COMMENCEMENT

Many boys and girls often wonder why the closing of school is termed commencement. To them the word commencement is a misnomer. It is quite natural that the youth should thus reason the proposition out. Those of us who have long since passed the high school and college age perhaps fully understand what commencement really means, for a completion of a high school or college course is in reality the commencement of life.

Four years spent in high school or college should better equip the individual to commence life. How well the student starts in life will depend largely on his or her natural ability and how well he or she has applied himself or herself during the period of preparation. Practically all educators agree that an individual should have at least a high school education, but it is a debatable question now as to the practicability of opening up the college to every class of student, except to finish his or her technical or professional education.

COTTON BALE SHOULD BE IMPROVED

Now that the sentiment favors an improved staple for our cotton, the next step is to improve our cotton bale. No other cotton in the world goes to market in such a disgraceful condition as our American product. The bale looks neat enough as it comes from the gin, but by the time it gets to the compress it looks like a ragged beggar. Sometimes it is so bad that new bagging must be used, but usually it goes into the compress in the state it is received and is shipped to the markets in that condition.

A neater package would increase the respect of the cotton trade for American cotton. Better staple is only one step in the right direction. Better bales is the other.

The Pecos valley could be made to produce a good quantity as well as quality of small grain, but the trouble we have no marketing facilities and an unfavorable freight rate, explains one farmer. If we had the same freight rate on wheat as cotton, we could successfully compete with the Panhandle of Texas. Wheat or oats can be grown here under winter irrigation, when water is plentiful. Small grain would provide the farmers with more methods of diversification.

PROPAGANDA

This is the day of propaganda. Perhaps no one realizes this fact better than the newspapers over the country. The ordinary newspaper fills more than a wastebasket full of perfectly good propaganda every week. Some articles very cleverly camouflage the point at issue and to the ordinary layman it appears to be a well written article on some national issue. A little thought on the subject usually brings out why some news agencies or companies are willing to employ the best available talent to compose these articles and send them out to the press over the country with the hope that they will be used.

The desire to obtain a little free advertising prompts the generosity on the part of the sender, usually some corporation that has something to sell the public or some company that wants the public sympathy and cooperation. Just now the sugar trusts, the meat packers and the foreign importing oil companies are the most active propaganda spreaders who are seeking a little free advertising from the newspapers over the country. The American Petroleum Institute, is one of the latest news agencies, seeking free publicity for the importance of oil conservation so that we can permit two or three oil corporations to supply us with crude oil from South America or some other foreign sea port. Aside from Brisbane the American Petroleum Institute, controlled by Mellon and the oil companies that are doing most of the oil importing, is probably the smoothest propagandist of the lot. The master mind of the Petroleum Institute can paint a very disturbing picture about how fast we are exhausting our natural resources and how fast our world leadership is slipping through the careless waste of our oil supplies, all because the independent producer wants a tariff on oil. These articles are usually prepared and written and if some newspaper sees fit to copy or comment on the propaganda sent out, the Institute recopies it and sends it abroad as a clip sheet.

AFTER TODAY

After today some of the county and district candidates will know better than to pay too much attention to their friends. A little experience has taught us that a man should not keep his ear to the ground too much of the time, trying to find out just what the public wants, if he is afraid of a "bum steer." The phrase "I am entering the race at the solicitation of my many friends," has often proven disastrous to many an individual, who let his political aspirations get the better of his discretion.

After all is said and done the best way for a candidate to find out whether or not the public wants him is to get in the race. And its no disgrace to be beaten.

WHAT'S THE USE?

He brushed his teeth twice a day.
The doctor examined him twice a year.
He wore his rubbers when it rained.
He slept with his windows open at least eight hours every night.

He stuck to a diet with plenty of fresh vegetables.
He relinquished his tonsils and traded in several worn out glands.

He never smoked, drank, or lost his temper.
He did his daily dozen daily, beside taking plenty of out door exercise.

He was all set to live to be 100.
The funeral will be next Wednesday.
He is survived by eighteen specialists, four health institutes, six gymnasiums and numerous manufacturers of health foods and antiseptics.
He had forgotten about trains at grade crossings.

The Russian government has recently completed the construction of the national railroad to its southern province, thus paving the way for a start at cotton growing. Russia aims to grow her own cotton and thus lessen the cotton export from Egypt and America, which amounts to about \$70,000,000 annually. It is up to the people of the south to find another market for American cotton and perhaps further use for this product, if we continue to increase our cotton acreage.

The New Mexico School of Mines will add a new course of study to its curriculum, the new course being the state's baby industry, oil.

PINTO BEANS MAKE A GOOD CASH CROP

The New Mexico pinto bean is one of the important cash crops of the state says Dr. Fabian Garcia of the New Mexico experiment station. This crop is excellently suited to the dry farming districts. It can be produced with about as little rainfall as any other crop. Due to the limited amount of rainfall in many parts of the state, beans will continue to be one of the good cash crops for those districts.

At the present time the pinto is the only commercial variety grown in the state. The statistics of the 1925 U. S. Census show that we are growing beans in every county in New Mexico. Torrance county had the largest acreage, with Union county second and Harding county third. New Mexico was also shown as the second largest pinto bean growing state. In 1927 New Mexico produced 58,500,000 pounds of beans valued at \$2,828,000. In 1929, because of the much larger crop, no doubt the cash returns must have been larger.

The yield of beans varies with the amount of rainfall or amount of soil moisture. With a good rainy season and the proper distribution of the rainfall during the growing season, fields under dry farming will oftentimes yield as high as 1,000 to 1,200 pounds per acre. Where rainfall is supplemented by one or two irrigations the yields should consistently be up to 1,200 pounds to the acre or even higher.

Under irrigation, anywhere from 25 to 35 pounds of seed are planted to the acre, under strictly dry farming conditions, usually about 15 to 20 pounds. In the higher altitudes, every effort should be made, if soil moisture permits, to plant as early as possible after the danger of frost is over, so that the crop may mature thoroughly before fall frosts come. The bean will not stand any freezing weather.

Significant Infections

There are 396,000,000 ways of spelling "circumference," says Dr. Ernest Horn; and we wouldn't be surprised if there were found to be as many infections for the word "yeah."

BE RATE MAKES INCREASE IN DURING 1929

TON, D. C.—The de-commerce announces that the returns received, 727 marriages performed during the year compared with 4,892 in 1916 there were 3,353 percent. This increase is largely to a change in the laws of Texas regarding notice to be given to the issuance of the license in many crossing counties of New Mexico. In 1916 there were 3,353 marriages performed. In 1929 there were 715 in 1928, an increase of 82 or 11.5 percent. Divorces were 1916, 387 divorces were 1929 as compared with 1928. The estimated population of New Mexico in 1929 was 400,000 and July 1928. On the basis of the number of marriages, the number of divorces, as against 12.4 in 1928, the number of divorces per marriage was 1.99 against 1.81 in 1928. The number of marriages performed by the county clerk against 1.81 in 1928. The figures for preliminary and subject

TABLE WELL ABANDONED RECENTLY

TEXAS—Deep drilling in Texas area has received the failure to obtain the deepest hole ever made of cable tools. At 2,004 feet this well has been drilled by a crew at a cost of more than \$100,000 upon a block of land owned by a lease in Irion county, thirty miles from the fact that large quantities of oil were obtained from the well of the Texon Oil and the Big Lake field and that this horizon are producing in commercial quantities, the field by some geologists is believed to be one of the largest oil producing sand fields found throughout the state of West Texas. Mr. [Name] is willing to gamble on the well. At a depth of 2,004 feet salt water was encountered. It could not be an account of subsequent drilling. The well was in a complete core of the sand and it is to be given up. It is open to a depth of 1,800 feet. Interesting features concerning this record breaking project was that no serious accidents were encountered in drilling. The hole is almost 100 feet in diameter and is regarded as one of the greatest depths in the world. It has proven that wells drilled to this depth with a diameter of 1,800 feet only a few years ago. The rotary equipment was

INSIDE INFORMATION

Do not wrap your ice in paper or cloth. Melting ice saves food by reducing the temperature of the air in the refrigerator.

If it were necessary to have a reason for eating watermelons, there is one. Scientists have found that ripe red watermelons of the Tom Watson variety supply abundantly at least two of the vitamins, and contain two others in detectable quantities.

Add about a tablespoon of acid—lemon or vinegar—to the seasoning when starting mayonnaise dressing, then add the egg yolk and begin beating. Add oil a little at a time, beating steadily, and when the mixture begins to get thick add the remaining acid and oil.

When vegetables or fruits are cut for a salad, the pieces should be large enough so the salad will not be mushy after the dressing is added. All ingredients just before serving for dressing tends to wilt the vegetables and salad greens. Potato salad is an exception to this rule.

Hang up a card in the kitchen and note on it the quantity of vegetables, fruit, eggs, poultry, etc., you bring from your garden for family use. At the end of the month you can estimate what the value would have been if they had been sold. You will then have some idea of what the poultry yard and garden contribute to your family living.

Make for the smallest children several two-piece outfits, consisting of bloomers or panties on a sun suit top, and a matching dress to slip on over the sun suit when the sunning time is over. At first sun baths are given for short periods only, until the child's skin is accustomed to the strong ultra-violet rays. The little overdress will also be useful in taking a child through the streets, to a neighbors' or to a playground where the sun suit part can be worn suitably.

"Did you ever see 'The Cockeyed World?'" asked Helen Twelvetrees of Ben Turpin, between scenes of "Swing High," Pathe's all-dialogue circus romance. "Did I ever see the cock-eyed world?" repeated Ben. "Why, that's the only way I have been seeing it for fifty-three years!"—Movie Romances.

Why Spares Deflate So Soon
Inflated spare tires do not necessarily go down quicker than a tire in use on the wheel. When a spare tire goes down quicker than the other tires, and the difference is not accounted for by a leak in the tire itself, it is probably due to the fact that there is not as much pressure to hold the valve tight as there is in the case of a tire with the weight of the machine on it.—Exchange.

Why Word "Hanım" Is Added
"Hanım" placed after the name is merely a title given to Turkish ladies, whether single or married. For instance, if a Turkish woman named Fatima Tevik Hanım were married to a man Bedi she would probably add her husband's name to hers and call herself Fatima Bedi Hanım.

SCHOOL TEACHERS PAY TO BE STOPPED UNLESS CERTIFICATES ISSUED

SANTA FE—School teachers face having their pay stopped unless they have certificates to teach.

State School Superintendent Atanasio Montoya Monday said that he is having his certification clerk, Mrs. Ernestine Jones, check the pay rolls against the certification lists with the purpose in mind of requiring the school teachers either to comply with the certification law or go without their checks. He is going to have the certification law enforced, he said.

High school as well as common school teachers are being checked up. It has been found that one teacher had been teaching two years without a certificate. She is competent and could have obtained a certificate if she had took the trouble, he explained.

One high school teacher has been discovered to be without a certificate. The checking up has bumped into an occasional snag owing to the fact that some teachers have qualified under one name and given another for the pay roll. That is in the case of married teachers who get certificates under their own names and their checks under their husbands'.

IS IT AN ALLIGATOR?

Speaking of wild and wierd stories that sometimes go the rounds, we have heard it asserted that there is an alligator in Spring Lake. As to whether this assertion is true or false, we are not prepared to say on account of insufficient evidence. An incident which appeared to substantiate the rumor somewhat was the mysterious disappearance of a dog in this vicinity some months ago.

Why Certain Roads Are Known as "Macadamized"

It is probably not an exaggeration to say that every one who drives an automobile knows a macadamized road when he sees one; and probably every body else, too, for that matter, is familiar with this specially prepared road surface which has contributed so much to the joys of automobiles and given such a fillip to travel by motor vehicle.

But why are they "macadamized" roads?

The answer is simple. These roads are so-called after the inventor of the compound used in building the surface known as a macadamized road.

This inventor was John Loudon McAdam, a Scotchman, who almost a hundred years ago discovered the secret of what made better roads.

Why Things Become Cold

The weather bureau says that how cold the air or anything else feels is determined by the rate at which we lose heat to it. Now, the more humid the air the more humid in general our clothing and our skins, and the dryer the air the dryer they are. Furthermore, the more humid our skins and our clothing, the better conductors they are of heat, and the dryer they are the better they insulate. Clearly, then, when the air is very dry the interiors of our bodies are comparatively insulated from loss of heat, and when the air is damp relatively exposed to such loss.

STRIKING CONVINCING PROOF that Dirt, Air or Moisture can't affect the SEALED IN STEEL GENERAL ELECTRIC REFRIGERATING UNIT

THE convincing under-water test is proving the facts hundreds of thousands of users already know—that General Electric Refrigerators are trouble-proof and service-free. A flawless mechanism, bathed in oil, is sealed in steel. Dust, dirt, moisture and rust cannot harm it—or halt its quiet, efficient, dependable operation. Completely submerged in water—this refrigerator has operated day after day. Only a General Electric could do this. Dramatically—convincingly—General Electric has shown why not a single owner has ever spent a cent for service—that efficiency is sealed in—trouble sealed out.

Built of all steel and porcelain lined, far greater food storage capacity is provided. It is movable—can be installed anywhere.

General Electric serves faithfully the year-round—work issued—expenses reduced. Prices are reasonable—terms liberal.

LOCALS

Mr. and Mrs. Bun Muncy were Roswell visitors Monday.

Mrs. Robert Ohnemus spent the week end with her parents at Portales.

Jeff Hightower came in Tuesday evening and will spend a few days at home.

Messrs. Ralph Shugart and M. W. Evans attended court in Carlsbad yesterday morning.

John Moore of Pennwell, Texas, former resident of Artesia was visiting friends here Monday.

J. R. Fraley has recently purchased a residence and lot located on South First street from Gilbert and Collins.

G. U. McCrary, and Mr. and Mrs. Jack Cunningham returned Monday night from a business trip to Santa Fe.

Mrs. R. L. Collins drove down from Hagerman yesterday for a short visit with her parents, Mr. and Mrs. S. G. White.

I. C. Dixon expects to drive over to Snyder, Texas the last of the week to bring Mrs. Dixon home, who is visiting relatives there.

Miss Edna Page arrived from Texas last week and is visiting her sister, Mrs. Earl Collins, before leaving for summer school at State College.

Mr. and Mrs. E. A. Paton and children expect to leave Monday for a visit with relatives in Ohio and will be gone six weeks or two months.

Mr. and Mrs. C. C. Gist and daughters of Anaheim, California, spent the past two weeks here visiting with Mrs. Gist's parents, Mr. and Mrs. N. E. Garrett.

Hugh Burch, local oil operator left for Washington, D. C. the first of the week and expects to spend a short time in the capitol city attending to business matters.

Ike Keller is moving his family into their new home on west Main street this week. The house is Spanish style and is a decided addition to Artesia's residential section.

Nevil Muncy accompanied Gayle Talbot Jr., of Dallas, Texas through the Carlsbad Caverns Sunday. Nevil and Gayle were boyhood neighbors and friends and enjoyed renewing old friendships.

J. W. Stevenson, who had been here six weeks recovering from the effects of a broken leg, returned to his home at Pinon, Tuesday. Mrs. Stevenson had been here with him the past fortnight.

E. E. Shaw, formerly of Roswell with the Sparks Chevrolet Co., has accepted a position with Jackson-Bolton Chevrolet Co., as used car salesman. Mr. Shaw is a former resident of Hope.

GERM PROCESSED OIL PROVES SUPERIOR IN THE PIKES PEAK TEST

DENVER, Colorado—The results of a most amazing and extensive competitive test of motor lubricating oils ever staged in the United States, checked and certified by disinterested observers of the contest board American Automobile Association, have just been made public here by the Continental Oil Company, which made these tests.

As a result of the gruelling operation of three motor cars up and down the Pike's Peak highway—the greatest natural proving ground in the country, each traveling a distance of 1,952.33 miles—a vast array of scientifically determined facts concerning the performance of various lubricating oils, definitely establishing claims made for Conoco Germ Processed motor oil, were assembled.

The tests were made with Conoco and three other widely sold American made motor oils. The oils were all purchased in the open market in cooperation with A. A. A. observers, and sealed in cans which were identified by secret code numbers, known only to the A. A. A. representatives. The motors of the cars used were disassembled and washed clean of all residual oil before and after each oil was tested, and all carbon was removed. The finest precision instruments were used to make micrometer measurements of the cylinders, pistons, rings and other moving parts, to determine exactly how much friction wear occurred in the tests with the various oils. Thermometers were installed to check the temperatures—directly affected by the efficiency of the oil in the motor.

The Pike's Peak highway begins at Colorado Springs, at an altitude of 6,000 feet and ends at the top of the peak at an altitude of 14,109 feet. The course is 29 miles, and during the tests, the altitude rises 8,000 feet with temperatures ranging from 84° to 32°. The course included long steep grades, quick turns, slow driving and every other condition encountered by a motor car in daily use. Each car traveled 1,952.33 miles up and down the peak during the tests.

Here are some of the startling results:

The A. A. A. observers and Conoco engineers made over 10,000 different observations, tests and measurements, all indicating Conoco Germ Processed oil as possessing the highest lubricating efficiency of any oil in the test.

Micrometer measurements of the pistons and cylinder walls before and after the tests showed there was 76.4 per cent less wear on the motors when using Conoco Germ Processed oil, than the average of wear for the other three oils.

The carbon collected in the motors was measured and was noticeably less in weight and volume when using Conoco oil than with any of the other oils.

A graphical ammeter-voltmeter installed in each car showing the current required to turn over the motors established the claim that Conoco Germ Processed oil, by penetrating metal surfaces, provided a more durable compression seal.

Proving the economy of Germ Processed oil was a series of comparative measurements of stability, with Conoco losing less of its lubricating properties during the terrific grind than any of the other oils.

Lower water temperatures at water inlets and outlets indicated less friction in the motors when Conoco Germ Processed oils were used.

Road Map

The Bible at Mary Anne's house did not have pictures or maps. One day the family was visiting some friends. When Mary Anne picked up their Bible and found a map of Palestine in it she took it to her father, exclaiming: "Look, daddy, there's a road map in this Bible."

Typewriter Ribbons—The Advocate

WHY Wives, as a General Rule, Survive Their Husbands.

Wives actually live longer than husbands, on the average, according to a bulletin issued by a leading life insurance company, which seems to dispose of the ancient and cynical verdict, "It only seems longer." And, indeed, why should they not survive their husbands?

To begin with, the girl is generally younger than the man who marries her. But that is only one reason for her outliving him. Statistics show that women are apt to outlive men in any case. Married women, in turn, ought to outlive single ones, and figures have been worked out to show that they actually do.

There is no mystery as to why the married women should reach a greater age than their single sisters. When a man finds a wife he picks the girl that attracts him. That means that he marries good looks, amiability, lively spirits, and other qualities, all more or less dependent on good health. The reason that married women live longer than single ones is that in spite of exceptions men marry women likely to live longer than the average woman who stays single. So the men need not complain if their partners usually survive them. They help make it so themselves.

If women did the choosing they would no doubt pick husbands for just those physical and personal qualities that make for long life—the very qualities that men pick in women. When the day comes, if it ever does come for women to do the matrimonial selecting, the husbands will have a much better prospect of surviving the partnership.—Brooklyn Eagle.

SANTA FE ATTORNEY KILLED

E. P. Davies, attorney, who was shot in the head at Santa Fe Monday afternoon, by Ramon Garcia, during a discussion of an estate in which Garcia was interested, died Monday night at 10:30 p. m. in a hospital. Garcia, who shot himself in the

mouth after wounding the same hospital in a condition, but is expected to live. Davies who practiced law in Santa Fe for over 20 years, is survived by his wife and two sons and a daughter. He was a former member of the state legislature and mayor of Santa Fe.

TEST OF CONOCO'S GERM-PROCESSED TENACIOUS FILM . . .

... Compared with Popular Oils at Pike's Peak . . . Reveals 76.4% Less Motor Wear! . . .

We sincerely believe that this disclosure alone will cause you to begin using CONOCO Germ-Processed Motor Oil . . . such decided reduction in motor wear . . . such triumph over the savage attack of friction and heat . . . such positive supremacy over the oil you have been using, all have a definite appeal to your pocketbook and judgment.

Charts prepared from the Pike's Peak Test records indicate a longer life for your motor by lubricating it with Germ-Processed oil. Too, you will save substantially on your gasoline cost, and in oil expense, by using this oil. And the fact that Germ-Processed oil penetrates metal surfaces means, that after starting your car on a cold morning you can safely drive at top speed with less likelihood of damage . . . for CONOCO'S film is already on the job.

Less Carbon—Less Cost—More Mileage and Less Heating—More Compression. All these things mean a better all-around motor. It is truly unusual for a motor oil to so excel competition as CONOCO did in the Pike's Peak Tests. Tested out on the Pike's Peak Highway, scene of many famous automobile tests, was a memorable struggle for supremacy . . . On the one side, there of America's representative and popular oils—on the other, Germ-Processed oil. And CONOCO Germ-Processed Motor Oil won, by all tests applied.

Only CONOCO can make Germ-Processed oils. CONOCO can give you these new motor oil merits, including penetrating lubricity. We hope to serve you soon, at stations displaying the Red Triangle.

SEND NOW for the new Free Booklet which describes in detail the story of the Pike's Peak Tests. Illustrated with photographs and charts. Address Continental Oil Company, Ponca City, Okla., or at the station with the Red Triangle.

Social Activities

HONOR STUDENTS GUESTS OF ROTARY CLUB TUESDAY

The honor pupils, twenty-one in number were guests of the Artesia Rotary club and gave a very interesting and entertaining program at the regular luncheon Tuesday. Representatives were present from every class in the grade, Junior high and high school. The program consisted of piano solos, vocal solos, vocal duets, story telling and the reading of poems.

Miss Ruth Bigler, the honor pupil from the senior class gave a piano solo; Misses Elizabeth and Elnora Gage, a vocal duet; Harold Bradshaw told a bear story; Joanne Wheatley, gave a short history of some of the wild life of New Mexico; Frank Zamora of the second grade sang a song, Bonnie and Wayne Rowland gave a duet; Charles Floore told of some of the phases of physical education in the junior high school; Dick Morris told a story; Dick Burnett read a poem on Governor Dillon; Juanita Smith, gave a short history of some of our native fruits; Jean Wheatley, accompanied by Miss Elizabeth Gage played a violin solo; Miss Cara Mae Marable, told some interesting things about the wild life of New Mexico. Roy Sonbrenner gave a story; Phyllis Bartlett, rendered a piano solo; Beth Jean Kuykendall gave a vocal solo; Josephine Zamora sang a Spanish song; Helen Covey gave a reading and Don Cowan read a poem.

LEGION AUXILIARY MEETING

The Auxiliary varied its program by having a luncheon in the roof garden of the Artesia hotel at its regular meeting Monday. Covers were laid for forty-five, among whom were a few of the ladies, who assisted in putting on the Zander-Gump Wedding. The luncheon was served in two courses and the national and auxiliary colors gave distinction to the tables.

Following the luncheon the regular business meeting was held, the president, Mrs. Frank Seale presiding. Mrs. Fred Cole favored the audience with a soprano solo, Mrs. Albert Richards accompanying.

The committee reported over \$100 taken in at the Zander-Gump Wedding. The Girl Scout committee reported that Mr. Wood had promised to donate land on the Lanning place just east of the track for the use of the scouts and also to place a cabin upon the ground and assist in putting it in shape to use. He also gives them the use of the swimming pool. Funds will be necessary to finish and furnish the cabin and the girls are eager to help get it ready to use. This handsome gift of Mr. Wood is greatly appreciated by the Auxiliary.

Poppy day was discussed and plans for a large sale are underway.

MRS. SCHENCK HONORED

The Susannah Wesley Class gave a farewell party and miscellaneous shower Tuesday afternoon for a former member, Mrs. C. T. Schenck who is leaving to make her home in Vermont. The party was at the home of Mrs. J. S. Sharp with Mesdames Wm. Gissler, J. H. Long and L. W. Feemster joint hostesses, Mrs. Fred Hinrichsen also assisted in the serving of delicious ice cream and cake.

Mrs. Schenck received many beautiful gifts to take with her as reminders of her many good friends in Artesia. In addition to the honor guest and hostesses there were present Mesdames E. B. Bullock, Rigdon, J. H. Jones, S. S. Ward, W. S. French, Cowan, Allinger, "Col." Williams, Ed Stone, J. M. Jackson, George Frisch, Hinrichsen, Hornbaker, Benson and Stroup.

SHOWER

Complimentary to Mrs. Harry Jernigan, a recent bride, Mrs. Jim Berry and Mrs. Clarence Conner, gave a miscellaneous shower at the Berry home, Friday afternoon. The shower of lovely presents was brot into the room in a May basket mounted on a small wagon and drawn by Elsie Jernigan and Dorothy Berry, dressed as miniature bride and groom. Refreshments completed the program of the afternoon. The guest list included besides the honoree, Mesdames Charles Rogers, E. T. Jernigan, Leonard Jernigan, J. G. Littlejohn, W. P. Cox, Henry Paton, M. W. Evans, E. H. Perry, Ed Conner, D. S. Martin, Jeff Hightower, Reed Brainard, Charley Martin, Irvin Martin, Harold Dunn, Jim Nellis, T. C. Bird, J. D. Jackson and Ralph Pearson and the Misses Cora Rogers, Ruth French and Elaine Feemster.

THURSDAY (TO-DAY)

Mr. and Mrs. John Richards will entertain the "Chevie Six" Bridge club at 7:30 p. m.

FRIDAY

The Evening Fortnightly Bridge club will meet with Mr. and Mrs. Lewis Story.

TUESDAY

The Idlewhites Bridge club will meet with Mrs. Jim Nellis at 2:00 p. m.

THURSDAY (NEXT WEEK)

The Sunshine class will have an all day meeting at the home of Mrs. E. H. Perry. Covered dish luncheon.

EXECUTIVE BOARD MEETING

The annual executive board meeting of the American Legion Auxiliary, Department of New Mexico, was held here last Friday at the home of the department president, Mrs. Albert Richards. Board members present were the president, past president, Mrs. W. B. Cantrell, of Gallup; 1st vice-president, Mrs. Harlow Hyland, of Las Cruces; treasurer, Mrs. W. H. McCullough and rehabilitation chairman, Mrs. O. R. Haymaker, of Roswell and the secretary Mrs. H. A. Stroup. Mrs. R. C. Worswick of Roswell, chairman of the constitution committee and Mrs. Frank Linell of Artesia, fidac chairman, were visitors at the meeting.

Mrs. Daniel Vaughan of Las Cruces department post commander, who was in town, made a talk at the meeting, stressing particularly cooperation between the two organizations, the effort to change the opening of the fishing and hunting seasons to avoid the conflict with memorial and Armistice days and the meaning and importance of memorial and poppy days.

The company adjourned for luncheon at half past twelve o'clock to the Artesia hotel, where they were joined by Commander Vaughan and Mrs. Jess Truett, secretary of Clarence Kepple Unit.

Mrs. Vaughan left that afternoon for Hobbs to present a charter to the post just established there.

BIRTHDAY PARTY

An enjoyable birthday party was held Wednesday evening at the Presbyterian manse honoring the tenth birthday anniversary of Edith Sinclair. The Presbyterian church lawn provided a place for the games which were much enjoyed. Refreshments were served in the manse around Edith's birthday table.

The little folks present were: Peggy Linell, Jane Shugart, James Robertson, Norma Meyers, Lucia Jean Hnulik, Eloise Hill, Eloise Gleghorn, Dorothy Bob Company, Dorothy Reno, Dorothy Lee Able, Verla Fay, Chester, Dorothy Vogle, Phyllis Bartlett, Marie Beck, Landis Ed Feather, Grant Scoggins, Clara and John Sinclair Jr.

TALBOTS HONORED

Mr. and Mrs. Harve Muncy were hosts at one o'clock dinner last Thursday, complimentary to their old neighbors and friends, Mr. and Mrs. Gayle Talbot and Gayle Jr. The dinner was served in three courses and covers were laid for the honor guests and Mrs. L. Doyle, of Deming, an aunt of Mr. Muncy who is visiting here, Mr. and Mrs. Nevil Muncy and daughter, Florine, Mr. and Mrs. Geo. Williams and little daughter, Georgie Lee, of Maljamar, Mr. and Mrs. Roy Muncy and the host and hostess.

COURT OF HONOR

A number of Boy Scouts appeared at the Court of Honor held in the evening and took examinations for the various degrees in scouting. Among those who took the tenderfoot examination included: Carroll Griffith, Leon Meeks, John Shearman, Olin Woodside; second class scout examinations: Armond Loving, Frank Cogdell; first class examinations: Clyde Champion; merit badge examinations: Lorid Sharp, James Sharp, Billie Bullock, G. C. Denton, Norman Grimm, Osburn Keller and Emery Champion.

FORTNIGHTLY BRIDGE CLUB

The Fortnightly Bridge club met at the home of Mrs. C. Bert Smith Tuesday and after enjoying a delicious one o'clock luncheon, spent the afternoon playing bridge. There was one substitute, Mrs. D. L. Grimm.

LOCALS

Mr. and Mrs. R. C. Withers and sister, Mrs. Jones, are enjoying a visit from their parents, who came from Sweetwater, Texas, the past week.

Jim Cowan who is a member of the graduating class at Oklahoma University, has had the honor of being elected associate instructor in his alma mater.

Gayle Talbot, Jr., who is here from Dallas, Texas, visiting his parents, his uncle and aunt, Mr. and Mrs. J. P. Lowry and old friends, returned from a visit to relatives at Hagerman.

Announcements of the commencement exercises of the Pampa, Texas, high school have been received by friends of Gene Fathree, former Artesia boy, who is a member of the graduating class.

Mrs. C. T. Schenck came in from Roswell Friday and was the guest of Mrs. Ward Cave until Tuesday evening. She plans to leave Roswell tomorrow for Putney, Vermont, where she plans to make her home with a niece.

Herman Green and his brother, Roy Green and wife of Roswell, left Tuesday for a trip to their home folks at Jonesboro, Arkansas. The brothers will be back in a week, but Mrs. Green will remain for several weeks.

Mr. and Mrs. Philip Kranz, of Roswell spent the week end here with their parents, Mr. and Mrs. J. C. Floore. They took home with them little John Hartsfield, who will stay with them during the absence of his grandmother in Texas.

Rev. J. P. Sinclair supplied for Rev. Leroy Thompson, pastor of the First Presbyterian church at Roswell, Sunday at both the morning and evening hour. Rev. J. A. Hedges of Hagerman preached at the local church Sunday evening.

Mrs. G. O. Dotson and baby, Betty Louise, who were here during the illness of her mother, Mrs. A. M. Tarbet, have gone to Hobbs, where Mr. Dotson is in the employ of the Keiser Transportation Co. Mrs. Tarbet is somewhat improved after several weeks illness.

When the rooster crows at sunrise In that strident tone of his, Then the weather either changes Or remains just as it is.

Announcement Cards, blank or printed—The Advocate.

PRESBYTERIAN LADIES PARTY

A most delightful party took place last Thursday afternoon when the ladies of the Presbyterian church surprised Mrs. Laura Welsh. The program for the afternoon was in charge of Mrs. W. E. Kerr president of the Ladies' Aid Society, assisted by Mrs. R. G. Knoedler. Mrs. Welsh has recently returned to Artesia after a winter's absence.

The party was in the nature of a welcome home and to express the esteem with which Mrs. Welsh is held among her many friends. The games of the afternoon were very much enjoyed and later refreshments were served and toasts made.

Among those present besides the honor guest were: Mesdames R. G. Knoedler, W. E. Kerr, J. P. Sinclair, Rex Wheatley, W. Withington, E. Wingfield, A. M. Tarbet, V. L. Gates, S. D. Gates, J. G. Hoagland, J. A. Bruce, G. Hamilton, Glasser, McComb, M. Bruning, S. W. Gilbert, D. E. Buckles and Miss Emma Clark.

YOUNG MOTHERS CLUB MEETS

The Young Mother's club met with Mrs. Charles Morgan Friday afternoon. Mrs. Margaret Ellis read a helpful article upon the subject of "Lies." There were three visitors, Mesdames George Blakeney, E. E. Gillespie and Jack Clady. Mrs. Clady was admitted to membership at this meeting. Light refreshments were served.

THE PASSTIME BRIDGE CLUB

The Passtime club was entertained by Mrs. George Williams of Maljamar, at the home of her mother, Mrs. Harve Muncy, on Tuesday. Mrs. Nevil Muncy was the only substitute. Mrs. Charles Morgan won high score and Mrs. John Dunn consolation. Delicious refreshments were served by the hostess.

SECOND AFTERNOON CLUB

The Second Afternoon Bridge club met with Mrs. R. D. Compton, Tuesday afternoon for one o'clock luncheon and an afternoon at cards. Substituting were Mesdames Jim Nellis, Landis Feather and Harry Woodman. Mrs. A. F. Phillips, a member now living in Carlsbad came up for the meeting.

ZANDER-GUMP WEDDING

The Zander-Gump Wedding, attracted a full house, at the Central school auditorium Friday evening. A poppy day scene was presented as preliminary to the wedding by Mrs. Frank Linell and Mrs. Bruning and members of the wedding party. The poppy day scene, portraying some of the activities of the Legion Auxiliary, proved to very instructive as well as impressive.

The wedding scene proper, was presented by the cast of characters in a very clever manner and will no doubt set a new standard for local weddings in the future. The wedding was directed by Mrs. F. G. Hartell with W. E. Ragsdale as radio announcer, who introduced each guest or wedding member as he or she appeared on the scene. Sickness caused a last minute shift in part of the principals. Mrs. Tex Henson took the place of her sister, Mrs. Fred Cole, as the Widow Zander. The parts of the widow Zander by Mrs. Henson and Uncle Bim, played by E. H. Perry, were very good. Major Hoople played by E. A. Hannah, who officiated at the ceremony, brought the house down, using the ring ceremony.

Uncle Bim appeared very nervous during the ceremony. The widow was shy until after the wedding. The Katzenjammer Kids played by the Shulze brothers, added to the comedy as they held the mosquito bar for the bride. George Deane as best man, acted the part of Andy Gump and Miss Mollie King as Min Gump, added to the merriment, especially when Min became hysterical after Uncle Bim bestowed his worldly good on the widow.

Mrs. Grover Kinder was especially good as Mrs. Emma Schmaltz. In the absence of Paul Otts, Dick Vandagriff of Las Cruces played the part of Uncle Walt. Maggie and Jiggs were colorfully portrayed by Mrs. Walter Graham and John McCann. Maggie kept Jiggs, well under submission through the use of her rolling pin and sang, "I Love You Truly," in her melodious melotone as the bride party entered.

Humor was added to the wedding party with the appearance of Mrs. Fred Brainard as Rachael with the Gump baby and her colored friends. Jimmy Haskins, looked and acted like Barney Google and was one of the best costumed characters of the lot.

Bill Linell as Pa Winkle, furnished plenty of disturbance for the otherwise impressive ceremony, when he insisted on having his paper and chair close up. Pa liked to have caused a riot when he removed his shoes.

METHODIST EPISCOPAL CHURCH SOUTH

Rev. Harold G. Scoggins

"The large church with a warm welcome and a helpful gospel." At 9:45 a. m. Sunday school. George Frisch superintendent.

At the eleven o'clock services next Sunday morning the pastor who has just recently returned from the general conference now in session in Dallas, Texas, will preach on the "Meaning and Genius of Methodism," as reflected in the quardennial message of the College of Bishops. Epworth Juniors and Seniors in

their respective rooms at 7:30 p. m. the progress of the conference thus far and much advertised charges.

LAKE ARTHUR ITEMS

Mrs. Ned Hedges, Reporter

Mr. and Mrs. J. R. Spence and D. A. Goode motored to Carlsbad Saturday.

Mr. and Mrs. D. A. Bradley and family attended the baccalaureate exercises Sunday. They were the guests of the Flowers family while in town.

Mrs. C. R. Bernard arrived home from Kansas Tuesday where she has been for several weeks. Mrs. Bernard was called to the bedside of a sick sister, who passed away and was buried while Mrs. Bernard was there.

Rev. Harold Dye preached an excellent baccalaureate sermon to a crowded house last Sunday morning. The program was as follows:
Song Audience
Scripture Reading.....Ruby Smith
Prayer Frank Frazier
Solo Miss Brewer
Sermon Rev. Harold Dye
Song Audience
Benediction Rev. Harold Dye

A large number of friends of Mr. and Mrs. Joe Hester met at their home and honored the bride with a miscellaneous shower, Saturday evening. The newlyweds were the recipients of many useful and pretty gifts. Besides Lake Arthur friends a number of out of town relatives and friends were present. Mr. and Mrs. Hester are leaving soon for Magdalena where they will make their home.

A number of the little friends of Dixie Dan Goode assisted her in celebrating her sixth birthday anniversary Saturday afternoon, the little folks passed the time with games, and at the usual time the lovely birthday cake was cut and each child received a piece with a large tumbler of punch. In leaving each child wished Dixie Dan many more birthdays and each birthday to have a party.

Mrs. Moss Spence was hostess on Friday night to the Freshman class entertaining the Freshman and school faculty each with an invited guest making an almost 100 per cent high school attendance. Games were played until a late hour, when they grew tired of the games they fell back to the piano and enjoyed several musical numbers after which refreshments of ice cream and cake were served.

Wednesday morning saw the last chapel exercises of the year. In addition to the excellent numbers given by the school children, Prof. Bernard presented Dixie Dan Goode with a book, a present from her teacher, Miss Lenora Bradley, for attending school the entire year without being either absent or tardy. Another testimony of esteem and appreciation, was a lovely scarf and handkerchief, presented to Mrs. Moss Spence, sponsor of the Freshman class by Miss Amelia Ohlenbusch, spokesman for this class.

The following eighth grade graduates received diplomas and rendered the following program Tuesday afternoon:
Alonzo Latta, Pat Cullens, Pauline Russell, Ruth Newton, Velma Hatley, Pauline Watson, Ola Derrick, Vernelle Thomasson, Arthur McLarry, Luke Alexander, Howard Crawford, Anton Eakers, Wilma Walden, Ernest Mahan, Jap Murphy, Ruby Jerdan, and Clyda Belle Parker.

FOR YOUR FAMILY'S SAKE

..... don't go through another summer without a Westinghouse Fan

Don't let your family swelter through another summer of glaring days and hot, breathless nights. A Westinghouse Fan gives you so much cooling comfort . . . so economically. Think how you welcome its breezes in store or office. Why not let the family enjoy the same comfort at home? There's no hot-weather relief half so satisfying as the Westinghouse Fan you've been promising yourself for years. You'll be sure to keep that promise when you see the new, full-size, eight-inch model that a five-dollar bill buys. Come in and see it today.

PRICES SMASHED CHRYSLER "77"

SAVE \$200 to \$350

Effective at once, prices of current Chrysler "77" models are reduced \$200 to \$350—the greatest price slash in all Chrysler history.

Other current Chrysler models—"70", "66" and Chrysler Six—are being continued unchanged.

This price reduction is occasioned by the fact that Chrysler will introduce—sometime in mid-summer—a new model to take the place of the present Chrysler "77".

Here is the greatest bargain ever offered in brand-new motor cars. At \$200 to \$350 off, the supply will not last long. Act now. Your present car will be accepted in trade. Chrysler's liberal financing facilities are available.

LOWREY-KEYES AUTO CO.
Artesia, N. M.

NOTICE TO BIDDERS

Until Friday, May 23, 1930 the County Board of Education will receive bids for the following transportation routes:

Real Success
He has achieved success who has lived well, laughed often and loved much; who has gained the respect of intelligent men and the love of little children; who has never lacked appreciation of earth's beauty or failed to express it; who has looked for the best in others and given the best he had.—Mrs. A. J. Stanley.

Tea for Plants
Cold tea poured over the soil in which house ferns are planted acts as a tonic and revives even dying ferns.

REVISION OF NATION'S CRIMINAL CODE IS PARTLY APPROVED

WASHINGTON, D. C.—A drastic revision of the nation's criminal code, designed to unite a score of knots now hindering the movement of justice, stood partially approved Friday by the American Institute of Law.

Until midnight Thursday night debate over the voluminous "model code of criminal procedure," proposed as a result of four years' labor by institute experts, swayed pro and con among approximately 600 high justices, judges and lawyers, drawn from all parts of the country to the institute's eighth annual meeting.

Then, with 12 chapters still to be considered, a halt was called, the remaining provisions placed for study in the hands of a committee, and a vote upon them set for Saturday.

Among the approved recommendations were: The selection of extra jurors in protracted trials, to eliminate retrials because of sickness or death on a jury.

The elimination of jurors by the judge, rather than the opposing council.

Permission to defendants to waive jury trial in all but capital cases.

Issuance of a summons instead of a warrant of arrest in minor cases.

Provisions for admitting material witnesses to bail and for releasing such witnesses after taking their depositions in case bail cannot be given thus eliminating long jail confinement.

Provisions for prosecution by an information filed by the prosecuting attorney in cases which now must be prosecuted by an indictment of the grand jury.

Simplification of the form of indictment to prevent guilty persons from escaping conviction through errors in charging the offense.

Provisions for prosecution by an information filed by the prosecuting attorney in cases which now must be prosecuted by an indictment of the grand jury.

Provisions for prosecution by an information filed by the prosecuting attorney in cases which now must be prosecuted by an indictment of the grand jury.

THRIFT FASCINATION GROWS

By S. W. Straus, President American Society for Thrift.

On August 16, 1819, a deposit of \$10 was made in a New York savings bank. On the 20th of the same month the next year a deposit of \$5.00 was made. No other deposits have ever been made for this account. The original depositor never returned to claim his money. The account still stands but through the process of compound interest it has grown to more than \$2,700 or 180 times its original value.

An office boy on an errand lost merchandise worth \$110. Ten years later the boy found himself able to make restitution although it was not compulsory. He gave \$110 to the man whose merchandise he had lost. The amount really lost, however, was \$198.67 for that is what the \$110 would have become had it been invested at 6 per cent compounded semiannually. In fact, if the office boy had waited one year and 263 days longer it would have been necessary for him to return \$220 if he had taken into consideration the compound interest which the \$110 had earned.

The attention of the writer recently was called to the illustration of a Roman child's bank 1900 years old with this explanation: "One cent if saved in this bank and kept at 3 per cent interest compounded annually until now would amount to 24 sextillion dollars—24,000,000,000,000,000,000,000,000—more money than there is in the world."

If you can save \$90 a month during the next twenty-five years and invest the income at 6 per cent compounded semi annually you can then retire with \$61,975.

One continually is hearing stories about the fabulous accumulation of money through some brilliant scheme or lucky break but there are no financial fairy tales more absorbing than those based on the wizardry of compound interest. The piling up process may seem slow and prosaic at first but as time goes on we catch the spirit of the magic spell.

Thrift in theory is a dry subject but when it comes into our lives, enriching our hopes and giving point and purpose to methodical routine, we feel in it a tense and ever growing fascination.

MOTOR REGISTRATION FEES PAST 5 MONTHS TOTAL \$1,201,673.51

SANTA FE—Motor registration fees for the last five months, including December, have reached \$1,201,673.51, Nick Herrera, head book-keeper of the motor vehicle commissioner's office stated Friday. For the preceding year, all 12 months, they amounted to considerably less than a million.

The April receipts were \$54,177.95, and the March \$129,729.79. Last month was the first time they fell below \$100,000. The distribution of the March receipts gives \$7,692.97 to the motor vehicle fund; \$44,595.45 to the state road fund; \$20,498.81 to the county road funds; \$25,310.91 to the state general fund; \$30,310.91 to the county general funds. The April distribution will be out in a few days.

Copper Is Nonrustable

Copper cannot rust. It does not need the protection afforded by paint. On exposure copper assumes a light green color which serves not only as a protection to the metallic copper, but is fine appearing. If an immediate weathered effect is desired, an artificial finish may be used. This is applied at the factory.

Birthplace of Storms

The weather bureau says the general drift of the atmosphere in middle latitudes is from the west, and that in turn is owing to two things—the circulation of the atmosphere between the heated equatorial and the cooled polar regions, and the rotation of the earth from west to east. This is the reason why storms come from the west.

The fabled seven league boots moved 21 miles at a step. Out-of-town calls today are even faster and the cost is low. Telephoning saves sending several messages back and forth.

This Sturdy Chevrolet Six 1 1/2 Ton Truck \$520
f. o. b. factory, Flint, Mich. Complete with front bumper, full length running boards and rear fenders.

No matter what your business may be, bear in mind when you buy a truck that **it's wise to choose a Six!**

A six-cylinder engine runs smoothly—saving both the chassis and body from the harmful effects of vibration. It is more flexible in traffic. It requires less gear-shifting. And it maintains high speeds more easily.

The Chevrolet Utility Truck gives you all the superiorities of six-cylinder performance—for it is powered by a great 50-horsepower six-cylinder valve-in-head engine. And, in addition, it brings you all the advantages of modern design listed at the left.

Come in today and see this sturdy six-cylinder 1 1/2 Ton Truck. You can see for yourself why truck users are finding it's wise to choose a Chevrolet Six!

A body type available for every business need

Leading body manufacturers have developed, for the new Chevrolet 6-cylinder trucks, an unusually complete line of bodies available in various capacities, special designs and types to fit the needs of every business.

OIL LEASES ADD \$11,069.68 TO THE SCHOOL FUNDS

SANTA FE—Common schools and state institutions which have land grants—some of them—were \$11,069.68 richer Monday as the result of the monthly auction of oil leases held Saturday by State Land Commissioner Austin D. Crile in his office. Twenty-seven of the thirty-five tracts offered for sale were disposed of and that was the amount received.

There is a conflict over one tract. Both Mrs. Frances E. Nixon of Santa Fe and the Snowden-McSweeney interests bid \$1,205, the same amount for tract No. 23. They were given until Monday to try to work out an agreement. The highest bid was \$18.06 an acre for this tract.

Calling Cards, 100 for \$1.75, on best grade paneled or plain stock.—The Advocate.

FOUR FEDERAL AID PROJECTS MAY BE LET ON JUNE FOURTH 1930

SANTA FE—The state highway commission has set June 4th as a tentative date to call for bids on construction of four federal aid projects.

These projects will include a stretch of 16.3 miles on U. S. highway 666 between Shiprock and the Colorado line south of Cortez (F. A. P. 149). This will complete construction on the road between Gallup and the New Mexico Colorado line and will connect with a federal aid road in Colorado. This new construction should considerably increase the tourist travel between New Mexico and the Mesa Verde National Park in addition to opening up a large trade territory for Gallup and giving a much needed outlet to the Montezuma valley.

Federal aid project 147-G, which will be let at the same time will close up a bad gap of 7.4 miles in the Shiprock-Farmington-Aztec road. This will eliminate much grief caused by bridges washing out at the Vaughn and Shunway washes, which held up traffic for several days during the floods last summer. Also it will give a good highway across the Kentucky Mesa and cut out the dangerous hill west of Fruitland.

Federal aid project 106-A calls for paving 12.4 miles on the Alamogordo-El Paso highway near Orogrande. This will do away with the heavy road through the sand dunes between El Paso and Alamogordo and will give a high type of surfaced road for the entire 54 miles from the Texas line to Valmont.

The fourth project will be for reopening F. A. P. 131-A, for 1.4 miles between Carlsbad and the Cavern road. This will not only supply a high type surfaced road out of the Cavern City but will furnish safe and sound bridges across Hackberry draw and Dark Canyon.

drink a-bite-to-eat

Dr Pepper GOOD FOR LIFE!

5¢ at TEN-TWO & FOUR O'CLOCK

PURPOSES and BY-LAWS:

Purposes: (1) To repeal thirst; (2) To promote pleasure; (3) To spread goodfellowship; (4) To keep energy up.

Membership: Is limited to those aged not less than 3 nor more than 99 years; and to those of the white, red, yellow, black and brown races.

Dues: Are a nickel a throw, payable in cash at the bar as each drink is served.

Meeting Places: Club chapters are maintained at every soda fountain, hamburger stand or bottle bar in the city; same are designated by charter scroll or sign.

Rules: Only one rule must be strictly observed; i. e.; to "drink a-bite-to-eat" at 10, 2 and 4 o'clock each day.

PRIVILEGES and BENEFITS:

- To go "A. W. O. L." at 10, 2 & 4 without dirty looks from the Boss. (Show your card for Okey.)
- By special dispensation, card-holders, may drink not only at 10, 2 & 4 o'clock during the day, but also at hours 11, 12, 1, 3, 5, 6, 7, 8, 9 and 11 o'clock day or night (let your thirst be your guide).
- Permits "overweights" to satisfy sweet tooth without penalty of extra pound of flesh. (Gentlemen prefer both blondes and brunettes... slender.)
- Permits tired business men to entertain stenos without explaining to wife.
- Permits late night drinking without loss of sleep.
- Permits youngsters to drink all they want; can't hurt 'em.

HIGH SIGNS

10 o'clock, ten fingers; 2 o'clock, two fingers; 4 o'clock, four fingers. All "D. I. Spensers" and "Cap Pullers" will recognize the sign. It also helps deaf and dumb.

OFFICIAL BADGE

Wear this badge, to the inquiring wonder of every friend you meet. Great stuff with the switchboard operators and cigar girls.

MEMBERSHIP CARD

Cards and badges will be issued at fountains and bottle bars. Serves as a "pass" for going "A. W. O. L." and permits drinking at any hour day or night. In a pinch can be flashed as a "privilege card" before hard boiled cops.

Things WORTH KNOWING

Chicks of different ages should not be raised together. The older ones will crowd the younger; poorly developed birds will be the result.

Alfalfa should never be pastured the first year and only lightly the second. Over-grazing often injures a good stand.

Pasturing sheep on annual crops makes it possible to rotate pastures more frequently. This lessens the danger of infection by stomach worms and other parasites.

According to the bureau of dairy industry, it is necessary to remove cows from garlic-infested pastures 4 to 7 hours before milking to eliminate the garlic flavor and odor from milk.

Fleeces should be rolled up, not too tightly, skin side out, and tied with paper twine before shipping to market. Wool buyers prefer this method of tying to that done with wool boxes.

Young pasture grass should be grazed closely enough to keep the leaves growing and to prevent the development of heavy stalks. Such grass is richer in protein and soluble carbohydrates and is more readily digestible than older grass in which more stalks have developed.

The popular belief that the rattlesnake acquires a new ring each year and that the number of rings indicates its age is wholly incorrect, says the U. S. Biological Survey. A rattlesnake adds from 2 to 4 rings a year, usually one each time the skin is shed. The rattler seldom has more than 10 rings, because the terminal rings are worn down and broken off.

Milk production of dairy cows can not be increased above the normal by the use of any drug or combination of drugs, says the veterinarian of the Food, Drug and Insecticide Administration. When decrease of milk production is due to disease the use of a nostrum instead of proper treatment may prove exceedingly costly to the owner of a dairy herd.

Unlike the true clovers and alfalfas, sweetclover seldom causes bloat. However, during abnormally wet periods cases of bloating have been reported. To be on the safe side, do not turn cattle on sweetclover pasture when the sweetclover is wet. Even when it is dry, if the cattle have not been accustomed to it, fill them up with other feed before turning them on the sweetclover.

The cabbage worm, one of the worst pests of cabbage, can be controlled if an arsenical poison is applied as soon as damage is detected and before the worms become too abundant. Lead arsenate, calcium arsenate, and Paris green are effective poisons and may be applied either as a spray or as a dust. Arsenicals are safe to use until the heads of the cabbages are nearly formed, because the poison disappears almost entirely within 2 or 3 weeks after application. All outer leaves of treated cabbage should be removed before the cabbages are marketed or consumed.

The shipper of the succulent watermelon can prevent his produce from developing stem-end rot in transit by choosing only melons that are free from cuts and bruises and by re-clipping and treating the stems with a disinfectant paste as they are packed in the car. The paste can be bought ready made, or it can be made by boiling 8 ounces of blue-stone in 2½ quarts of water and adding 8 ounces of starch that has been dissolved in 1 pint of cold water. Practically all commercial varieties of watermelons are subject to stem-end rot, which is especially destructive in the southeastern states.

SAMBO'S PHILOSOPHY

PIONEER RESIDENT OF ROCKY ARROYA DIES SATURDAY MORNING

A man who was in this section of New Mexico, not only before there was a Carlsbad, but long before the town of Eddy, which was Carlsbad's predecessor, was born, died at 1:30 Saturday morning in his home at Rocky Arroya. He was James M. Campbell, a third cousin of the famous Robert E. Lee.

Mr. Campbell died at the age of 82. He was born in Jackson parish, Louisiana.

Surviving are 10 children. Six are in this section—Mrs. William Jones, Mrs. Frank Jones, Mrs. Raymond Shafer, and Sam, W. G., and Dillard Campbell. The others are Mrs. J. E. White and Mrs. M. D. Beddingfield of Tallman, Oklahoma; James L. Campbell of Tuttle, Oklahoma and C. R. Campbell of Goliad, Texas.

Burial was at Rocky Arroya at three o'clock Saturday following services conducted by the Rev. W. L. Blessing of the Carlsbad Christian church. The body was placed in a grave beside that of Mr. Campbell's wife.

Mr. Campbell came to this section about 1872 and with Rube Seagrist settled at Seven Rivers, then the only town in this entire section. Nearest to Seven Rivers was the old town of Lincoln. Both men came from Texas.

Always in the cattle business, Mr. Campbell went from Seven Rivers to near Lovington and from there to Oklahoma, where he settled again. In 1917 he returned to this section and made his home at Rocky Arroya.

Some of the well-known land marks of southeastern New Mexico were made by Mr. Campbell. He developed the water sources at the old Hess ranch, Tule Lake well, and the old Nelson ranch. He built what is known as the "old Graham place" near Lovington and dug the well there at a time when he was one of the few white men on the plains. In the days when both Indians and buffalo still were plentiful on the plains he sold his holdings near Lovington to John Hullum.

The buildings near Lovington were constructed of material freighted from Midland, Texas, in those days before railroads in the southwest. Mr. Campbell often told of how he freighted from Vernon, Texas, to 18 miles north of Chickasha, Texas, the material he used in building a 13 room house. The distance between these two points is 250 miles. The house and the barn that he built north of Chickasha are still standing.—Current-Argus.

Why suffer with corns, callouses, sore feet from any cause, when relief can be had by calling on Dr. C. A. Hullinger, Foot Specialist, Parker Rooming House, or telephone No. 32. Satisfaction guaranteed. 20-tfc

Garden

YOU can't find a pleasanter contrast to the confining duties of the office than gardening as an early evening pastime. And of course, it will be pleasanter if you have modern, efficient tools to work with. Our garden tools are the best made, and they're yours at prices that you will like.

BUFFALO AIDS HUNTERS TO ESCAPE DEATH IN AN OLD INDIAN RAID

How a buffalo helped a hunter escape possible death in an Indian raid is told by G. W. Shipman, of Artesia, pioneer rangeman and buffalo hunter. The sight of a vast herd of buffalo roaming the ranges of the staked plains of Texas was a common sight some forty-five or fifty years ago. Mr. Shipman along with adventurous souls found buffalo hunting lucrative as well as exciting long in the late seventies and early eighties. Among the first buffalo hunting expeditions Mr. Shipman joined, was one that came from Peas river in Texas to near where the town of Big Spring now stands. "There were four wagon in the hunt that invaded what is now the Big Spring country. Each wagon and crew in the expedition worked separately, but usually remained near together for protection. Indians who saw the white hunters depleting the supply of meat, resented the end roads of the hunters and an Indian attack at most any moment was not unexpected. An Indian raid was about the first thing that happened when the hunters made a run for Bull Creek near the foot of the Cap Rock and found a suitable place to make a stand. The long range of the buffalo guns proved too much for the Indians, who lost several of their number. The buffalo hunters only lost one horse.

At another occasion the hunters were surprised by an attack. They all managed to make a getaway, but Mr. Shipman, who was left afoot when his horse followed the other horses that were driven away from the Indian advance. Looking over the scene of his labors Mr. Shipman had an idea as he espied a large fallen buffalo. Jerking out his knife he ripped the inside out of the animal and crawled in. The Indians accompanied by two white men, evidently desperados rode near the dead buffalo several times, but never suspected the hiding place of the one that was left behind.

MRS. FRANCES NIXON WINS TRACT 23 LEASE

SANTA FE—Mrs. Frances E. Nixon was the successful bidder for the tract 23 oil lease, covering 80 acres in Lea county, at the state land office yesterday. The location is near the Hobbs field.

Mrs. Nixon and Snowden McSweeney both bid \$15 an acre at the monthly auction, held last Saturday, and so they were given a chance to bid again. Mrs. Nixon then bid \$25.10 an acre, while Snowden McSweeney raised their total bid \$30 for the 80 acres.

JOE MITCHELL DEAD

Joe Mitchell, age 58, land man for Snowden McSweeney, died at the Sister's hospital at Carlsbad, this morning at 7:45 a. m., according to word received here. While Mr. Mitchell has been ill for some time, his death was a shock to many acquaintances over the valley. Mr. Mitchell was well known among the oil fraternity.

The deceased is survived by a mother, brother and sister, all of Springfield, Illinois. Funeral arrangements are pending.

Ann—Mother, what's an old maid? Mother—An old maid, my dear, is a girl who looks before she leaps—and then don't leap!

CRILE TO BE CHIEF SPEAKER AT OIL MEN'S DINNER MONDAY NITE

Monday evening, May 19 has been set as a date for a get-together meeting and dinner of the New Mexico Oil Men's Protective Association. The place is at the roof garden of the Artesia hotel. Dr. Austin Crile, state land commissioner will be the guest of the association at this time and is expected to be one of the principal speakers on the program, following the dinner. A number of the executive committeemen and advisory board from fourteen towns and cities in New Mexico are expected to attend.

CHURCH COUNCIL MEETS

The regular monthly meeting of the members of the church council was held Wednesday afternoon in the Emerson home at the Ragsdale apartments.

W. A. Henry, the president of the council gave a very interesting and instructive paper on the minister and politics, which was appreciated by all present.

The motion was made and carried that each minister interview his congregation as to whether or not they would desire to enter a union Sunday evening church during the summer, that the matter may be settled at the next regular meeting in June.

RALPH WALDO EMERSON, Secretary.

BUS LINE FROM CARLSBAD TO CLOUDCROFT SOON

Doc Herndon of Cloudcroft, contemplates the inauguration of a bus line from Cloudcroft to Carlsbad, beginning June 1st, according to information brought to Artesia Tuesday by Messrs. E. A. Hannah and Ray Bartlett. Mr. Herndon plans to route the line through Artesia. He also plans to start the operation of a truck line from Cloudcroft to Artesia, beginning next Monday, it was understood.

Messrs. Hannah and Bartlett made the trip from Artesia to Cloudcroft in three hours and forty-five minutes, lapsed time. They report the new road from Mayhill up James canyon into Cloudcroft in excellent condition.

SANITATION OF JAIL GIVEN OK

Dr. O. E. Puckett, county health officer, gave an OK to the sanitation of the jail after an inspection Tuesday. Better watch your step now since Artesia has cleaned up the jail, or you may get a chance to inspect the interior of the building for several days.

HANNAH REAPPOINTED P. M.

The reappointment of E. A. Hannah as post master of Artesia, has been confirmed by the United States Senate, it was learned here yesterday. The reappointment of Mr. Hannah is for his third term. This week he starts on his twenty-first year in the postal service of the Artesia community and no gray hairs yet. A remarkable record for any man serving the public.

Enthusiasm

The enthusiasm that lifts us as an eagle's wings makes for joyous service. The ability to run, to press forward unweariedly in the chosen course, makes it easy. But to walk day after day, only able to trudge along the right road slowly, while the victors with wings sweep above us, and the strong runners dash by us toward the goal, leaving us far behind—this is hard to keep courage, press forward and not grow faint-hearted may at last be the greatest victory of all.

EASTERN NEW MEXICO TOWNS SHOW GAINS IN THE 1930 CENSUS

H. A. Ingalls, supervisor of the census for the fifth New Mexico district has returned the population reports of a number of towns and cities in his district. These are as follows:

	1930	1920	Inc.
Roswell	11,240

SECOND NOTICE TO ALL BALL PLAYERS

I would like to see every ball player in and around Artesia on the diamond Friday afternoon at 5:00 o'clock, if you wish to play on the team this year.

LINELL.

WHY

A Lucky Stroke of Fortune Is Called a "Bonanza"

A large bequest unexpectedly left to us, a surprising and profitable turn of business, almost any stroke of good luck; that is what we are justified, according to the current use of the word, in calling a "bonanza."

And what a colorful story this word contains in its syllables. The very sound is intriguing and brings to the mind visions of the pioneers of the West and the struggle of those who with pick, shovel and other crude implements undertook the development of the great mineral resources of the United States.

The word "bonanza" itself, however, we get after the famous silver mine in Nevada known by that very name. The Bonanza was for long considered a hopeless failure. Suddenly a rich vein was uncovered, commencing a turn in the fortune of its backers which produced immense wealth for them.

Subsequently this chain of events occurred so frequently in the state of Nevada that it became known as the Bonanza state, after its rich bonanza mines.

Why Ideas About Lucky and Unlucky Days Differ

The scarcity of marriages on Friday proves how many people still have a lingering faith in the ill-luck of the sixth day of the week. There never was a more foolish superstition, and Friday is certainly not England's unlucky day, says an article in Pearson's Weekly. It is a funny thing that sailors are more superstitious about Friday than landmen, yet it is the lucky day of the British navy. The great defeat of the Spanish Armada occurred on Friday, July 29, 1588, and since then at least a dozen of our greatest naval victories have been won on Friday. What, then, is the worst day of the week? If you ask a tradesman he will probably say Tuesday, and in the telephone department of the post office, which is a barometer of both business and pleasure, Tuesday is looked upon as less harassing than other business days. Not long ago Lord Ashfield pointed out that Londoners travel less on Tuesdays than on any other day of the week. The only important people who dissent from this view are theatrical managers, who declare that Monday is their worst day.

Why Windows Steam

One of the main causes of the steaming of windows is lack of proper ventilation. The main thing is to insure a circulation of air. The application of gelatin is often helpful. Wipe down the windows with a rag squeezed out of gelatin, or use a soft potash soap to which sufficient glycerin is added to make a thin paste. When a thin film of either of these is applied to the glass the condensed moisture spreads out to a film and does not collect in fine drops, which cause the dimming of glass.

Why Cord About Arm

The wearing of a cord looped about the left arm and fastened at the shoulder is a French military decoration, presented to a unit of troops for distinguished service or conspicuous gallantry in time of war. It is worn by all the men of the troops thus honored and borne on the colors. Fourrageres are in three colors, red, green and yellow, corresponding to the color of the ribbons of certain French military medals. Combinations of these colors are used to form the double fourragere.

How Bee Finds Its Way

The bee finds its way home by its sense of direction. When it leaves the hive it circles around and then flies off. Each hive has its own odor which helps the bee to identify its hive.

Announcement Cards, blank or printed—The Advocate.

HEALTH NEWS

The health department has completed the drive for immunization against diphtheria, with toxin-antitoxin, which we started in the fall. We have given 1,833 children three doses, which renders a large percent of these children immune to diphtheria. The physicians of the county have given some 300 or 400 children their three doses, so between 2,000 and 2,500 are protected. We advise all mothers that have not had their children protected to see to it soon. All children should have this protection at about 9 months of age. 750 have been successfully vaccinated against smallpox. Several schools, of the county, have been 100% successfully vaccinated against smallpox.

DR. O. E. PUCKETT, County Health Officer.

LOCALS

Miss Alice Boyer leaves Saturday for her home in Wilda, Kansas and Miss Esther Melvain for her home in Missouri.

Mrs. E. N. Bigler and daughter, Miss Ruth expect to leave Sunday for a visit with her mother, Mrs. Edward Spitz, in Albuquerque.

Mrs. J. C. Floore and J. C. Floore Jr., of Carlsbad, left Monday morning for a fortnight trip to Texas, during which time they will visit a brother-in-law of Mrs. Floore at Ft. Worth and her mother and brother at Jacksonville.

Joe Richards, Mr. and Mrs. John Richards and Mr. and Mrs. Albert Richards drove over to Corona Sunday to see their brother, Lum Richards and family. They were accompanied home by Mrs. Lum Richards Jr., who will visit here a week or ten days.

Mrs. Nellie Rowan and two sons, John and Fred, of Powersville, Missouri, were here last Friday visiting at the home of her brother-in-law, Beecher Rowan. They are traveling through the west for the health of one son and may locate in this section somewhere.

Mr. and Mrs. Walter Douglass, Mr. and Mrs. Leon Barker, the Misses Mary McCaw and Ethel Smith and Elvy Barker and Harold Duncan drove up to Sitting Bull Falls in the Guadalupe Sunday and had a picnic dinner and spent the day. This beauty spot in the mountains is becoming better known and quite popular the last year or so.

Mrs. M. E. Bullock, who has been with her daughter, Mrs. W. A. Hemphill, in Ft. Worth, Texas the past winter, is expected home the last of the week. Mr. and Mrs. Hemphill are bringing her home and will visit at the home of E. B. Bullock before leaving for Chicago. Miss Helen Bullock is also expected to come home with them.

Quick Cure for Obesity

As Falstaff, Sir Herbert Tree wore a rubber suit, which was blown up like a bicycle tire for the enormous size necessary for Falstaff, writes Constance Collier in "Harlequinade: The Story of My Life." It was a continuous duel between Ellen Terry and Herbert Tree as to who should get the better of the other. They would think out elaborate jokes. But one day the joke went too far. Ellen Terry took a hatpin and stuck it into Tree's enormous belly at the beginning of a long scene. Falstaff slowly began to deflate, and when the scene ended he came off with his clothes hanging in festoons around him. Ellen Terry was nowhere to be seen. She had locked herself in her dressing room.

Sophisticated Boyhood

It may be the age in which we are living that is responsible. You can't tell. But in the light of observation the sophistication of the nine-year-old becomes an actuality.

Witness the following:
A window display of a tire house. Toy automobiles scooting around at an amazing speed. Crowd composed almost entirely of adults peering with obvious amusement.

Two urchins approach from the background. One of them elbows his way to the front. The other is not so successful.

"What is it?" yells the one from the back.
"Aw, just a tire advertisement," says the other with disgust.

Diseases of Goldfish

Fungus diseases often attack the goldfish, sometimes so severely that there is nothing to do but make a fresh start. One remedy for the disease is a salt bath, using a heaping teaspoonful of salt to two quarts of water. The patient should be left for about a week in this solution, which is renewed daily. If no noticeable improvement is shown in four days, increase strength of solution to about double, leaving the fish in this for two days. Then reduce the solution to its original proportions after which the fish may be returned to the aquarium.

Typewriters for rent at Advocate.

HEAVY VOTING IS ON TODAY IN EDDY CO. DEMOCRATIC PRIMARY

Indications today point to a heavy vote in the democratic primary. Considerable interest has been developed during the closing days of the campaign and this fact will no doubt bring out many voters, who did not intend to participate in the event. Conservative estimates say that at least 2,700 votes will be cast in Eddy county today. Carlsbad is expected to vote 1,000 while Artesia will probably cast around 700 votes.

It is doubtful if the number of ballots printed will be sufficient to go around to all of the voters unless they are re-apportioned in the respective boxes.

A hot fight is on in the district judge's race of Chaves county, which is also holding a primary today. Unless some surprises develop, Eddy county will poll more votes than Chaves, in proportion to the population. Political forecasters here say that a close contest may be expected in the sheriff's race, the county clerk's, the county superintendent of schools and the commissioner's race of this district, while J. C. Gilbert of Roswell was given a slight edge over his opponent G. A. Richardson also of Roswell for district judge in Eddy county, but Chaves county is expected to go for Richardson.

Heavy voting is underway in all parts of the county, as we go to press today, according to reports. At the present rate Eddy county will poll the biggest primary vote in its history. A rush order was given the Advocate this morning to print an additional 600 ballots after the apportionment had begun to run low in two or three boxes.

A number of candidates are spending the day in Artesia and many cars are being operated to and from the polls.

Bath Every Six Months

Sufficient for Monks

Rules for bathing in the Benedictine monasteries of the Fourteenth century have been discovered at London, England, in the regulations of St. Augustine's, Canterbury and St. Peter's, Westminster.

Monks were allowed to take baths twice a year—before Christmas and Pentecost. Previous to the Fourteenth century, four baths were allowed annually, but this number was cut in half because bathing was considered a luxury except when necessary for the sick.

Only four monks could bathe in one day, so it took more than two weeks to accommodate the sixty monks in the monastery. No baths were allowed on Sunday.

The monks had servants to wash them. At Westminster these servants received extra food and beer on "bath days."

The baths were taken sitting in a tub, instead of standing, as was probably the secular custom at the time. Monks were not allowed to stay in the baths to "soak" after they had been washed.

At first, bathing was conducted in complete silence, but "that good custom has been entirely abandoned in these modern times" of the Fourteenth century.

World's Largest Telescope

The observatory on Mount Wilson, in California, was built at a cost of \$22,000,000 and houses the world's largest telescope, the instrument having a reflector 100 inches in diameter.

SCOGGINS

Rev. Harold G. Scoggins, J. E. Robertson drove to Las, Texas to attend the conference of the Methodist South, returned to Artesia today evening. Leaving Monday afternoon he witnessed a tremendous rainfall in West Texas accompanied by winds.

Mr. Robertson being at the conference is still in Dallas and will not return for several days. Rev. Scoggins announced he intends to bring the conference progress to Artesia. The morning sermon at Episcopal address and a review of the tasks before the conference.

While away he was attending in the Methodist Denton, Texas to a convention made up largely from the two colleges. Pecos valley is in a perilous condition of drought.
