FOR HEALTH AND HAPPINESS

The Boston Tuberculosis Association is recommending the following as "Ten Golden Rules of Health for Everyone!" They are simple and very much to the point and we are glad to pass them on: 1—Eat slowly. 2—Be cheerful. 3—Brush your teeth daily. 4—Learn something each day—do your best. 5—Avoid contagious diseases. 6—Keep clean—body, clothes and mind. 7—Always cover a sneeze or cough. 8—Drink at least four glasses of water daily. 9—Sleep eight hours in a well ventilated room. 10—Play hard and fair. — The Brick Kiln.

COMMISSION ASKS COURT TO RESEND EXTENSION ORDER

The State Tax Commission, thru Attorney General E. K. Neumann, and J. D. Mell, special tax attorney, Monday filed a motion in Chaves county district court at Roswell asking the court to set aside an order made at Roswell on November 30, extending the time for payment of the first half of 1931 taxes 60 days. This motion alleges that the order made by Judge Richardson is void because the court has no jurisdiction to extend the time for the payment of taxes or to abate interest or penalties as provided by the laws of New Mexico. The motion further alleges that if the order is allowed to stand it would seriously affect the collection of current and delinquent taxes and if similar orders are issued in other counties the closing of schools in various counties would result. Upon application of a number of persons Judge Richardson on November 30 signed an order extending the time for the payment of the first half of 1931 taxes, 60 days, from December 1 to February 1.

LOWER COTTONWOOD WINS RURAL SCHOOL EXHIBIT HONORS FRI.

At a Rural School Exhibit of arts and crafts held at Carlsbad, Friday, Lower Cottonwood was well represented. Faculty and patrons of the school are very proud of the work the pupils are doing. ### GASOLINE TAX TO FALL SHORT VOLUME '30

SANTA FE—Indications are that the 5-cent gasoline tax for this year will fall less than \$75,000 under the high mark of \$2,743,083.83 set for 1930, State Gasoline Tax Collector Adolph P. Hill stated Saturday.

For the first eleven months of this year collections amount to \$2,459,694.61, including \$223,245.87 for November. While that is \$283,389.22 under the 1930 total the December collections yet remain to come in. For December 1930, they were \$225,130.92; but they are expected to be lower this December.

### COTTON FORECAST IS 16,918,000 BALES

WASHINGTON, D. C. — This year's cotton crop was estimated Tuesday by the department of agriculture at 16,918,000 equivalent 500-pound bales, based on conditions existing December 1. A month ago the estimate was 16,903,000 bales. Last year's crop totaled 12,837,099 bales.

The indicated yield of lint cotton was placed at 200.1 pounds, per acre, compared with 217 pounds last year.

Revising its estimates on this year's acreage, the department placed the area in cultivation July 1 at 40,954,000 acres, the abandonment having been 1.1 per cent after July 1.

Production by states included: Texas 5,270,000 bales; New Mexico 98,000 and Arizona 119,000.

### NOVEL ROADSIDE WEED CUTTER WORKS WELL

SANTA FE—Roadside tumbleweeds and sun flowers—a problem to highway maintenance men in late summer and fall—have been subdued.

D. W. Jones, highway patrol foreman at Clovis, in combating these plants, adopted a unique apparatus for their destruction. The tumbleweeds were too green and sunflowers too tall to burn, and the problem before Mr. Jones was to find some means of dislodging the former and cutting down and breaking up the latter so both would dry out and burn. Jones solved his problem by rigging up a combination of old grader blades which he hitched behind a truck. Two sets of cutting edges were attached to a boom which extended seventeen feet out from the center line of

the truck. The first set of blades operated on the crown lines, slopes and ditches, while the second set was designed to reach the back slope and some of the weeds beyond it. The arrangement was very combative where the weeds were thick and heavy.

Twenty miles of shoulders and ditches were covered the first day. The same 20 miles were covered in the opposite direction the next day. The average speed was seven to ten miles per hour with the higher speed more effective.

### EASY CREDITS ARE HARD TO CARRY

Many a bank customer has profited by the refusal to loan him money for certain enterprises. Every banker has had customers say: "It's a good thing you didn't loan me all the money I wanted on that deal."

A loan that can't go right out and earn a profit isn't a good loan for the borrower or the bank either, because it's a load that has to be carried and interest paid on it.

A banker should as far as he can guard against over-borrowing; yet many times he has opportunity to encourage borrowing, and to suggest to the borrower how the additional loan will increase the opportunity.

Your banker is not a seer nor a prophet, nor does he pose as having "inside information." But often he does have opportunity to know of movements or facts which affect your business. He is always glad to discuss with you any matter concerning your business—for his business success is dependent upon the business success of his customers.

After nineteen years of statehood, New Mexico and the state capitol is classed as part of Old Mexico in the minds of some tourists. The Santa Fe New Mexican relates an incident where a lady tourist refused two silver dollars from a postal clerk in Santa Fe, saying she did not want any Mexican money. The silver dollars did look a bit strange, one was made in 1882. However, we would insist that a tourist so ignorant of her geography, should be sent home and made to brush up a bit on the geography of the U. S. A.

Two ladies recently entered suit for the death of their husbands. One asked \$15,000 and one \$17,000. We wonder in this connection how many times the deceased had been told how worthless they were.

A head line says 5,000 bills were pending before the national congress at the opening of the session. This number will look insignificant when the boys really get down to work. How much longer will they tell us ignorance is no excuse for breaking the law when they pass about a million new laws every year.

We got cussed our four times last week for things we had in the paper, so that shows we are not entirely dead. Human nature

is funny, there was not a word said about the most expensive piece of news we've published this year, but let some little trifling incident or omission occur and see how quick some reader rars up on his hind legs and starts giving the paper hell.

While the mania is going the rounds for more organizations, why don't the pessimists form a quitters society, so they can twittle their thumbs and bellyache to their hearts content, until the depression is over.

Dr. Loucks has made application to the State Game and Fish Commission to open the duck season on his private lake just east of his garage.

Georgette: "When did they first get the idea of using busses for transportation?"

George: "When Brigham Young went on a honeymoon."

Gold Digger I: "Would you marry for money, Dearie?"

Gold Digger II: "I don't know, but I have a secret wish that

Cupid might shoot me with a Pierce-Arrow."

Grandma: "Oh, Jenny, darling, I am surprised. Arn't you going to give your brother part of your apple?"

**CAMELS are FRESH!**

**THE** bedrock of Camel popularity is the inherently fine quality of the tobaccos that go into our cigarette.

These tobaccos are notably mild, full-mellow, delicately flavored by nature—the finest Turkish and mild, sun-ripened Domestic tobaccos that money can buy.

To safeguard the essential goodness of these fine tobaccos we exercise every care to conserve their natural moisture and natural flavors.

They are never parched or toasted—the Reynolds method of scientifically applying heat guarantees against that.

That's why we say Camels are *made* fresh to start with—and why the Camel Humidor Pack can bring them *fresh* to you, in prime smoking condition.

If you want to know what a blessing that means in unalloyed smoke-enjoyment, switch to Camels for just one day—then leave them—if you can.

**SELIGMAN HAS NOT CHANGED HIS MIND ABOUT OIL EMBARGO**

**SANTA FE**—Governor Arthur Seligman of New Mexico wants President Hoover to advocate legislation empowering the president to declare an embargo on oil importations when conditions warrant.

In a letter to the president Tuesday, Gov. Seligman points out that the president's support of such legislation "would be an important factor in aiding the oil states to establish the price and production of oil."

The governor's letter follows: "On behalf of the governors of the several oil states who joined with me in my telegram to your excellency dated September 25th relative to either an embargo or tariff on the importation of crude oil, we wish to acknowledge receipt of your esteemed letter of September 26th in response to said telegram.

"Since you find that existing laws do not permit you to place an embargo on foreign importation and since we have not heard from the tariff commission to whom you referred our first appeal, it appears that it will be necessary for the governors of the oil producing states to carry their fight to congress to obtain the necessary remedial legislation. Your advocacy of legislation empowering you to declare an embargo on oil importation under conditions such as now exist would be an important factor in aiding us to stabilize the price and production of crude oil. We believe in addition to an act authorizing you to declare such embargo when conditions warrant, we should have a substantial tariff on imported oil and its products. Perhaps the tariff would give us the relief we desire so it would not be necessary to invoke the embargo.

"Governors Clark of Wyoming,

Sampson of Kentucky, Erickson of Montana, Long of Louisiana, Sterling of Texas, Parnell of Arkansas, Pinchot of Pennsylvania, Woodring of Kansas, Murray of Oklahoma, White of Ohio and Adams of Colorado again join me in this appeal. May we have your assurance of support of this legislation when presented."

that the entire expense of the primary is borne by the candidates.

Democratic leaders here generally expressed disapproval of the suggestion to abolish the primary system, altho some admitted when questioned by an Advocate reporter that they had given the matter no thought. There is some sentiment connected with abolishing a time honored custom, which admittedly expresses the will of the people more satisfactorily than any system yet devised.

Some fear that the convention system might give rise to corruption and that even tho the primary system was abolished only temporarily, the chances are that it would never be reinstated.

**SCHOOLS CLOSE TUES. FOR REMAINDER WEEK**

Superintendent W. E. Kerr announced Tuesday evening that the city schools would be closed for the remainder of the week. A decision was reached to close the schools on account of the muddy roads and inclement weather. As many of the community roads are practically impassable and since a large portion of the school population or about 225 pupils live in the rural district, it was thought best to close the schools and make up the lost time next spring.

**TEMPERATURE ARGUMENTS**

Readings of the government thermometer, stationed at the residence of Weather Observer R. W. Bruce, caused considerable comment over the week-end incidentally some argument. The thermometer so arranged as to catch and record the high and low readings of a twenty-four hour period, registered 7 above Thursday morning and 8 above Friday morning, Saturday morning it registered 2 below. Apparently there was a great deal of difference in the temperatures on Thursday and Friday mornings, altho the thermometer actually showed that Friday morning was warmer than Thursday, a peculiar situation that the folks could not understand.

**LINDY W. HOWELL CALLED BY DEATH**

Lindy W. Howell, aged 70, and for the past thirty odd years a rancher in the Lakewood terrain, died Tuesday afternoon at the home of his daughter, Mrs. Fanning, in Carlsbad.

Funeral services were held yesterday afternoon at 2:30 at the Thorne chapel in Carlsbad, with interment at the Carlsbad cemetery.

Mr. Howell leaves besides his widow a family of five daughters and two sons, all grown.

**6,000 BILLS PUT IN POLITICAL STEW POT**

WASHINGTON, D. C.—Material for the legislative struggles of the new congress was augmented yesterday with the introduction of bills to carry out President Hoover's emergency economic program.

Accompanying them, went other relief measures to which the chief executive opposed.

The contest for direct federal appropriations for unemployment relief, likely to be one of the bitterest of the season, was opened by Mr. Hoover's political opponents.

Senator Watson, of Indiana, republican leader, introduced a bill to carry out the president's recommendation for creation of a system of home loan banks; Senator Steiwer of Oregon sponsored his loan plan for refinancing land banks and Senator Walcott, of Connecticut, his proposal for setting up a reconstruction finance corporation.

Senator Norris of Nebraska, the republican independent leader, also introduced a bill to authorize a bond issue of \$3,000,000,000 for road construction as a relief measure.

The administration bills were along the lines outlined by the president in his message to congress.

The LaFollette and Costigan bills were similar in that each proposed to disburse federal funds thru the states.

Costigan's bill would appropriate \$125,000,000 for the current fiscal year and \$250,000,000 for the next fiscal year ending June 30, 1933.

LaFollette proposed to spend \$250,000,000 in helping states, municipalities and other governments meet their needs during the winter and spring.

He said the \$250,000,000 figure fixed by the bill was the "probable minimum of urgent need" and might have to be increased.

Other measures among the more than 6,000 that have already accumulated in the house and senate included:

By Senator Bookhart, republican Iowa—to abolish the gold standard and fix the value of the dollar.

By Bookhart: To give the farm board power to use the equalization fee.

By Bookhart: To prohibit short sellers of stock or agricultural commodities from using the mails or engaging in interstate of foreign veterans to receive loans on their service certificates immediately upon issuance with no interest charge.

Representative Selvig, republican, Minnesota—an appropriation of \$2,000,000 to fight grasshopper plagues.

Representative Carter, republican, Wyoming—to authorize expenditure of \$500,000 for a storage and diversion dam on the North Platte river.

Senator Bingham, republican, Connecticut—to change the definition of intoxicating liquor to permit beverages containing four per cent alcohol.

Senator Hawes—to put all prohibition agents under \$10,000 bond to cover possible damages for trespass, injuring or killing someone or damaging property.

**Irish City of Galway Linked With Columbus**

One of the most fascinating of Irish towns is Galway, capital of Connaught, famous for the pride of its merchant princes and its fishermen from the Twelfth century; and traditionally linked with America. For the legend is that Christopher Columbus visited Galway before setting out on his voyage and attended mass in the Church of St. Nicholas, founded in 1320 by the Normans, and in use today.

Here Columbus is reported to have met Rice De Culvey, a Galwayman, who joined Columbus' men as a sailor, so that it was early known in Galway that the expedition had been a success, and St. Nicholas' bells rang out to celebrate the discovery of the New world.

Galway had a monopoly of Spanish trade in those days, and the arched doorways and patios of Galway houses still remain an evidence of Spanish influence.
