Stanton Leaves Trail Stolen Cars Before Captured—Was In Artesia

Ed (Perchmouth) Stanton, convicted slayer of Sheriff John Mosley of Swisher county, Texas, passed thru Artesia during his stolen freedom, after he broke jail at Lubbock, Texas, last June. A story told a staff correspondent of the Amarillo News by Stanton while in the Swisher county jail, reveals that he traveled from Texas to California and left a trail of stolen cars and petty thefts until captured near Thermo, last week.

Stanton probably came thru here a few days after he was reported seen at Reeves hill. His story told the Amarillo newspaper man is in part as follows:

"It's the same old story," Stanton said. "Whiskey and women caused our apprehension."

"If Nelson had not tarried in Thermo for a date with a girl friend and if I had not been drinking, we probably still would be at liberty," he added.

Andrew Nelson, who escaped with "Perchmouth" was apprehended near Thermo.

Stanton, Nelson and two others were in the Lubbock jail break. For two days, according to Stanton, they cruised about in a car taken from a Lubbock justice of the peace.

"On the second day, Bill Doupe drove the car off a steep embankment around Buffalo Gap below Ahilene," Stanton said. "It caught fire at once and my eyebrows were scorched off in getting out. We walked six miles and stole another car from a farmer's yard."

"We were in and out of Fort Worth and Dallas, but on the fifth day we ran out of gas," he continued. "Stevens, under cover of darkness, went to a farm house to steal gasoline. We waited and waited, but he never came back. South of Dallas we got into an argument about which way to go and Doupe quit us right in the middle of the road."

Stanton said that he and Nelson went into New Mexico by way of Snyder and headed into Artesia.

"We ditched the second car when we had two blowouts at the same time. We stole an old car near a Mexican's shack and drove it until we could get a better one to go into Silverton, Colorado, on into Nevada, Oregon, Utah, and California. We had car trouble again in California and picked up a new machine."

Stanton claimed he had a great time at Eagle Nest Lake and at Taos, where he stood and watched Texas officers search for him across the street.

"I sat beside Amarilloans at Eagle Nest dam and fished," he declared. "I saw lots of people I knew and it sometimes was puzzling that they didn't recognize me. I hung around some night clubs and whenever money was low we robbed the slot machines, stuck up out of the way filling stations, and small stores."

Stanton claimed he was asleep in a rest room at Thermo when he was captured.

"I was awakened to find six guns pointed at me and didn't have a chance to run—that's what I wanted to do," he said.

In California, Stanton said, he wanted to go to British Columbia. "But Nelson had some business to take care of in Texas and I agreed to come back after he promised to head again for the northwest," Stanton said.

"Boots" Fletcher, sheriff of Raton, captured Stanton and Nelson.

BRUCE GETS M. A. DEGREE

BOULDER, Colorado—James Clark Bruce of Artesia Saturday received the degree of Master of Arts in the annual commencement program of the University of Colorado summer session. Over 150 degrees were awarded.

The commencement address was given by Charles E. Clark, dean of the Law School of Yale University, who spoke on "Law and Its Modern Uses." Dean Clark was an instructor in the School of Law of the University of Colorado this summer.

FILED FOR RECORD

In the District Court:
No. 5816 In the Matter of Petition of K. A. McLachlin, et ux. to adopt Norman Gelhauser.
Warranty Deeds:
John R. Hodges, R. B. Russell, L. 3, 4, 5, 6, B. 5, Morning Side Addition.
T. O. Wyman, J. H. Reid, L. 5, B. 14, Loving.
Marriage Licenses:
Lester T. Sims and Jonnie L. Douthitt, Roswell.
Lester Rockwell and Frances Prince, Lubbock, Texas.
Jimmie Cockrell and Hazel Kimbrell, Lubbock, Texas.
G. T. Smart, Fort Worth, Texas, and Eunice Wulfman, Lubbock, Texas.

PROJECT FARMERS TO VOTE ON RESERVOIR

Friday, land owners of the Carlsbad project will vote on the construction of a dam site at Alamogordo creek. The project to cost not over \$2,500,000 will also include cementing portions of the main and lateral canals.

FRUIT GROWERS BENEFIT FROM NEW TEST FOR LEAD

Fruit growers, shippers, and others vitally concerned with the problem of removing the residue of lead left after spraying for insect control will find this season that they can save both time and money in the testing of the fruit after washing to determine whether the lead has been effectively removed.

Since the last shipping season H. J. Wichman and associates in the food control laboratory of the Federal Food and Drug Administration have developed new methods to determine quickly and cheaply the exact quantity of lead residue on fruits. Food officials require that the lead be removed to a point of absolute safety from the public health standpoint.

By this new method a chemist can make 10 times as many accurate determinations in a day as he could make in 3 days by the old test. The new test method produces results in about half an hour. The old method took 3 days. The apparatus is simple and the tests will be less expensive. Furthermore, a commercial chemist will be able to report results to the owner of the fruit so promptly that if a certain chemical wash is not cleaning the fruit efficiently, only a half hour's output will have to be re-washed. The old 3-day method frequently interfered with the orderly movement of shipments when suspected lots had to be held until the test was completed.

The new test is also being employed by federal chemists in connection with regulatory control of sprayed fruits under the federal pure-food law. Food officials point out that the rapidity of the new test makes for greater public health protection thru the opportunity now open for testing a considerably greater proportion of fruit entering the channels of commerce than has hitherto been possible.

HOPE ITEMS

Frances Johnson, Reporter

Mrs. Luther Trimble of Roswell spent Sunday here visiting her sister, Mrs. Bonnie Altman.

Mrs. Raymond Lovett of Dexter is spending the week here visiting her mother, Mrs. Irvin Wathen.

Maxine Bunting returned Sunday from Camp Mary White where she has been with the Girl Scouts the past two weeks.

Aubrey Keller left Thursday for his home in Ventura having spent several days here visiting his parents, Mr. and Mrs. Will Keller.

Elsie Dell Beckett left Sunday for her home in Canoga Park, California, having spent the past two months here visiting her grandparents, Mr. and Mrs. D. Swift.

Mrs. E. A. Taylor and children left Saturday for Plainview, Texas, where they are visiting her mother, Mrs. G. W. Trimble, for a week.

Kenneth Goddard returned the first of the week to his home in Las Cruces after spending a week here the house guest of Mary Louise Cole.

Mrs. Sam Ward of Brunswick, Georgia, arrived here the latter part of the week to visit her sister, Mrs. W. S. Medcalf, for several weeks.

Helen Watts returned to her home in Roswell Saturday having spent several weeks here visiting her aunt and uncle, Mr. and Mrs. Bonnie Altman.

Mrs. Charley Hardin and daughter Alma Lois left Sunday for Oklahoma City where Mrs. Hardin will be this week under medical treatment. They expect to return home Saturday.

Mr. and Mrs. Tom Young of Estelina, Texas, are here visiting his parents, Mr. and Mrs. T. E. Young. They plan to leave soon for California where they will make their home.

Mr. and Mrs. Raymond Davenport and small son Edgar left Sunday for their home in Wichita Falls, Texas, having spent the past six weeks visiting her parents, Mr. and Mrs. Ed Watts, on the Watts ranch.

Venice Baker and Mrs. Lois Reed of Houston, Texas, spent Tuesday evening and Wednesday visiting Mrs. N. L. Johnson and family. Miss Baker formerly lived at Hope and will be remembered by many of the old timers.

Miss Hilda Kletke of Morino Valley arrived here Sunday and has been employed to teach in the Hope public schools this term. Miss Kletke attended summer school at the Alva Teachers College in Alva, Oklahoma, and was the supervisor of arithmetic in intermediate grades in Alva.

Mrs. Harold Merhens and children left Sunday for Portales where they will meet Mr. Merhens who has been attending summer school in Los Angeles the past two months. Mrs. Merhens and children have been visiting her parents, Mr. and Mrs. D. Swift, here this summer. They will make their home in Portales this winter where Mr. Merhens will be an instructor in the Portales Normal.

CELEBRATE OPENING HIGHWAY TO NAT'L MONUMENT SEPT. 3

All roads from New Mexico should lead to the Chirichau National Monument just 45 miles west of Lordsburg on Labor Day. One of the most pretentious programs ever offered in the southwest has been arranged to celebrate the opening of a new federal highway into this spot of remarkable beauty. This program will be featured by speaking in which Honorable Joseph Casey of San Francisco will be the principal speaker. Mr. Casey comes as a special representative of President William Green of the National Federation of Labor. In addition to Mr. Casey, Governor Mouser of Arizona, Senator Henry F. Ashurst and Congressman Isabella Greenway will be the other speakers.

The outstanding feature of this celebration will be a free barbecue. Thirty carcasses of beef, one thousand pounds of beans, 1500 loaves of bread, 150 pounds of coffee are the main features of the menu. These will all be free and the fact that the barbecue is in charge of Lawrence McDonald who has the present record of conducting the largest barbecue ever in the southwest guarantees the quality.

The new road which this celebration opens has been constructed by the federal government at a cost of \$350,000. It opens to the motorist a new unit in the National Park system. The Chirichau National Monument is admittedly one of the most novel areas on the continent. It is a field of fantastic rock forms. There are balanced rocks of thousands of tons weight standing on a pedestal of a few inches but as they have been standing thus for centuries they are still safe for the crowd.

This road leads from the bottom of the mountain by easy grades for a distance of 7 miles to the top. No grade exceeds 7 percent. The road is 22 feet wide at all points and there are no sharp curves. It will be oiled and free from dust, thus it may be asserted that it is safe for all drivers of cars.

New Mexico highway patrol superintendent has promised to be present to help handle the traffic. It is expected that there will be a large number of New Mexico people there to share the barbecue.

SCOUT NEWS

The Cub Movement

The "Cubs" is a leisure-time, character-influencing movement for boys of pre-Scout age—boys of 9, 10 and 11 years.

It provides activities suited to the nature of the boy—which activities also afford opportunity for the development of habits and attitudes essential to good citizenship.

It does not aim to draw a boy away from his home for his good times, but seeks definitely to multiply the ways in which a boy may find joy in his own neighborhood and backyard.

It therefore offers to parents activities which their boys may do. It helps a parent answer the question of "what can we boys do?" by aiding the boys to answer the question for themselves. The program answers that question. Therefore it will help parents meet their responsibilities.

Like scouting, it is used alike by all religious groups, all economic groups, all racial groups. Similar movements alike in spirit and world friendliness, though differing in program details, are found in 26 different countries of the world.

How the Program Started

The Cub program has been organized along scientific lines by the Boy Scouts of America in response to a call and demand from parents and churches and schools in various parts of the United States.

The National Council of the Boy Scouts declined to undertake the work a decade ago following the first training conference of Scout executives, because they felt it was not wise to undertake a new program until they had made fuller progress with the Scout program.

In 1925 a research psychologist made a study of existing efforts in younger boy programs as well as a summary of the characteristics of this age level, recommending that a program be developed.

In 1928, a fund was made available by one of the major foundations to carry on the needed research and build a program in terms of the findings.

Scientifically Built

In the attempt to build a program in terms of boy nature, a series of careful studies has been made covering: 1. The nature of character and how it may be influenced. 2. The characteristics of boys 9-10-11 years. 3. Available program devices and their adaptation to the natural home and neighborhood situations. 4. Gearing this into the present local and national experience and organization of the Boy Scouts of America.

In the Eastern New Mexico Area Council of which Artesia is a part there are approximately 3,500 boys of cubbing age. There is an increasing demand from this is the first of several articles dealing with cubbing in an effort to acquaint the general public with this new character building program for young boys. In Artesia a definite effort will be made this fall to develop a Cub pack.

Scout Reporter.

ALLRED HOLDS LEAD IN TEXAS FINAL RETURNS

DALLAS, Texas—Returns to the Texas election bureau Tuesday afternoon from 252 out of 254 counties in the state, including 175 complete, show the following totals for candidates in Saturday's democratic primary election:
