Good lighting is necessary for good laundry work. Washing and ironing equipment should be placed so that light strikes it from the side. This is a point to consider in locat- ing stationary tubs or a built-in ironing board.

Eggs are good at any meal. For dinner many people prefer ham and fried eggs to the more elaborate foods. On one might take a sug- gestion from the prevailing social custom of serving scrambled eggs and sausages for a midnight colla- tion, and use this good combination for either supper or dinner. An omelet, or a souffle made with many eggs in combination with cheese or ground vegetables, meat, or fish, is another use for eggs as a main dish. A platter of hard cooked eggs in curry sauce is a pleasing variation from the usual flavors. The U. S. Department of Agriculture has pub- lished a leaflet containing recipes for a number of good egg dishes and desserts in which eggs predomi- nate.

WHITE SANDS MAY BE MADE A NATIONAL MONUMENT SOON

Congressmen from Texas and New Mexico have pledged aid to the Alamo- gordo Chamber of Commerce in their effort to have the White Sands designated as a national monument. The White Sands are 17 miles west of Alamo- gordo and covers an area 30 miles long by 9 miles wide.

Gas is the Most Economical Fuel if Used Economically

4 Ways to Economize With Gas 4

- 1st—Turn your stoves down after temperature of room has reached a point of comfort.
- 2nd—Do not burn gas in unoccupied rooms.
- 3rd—Do not leave stoves burning after you retire, as it is very dangerous as well as unhealthy to sleep in a heated room.
- 4th—See that your appliances are properly adjusted.

The management desires to sell all the Gas that is needed, but no more, as excessive Gas Bills make dissatisfied customers and we had much rather sell you your needs and have you satisfied, than to over sell you and have you dissatisfied.

Call our Service Man to adjust your appliances and demonstrate to you how to adjust them.

Pecos Valley Gas Company

ONE BAG FEEDS FIFTY CATTLE ONE DAY!

High Quality Cottonseed Cake
(Double Screened)

With its 43% protein will provide enough protein for fifty to one hundred cattle on winter range from a 100 lb bag each day. ALWAYS CONVENIENT—just throw a bag across your saddle and feed it where you want it. Entirely free from screenings, no waste in feeding. Made in three sizes—PEA CAKE, SMALL NUT CAKE AND NUT CAKE. Sacked in new printed bags.

Don't confuse with various sweet feeds which are considerably lower in protein and which cost considerable more money. Wire or telephone for prices f. o. b. mill or delivered to your station.

ONE MAN KILLED AND ANOTHER STABBED AT HOBBS FRIDAY NIGHT

Bennet Miller, who was instantly killed at Hobbs, Lea county oil town, probably mistook Irvin Killian for some other person, according to investigating officers.

From the best information obtainable Miller started using a knife on Killian as the two men passed in the dark in the heart of the town of Hobbs. Killian told officers following the tragedy that he had never had any trouble with Miller, and did not know any cause for the attack.

Killian shot Miller three times, two of the balls entered Miller's left side and another Miller's arm. Miller died instantly and Killian fell into the arms of Sheriff Sam Cain who was only two blocks away when the shooting started.

Investigating officers said there were no eye witnesses to the tragedy and that from every indication Miller thought he was attacking some other person when he started using his knife on Killian as the two men passed in the dark.

A coroner's jury returned a verdict that Miller came to his death at the hands of Killian, but gave no cause for the shooting.

Killian came to Hobbs from Borger, Texas and has been operating the Hobbs hotel. The dead man is a former ranchman and had been working as a carpenter in the oil field.

District Attorney J. G. Osburn announced that his office was making a thorough investigation of the matter and so far no formal charges had been filed. Osburn said he had requested that a guard be placed over Killian in the Lubbock hospital.

Late reports from Killian who was taken to a Lubbock hospital, were to the effect that his condition was very serious.—Roswell Record.

HOLLOMAN MAY BE CANDIDATE

Judge Reed Holloman in an address at the good roads booster banquet held at Farmington Saturday definitely indicated that he would be a candidate for governor next fall.

During his talk Judge Holloman told those present at the dinner that he had some very definite plans he would carry out should he be elected governor.

Judge Holloman made the principal address and stressed the fact that development of the great oil fields, gas reservoirs, coal beds and agricultural acreage had been delayed because of lack of transportation, and that the rest of the state is materially interested in having this development come about as soon as possible because of the revenue development of San Juan country would mean.

NEW CLEANING PLANT

Jay-Walker and Co., of Roswell, consisting of Jay Ford Jacobson and two partners have rented the Bullock banquet hall and will install a cleaning and pressing establishment, it was said here this morning.

AUTO ACCIDENTS IN STATE CAUSED SEVEN DEATHS IN JANUARY

SANTA FE—Automobile accidents caused seven deaths in New Mexico during January, according to statistics compiled by the state highway department. Eight other persons were injured, some of them seriously.

The cause of 60 per cent of the accidents during the month was reckless, incompetence in driving, speeding and intoxication. Defects in the vehicles were responsible for 26 per cent of the trouble. One accident took place in a snowstorm and one was caused by too strong headlights. Eighty per cent of the accidents occurred upon good surfaced highways, while 86 per cent were on curves or tangents.

Three autos were wrecked and nine others were badly damaged.

There were 101 persons killed in automobile accidents in New Mexico during 1929, which was an increase of nearly 50 per cent over 1928. This is a larger increase than in most other states. In only a few states was there a decrease in fatal automobile accidents.

NEW MEXICO HAS LEGION QUOTA

SANTA FE—New Mexico is the third state in the country to attain its quota in the American Legion's membership drive. Eloy D. Trujillo, state adjutant, Tuesday was notified by national headquarters. The only states under the wire ahead of it were Arkansas and North Carolina.

New Mexico's 1930 quota was 2,535, an increase of approximately 10 per cent over its 1929 roster.

ONE THIMBLEFUL-A DAY'S FEED FOR ONE CHICK!

THINK OF IT! One tiny thimbleful... all the feed a chick can put in its little crop in one day. On this tiny bit it must live... grow... build bones... build muscles... start feathers. Think of the job feed has to do!

They must depend on feed for so many things! They get them all in Purina Chick Startena (mash) or Purina All-Mash Startena Chow... 12 different ingredients in every thimbleful. Cod-liver oil... dried buttermilk... alfalfa flour... granulated meat... these and eight others are there!

These 12 ingredients... think how carefully they must be mixed to make every thimbleful alike. Purina Startena and All-Mash Startena Chow are mixed over and over again... 960 times just to be thorough! You will find the same care taken with Baby Chick Chow (scratch)... to be fed with Startena until your chicks are six weeks old... and with Purina Growena (mash) and Purina Intermediate Hen Chow (scratch)... to be fed from then on until the pullets are laying at 16 weeks.

How little feed a chick eats... just one thimbleful a day... yet how important it is... how much depends on it... the chick's very life... its growth... what the pullets will do for you next fall and winter when eggs are sure to be worth good money. You can afford to feed only the best... Purina Poultry Chows.

MOTORISTS PAID GAS SALES TAX IN SUM OF \$449,731,000 IN 1929

NEW YORK, N. Y.—Motorists of the United States paid a total gasoline tax bill of \$449,731,000 in 1929, an increase of \$144,537,000, or about 47 per cent, over the \$305,233,824 total of 1928. It is estimated by the American Petroleum Institute. This represents an increase in the tax per vehicle to \$17.04 from the average of \$12.45 collected in 1928.

The total is based on official reports actual gross collections in 35 states and the District of Columbia and estimated gross collections for recent months in 13 states. Early last year the institute predicted the 1929 tax would be approximately \$450,000,000.

California again leads the states in collections with \$37,599,713, an increase of more than \$5,000,000. Ohio is second with an estimated total of \$36,000,000, a gain of approximately \$10,000,000. Pennsylvania is third with \$35,038,619 but shows the largest single gain for the year \$13,140,555. Wide increases, some nearly 100 per cent, are shown in Kansas, Georgia, Louisiana, Montana, Nebraska, Oklahoma, Tennessee, Texas and Washington. There were no decreases.

The 1929 collections lifted the nation's gasoline tax bill to a new high for all time. It is about 96 times that of 1921, 35 times that of 1922 and 12 times that of 1923, and brings the increase of the states from this source to more than \$1,200,000 a day.

In most states the funds are used for road highway construction and maintenance, although in several they are diverted to schools, state expenses and departments and other purposes. In each state the tax is collected by the oil companies and represents a guaranteed source of income to the state, the companies being held responsible, either under bond, liability of fine or imprisonment, or both.

All states now impose a gasoline tax, the rate ranging from two to six cents per gallon of gasoline, or 18 to 33 per cent of the retail price of the commodity. This is believed to be the largest direct sales tax imposed on any commodity.

FARM BOARD COMMENDS OUTLOOK TO FARMERS

The federal farm board warmly commends to American farmers the outlook service provided by the federal department of agriculture and the agricultural extension service in the various states.

Improved farm income requires planned production and effective marketing. In any one year, wise production planning must precede effective marketing. In spite of all that nature does, a large responsibility for farm out-turn rests with the farmers themselves. The surest way to control an oppressive surplus is to prevent it. No marketing machinery can insure good prices and satisfactory income if the farmer plants and breeds unwisely. The day is past when farmers can safely plan on the basis of current year's prices or on guesses about the future. The planting and breeding operations should rest on the best possible size-up of the market outlook at home and abroad for a year or more to come.

Such an appraisal is given in the outlook report just released by the department of agriculture. It deals with prospects for domestic and foreign demand, both in general and for individual crops and livestock products. It is not a prophecy and will probably not be 100 per cent correct. It does not tell each farmer what to do, but it furnishes information that no farmer can get by himself and that each farmer ought to take into account in planning his own operations.

The federal farm board heartily commends this service to farmers of the country and believes that it will contribute largely to increasingly intelligent farming operation and toward larger farm incomes.

Outlook meetings are being held in nearly every county in New Mexico in order to help farmers plan their 1930 production to meet the best market demand.

REMEDIES FOR BREEDING TROUBLES IN CATTLE FOUND INEFFECTIVE

Contagious abortion is becoming one of the major problems of the livestock industry of the United States, not only from the standpoint of losses of animals, but also because of its relation to undulant fever in humans, says W. L. Black, extension animal husbandman, of the New Mexico State Agricultural College. Many manufacturers of biologics are advertising and selling living organism vaccines, making the statement that these vaccines are non-virulent and will not produce disease.

In order that ranchmen may become familiar with the exact status of these products, it is thought advisable to quote some of the findings of the various leading research agencies in an effort to determine whether or not these vaccines were as reported.

The Michigan State College conducted an experiment to determine whether or not these vaccines are actually live organisms and if so whether or not they are virulent. A similar dose of vaccine was purchased from each of nine of the leading biological houses. The summary of the experiment gives the following results: of the nine vaccines tested, three were non-living, although tested before the expiration date stamped on the labels. The fourth contained a very few living organisms. The virulence test with two of these four indicated that they contained a few virulent organisms. The five remaining vaccines were living. Two of these attenuated but not non-virulent. One of these two possessed the property of becoming highly virulent when placed under favorable conditions. The other three showed more virulence than many recently isolated strains obtained from

animals that had aborted.

The state livestock sanitary department of Alabama very recently has adopted a regulation which became effective February 1, 1930, prohibiting the use of infectious abortion vaccines in all cases in Alabama except when the state veterinarian shall issue a specific written permit.

In view of the above findings the logical method of handling this condition is through isolation of infected animals and steps to forestall the introduction of infections into the herds rather than an attempt to control the disease through vaccination, as it can be readily seen that the scientists and state regulatory agencies consider vaccination not only inefficient, but actually a possible menace to human and animal life.

LOOSE LEAF DEVICES AT THE ADVOCATE

THREE IMPORTANT FACTORS ENTER INTO THE COST OF YOUR AUTOMOBILE

1. How much it costs to make the car
2. How much extra you pay the dealer
3. How much it costs for operation and up-keep

THE PURCHASE of an automobile involves a considerable amount of money and it should be carefully considered from all angles before a final decision is made.

The value of the car to you depends on the value built into it at the factory, how much extra you pay the dealer for distribution, selling, financing and accessories and what it will cost to operate and maintain the car after purchase. Each of these factors, as it relates to the Ford car, is frankly explained below.

Economy in production

THE FORD CAR is made economically because of the efficiency of Ford production methods. The money saved through this efficiency is put back into the car in improved quality of material and in greater care and accuracy in manufacturing. The constant effort is to eliminate waste and find ways to make each part better and better without increasing cost—frequently at lowered cost.

Because of Ford economies in large production and because the Ford organization operates on a low-profit margin, the price you pay for the car is much less than it would be under any other conditions. Yet it brings you many unusual features of construction and performance.

At least \$75 extra value is represented alone by the Triplex shatter-proof glass windshield, the Rustless Steel, the four Houdaille double-acting hydraulic shock absorbers, and the five steel-spoke wheels. The unusually large number of ball and

roller bearings and the extensive use of fine steel forgings instead of castings or stampings are additional features that reflect the high quality built into every part of the car. Throughout, it is a value far above the price you pay.

Low dealer charges

THE SAME PRINCIPLES of efficiency and economy that characterize the manufacture of the Ford car are applied also to distribution. Obviously it would do the public little good to save in production if these savings were sacrificed later in excessive costs of selling, financing and accessories.

The Ford dealer, therefore, operates on the same low-profit margin as the Ford Motor Company, his discount or commission being the lowest of any automobile dealer. He does a good business because he makes a small profit on many sales instead of a large profit on fewer sales.

NOTE THESE LOW PRICES

Roadster . . .	\$435
Phaeton . . .	\$440
Coupe . . .	\$500
Two-window Fordor Sedan . . .	\$600
Three-window Fordor Sedan . . .	\$625
Convertible Cabriolet	\$645
Town Sedan	\$670

(All prices f. o. b. Detroit)

The lower cost of selling, combined with the low charges for financing and accessories, means a direct saving of at least \$50 to \$75 to every purchaser of a Ford, in addition to the savings made possible by economies in manufacturing. The money you pay for a Ford goes into value in the car. It is not wasted in high dealer charges.

Low up-keep costs

IT IS IMPORTANT to remember that the cost of your automobile is not the first cost only, but the total cost after months and years of service. Here again there is a decided saving when you buy a Ford.

The cost of operation and up-keep is lower because of simplicity of design, the high quality of material, and the reduction of friction and wear through unusual accuracy in manufacturing and assembling. The reliability and longer life of the car contribute to its low depreciation per year of use.

The intelligent, painstaking service rendered by Ford dealers is under close factory supervision and is a factor in the low up-keep cost of the Ford. All labor is billed at a flat rate and replacement parts are always available at low prices through Ford dealers in every section of the United States.

In two, three or five years, depending on how much you drive, the saving in operating and maintaining a new Ford will amount to even more than the saving on the first cost of the car.

The Cottonwood schools gave a program last Friday at Lower Cottonwood, celebrating Washington's birthday. A picnic lunch was served by the parents. In the afternoon two ball games were played, the Upper Cottonwood boys and girls were winners in both games. Among those who attended besides the parents were: Mrs. J. M. Dillard, county superintendent, Mrs. Frances G. Donley and Dr. O. E. Puckett of Carlsbad.

TYPEWRITERS

New Woodstocks and Coronas, Re-builds in all other makes at The Advocate.

the age at which one may begin saving and the amount necessary to be saved each year until one reaches the age of sixty-five in order to have an income of \$1,200 a year thereafter: Twenty-five—\$315.70; at thirty—\$407.32; thirty-five—\$534.90; forty—\$720.36; forty-five—\$1,007.16; fifty—\$1,498.24; fifty-five—\$2,498.72; and sixty—\$5,538.82.

These estimates are based on savings being deposited in a bank or invested at 4% compounded annually. It is more than likely that during at least a number of years the average man could increase his savings above the schedule here referred to. It is also possible to get better than 4%. This would mean either that one would not have to wait until sixty-five before retiring or that one would have a larger income than \$100 a month after reaching that period in life.

There is indeed no surer way or better way of providing for a comfortable old age than through some such a plan as has been here briefly outlined.

Calling Cards, 100 for \$1.75, on best grade paneled or plain stock.—The Advocate.

CHEVROLET MOTOR CO. INCORPORATES MANY SAFETY FEATURES 1930

Evidence of the manner in which the automobile manufacturer is furthering the cause of safety by eliminating the hazard of mechanical mishaps is shown by the many safety features incorporated in the new 1930 Chevrolet.

Notable among the safety devices in the car are the Chevrolet-designed internal brakes which are new in their field. Many a motorist has had the unnerving experience of descending a long mountain grade to find his brakes becoming less effective the farther he descends—a failure known technically as "fadeout" and due to heat generated between the brake shoe and drum which warps the shoe and lessens the contact of the brake lining with the drum. The hotter the brakes got, the less effective they became.

Tests on the General Motors proving ground show that fadeout has been eliminated in the new Chevro-

let brake by a method of construction known as the "articulated shoe type," which compensates for heat distortion, and assures uniform braking facilities under all conditions of temperature. The wear on the brake lining also is uniform, and assures far greater service out of a set of linings than the old type brakes.

Test Chevrolets on the proving grounds have obtained as high as 28,000 miles on a set of linings. It is pointed out that the average motorist will obtain considerable greater mileage in view of the severe driving to which test cars are put. Further tests show the brake will stop a car traveling thirty miles per hour in two and two-tenths seconds within a distance of 48 feet.

The brakes are internal expanding all round, operating with equal efficiency on all four wheels. The parking brake is separate and operates on the rear drum. Adjustments are easily accessible without the removal of any plates.

Another safety feature of the new Chevrolet is the non-glare windshield on the new Fisher bodies. By the simple expedient of tilting the windshield slightly inward, instead of mounting it vertically, the reflected light of an approaching or following headlamp is deflected downward away

from the driver's eyes. The twin-beam headlights, which enable the driver to throw the light on the road out of the eyes of an approaching driver, are a further Chevrolet contribution to the greater safety of the highways.

A few of Frank Crane's Greatest Things:

- The greatest mistake—giving up.
- The most expensive indulgence—hate.
- The worst bankrupt—the soul that has lost its enthusiasm.
- The cleverest man—one who always does what he thinks is right.
- The greatest need—common sense.
- The best gift—forgiveness.

EARLY VEGETABLES

Now that the spring is here, we are looking forward to more of the green foods and crisp, fresh vegetables from our gardens; these will take the place to some extent of the fresh fruits such as oranges and grapefruit which have been plentiful during the winter.

There are always apples, late into the spring, and such dried fruits as prunes, apricots, dates, figs and raisins which may be added to the menu occasionally.

Fresh rhubarb is excellent for a spring fruit as well as a tonic. Use it freely as soon as the first shoots appear.

Apricot Shortcake.—Soak half a pound of dried apricots in water to cover and cook in a double boiler till tender. If the fruit is large cut into pieces. Make six slices of very soft French toast, using a pint of milk, an egg and a pinch of salt. Brown the slices delicately on both sides, in butter. Put together in sandwich of shortcake style with the stewed fruit.

Corn Puffs.—Put one can of corn through the meat chopper—or better use the cream of the kernels. To one pint add the beaten yolks of two eggs, one cupful of cracker crumbs, one tablespoonful of melted butter, one teaspoonful of salt, a dash of sugar, and finally the well-beaten whites of the eggs. Add one-fourth cupful of rich milk, unless the corn is very moist. Bake by spoonfuls on a well greased griddle.

Chicken Scramble.—To one solid cupful of chopped chicken from a stew or roast add one cupful of rich chicken stock made by simmering the bones in enough water to cover. Add a little chopped onion, such seasonings as are needed, and four tablespoonfuls of corn meal, adding any left over gravy and bits of stuffing. Cook well, pour into mold and when cold cut into slices and fry; serve hot.

FIGHT SPEEDED UP ON OIL TARIFF

TULSA, Oklahoma. — News that the senate finance committee will take up the free list Friday or Saturday has caused the Midcontinent oil tariff organization to speed up its plans for supporting the tariff campaign at Washington.

The Texas, Oklahoma, California, Illinois and Ohio divisions of the Independent Petroleum Association of America are organized and funds have been raised for the fight thru memberships.

Governor W. J. Holloway of Oklahoma left Tuesday for Washington to join Wirt Franklin, president of the I. P. A. A. in the fight before congress.

THINGS THAT NEVER HAPPEN

Copyright, Inter-nat'l Cartoon Co., N. Y. Gene Byrnes

LEGALITY OF BILLION DOLLAR OIL MERGER CO. BE TESTED IN COURT

WASHINGTON, D. C.—The legality of the proposed billion and a half dollar merger of the Standard Oil Company of New York and the Vacuum Oil Company will be tested in the courts by the department of justice before it is completed.

The department announced recently that judicial proceedings would be inaugurated within ten days in St. Louis courts, to test the validity of the merger. This action will be taken because attorneys of the government disagree with the contention of counsel for the corporations that there can be no question of the legality of the action after studying the plans, department officials said they felt that they should be passed upon by the court.

Counsel for the companies, in submitting their plans to the government, argued that the proposed merger did not violate any of the sections of the Sherman anti-trust law and did not conflict with the decree of 1912 dissolving the Standard Oil Company of New Jersey, of which the two corporations were subsidiaries.

The corporations had been informed of the intention of the government to file action in equity to test the validity of their proposal.

KENT TEACHER EMPLOYED BY THE GOVERNMENT

The following item taken from the Kent Courier Tribune of Kent, Ohio, concerning Miss Bertha Lively will be of interest to her friends here. Miss Lively is a sister of John Lively of Artesia.

Miss Bertha A. Lively, well known in college circles here, has been appointed by the U. S. Civil Service Commission as District Supervisor for the first six grades of the Government Indian schools of the United States. Her entrance salary is \$3,200 a year with all traveling expenses paid in addition. The work lies largely west of the Mississippi. She will assume her duties on February 15, with headquarters at Gallup, N. M.

Miss Lively is a graduate of the Ohio State University with a masters' degree. She was for some years director of the county normal school at Monroeville. She then became fifth grade critic teacher in the training school of Kent State College. Later she was given charge of the Mahoning county normal school. Her work in all these positions has marked her as an outstanding teacher in Ohio. She will make a large contribution to the Indian school service.—Kent Courier-Tribune.

TALK ON ALASKA

Rev. Nickerson, Presbyterian missionary to St. Lawrence Island off the coast of Alaska, talked to the high school pupils in assembly last Friday, giving a wonderfully interesting and instructive lecture. He talked upon the country of Alaska and the life of the Eskimos and he exhibited the curious costumes of the people. He also visited the Central school and exhibited the costumes and talked to the children.

Notice to Bank Depositors

The payment of overdrafts by banks is considered a misapplication of funds by the United States Supreme Court. The following is a ruling that body:

"A usage to allow customers to overdraw, and to have their checks and notes charged up, without present funds in the bank, is a usage and practice to misapply the funds of the banks."

The following is a ruling of the Comptroller of the Currency:

"The granting by some banks of accommodation in the form of overdrafts is objectionable and cannot be countenanced by this office."

Considerable expense is involved in handling items which are returned unpaid on account of insufficient funds and both the New Mexico Bankers Association and the American Bankers Association have recommended for some time that the Banks make a charge to defray the extra expense. Practically all banks now make such a charge.

The Banks of Artesia have adopted the recommendations of the Bankers Associations and on and after March 1, 1930, a charge of two and five cents will be made against the account of the maker, for each item returned on account of insufficient funds.

F. E. NICHOLSON PARTY ARE NOW EXPLORING CARLSBAD CAVERNS

Frank Ernest Nicholson reached Carlsbad Cavern shortly after noon Friday following his long trek across the United States from New York. The entire expedition have moved their equipment and established permanent quarters at the cave entrance for the next three weeks that the party plan to stay there for their exploring activities.

Eric Palmer, youthful radio operator will put up a small, low wave broadcasting station at the cave entrance which will be used for broadcasting progress of the party by remote control from all parts of the cavern.

Nicholson has not yet announced definite plans for the exploring programs for the coming weeks and doubtless will not be able to for several days until he has spent some time in the cavern in order to get his bearings.

Everything was in readiness as the park officials had anticipated their arrival some days ago and exploration work will now move forward rapidly.

Collapsible boats, Nicholson said, will be used on the large underground lake, discovered recently by Supt. Boles and government rangers at a depth of 1220 feet under the surface.

The party consists of Mr. Nicholson, Eric Palmer, radio operator; Douglas Oliver, of Atlanta Georgia, Boy Scout, who accompanied Mr. and Mrs. Martin Johnson on their African explorations; Mally W. de Villareal, secretary to Mr. Nicholson; Tom Davis, Captain Robert L. Mount, and E. J. Roberts, all of New York; Geron L. Mendenhaul, Wichita Falls; Howard Grabb, Ft. Worth; T. W. Mendenhaul and Mrs. Mendenhaul of Wichita Falls, Mrs. M. Eastwood and daughter, and Floyd Ard, Wichita Falls and Ernest Vilareal, Staten Island.

Practically all of the equipment was brought to Carlsbad on motor vans from New York. The equipment includes radio broadcasting sets, collapsible boats and a small balloon for exploring in the cavern.

They will broadcast by remote control dispatches of progress continually from all parts of the cavern.

LONG ILLNESS SOON ENDED NEW KONJOLA

Medicine Bring Quick and Complete Relief After Prolonged and Stubborn Illness.

"After taking other medicines and treatments for five years, Konjola soon relieved me," said Mrs. Amelia Schafener, 2721 Indiana Avenue, St. Louis. "Stomach and liver weakness had brought my health to a state where I was about to give up. A gas formed after I ate the simplest of foods and I bloated until I was short of breath and sometimes nauseated. My liver was sluggish and I had frequent bilious attacks and terrible dizzy spells.

MRS. AMELIA SCHAFENER
"I soon found that Konjola was the medicine for which I had long sought. My liver responded to this medicine almost from the first bottle. The sluggish feeling left me and I was free from bilious attacks and dizzy spells. Headaches are a thing of the past. My stomach is well and strong and I eat all that a good appetite desires without the least inconvenience of discomfort. My general health is better than it has been in years."
Konjola is sold in Artesia at the Palace drug store, and by all the best druggists in all towns throughout this entire section.

Yearling hens are better than pullets for breeders, as the former usually lay large eggs which hatch into larger and stronger chicks than those of pullets.

The percentage of protein contained in a commercial concentrate is one good measure of its value, since most farm-grown feeds have an excess of fat and carbohydrates and a shortage of protein.

Ringworm of cattle is common during winter and spring and should be treated if found. Scrape off the crusts of the patches of the skin and wash with soap and water. Then apply tincture of iodine once a day. Carefully whitewash and disinfect the barns, as this disease is contagious and easily transmitted from one animal to another.

Good sanitation in the poultry flock increases the number of fertile eggs produced during the breeding season. The fowls should be fed liberally on wholesome feed and should be kept in houses that are dry and well ventilated. It is especially important not to overcrowd the houses and to keep the litter clean and dry in the breeding season.

"Shall I go into dairy farming?" is a question many persons are asking themselves nowadays. "Dairy Farming for Beginners," is a recent publication of the U. S. Department of Agriculture, and discusses the pros and cons of this question. This publication can be obtained by writing to the Department of Agriculture, Washington, D. C., for farmers' bulletin 1610-F.

Hogs treated simultaneously with virus and serum for hog cholera need special care for at least two weeks after inoculation. Restrict the grain ration to not more than two-thirds of the usual quantity for this period. It is not advisable to feed corn. Shorts, middlings, bran, ground or soaked oats, crushed rye, barley, kafir, tankage, skim milk, and buttermilk are suitable feeds. At the end of two weeks, if the hogs are doing well, their diet may include some corn and this may be increased gradually to full feed. A plentiful supply of clean drinking water should be accessible at all times. If necessary to keep the hogs confined, the pens should be light, airy, dry, clean and well bedded. Feed troughs should be kept clean, preferably by scrubbing and scalding with hot water.

Loose-leaf Binders, Special Ruling and Stock Forms.—The Advocate.

CARBON TROUBLES ARE ELIMINATED IN THE NEW CHRYSLERS

Chrysler engineers have practically eliminated the carbon bogey by a unique decarbonizer on the Imperial, "77" and "70" models. By merely pulling a plunger underneath the dash owners are assured, after many miles of driving, the same efficient performance that an engine develops when the new car is delivered.

After extensive research in conjunction with leading chemists, Chrysler engineers have adopted "Carbo-solve," a fluid which dissolves the carbon effectively, and allowing it to be blown out the exhaust.

To provide for the convenient and periodic use of "Carbo-solve," the decarbonizer equipment has been installed under the hood on the right hand side of the body dash. This fixture, holding six ounces of the "Carbo-solve" fluid, is connected to the inlet manifold and controlled by a plunger from the driver's compartment.

When the plunger is pulled out with the engine running at a fair speed at normal driving temperature, the "Carbo-solve" is drawn into the engine, thoroughly saturating the combustion chambers. After this injection of "Carbo-solve," the engine is stopped and allowed to stand several hours, permitting the carbon to be thoroughly dissolved. When the engine is again started, the loosened carbon particles and other foreign matter are blown out the

exhaust.

"In years of experiment with the carbon problem, the aim of engineers has been to keep an engine clean and efficient throughout the long life of the car," said Clyde Guy local Chrysler distributor. "The principal and advantages of "Carbo-solve" are easily grasped. Its operation is simple and inexpensive. Properly used, it is positive and in no way injurious to the engine. Facilities are available at any Chrysler service station for the installation of decarbonizer equipment on any Chrysler car."

MAN HELD IN CHAVES JAIL IDENTIFIED AS COLORADO BANK ROBBER

Wilbur Eslick, 22, who has served three terms in the New Mexico penitentiary and is now held in jail at Roswell on a robbery charge, has been positively identified by Sheriff Ed Paul of Sagauche county, Colorado, as one of the two men who robbed the bank at Center, Colorado, deputies of the Chaves county sheriff's office said yesterday.

Eslick is a brother of the late Conceil Viking, who was recently killed in an automobile accident in California. Miss Viking gained national publicity when she rode a New Mexico cow pony from New York to Los Angeles several years ago on a wager with an English nobleman.

Eslick has told local officers that he has \$600 hidden away. His previous sentences were all for robbery.

He was convicted twice in Chaves county and once in Eddy county. Two days after the Roswell laundry robbery, for which he is now being held, Eslick, heavily armed, was found by deputy sheriffs Houston Coffey and Rufe Donahoo hiding in a thicket near Roswell.

COLD SNAP KILLS APRICOTS

A large percentage of apricots, which are blooming have been killed by the recent cold snap. Growers, however, say they will have almost a normal crop, if the fruit is not hit by a freeze again. Other early fruit has not been seriously damaged. Freezing temperatures were experienced here Monday and Tuesday nights.

POTASH MINE ABOUT READY TO COMMENCE WORK

According to press reports the potash mine of the American Potash Co., in southeastern Eddy county is about ready to start mining operations. Over 100 men have been employed installing machinery.

NAT HINES FUNERAL IS HELD IN ROSWELL ON FRIDAY AFTERNOON

News of the sudden death of Nat J. Hines, 57, well known cowman of eastern New Mexico, which occurred in Roswell on the night of February 21st, reached us just as we were going to press last week.

Mr. Hines, who was a frequent visitor to Artesia, enjoyed a wide acquaintance of the valley. For the past ten years he had made his home with John C. Peck, of Roswell, former sheriff of Chaves county. For some time he served as jailor and deputy sheriff under Mr. Peck and was later made range inspector of the Cattle Sanitary Board, which position he held up until a few months ago. Previous to serving as deputy sheriff under Mr. Peck, he worked for the Diamond A and Circle Diamond outfits. Before coming to New Mexico he was a member of the Texas ranger force and saw several months of active service in the Big Bend country of Texas.

A few pioneer ranchmen of this section, including D. W. Runyan, have known Mr. Hines for thirty or thirty-five years. Mr. Hines was a typical westerner and had the name of "Being a square shooter."

The funeral for the deceased was held in the Dilley parlors at Roswell on Friday afternoon, Rev. C. C. Hill, officiating. The body was shipped to Kennedy, Texas, and burial was made beside a brother, who died last October.

Surviving Mr. Hines is a sister, living at Kennedy, Texas and a nephew, Miller Ammons, of Silver City, state game warden and former resident of Artesia.

BASKETBALL NEWS

The Artesia Bulldogs won their last scheduled game of the season from the Dexter Five, Friday when they took the long end of a 22 to 18 count. The locals took the lead early in the game and at the end of the first half had secured a 12 point lead, the score was 15 to 3. Dexter, however, came back in the last half and made 15 points when the local five made 7. Clarke of Artesia led his team mates in scoring with 10 points. Reed was high point man for the visitors with 10 points, also.

The summary:

Miss Florence Ahl, who lived here when she was a small girl, was in town Monday and Tuesday, calling upon old friends. Miss Ahl, lives at Vandalia, Illinois, and was en route to California to the home of her uncle, Prof. Corrington, who will be remembered as a prominent musician here many years ago. Miss Ahl and the woman friend, who was accompanying her visited the Carlsbad cavern Tuesday.

Typewriter Ribbons—The Advocate

SLIGHT REDUCTION IN COTTON ACREAGE SEEN FOR THIS SECTION

There is no indication that the cotton acreage of this section will be substantially reduced in 1930, according to a partial survey of the "Intention to plant," made by an Advocate representative recently. Practically all of the farmers interviewed were of the opinion that there would be possibly a slight reduction in the cotton acreage, but this factor will be governed in a large measure, by favorable or unfavorable growing conditions and the water supply. Judging from the present outlook the water for irrigation purposes may not be as plentiful as last year, unless the valley is favored with spring rains.

The American Cotton Cooperative Association together with the federal farm board is urging mobilized action on the part of every community in the south and is calling attention to the situation faced by the cotton grower in the matter of price outlook. No plans have been made for any such action in this section and it is unlikely that any local organization will sponsor any such move.

So far this section has not received the usual winter moisture and the absence of the usual precipitation is being felt on both the farm and the range section, although the farmers have not suffered yet. The spring grass and weed crop on the range will be light unless either snow or rain falls soon.

BOY SCOUT NOTES

One hundred nine representatives from fourteen towns attended the annual scout council meeting held at Roswell, Thursday. Members of the local council attending were: A. L. Allinger, Dr. H. A. Stroup, E. B. Bullock, S. W. Gilbert and Richard Wheatley, eagle scout.

In the election of officers, E. Birch Harrison of Carlsbad was chosen as president of the eastern New Mexico area council; A. W. Hockenull, of Clovis, vice-president; George Jewett, of Roswell, re-elected treasurer and C. J. Mason, of Hagerman was elected secretary.

Reports of the various committees indicated that the council is in better shape financially than ever before. Some of the chief aims of the council for 1930, submitted by Minor Huffman, area executive, will be: Completion of the year without financial deficit, securing annual contribution from 1,000 citizens, scout leaders training courses for every administrative center, improved road to scout camp, fifty percent of the scouts to attend summer camp, improvements at camp including watering system etc., enlargement of the present enrollment from 713 to 775 by the end of the year and by December 31, 1932 an enrollment of 900 scouts, enrollment of 150 cubs by December 31, 1930 and 450 cubs enrolled at the end of the year 1932.

ADDITIONAL SOCIAL ITEMS

12 IN 1 BRIDGE CLUB

The club met at the home of Mr. and Mrs. Welling on Haskins in the Phillips Petroleum camp last evening for its regular meeting. Every member was present. Mrs. Roscoe Kile won high score for the ladies and Mr. Lapsley, high score for the gentlemen. A delicious salad course was served by the hostess.

FORTNIGHTLY BRIDGE CLUB

The club was entertained by Mrs. Will Linell at its meeting last week, which began with the usual one o'clock luncheon. There were two substitutes: Mesdames John Lanning and Otto Staerker.

THURSDAY (NEXT WEEK)

The Christian Ladies' Association will meet with Mrs. Alf Coll for an all day meet with a covered dish luncheon at noon. Mrs. Ballard's division will have charge of the program.

The Methodist Missionary Society will hold its regular business meeting in the church at 2:30 p. m.

The Presbyterian Ladies Aid Society will meet at the church at 2:30 p. m.

TUESDAY

The T. E. L. Class of the Baptist Sunday school will meet with Mrs. R. N. Russell on South 2nd street at 2:30 p. m.

FRIDAY, (MARCH 7th)

United meeting of the Missionary Societies of all churches in the Baptist church at 2:30 p. m. The object of the meeting is to hold a prayer meeting for a Pentecostal blessing especially upon missionary work. Mrs. Ralph Peterson will be chairman.

LIONS DISCUSS

(Continued from first page)

Lions Howell Gage, O. C. Glover and Noel Meeks, acting as judges were unable to bring in a decision. The entire club voted on the question and awarded the verdict in favor of the negative as they proved the town form of government was good enough. Many thought that the affirmative lost the decision by their mud-throwing political methods.

The next program is under the direction of I. C. Keller, Howell Gage and O. C. Glover.

Mr. and Mrs. Harold Hancox spent a couple of days in Amarillo, Texas, last week.

Miss Effie McCaw has been confined to her home for several days on account of illness.

Mr. and Mrs. W. P. Cox returned Tuesday after spending a few days with relatives on Hondo.

Mrs. Howard, mother of Mr. Daniels, has been in St. Francis hospital in Carlsbad the past week, dangerously ill with blood poison in one hand. At last reports she had begun to improve.

Mr. and Mrs. J. A. Cooper, of Kenan, accompanied by their twin children, Lewis and Miss Lelia, spent Sunday in Artesia, guests of Mr. and Mrs. C. R. Blocker. Mrs. Blocker is a sister of Mr. Cooper.

Mr. and Mrs. Mattison, who have been visiting their daughters, Mrs. R. L. Paris and Mrs. J. E. Robertson and their families for the past several months, left yesterday for their home in Maryville, Missouri.
